UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 10-Q

☒ Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the 13 weeks ended March 28, 2015

OR

☐ Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the Transition period from _____ to _____

Commission file number 1-11657

TUPPERWARE BRANDS CORPORATION

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of
incorporation or organization)

36-4062333

(I.R.S. Employer
Identification No.)

14901 South Orange Blossom Trail, Orlando, Florida

(Address of principal executive offices)

32837

(Zip Code)

Registrant's telephone number, including area code: (407) 826-5050

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☒

Accelerated filer

☐

Non-accelerated filer ☐ (Do not check if a smaller reporting company)

Smaller reporting company ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

As of April 30, 2015, 49,843,563 shares of the common stock, \$0.01 par value, of the registrant were outstanding.

Table of Contents

TUPPERWARE BRANDS CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Note 1: Summary of Significant Accounting Policies

Basis of Presentation: The condensed consolidated financial statements include the accounts of Tupperware Brands Corporation and its subsidiaries, collectively “Tupperware” or the “Company”, with all intercompany transactions and balances having been eliminated. These condensed consolidated financial statements and related notes should be read in conjunction with the audited 2014 financial statements included in the Company's Annual Report on Form 10-K for the year ended December 27, 2014.

Certain prior year amounts have been reclassified to conform with current year presentation.

These condensed consolidated financial statements are unaudited and have been prepared following the rules and regulations of the United States Securities and Exchange Commission and, in the Company's opinion, reflect all adjustments, including normal recurring items that are necessary for a fair statement of the results for the interim periods. Certain information and note disclosures normally included in the balance sheet, statements of income, comprehensive income and cash flows prepared in conformity with accounting principles generally accepted in the United States of America have been condensed or omitted as permitted by such rules and regulations. Operating results of any interim period presented herein are not necessarily indicative of the results that may be expected for a full fiscal year.

Use of Estimates: The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements, as well as the reported amounts of revenues and expenses during the reporting period. Actual results could differ materially from these estimates.

Venezuela Foreign Currency Translation: The exchange rate used in translating the Company's operating activity in Venezuela in the first quarter of 2014 was 6.3 bolivars to the U.S. dollar. In February 2015, the Venezuelan government launched an overhaul of its foreign currency exchange structure for obtaining U.S. dollars, introducing the Simadi mechanism. The Company used 172.0 bolivars to the U.S. dollar to translate its February 2015 operating activity and 190.0 to translate March 2015 operating activity and the end of March balance sheet of Venezuela. The Company currently expects to use the Simadi rate to translate future operating activity. The pretax impact in the first quarter of 2015 of re-measuring net monetary assets and recording in cost of sales inventory at the exchange rate when it was purchased or manufactured rather than when it was sold was \$9.3 million. In the first quarter of 2014, there was a \$13.4 million pretax loss recorded in connection with the remeasurement of net monetary assets in Venezuela. The amounts related to remeasurement are included in other expense.

As of March 28, 2015, the Company had approximately \$2 million of net monetary assets in Venezuela, which were of a nature that would generate income or expense associated with future exchange rate fluctuations versus the U.S. dollar.

Note 2: Shipping and Handling Costs

The cost of products sold line item includes costs related to the purchase and manufacture of goods sold by the Company. Among these costs are inbound freight charges, purchasing and receiving costs, inspection costs, depreciation expense, internal transfer costs and warehousing costs of raw material, work in process and packing materials. The warehousing and distribution costs of finished goods are included in delivery, sales and administrative expense (“DS&A”). Distribution costs are comprised of outbound freight and associated labor costs. Fees billed to customers associated with the distribution of products are classified as revenue. The distribution costs included in DS&A expense for the first quarters of 2015 and 2014 were \$34.7 million and \$38.7 million, respectively.

Table of Contents

TUPPERWARE BRANDS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

Note 3: Promotional Costs

The Company frequently makes promotional offers to members of its independent sales force to encourage them to fulfill specific goals or targets for sales levels, party attendance, recruiting of new sales force members or other business-critical functions. The awards offered are in the form of cash, product awards, special prizes or trips.

The Company accrues for the costs of these awards during the period over which the sales force qualifies for the award and reports these costs primarily as a component of DS&A expense. These accruals require estimates as to the cost of the awards, based upon estimates of achievement and actual cost to be incurred. During the qualification period, actual results are monitored, and changes to the original estimates are made when known. Promotional and other sales force compensation expenses included in DS&A expense totaled \$102.0 million and \$113.8 million for the first quarters of 2015 and 2014, respectively.

Note 4: Inventories

(In millions)	March 28, 2015	December 27, 2014
Finished goods	\$235.2	\$242.5
Work in process	26.2	26.8
Raw materials and supplies	39.3	36.7
Total inventories	\$300.7	\$306.0

Note 5: Net Income Per Common Share

Basic per share information is calculated by dividing net income by the weighted average number of shares outstanding. Diluted per share information is calculated by also considering the impact of potential common stock on both net income and the weighted average number of shares outstanding.

The elements of the earnings per share computations were as follows:

(In millions, except per share amounts)	13 weeks ended March 28, 2015	March 29, 2014
Net income	\$29.5	\$52.2
Weighted-average shares of common stock outstanding	49.7	50.2
Common equivalent shares:		
Assumed exercise of dilutive options, restricted shares, restricted stock units and performance share units	0.6	0.9
Weighted-average common and common equivalent shares outstanding	50.3	51.1
Basic earnings per share	\$0.59	\$1.04
Diluted earnings per share	\$0.59	\$1.02
Shares excluded from the determination of potential common stock because inclusion would have been anti-dilutive	0.6	0.4

(Unaudited)

Note 6: Accumulated Other Comprehensive Loss

(In millions, net of tax)	Foreign Currency Items	Cash Flow Hedges	Pension and Other Post-retirement Items	Total
Balance at December 27, 2014	\$(368.3) \$7.8	\$ (48.2) \$(408.7)
Other comprehensive income (loss) before reclassifications	(25.2) 3.0	2.4	(19.8)
Amounts reclassified from accumulated other comprehensive loss	—	(3.4) 0.5	(2.9)
Net current-period other comprehensive income (loss)	(25.2) (0.4) 2.9	(22.7)
Balance at March 28, 2015	\$(393.5) \$7.4	\$ (45.3) \$(431.4)
(In millions, net of tax)	Foreign Currency Items	Cash Flow Hedges	Pension and Other Post-retirement Items	Total
Balance at December 28, 2013	\$(283.1) \$2.2	\$ (35.9) \$(316.8)
Other comprehensive income (loss) before reclassifications	(0.9) 2.8	—	1.9
Amounts reclassified from accumulated other comprehensive loss	—	(1.3) 0.3	(1.0)
Net current-period other comprehensive income (loss)	(0.9) 1.5	0.3	0.9
Balance at March 29, 2014	\$(284.0) \$3.7	\$ (35.6) \$(315.9)

Pretax amounts reclassified from accumulated other comprehensive loss that related to cash flow hedges consisted of net gains of \$4.3 million and \$1.7 million for the first quarters of 2015 and 2014, respectively. Associated with these items were tax provisions of \$0.9 million and \$0.4 million, respectively. See Note 10 for further discussion of derivatives.

For the first quarters of 2015 and 2014, pretax amounts reclassified from accumulated other comprehensive loss related to pension and other post-retirement items consisted of prior service benefits of \$0.3 million and \$0.2 million, respectively, and actuarial losses of \$1.0 million and \$0.6 million, respectively. The tax benefit associated with these items was \$0.2 million and \$0.1 million, respectively. See Note 12 for further discussion of pension and other post-retirement benefit costs.

Note 7: Re-engineering and Impairment Costs

The Company recorded \$2.7 million and \$2.3 million in re-engineering charges during the first quarters of 2015 and 2014, respectively. In both years, these charges were primarily related to severance costs incurred for headcount reductions in several of the Company's operations in connection with changes in its management and organizational structures, and in 2014, the decision to cease operating the Armand Dupree business in the United States.

