TUPPERWARE BRANDS CORPORATION

(Exact name of registrant as specified in its charter)

---

Delaware

(State or other jurisdiction of  
incorporation or organization)

36-4062333

(I.R.S. Employer  
Identification No.)

14901 South Orange Blossom Trail, Orlando, Florida

(Address of principal executive offices)

32837

(Zip Code)

Registrant's telephone number, including area code: (407) 826-5050

---

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☒

Accelerated filer

☐

Non-accelerated filer ☐ (Do not check if a smaller reporting company)

Smaller reporting company ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

As of October 30, 2014, 50,370,807 shares of the common stock, \$0.01 par value, of the registrant were outstanding.

TUPPERWARE BRANDS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Note 1: Summary of Significant Accounting Policies

Basis of Presentation: The condensed consolidated financial statements include the accounts of Tupperware Brands Corporation and its subsidiaries, collectively "Tupperware" or the "Company", with all intercompany transactions and balances having been eliminated. These condensed consolidated financial statements and related notes should be read in conjunction with the audited 2013 financial statements included in the Company's Annual Report on Form 10-K for the year ended December 28, 2013.

Certain prior year amounts have been reclassified to conform with current year presentation.

These condensed consolidated financial statements are unaudited and have been prepared following the rules and regulations of the United States Securities and Exchange Commission and, in the Company's opinion, reflect all adjustments, including normal recurring items that are necessary for a fair statement of the results for the interim periods. Certain information and note disclosures normally included in the statement of financial position, results of operations, comprehensive income and cash flows prepared in conformity with accounting principles generally accepted in the United States of America have been condensed or omitted as permitted by such rules and regulations. Operating results of any interim period presented herein are not necessarily indicative of the results that may be expected for a full fiscal year.

Use of Estimates: The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements, as well as the reported amounts of revenues and expenses during the reporting period. Actual results could differ materially from these estimates.

Venezuela Foreign Currency Translation: In June 2010, several large Venezuelan commercial banks began operating the Transaction System for Foreign Currency Denominated Securities (SITME), which established a "banded" exchange rate of 5.3 bolivars to the U.S. dollar. In February 2013, the Venezuelan government set a new official exchange rate of 6.3 bolivars to the U.S. dollar ("Official Rate") and abolished the banded exchange rate. In March 2013, the Venezuelan government created the Complimentary System of Foreign Currency Acquirement ("SICAD 1"). SICAD 1 is an auction system and allows entities in specific sectors to bid for U.S. dollars. In March 2014, the Venezuelan government opened an additional foreign exchange mechanism known as SICAD 2, which is available to all industry sectors.

In late March 2014, the Company was invited to participate, for the first time, in the SICAD 1 auction process at a rate of 10.8 bolivars to the U.S. dollar ("SICAD 1 Rate"). The Company did not exchange bolivars through either the SICAD 1 or SICAD 2 mechanisms in the first or second quarters of 2014, though it did exchange currency at the Official Rate in the first quarter. As a result, the Company continued to use the Official Rate to measure its operating activity during the first quarter of 2014. As of the end of the first quarter of 2014, the Company anticipated making future currency exchanges under the SICAD 1 Rate as the Official Rate was not expected to be widely available in the future. As a result, the Company used the SICAD 1 Rate to remeasure its balance sheet at March 29, 2014. The negative impact of this change in exchange rates used to remeasure the net monetary assets on the balance sheet was \$13.4 million pretax, and was recorded in Other Expense on the Consolidated Statements of Income.

Table of Contents

## TUPPERWARE BRANDS CORPORATION

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

In June 2014, the Venezuelan government mandated, based on the results of a pricing audit, that the Company significantly lower its suggested retail selling prices in order to comply with laws limiting prices and profit margins across the Venezuelan economy. Due to certain assumptions made by the Venezuelan government during the pricing audit, as well as anticipated changes in its value chain in light of the pricing mandate, the Company anticipates using the SICAD 2 Rate, which is currently 50.0 bolivars to the U.S. dollar, to make certain future exchanges of bolivars for U.S. dollars and measure its operating activities. As a result, the Company remeasured the net monetary assets on its balance sheet at the end of the second quarter at the SICAD 2 Rate. The negative impact of this change in exchange rate was \$15.8 million, which was also recorded in Other Expense. There were also negative \$6.4 million and \$10.6 million pretax impacts in the second and third quarters of 2014, respectively, of recording in cost of goods sold inventory at the exchange rates at which it was purchased, or manufactured, rather than the weaker exchange rates used to translate bolivar sales in those quarters. In addition, in the third quarter of 2014, the Company exchanged bolivars at exchange rates more favorable than the SICAD 2 Rate at which the bolivars were recorded at the end of the second quarter of 2014. These transactions generated an exchange gain of \$4.6 million, which was included in Other Income on the Company's Consolidated Statements of Income.

As of September 27, 2014, the Company had approximately \$6 million of net monetary assets in Venezuela, which were of a nature that would generate income or expense associated with future exchange rate fluctuations versus the U.S. dollar.

## Note 2: Shipping and Handling Costs

The cost of products sold line item includes costs related to the purchase and manufacture of goods sold by the Company. Among these costs are inbound freight charges, purchasing and receiving costs, inspection costs, depreciation expense, internal transfer costs and warehousing costs of raw material, work in process and packing materials. The warehousing and distribution costs of finished goods are included in delivery, sales and administrative expense ("DS&A"). Distribution costs are comprised of outbound freight and associated labor costs. Fees billed to customers associated with the distribution of products are classified as revenue. The distribution costs included in DS&A expense for the third quarters of 2014 and 2013 were \$36.8 million and \$36.2 million, respectively, and were \$116.8 million and \$114.6 million for the year-to-date periods ended September 27, 2014 and September 28, 2013, respectively.

## Note 3: Promotional Costs

The Company frequently makes promotional offers to members of its independent sales force to encourage them to fulfill specific goals or targets for sales levels, party attendance, recruiting of new sales force members or other business-critical functions. The awards offered are in the form of cash, product awards, special prizes or trips. The Company accrues for the costs of these awards during the period over which the sales force qualifies for the award and reports these costs primarily as a component of DS&A expense. These accruals require estimates as to the cost of the awards, based upon estimates of achievement and actual cost to be incurred. During the qualification period, actual results are monitored, and changes to the original estimates are made when known. Promotional and other sales force compensation expenses included in DS&A expense totaled \$100.0 million and \$102.3 million for the third quarters of 2014 and 2013, respectively, and \$325.2 million and \$332.3 million for the year-to-date periods ended September 27, 2014 and September 28, 2013, respectively.

## Note 4: Inventories

(In millions)	September 27, 2014	December 28, 2013
Finished goods	\$277.2	\$245.0
Work in process	29.9	27.4
Raw materials and supplies	41.0	41.0
Total inventories	\$348.1	\$313.4

## Note 5: Net Income Per Common Share

Basic per share information is calculated by dividing net income by the weighted average number of shares outstanding. Diluted per share information is calculated by also considering the impact of potential common stock on both net income and the weighted average number of shares outstanding.

The elements of the earnings per share computations were as follows:

(In millions, except per share amounts)	13 weeks ended		39 weeks ended	
	September 27, 2014	September 28, 2013	September 27, 2014	September 28, 2013
Net income	\$32.3	\$49.9	\$132.1	\$184.5
Weighted-average shares of common stock outstanding	50.2	51.2	50.2	52.4
Common equivalent shares:				
Assumed exercise of dilutive options, restricted shares, restricted stock units and performance share units	0.8	1.2	0.9	1.2
Weighted-average common and common equivalent shares outstanding	51.0	52.4	51.1	53.6
Basic earnings per share	\$0.64	\$0.97	\$2.63	\$3.52
Diluted earnings per share	\$0.63	\$0.95	\$2.59	\$3.44
Shares excluded from the determination of potential common stock because inclusion would have been anti-dilutive	0.4	0.1	0.4	0.1

Table of Contents

## TUPPERWARE BRANDS CORPORATION

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

Pretax amounts reclassified from accumulated other comprehensive loss that related to cash flow hedges consisted of net gains of \$5.0 million and \$1.6 million for the year-to-date periods ended September 27, 2014 and September 28, 2013, respectively. Associated with these items were tax provisions of \$1.1 million and \$0.6 million for the periods ended September 27, 2014 and September 28, 2013, respectively. See Note 11 for further discussion of derivatives. For the year-to-date periods ended September 27, 2014 and September 28, 2013, pretax amounts reclassified from accumulated other comprehensive loss related to pension and other post-retirement items consisted of prior service benefits of \$0.5 million and \$0.4 million, respectively, and actuarial losses of \$1.8 million and \$3.9 million, respectively. For the periods ended September 27, 2014 and September 28, 2013, there were pension settlement costs of \$0.4 million and \$3.0 million, respectively. The tax benefit associated with these items was \$0.4 million and \$1.4 million, respectively. See Note 13 for further discussion of pension and other post-retirement benefit costs.

## Note 7: Re-engineering and Other Exit Costs

The Company recorded \$2.6 million and \$2.7 million in re-engineering and impairment charges during the third quarters of 2014 and 2013, respectively, and \$8.3 million and \$7.1 million for the respective year-to-date periods. In both years, these charges were primarily related to severance costs incurred for headcount reductions in several of the Company's operations in connection with changes in its management and organizational structures, and in 2014, the decision to cease operating the Armand Dupree business in the United States, the Nutrimetics business in Thailand and a manufacturing plant in India, as well as a write-off of \$1.1 million in capitalized software in connection with a new information systems project.

The balances included in accrued liabilities related to re-engineering and impairment charges as of September 27, 2014 and December 28, 2013 were as follows:

(In millions)	September 27, December 28,	
	2014	2013
Beginning of the year balance	\$2.6	\$1.5
Provision	8.3	9.3
Cash expenditures:		
Severance	(6.3	) (6.1
Other	(1.8	) (2.0
Non-cash asset impairments	(1.5	) (0.1
End of period balance	\$1.3	\$2.6

The accrual balance as of September 27, 2014, related primarily to severance payments to be made by the end of the fourth quarter of 2014. In connection with the decisions to cease operating the Armand Dupree business in the United States and the Nutrimetics business in Thailand, the Company recorded \$1.9 million and \$0.4 million, respectively, in cost of sales for inventory obsolescence during the first half of 2014.

Table of Contents

TUPPERWARE BRANDS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

Note 8: Goodwill and Intangible Assets

The Company's goodwill and intangible assets relate primarily to the December 2005 acquisition of the direct-to-consumer businesses of Sara Lee Corporation. The Company also recorded as assets the fair value of various trademarks and tradenames acquired in conjunction with its purchase of the Sara Lee direct-to-consumer businesses. Certain tradenames are allocated between multiple reporting units.

The Company does not amortize its goodwill or indefinite-lived tradename intangible assets. Instead, the Company performs an assessment to test these assets for impairment annually, or more frequently if events or changes in circumstances indicate that a triggering event for impairment testing has occurred. The annual process for goodwill and intangible assets generally begins with an assessment of qualitative factors. The qualitative factors evaluated by the Company include: macro-economic conditions of the local business environment, overall financial performance, sensitivity analysis from the most recent fair value analysis, and other entity-specific and intangible asset specific factors as deemed appropriate. Further testing is performed if the Company determines that it is more likely than not that the reporting unit or indefinite-lived intangible asset's fair value is less than the respective carrying values.

When the Company determines the two-step goodwill impairment test is necessary, the first step involves comparing the fair value of a reporting unit to its carrying amount, including goodwill, after any intangible asset impairment charges. If the carrying amount of the reporting unit exceeds its fair value, a second step is performed to determine whether there is a goodwill impairment, and if so, the amount of the loss. Similarly, when the Company determines it necessary, the quantitative impairment test for the Company's indefinite-lived intangible assets involves comparing the estimated fair value of the assets to the carrying amounts. If the carrying amount of the intangible asset exceeds its estimated fair value, an impairment charge is recognized in an amount equal to the excess.

In the third quarter of 2014, the Company completed the annual assessments for all of its reporting units and indefinite-lived intangible assets, concluding there were no impairments. The Company only considers the goodwill balances of \$114.1 million and \$26.3 million associated with the Fuller Mexico and NaturCare reporting units, respectively, to be significant relative to total equity as of the end of the third quarter 2014.

