On July 26, 2004, Tyson Foods, Inc. (the "Company") issued a press release announcing its unaudited results of operations for the third quarter ending June 26, 2004. The press release is furnished herewith as Exhibit 99.1 and incorporated by reference herein.

The Company's conference call relating to the press release includes certain non-GAAP financial measures. A "non-GAAP financial measure" is defined as a numerical measure of a company's financial performance, financial position or cash flows that excludes (or includes) amounts that are included in (or excluded from) the most directly comparable measure calculated and presented in accordance with GAAP in the Company's financial statements.

Non-GAAP financial measures utilized by the Company include presentations of earnings per share and other GAAP measures of operating performance that exclude or include the effect of the closings of selected operations, BSE-related charges, litigation settlements and other similar

events. The Company's management believes these non-GAAP financial measures provide useful information to investors by removing the effect of variances in GAAP reported results of operations that are not indicative of fundamental changes in the earnings capacity of the Company's operations. Management also believes that the presentation of the non-GAAP financial measure is consistent with its past practice, as well as industry practice in general, and will enable investors and analysts to compare current non-GAAP measures with non-GAAP measures presented in prior periods. The non-GAAP financial measures used by the Company should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP.

### *Limitation on Incorporation by Reference*

In accordance with general instructions B.2 and B.6 of Form 8-K, the information in this report, including exhibits, is furnished pursuant to Items 9 and 12 and shall not be deemed "filed" for the purposes of Section 18 of the Securities Exchange Act of 1934, or otherwise subject to the liability of that section.

### TYSON REPORTS THIRD QUARTER AND NINE MONTHS RESULTS

**Springdale, Arkansas-July 26, 2004** - Tyson Foods, Inc. (NYSE: TSN), today reported \$0.45 diluted earnings per share for the third fiscal quarter ended June 26, 2004, compared to \$0.23 diluted earnings per share in the same quarter last year. Third quarter 2004 sales were \$6.6 billion compared to \$6.3 billion for the same period last year. Operating income was \$323 million compared to \$201 million and earnings were \$161 million compared to \$79 million for the same period last year.

Pretax earnings for the third quarter of fiscal 2003 included \$42 million, or \$0.08 per diluted share, received in conjunction with vitamin antitrust litigation, which was partially offset by \$19 million of accruals, or \$0.03 per diluted share, related to the closing of our Berlin, Maryland poultry operation and \$10 million of charges, or \$0.02 per diluted share, related to the impairment of an equity interest in a live swine operation. The combined effect increased diluted earnings per share by \$0.03.

Diluted earnings per share for the nine months of fiscal 2004 were \$0.94 compared to \$0.54 in the same period last year. Sales for the nine months of fiscal 2004 were \$19.3 billion compared to \$18.0 billion for the same period last year. Operating income for the nine months of fiscal 2004 was \$747 million compared to \$529 million and earnings were \$337 million compared to \$190 million for the same period last year.

Pretax earnings for the nine months of fiscal 2004 included \$40 million of costs, or \$0.07 per diluted share, related to poultry and prepared foods plant closings, and \$61 million of costs, or \$0.11 per diluted share of BSE-related charges.

Pretax earnings for the first nine months of fiscal 2003 included \$164 million, or \$0.30 per diluted share, received in connection with vitamin antitrust litigation, which was partially offset by \$66 million of costs, or \$0.12 per diluted share, related to the closing of poultry operations in the first and third quarters of fiscal 2003 and \$10 million of charges, or \$0.02 per diluted share, related to the impairment of an equity interest in a live swine operation. The combined effect increased diluted earnings per share by \$0.16.

John Tyson, chairman and CEO, said, "I am very proud of our people and what we accomplished this quarter. We generated record sales and net income in spite of higher grains, raw material costs and limited access to export markets. Our pricing and mix of value added products improved, and our strong cash flow put us on target to reach the lower end of our debt goal by the end of the fiscal year."

At this time, the Company expects fiscal 2004 diluted earnings per share in the range of \$1.20 to \$1.30.

Total	\$ 323	\$ 201	\$ 122	4.9%	3.2%

Chicken segment sales increased in the third quarter of fiscal 2004, compared to the same period last year. Foodservice chicken sales increased 13.0%, retail chicken sales increased 13.1% and international chicken sales increased 10.7%. Excluding plant closing related accruals of \$19 million recorded in the third quarter of fiscal 2003, operating income increased \$79 million. The sales and operating income increases are primarily due to higher market prices, higher average selling prices and improved operating efficiencies. Additionally, operating income for the quarter was negatively impacted by an approximate \$90 million increase in grain costs, compared to the prior year, partially offset by a \$44 million net benefit from the Company's on-going commodity risk management activities related to grain purchases. The increase in the Company's domestic Chicken segment sales volumes were offset by decreased international sales volumes due to the continued import restrictions by various countries caused by the avian influenza outbreaks in the United States.

Beef segment sales decreased in the third quarter of fiscal 2004, compared to the same period last year. Domestic fresh meat beef sales increased 1.4%, international beef sales decreased 43.5% and case-ready beef sales increased 13.1%. Operating income for the quarter benefited \$44 million, as compared to \$4 million for the same quarter last year, on open mark-to-market positions as of June 26, 2004, from the Company's on-going commodity risk management activities related to its fixed forward boxed beef sales and also benefited from increased volumes and margins at our Lakeside operation in Canada.