Table of Contents

TUPPERWARE BRANDS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

The balances included in accrued liabilities related to re-engineering and impairment charges as of March 28, 2015 and December 27, 2014 were as follows:

(In millions)	March 28, 2015	December 27, 2014
Beginning of the year balance	\$2.4	\$2.6
Provision	2.7	11.0
Non-cash charges	(0.1) (1.8
Cash expenditures:		
Severance	(2.0) (7.1
Other	(0.4) (2.3
End of period balance	\$2.6	\$2.4

The accrual balance as of March 28, 2015, related primarily to severance payments to be made by the end of the second quarter of 2015. In connection with the decision to cease operating the Armand Dupree business in the United States, the Company recorded \$1.6 million in cost of sales for inventory obsolescence during the first quarter of 2014. In February 2015, the Venezuelan government launched an overhaul of its foreign currency exchange structure and created a new exchange mechanism called Simadi that has provided an exchange rate significantly lower than the rate available to the Company under the previous SICAD 2 mechanism. As a result, and based on the perceived impact of this change to the operations of its Venezuelan unit, the Company deemed this change to be a triggering event to evaluate the \$15.7 million of long-term fixed assets in Venezuela. This evaluation involved performing an undiscounted cash flow analysis to determine if the carrying value of the assets were recoverable and greater than fair value. The Company considered many economic and operating factors, including uncertainty surrounding the interpretation and enforcement of certain product pricing restrictions in Venezuela, the inability to obtain the necessary raw materials locally to meet production demands and the significant decline in the global price of oil. Due to the decline of the global price of oil, the Venezuelan government has not made U.S. dollars widely available through any of the exchange mechanisms it has had in place. Given the devaluation of the Venezuelan bolivar compared to the U.S. dollar, and the lack of U.S. dollars available to use for the purchase of raw materials from on-going operations, the Company does not believe it will be able to operate the business profitably. As a result, the Company concluded that the carrying value of the long-term fixed assets in Venezuela were not recoverable. The Company then estimated the fair value of the long-term fixed assets using estimated selling prices available in Venezuela. The primary assets that were considered to continue to maintain a marketable value in Venezuela included commercial office space, a show room and parking spaces. As a result of this evaluation in the first quarter of 2015, the Company recorded an impairment charge of \$13.5 million to reduce the long-term fixed asset carrying value in Venezuela to the estimated fair value of \$2.2 million, which is considered a non-recurring Level 3 measurement within the fair value hierarchy.

Note 8: Segment Information

The Company manufactures and distributes a broad portfolio of products, primarily through independent direct sales consultants. Certain operating segments have been aggregated based upon consistency of economic substance, geography, products, production process, class of customers and distribution method.

Other	1.2	11.4
Total debt obligations	\$878.4	\$831.4

(a) \$175.9 million denominated in euros

Credit Agreement

At March 28, 2015, the Company had \$652.6 million of unused lines of credit, including \$380.3 million under the committed, secured Credit Agreement, and \$272.3 million available under various uncommitted lines around the world.

As of March 28, 2015, the Company had a weighted average interest rate on LIBOR based borrowings of 1.52 percent under the Credit Agreement.

The Credit Agreement has customary financial covenants related to interest coverage and leverage. These restrictions are not expected to impact the Company's operations. As of March 28, 2015, and currently, the Company had considerable cushion under its financial covenants.

Note 10: Derivative Instruments and Hedging Activities

The Company is exposed to fluctuations in foreign currency exchange rates on the earnings, cash flows and financial position of its international operations. Although this currency risk is partially mitigated by the natural hedge arising from the Company's local manufacturing in many markets, a strengthening U.S. dollar generally has a negative impact on the Company. In response to this fact, the Company uses financial instruments to hedge certain of its exposures and to manage the foreign exchange impact to its financial statements. At its inception, a derivative financial instrument used for hedging is designated as a fair value, cash flow or net equity hedge.

Table of Contents

TUPPERWARE BRANDS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

Fair value hedges are entered into with financial instruments such as forward contracts, with the objective of limiting exposure to certain foreign exchange risks primarily associated with accounts payable and non-permanent intercompany transactions. For derivative instruments that are designated and qualify as fair value hedges, the gain or loss on the derivative, as well as the offsetting gain or loss on the hedged item attributable to the hedged risk, are recognized in current earnings. In assessing hedge effectiveness, the Company excludes forward points, which are considered to be a component of interest expense. The forward points on fair value hedges resulted in pretax gains of \$2.8 million and \$2.4 million in the first quarters of 2015 and 2014, respectively.

The Company also uses derivative financial instruments to hedge foreign currency exposures resulting from certain forecasted purchases and classifies these as cash flow hedges. At initiation, the Company's cash flow hedge contracts are for periods ranging from one to fifteen months. The effective portion of the gain or loss on the hedging instrument is recorded in other comprehensive income and is reclassified into earnings as the transactions being hedged are recorded. As such, the balance at the end of the reporting period in other comprehensive income, related to cash flow hedges, will be reclassified into earnings within the next twelve months. The associated asset or liability on the open hedges is recorded in other current assets or accrued liabilities, as applicable. In assessing hedge effectiveness, the Company excludes forward points, which are included as a component of interest expense.

The Company also uses financial instruments, such as forward contracts and certain euro denominated borrowings under the Company's Credit Agreement, to hedge a portion of its net equity investment in international operations and classifies these as net equity hedges. Changes in the value of these financial instruments, excluding any ineffective portion of the hedges, are included in foreign currency translation adjustments within accumulated other comprehensive loss. The Company recorded a \$19.5 million net gain associated with net equity hedges in other comprehensive income, net of tax, in the first quarter of 2015, and a net loss of \$3.3 million associated with such hedges in the first quarter of 2014. Due to the permanent nature of the investments, the Company does not anticipate reclassifying any portion of these amounts to the income statement in the next twelve months. In assessing hedge effectiveness, the Company excludes forward points, which are included as a component of interest expense.

While the Company's net equity and fair value hedges of non-permanent intercompany balances mitigate its exposure to foreign exchange gains or losses, they result in an impact to operating cash flows as they are settled, whereas in some cases the hedged items do not generate offsetting cash flows. The net cash flow impact of these currency hedges was an inflow of \$3.6 million and an outflow of \$4.7 million for the first quarters of 2015 and 2014, respectively.

The Company considers the total notional value of its forward contracts as the best measure of the volume of derivative transactions. As of March 28, 2015 and December 27, 2014, the notional amounts of outstanding forward contracts to purchase currencies were \$101.8 million and \$185.1 million, respectively, and the notional amounts of outstanding forward contracts to sell currencies were \$110.0 million and \$184.2 million, respectively. As of March 28, 2015, the notional values of the largest positions outstanding were to purchase U.S. dollars \$45.8 million and euro \$29.3 million.

The following table summarizes the Company's derivative positions, which are the only assets and liabilities recorded at fair value on a recurring basis, and the impact they had on the Company's financial position as of March 28, 2015 and December 27, 2014. Fair values were determined based on third party quotations (Level 2 fair value measurement):

	Asset derivatives			Liability derivatives		
		Fair value			Fair value	
Derivatives designated as hedging instruments (in millions)	Balance sheet location	Mar 28, 2015	Dec 27, 2014	Balance sheet location	Mar 28, 2015	Dec 27, 2014
Foreign exchange contracts	Non-trade amounts receivable	\$32.0	\$35.0	Accrued liabilities	\$37.8	\$30.3

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

The following table summarizes the impact of the Company's fair value hedging positions on the results of operations for the first quarters of 2015 and 2014:

Derivatives designated as fair value hedges (in millions)	Location of gain or (loss) recognized in income on derivatives	Amount of gain or (loss) recognized in income on derivatives		Location of gain or (loss) recognized in income on related hedged items	Amount of gain or (loss) recognized in income on related hedged items	
		2015	2014		2015	2014
Foreign exchange contracts	Other expense	\$ (24.7)	\$ 1.0	Other expense	\$ 25.1	\$ (0.5)

The following table summarizes the impact of Company's hedging activities on comprehensive income for the first quarters of 2015 and 2014:

Cash flow and net equity hedges (in millions)	Amount of gain or (loss) recognized in OCI (effective portion)		Location of gain or (loss) reclassified from accumulated OCI into income (effective portion)	Amount of gain or (loss) reclassified from accumulated OCI into income (effective portion)		Location of gain or (loss) recognized in income (ineffective portion and amount excluded from effectiveness testing)	Amount of gain or (loss) recognized in income (ineffective portion and amount excluded from effectiveness testing)	
	2015	2014		2015	2014		2015	2014
Foreign exchange contracts	\$ 3.4	\$ 3.4	Cost of products sold	\$ 4.3	\$ 1.7	Interest expense	\$ (2.9)	\$ (1.3)
Net equity hedging relationships								
Foreign exchange contracts	19.5	(5.1)	Other expense	—	—	Interest expense	(3.5)	(3.6)
Euro denominated debt	10.9	—	Other expense	—	—	Other expense	—	—

Note 11: Fair Value Measurements

Due to their short maturities or their insignificance, the carrying amounts of cash and cash equivalents, accounts and notes receivable, accounts payable, accrued liabilities and short-term borrowings approximated their fair values at March 28, 2015 and December 27, 2014. The Company estimates that, based on current market conditions, the value of its 4.750% 2021 Senior Notes was \$643.2 million at March 28, 2015, compared with the carrying value of \$599.2 million. The higher fair value resulted from changes, since issuance, in the corporate bond market and investor preferences. The fair value of debt is classified as a Level 2 liability, and is estimated using quoted market prices as provided in secondary markets which consider the Company's credit risk and market related conditions. See Note 10 to the Consolidated Financial Statements for discussion of the Company's derivative instruments and related fair value measurements.

