Form 10-K

R ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2007

or

£ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

Commission file number 001-15751

eMAGIN CORPORATION
(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

56-1764501
(I.R.S. Employer
Identification No.)

10500 NE 8th Street, Suite 1400, Bellevue, Washington 98004
(Address of principal executive offices)

(425) 749-3600
(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act: None

Securities registered pursuant to Section 12(g) of the Act: Common Stock, \$.001 Par Value Per Share

Indicate by check mark whether the registrant is a well-known seasoned issuer as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Edgar Filing: EMAGIN CORP - Form 10-K

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of “accelerated filer and large accelerated filer” in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined by Rule 12b-2 of the Exchange Act) Yes No

As of June 30, 2007, the aggregate market value of the issued and outstanding common stock held by non-affiliates of the registrant, based upon the closing price of the common stock as quoted on the National Association of Securities Dealers Inc. OTC Bulletin Board of \$0.66 was approximately \$5.1 million. For purposes of the above statement only, all directors, executive officers and 10% shareholders are assumed to be affiliates. This determination of affiliate status is not necessarily a conclusive determination for any other purpose.

Number of shares of common stock outstanding as of March 14, 2008 was 12,620,900.

DOCUMENTS INCORPORATED BY REFERENCE – None

STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

In this annual report, references to "eMagin Corporation," "eMagin," "Virtual Vision," "the Company," "we," "us," and "our" refer to eMagin Corporation and its wholly owned subsidiary, Virtual Vision, Inc.

Except for the historical information contained herein, some of the statements in this Report contain forward-looking statements that involve risks and uncertainties. These statements are found in the sections entitled "Business," "Management's Discussion and Analysis of Financial Condition and Results of Operation," and "Risk Factors." They include statements concerning: our business strategy; expectations of market and customer response; liquidity and capital expenditures; future sources of revenues; expansion of our proposed product line; and trends in industry activity generally. In some cases, you can identify forward-looking statements by words such as "may," "will," "should," "expect," "plan," "could," "anticipate," "intend," "believe," "estimate," "predict," "potential," "goal," or "continue" or similar terminology. These statements are only predictions and involve known and unknown risks, uncertainties and other factors, including, but not limited to, the risks outlined under "Risk Factors," that may cause our or our industry's actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by such forward-looking statements. For example, assumptions that could cause actual results to vary materially from future results include, but are not limited to: our ability to successfully develop and market our products to customers; our ability to generate customer demand for our products in our target markets; the development of our target markets and market opportunities; our ability to manufacture suitable products at competitive cost; market pricing for our products and for competing products; the extent of increasing competition; technological developments in our target markets and the development of alternate, competing technologies in them; and sales of shares by existing shareholders. Although we believe that the expectations reflected in the forward looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. Unless we are required to do so under federal securities laws or other applicable laws, we do not intend to update or revise any forward-looking statements.

PART I

ITEM 1. BUSINESS

Introduction

eMagin Corporation designs, develops, manufactures, and markets virtual imaging products which utilize OLEDs, or organic light emitting diodes, OLED-on-silicon microdisplays and related information technology solutions. We integrate OLED technology with silicon chips to produce high-resolution microdisplays smaller than one-inch diagonally which, when viewed through a magnifier, create virtual images that appear comparable in size to that of a computer monitor or a large-screen television. Our products enable our original equipment manufacturer, or OEM, customers to develop and market improved or new electronic products. We believe that virtual imaging will become an important way for increasingly mobile people to have quick access to high resolution data, work, and experience new more immersive forms of communications and entertainment.

Our first commercial product, the SVGA+ (Super Video Graphics Array of 800x600 picture elements plus 52 added columns of data) OLED microdisplay was initially offered for sampling in 2001, and our first SVGA-3D (Super Video Graphics Array plus built-in stereovision capability) OLED microdisplay was shipped in early 2002. These products have received award recognition including: SID Display of the Year and Electronic Products Magazine Product of the Year. These products are being applied or considered for near-eye and headset applications in products such as entertainment and gaming headsets, handheld Internet and telecommunication appliances, viewfinders, and wearable computers to be manufactured by OEM customers for military, medical, industrial, and consumer applications. We market our products globally.