The Company performed a step 1 impairment test for only the goodwill associated with the Fuller Mexico reporting unit. The fair value analysis for Fuller Mexico was completed using a combination of the income and market approach with a 75 percent weighting on the income approach. The significant assumptions used in the income approach included estimates regarding future operations and the ability to generate cash flows, including projections of revenue, costs, utilization of assets and capital requirements. The income approach also requires an estimate as to the appropriate discount rate to be used. The most sensitive estimate in this valuation is the projection of operating cash flows, as these provide the basis for the fair market valuation. The Company's cash flow model used a forecast period of 10 years and a terminal value. The significant assumptions for the forecast included annual revenue growth rates ranging from 2 percent to 4 percent with an average growth rate of 4 percent, including a 3 percent growth rate used in calculating the terminal value. The growth rates were determined by reviewing historical results of the operating unit and the historical results of the Company's other similar business units, along with the expected contribution from growth strategies being implemented in the Fuller Mexico reporting unit. The discount rate used was 15.3 percent. The market approach relies on an analysis of publicly-traded companies similar to Tupperware and deriving a range of revenue and profit multiples. The publicly-traded companies used in the market approach were selected based on their having similar product lines of consumer goods, beauty products and/or companies using a direct-selling distribution method. The resulting multiples were then applied to the reporting unit to determine fair value.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

Despite the results of Fuller Mexico being slightly below previous expectations and current expectations for future results, the amount by which the estimated fair value of the Fuller Mexico reporting unit exceeded its carrying value, at 24 percent, was in line with the previous impairment assessment performed in the third quarter of 2013. Lower than expected recruiting and retention of sales force members in light of the competitive environment in that market, as well as high field manager turnover has led to decreased operating performance. Field managers are those directly responsible for recruiting, motivating and training sales force members. This was offset by a lower discount rate and a lower entity carrying value from amortization of the definite lived Fuller tradename asset that began in the third quarter of 2013. Despite the amount by which the estimated fair value of the reporting unit exceeded its carrying value resulting from the annual assessment, a smaller sales force size; operating performance significantly below current expectations, including changes in projected future revenue, profitability and cash flow, as well as higher interest rates or cost of capital, could have a further negative effect on the fair value of the reporting unit and therefore reduce the fair value below the carrying value. This would result in recording an impairment to the goodwill of Fuller Mexico. In the third quarter of 2014, the Company performed a qualitative assessment for the goodwill associated with the NaturCare reporting unit and concluded it was more likely than not that the fair value of the reporting unit was greater than its carrying amount. The estimated fair value of the NaturCare reporting unit exceeded the carrying value by 29 percent as of June 2012, the date of the Company's most recent step 1 analysis of this unit. Based on the Company's evaluation of the assumptions and sensitivities associated with the step 1 analysis for NaturCare, the Company concluded that the fair value substantially exceeded its carrying value as of June 2012.

Other than for the Fuller Mexico reporting unit, management has concluded there is no significant foreseeable risk of failing a future step 1 impairment test, nor is there significant foreseeable risk of the fair value of the indefinite-lived intangible assets falling below their respective carrying values. Given the sensitivity of fair value valuations to changes in cash flow or market multiples, the Company may be required to recognize an impairment of goodwill or indefinite-lived intangible assets in the future due to changes in market conditions or other factors related to the Company's performance. Actual results below forecasted results or a decrease in the forecasted future results of the Company's business plans or changes in discount rates could also result in an impairment charge, as could changes in market characteristics including declines in valuation multiples of comparable publicly-traded companies. Further impairment charges would have an adverse impact on the Company's net income and shareholders' equity.

## Note 9: Segment Information

The Company manufactures and distributes a broad portfolio of products, primarily through independent direct sales consultants. Certain operating segments have been aggregated based upon consistency of economic substance, geography, products, production process, class of customers and distribution method.

Effective with the first quarter of 2014, the management structure of the Company's Nutrimetics France business was re-aligned for operational and strategic purposes. Consequently, Nutrimetics France is now being reported in the Asia Pacific segment, whereas it had previously been reported in the Europe segment. Comparable information from 2013 has been reclassified to conform to the new presentation. In full year 2013, Nutrimetics France generated less than 1 percent of total sales.

The Company's reportable segments include the following:

Europe	Primarily design-centric preparation, storage and serving solutions for the kitchen and home
Asia Pacific	through the Tupperware® brand. Europe also includes Avroy Shlain® which sells beauty and
Tupperware	personal care products. Asia Pacific also sells beauty and personal care products in some of
North America	its units under the NaturCare®, Nutrimetics® and Fuller® brands.
Beauty North America	Premium cosmetics, skin care and personal care products marketed under the
	BeautiControl® brand in the United States, Canada and Puerto Rico and the Armand
	Dupree® and Fuller Cosmetics® brands in Mexico and Central America.
South America	Both housewares and beauty products under the Armand Dupree®, Fuller®, Nutrimetics®,
	Nuvo® and Tupperware® brands.

Table of Contents

## TUPPERWARE BRANDS CORPORATION

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

Worldwide sales of beauty and personal care products totaled \$122.5 million and \$128.5 million in the third quarters of 2014 and 2013, respectively, and \$381.9 million and \$416.0 million for the respective year-to-date periods.

TUPPERWARE BRANDS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

Note 10: Debt

Senior Notes

On June 2, 2011, the Company completed the sale of \$400 million in aggregate principal amount of 4.750% Senior Notes due June 1, 2021 at an issue price of 98.989% under an indenture (the "Indenture") entered into by the Company and its 100% owned subsidiary, Dart Industries Inc. (the "Guarantor").

On March 11, 2013, the Company issued and sold an additional \$200 million in aggregate principal amount of these notes (both issuances together, the "Senior Notes") at an issue price of 103.781% in a registered public offering. The Senior Notes form a single series under the Indenture. The March 2013 proceeds were used to repay a 90-day \$75 million promissory note entered into on February 1, 2013, as well as a portion of outstanding borrowings under the Company's multicurrency credit agreement in place at that time. The remaining net proceeds were used to fund share repurchases under the Company's common stock repurchase authorization. As a result of the 2013 issuance, the Company recorded a premium of \$7.6 million to be amortized over the life of the Senior Notes. The Company also incurred \$1.5 million in deferred financing costs, of which \$1.3 million was netted with the bond premium on the statement of cash flows.

The Senior Notes were issued under an Indenture between the Company, the Guarantor and Wells Fargo Bank, N.A., as trustee. As security for its obligations under the guarantee of the Senior Notes, the Guarantor has granted a security interest in certain "Tupperware" trademarks and service marks. The guarantee and the lien securing the guarantee may be released under certain customary circumstances specified in the Indenture. These customary circumstances include:

- payment in full of principal of and premium, if any, and interest on the Senior Notes;
- satisfaction and discharge of the Indenture;
- upon legal defeasance or covenant defeasance of the Senior Notes as set forth in the Indenture;
- as to any property or assets constituting Collateral owned by the Guarantor that is released from its Guarantee in accordance with the Indenture;
- with the consent of the Holders of the requisite percentage of Senior Notes in accordance with the Indenture; and
- if the rating on the Senior Notes is changed to investment grade in accordance with the Indenture.

Credit Agreement

In September 2013, the Company and its wholly-owned subsidiary, Tupperware International Holdings B.V. (the "Subsidiary Borrower"), amended and restated their multicurrency Credit Agreement (the "Credit Agreement") with their consortium of lenders. The Credit Agreement makes available to the Company and the Subsidiary Borrower a committed five-year credit facility in an aggregate amount of \$650 million (the "Facility Amount"). With the agreement of its lenders, the Company is permitted to increase, on up to three occasions, the Facility Amount by a total of up to \$200 million (for a maximum aggregate Facility Amount of \$850 million), subject to certain conditions. As of September 27, 2014, the Company had total borrowings of \$311.7 million outstanding under its Credit Agreement, with \$103.1 million of that amount denominated in euro.

Loans made under the revolving credit facility bear interest under a formula that includes, at the Company's option, one of three different base rates, plus an applicable spread. The Company generally selects the London interbank offered rate ("LIBOR") for the applicable currency and interest period as its interest rate base. As of September 27, 2014, the Credit Agreement dictated a spread of 175 basis points, which gave the Company a weighted average interest rate on LIBOR based borrowings of 1.85 percent under the Credit Agreement.

The Credit Agreement has customary financial covenants related to interest coverage and leverage. These restrictions are not expected to impact the Company's operations. As of September 27, 2014, and currently, the Company had considerable cushion under its financial covenants.

Table of Contents

TUPPERWARE BRANDS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

The Guarantor unconditionally guarantees all obligations and liabilities of the Company and the Subsidiary Borrower relating to this Credit Agreement, as well as the Senior Notes, supported by a security interest in certain "Tupperware" trademarks and service marks.

In February 2014, the Company entered into a \$75.0 million uncommitted line of credit with Credit Agricole Corporate and Investment Bank ("Credit Agricole"), one of the participating banks in the Company's Credit Agreement. This line of credit dictates an interest rate of LIBOR plus 125 basis points. As of September 27, 2014, there was no amount outstanding under this uncommitted line of credit.

In July 2014, the Company entered into a \$100.0 million uncommitted line of credit with HSBC Bank USA ("HSBC"), one of the participating banks in the Company's Credit Agreement. This line of credit dictates an interest rate of LIBOR plus 100 basis points. As of September 27, 2014, there was no amount outstanding under this uncommitted line of credit.

At September 27, 2014, the Company had \$619.8 million of unused lines of credit, including \$336.2 million under the committed, secured Credit Agreement, and \$283.6 million available under various uncommitted lines around the world, including the uncommitted lines of credit with Credit Agricole and HSBC.

Note 11: Derivative Instruments and Hedging Activities

The Company is exposed to fluctuations in foreign currency exchange rates on the earnings, cash flows and financial position of its international operations. Although this currency risk is partially mitigated by the natural hedge arising from the Company's local manufacturing in many markets, a strengthening U.S. dollar generally has a negative impact on the Company. In response to this fact, the Company uses financial instruments to hedge certain of its exposures and to manage the foreign exchange impact to its financial statements. At its inception, a derivative financial instrument used for hedging is designated as a fair value, cash flow or net equity hedge.

Fair value hedges are entered into with financial instruments such as forward contracts, with the objective of limiting exposure to certain foreign exchange risks primarily associated with accounts payable and non-permanent intercompany transactions. For derivative instruments that are designated and qualify as fair value hedges, the gain or loss on the derivative, as well as the offsetting gain or loss on the hedged item attributable to the hedged risk, are recognized in current earnings. In assessing hedge effectiveness, the Company excludes forward points, which are considered to be a component of interest expense. The forward points on fair value hedges resulted in pretax gains of \$2.3 million and \$3.5 million in the third quarters of 2014 and 2013, respectively, and pretax gains of \$7.5 million and \$7.7 million for the respective year-to-date periods.

The Company also uses derivative financial instruments to hedge foreign currency exposures resulting from certain forecasted purchases and classifies these as cash flow hedges. The Company's cash flow hedge contracts are for periods ranging from one to fifteen months. The effective portion of the gain or loss on the hedging instrument is recorded in other comprehensive income and is reclassified into earnings as the transactions being hedged are recorded. As such, the balance at the end of the reporting period in other comprehensive income, related to cash flow hedges, will be reclassified into earnings within the next fifteen months. The associated asset or liability on the open hedges is recorded in other current assets or accrued liabilities, as applicable. In assessing hedge effectiveness, the Company excludes forward points, which are included as a component of interest expense.

The Company also uses financial instruments, such as forward contracts, to hedge a portion of its net equity investment in international operations and classifies these as net equity hedges. Changes in the value of these derivative instruments, excluding any ineffective portion of the hedges, are included in foreign currency translation adjustments within accumulated other comprehensive loss. The Company recorded a net gain/(loss) associated with these hedges, in other comprehensive income, net of tax, of \$6.0 million and \$(3.9) million in the third quarters of 2014 and 2013, respectively, and net gains of \$2.2 million and \$7.2 million for the respective year-to-date periods. Due to the permanent nature of the investments, the Company does not anticipate reclassifying any portion of these amounts to the income statement in the next twelve months. In assessing hedge effectiveness, the Company excludes forward points, which are included as a component of interest expense.

