Item 8.01 Other Events

On December 8, 2015, Acorda Therapeutics, Inc. issued a press release announcing analyses from a study showing the effect of rescue medication for seizure clusters on both clinical outcomes and healthcare resource utilization. The study found there were more adverse outcomes and greater use of healthcare resources among those who did not always use a rescue medication to treat seizure clusters, compared to those who always used a rescue medication. Seizure clusters are defined as multiple, distinct seizures that occur over a 24-hour period. These analyses were presented at the 69th Annual Meeting of the American Epilepsy Society in Philadelphia, PA. A copy of the press release is attached as Exhibit 99.1 to this Current Report on Form 8-K, and incorporated by reference into this Item.