In 2006 we introduced our OLED-XL technology, which provides longer luminance half life and enhanced efficiency of eMagin's SVGA+ and SVGA-3D product lines. We are in the process of completing development of 2 additional OLED microdisplays, namely the SVGA 3DS (SVGA 3D shrink, a smaller format SVGA display with a new cell architecture with embedded features) and an SXGA (1280 x 1024 picture elements).

In January 2005 we announced the world's first personal display system to combine OLED technology with head-tracking and 3D stereovision, the Z800 3DVisor(tm), which was first shipped in mid-2005. This product was recognized as a Digital Living Class of 2005 Innovators, and received the Consumer Electronics Association's coveted Consumer Electronics Show (CES) 2006 Best of Innovation Awards for the entire display category as well as a Design and Innovations Award for the electronic gaming category. In February 2007 the Z800 3DVisor, as integrated in Chatten Associates' head-aimed remote viewer, was recognized as one of Advanced Imaging's Solutions of the Year.

We believe that our OLED-on-silicon microdisplays offer a number of advantages over current liquid crystal microdisplays, including greatly increased system level power efficiency, less weight and wider viewing angles. Using our active matrix OLED technology, many computer and video electronic system functions can be built directly into the OLED-on-silicon microdisplay, resulting in compact systems with expected lower overall system costs relative to alternative microdisplay technologies. We have developed our own technology to create high performance OLED-on-silicon microdisplays and related optical systems and we have licensed certain fundamental OLED and display technology from Eastman Kodak.

As the first to exploit OLED technology for microdisplays, and with the support of our partners and the development of our intellectual property, we believe that we enjoy a significant advantage in the commercialization of this display technology for virtual imaging. We believe we are the only company to sell full-color active matrix small molecule OLED-on-silicon microdisplays.

eMagin Corporation was created through the merger of Fashion Dynamics Corporation ("FDC"), which was organized on January 23, 1996 under the laws of the State of Nevada and FED Corporation ("FED"), a developer and manufacturer of optical systems and microdisplays for use in the electronics industry. FDC had no active business operations other than to acquire an interest in a business. On March 16, 2000, FDC acquired FED. Simultaneous with this merger, we changed our name to eMagin Corporation. Following the merger, the business conducted by eMagin is the business conducted by FED prior to the merger.

Our website is located at www.emagin.com and our e-commerce site is www.3dvisor.com. We make available on our website, free of charge, our annual report on Forms 10K, our proxy statement, our quarterly reports on Forms 10Q, our current reports on Form 8K, and all amendments to such reports filed under the Securities and Exchange Act, earnings press releases, and other business-related press releases. We also post on our website the charters of our Audit, Compensation, Governance and Nominating committees, our Codes of Ethics and any amendments of or waiver to those codes of ethics, and other corporate governance materials recommended by the Securities and Exchange Commission as they occur.

Industry Overview

A study by NanoMarkets (February 2007) predicts the overall OLED market will approach \$10.9 billion in 2010 and grow to \$15.5 billion by 2014. These markets include various sizes devices for a range of applications from cell phone size to viewfinder displays to televisions to lighting. Displays in general are sold as independent products (such as TV monitors) or as components of other systems (such as laptop computers). Our products target one segment of the display industry, the near-eye, personal display, which is viewed through a lens rather than directly, in comparison to desktop computer screens which are known as direct view displays. As an off-shoot of our work in microdisplays, we are also participating in government-funded development studies for OLED-based lighting.

Personal displays, that is, near-eye systems based on microdisplays and optics, include video headsets, camcorders, viewfinders and other portable devices. Microdisplays are typically of such high resolution that they can be practically viewed only with magnifying optics. Although microdisplays are typically physically smaller than a postage stamp, they can provide a magnified viewing area similar to that of a full-size computer screen. For example, when magnified through a lens, a high-resolution 0.6-inch diagonal display can appear comparable to a 19- to 21-inch computer screen at about 2 feet from the viewer or a 60-inch TV screen at about 6 feet. The wearable display market, according to DisplaySearch, is expected to grow to at least \$153 million in 2010. McLaughlin Consulting, in a report published December 2006, projects that, with effective marketing, the Personal Viewer market could reach nearly \$1 billion in 2010.

We believe that the most significant driver of the longer term near-eye virtual imaging microdisplay market is growing consumer demand for mobile access to larger volumes of information and entertainment in smaller packages. This desire for mobility has resulted in the development of near-eye microdisplay products in two general categories: (i) an established market for electronic viewers incorporated in products such as viewfinders for digital cameras and video cameras which may potentially also be developed as personal viewers for cell phones and (ii) an emerging market for headset-application platforms which include accessories for mobile devices such as notebook and sub-notebook computers, portable DVD systems, electronic games, and other entertainment, and wearable computers.