Table of Contents

TUPPERWARE BRANDS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

While the Company's net equity and fair value hedges of non-permanent intercompany balances mitigate its exposure to foreign exchange gains or losses, they result in an impact to operating cash flows as they are settled, whereas in some cases the hedged items do not generate offsetting cash flows. The net cash flow impact of these currency hedges was an inflow of \$0.1 million and \$3.8 million for the year-to-date periods ended September 27, 2014 and September 28, 2013, respectively.

Table of Contents

## TUPPERWARE BRANDS CORPORATION

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

Following is a listing of the Company's outstanding derivative financial instruments at fair value as of September 27, 2014 and December 28, 2013. Related to the forward contracts, the “buy” amounts represent the U.S. dollar equivalent of commitments to purchase foreign currencies, and the “sell” amounts represent the U.S. dollar equivalent of commitments to sell foreign currencies, all translated at the period-end market exchange rates for the U.S. dollar. All forward contracts are hedging net investments in certain foreign subsidiaries, cross-currency intercompany loans that are not permanent in nature, cross-currency external payables and receivables or forecasted purchases. Some amounts are between two foreign currencies:

Forward Contracts (In millions)	September 27, 2014		December 28, 2013	
	Buy	Sell	Buy	Sell
Euro	\$66.0		\$157.7	
U.S. dollar	48.9			\$54.7
Chinese renminbi	11.8		8.1	
South Korean won	10.7		9.7	
New Zealand dollar	5.9		4.5	
Malaysian ringgit	5.3			2.7
Danish krone	2.4			3.5
Philippine peso	1.4		11.3	
Turkish lira		\$22.1		11.7
Russian ruble		20.2		22.9
Swiss franc		17.9		49.4
Indonesian rupiah		13.8	2.3	
Japanese yen		13.3		3.7
Brazilian real		11.1		6.6
Singapore dollar		7.3		1.7
South African rand		7.1		10.4
Canadian dollar		6.7		11.0
Polish zloty		5.9		4.7
Australian dollar		4.6		6.8
Czech koruna		4.5		2.5
Indian rupee		3.7		6.6
Hungarian forint		3.1		2.4
Croatian kuna		2.4		2.6
Norwegian krone		2.3		1.7
Swedish krona		1.6		1.7
Romanian leu		1.3		1.2
Argentine peso		1.2		3.7
Mexican peso		1.0	18.2	
British pound		1.0		1.0
Other currencies (net)		2.2	0.3	
	\$152.4	\$154.3	\$212.1	\$213.2

In agreements to sell foreign currencies in exchange for U.S. dollars, for example, an appreciating dollar versus the opposing currency would generate a cash inflow for the Company at settlement, with the opposite result in agreements to buy foreign currencies for U.S. dollars. The above noted notional amounts change based upon changes in the Company's outstanding currency exposures.

Foreign exchange contracts	3.5	11.2	Other expense	—	—	Interest expense	(9.9 )	(9.6 )

## Note 12: Fair Value Measurements

Due to their short maturities or their insignificance, the carrying amounts of cash and cash equivalents, accounts and notes receivable, accounts payable, accrued liabilities and short-term borrowings approximated their fair values at September 27, 2014 and December 28, 2013. The Company estimates that, based on current market conditions, the value of its 4.750% 2021 Senior Notes was \$643 million at September 27, 2014, compared with the carrying value of \$602.4 million. The higher fair value resulted from changes, since issuance, in the corporate bond market and investor preferences. The fair value of debt is classified as a Level 2 liability and is estimated using quoted market prices as provided in secondary markets which consider the Company's credit risk and market related conditions. See Note 11 to the Consolidated Financial Statements for discussion of the Company's derivative instruments and related fair value measurements.

## Note 13: Retirement Benefit Plans

Components of net periodic benefit cost for the third quarter and year-to-date periods ended September 27, 2014 and September 28, 2013 were as follows:

(In millions)	Third Quarter				Year-to-Date			
	Pension benefits		Postretirement benefits		Pension benefits		Postretirement benefits	
	2014	2013	2014	2013	2014	2013	2014	2013
Service cost	\$2.6	\$2.5	\$—	\$0.1	\$8.2	\$7.8	\$0.1	\$0.1
Interest cost	2.1	2.2	0.3	0.2	6.5	6.4	0.9	0.8
Expected return on plan assets	(1.5 )	(1.4 )	—	—	(4.6 )	(4.3 )	—	—
Settlement/curtailment	0.4	2.6	—	—	0.4	3.0	—	—
Net amortization	0.7	1.3	(0.3 )	—	1.9	3.7	(0.6 )	(0.2 )
Net periodic benefit cost	\$4.3	\$7.2	\$—	\$0.3	\$12.4	\$16.6	\$0.4	\$0.7

During the year-to-date periods ended September 27, 2014 and September 28, 2013, approximately \$1.7 million and \$6.5 million, respectively, of pretax expenses were reclassified from other comprehensive income to a component of

net periodic benefit cost. As they relate to foreign plans, the Company uses current exchange rates to make these reclassifications. The impact of exchange rate fluctuations is included on the net amortization line of the table above.

Table of Contents

TUPPERWARE BRANDS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

Note 14: Income Taxes

As of September 27, 2014 and December 28, 2013, the Company's gross unrecognized tax benefit was \$24.5 million and \$27.4 million, respectively. During 2014, the accrual for uncertain tax positions decreased by \$2.9 million primarily as a result of the Company agreeing to a transfer pricing settlement with various foreign jurisdictions and entering into an Advanced Pricing Agreement, as well as other adjustments. The Company estimates that approximately \$21.9 million of the unrecognized tax benefits, if recognized, would impact the effective tax rate. Interest and penalties related to uncertain tax positions in the Company's global operations are recorded as a component of the provision for income taxes. Accrued interest and penalties were \$6.0 million and \$5.9 million as of September 27, 2014 and December 28, 2013, respectively.

The Company estimates that it may settle one or more foreign audits in the next twelve months that may result in a decrease in the amount of accrual for uncertain tax positions of up to \$0.6 million. For the remaining balance as of September 27, 2014, the Company is not able to reliably estimate the timing or ultimate settlement amount. While the Company does not currently expect material changes, it is possible that the amount of unrecognized benefit with respect to the uncertain tax positions will significantly increase or decrease related to audits in various foreign jurisdictions that may conclude during that period or new developments that could also, in turn, impact the Company's assessment relative to the establishment of valuation allowances against certain existing deferred tax assets. These valuation allowances relate to tax assets in jurisdictions where it is management's best estimate that there is not a greater than 50 percent probability that the benefit of the assets will be realized in the associated tax returns. The likelihood of realizing the benefit of deferred tax assets is assessed on an ongoing basis. This assessment requires estimates as to future operating results, as well as an evaluation of the effectiveness of the Company's tax planning strategies. At this time, the Company is not able to make a reasonable estimate of the range of impact on the balance of unrecognized tax benefits or the impact on the effective tax rate related to these items.

The effective tax rates for the third quarter and year-to-date period of 2014 were 32.5 percent and 30.0 percent, respectively, compared with 23.4 percent and 24.5 percent, respectively, for the comparable 2013 periods. The higher 2014 rates were due to higher losses incurred in conjunction with the change in exchange rate of the Venezuelan bolivar, for which there was limited tax benefit. The effective tax rates are below the U.S. statutory rate primarily due to lower foreign effective tax rates.

Note 15: Statement of Cash Flow Supplemental Disclosure

Under the Company's stock incentive programs, employees are allowed to use shares retained by the Company to satisfy U.S. minimum statutorily required withholding taxes. In the year-to-date periods ended September 27, 2014 and September 28, 2013, 93,505 and 47,187 shares, respectively, were retained to fund withholding taxes, with values totaling \$7.4 million and \$3.7 million, respectively, which were included as a component of stock repurchases in the Consolidated Statements of Cash Flows.

During the first quarter of 2014, the Company entered into a joint venture with a real estate development partner. The Company contributed land to the joint venture in exchange for 50 percent ownership of the joint venture. The carrying value of the land was \$3.1 million. The Company's ownership interest in the joint venture is accounted for using the equity method and was included in long-term other assets on the September 27, 2014 balance sheet at the carrying value of the contributed land. The Company does not expect to have any significant cash inflows or outflows related to the joint venture until such time as the joint venture completes and sells its development.

There were no capital lease arrangements initiated in the year-to-date periods ended September 27, 2014 and September 28, 2013.

In relation to the issuance of the Senior Notes in the first quarter of 2013, the proceeds related to the \$7.6 million debt premium were reduced by \$1.3 million of non-cash debt issuance costs.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

## Note 16: Stock Based Compensation

The Company records compensation expense using the applicable accounting guidance for share-based payments related to stock options, restricted stock, restricted stock units, performance vesting and market vesting awards granted to directors and employees. Compensation expense for share-based awards is recorded straight line over the required service period, based on the fair value of the award.

## Stock Options

Stock options to purchase the Company's common stock are granted to employees and directors by the Company's Board of Directors, with an exercise price equal to the fair market value of the stock on the date of grant. Options generally become exercisable in three years, in equal installments beginning one year from the date of grant, and generally expire 10 years from the date of grant. Options to acquire 11,804 shares of stock were granted during the year-to-date period of 2013. There were no stock options granted in the year-to-date period of 2014. Compensation expense associated with all outstanding stock option awards was \$0.4 million and \$0.5 million in the third quarters of 2014 and 2013, respectively, and \$1.3 million and \$1.4 million in the respective year-to-date periods.

Stock option activity for 2014, under all of the Company's incentive plans, is summarized in the following table:

	Shares subject to option	Weighted average exercise price per share	Aggregate intrinsic value (in millions)
Outstanding at December 28, 2013	2,360,275	\$44.16	
Granted	—	—	
Expired / Forfeited	(5,711	) 72.26	
Exercised	(449,454	) 35.79	
Outstanding at September 27, 2014	1,905,110	\$46.03	\$49.4
Exercisable at September 27, 2014	1,346,799	\$36.53	\$45.5

The intrinsic value of options exercised totaled \$5.2 million and \$6.0 million in the third quarters of 2014 and 2013, respectively, and \$19.1 million and \$35.3 million in the respective year-to-date periods. The average remaining contractual life on outstanding and exercisable stock options was 5.7 years and 4.7 years, respectively.

## Restricted Stock, Restricted Stock Units, Performance Vested and Market Vested Awards

The Company has time-vested, performance-vested and market-vested awards which typically have initial vesting periods ranging from one to six years. Compensation expense associated with restricted stock and restricted stock units is equal to the market value of the Company's common stock on the date of grant, and for time-vested awards, is recorded straight-line over the required service period. For performance-vested awards, expense is determined as described below and is recorded over the required service period, subject to a probability assessment of achieving the performance criteria. The grant date fair value per share of market-vested awards already reflects the probability of achieving the market condition, and is therefore used to record expense straight line over the performance period regardless of actual achievement.

The Company granted 49,410 and 64,725 performance-vested award shares under its performance share program in March 2014 and February 2013, respectively. The Company's performance-vested awards provide incentive opportunity based on the overall success of the Company over a three year performance period, as reflected through a measure of diluted earnings per share in 2014 and 2013 and also cash flow with respect to the 2013 award.

Table of Contents

## TUPPERWARE BRANDS CORPORATION

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

In March 2014, the Company also granted 16,470 market-vested award shares. These awards provide incentive opportunity based on the relative total shareholder return ("rTSR") of the Company's common stock against a group of companies composed of the S&P 400 Mid-cap Consumer Discretionary index and the Company's 2014 Compensation Peer Group (collectively, the "Comparative Group") over a three year period. As the rTSR grant has a market condition, the fair value per share of \$70.85 was determined using a Monte-Carlo simulation. The Monte-Carlo simulation estimated the fair value based on the Company's share price activity between the beginning of the year and the grant date relative to the Comparative Group, expected term of the award, risk-free interest rate, expected dividends, and the expected volatility of the stock of the Company and that of the Comparative Group. There were no awards granted of this type in 2013.

The incentive program for the performance and market-vested awards are based upon a target number of share units, although the actual number of performance and market-vested shares ultimately earned can vary from zero to 150 percent of target depending on the Company's achievement under the performance criteria of the grants. The payouts, if earned, will be settled in Tupperware common stock after the end of the three year performance period.

In the year-to-date periods of 2014 and 2013, the Company granted 6,000 and 79,734 shares of time-vested restricted stock units with average fair values of \$86.40 and \$82.58 per share, respectively, that cliff vest three years from the date of grant. In addition, in February 2014, the Company granted 50,000 shares of restricted stock units with a grant date fair value of \$77.66 per share which will cliff vest on December 29, 2017.

