26 March 2003

National Grid Transco close period trading update
for the year ended 31 March 2003

Financial results for the year in line with expectations

National Grid Transco plc (the "Group") is today issuing its trading update prior to entering its close period and the announcement of its full year results on Wednesday 21 May 2003.

Operating performance for the year ended 31 March 2003 will be in line with our expectations. This includes progress on programmes to deliver controllable cost reductions and merger synergies. In addition, the impact of the weakened economy and dollar has been offset by the benefits of favourable weather.

Profit before tax (excluding exceptional items and goodwill amortisation) is now expected to be in excess of £30m as a result of our decision to suspend, with effect from 1 October 2002, recognition of cash) UK pension surplus credits.

As previously indicated, we do not expect to release any prior year tax provisions and the effective tax rate on the profit before tax (excluding exceptional items) is anticipated to be approximately 20%.

The cashflow impact of the programmes previously announced to deliver restructuring and operational benefits, combined with the Group's share buy-back programme, will result in net debt of around £1 billion at 31 March 2003.

During the course of the year (up to 25 March 2003), the Group purchased for cancellation 24,220,000 of its ordinary shares at an average price of 401.59p. The weighted average number of shares for the year ending 31 March 2003 for purposes of calculating earnings per share is expected to be around 1.2 billion.

Cautionary statement

This announcement contains certain statements that are neither reported financial results nor historical information.