Until now, near-eye virtual imaging microdisplay technologies have not simultaneously met all of the requirements for high resolution, full color, low power consumption, brightness, lifetime, size and cost which are required for successful commercialization in OEM consumer products. We believe that our new OLED-on-silicon microdisplay product line meets these requirements better than alternative products and will help to enable virtual imaging to emerge as an important display industry segment.

Our Approach: OLED-on-Silicon Microdisplays and Optics

There are two basic classes of organic light emitting diode, or OLED, technology, dubbed single molecule or small molecule (monomer) and polymer. Our microdisplays are currently based upon active matrix molecular OLED technology, which we call OLED-on-silicon because we build the displays directly on silicon chips. Our OLED-on-silicon technology uniquely permits millions of individual low-voltage light sources to be built on low-cost, silicon computer chips to produce single color, white or full-color display arrays. OLED-on-silicon microdisplays offer a number of advantages over current liquid crystal microdisplays, including increased brightness, lower power requirements, less weight and wider viewing angles. Using our OLED technology, many computer and video electronic system functions can be built directly into the silicon chip, under the OLED film, resulting in very compact, integrated systems with lowered overall system costs relative to alternative technologies.

We have developed our own proprietary and patented technology to create high performance OLED-on-silicon microdisplays and related optical systems, and we license fundamental OLED technology from Eastman Kodak. (See "Intellectual Property" and "Strategic Relationships"). We expect that the integration of our OLED-on-silicon microdisplays into mobile electronic products will result in lower overall system costs to our OEM customers.

We believe that our OLED-on-silicon microdisplays will initiate a new generation of virtual imaging products that could have a profound impact on many industries. Headsets providing virtual screens surrounding the user in a sphere of data become a practical reality with our displays and a low cost head tracker. Because our microdisplays generate and emit light, they have a wider viewing angle than competing liquid crystal microdisplays, and because they have the same high brightness at all forward viewing angles, our microdisplays permit a large field-of-view and superior optical image.

The wider viewing angle of our display results in the following superior optical characteristics in comparison with LCDs and other near-eye display technologies:

- the user does not need to accurately position the head-wearable display to the eye;
- the image will change minimally with eye movement and appear more natural; and
- the display can be placed further from the eye and not cut off part of the image.

In addition, our OLED-on-silicon microdisplays offer faster response times and use much less power than competitive liquid crystal microdisplay systems. Our subsystem-level power consumption is so low that two SVGA, full color, full speed motion video computer displays can easily be run in stereovision off the power from a single USB port on a portable computer. Battery life is extended and weight is greatly reduced in systems using our products.

Our SVGA+ OLED microdisplay stores all the color and luminance value information at each of the more than 1.5 million picture elements, or pixels, between refresh cycles in the display array, eliminating the flicker or color breakup seen by most other high-resolution microdisplay technologies. Even power efficient frame rates as low as 30 Hz can usually be used effectively. Power consumption at the system level is expected to be the lowest of any full-color, full-video SVGA resolution range, large view microdisplay on the market. The OLED's ability to emit light at wide angles allows customers to create large field of view (approx. 40 degrees), wide image capture range images from very compact, low-cost, one-piece optical systems. The display contains the majority of the electronics required for connection to the RGB (red, green, blue signal) port of a portable computer imbedded in its silicon chip backplane, thereby eliminating many other components required by other display technologies such as digital-analog converters, application-specific integrated circuits (ASICs), light sources, multiple optical elements, and other components. We believe that these features will enable our new class of microdisplay to potentially be the most compact, highest image quality, and lowest cost solution for high resolution near-eye applications, once they are in full production.

We have also developed advanced lens technology which permits our OLED-on-silicon microdisplays to provide large field of view images that can be viewed for extended periods with reduced eye-fatigue. Molded plastic prism lenses have been developed to help our OEM customers obtain better quality, large area virtual images using our displays at relatively low cost in comparison to alternate approaches.