In May of 2014 and 2013, the Company granted 13,650 and 13,910 shares of time-vested restricted stock units with average fair values of \$84.28 and \$82.72 per share, respectively, that vest/vested one year from the date of grant. For the third quarters of 2014 and 2013, compensation expense associated with all employee and director restricted stock and restricted stock unit awards outstanding, including performance and market-vested shares, was \$2.7 million and \$3.7 million, respectively. Such expense was \$10.2 million and \$10.5 million for the year-to-date periods of 2014 and 2013, respectively.

Restricted stock, restricted stock units, performance-vested and market-vested share award activity for 2014 under all of the Company's incentive plans is summarized in the following table:

	Shares outstanding	Weighted average grant date fair value
December 28, 2013	813,732	\$51.92
Granted	135,530	79.52
Performance share adjustments	(41,234)	) 77.85
Vested	(281,894)	) 43.39
Forfeited	(8,416)	) 69.17
September 27, 2014	617,718	\$59.82

The fair value of performance-vested awards, restricted stock and restricted stock units vested in the year-to-date periods of 2014 and 2013 was \$22.5 million and \$7.6 million, respectively. There were no such amounts vested in the third quarters of 2014 and 2013.

As of September 27, 2014, total unrecognized stock based compensation expense related to all stock based awards was \$19.6 million, which is expected to be recognized over a weighted average period of 1.9 years.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

## Note 17: Allowance for Long-Term Receivables

As of September 27, 2014, \$17.2 million of long-term receivables from both active and inactive customers were considered past due, the majority of which were reserved through the Company's allowance for uncollectible accounts. The balance of the allowance for long-term receivables as of September 27, 2014 was as follows:

(In millions)

Balance at December 28, 2013	\$20.5	
Write-offs	(5.2	)
Provision and reclassifications	3.2	
Currency translation adjustment	(2.0	)
Balance at September 27, 2014	\$16.5	

## Note 18: Guarantor Information

The Company's payment obligations under the Notes are fully and unconditionally guaranteed, on a senior secured basis, by the Guarantor. The guarantee is secured by certain "Tupperware" trademarks and service marks owned by the Guarantor, as discussed in Note 10 to the Consolidated Financial Statements.

Condensed consolidated financial information as of September 27, 2014 and December 28, 2013 and for the quarter-to-date and year-to-date periods ended September 27, 2014 and September 28, 2013 for Tupperware Brands Corporation (the "Parent"), Dart Industries Inc. (the "Guarantor") and all other subsidiaries (the "Non-Guarantors") is as follows.

Each entity in the consolidating financial information follows the same accounting policies as described in the consolidated financial statements, except for the use by the Parent and Guarantor of the equity method of accounting to reflect ownership interests in subsidiaries that are eliminated upon consolidation. The Guarantor is 100% owned by the Parent, and there are certain entities within the Non-Guarantors classification which the Parent owns directly. There are no significant restrictions on the ability of either the Parent or the Guarantor from obtaining adequate funds from their respective subsidiaries by dividend or loan that should interfere with their ability to meet their operating needs or debt repayment obligations.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

Note 19: New Accounting Pronouncements

In April 2014, the FASB issued an amendment to existing guidance regarding requirements for reporting discontinued operations. The amendment is effective prospectively for fiscal years beginning after December 15, 2014, and early adoption is permitted. The Company does not expect the amendment to have a significant impact on the its Consolidated Financial Statements based on its having no history of material transactions that would qualify as discontinued operations.

In May 2014, the FASB issued an amendment to existing guidance regarding revenue from contracts with customers. The amendment outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers. The amendment is effective prospectively for fiscal years beginning after December 15, 2016 and for interim periods within those fiscal years. Early adoption is not permitted. The Company is currently evaluating the impact of the adoption of this amendment on its Consolidated Financial Statements.

In June 2014, the FASB issued an amendment to existing guidance regarding accounting for share-based payments when terms of an award provide that a performance target could be achieved after the requisite service period. The amendment is effective prospectively for fiscal years beginning after December 15, 2015, and early adoption is permitted. The Company does not expect the amendment to have an impact on its Consolidated Financial Statements based on its having no share-based payments with these specified terms.

In August 2014, the FASB issued an amendment to existing guidance regarding management's responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern and to provide related footnote disclosures. The amendment is effective prospectively for fiscal years beginning after December 15, 2016 and for interim periods within those fiscal years. Early adoption is permitted. The Company does not expect adoption of this amendment to have an impact on its Consolidated Financial Statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following is a discussion of the results of operations for the 13 and 39 weeks ended September 27, 2014, compared with the 13 and 39 weeks ended September 28, 2013, and changes in financial condition during the 39 weeks ended September 27, 2014.

The Company's primary means of distributing its products is through independent sales organizations and individuals, which in many cases are also its customers. The vast majority of the Company's products are, in turn, sold to end customers who are not members of its sales force. The Company is largely dependent upon these independent sales organizations and individuals to reach end consumers, and any significant disruption of this distribution network would have a negative financial impact on the Company and its ability to generate sales, earnings and operating cash flows. The Company's primary business drivers are the size, activity and productivity of its independent sales organizations.

As exchange rates are an important factor in understanding period-to-period comparisons, the Company believes the presentation of results on a local currency basis, as a supplement to reported results, helps improve readers' ability to understand the Company's operating results and evaluate performance in comparison with prior periods. The Company presents information that compares results between periods as if current period exchange rates had been the exchange rates in the prior period. The Company uses this information as one measure to evaluate performance. The Company generally refers to such amounts as calculated on a "local currency" basis, or "excluding the impact of foreign currency." These results should be considered in addition to, not as a substitute for, results reported in accordance with generally accepted accounting principles in the United States ("GAAP"). Results on a local currency basis may not be comparable to similarly titled measures used by other companies and are not measures of performance presented in accordance with GAAP.

pp percentage points

Effective with the first quarter of 2014, the management structure of the Company's Nutrimetics France business was re-aligned for operational and strategic purposes. Consequently, Nutrimetics France is now being reported in the Asia Pacific segment, whereas it had previously been reported in the Europe segment. Comparable information from 2013 has been reclassified to conform to the new presentation. In full year 2013, Nutrimetics France generated less than 1 percent of total sales.

Sales decreased 2 percent in the third quarter of 2014. Excluding the impact of changes in foreign currency exchange rates, sales increased 4 percent. The Company defines established markets as Western Europe (including Scandinavia), Australia, Canada, Japan, New Zealand, and the United States. All other countries are classified as emerging markets. The Company's businesses operating in emerging market economies achieved strong growth in the quarter with an 8 percent sales increase in local currency. The average impact of higher prices in these markets was 8 percent. The Company's units that operate in established economy markets, as a group, had a 4 percent sales decrease in local currency compared with 2013. The average price increase in the established markets was 2 percent.

## Table of Contents

Among the emerging market units, the main increases in sales were in Argentina, Brazil, China, Indonesia, Tupperware Mexico and Venezuela. These increases were partially offset by decreases in India, Malaysia/Singapore and Tupperware South Africa. Among the established market businesses, there were decreases in BeautiControl and Tupperware Japan, as well as the impact from the April 2014 closure of the Armand Dupree business in the United States. Operating income and net income decreased in the third quarter of 2014, primarily in South America, reflecting the impact of the currency devaluations in Venezuela that occurred in the first and second quarters, including a negative \$10.6 million pretax impact of Venezuelan inventory being included in cost of goods sold at its stronger, historical exchange rate rather than the rate used to translate sales in the quarter, as well as higher warehousing and distribution costs in Brazil. Also contributing to the decrease in net income were decreases in segment profit in Europe and Beauty North America and higher interest expense. These decreases were partially offset by increases in Asia Pacific and Tupperware North America from higher sales and lower corporate expenses due to lower achievement under the Company's incentive programs. Net income was also impacted by a \$4.6 million foreign exchange gain in Venezuela from exchanging bolivars for U.S. dollars at more favorable exchange rates than the bolivars were last recorded.

Reported sales for the year-to-date period decreased 1 percent compared with the same period of 2013. Excluding the impact of changes in foreign currency exchange rates, sales increased 5 percent. The units and factors impacting the year-to-date local currency sales increase largely mirrored those impacting the third quarter, along with higher year-to-date sales in Turkey, partially offset by lower sales in Germany and Russia.

The factors impacting the year-to-date operating and net income comparisons were similar to those impacting the third quarter comparisons. During 2014, the Company has recorded net pretax charges of \$42.2 million related to changes in the exchange rate of the Venezuelan bolivar to the U.S. dollar, including the impact related to the sale of product translated at its stronger, historical exchange rates rather than the rate used to translate sales in the period in which the product was sold.

The Company's net working capital position decreased by \$20.2 million, compared with the end of 2013, primarily due to an increase in short-term borrowings (net of cash and cash equivalents) to support financing activities. The net change in working capital also reflected a net \$25.1 million negative impact on the net monetary assets on the balance sheet related to the 2014 changes in foreign currency exchange rates in Venezuela, as well as a \$14.7 million impact due to other weaker foreign currency exchange rates in relation to the U.S. dollar. These were partially offset by an increase in accounts receivable reflecting the level and timing of sales around the end of each period and an increase in inventory, reflecting expectations for future sales by certain units and, in some cases, a lower than expected sell through, as well as a decrease in accounts payable due to the timing of payments around year-end, including the timing of income tax payments during 2014 and higher tax prepayments made at the end of 2012, compared with the end of 2013.

Net cash provided by operating activities for the periods ended September 27, 2014 and September 28, 2013 was \$87.5 million and \$126.0 million, respectively. The unfavorable comparison primarily reflected a decrease in net income as a result of weaker foreign currency exchange rates in relation to the U.S. dollar and larger outflows of cash related to net working capital items, particularly larger increases in prepaid expenses, other assets and non-trade receivables due to the timing of cash receipts related to value added taxes and the Company's hedging activities. The Company also made large income tax payments related to fiscal year 2013 after the Company's fiscal year-end, but prior to the end of the calendar year, whereas similar 2012 payments occurred prior to the end of fiscal year-end 2012. Also, in the first quarter of 2013, the Company received cash as a premium and accrued interest in connection with its sale of \$200 million of Senior Notes. The increase in short term borrowings (net of cash and cash equivalents) funded the net cash outflows in the period for dividends and on-going share repurchases.

## Table of Contents

### Net Sales

Reported sales decreased 2 percent in the third quarter of 2014. Excluding the impact of changes in foreign currency exchange rates, sales increased 4 percent. The increase in local currency sales was mainly in the Company's emerging market economies.

The Company's emerging market units accounted for 70 percent and 69 percent of the Company's total sales for the third quarters of 2014 and 2013, respectively. Reported sales in these markets decreased \$4.3 million, or 1 percent, which included a negative \$33.6 million impact from weaker foreign currency exchange rates. The strong increase in local currency sales in the Company's emerging markets in the third quarter of 2014 was primarily due to increases in the total sales forces in Brazil and Indonesia, strong growth in the number of outlets and outlet productivity in China, a larger and more productive sales force in Tupperware Mexico and significant inflation related price increases, as well as a mix benefit in Argentina. Venezuela also contributed to the local currency sales increase, primarily reflecting higher volume of products sold, as well as prices that were higher than the prior year, despite government restrictions reducing the prices that would otherwise have been charged. The sales growth in these units was partially offset by decreases in India, reflecting a smaller and less active sales force, a less productive sales force in Malaysia/Singapore and lower activity in light of a transportation strike in South Africa.

Sales in the established markets decreased \$10.2 million, or 5 percent, which included a negative \$3.0 million impact from changes in foreign currency exchange rates. Among these units, the most significant local currency decreases were in BeautiControl and Tupperware Japan due to less active sales forces, as well as the loss of sales in light of the decision to cease operating the Armand Dupree business in the United States in the second quarter of 2014.

On a year-to-date basis, emerging markets accounted for 66 percent and 65 percent of total Company sales in 2014 and 2013, respectively. Total sales on a reported basis in the emerging markets increased \$3.2 million, including a negative \$117.5 million impact from changes in foreign currency exchange rates. Excluding the impact of foreign currency, sales increased in these markets by 10 percent. Total sales for the established markets decreased \$31.5 million, or 5 percent, for the year-to-date period of 2014, compared with the same period of 2013, which included a positive \$2.0 million impact from changes in foreign currency exchange rates. The sources of the year-to-date fluctuations largely followed those of the third quarter comparison, along with higher year-to-date sales in Turkey, partially offset by lower sales in Germany and Russia.

