### NOTE 2:- SIGNIFICANT ACCOUNTING POLICIES

- a. The significant accounting policies applied in the annual financial statements of the Company as of December 31, 2003, are applied consistently in these financial statements. In addition, the following accounting policy is applied:

The accompanying unaudited consolidated financial statements as of September 30, 2004 and for the nine months and three months ended September 30, 2004 and 2003 are unaudited and reflect all adjustments (consisting only of normal recurring adjustments) which are, in the opinion of management, necessary for a fair presentation of the financial position and operating results for the interim periods. The condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto, together with management's discussion and analysis of the financial condition and results of operations, contained in the Company Annual Report on Form 10-KSB for the fiscal year ended December 31, 2003. The results of operations for the nine months ended September 30, 2004 are not necessarily indicative of the results for the entire fiscal year ending December 31, 2004.

The Company and its subsidiary have elected to follow Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees" ("APB No. 25") in accounting for their employee stock option plans. Under APB No. 25, when the exercise price of the Company's share options is less than the market price of the underlying shares on the date of grant, compensation expense is recognized.

The Company and its subsidiary apply Statement of Financial Accounting Standard No. 123, "Accounting for Stock-Based Compensation" ("SFAS No. 123"), and Emerging Issues Task Force No. 96-18, "Accounting for Equity Instruments that are Issued to Other than Employees for Acquiring, or in Conjunction with Selling, Goods or Services" ("EITF 96-18"), with respect to options issued to non-employees. SFAS No. 123 requires the use of an option valuation model to measure the fair value of the options at the date of grant.

accounted for its employee options under the fair value method of that statement. The fair value for these options was estimated at the date of grant using a Black-Scholes Option Valuation Model, with the following weighted-average assumptions for September 30, 2004 and 2003, expected volatility of 113% and 46%, respectively, risk-free interest rates of 4.7% and 1.5%, respectively, dividend yield of 0% for each period, and a weighted-average expected life of the option of 4 years for each period. Stock compensation, for pro-forma purposes, is amortized over the vesting period.

The following table illustrates the effect on net loss and loss per share as if the fair value method had been applied to all outstanding and unvested awards in each period:

### ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATION

With the exception of historical facts stated herein, the matters discussed in this report are "forward looking" statements that involve risks and uncertainties that could cause actual results to differ materially from projected results. Such "forward looking" statements include, but are not necessarily limited to, statements regarding anticipated levels of future revenues and earnings from operations of the Company. Factors that could cause actual results to differ materially include, in addition to other factors identified in this report, dependence on the electronic equipment industry, competition in the power supply industry, dependence on manufacturers in Mexico, China and other risks factors detailed in the Company's Form 10-KSB for the year ended December 31, 2003. Readers of this report are cautioned not to put undue reliance on "forward looking" statements which are, by their nature, uncertain as reliable indicators of future performance. The Company disclaims any intent or obligation to publicly update these "forward looking" statements, whether as a result of new information, future events, or otherwise.

#### GENERAL

We are engaged in the business of designing, developing, manufacturing, marketing and selling switching power supplies to telecommunications, data communication, test and measurement equipment, office and factory automation and instrumentation equipment manufacturers. Revenues are generated from sales to distributors, OEMs in the telecommunication, data communication, test and measurements equipment, office and factory automation and instrumentation manufacturers' equipment in North America, Europe and the United Kingdom.

We have continued our efforts to increase sales to existing and new customers, and continue our strategy to manufacture our product in the Far East. Until revenues increase to a sufficient amount to offset our expenses, we anticipate that we will continue to experience net losses for the near future. We believe that our cash will be sufficient to fund those losses for the near future.

In July 2004, we raised \$250,000 through the sale of 204,918 shares of common stock at \$1.22 per share. We intend to use the additional financing as working

### LOSS BEFORE INCOME TAXES