Our Products

Our first commercial microdisplay products are based on our "SVGA series" OLED microdisplays. We offer products utilizing both our proprietary "OLED" or "OLED-XL" technologies, applied to the same integrated circuit base. We offer our products to OEMs and other large volume buyers as both separate components, integrated bundles coupled with our own optics, or full systems. We also offer engineering support to enable customers to quickly integrate our products into their own product development programs.

(1) OLED Microdisplay Component Products

SVGA+ OLED Microdisplay (Super Video Graphics Array of 800x600 plus 52 added columns of data). Our 0.62 inch diagonal SVGA+ OLED microdisplays have a resolution of 852x600 triad pixels (1.53 million picture elements). The product was dubbed "SVGA+" because it has 52 more display columns than a standard SVGA display, permitting users to run either (1) standard SVGA (800 x 600 pixels) to interface to the analog output of many portable computers or (2) 852 x 480, using all the data available from a DVD player in a 16:9 wide screen entertainment format. The display also has an internal NTSC monochrome video decoder for low power night vision systems.

SVGA-3D OLED Microdisplay (Super Video Graphics Array plus built-in stereovision capability). Our 0.59 inch diagonal SVGA-3D OLED microdisplays have a resolution of 800x600 triad pixels (1.44 million picture elements). A built-in circuit provides compatibility with single channel frame sequential stereoscopic vision without additional external components.

Microdisplays Under Development. We are developing two additional display products, a smaller format (SVGA-3DS) version of our SVGA display, which will have 800 x 600 triad pixels and be 0.44 inch diagonal and an 0.77 inch SXGA OLED microdisplay with resolution of 1280x 1024 triad pixels. These new products offer both analog and digital signal inputs in a compact display with greater power efficiency. With the world's finest pitch (11.1 microns) and a high level of integrated functionality, the SVGA-3DS provides a simple path to system integration in a

small format. The SXGA split chip architecture offers unprecedented power consumption savings for this display format in addition to a highly flexible system interface configuration.

Lens and Design Reference Kits. We offer a WF05 prism optic, with mounting brackets or combined with OLED microdisplays to form an optic-display module. We provide Design Reference Kits, which include a microdisplay and associated electronics to help OEMs evaluate our microdisplay products and to assist their efforts to build and test new products incorporating our microdisplays.

Integrated Modules. We provide near-eye virtual imaging modules that incorporate our OLED-on-silicon microdisplays with our lenses and electronic interfaces for integration into OEM products. We have shipped customized modules to several customers, some of which have incorporated our products into their own commercial products.

(2) Personal Display Systems (Head-Wearable and Headset Systems)

Our Z800 3DVisors(tm) give users the ability to work with their hands while simultaneously viewing information or video on the display. The Z800 3DVisor enables more versatile portable computing, using a 0.59-inch diagonal microdisplay (SVGA-3D capable of delivering an image that appears comparable to that of a 19-inch monitor at 22 to 24 inches from the eye, or a 105 inch movie screen at 12 foot distance. Our systems are currently being used for personal entertainment, electronic gaming, and military training and simulation, among other applications. We believe that personal display systems will fill the increasing demand for instant data accessibility and privacy in mobile workplaces. We sell the personal display systems to OEM systems and equipment customers, through distributors, and through our e-commerce website, www.3dvisor.com.

Our Market Opportunity - Personal Display Systems Platforms, including Head-wearable Displays

The growth potential of our selected target market segments have been investigated using information gathered from key industry market research firms, including DisplaySearch, Frost and Sullivan, Fuji-Chimera, International Data Corporation, Nikkei, SEMI, Stanford Resources-iSuppli and others. Such data was obtained using published reports and data obtained at industry symposia. We have also relied substantially on market projections obtained privately from industry leaders, industry analysts, and current and potential customers.

The virtual-imaging markets we are targeting include industrial, medical, military, arcade games, 3-D CAD/Virtual Reality, and wearable computers. Within each of these market sectors, we believe that our microdisplays, when combined with compact optic lenses, will become a key component for a number of mobile electronic products. Applications we are targeting the following:

Head-wearable displays incorporate microdisplays mounted in or on eyeglasses, goggles, simple headbands, helmets, or hardhats, and are often referred to as head-mounted displays (HMDs) or headsets. Head-wearable displays may block out surroundings for a fully immersive experience, or be designed as "see-through" or "see-around" to the user's surroundings. They may contain one (monocular) or two (binocular) displays. Some of the increased current interest is due to accelerating the timetable to adapt such systems to military applications such as night vision and fire and rescue applications. These have military, commercial, and consumer applications.