A more detailed discussion of the sales results for the Company's reporting segments is included in the segment results section below.

As discussed in Note 3 to the Consolidated Financial Statements, the Company includes promotional costs in delivery, sales and administrative expense (DS&A). As a result, the Company's net sales may not be comparable with other companies that treat these costs as a reduction of revenue.

### Gross Margin

Gross margin as a percentage of sales was 64.5 percent and 66.9 percent in the third quarters of 2014 and 2013, respectively. The decrease of 2.4 percentage points primarily reflected the impact of inventory in Venezuela being included in cost of goods sold at its stronger, historical exchange rate rather than the rate used to translate sales in the quarter (1.8 pp). Also contributing to the decrease in gross margin were higher resin costs (0.6 pp), unfavorable product mix, particularly in Germany and Fuller Mexico (0.3 pp) and the mix impact from relatively higher sales in certain units with lower than average gross margins, primarily in South America (0.2 pp). These decreases were partially offset by lower inventory obsolescence (0.3 pp) and the translation impact of changes in foreign currency exchange rates, mainly in South America (0.2 pp).

For the year-to-date periods, gross margin as a percentage of sales was 65.9 percent in 2014, compared with 66.8 percent for the same period of 2013. The factors leading to the 0.9 percentage point decrease largely mirrored those of the third quarter, except for the impact of product mix in light of changes in manufacturing costs and related price increases that had a positive impact on the gross margin comparison, particularly in Europe (0.5 pp), as well as the impact on cost of sales relative to sales of a change in the exchange rate of the Venezuelan bolivar during the first quarter of 2013 that had an offsetting impact on the year-to-date comparison (0.1 pp).

## Table of Contents

As discussed in Note 2 to the Consolidated Financial Statements, the Company includes costs related to the distribution of its products in DS&A. As a result, the Company's gross margin may not be comparable with other companies that include these costs in costs of products sold.

### Costs and Expenses

DS&A as a percentage of sales was 54.6 percent in the third quarter of 2014, compared with 53.9 percent in 2013.

This increase reflected the translation effect of changes in foreign currency exchange rates, particularly in Venezuela, as well as the impact of overall dollar costs as a ratio of sales that are higher in light of weaker foreign exchange rates (1.2 pp), higher warehousing and freight costs, primarily in Brazil (0.9 pp) and amortization of the Company's definite lived tradename intangible asset that began in September 2013 (0.3 pp). These were partially offset by lower unallocated corporate expenses, mainly for lower accruals under the Company's incentive plans (0.8 pp), lower selling costs, including commissions, primarily in Asia and Beauty North America (0.4 pp), the benefit of not incurring pension settlement charges in Asia in 2014 (0.3) and lower operating costs (0.2 pp).

For the year-to-date periods, DS&A as a percentage of sales also increased to 52.7 percent from 52.4 percent in 2013. The factors leading to the increase largely mirrored those of the third quarter, except there was also a decrease in marketing expenses in Asia (0.4 pp) and more efficient promotional spending in Asia and Tupperware North America (0.2 pp) on a year-to-date basis.

Specific segment impacts are discussed in the segment results section.

### Re-engineering and Impairment Expenses

Refer to Note 7 to the Consolidated Financial Statements for a discussion of re-engineering activities and related accruals.

The Company recorded \$2.6 million and \$2.7 million in re-engineering and impairment charges during the third quarters of 2014 and 2013, respectively, and \$8.3 million and \$7.1 million for the respective year-to-date periods. In both years, these charges were primarily related to severance costs incurred for headcount reductions in several of the Company's operations in connection with changes in its management and organizational structures, and in 2014, the decision to cease operating the Armand Dupree business in the United States, the Nutrimerics business in Thailand and a manufacturing plant in India, as well as a write-off of \$1.1 million in capitalized software in connection with a new information systems project.

For the remainder of 2014, the Company expects to incur approximately \$3 million of such costs, mainly related to additional headcount reductions.

### Goodwill and Indefinite-lived Intangible Assets

The Company's goodwill and intangible assets relate primarily to the December 2005 acquisition of the direct selling businesses of Sara Lee Corporation. The Company does not amortize its goodwill or indefinite-lived tradename intangible assets. Instead, the Company performs an assessment to test these assets for impairment annually, or more frequently if events or changes in circumstances indicate they may be impaired. See Note 8 to the consolidated financial statements regarding the annual assessment process.

In the third quarter of 2014, the Company completed the annual assessments for all of its reporting units and indefinite-lived intangible assets, concluding there were no impairments. The Company only considers the goodwill balances of \$114.1 million and \$26.3 million associated with the Fuller Mexico and NaturCare reporting units, respectively, to be significant relative to total equity as of the end of the third quarter 2014.

## Table of Contents

Despite the results of Fuller Mexico being slightly below previous expectations and current expectations for future results, the amount by which the estimated fair value of the Fuller Mexico reporting unit exceeded its carrying value, at 24 percent, was in-line with the previous impairment assessment performed in the third quarter of 2013. Lower than expected recruiting and retention of sales force members in light of the competitive environment in that market, as well as high field manager turnover has led to decreased operating performance. Field managers are those directly responsible for recruiting, motivating and training sales force members. This was offset by a lower discount rate and a lower entity carrying value from amortization of the definite lived Fuller tradename asset that began in the third quarter of 2013. Despite the amount by which the estimated fair value of the reporting unit exceeded its carrying value resulting from the annual assessment, a smaller sales force size; operating performance significantly below current expectations, including changes in projected future revenue, profitability and cash flow, as well as higher interest rates or cost of capital, could have a further negative effect on the fair value of the reporting unit and therefore reduce the fair value below the carrying value. This would result in recording an impairment to the goodwill of Fuller Mexico. In the third quarter of 2014, the Company performed a qualitative assessment of the value of the NaturCare reporting unit and concluded it was more likely than not that the fair value of the reporting unit was greater than its carrying amount. The estimated fair value of the NaturCare reporting unit exceeded the carrying value by 29 percent as of June 2012, the date of its most recent step 1 analysis. Based on the Company's evaluation of the assumptions and sensitivities associated with that step 1 analysis for NaturCare, the Company concluded that the fair value substantially exceeded its carrying value as of June 2012.

Other than for the Fuller Mexico reporting unit, management has concluded there is no significant foreseeable risk of failing a future step 1 impairment test, nor is there significant foreseeable risk of the fair value of the indefinite-lived intangible assets falling below their respective carrying values. Given the sensitivity of fair value valuations to changes in cash flow or market multiples, the Company may be required to recognize an impairment of goodwill or indefinite-lived intangible assets in the future due to changes in market conditions or other factors related to the Company's performance. Actual results below forecasted results or a decrease in the forecasted future results of the Company or changes in discount rates could also result in an impairment charge, as could changes in market characteristics including declines in valuation multiples of comparable publicly-traded companies. Further impairment charges would have an adverse impact on the Company's net income and shareholders' equity.

### Net Interest Expense

Net interest expense was \$11.1 million in the third quarter of 2014, compared with \$9.7 million in 2013. In the year-to-date periods, net interest expense was \$33.9 million in 2014, compared with \$27.6 million in 2013. Interest expense increased in each of the year-over-year comparisons primarily as a result of higher borrowings over the course of 2013 to achieve the Company's leverage target announced at the beginning of that year, as well as a higher amount of forward points related to the Company's cash flow hedging activities. Also contributing to the increase in the year-to-date period of 2014 was the issuance of notes maturing in 2021 at the end of the first quarter of 2013 at a higher fixed interest rate than the floating rate revolving credit borrowings that were replaced.

For a discussion of forward points, which are a component of interest expense, refer to Note 11 to the Consolidated Financial Statements.

### Tax Rate

The effective tax rates for the third quarter and year-to-date period of 2014 were 32.5 percent and 30.0 percent, respectively, compared with 23.4 percent and 24.5 percent, respectively, for the comparable 2013 periods. The higher 2014 rates were due to higher 2014 losses incurred in conjunction with the change in exchange rate of the Venezuelan bolivar, for which there was limited tax benefit. The effective tax rates are below the U.S. statutory rate primarily due to lower foreign effective tax rates.

As discussed in Note 14 to the Consolidated Financial Statements, the Company's uncertain tax positions increase the potential for volatility in its tax rate. As such, it is reasonably possible that the effective tax rates in any individual quarter will vary from the full year expectation. At this time, the Company is unable to estimate what impact that may have on any individual quarter.

## Table of Contents

### Net Income

Net income in the third quarter of 2014 decreased \$17.6 million compared with 2013. Compared with 2013, net income was negatively impacted by \$7.5 million from changes in foreign currency exchange rates, primarily due to the devaluation of the Venezuelan bolivar in 2014. Excluding the impact of foreign currency exchange rates, net income decreased 24 percent. The decrease in the local currency net income comparison came primarily in South America, reflecting the negative \$10.6 million pretax impact of Venezuelan inventory being included in cost of goods sold at its stronger, historical exchange rate rather than the rate used to translate sales in the quarter, as well as higher warehousing and distribution costs in Brazil. Also contributing to the decrease in net income were decreases in segment profit in Europe and Beauty North America, reflecting the lower sales and less efficient promotional spending in those segments, higher interest expense from higher debt and increased levels of cash flow hedges, as well as higher Fuller tradename amortization cost in connection with the change in its classification from being indefinite-lived to definite lived near the end of the third quarter of 2013. These decreases were partially offset by increased segment profit in Asia Pacific, reflecting the contribution margin on higher sales and the benefit of not incurring pension settlement charges in 2014, and in Tupperware North America from a more efficient value chain, as well as lower corporate expenses due to lower achievement under the Company's incentive programs. In addition, the Company recorded \$4.6 million in foreign exchange gains in connection with purchasing U.S. dollars with Venezuelan bolivars at rates more favorable than the rates used to translate those bolivars at the end of the second quarter.

Net income for the year-to-date period of 2014 decreased \$52.4 million compared with the same period of 2013, including a negative \$21.5 million foreign currency impact. Excluding the impact of foreign currency exchange rates, net income decreased 19 percent. The factors impacting the year-to-date net income comparison were similar to those impacting the second quarter comparison. During 2014, the Company has recorded net pretax charges of \$42.2 million related to changes in the exchange rate of the Venezuelan bolivar to the U.S. dollar, including the impact related to the sale of product translated at its stronger, historical exchange rates rather than the rate used to translate sales in the period in which the product was sold and the foreign currency exchange gain recorded in the third quarter of 2014 related to the purchase of U.S. dollars using Venezuelan bolivars at exchange rates more favorable than at which they were previously recorded. Interest expense for the year-to-date period of 2014 was higher related to the Senior Notes issued in the first quarter of 2013 and increased forward points related to the Company's hedging activities. There were also gains from the sale of land near the Company's Orlando headquarters and in Australia, as well as lower income tax expense.

International operations generated 92 percent of sales in the third quarter and year-to-date period of 2014, compared with 91 percent of sales in the comparable 2013 periods. International operations, as a group, generated 100 percent of net segment profit in the third quarter and year-to-date periods of 2014 and 2013.

The sale of beauty products generated 21 percent and 20 percent of sales in the third quarter and year-to-date period of 2014, respectively, compared with 21 percent of sales in each of the respective 2013 periods.

pp percentage points

Reported sales decreased 6 percent compared with the third quarter of 2013. Excluding the impact of changes in foreign currency exchange rates, sales decreased 1 percent. The decreased sales primarily reflected a 5 percent decrease in volume, compared with the third quarter of 2013, which was partially offset by an average price increase of 4 percent.

On a local currency basis, the emerging market units' sales decreased by 1 percent, primarily reflecting the impact of a transportation strike in July impacting Tupperware South Africa, as well as a decrease in volume in Russia, due to continuing challenges in activating the sales force. These decreases were partially offset by a sales increase by Avroy Shlain, reflecting a larger and more active sales force due to success in developing its sales force leaders, strong product offerings and improved sales force incentives, as well as strong growth in Turkey that overcame the promotional shift to the second quarter and away from the third quarter, reflecting higher prices and a larger sales force from successful recruiting.