Note 12: Retirement Benefit Plans

Components of net periodic benefit cost for the first quarters ended March 28, 2015 and March 29, 2014 were as follows:

First Quarter
Pension benefits

(In millions)	2015	2014	Postretirement benefits	
			2015	2014
Service cost	\$2.8	\$2.8	\$—	\$—
Interest cost	1.8	2.2	0.2	0.4
Expected return on plan assets	(1.4)(1.6) —	—
Net amortization	1.0	0.6	(0.3)(0.2
Net periodic benefit cost	\$4.2	\$4.0	\$(0.1)\$0.2

Table of Contents

TUPPERWARE BRANDS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

During the first quarters of 2015 and 2014, approximately \$0.7 million and \$0.4 million, respectively, of pretax expenses were reclassified from other comprehensive income to a component of net periodic benefit cost. As they relate to foreign plans, the Company uses current exchange rates to make these reclassifications. The impact of exchange rate fluctuations is included on the net amortization line of the table above.

Note 13: Income Taxes

The effective tax rate for the first quarter of 2015 was 28.4 percent, compared with 26.2 percent for the comparable 2014 period. The higher 2015 rate was due to higher 2015 first quarter losses incurred related to the devaluation of the Venezuelan bolivar for which no tax benefit can be recognized. The effective tax rates are below the U.S. statutory rate primarily due to lower foreign effective tax rates.

As of March 28, 2015 and December 27, 2014, the Company's gross unrecognized tax benefit was \$20.2 million and \$22.5 million, respectively. The Company estimates that approximately \$18.2 million of the unrecognized tax benefits, if recognized, would impact the effective tax rate. Interest and penalties related to uncertain tax positions in the Company's global operations are recorded as a component of the provision for income taxes. Accrued interest and penalties were \$4.9 million and \$6.5 million as of March 28, 2015 and December 27, 2014, respectively. During 2015, the accrual for uncertain tax positions decreased by \$2.3 million primarily as a result of the Company agreeing to audit settlements with various jurisdictions, \$1.3 million of which reduced the accrual for interest and penalties. The accrual for uncertain tax positions also increased for positions being taken in various global tax filings, and decreased due to the impact of foreign currency fluctuations.

The Company estimates that it may settle one or more foreign audits in the next twelve months that may result in a decrease in the amount of accrual for uncertain tax positions of up to \$1.0 million. For the remaining balance as of March 28, 2015, the Company is not able to reliably estimate the timing or ultimate settlement amount. While the Company does not currently expect material changes, it is possible that the amount of unrecognized benefit with respect to the uncertain tax positions will significantly increase or decrease related to audits in various foreign jurisdictions that may conclude during that period or new developments that could also, in turn, impact the Company's assessment relative to the establishment of valuation allowances against certain existing deferred tax assets. These valuation allowances relate to tax assets in jurisdictions where it is management's best estimate that there is not a greater than 50 percent probability that the benefit of the assets will be realized in the associated tax returns. The likelihood of realizing the benefit of deferred tax assets is assessed on an ongoing basis. This assessment requires estimates as to future operating results, as well as an evaluation of the effectiveness of the Company's tax planning strategies. At this time, the Company is not able to make a reasonable estimate of the range of impact on the balance of unrecognized tax benefits or the impact on the effective tax rate related to these items.

Note 14: Statement of Cash Flow Supplemental Disclosure

Under the Company's stock incentive programs, employees are allowed to use shares retained by the Company to satisfy U.S. minimum statutorily required withholding taxes. In the first quarters of 2015 and 2014, 11,890 and 86,872 shares, respectively, were retained to fund withholding taxes, with values totaling \$0.9 million and \$6.9 million, respectively, which were included as a component of stock repurchases in the Consolidated Statements of Cash Flows. During the first quarter of 2014, the Company entered into a joint venture with a real estate development partner. The Company contributed land to the joint venture in exchange for 50 percent ownership of the joint venture. The carrying value of the land was \$3.1 million. The Company's ownership interest in the joint venture is accounted for using the equity method and was included in long-term other assets on the March 28, 2015 balance sheet at the carrying value of the contributed land. The Company does not expect to have any significant cash inflows or outflows related to the joint venture until such time as the joint venture completes and sells its development.

There were no capital lease arrangements initiated in the first quarters of 2015 and 2014.

Note 15: Stock Based Compensation

Stock option activity for 2015 is summarized in the following table:

	Shares subject to option	Weighted average exercise price per share	Aggregate intrinsic value (in millions)
Outstanding at December 27, 2014	2,192,136	\$48.95	
Granted	7,132	62.40	
Expired / Forfeited	(2,139)) 59.55	
Exercised	(78,995)) 40.08	
Outstanding at March 28, 2015	2,118,134	\$49.31	\$47.6
Exercisable at March 28, 2015	1,506,664	\$41.67	\$44.2

The intrinsic value of options exercised totaled \$2.2 million and \$8.4 million in the first quarters of 2015 and 2014, respectively.

The Company also has time-vested, performance-vested and market-vested awards. The activity for such awards in 2015 is summarized in the following table:

	Shares outstanding	Weighted average grant date fair value
December 27, 2014	651,849	\$59.76
Time-vested shares granted	3,997	62.12
Market-vested shares granted	23,637	64.21
Performance shares granted	62,722	72.61
Performance share adjustments	490	79.34
Vested	(236,169)) 33.72
Forfeited	(2,465)) 72.78
March 28, 2015	504,061	\$73.65

Compensation expense related to the Company's stock based compensation is as follows:

(In millions)	March 28, 2015	March 29, 2014
Stock options	\$0.6	\$0.4
Time, performance and market vested awards	3.2	4.6

As of March 28, 2015, total unrecognized stock based compensation expense related to all stock based awards was \$27.3 million, which is expected to be recognized over a weighted average period of 2.1 years.

Note 16: Allowance for Long-Term Receivables

As of March 28, 2015, \$12.0 million of long-term receivables from both active and inactive customers were considered past due, the majority of which were reserved through the Company's allowance for uncollectible accounts. The balance of the allowance for long-term receivables as of March 28, 2015 was as follows:

(In millions)	
Balance at December 27, 2014	\$13.1
Write-offs	(0.4)
Provision and reclassifications	0.3
Currency translation adjustment	(1.4)
Balance at March 28, 2015	\$11.6

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

Note 17: Guarantor Information

The Company's payment obligations under the Notes are fully and unconditionally guaranteed, on a senior secured basis, by the Guarantor. The guarantee is secured by certain "Tupperware" trademarks and service marks owned by the Guarantor.

Condensed consolidated financial information as of March 28, 2015 and December 27, 2014 and for the quarter-to-date periods ended March 28, 2015 and March 29, 2014 for Tupperware Brands Corporation (the "Parent"), Dart Industries Inc. (the "Guarantor") and all other subsidiaries (the "Non-Guarantors") is as follows.

Each entity in the consolidating financial information follows the same accounting policies as described in the consolidated financial statements, except for the use by the Parent and Guarantor of the equity method of accounting to reflect ownership interests in subsidiaries that are eliminated upon consolidation. The Guarantor is 100% owned by the Parent, and there are certain entities within the Non-Guarantors classification which the Parent owns directly. There are no significant restrictions on the ability of either the Parent or the Guarantor from obtaining adequate funds from their respective subsidiaries by dividend or loan that should interfere with their ability to meet their operating needs or debt repayment obligations.

Note 18: New Accounting Pronouncements

In May 2014, the FASB issued an amendment to existing guidance regarding revenue from contracts with customers. The amendment outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers. On April 1, 2015, the FASB proposed deferring the effective date by one year to December 15, 2017 for annual reporting periods beginning after that date. The FASB also proposed permitting early adoption of the standard, but not before the original effective date of December 15, 2016. The Company is currently evaluating the impact of the adoption of this amendment on its Consolidated Financial Statements.