Military

Military demand for head-wearable displays is currently being met with microdisplay technologies that we believe to be inferior to our OLED-on-silicon products. The new generation of soldiers will be highly mobile, and will often need to carry highly computerized communications and surveillance equipment. To enable interaction with the digital battlespace, rugged, yet lightweight and energy efficient technology is required. Currently available microdisplay technologies do not meet the requirements for low power, hands-free, day and night-viewable displays. As a COTS (commercial off the shelf) component, OLED microdisplays demonstrate performance characteristics important to military and other demanding commercial and industrial applications including high brightness and resolution, wide dimming range, wider temperature operating ranges, shock and vibration resistance and insensitivity to high G-forces. The image does not suffer from flicker or color breakup in vibrating environments, and the microdisplay's wide viewing angle allows ease of viewing for long periods of time. The OLED's very low power consumption reduces battery weight and increases allowed mission length. Properly implemented, we believe that head-mounted systems incorporating our microdisplays will increase effectiveness by allowing hands-free operation and increasing situational awareness with enough brightness to be used in daylight, yet controllable for nighttime light security. The OLED's inherent wide temperature range is especially of interest for military applications because the display can turn on instantly at temperatures far below freezing and can operate at very high temperatures in desert conditions.

Our OLED microdisplays have been selected for a range of defense-security applications, including a situational awareness HMD for the US Army Land Warrior programs, a handheld thermal imager for border patrol and training, and simulation virtual monitors for Quantum 3D. The Land Warrior, a baseline program in the Army's drive to digitize the battlefield, is an integrated digital system that incorporates computerized communication, navigation, targeting and protection systems for use by the twenty-first century infantry soldier. Rockwell Collins, the principal contractor for the US Army's Land Warrior HMD system, and eMagin applied their respective expertise in HMD and imaging technology to develop rugged, yet lightweight and energy efficient products meeting the requirements of tomorrow's soldier. Our display is also used in Rockwell Collins' commercially available ProView S035 Monocular HMD. Night Vision Equipment Corporation's HelmetIR-50(TM), a lightweight, military helmet mounted thermal imager, which provides hands-free operation and allows viewers to see through total darkness, battlefield obscurants, and even foliage, is the first OLED-equipped product to be listed on the US Government's GSA schedule. Virtually Better Inc. has incorporated our Z800 3DVisor into its "Virtual Iraq" treatment for post-traumatic stress disorders. In addition, our displays have been commercialized, or planned to be commercialized, by military systems integrators including DRS, Elbit, Insight Technologies, Nivisys, Qioptiq, Saab, Sagem, and Thales, , among others. We cannot assure that Government projects will remain on schedule, or that they will be fully implemented. Similar systems are of interest for other military applications as well as for related operations such as urban security, fire and rescue.

Commercial, Industrial, and Medical

We believe that a wide variety of commercial and industrial markets offer significant opportunities due to increasing demand for instant data accessibility in mobile workplaces. Some examples of microdisplay applications include: immediate access to inventory such as parts, tools and equipment availability; instant accessibility to maintenance or construction manuals; routine quality assurance inspection; endoscopic surgery; and real-time viewing of images and data for a variety of applications. As one potential example, a user wearing a HMD while using test equipment, such as oscilloscopes, can view technical data while simultaneously probing printed circuit boards. Commercial products in these sectors include Sage Technologies, Ltd.'s Helmet Vue (TM) Thermal Imaging System and Liteye's 500. VRmagic GmbH, a leading developer of virtual reality simulators, is using our OLED microdisplays in their EYESI(TM) Virtual Reality Surgical Simulator, which provides real-time simulation of ophthalmic surgery, high performance biomechanical tissue simulation, precision tracking, and realistic stereo imaging. Sensics has incorporated our OLED displays in their immersive SkyVizor (TM) virtual reality headset to serve as the "eyes" of the Robonaut, a humanoid robot being developed by NASA and Department of Defense agencies. The Robonaut system can work side by side with humans, or alone in high-risk situations. Telepresence uses virtual reality display technology to visually immerse the operator into the robot's workspace, facilitating operation and interaction with the Robonaut, and potentially reducing the number of dangerous space walks required of real astronauts. Another recent example is Saab Avitronics, which has chosen eMagin microdisplays for its new Multi-Purpose Virtual Image Display (VID) which comprises high-performance magnifying optics and the OLED, sealed in an aluminum casing.