The established market units' sales decreased by 1 percent on a local currency basis, reflecting a decrease in sales volume in Germany from a lower number of active sellers due, in part, to a lower number of new sales force members, partially offset by increased productivity as party hostesses strove to achieve higher level rewards for larger party sizes.

Segment profit decreased \$4.8 million, or 43 percent, during the third quarter of 2014, and excluding the impact of foreign currency, was 37 percent lower. The decrease was primarily due to the contribution margin on the lower sales, increased promotional spending in France and Germany, severance costs, as well as the impact of a weaker Turkish lira on product and services procured in euro. These decreases were partially offset by more efficient supply chain management.

The year-to-date sales and segment profit variances largely mirrored those of the quarter.

The euro, Russian ruble, South African rand and Turkish lira were the main currencies that impacted the third quarter year-over-year sales and profit comparisons. On a year-to-date basis, the same currencies generated most of the negative impact except the euro's impact was favorable.

pp percentage points

Reported sales increased 1 percent, compared with the third quarter of 2013. Excluding the impact of foreign currency exchange rates, sales increased 3 percent. The average price increase for the segment was 7 percent, partially offset by a decrease in volume.

Emerging markets accounted for \$173.3 million and \$167.6 million, or 83 and 81 percent, of the reported sales in the segment in the third quarters of 2014 and 2013, respectively. Compared with 2013, emerging market sales were negatively impacted by \$2.3 million from changes in foreign currency rates. Excluding the impact of changes in foreign currency rates, sales increased 5 percent in these units. The most significant contribution to the increase was by Indonesia, the Company's largest business unit, as a result of a larger sales force from good recruiting results, and sales force incentives programs along with attractive new product offerings that offset a slight decrease in volume in light of an adverse consumer reaction to increased prices. The other significant increase in sales was in China, where the Company operates a retail outlet model through independent distributors. The increase primarily related to higher volume due to a positive response to new distributor and outlet incentive programs and promotional offerings, in conjunction with continued growth in the total number of outlets. These were partially offset by decreases in India, due to a smaller and less active sales force, and Malaysia/Singapore, in light of a promotional schedule shift that benefited the second quarter of 2014 at the expense of the third quarter.

The improvements achieved in the emerging market businesses were partially offset by a decline in reported sales in the established markets, partially reflecting the impact of changes in foreign currency exchange rates. Excluding the impact of changes in foreign currency exchange rates, sales decreased 7 percent. The most significant decrease was in Tupperware Japan due to a less active sales force in light of the response to the Company's programs and the impact on consumer spending from increased consumption taxes.

Total segment profit increased 4 percent compared with the third quarter of 2013. Excluding the impact of changes in foreign currency rates, segment profit increased 6 percent. The increase was mainly related to the contribution margin from the higher sales in Indonesia and China and the leverage this had on the fixed components of DS&A spending and more efficient promotional spending in Indonesia, as well as the benefit of not incurring pension settlement costs in 2014. This was partially offset by decreased profit in India and Malaysia/Singapore due to the contribution margin on lower sales.

Table of Contents

The year-to-date sales and segment profit variances largely mirrored those of the quarter, except in India which had only slightly lower profit on a year-to-date basis due to effective operating cost management that minimized the decrease in profit relative to the sales decrease.

The Indonesian rupiah was the main currency that led to the negative foreign currency impact on each of the year-over-year comparisons, though on a year-to-date basis, the currencies of all the units in the segment had a negative impact on the sales and profit comparisons with 2013, except for the Korean Won and the euro in Nutrimetics France.

pp percentage points

Reported sales increased 5 percent in the third quarter of 2014. Excluding the impact of foreign currency exchange rates, sales increased 6 percent. The increase was mainly in Mexico due to a larger and more productive sales force that increased the volume of products sold with solid promotional programs aimed at retention of its current sales force members. United States and Canada also increased sales slightly due to a larger sales force from strong recruiting. The average price increase for the segment was 4 percent.

Segment profit increased \$1.1 million in the third quarter of 2014, primarily reflecting the higher sales and reduced operating costs in Mexico, as well as a slight increase in profit due an improved gross margin and more efficient promotional spending in the United States and Canada.

The year-to-date sales and segment profit variances largely mirrored those of the quarter, except that United States and Canada had increased profit despite lower sales on a year-to-date basis, reflecting a more normal promotional spending approach in 2014 after being overly aggressive in 2013.

The Mexican peso was the main foreign currency that impacted the year-over-year comparisons.

- change is greater than 100%

Reported sales for the segment decreased 7 percent in the third quarter of 2014. Excluding the impact of changes in foreign currency exchange rates, sales decreased 6 percent, primarily reflecting the decision in April 2014, to cease operating the Armand Dupree business in the United States, as well as lower sales in BeautiControl reflecting lower sales force activity. This decrease was partially offset by a slight increase in Fuller Mexico sales with higher prices offsetting lower volume. The average price increase in this segment was 3 percent.

Segment profit was \$2.7 million lower in the third quarter of 2014. The decrease in profit primarily reflected amortization of the Fuller tradename in connection with a September 2013 change in classification from indefinite-lived to definite lived, the lost contribution margin from lower sales at BeautiControl and lower profit in Fuller Mexico, despite slightly higher sales, due to increased bad debt expense and promotional spending focused on sales force retention and increased activity. These decreases were partially offset by modest savings in light of closing the Armand Dupree business in the United States which operated at a loss in the third quarter of 2013.

The year-to-date sales and segment profit variances largely mirrored those of the quarter.

The Mexican peso was the main currency that impacted the year-over-year comparisons.

pp percentage points

Reported sales for the segment decreased 8 percent in the third quarter of 2014. Excluding the impact of foreign currency exchange rates, sales increased 25 percent. Of the 25 percent increase in sales in local currency, approximately two-thirds reflected the impact of higher prices in the segment. The remaining increase was the result of higher volume. The most significant increase was in Brazil, the largest unit in South America, based on higher volume of products sold along with increased prices. The volume improvement reflected a significant sales force size advantage and the launch of new attractive products that energized the sales force and created demand from end consumers, overcoming service issues experienced as a result of challenges in the supply chain. Argentina's sales increased significantly, primarily from higher prices in light of significant inflation, as well as a mix benefit as the unit continues to focus on selling a greater share of housewares products that have higher price points than beauty and personal care products. Venezuela also had a significant increase in local currency sales despite retail pricing restrictions mandated by the Venezuelan government that became effective near the end of the second quarter of 2014. Though the increase in sales was mainly due to higher, inflation related pricing, there was also a strong increase in volume.

Segment profit decreased in the third quarter of 2014, primarily reflecting a \$10.6 million impact of recording in cost of sales inventory whose bolivar value was translated at the 10.8 bolivars to the U.S. dollar exchange rate at which it was purchased, or manufactured, in the second quarter of 2014, rather than the 50 bolivars to the U.S. dollar exchange rate used to translate sales when the product was sold during the third quarter of 2014. Brazil also had lower profit due to a continuation of higher warehousing and distribution costs resulting from the significant growth in that business. The elevated costs in Brazil are expected to continue into 2015. These decreases were partially offset by the \$4.6 million in foreign exchange gains in connection with purchasing U.S. dollars with Venezuelan bolivars at rates more favorable than the rates used to translate those bolivars at the end of the second quarter.

The year-to-date sales and segment profit variances largely mirrored those of the quarter, except Venezuela represented a much greater share of the increase in sales and profit on a year-to-date basis as a result of translating first and second quarter sales and profit at the more favorable exchange rates of 6.3 and 10.8 bolivars to the U.S. dollar, respectively, than the 50.0 bolivar to U.S. dollar rate used in the third quarter, as well as the benefit of not having the government mandated retail pricing restrictions during the first and most of the second quarter.

Table of Contents

During 2014, the Company has recorded net pretax charges of \$42.2 million related to changes in the exchange rate of the Venezuelan bolivar to the U.S. dollar, including the impact related to the sale of product translated at its stronger, historical exchange rates rather than the rate used to translate sales in the period in which the product was sold.

The Argentine peso and Venezuelan bolivar had significant negative impacts on the third quarter and year-to-date sales comparisons, while the Brazilian real also significantly impacted the year-to-date sales comparison.

The Venezuelan bolivar had a significant negative impact on the third quarter and year-to-date profit comparisons, while the Brazilian real also had a significant negative impact on the year-to-date profit comparison.

The Company used the "banded" exchange rate of 5.3 to translate the value of the Venezuelan bolivar versus the U.S. dollar until February 2013, when the Venezuelan government set a new official exchange rate of 6.3 bolivars to the U.S. dollar ("Official Rate") and abolished the banded exchange rate. As a result of Venezuela being deemed hyper-inflationary, any gains or losses from translation of the financial statements are recorded in earnings. As a result of the change to the Official Rate, the Company's first quarter earnings in 2013 were reduced by \$3.9 million related to the devaluation of its Venezuelan bolivar denominated net monetary assets and the impact of selling inventory at a worse exchange rate than at which it was procured and produced.

In March 2013, the Venezuelan government created the Complimentary System of Foreign Currency Acquirement ("SICAD 1"). SICAD 1 is an auction system and allows entities in specific sectors to bid for U.S. dollars. As SICAD 1 is controlled by the government with strict guidelines as to who can participate, SICAD 1 is not considered to be a "free market system." Beginning in December 2013, the Venezuelan government began to publish the SICAD 1 rate. In January 2014, the Venezuelan government expanded the SICAD 1 auction process to be used for payments related to "international investment," while further restricting the availability of the Official Rate. Dividend payments require approval of the Venezuelan government, and in the recent past, such approvals have been rare at any exchange rate for all companies operating in the country. In late March 2014, the Company was invited to participate, for the first time, in the SICAD 1 auction process at a rate of 10.8 bolivars to the U.S. dollar ("SICAD 1 Rate") in order to purchase raw materials. The Company did not exchange money through the SICAD 1 mechanism in the first quarter of 2014, though it did exchange currency at the Official Rate. As a result, the Company continued to use the Official Rate to measure its operating activity during the first quarter of 2014. Since the Company anticipated making future currency exchanges under the SICAD 1 Rate and did not expect the Official Rate to be widely available in the future, the Company used the SICAD 1 Rate to remeasure the balance sheet in Venezuela at the end of the first quarter. The negative impact of this change was \$13.4 million pretax. There was also a \$6.4 million pretax impact in the second quarter of 2014 related to inventory on the balance sheet at the end of the first quarter that was included in cost of sales in the second quarter at the Official Rate of 6.3 bolivars to the dollar that was in effect when the inventory was purchased or manufactured. In the second quarter of 2014, the Company used the SICAD 1 Rate to translate its operating activity.

Table of Contents

On March 24, 2014, the Venezuelan government launched an additional foreign exchange mechanism known as SICAD 2. The Venezuelan government indicated that all industry sectors would be eligible to participate in the SICAD 2 auctions with no restrictions as to purpose. The resulting rates from these auctions were to be published daily. The SICAD 2 rate as of the end of June 2014 was 50.0 bolivars to the U.S. dollar. As of the end of the second quarter of 2014, the Company had not participated in any SICAD 2 auctions as it still had the ability to utilize the more favorable SICAD 1 Rate, as well as in light of the uncertainty around the ability to exchange bolivars through the SICAD 2 auction process. Although the SICAD 2 rates had been published daily, there had been relatively little volume of U.S. dollars traded or available to trade. It is unclear to what extent, if any, the Venezuelan government has intervened in the SICAD 2 auctions. Thus, SICAD 2 may not have been a "free market system" during the first and second quarters of 2014. As a result, the Company did not believe it appropriate to use the SICAD 2 published rates through June 2014. The government's mandate in June 2014 that the Company lower its suggested retail selling prices by an average of 55 percent was based on its determination of what was necessary for the Company to comply with laws limiting prices and profit margins across the Venezuelan economy. While the Company expects to discuss with the appropriate government officials why it believes its previous pricing was appropriate, the outcome of this discussion is uncertain and the Company may need to adjust its value chain to allow it to operate efficiently. In conjunction with the pricing audit, the Venezuelan government indicated that the Company should be able to pay for non-local operating costs at the SICAD 2 rate. Additionally, should the Company need to adjust its value chain, it expects to generate additional non-local operating costs. Based on these factors and its June 2014 evaluation of the restrictions and limitations affecting the availability of other, more favorable, exchange rates mechanisms, the Company concluded that the SICAD 2 mechanism represented the most appropriate rate available as of the end of the second quarter. As a result, the Company remeasured the balance sheet at that exchange rate as of the end of the second quarter, recording a negative pretax impact of \$15.8 million related to its net monetary assets. There was also a \$10.6 million pretax impact in the third quarter of 2014 related to inventory on the balance sheet at the end of the second quarter that was included in cost of sales in the third quarter at the SICAD 1 Rate of 10.8 bolivars to the U.S. dollar that was in effect when the inventory was purchased or manufactured. In addition, in the third quarter of 2014, the Company exchanged approximately 51 million bolivars for \$5.6 million at exchange rates more favorable than the SICAD 2 rate at which the bolivars were recorded at the end of the second quarter of 2014. These transactions generated an exchange gain of \$4.6 million, which was included in Other Income on the Company's Consolidated Statements of Income.