In February 2015, the FASB issued an amendment to existing guidance regarding consolidation for reporting organizations such as limited partnerships and other similar entities that are required to evaluate whether they should consolidate certain legal entities. This guidance is effective for fiscal years beginning after December 15, 2015. Early adoption is permitted. The Company does not expect adoption of this amendment to have an impact on its Consolidated Financial Statements.

Table of Contents

TUPPERWARE BRANDS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

In April 2015, the FASB issued an amendment to existing guidance which requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The Company adopted this amendment retrospectively effective March 28, 2015. The adoption of this amendment did not have a material impact on the Consolidated Financial Statements. In April 2015, the FASB issued an amendment to existing guidance providing a practical expedient for entities with fiscal year-ends that do not fall on a month-end by permitting those entities to measure defined benefit plan assets and obligations as of the month-end that is closest to the entity's fiscal year-end. The Company adopted this amendment prospectively effective March 28, 2015. The adoption of this amendment will not have a material impact on the Consolidated Financial Statements.

In April 2015, the FASB issued an amendment to existing guidance regarding accounting for fees in a cloud computing arrangement. Under the amendment, if a cloud computing arrangement includes a software license, then the entity should account for the software license element of the arrangement consistent with the acquisition of other software licenses. If the arrangement does not include a software license, the entity should account for the arrangement as a service contract. The Company adopted this amendment prospectively effective March 28, 2015. The adoption of this amendment will not have a material impact on the Consolidated Financial Statements.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following is a discussion of the results of operations for the 13 weeks ended March 28, 2015, compared with the 13 weeks ended March 29, 2014, and changes in financial condition during the 13 weeks ended March 28, 2015.

The Company's primary means of distributing its products is through independent sales organizations and individuals, which in many cases are also its customers. The vast majority of the Company's products are, in turn, sold to end customers who are not members of its sales force. The Company is largely dependent upon these independent sales organizations and individuals to reach end consumers, and any significant disruption of this distribution network would have a negative financial impact on the Company and its ability to generate sales, earnings and operating cash flows. The Company's primary business drivers are the size, activity, diversity and productivity of its independent sales organizations.

As the impacts of foreign currency translation are an important factor in understanding period-to-period comparisons, the Company believes the presentation of results on a local currency basis, as a supplement to reported results, helps improve readers' ability to understand the Company's operating results and evaluate performance in comparison with prior periods. The Company presents local currency information that compares results between periods as if current period exchange rates had been the exchange rates in the prior period. The Company uses results on a local currency basis as one measure to evaluate performance. The Company generally refers to such amounts as calculated on a "local currency" basis, or "excluding the impact of foreign currency." These results should be considered in addition to, not as a substitute for, results reported in accordance with generally accepted accounting principles in the United States ("GAAP"). Results on a local currency basis may not be comparable to similarly titled measures used by other companies.

pp percentage points

Sales decreased 12 percent in the first quarter of 2015. Excluding the impact of changes in foreign currency exchange rates, sales increased 3 percent. The Company defines established market economies as those in Western Europe (including Scandinavia), Australia, Canada, Japan, New Zealand, and the United States. All other countries are classified as having emerging market economies. The Company's businesses operating in emerging market economies achieved strong growth in the quarter with an 8 percent sales increase in local currency. The Company's units that operate in established economy markets, as a group, had a 6 percent sales decrease in local currency compared with 2014.

Operating income and net income decreased in the first quarter of 2015, primarily due to the translation impact of changes in foreign currency exchange rates, including currency devaluations in Venezuela in the first quarters of 2015 and 2014. Excluding the impact of changes in foreign currency exchange rates, net income was down 16 percent, primarily reflecting a \$13.5 million impairment of the long-term fixed assets in Venezuela during the first quarter of 2015. Also, contributing to the local currency decrease in net income was a decrease in segment profit in Europe. These were partially offset by increased segment profit in South America, primarily in Brazil and from lower costs associated with the remeasurement of net monetary assets and inventory being sold at cost determined at historical exchange rates in Venezuela from the devaluation of the Venezuelan bolivar.

The Company's net working capital position increased by \$6.7 million, compared with the end of 2014, reflecting a decrease in accounts payable and accrued liabilities due to the timing of payments around year-end, partially offset by the net impact of changes in foreign currency exchange rates on the Company's working capital.

Net cash used in operating activities for the first quarters of 2015 and 2014 were \$11.8 million and \$18.3 million, respectively. The favorable comparison was primarily due to efficient management of the Company's working capital, including a smaller increase in accounts receivable in light of higher sales at the end of 2014 than the end of 2013, and cash flows from the Company's hedging program.

Table of Contents

Net Sales

Reported sales decreased 12 percent in the first quarter of 2015. Excluding the impact of changes in foreign currency exchange rates, sales increased 3 percent. The increase in local currency sales was mainly in units in emerging market economies.

The Company's emerging market units accounted for 66 percent and 64 percent of the Company's reported sales for the first quarters of 2015 and 2014, respectively. Sales in these markets decreased \$37.5 million, or 9 percent, which included a negative \$67.6 million impact from weaker foreign currency exchange rates. The strong increase in local currency sales in the Company's emerging market units was primarily due to a significant increase in sales force size and productivity in Brazil and significant growth in the number of outlets in China. Also contributing to the increase were the businesses in the Middle East and North Africa, due to a larger and more active sales force, and in Argentina, reflecting inflation related price increases. The sales growth in these units was partially offset by a decrease in Indonesia from a less active sales force. The average impact of higher prices in the emerging market units was 6 percent.

Sales in the established market units decreased \$43.9 million, or 18 percent, which included a negative \$32.1 million impact from changes in foreign currency exchange rates. Among these units, the most significant local currency decreases were in France and Germany due to less active sales forces and Italy, reflecting a less active sales force with lower productivity, as well as the loss of sales in light of the decision to cease operating the Armand Dupree business in the United States in the second quarter of 2014. The average price increase in the established market units was 2 percent.

A more detailed discussion of the sales results by reporting segment is included in the segment results section below. As discussed in Note 3 to the Consolidated Financial Statements, the Company includes promotional costs in delivery, sales and administrative expense (DS&A). As a result, the Company's net sales may not be comparable with other companies that treat these costs as a reduction of revenue.

Gross Margin

Gross margin as a percentage of sales was 67.1 percent and 66.6 percent in the first quarters of 2015 and 2014, respectively. The increase of 0.5 percentage points ("pp") primarily reflected the favorable translation impact of changes in foreign currency exchange rates, including the impact of the currency devaluation in Venezuela which had a lower than average gross margin in 2014 (0.3 pp), favorable product mix in light of changes in manufacturing costs and related price increases (0.2 pp), the benefit of not incurring the obsolescence charges in connection with the decision to cease operating the Armand Dupree business in the United States in 2014 (0.2 pp) and lower business-to-business transactions that carry lower than average margins (0.1 pp). These were partially offset by the impact of inventory in Venezuela being included in cost of goods sold in 2015 at its stronger, historical exchange rate rather than the rate used to translate its respective sales in the quarter (0.3 pp).

As discussed in Note 2 to the Consolidated Financial Statements, the Company includes costs related to the distribution of its products in DS&A. As a result, the Company's gross margin may not be comparable with other companies that include these costs in costs of products sold.

Costs and Expenses

DS&A as a percentage of sales was 53.9 percent in the first quarter of 2015, compared with 51.9 percent in 2014. This increase primarily reflected the translation effect of changes in foreign currency exchange rates, particularly the impact of overall dollar costs as a ratio of sales in light of weaker foreign exchange rates (1.7 pp) and higher warehousing in Brazil to support volume growth (0.4 pp).

Specific segment impacts are discussed in the segment results section.

Table of Contents

Re-engineering Costs

Refer to Note 7 to the Consolidated Financial Statements for a discussion of re-engineering activities and related accruals.

The Company recorded \$2.7 million and \$2.3 million in re-engineering charges during the first quarters of 2015 and 2014, respectively. In both years, these charges were primarily related to severance costs incurred for headcount reductions in several of the Company's operations in connection with changes in its management and organizational structures, and in 2014, the decision to cease operating the Armand Dupree business in the United States. For the remainder of 2015, the Company expects to incur approximately \$8 million of such costs, mainly related to additional headcount reductions.