Consumer

Once our displays are manufactured in high volumes at reduced costs, we believe that our head-wearable display products may enhance the following consumer products:

- Entertainment and gaming video headset systems, which permit individuals to view television, including HDTV, video CDs, DVDs and video games on virtual large screens or stereovision in private without disturbing others. We believe that these new headset game systems can provide a game or telepresence experience not otherwise practical using conventional direct view display technology. The advent of video iPods and the rapidly increasing amount of downloadable content have accelerated the movement toward portable video technology. At the same time, the desire for larger screen sizes while retaining the iPod portability has been referenced in many publications. Virtual imaging uniquely provides a large, high resolution view in a small portable package, and we believe that our OLED on silicon technology is a best fit to help open this market.
- Notebook computers, which can use head-wearable devices to reduce power requirements as well as expand the apparent screen size and increase privacy. Current notebook computers do not use microdisplays. Our products can apply not only to new models of notebook computers, but also as aftermarket attachments to older notebooks still in use. The display can be easily used as a second monitor on notebook computers for ease of editing multiple documents to provide multiple screens or for data privacy while traveling. It can also be used to provide larger screen capability for viewing spreadsheets or complex computer aided design (CAD) files. We expect to market our head-wearable displays to be used as plug-in peripherals to be compatible with most notebook computers. We believe that the SVGA-3D microdisplay is well suited for most portable PC headsets. Our microdisplays can be operated using the USB power source of most portable computers. This eliminates added power supplies, batteries, and rechargers and reduces system complexity and cost.
- Handheld personal computers, whose small, direct view screens are often limitations, but which are now capable of running software applications that would benefit from a larger display. Microdisplays can be built into handheld computers to display more information content on virtual screens without forfeiting portability or adding the cost a larger direct view screen. Microdisplays are not currently used in this market. We believe that GPS viewers and other novel products are likely to develop as our displays become more available.

The combination of power efficiency, high resolution, low systems cost, brightness and compact size offered by our OLED-on-silicon microdisplays has not been made available to makers and integrators of existing entertainment and gaming video headset systems, notebook computers and handheld computers. We believe that our microdisplays have the potential to propel the growth of new products and applications such as lightweight wearable computer systems.

Our Strategy

Our strategy is to establish and maintain a leadership position as a worldwide supplier of microdisplays and virtual imaging technology solutions for applications in high growth segments of the electronics industry by capitalizing on our leadership in both OLED-on-silicon technology and microdisplay lens technology. We aim to provide microdisplay and complimentary accessories to enable OEM customers to develop and manufacture new and enhanced electronic products. Some key elements of our strategy to achieve these objectives include the following:

- Leverage our superior technology to establish a leading market position. As the first to exploit OLED-on-silicon microdisplays, we believe that we enjoy a significant advantage in bringing this technology to market.

- Optimize manufacturing efficiencies by outsourcing while protecting proprietary processes. We outsource certain portions of microdisplay production, such as chip fabrication, to minimize both our costs and time to market. We intend to retain the OLED application and OLED sealing processes in-house. We believe that these areas are where we have a core competency and manufacturing expertise. We also believe that by keeping these processes under tight control we can better protect our proprietary technology and process know-how. This strategy will also enhance our ability to continue to optimize and customize processes and devices to meet customer needs. By performing the processes in-house we can continue to directly make improvements in the processes, which will improve device performance. We also retain the ability to customize certain aspects such as color balance, which is known as chromaticity, as well as specialized boards or interfaces, and to adjust other parameters at the customer's request. In the area of lenses and head-wearable displays, we intend to focus on design and development, while working with third parties for the manufacture and distribution of finished products. We intend to prototype new optical systems, provide customization of optical systems, and manufacture limited volumes, but we intend to outsource high volume manufacturing operations. There are numerous companies that provide these outsource services.
- Build and maintain strong internal design capabilities. As more circuitry is added to OLED-on-silicon devices, the cost of the end product using the display can be decreased; therefore integrated circuit design capability will become increasingly important to us. To meet these requirements, we utilize in-house design capabilities supplemented by outsourced design services. Building and maintaining this capacity will allow us to reduce engineering costs, accelerate the design process and enhance design accuracy to respond to our customers' needs as new markets develop. In addition, we intend to maintain a product design staff capable of rapidly developing prototype products for our customers and strategic partners. Contracting third party design support to meet demand and for specialized design skills will also remain a part of our overall long term strategy.