In the first, second and third quarters of 2014, sales in Venezuela were \$32.9 million, \$23.7 million and \$5.2 million, respectively. The impact on each of the year-over-year quarterly comparisons of weaker exchange rates in 2014 versus 2013 was \$0.8 million, \$8.9 million and \$21.1 million, respectively. Similarly, operating profit in the first, second and third quarters of 2014 was \$9.2 million, \$9.5 million and \$0.8 million, respectively, and the impact on each of the year-over-year quarterly comparisons from the changes in rates was \$0.1 million, \$2.5 million and \$7.1 million, respectively.

During the fourth quarter of 2013, sales and operating profit in Venezuela were \$28.0 million and \$6.1 million, respectively. If the fourth quarter 2014 SICAD 2 rate is the same 50.0 bolivars to the U.S. dollar that it was in the third quarter, the Company estimates that the impact on the year-over-year comparison on sales and operating profit of a weaker exchange rate will be \$24.5 million and \$5.2 million, respectively. Furthermore, if the exchange rate stays the same through June 2015, in the first half of 2015 there will be an incremental impact from the weaker rate compared with the first half 2014 of \$47.3 million and \$15.5 million, respectively, on sales and operating profit. The rate ultimately used by the Company in the future may be different than the 50.0 bolivars to U.S. dollar exchange rate available as of the end of the third quarter of 2014 under SICAD 2.

As of the end of the third quarter of 2014, the Company had \$6 million in net monetary assets denominated in Venezuelan bolivars (measured at the SICAD 2 rate), including \$6 million in cash and cash equivalents, which would be directly impacted by any changes in the exchange rate.

## Table of Contents

The Company is not able to predict, at this time, what rate will be available in the future to exchange Venezuelan bolivars into U.S. dollars. While the Company anticipates continued use of the SICAD 1 auction rates for raw materials only and may use the SICAD 2 auctions as deemed appropriate, the Company is not able to predict whether the SICAD 2 auctions will continue to provide a rate materially the same as the rate of 50.0 bolivars to the dollar available as of the end of the third quarter. The Company is also unable to predict if some other appropriate rate will develop in the future for conversion of bolivars to U.S. dollars for the payment of intercompany dividends. If such a rate were to be different, this would result in additional impacts to earnings and cash flows.

### Financial Condition

**Liquidity and Capital Resources:** Net working capital decreased by \$20.2 million, compared with the end of 2013, which primarily reflected an increase in short-term borrowings (net of cash and cash equivalents) to support financing activities. The net change in working capital also reflected a net \$25.1 million negative impact on the net monetary assets on the balance sheet related to the 2014 changes in foreign currency exchange rates in Venezuela, as well as a \$14.7 million impact due to other weaker foreign currency exchange rates in relation to the U.S. dollar. These were partially offset by an increase in accounts receivable reflecting the level and timing of sales around the end of each period and an increase in inventory, reflecting expectations for future sales by certain units and, in some cases, a lower than expected sell through, as well as a decrease in accounts payable due to the timing of payments around year-end, including the timing of income tax payments during 2014 and higher tax prepayments made at the end of 2012, compared with the end of 2013.

In June 2011 and March 2013, the Company completed the sale of \$400 million and \$200 million, respectively, in aggregate principal amount of 4.750% Senior Notes due June 1, 2021 (both issuances together the "Senior Notes"). The Senior Notes form a single series under the Indenture.

In September 2013, the Company and its wholly-owned subsidiary, Tupperware International Holdings B.V. (the "Subsidiary Borrower"), amended and restated their multicurrency Credit Agreement (the "Credit Agreement") with their consortium of lenders. The Credit Agreement makes available to the Company and the Subsidiary Borrower a five-year credit facility in an aggregate amount of \$650 million (the "Facility Amount"). With the agreement of its lenders, the Company is permitted to increase, on up to three occasions, the Facility Amount by a total of up to \$200 million (for a maximum aggregate Facility Amount of \$850 million), subject to certain conditions. As of September 27, 2014, the Company had total borrowings of \$311.7 million outstanding under its Credit Agreement, including \$103.1 million denominated in euro.

The Company routinely increases its revolver borrowings under the Credit Agreement and uncommitted lines during each quarter to fund operating, investing and financing activities and uses cash available at the end of each quarter to reduce borrowing levels. As a result, the Company incurs more interest expense and has higher foreign exchange exposure on the value of its cash during each quarter than would relate solely to the quarter end cash balance.

Loans taken under the Credit Agreement bear interest under a formula that includes, at the Company's option, one of three different base rates, plus an applicable spread. The Company generally selects the London interbank offered rate ("LIBOR"). As of September 27, 2014, the Credit Agreement dictated a spread of 175 basis points, which gave the Company a weighted interest rate on U.S. dollar and euro denominated LIBOR based borrowings of 1.85 percent. The Credit Agreement contains customary covenants, including financial covenants requiring a minimum level of interest coverage and allowing a maximum amount of leverage. As of September 27, 2014, and currently, the Company had considerable cushion under its financial covenants. However, economic conditions, adverse changes in foreign exchange rates, lower than foreseen sales, profit and/or cash flow generation, share repurchases or the occurrence of other events discussed under "Forward Looking Statements" and elsewhere could cause noncompliance. At September 27, 2014, the Company had \$619.8 million of unused lines of credit, including \$336.2 million under the committed, secured Credit Agreement, and \$283.6 million available under various uncommitted lines around the world.

See Note 10 to the Consolidated Financial Statements for further details regarding the Company's debt.

## Table of Contents

The Company monitors the third-party depository institutions that hold its cash and cash equivalents and diversifies its cash and cash equivalents among counterparties, which minimizes exposure to any one of these entities. Furthermore, the Company is exposed to financial market risk resulting from changes in interest rates, foreign currency rates and the possible liquidity and credit risks of its counterparties. The Company believes that it has sufficient liquidity to fund its working capital and capital spending needs and its current dividend. This liquidity includes its cash and cash equivalents, which totaled \$89.4 million as of September 27, 2014, cash flows from operating activities, and access to its \$650 million Credit Agreement, as well as access to other various uncommitted lines of credit around the world. The Company has not experienced any limitations on its ability to access its committed facility.

Cash and cash equivalents ("cash") totaled \$89.4 million as of September 27, 2014. Of this amount, \$87.8 million was held by foreign subsidiaries. Approximately 63 percent of the cash held outside of the United States was not eligible for repatriation due to the level of past statutory earnings by the foreign unit in which the cash was held or other local restrictions. The remaining cash is subject to repatriation tax effects. The Company's current intent is to indefinitely reinvest these funds in its foreign units, as the cash is needed to fund on-going operations. In the event circumstances change, leading to the conclusion that these funds will not be indefinitely reinvested, the Company would need to provide at that time for the income taxes that would be triggered upon their repatriation.

The Company's most significant exposures are to the euro, the Indonesian rupiah and the Mexican peso, as well as the Brazilian real and Malaysian ringgit. Business units in which the Company generated at least \$100 million of sales in 2013 included Brazil, Tupperware France, Fuller Mexico, Germany, Indonesia, Malaysia/Singapore, Tupperware Mexico and Tupperware United States and Canada. Of these units, sales by Fuller Mexico and Indonesia exceeded \$200 million. Downturns in the Company's business in these markets, including but not limited to, difficulties in the recruitment, retention and activity of the Company's independent sales force or the success of new products and/or promotional programs, adversely impacts the Company's ability to generate operating cash flows.

Operating Activities: Net cash provided by operating activities for the periods ended September 27, 2014 and September 28, 2013 was \$87.5 million and \$126.0 million, respectively. The unfavorable comparison primarily reflected a decrease in net income as a result of weaker foreign currency exchange rates in relation to the U.S. dollar and larger outflows of cash related to net working capital items, particularly larger increases in prepaid expenses, other assets and non-trade receivables due to the timing of cash receipts related to value added taxes and the Company's hedging activities. The Company also made large income tax payments related to fiscal year 2013 after the Company's fiscal year-end, but prior to the end of the calendar year, whereas similar 2012 payments occurred prior to the end of fiscal year-end 2012. Also, in the first quarter of 2013, the Company received cash as a premium and accrued interest in connection with its sale of \$200 million of Senior Notes.

Investing Activities: During the year-to-date periods of 2014 and 2013, the Company had \$46.0 million and \$42.9 million, respectively, of capital expenditures. In both 2014 and 2013, the most significant capital expenditures were related to molds. In 2014 and 2013, capital expenditures included \$10.6 million and \$8.6 million, respectively, related to facilities in Venezuela, to support operations and as a natural hedge against the impacts of inflation, increasing supply chain capacity in Brazil and vehicles for the sales force. Partially offsetting the capital spending in 2014 and 2013 were proceeds from the sale of property, plant and equipment of \$6.1 million and \$8.4 million, respectively. In each year, there were proceeds related to the sale of vehicles that had been purchased for the sales force, primarily in South Africa. In 2014, proceeds of \$4.0 million related to the sale of property under the Company's program to sell land near its Orlando, Florida headquarters and the sale of land in Australia. In 2013, proceeds included \$6.2 million for the sale of property in Australia.

Financing Activities: Dividends paid to shareholders were \$99.4 million and \$84.9 million in the year-to-date periods of 2014 and 2013, respectively. The higher 2014 amount was due to the increase in the dividends paid from \$1.60 per share to \$1.98 per share in the year-to-date period of 2013 and 2014, respectively, partially offset by a reduction in the number of shares outstanding in connection with the Company's share repurchase program. Proceeds received from the exercise of stock options were \$14.0 million and \$18.9 million in the year-to-date periods of 2014 and 2013, respectively. The Company also increased revolver borrowings through its Credit Agreement by \$84.9 million for the funding of dividends and on-going share repurchases.

## Table of Contents

Open market share repurchases are being made under an authorization that runs until February 1, 2017 and allows up to \$2.0 billion to be spent. Under this program, the Company repurchased 0.4 million and 3.7 million shares for \$34.3 million and \$300.0 million in the year-to-date periods of 2014 and 2013, respectively, and program-to-date through the end of September 2014, had spent \$1.24 billion to repurchase 20.5 million shares. Going forward, in setting share repurchase amounts, the Company expects to target over time a debt-to-EBITDA ratio of 1.75 times (as defined in the Company's Credit Agreement). The Company expects to spend \$71 million on open market share repurchases in the fourth quarter of 2014, which would bring full year 2014 open market repurchases to \$105 million.

Repurchases under the Company's stock incentive programs are made when employees use shares to satisfy the minimum statutorily required withholding taxes. In the year-to-date periods of 2014 and 2013, 93,505 and 47,187 shares were retained to fund withholding taxes, totaling \$7.4 million and \$3.7 million, respectively.

In total, through the open market repurchases and under its stock incentive programs detailed above, the Company repurchased in the year-to-date periods of 2014 and 2013, 0.5 million and 3.8 million shares for a total of \$41.7 million and \$303.7 million, respectively.

### New Pronouncements

Refer to Note 19 to the Consolidated Financial Statements for a discussion of new pronouncements.

### Item 3. Quantitative and Qualitative Disclosures About Market Risk

One of the Company's market risks is its exposure to the impact of interest rate changes on its borrowings. The Company has elected to manage this risk through the maturity structure of its borrowings and the currencies in which it borrows.

Loans taken under the Credit Agreement are of a short duration and bear interest under a formula that includes, at the Company's option, one of three different base rates, plus an applicable spread. The Company generally selects the London interbank offered rate ("LIBOR"). See Note 10 to the Consolidated Financial Statements for further details on the interest rate formula. As of September 27, 2014, the Credit Agreement dictated a spread of 175 basis points, which gave the Company a weighted average interest rate on its U.S. dollar and euro denominated LIBOR based borrowings under the Credit Agreement of 1.85 percent. The Company is targeting over time a debt-to-EBITDA ratio of 1.75 times consolidated funded indebtedness (as defined in the Credit Agreement).