Pork segment sales increased in the third quarter of fiscal 2004, compared to the same period last year, as domestic fresh meat pork sales increased 28.3%, international pork sales increased 64.9%, case-ready pork sales increased 26.0% and live swine sales increased slightly. The increase in the Pork segment's operating income was due to higher average selling prices as pork benefited from stronger international markets and operating efficiencies due to increased volume year over year, more than offsetting increases in live costs.

Prepared Foods segment sales increased in the third quarter of fiscal 2004, compared to the same period last year, as foodservice prepared foods sales increased 10.6%, international prepared foods sales increased 2.5% and retail prepared foods sales increased 1.5%. Sales increases caused by higher average selling prices were more than offset by increased raw material prices, declines in volumes and operating inefficiencies caused by reduced capacity utilizations.

Other segment operating income decreased primarily due to settlements of \$42 million received in the third quarter of fiscal 2003 related to vitamin antitrust litigation.

Chicken segment nine months sales increased, compared to the same period last year, as foodservice chicken sales increased 8.3%, retail chicken sales increased 13.1% and international chicken sales increased 14.0%. Excluding plant closing related accruals of \$13 million and \$66 million recorded in the nine months of fiscal 2004 and 2003, respectively, operating income increased \$292 million. The sales and operating income increases are primarily due to higher market prices, higher average selling prices and improved operating efficiencies. Additionally, operating income benefited from the Company's on-going commodity risk management activities related to grain purchases by \$147 million, partially offset by approximately \$133 million of increased grain costs. The increase in the Company's domestic Chicken segment sales volumes were offset by decreased international sales volumes due to the continued import restrictions by various countries caused by the avian influenza outbreaks in the United States.

Beef segment nine months sales increased compared to the same period last year, as domestic fresh meat beef sales increased 6.9%, international beef sales decreased 26.4% and case-ready beef sales increased 17.6%. Operating income decreased primarily due to BSE-related charges of \$61 million recorded in the first quarter of fiscal 2004. This decrease was partially offset by benefits of \$44 million, as compared to \$4 million for the same period last year, on open mark-to-market positions as of June 26, 2004, from the Company's on-going commodity risk management activities related to its fixed forward boxed beef sales and from increased volumes and margins at our Lakeside operation in Canada.

Pork segment nine months sales increased compared to the same period last year, as domestic fresh meat pork sales increased 22.2%, international pork sales increased 67.1%, case-ready pork sales increased 30.5% and live swine sales decreased 27.5%. The increase in the Pork segment's operating income was due to higher average selling prices as pork benefited from stronger international markets and production efficiencies due to increased volume year over year, more than offsetting increases in live costs.

Prepared Foods segment nine months sales increased compared to the same period last year, as foodservice prepared foods sales increased 11.5%, international prepared foods sales increased 18.6% and retail prepared foods sales decreased 1.3%. Excluding plant closing costs of approximately \$27 million recorded in fiscal 2004, operating income was \$60 million and 2.9% of sales. The increase is primarily due to higher

average selling prices, partially offset by increased raw material prices and decreased volumes.

Other segment operating income decreased primarily due to settlements of \$164 million received in fiscal 2003 related to vitamin antitrust litigation.

Tyson Foods operates in five business segments: Chicken, Beef, Pork, Prepared Foods and Other. The Company measures segment profit as operating income.

The Chicken segment is primarily involved in the processing of live chickens into fresh, frozen and value-added chicken products sold through domestic food service, domestic food retailers, wholesale club markets that service small foodservice operations, small businesses and individuals, as well as specialty and commodity distributors who deliver to restaurants, schools and international markets throughout the world. The Chicken segment also includes sales from allied products and the chicken breeding stock subsidiary.

The Beef segment is primarily involved in the processing of live fed cattle and fabrication of dressed beef carcasses into primal and sub-primal meat cuts and case-ready products. It also involves deriving value from allied products such as hides and variety meats for sale to further processors and others. The Beef segment markets its products to food retailers, distributors, wholesalers, restaurants and hotel chains and other food processors in domestic and international markets. Allied products are also marketed to manufacturers of pharmaceuticals and technical products.

The Pork segment is primarily involved in the processing of live market hogs and fabrication of pork carcasses into primal and sub-primal cuts and case-ready products. This segment also represents the Company's live swine group and related allied product processing activities. The Pork segment markets its products to food retailers, distributors, wholesalers, restaurants and hotel chains and other food processors in domestic and international markets. It also sells allied products to pharmaceutical and technical products manufacturers, as well as live swine to pork processors.

Prepared Foods segment includes the Company's operations that manufacture and market frozen and refrigerated food products. Products include pepperoni, beef and pork toppings, pizza crusts, flour and corn tortilla products, appetizers, hors d'oeuvres, desserts, prepared meals, ethnic foods, soups, sauces, side dishes, specialty pasta and meat dishes as well as branded and processed meats. The Prepared Foods segment markets its products to food retailers, distributors, wholesalers, restaurants and hotel chains.

The Other segment includes the logistics group and other corporate activities not identified with specific protein groups.