Our Strategic Relationships

Strategic relationships have been an important part of our research and development efforts to date and are an integral part of our plans for commercial product launch. We have forged strategic relationships with major OEMs and strategic suppliers. We believe that strategic relationships allow us to better determine the demands of the marketplace and, as a result, allow us to focus our future research and development activities to better meet our customer's requirements. Moreover, we expect to provide microdisplays and Microviewers(TM) to some of these partners, thereby taking advantage of established distribution channels for our products.

Eastman Kodak is a technology partner in OLED development, OLED materials, and a potential future customer for both specialty market display systems and consumer market microdisplays. We license Eastman Kodak's OLED and optics technology portfolio. We have a nonexclusive; perpetual, worldwide license to use Eastman Kodak patented OLED technology and associated intellectual property in the development, use, manufacture, import and sale of microdisplays. The license covers emissive active matrix microdisplays with a diagonal size of less than 2 inches for all OLED display technology previously developed by Kodak. An annual minimum royalty is paid at the beginning of each calendar year and is fully creditable against the royalties we are obligated to pay based on net sales throughout the year. Eastman Kodak and eMagin have engaged in numerous discussions regarding potential product applications for eMagin's microdisplays by Eastman Kodak.

We are working cooperatively with the US Army, US Navy, and with several military system integrators to further characterize operation of our displays in rugged military environments. We have a Cooperative Research and Development Agreement (CRADA) with the US Army Night Vision Electronic Sensors Directorate (NVESD) to characterize performance of our displays. We are currently partnering with the University of Michigan to develop advanced display process via a government-sponsored research program. We intend to continue to establish additional strategic relationships in the future.

We are a member of the United States Display Consortium (USDC), a cooperative effort between industry and government whose charter is to develop an infrastructure to support North American flat panel display manufacturing. It has more than 100 members, as well as support from the Department of Defense. The USDC's role is to provide a common platform for flat panel display manufacturers, developers, users and the manufacturing equipment and supplier base.

Our Technology Platforms

OLED-on-Silicon Technology

Scientists working at Eastman Kodak invented OLEDs in the early 1980s. OLEDs are thin films of stable organic materials that emit light of various colors when a voltage is impressed across them. OLEDs are emissive devices, which mean they create their own light, as opposed to liquid crystal displays, which require a separate light source. As a result, OLED devices use less power and can be capable of higher brightness and fuller color than liquid crystal microdisplays. Because the light they emit is Lambertian, which means that it appears equally bright from most forward directions, a moderate movement in the eye does not change the image brightness or color as it does in existing technologies. OLED films may be coated on computer chips, permitting millions of individual low-voltage light sources to be built on silicon integrated circuits to produce single color, white or full-color display arrays. Many computer and video electronic system functions can be built directly into a silicon integrated circuit as part of the OLED display, resulting in an ultra-compact system. We believe these features, together with the well-established silicon integrated circuit fabrication technology of the semiconductor industry, make our OLED-on-silicon microdisplays attractive for numerous applications.

We believe our technology licensing agreement with Eastman Kodak, coupled with our own intellectual property portfolio, gives us a leadership position in OLED and OLED-on-silicon microdisplay technology. Eastman Kodak provides OLED technology and we provide additional technology advancements that have enabled us to coat the silicon integrated circuits with OLEDs.

We have developed numerous and significant enhancements to OLED technology as well as key silicon circuit designs to effectively incorporate the OLED film on a silicon integrated circuit. For example, we have developed a unique, top-emitting structure for our OLED-on-silicon devices that enables OLED displays to be built on opaque silicon integrated circuits rather than only on glass. Our OLED devices can emit full visible spectrum light that can be isolated with color filters to create full color images. Our microdisplay prototypes have a brightness that can be greater than that of a typical notebook computer and can have a potential useful life of over 50,000 operating hours, in certain applications. New materials and device improvements in development offer future potential for even better performance for brightness, efficiency, and lifespan. Additionally, we have invested considerable work over several years to develop unique electronics control and drive designs for OLED-on-silicon microdisplays.

In addition to our OLED-on-silicon technology, we have developed compact optic and lens enhancements which, when coupled with the microdisplay, provide the high quality large screen appearance that we believe a large proportion of the marketplace demands.