As of September 27, 2014, the Company had total borrowings of \$311.7 million outstanding under its Credit Agreement, with \$103.1 million denominated in euro. If short-term interest rates varied by 10 percent, which in the Company's case would mean U.S. dollar and euro LIBOR, with all other variables remaining constant, the Company's annual interest expense would not be significantly impacted.

The Company routinely increases its revolver borrowings under the Credit Agreement and uncommitted lines during each quarter to fund operating, investing and financing activities and uses cash available at the end of each quarter to reduce borrowing levels. As a result, the Company incurs more interest expense and has higher foreign exchange exposure on the value of its cash during each quarter than would relate solely to the quarter end cash balance.

A significant portion of the Company's sales and profit come from its international operations. Although these operations are geographically dispersed, which partially mitigates the risks associated with operating in particular countries, the Company is subject to the usual risks associated with international operations. These risks include local political and economic environments and relations between foreign and U.S. governments.

Another economic risk of the Company is exposure to changes in foreign currency exchange rates on the earnings, cash flows and financial position of its international operations. The Company is not able to project, in any meaningful way, the effect of these possible fluctuations on translated amounts or future earnings. This is due to the Company's constantly changing exposure to various currencies, the fact that all foreign currencies do not react in the same manner in relation to the U.S. dollar and the large number of currencies involved, although the Company's most significant income and cash flow exposures are to the euro, Indonesian rupiah and Mexican peso, with meaningful exposures as well to the Brazilian real and Malaysian ringgit.

## Table of Contents

Although this currency risk is partially mitigated by the natural hedge arising from the Company's local product sourcing in many markets, a strengthening U.S. dollar generally has a negative impact on the Company. In response to this fact, the Company uses financial instruments, such as forward contracts, to hedge its exposure to certain foreign exchange risks associated with a portion of its investment in international operations. In addition to hedging against the balance sheet impact of changes in exchange rates, the hedge of investments in international operations also has the effect of hedging a portion of cash flows from those operations. The Company also hedges, with these instruments, certain other exposures to various currencies arising from amounts payable and receivable, non-permanent intercompany loans and a portion of purchases forecasted in the following 15 months. The Company generally does not seek to hedge the impact of currency fluctuations on the translated value of the sales, profit or cash flow generated by its operations.

While the Company's hedges of its equity in its foreign subsidiaries and its fair value hedges of balance sheet risks all work together to mitigate its exposure to foreign exchange gains or losses, they result in an impact to operating cash flows as they are settled. For the year-to-date periods ending September 27, 2014 and September 28, 2013, the cash flow impact of these currency hedges was an inflow of \$0.1 million and \$3.8 million, respectively.

The U.S. dollar equivalent of the Company's most significant net open foreign currency hedge positions as of September 27, 2014 were to buy euro \$66.0 million, U.S. dollars \$48.9 million, Chinese renminbi \$11.8 million and South Korean won \$10.7 million, and to sell Turkish lira \$22.1 million, Russian rubles \$20.2 million, Swiss francs \$17.9 million, Indonesian rupiah \$13.8 million, Japanese yen \$13.3 million and Brazilian real \$11.1 million. In agreements to sell foreign currencies in exchange for U.S. dollars, for example, an appreciating dollar versus the opposing currency would generate a cash inflow for the Company at settlement, with the opposite result in agreements to buy foreign currencies for U.S. dollars. The notional amounts change based upon changes in the Company's outstanding currency exposures. Based on rates existing as of September 27, 2014, the Company was in a net receivable position of approximately \$1.5 million related to its currency hedges, which upon settlement, could have a significant impact on the Company's cash flow. The Company records the impact of forward points in net interest expense.

A precise calculation of the impact of currency fluctuations is not practical since some of the contracts are between non-U.S. dollar currencies. The Company continuously monitors its foreign currency exposure and expects to enter into additional contracts to hedge exposure in the future. See further discussion regarding the Company's hedging activities for foreign currency in Note 11 to the Consolidated Financial Statements.

The Company is subject to credit risks relating to the ability of counterparties of hedging transactions to meet their contractual payment obligations. The risks related to creditworthiness and nonperformance have been considered in the determination of fair value for the Company's foreign currency forward exchange contracts. The Company continues to closely monitor its counterparties and will take action, as appropriate and possible, to further manage its counterparty credit risk.

## Table of Contents

The Company is also exposed to rising material prices in its manufacturing operations and, in particular, the cost of oil and natural gas-based resins, including the fact that in some cases resin prices are actually in, or are based on, currencies other than that of the unit buying the resin, which introduces a currency exposure that is incremental to the exposure to changing market prices. This is the primary material used in production of most Tupperware® products, and the Company estimates that 2014 cost of sales will include approximately \$193 million for the cost of resin in the Tupperware® brand products it produces and has contract manufactured. The Company uses many different kinds of resins in its products. About three-fourths of its resins are “polyolefins” (simple chemical structure, easily refined from oil), and as such, the price of these is strongly affected by the underlying price of oil and natural gas. The remaining one-fourth of its resins is more highly engineered, where the price of oil and natural gas plays a less direct role in determining price. With a comparable product mix and exchange rates, a 10 percent fluctuation in the cost of resin would impact the Company's annual cost of sales by approximately \$19 million compared with the prior year. For the third quarter of 2014, the Company estimates its cost of sales of the Tupperware® products it produced and had contract manufactured was negatively impacted by approximately \$4 million in local currency due to resin cost changes, as compared with 2013. For full year 2014, the estimated impact of resin cost changes, on a local currency basis, on the Company's cost of sales of the Tupperware® products it produces and has contract manufactured is negative \$13 million, as compared with 2013. The Company partially manages its risk associated with rising resin costs by utilizing a centralized procurement function that is able to take advantage of bulk discounts while maintaining multiple suppliers and also enters into short-term pricing arrangements. It also manages its margin through cash flow hedges in some cases when it purchases resin in currencies, or effectively in currencies, other than that of the purchasing unit and through the pricing of its products, with price increases generally in line with consumer inflation in each market, and its mix of sales through its promotional programs and discount offers. It may also, on occasion, make advance material purchases to take advantage of current favorable pricing. At this point in time, the Company has determined that entering into forward contracts for resin is not practical or cost beneficial and has no such contracts in place. However, should circumstances warrant, the Company may consider such contracts in the future. The Company has a program to sell land held for development around its Orlando, Florida headquarters (“Orlando Land”). This program is exposed to the risks inherent in the real estate development process. Included among these risks is the ability to obtain all government approvals, the success of attracting tenants for commercial or residential developments in the Orlando real estate market or obtaining financing and general economic conditions, such as interest rate increases. In recent years, the Company's land sale program has been negatively impacted by the drivers and ramifications of the credit crisis that began in 2008 and real estate market conditions in the United States. Although market conditions have improved, the Company cannot predict when the program will be completed.

### Forward-Looking Statements

Certain written and oral statements made or incorporated by reference from time to time by the Company or its representatives in this report, other reports, filings with the Securities and Exchange Commission, press releases, conferences or otherwise are “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Statements in this report or elsewhere that are not based on historical facts or information are forward-looking statements. Such forward-looking statements involve risks and uncertainties which may cause actual results to differ materially from those projected in forward-looking statements. Such risks and uncertainties include, among others, the following:

- successful recruitment, retention and productivity levels of the Company's independent sales forces;
- disruptions caused by the introduction of new or revised distributor operating models or sales force compensation systems or allegations by equity analysts or others as to the legality or viability of the Company's business model;
- success of new products and promotional programs;
- the ability to implement appropriate product mix and pricing strategies;
- governmental regulation of materials used in products coming into contact with food (e.g. polycarbonate), as well as beauty, personal care and nutritional products;

Table of Contents

the ability to procure and pay for at reasonable economic cost, sufficient raw materials and/or finished goods to meet current and future consumer demands at reasonable suggested retail pricing levels in certain markets, particularly Argentina, Ecuador and Venezuela due to government regulations and restrictions;

the impact of changes in consumer spending patterns and preferences, particularly given the global nature of the Company's business;

the value of long-term assets, particularly goodwill and indefinite and definite lived intangibles associated with acquisitions, and the realizability of the value of recognized tax assets;

changes in plastic resin prices, other raw materials and packaging components, the cost of converting such items into finished goods and procured finished products and the cost of delivering products to customers;

the introduction of Company operations in new markets outside the United States;

general social, economic and political conditions in markets, such as in Argentina, Ecuador, Russia, Ukraine and Venezuela and other countries impacted by such events;

issues arising out of the sovereign debt in the countries in which the Company operates, such as in Argentina and the Euro zone, resulting in potential economic and operational challenges for the Company's supply chains, heightened counterparty credit risk due to adverse effects on customers and suppliers, exchange controls and translation risks due to potential impairments of investments in affected markets and the potential for banks with which the Company maintains lines of credit to be unable to fulfill their commitments;

disruptions resulting from either internal or external labor strikes, work stoppages, or similar difficulties;

changes in cash flow resulting from changes in operating results, including from changes in foreign exchange rates, working capital management, debt payments, share repurchases and hedge settlements;

the impact of currency fluctuations on the value of the Company's operating results, assets, liabilities and commitments of foreign operations generally, and particularly in Venezuela, including their cash balances, the results of those operations, the cost of sourcing products across geographies and the success of foreign hedging and risk management strategies;

the impact of natural disasters and epidemic or pandemic disease outbreaks;

the ability to repatriate, or otherwise make available, cash in the United States and to do so at a favorable foreign exchange rate and with favorable tax ramifications;

the ability to obtain all government approvals on, and to control the cost of infrastructure obligations associated with, property, plant and equipment;

the ability to timely and effectively implement, transition, maintain and protect necessary information technology systems and infrastructure;

the ability to attract and retain certain executive officers and key management personnel;

the success of land buyers in attracting tenants for commercial and residential development and obtaining financing;

the costs and covenant restrictions associated with the Company's credit arrangements;

integration of non-traditional product lines into Company operations;

the effect of legal, regulatory and tax proceedings, as well as restrictions imposed on the Company's operations or Company representatives by foreign governments, including exposure to tax responsibilities imposed on the sales force and their potential impact on the sales force's value chain and resulting disruption to the business and actions taken by governments in Venezuela or elsewhere to set or restrict the freedom of the Company to set its own prices or its suggested retail prices for product sales by its sales force to end consumers;

the effect of competitive forces in the markets in which the Company operates, particularly related to sales of beauty, personal care and nutritional products, where there are a greater number of competitors;

the impact of counterfeit and knocked-off products in the markets in which the Company operates and the effect this can have on the confidence of the Company's sales force members;

the impact of changes in U.S. federal, state and foreign tax or other laws;

the Company's access to, and the costs of, financing; and

other risks discussed in Item 1A, Risk Factors, of the Company's 2013 Annual Report on Form 10-K, as well as the Company's Consolidated Financial Statements, Notes, other financial information appearing elsewhere in this report and the Company's other filings with the United States Securities and Exchange Commission.

Other than updating for changes in foreign currency exchange rates in its monthly website updates, the Company does not intend to update forward-looking information, except through its quarterly earnings releases, unless it expects diluted earnings per share for the current quarter, excluding items impacting comparability and changes versus its guidance of the impact of changes in foreign exchange rates, to be significantly below its previous guidance.

Investors should also be aware that while the Company does, from time to time, communicate with securities analysts, it is against the Company's policy to disclose to them any material non-public information or other confidential commercial information. Accordingly, it should not be assumed that the Company agrees with any statement or report issued by any analyst irrespective of the content of the confirming financial forecasts or projections issued by others.

### Item 4. Controls and Procedures

#### Evaluation of Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15(d)-15(e)) that are designed to ensure that information required to be disclosed in the Company's reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to the Company's management, including the Chief Executive Officer and the Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognized that controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives.

As of the end of the period covered by this report, management, under the supervision of the Company's Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the design and operation of the disclosure controls and procedures were effective.

#### Changes in Internal Controls

There have been no significant changes in the Company's internal control over financial reporting during the Company's third quarter that have materially affected or are reasonably likely to materially affect its internal control over financial reporting, as defined in Rule 13a-15(f) promulgated under the Securities Exchange Act of 1934.
