Bally`s Atlantic City Implements NiceVision® Digital Video Recording Solution

Ra`anana, Israel, May 5, 2003 - NICE Systems (NASDAQ: NICE), a worldwide leader of multimedia recording solutions, applications and related professional services for business interaction management, today announced that Bally`s Atlantic City has implemented the NiceVision® Harmony digital video and audio recording solution to enhance security monitoring throughout the property. The first phase of this system became fully operational at the property in November 2002. Bally`s Atlantic City currently records 128 channels, with an additional 128 channels scheduled to be added in late 2003.

The initial installation covers areas outside the gaming floor. In addition to replacing analog with digital recording in retail and public areas, Bally`s Atlantic City plans to install digital video recording, with the NiceVision Pro, in the casino, pending regulatory approval. NICE`s "One Application Runs All" capability is designed for efficient management of both the mid-range NiceVision Harmony and the high-end NiceVision Pro digital video recording solutions. Both systems will operate in tandem.

"We are very pleased that Bally`s chose the NiceVision solution," said Jacob Fox, vice president and general manager, NiceVision. "The casino environment is a very challenging one, and Bally`s decision to install NiceVision is further proof of our commitment to listening to our customers and delivering the total solution they need to manage their

security environment, while cutting costs and improving productivity. The casino market continues to be a very important one for NICE Systems."

About NICE

NICE Systems Video Recording For Key UK Airport Security Role

Partner Touchstone installs NiceVision platform Ra'anana, Israel, May 19, 2003 - NICE Systems (NASDAQ: NICE), a worldwide leader of multimedia recording solutions, applications and related professional services for business interaction management, has enabled powerful new content-based information search and retrieval capabilities in a key security recording and storage system at a major UK airport.

Implemented by NICE specialist partner Touchstone Electronics, the system supports image search and retrieval based on real world criteria like registration plate number, rather than relying on simple time or date parameters.

This advance - a feature of the NiceVision Pro video security platform - makes possible a whole new range of security applications where event-driven indexing and access to stored content can increase significantly the value of recordings to users while making their jobs easier, more productive and more efficient.

The Touchstone installation combines vehicle detection, number plate recognition, multiple-camera recording, intelligent threat assessment and super-high image quality coupled to image compression and storage servers.

"The NiceVision video security platform not only gives our customer a powerful security solution, it also delivers valuable business information benefits thanks to its content analysis, database and image quality advances," says Touchstone Electronics managing director Steve Tyler. "It also includes in-built redundancy and is fully scalable to meet future needs."

NiceVision is part of a turnkey security system that marries best-of-breed technology with Touchstone's integration, installation and project management expertise. "Using NICE means we can offer our customers choice, scalability and good performance for the price. NiceVision has been a success here and certainly one we would offer again," adds Tyler. "More importantly, NICE has demonstrated real strength of support for us and our customer."

Based in Oxfordshire with on site facilities at both Heathrow and Gatwick airports, Touchstone Electronics specialises in providing fully integrated systems for airports, covering the use of video, audio and data management applications, with high definition CCTV, access control, fiber optics and public address systems. For more information, visit www.t-e-l.co.uk

____(6)____

NICE provides the most advanced solutions for digital video and audio recording and real-time threat analysis, delivering proactive security management by detecting potential threats and facilitating immediate response. NICE is demonstrating its advances from May 19-22 at the IFSEC event in London on stand K110, Hall 20. For more information, visit <http://www.nice.com/nicevision>.

Sykes Enterprises, Incorporated Employs NICE Solution to Monitor Customer Support Calls in the U.S., Europe, India and the Philippines for its Business Clients

Ra`anana, Israel, May 27, 2003 - NICE Systems (NASDAQ: NICE), a worldwide leader of multimedia recording solutions, applications and related professional services for business interaction management, today announced that Sykes Enterprises, Incorporated (NASDAQ: SYKE), a global leader in providing outsourced customer management solutions and services, deploys NICE call recording and quality monitoring solutions across many of its customer support centers around the world including locations in the United States, Europe, India and the Philippines.

"NICE is Sykes` global standard for call recording and quality monitoring technology," said Gerry Rogers, SVP and chief information officer of Sykes Enterprises, Incorporated. "NICE is an industry leader, and they have a solid platform, significant service and support capabilities, leading product features, a history of product innovation and are best-in-class in both Total and Quality Monitoring recording."

Sykes, headquartered in Tampa, Florida, operates 42 customer support centers around the world providing customer care management solutions to leading companies primarily in the technology, consumer, communications, financial services, and the transportation and leisure industries. Sykes has multiple centers supported by the NICE system and utilizes an array of solutions, including NiceUniverse[®] for quality assurance, NiceLog[®] for total recording environments, and NICE Link for integration into call tracking and CRM platforms.

"The NICE system is an effective tool for allowing our agents to gain a better self awareness of how they sound to the customer," continued Gerry Rogers. "We use the NICE system to capture customer interactions as a part of our feedback and agent training process, resulting in not only higher quality standards, but a greater level of customer satisfaction."

____(8)____

Using the NICE technology, Sykes has the capability to monitor calls occurring anywhere in the world directly from its Tampa, Florida headquarters. This remote monitoring enables Sykes to ensure its clients` customers are receiving the optimum level of technical support and customer service regardless of whether Sykes supports the client in the U.S., Europe or one of its many locations offshore.

"Sykes is a great example of our global capabilities," said Koby Huberman, corporate VP of business development and strategic alliances at NICE Systems. "Sykes` ability to closely monitor customer interactions taking place across the world is quite powerful for them and for their clients. Our solutions help organizations manage their quality assurance worldwide for improved agent performance and improved customer experiences."

About Sykes Enterprises, Incorporated

Sykes is a global leader in providing customer management solutions and services to companies primarily in the technology, consumer, communications, financial services, and the transportation and leisure industries. Sykes specializes in providing flexible, high quality customer support outsourcing solutions through an integrated onshore/offshore global delivery model with an emphasis on technical support and customer service. These services are delivered through multiple communication channels encompassing phone, e-mail, web, and chat. Sykes complements its customer support outsourcing services with technical staffing and fulfillment

services - delivering solutions that are customized to meet each company's unique customer management needs. Headquartered in Tampa, Florida, Sykes operates 42 customer support centers with operations throughout the United States, Canada, Europe, Latin America, Asia and Africa.