Fixed Asset Impairment

In February 2015, the Venezuelan government launched an overhaul of its foreign currency exchange structure, eliminating the SICAD 2 mechanism that the Company had referenced for translating and measuring its financial statements, replacing it with a new exchange mechanism called Simadi. As of the end of the first quarter of 2015, Simadi published a rate that was approximately 75 percent lower than the final SICAD 2 rate, and will lead to an incremental negative impact on future revenues and profits. As a result, the Company deemed this change to be a triggering event to evaluate the \$15.7 million of long-term fixed assets in Venezuelan, which had continued to be included on the balance sheet at the historical rates in effect when the assets were purchased. This evaluation involved performing an undiscounted cash flow analysis to determine if the carrying value of the assets were recoverable and greater than fair value. The Company considered many economic and operating factors, including uncertainty surrounding the interpretation and enforcement of certain product pricing restrictions in Venezuela, the inability to obtain the necessary raw materials locally to meet production demands and the significant decline in the global price of oil. Due to the decline of the global price of oil, the Venezuelan government has not made U.S. dollars widely available through any of the exchange mechanisms it has had in place. Given the devaluation of the Venezuelan bolivar compared to the U.S. dollar, and the lack of U.S. dollars available to use for the purchase of raw materials from on-going operations, the Company does not believe it will be able to operate the business profitably. As a result, the Company concluded that the carrying value of the long-term fixed assets in Venezuela were not recoverable. The Company then estimated the fair value of the long-term fixed assets using estimated selling prices available in Venezuela. The primary assets that were considered to continue to maintain a marketable value in Venezuela included commercial office space, a show room and parking spaces. As a result of this evaluation, the Company recorded an impairment charge of \$13.5 million to reduce the carrying value of its long-term fixed assets in Venezuela in the first quarter of 2015.

A more detailed description of the changes in the Venezuelan exchange mechanisms and the resulting impacts on the Company is provided below in the discussion of the South America segment.

Net Interest Expense

Net interest expense was \$12.8 million in the first quarter of 2015, compared with \$11.7 million in 2014. Interest expense increased in the year-over-year comparison primarily due to forward points related to the Company's cash flow hedges.

Tax Rate

The effective tax rates for the first quarter of 2015 was 28.4 percent, compared with 26.2 percent for the comparable 2014 period. The higher 2015 rate was due to higher 2015 first quarter losses incurred related to the devaluation of the Venezuelan bolivar for which no tax benefit can be recognized. The effective tax rates are below the U.S. statutory rate primarily due to lower foreign effective tax rates.

As discussed in Note 13 to the Consolidated Financial Statements, the Company's uncertain tax positions increase the potential for volatility in its tax rate. As such, it is reasonably possible that the effective tax rates in any individual quarter will vary from the full year expectation. At this time, the Company is unable to estimate what impact that may have on any individual quarter.

Table of Contents

Net Income

Net income in the first quarter of 2015 decreased \$22.7 million compared with 2014. Compared with 2014, net income was negatively impacted by \$17.1 million in translation impact from changes in foreign currency exchange rates, including currency devaluations in Venezuela in 2014 and the first quarter of 2015. Excluding the impact of changes in foreign currency exchange rates, net income decreased 16 percent, primarily reflecting a \$13.5 million impairment of the long-term fixed assets in Venezuela during the first quarter of 2015 and the lost contribution margin on lower sales in Europe, as well as the higher interest expense related to forward points. These impacts were partially offset by a local currency increase in segment profit in South America, primarily reflecting a significant increase in sales force size and productivity in Brazil, and \$4.1 million in lower costs associated with net monetary assets and inventory in Venezuela due to the devaluation of the Venezuelan bolivar in the first quarter of 2015 compared with 2014. In addition, Tupperware North America had increased local currency segment profit, reflecting improved margins, while Beauty North America benefited from lower obsolescence charges in light of the decision to cease operating the Armand Dupree business in the first quarter of 2014.

International operations generated 92 percent of sales and 100 percent of net segment profit in each of the first quarters of 2015 and 2014.

The sale of beauty products generated 19 percent of sales in the first quarters of both 2015 and 2014.

pp percentage points

Reported sales decreased 20 percent compared with the first quarter of 2014. Excluding the impact of changes in foreign currency exchange rates, sales decreased 3 percent. The decreased sales primarily reflected a 7 percent decrease in volume, compared with the first quarter of 2014, which was partially offset by an average price increase of 4 percent.

Emerging markets accounted for \$63.0 million and \$67.4 million, or 37 and 32 percent, of the reported sales in the segment in the first quarters of 2015 and 2014, respectively. On a local currency basis, the emerging market units' sales increased by 9 percent, primarily reflecting a significant increase in the Middle East and North Africa due to a larger, more active sales force as a result of successful recruiting campaigns. In addition, Tupperware South Africa had a significant increase in sales due to the effective design of its promotional programs to increase sales force activity, along with higher qualification levels for awards, while Avroy Shlain, the Company's beauty business in South Africa, also increased sales due to strong recruiting efforts that increased the sales force size and consequently the volume of products sold.

The established market units' sales decreased by 9 percent on a local currency basis, reflecting a decrease in sales volume in Germany, due to poor activation of the sales force early in the quarter, France, as a result of terrorist attacks in January that led to party cancellations and lower sales force activity and recruiting, as well as in Italy due to lower sales force activity and productivity, in part, due to poor recruiting and the reaction of the sales force following an incremental promotional push period late in 2014. These decreases were partially offset by an increase in Portugal, reflecting successful promotional design to activate the sales force.

Table of Contents

Segment profit decreased \$11.0 million, or 27 percent, in the first quarter of 2015 versus 2014, and excluding the impact of foreign currency, was 14 percent lower. The decrease was primarily due to the lost contribution margin on lower sales, as well as overall less efficient promotional spending and increased distribution costs relative to sales. The euro, Russian ruble, South African rand and Turkish lira were the main currencies that impacted the year-over-year sales comparison, while the euro was the only currency that significantly impacted the profit comparison.

Asia Pacific

pp percentage points

Reported sales decreased 4 percent, compared with the first quarter of 2014. Excluding the impact of foreign currency exchange rates, sales increased 3 percent. The average price increase for the segment was 4 percent, partially offset by a decrease in volume.

Emerging markets accounted for \$161.1 million and \$163.7 million, or 84 and 82 percent, of the reported sales in the segment in the first quarters of 2015 and 2014, respectively. Compared with 2014, sales in emerging markets were negatively impacted by \$7.5 million from changes in foreign currency rates. Excluding the impact of changes in foreign currency rates, sales increased 3 percent in these units. The most significant contribution to the increase was in China, where the Company operates a retail outlet model through independent distributors. The increase primarily related to higher volume due to a positive response to new distributor and outlet incentive programs and promotional offerings, in conjunction with continued growth in the total number of outlets. This was partially offset by a decrease in Indonesia, reflecting a less active sales force in response to less attractive activity gift offerings and lower additions of new sellers.

Reported sales in the established markets decreased 13 percent compared with the first quarter of 2014, reflecting the \$4.7 million impact of changes in foreign currency exchange rates. Excluding the impact of changes in foreign currency exchange rates, sales were even with 2014.

Total segment profit decreased 5 percent compared with the first quarter of 2014. Excluding the impact of changes in foreign currency rates, segment profit increased 1 percent. The increase was mainly related to the return on the higher sales in China, partially offset by decreased profit in Indonesia due to the lost contribution margin on lower sales.

The Australian dollar, Indonesian rupiah, Japanese yen and Malaysian ringgit were the main currencies that led to the negative foreign currency impact on the year-over-year sales comparison, while only the Indonesian rupiah significantly impacted the profit comparison.

pp percentage points

Reported sales decreased 2 percent in the first quarter of 2015. Excluding the impact of foreign currency exchange rates, sales increased 4 percent. The increase was mainly in the United States and Canada due to a larger and more active sales force that increased the volume of products sold with solid promotional programs, including less promotional pricing, aimed at recruiting and activating new sales force members. Mexico also increased sales in its core business due to a larger sales force from strong recruiting, partially offset by not having the business-to-business sales that occurred in the first quarter of 2014. While the Company actively pursues business-to-business opportunities, sales from this channel are based on reaching agreements with business partners and their product needs, along with consideration of how the arrangements will be integrated with the Company's primary sales channel. Consequently, activity in one period is not necessarily indicative of future trends. The average price increase for the segment was 3 percent.

Segment profit decreased \$0.6 million in the first quarter of 2015. Excluding the impact of foreign currency exchange rates, profit increased by 6 percent, reflecting the higher sales and improved gross margin.

The Mexican peso was the main foreign currency that impacted the year-over-year comparison.

