Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three months ended June 30, 2001 are not necessarily indicative of the results that may be expected for the year ending March 31, 2002. #### 6. Derivatives and Hedging

## Edgar Filing: NICHOLAS FINANCIAL INC - Form 10QSB

In June 1998, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards ("SFAS") No. 133, "Accounting for Derivative Instruments and Hedging Activities" ("SFAS 133"). This statement establishes requirements for accounting and reporting of derivative instruments and hedging activities. SFAS 133 was updated by the issuance of SFAS No. 137, "Accounting for Derivative Instruments and Hedging Activities - Deferral of the Effective Date of SFAS No. 133" and SFAS No. 138 "Accounting for Certain Derivative Instruments and Certain Hedging Activities - amendment of FASB Statement No. 133." As amended, SFAS 133 establishes accounting and reporting standards for derivative instruments, including certain derivative instruments embedded in other contracts (collectively referred to as derivatives), and for hedging activities.

The Company adopted the provisions of SFAS 133, as amended by SFAS 137 and SFAS 138, on April 1, 2001, which require that all derivative instruments be recorded on the balance sheet at fair value. The estimated fair value of derivative financial instruments represents the amount required to enter into similar offsetting contracts with similar remaining maturities based on quoted market prices.

The Company utilizes interest rate swaps to manage its interest rate exposure. The swaps effectively convert a portion of the Company's floating rate debt to a fixed rate, more closely matching the interest rate characteristics of the Company's finance receivables. When entering into contracts intended by the Company to receive hedge accounting treatment, the Company formally designates and documents the financial instrument as a hedge of a specific underlying exposure, as well as the risk management objectives and strategies for undertaking the hedge transaction.

The Company has entered into the following cash-flow hedges:

On May 11, 1999 the Company entered into an interest rate swap with a notional amount of \$10 million at a fixed rate of 5.81%, maturing on May 24, 2002. On May 21, 1999 the Company entered into two interest rate swaps with notional amounts of \$5 million each, at fixed rates of 5.81% and 6.08%, maturing on May 24, 2001 and May 24, 2004, respectively.

On August 18, 1999 the Company terminated a \$5 million swap maturing on May 24, 2004 in exchange for \$52,000. In addition the Company entered into an interest rate swap with a notional amount of \$10 million at a fixed rate of 5.80%.

On May 17, 2000 the Company entered into an interest rate swap with a notional amount of \$10 million at a fixed rate of 6.87%.

On March 30, 2001 the Company entered into an interest rate swap with a notional amount of \$10 million at a fixed rate of 4.89%, maturing on March 30, 2003.

The Company utilizes the above noted interest rate swaps to manage its interest rate exposure. The swaps effectively convert a portion of the Company's floating rate debt to a fixed rate, more closely matching the interest rate characteristics of the Company's finance receivables.

## Edgar Filing: NICHOLAS FINANCIAL INC - Form 10QSB

The Company has also entered into various interest rate option agreements with maturities through May 17, 2004.

Nicholas Financial, Inc.  
Notes to the Condensed Consolidated Financial Statements  
(Unaudited)

For cash-flow hedge transactions, changes in the fair value of the derivative instrument are recorded as a component of other comprehensive income, and reclassified into earnings in the same period or periods during which earnings are affected by the variability of the cash flows of the hedged item. Any ineffective portion of a derivative instrument's change in fair value is immediately recognized in earnings.

In connection with the adoption of SFAS 133, the Company recorded the fair value of its derivatives as a liability totaling approximately (\$975k) on April 1, 2001. The fair value of such derivative was approximately (\$989k) as of June 30, 2001. The fair value of the options, approximately \$18k, was accounted for in the consolidated statement of income as a reduction to current period earnings.

### 7. Subsequent Events

On August 7, 2001 the Board of Directors of Nicholas Financial, Inc. declared a two-for-one stock split on the Company's outstanding shares of common stock, payable in the form of a 100% stock dividend on September 10, 2001 to shareholders of record as of the close of business on August 28, 2001.

On August 8, 2001 the last subordinated debt holder of Nicholas Financial, Inc converted their \$500,000 note into common stock at a price of \$4.50 per share.