Beauty North America

(In millions)	13 weeks ended			Change excluding the impact of foreign exchange	Foreign exchange impact	Percent of total	
	Mar 28, 2015	Mar 29, 2014	Change			2015	2014
Net sales	\$62.9	\$73.5	(14)%	(7)%	\$(6.0)	11	11

Segment profit as percent of sales	(0.5)%	(1.0)%	0.5	pp na	na	na	na

na not applicable

pp percentage points

Reported sales for the segment decreased 14 percent in the first quarter of 2015. Excluding the impact of changes in foreign currency exchange rates, sales decreased 7 percent, primarily from the lost sales in connection with the decision in 2014 to cease operating the Armand Dupree business in the United States, and lower sales in BeautiControl due to a smaller and less productive sales force, in part, due to disruption from a new sales force compensation plan. Fuller Mexico also had a slight sales decrease, reflecting a smaller, less active sales force in light of high field manager turnover. The average price increase in this segment was 4 percent.

The segment loss was \$0.4 million lower in the first quarter of 2015, reflecting the benefit of not incurring an operating loss, including \$1.6 million related to inventory obsolescence, in connection with the decision to cease operating Armand Dupree in 2014, partially offset by lower profit in Fuller Mexico, due to increased bad debt expense and increased promotional spending focused on increasing sales force recruiting and activity.

Table of Contents

The Mexican peso was the main currency that impacted the year-over-year comparison.

Although Fuller Mexico had a decrease in sales and profit in the first quarter of 2015, its performance was not significantly different than under the assumptions used in the step 1 goodwill impairment evaluation performed as of the September 2014 assessment date. If the operating performance should continue to decline and fall significantly out of line with the assumptions used in the 2014 annual assessment, including changes in projected future revenue, profitability and cash flow; or a significant increase in interest rates or cost of capital, this would have a negative impact on the fair value of the reporting unit, which could result in an impairment to the Fuller Mexico goodwill.

South America

(In millions)	13 weeks ended			Change excluding the impact of foreign exchange	Foreign exchange impact	Percent of total	
	Mar 28, 2015	Mar 29, 2014	Change			2015	2014
Net sales	\$76.0	\$95.9	(21)%	37 %	\$(40.4)	13	15
Segment profit	3.2	3.4	(4)	—	(10.3)	4	4
Segment profit as percent of sales	4.2	% 3.5	% 0.7	pp na	na	na	na

na not applicable

pp percentage points

Reported sales for the segment decreased 21 percent in the first quarter of 2015, primarily reflecting the \$31.3 million translation impact on sales from the devaluation of the Venezuelan bolivar to U.S. dollar rate used in 2015 compared with 2014. Excluding the impact of changes in all foreign currency exchange rates, sales increased 37 percent. Of the 37 percent increase in sales in local currency, approximately one-third reflected the impact of higher prices in the segment. The remaining increase was the result of higher volume. The most significant increase was in Brazil, the largest unit in South America, primarily from higher volume of products sold along with increased prices. The volume improvement reflected a significant sales force size advantage and the launch of new, attractive products that energized the sales force and created demand from end consumers, while continuing to overcome service issues experienced in 2014 as a result of challenges in the supply chain that slowed fulfillment. Argentina's sales also increased significantly, primarily from higher prices in light of significant inflation.

Segment profit decreased 4 percent in the first quarter of 2015. This decrease included \$8.8 million incremental translation impact on segment profit from the devaluation of the Venezuelan bolivar to U.S. dollar rate used in 2015 compared with 2014. Excluding the impact of changes in foreign currency exchange rates, including Venezuela, segment profit increased \$10.1 million, primarily due to higher sales and an improved gross margin in Brazil, as well as lower charges in Venezuela in connection with the re-measurement of net monetary assets and the impact of selling inventory at a weaker exchange rate than at which it was produced, which was \$9.3 million in 2015 compared with \$13.4 million in 2014.

The Brazilian real and Venezuelan bolivar had the most significant negative impacts on the year-over-year sales and profit comparisons.

The bolivar to U.S. dollar exchange rates used in translating the Company's 2014 operating activity was 6.3 in the first quarter, 10.8 in the second quarter and 50.0 in the second half of 2014 and in January 2015. In February 2015, the Venezuelan government launched an overhaul of its foreign currency exchange structure for obtaining U.S. dollars, eliminating the SICAD 2 auction process and introducing the Simadi mechanism, whose rate was approximately 198.0 bolivars to the U.S. dollar as of May 1, 2015. The Company used 172.0 bolivars to the U.S. dollar to translate its February 2015 operating activity and 190.0 to translate its March 2015 operating activity and to remeasure the end of March balance sheet of Venezuela. The Company expects to use the Simadi rate to translate future operating activity. The impact of re-measuring the net monetary assets and recording in cost of sales inventory at the exchange rate when it was purchased or manufactured was \$9.3 million.

Table of Contents

In light of this new currency exchange mechanism, the Company is not able to predict, at this time, what rate will be available in the future for it to exchange Venezuelan bolivars into U.S. dollars as the rate is expected to fluctuate on a daily basis. If the exchange rate used by the Company to translate its Venezuelan results was at approximately 198 bolivars to the U.S. dollar throughout 2015, there will be translation impacts on the second, third and fourth quarter sales from the weaker rate compared with 2014 of \$22.4 million, \$4.0 million and \$3.7 million, respectively, and on segment profit of \$9.0 million, \$0.7 million and \$0.3 million, respectively.

As of the end of the first quarter of 2015, the Company had \$2 million in net monetary assets denominated in Venezuelan bolivars (measured at the Simadi rate), including \$2 million in cash and cash equivalents, which would be directly impacted by any changes in the exchange rate. Sales and segment profit in Venezuela, measured at the current Simadi rate, represent about half a percent of total Company sales and segment profit.

Financial Condition

Liquidity and Capital Resources: Net working capital increased by \$6.7 million in the first quarter of 2015, which primarily reflected a decrease in accounts payable, due to the timing of payments around year-end, as well as an increase in prepaid expenses and other assets. These were partially offset by a \$13.6 million impact due to weaker foreign currency exchange rates (other than in Venezuela) in relation to the U.S. dollar, as well as an increase in short-term borrowings (net of cash and cash equivalents) and the \$6.6 million impact on net monetary assets in Venezuela in connection with the first quarter 2015 currency devaluation.

The Company continues to carry debt in connection with the \$600 million in Senior Notes due in 2021. As of March 28, 2015, the Company had total borrowings of \$266.0 million outstanding under its Credit Agreement, including \$175.9 million denominated in euro.

Loans taken under the Credit Agreement bear interest under a formula that includes, at the Company's option, one of three different base rates, plus an applicable spread. As of March 28, 2015, the Credit Agreement dictated a spread of 150 basis points, which gave the Company a weighted average interest rate on LIBOR based borrowings of 1.52 percent under the Credit Agreement. The spread will increase to 175 basis points in the second quarter of 2015 based on the leverage as defined under the Credit Agreement as of and for the four quarters ended March 28, 2015.

The Company routinely increases its revolver borrowings under the Credit Agreement and uncommitted lines during each quarter to fund operating, investing and financing activities and uses cash available at the end of each quarter to reduce borrowing levels. As a result, the Company incurs more interest expense and has higher foreign exchange exposure on the value of its cash during each quarter than would relate solely to the quarter end cash and debt balances.

The Credit Agreement contains customary covenants, including financial covenants requiring a minimum level of interest coverage and allowing a maximum amount of leverage. As of March 28, 2015, and currently, the Company had considerable cushion under its financial covenants. However, economic conditions, adverse changes in foreign exchange rates, lower than foreseen sales, profit and/or cash flow generation, share repurchases or the occurrence of other events discussed under "Forward Looking Statements" and elsewhere could cause noncompliance.

At March 28, 2015, the Company had \$652.6 million of unused lines of credit, including \$380.3 million under the committed, secured Credit Agreement, and \$272.3 million available under various uncommitted lines around the world. With the agreement of its lenders, the Company is permitted to increase its borrowing capacity by a total of up to \$200 million under the Credit Agreement, if necessary.

See Note 9 to the Consolidated Financial Statements for further details regarding the Company's debt.

The Company monitors the third-party depository institutions that hold its cash and cash equivalents and diversifies its cash and cash equivalents among counterparties, which minimizes exposure to any one of these entities. Furthermore, the Company is exposed to financial market risk resulting from changes in interest rates, foreign currency rates and the possible liquidity and credit risks of its counterparties. The Company believes that it has sufficient liquidity to fund its working capital and capital spending needs and its current dividend. This liquidity includes its cash and cash equivalents, which totaled \$83.9 million as of March 28, 2015, cash flows from operating activities, and access to its Credit Agreement, as well as access to other various uncommitted lines of credit around the world. The Company has not experienced any limitations on its ability to access its committed facility.

Table of Contents

Cash and cash equivalents (“cash”) totaled \$83.9 million as of March 28, 2015. Of this amount, \$81.8 million was held by foreign subsidiaries. Approximately 43 percent of the cash held outside of the United States was not eligible for repatriation due to the level of past statutory earnings by the foreign unit in which the cash was held or other local restrictions. The remaining cash is subject to repatriation tax effects. The Company's current intent is to indefinitely reinvest these funds in its foreign units, as the cash is needed to fund on-going operations. In the event circumstances change, leading to the conclusion that these funds will not be indefinitely reinvested, the Company would need to provide at that time for the income taxes that would be triggered upon their repatriation.

The Company's most significant exposures are to the euro, the Indonesian rupiah and the Mexican peso, as well as the Brazilian real, Chinese renminbi and Malaysian ringgit. Business units in which the Company generated at least \$100 million of sales in 2014 included Brazil, China, France, Germany, Indonesia, Malaysia/Singapore, Fuller Mexico, Tupperware Mexico and Tupperware United States and Canada. Of these units, sales by Brazil, Indonesia and Fuller Mexico exceeded \$200 million. Downturns in the Company's business in these units, including but not limited to, difficulties in the recruitment, retention and activity of the Company's independent sales force or the success of new products and/or promotional programs, adversely impacts the Company's ability to generate operating cash flows.

Operating Activities: Net cash used in operating activities for the periods ended March 28, 2015 and March 29, 2014 was \$11.8 million and \$18.3 million, respectively. The favorable comparison primarily reflected efficient management of working capital, including a smaller increase in accounts receivable in light of higher sales at the end of 2014 than the end of 2013, lower income tax payments and cash flows from the Company's hedging program. These benefits were partially offset by a larger reduction in accounts payable and accrued liabilities, reflecting payments around year end 2014 versus 2013, as well as a decrease in cash elements of net income as the result of weaker foreign currency exchange rates in relation to the U.S. dollar.

Investing Activities: During the first quarters of 2015 and 2014, the Company had \$13.9 million and \$14.4 million, respectively, of capital expenditures. In both 2015 and 2014, the most significant capital expenditures were related to molds. In 2015 and 2014, capital expenditures included \$2.6 million and \$2.1 million, respectively, related to increasing supply chain capabilities to support operations. In 2015, capital expenditures included \$3.0 million related to global software upgrades to support operations. Partially offsetting the capital spending in 2015 and 2014 were proceeds from the sale of long-term assets of \$2.1 million and \$4.2 million, respectively, primarily reflecting contract closings under the Company's program to sell land near its Orlando, Florida headquarters.

Financing Activities: Dividends paid to shareholders were \$35.7 million and \$32.6 million in the first quarters of 2015 and 2014, respectively. The higher 2015 amount was due to the increase in the dividends paid from \$0.62 per share to \$0.68 per share in the first quarters of 2014 and 2015, respectively, partially offset by a reduction in the number of shares outstanding in connection with the Company's share repurchase program. Proceeds received from the exercise of stock options were \$3.1 million and \$4.8 million in the first quarters of 2015 and 2014, respectively. The Company also increased revolver borrowings through its Credit Agreement by \$71.7 million for the funding of operating activities, investing activities and dividends.

Open market share repurchases by the Company are permitted under an authorization that runs until February 1, 2017 and allows up to \$2.0 billion to be spent. Under this program, the Company repurchased 0.1 million shares for \$10.0 million in the first quarter of 2014. There were no share repurchases under this program during the first quarter of 2015. Program-to-date beginning in 2007 and through the end of March 2015, the Company had spent \$1.29 billion to repurchase 21.3 million shares. Going forward, in setting share repurchase amounts, the Company expects to target over time a debt-to-EBITDA ratio of 1.75 times (as defined in the Company's Credit Agreement). Based on the Company's current debt level, its expected disbursements for dividends in the remainder of 2015, and its projected 2015 cash flow and EBITDA that have been negatively impacted versus 2014 by strengthening of the U.S. dollar, the Company does not currently plan to make open market share repurchases in 2015.

Repurchases under the Company's stock incentive programs are made when employees use shares to satisfy the minimum statutorily required withholding taxes. In the first quarters of 2015 and 2014, 11,890 and 86,872 shares were retained to fund withholding taxes, totaling \$0.9 million and \$6.9 million, respectively.

New Pronouncements

Refer to Note 18 to the Consolidated Financial Statements for a discussion of new pronouncements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

One of the Company's market risks is its exposure to the impact of interest rate changes on its borrowings. The Company has elected to manage this risk through the maturity structure of its borrowings and the currencies in which it borrows.

Loans taken under the Credit Agreement are of a short duration and bear interest under a formula that includes, at the Company's option, one of three different base rates, plus an applicable spread. The Company generally selects the London interbank offered rate ("LIBOR"). As of March 28, 2015, the Credit Agreement dictated a spread of 150 basis points, which gave the Company a weighted average interest rate on its U.S. dollar and euro denominated LIBOR based borrowings under the Credit Agreement of 1.52 percent.

As of March 28, 2015, the Company had total borrowings of \$266.0 million outstanding under its Credit Agreement, with \$175.9 million denominated in euro. If short-term interest rates varied by 10 percent, which in the Company's case would mean short duration U.S. dollar and euro LIBOR, with all other variables remaining constant, the Company's annual interest expense would not be significantly impacted.

The Company routinely increases its revolver borrowings under the Credit Agreement and uncommitted lines during each quarter to fund operating, investing and financing activities and uses cash available at the end of each quarter to reduce borrowing levels. As a result, the Company incurs more interest expense and has higher foreign exchange exposure on the value of its cash during each quarter than would relate solely to the quarter end cash and debt balances.

A significant portion of the Company's sales and profit come from its international operations. Although these operations are geographically dispersed, which partially mitigates the risks associated with operating in particular countries, the Company is subject to the usual risks associated with international operations. These risks include local political and economic environments and relations between foreign and U.S. governments.

Another economic risk of the Company is exposure to changes in foreign currency exchange rates on the earnings, cash flows and financial position of its international operations. The Company is not able to project, in any meaningful way, the effect of these possible fluctuations on translated amounts or future earnings. This is due to the Company's constantly changing exposure to various currencies, the fact that all foreign currencies do not react in the same manner in relation to the U.S. dollar and the large number of currencies involved, although the Company's most significant income and cash flow exposures are to the euro, Indonesian rupiah and Mexican peso, with meaningful exposures as well to the Brazilian real, Chinese renminbi and Malaysian ringgit.

Although this currency risk is partially mitigated by the natural hedge arising from the Company's local product sourcing in many markets, a strengthening U.S. dollar generally has a negative impact on the Company. In response to this fact, the Company uses financial instruments, such as forward contracts, to hedge its exposure to certain foreign exchange risks associated with a portion of its investment in international operations. In addition to hedging against the balance sheet impact of changes in exchange rates, the hedge of investments in international operations also has the effect of hedging a portion of cash flows from those operations. The Company also hedges, with these instruments, certain other exposures to various currencies arising from amounts payable and receivable, non-permanent intercompany transactions and a portion of purchases forecasted in up to the following 15 months. The Company does not seek to hedge the impact of currency fluctuations on the translated value of the sales, profit or cash flow generated by its operations.

While the Company's hedges of its equity in its foreign subsidiaries and its fair value hedges of balance sheet risks all work together to mitigate its exposure to foreign exchange gains or losses, they result in an impact to operating cash flows as they are settled. For the first quarters ended March 28, 2015 and March 29, 2014, the cash flow impact of these currency hedges was an inflow of \$3.6 million and an outflow of \$4.7 million, respectively.

Table of Contents

The U.S. dollar equivalent of the Company's most significant net open foreign currency hedge positions as of March 28, 2015 were to buy U.S. dollars \$45.8 million and euro \$29.3 million. In agreements to sell foreign currencies in exchange for U.S. dollars, for example, an appreciating dollar versus the opposing currency would generate a cash inflow for the Company at settlement, with the opposite result in agreements to buy foreign currencies for U.S. dollars. The notional amounts change based upon changes in the Company's outstanding currency exposures. Based on rates existing as of March 28, 2015, the Company was in a net payable position of approximately \$5.8 million related to its currency hedges, which upon settlement, could have a significant impact on the Company's cash flow. The Company records the impact of forward points in net interest expense.

A precise calculation of the impact of currency fluctuations is not practical since some of the contracts are between non-U.S. dollar currencies. The Company continuously monitors its foreign currency exposure and expects to enter into additional contracts to hedge exposure in the future. See further discussion regarding the Company's hedging activities for foreign currency in Note 10 to the Consolidated Financial Statements.

The Company is subject to credit risks relating to the ability of counterparties of hedging transactions to meet their contractual payment obligations. The risks related to creditworthiness and nonperformance have been considered in the determination of fair value for the Company's foreign currency forward exchange contracts. The Company continues to closely monitor its counterparties and will take action, as appropriate and possible, to further manage its counterparty credit risk.

The Company is also exposed to rising material prices in its manufacturing operations and, in particular, the cost of oil and natural gas-based resins, including the fact that in some cases resin prices are actually in, or are based on, currencies other than that of the unit buying the resin, which introduces a currency exposure that is incremental to the exposure to changing market prices. This is the primary material used in production of most Tupperware® products, and the Company estimates that 2015 cost of sales will include approximately \$160 million for the cost of resin in the Tupperware® brand products it produces and has contract manufactured. The Company uses many different kinds of resins in its products. About three-fourths of its resins are "polyolefins" (simple chemical structure, easily refined from oil), and as such, the price of these is strongly affected by the underlying price of oil and natural gas. The remaining one-fourth of its resins is more highly engineered, where the price of oil and natural gas plays a less direct role in determining price. With a comparable product mix and exchange rates, a 10 percent fluctuation in the cost of resin would impact the Company's annual cost of sales by approximately \$16 million compared with the prior year. For the first quarter of 2015, the Company estimates its cost of sales of the Tupperware® products it produced and had contract manufactured was positively impacted by less than \$1 million in local currency due to resin cost changes, as compared with 2014. For full year 2015, the estimated impact of resin cost changes, on a local currency basis, on the Company's cost of sales of the Tupperware® products it produces and has contract manufactured is a benefit of \$6 million, as compared with 2014. In addition to the impact of the price of oil and natural gas, the price the Company pays for its resins is also impacted by the relative changes in supply and demand. The Company partially manages its risk associated with rising resin costs by utilizing a centralized procurement function that is able to take advantage of bulk discounts while maintaining multiple suppliers and also enters into short-term pricing arrangements. It also manages its margin through cash flow hedges in some cases when it purchases resin in currencies, or effectively in currencies, other than that of the purchasing unit and through the pricing of its products, with price increases on its product offerings generally in line with consumer inflation in each market, and its mix of sales through its promotional programs and discount offers. It may also, on occasion, make advance material purchases to take advantage of current favorable pricing. At this point in time, the Company has determined that entering into forward contracts for resin is not practical or cost beneficial and has no such contracts in place. However, should circumstances warrant, the Company may consider such contracts in the future.

The Company has a program to sell land held for development around its Orlando, Florida headquarters ("Orlando Land"). This program is exposed to the risks inherent in the real estate development process. Included among these risks is the ability to obtain all government approvals, the success of attracting tenants for commercial or residential developments in the Orlando real estate market or obtaining financing and general economic conditions, such as interest rate increases. In recent years, the Company's land sale program has been negatively impacted by the drivers and ramifications of the credit crisis that began in 2008 and real estate market conditions in the United States.

Although market conditions have improved, the Company cannot predict when the program will be completed.

Forward-Looking Statements

Certain written and oral statements made or incorporated by reference from time to time by the Company or its representatives in this report, other reports, filings with the Securities and Exchange Commission, press releases, conferences or otherwise are “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Statements in this report or elsewhere that are not based on historical facts or information are forward-looking statements. Such forward-looking statements involve risks and uncertainties which may cause actual results to differ materially from those projected in forward-looking statements. Such risks and uncertainties include, among others, the following:

- successful recruitment, retention and productivity levels of the Company's independent sales forces;
- disruptions caused by the introduction of new or revised distributor operating models or sales force compensation systems or allegations by equity analysts or others as to the legality or viability of the Company's business model;
- success of new products and promotional programs;
- the ability to implement appropriate product mix and pricing strategies;
- governmental regulation of materials used in products coming into contact with food (e.g. polycarbonate), as well as beauty, personal care and nutritional products;
- the ability to procure and pay for at reasonable economic cost, sufficient raw materials and/or finished goods to meet current and future consumer demands at reasonable suggested retail pricing levels in certain markets, particularly Argentina, Ecuador, Egypt and Venezuela due to government regulations and restrictions;
- the impact of changes in consumer spending patterns and preferences, particularly given the global nature of the Company's business;
- the value of long-term assets, particularly goodwill and indefinite and definite lived intangibles associated with acquisitions, and the realizability of the value of recognized tax assets;
- changes in plastic resin prices, other raw materials and packaging components, the cost of converting such items into finished goods and procured finished products and the cost of delivering products to customers;
- the introduction of Company operations in new markets outside the United States;
- general social, economic and political conditions in markets, such as in Argentina, Ecuador, Egypt, Russia, Turkey, Ukraine and Venezuela and other countries impacted by such events;
- issues arising out of the sovereign debt in the countries in which the Company operates, such as in Argentina and the Euro zone, resulting in potential economic and operational challenges for the Company's supply chains, heightened counterparty credit risk due to adverse effects on customers and suppliers, exchange controls and translation risks due to potential impairments of investments in affected markets and the potential for banks with which the Company maintains lines of credit to be unable to fulfill their commitments;
- disruptions resulting from either internal or external labor strikes, work stoppages, or similar difficulties;
- changes in cash flow resulting from changes in operating results, including from changes in foreign exchange rates, working capital management, debt payments, share repurchases and hedge settlements;
- the impact of currency fluctuations on the value of the Company's operating results, assets, liabilities and commitments of foreign operations generally, and particularly in Venezuela, including their cash balances, the results of those operations, the cost of sourcing products across geographies and the success of foreign hedging and risk management strategies;
- the impact of natural disasters, terrorist activities and epidemic or pandemic disease outbreaks;

Table of Contents

the ability to repatriate, or otherwise make available, cash in the United States and to do so at a favorable foreign exchange rate and with favorable tax ramifications;

the ability to obtain all government approvals on, and to control the cost of infrastructure obligations associated with, property, plant and equipment;

the ability to timely and effectively implement, transition, maintain and protect necessary information technology systems and infrastructure;

the ability to attract and retain certain executive officers and key management personnel;

the success of land buyers in attracting tenants for commercial and residential development and obtaining financing;

the costs and covenant restrictions associated with the Company's credit arrangements;

integration of non-traditional product lines into Company operations;

the effect of legal, regulatory and tax proceedings, as well as restrictions imposed on the Company's operations or Company representatives by foreign governments, including exposure to tax responsibilities imposed on the sales force and their potential impact on the sales force's value chain and resulting disruption to the business and actions taken by governments in Venezuela or elsewhere to set or restrict the freedom of the Company to set its own prices or its suggested retail prices for product sales by its sales force to end consumers;

the effect of competitive forces in the markets in which the Company operates, particularly related to sales of beauty, personal care and nutritional products, where there are a greater number of competitors;

the impact of counterfeit and knocked-off products in the markets in which the Company operates and the effect this can have on the confidence of the Company's sales force members;

the impact of changes in U.S. federal, state and foreign tax or other laws;

the Company's access to, and the costs of, financing; and

other risks discussed in Item 1A, Risk Factors, of the Company's 2014 Annual Report on Form 10-K, as well as the Company's Consolidated Financial Statements, Notes, other financial information appearing elsewhere in this report and the Company's other filings with the United States Securities and Exchange Commission.

Other than updating for changes in foreign currency exchange rates in its monthly website updates, the Company does not intend to update forward-looking information, except through its quarterly earnings releases, unless it expects diluted earnings per share for the current quarter, excluding items impacting comparability and changes versus its guidance of the impact of changes in foreign exchange rates, to be significantly below its previous guidance. Investors should also be aware that while the Company does, from time to time, communicate with securities analysts, it is against the Company's policy to disclose to them any material non-public information or other confidential commercial information. Accordingly, it should not be assumed that the Company agrees with any statement or report issued by any analyst irrespective of the content of the confirming financial forecasts or projections issued by others.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15(d)-15(e)) that are designed to ensure that information required to be disclosed in the Company's reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to the Company's management, including the Chief Executive Officer and the Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognized that controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives.

As of the end of the period covered by this report, management, under the supervision of the Company's Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the design and operation of the disclosure controls and procedures were effective.

Changes in Internal Controls

There have been no significant changes in the Company's internal control over financial reporting during the Company's first quarter that have materially affected or are reasonably likely to materially affect its internal control over financial reporting, as defined in Rule 13a-15(f) promulgated under the Securities Exchange Act of 1934.