Advantages of OLED Technology

We believe that our OLED-on-silicon technology provides significant advantages over existing solutions in our targeted microdisplay markets. We believe these key advantages will include:

- Low manufacturing cost;
- Low cost system solutions;
- Wide angle light emission resulting in large apparent screen size;
- Low power consumption for improved battery life and longer system life;
 - High brightness for improved viewing;
- High-speed performance resulting in clear video images;
 - Wide operating temperature range; and
- Good environmental stability (vibration and humidity).

Low manufacturing cost. Many OLED-on-silicon microdisplays can be built on an 8-inch silicon wafer using existing automated OLED and color filter processing tools. The level of automation used lowers labor costs. Only a minute amount of OLED material is used in each OLED-on-silicon microdisplay so that material costs, other than the integrated circuit itself, are small. The number of displays per silicon wafer may be higher on OLEDs than on liquid crystal displays, or LCDs, because OLEDs do not require a space-wasting perimeter seal band. Expensive transparent wafers with CMOS silicon laminated onto quartz are not required for OLED microdisplays, as standard CMOS chips may be used as backplanes.

Low cost systems solutions. In general, an OEM using OLED-on-silicon microdisplays will not need to purchase and incorporate lighting assemblies, color converter related Applications Specific Integrated Circuits, or ASICs, or beam splitter lenses as is the case in liquid crystal microdisplays, which also require illumination. Many important display-related system functions can be incorporated into an OLED-on-silicon microdisplay, reducing the size and cost of the system. Non-polarized light from OLEDs permit lenses for many OLED-on-silicon applications that are made of a single piece of molded plastic, which reduces size, weight and assembly cost when compared to the multipiece lens systems used for liquid crystal microdisplays. System cost relative to liquid crystal and liquid crystal on silicon, or LCOS, competitive products is thus reduced. Because our displays are power efficient, they typically require less power at the system level than other display technologies at a given display size and brightness.

Wide-angle light emission simplifies optics for large apparent screen size. OLEDs emit light at most forward directions from each pixel. This permits the display to be placed close to the lens in compact optical systems. It also provides the added benefit of less angular dependence on the image quality relative to pupil and eye position when showing a large field of view, unlike reflective LCOS microdisplays. This results in less eye fatigue and makes it relatively easy to low power consumption for improved battery life and longer system life. OLEDs emit light rather than transmitting it, so no power-consuming backlight or front light, as required for liquid crystal displays, is required. OLEDs can be energy efficient because of their high efficiency light generation. Furthermore, OLEDs conserve power by powering only those pixels that are on while liquid crystal on silicon requires light at all pixels all the time. Most optical systems used for our OLEDs are highly efficient, permitting over 80% of the light to reach the eye, whereas reflective technologies such as liquid crystal on silicon require multiple beam splitters to get light to the display, and then into the optical system. This results in typically less than 25% light throughput efficiency in reflective microdisplay systems. Most important, we do not need a power-hungry video frame buffer, as required in liquid crystal frame-sequential color systems. Battery life can therefore be extended.

High brightness for improved viewing. This feature can be of great value to military applications, where there is a need to see the computer image overlaid onto brightly lit real-life backgrounds such as desert sand, water reflections or sunlit clouds. The OLED can be operated over a large luminance range without loss of gray level control, permitting the displays to be used in a range of dark environments to very bright ambient applications. Since military simulation and situation awareness applications, including night vision, typically require large fields of view, the OLED's Lambertian optical characteristics make it an excellent choice.

High-speed performance resulting in clear video image. OLEDs switch much more rapidly than liquid crystals or most cathode ray tubes, or CRTs. This results in smear-free video rate imagery and provides improved image quality for DVD playback applications. This eliminates visible image smear and makes practicable three-dimensional stereo imaging using a split frame rate. This advantage of our OLED-on-silicon is very important for 3-D stereovision gaming applications.

Flicker-free and no color breakup. Because the OLED-on-silicon stores brightness and color information at each pixel, the display can be run with no noticeable flicker and no color sequential breakup, even at low refresh rates. A lower refresh rate not only helps reduce power, but it also facilitates system integration. Color sequential breakup occurs in systems such as liquid crystal on silicon and some liquid crystal display microdisplays when red, green and blue frames are sequentially imaged in time for the eye to combine. Since the different color screens occur at different times, movement of the eye due to vibration or just fast pupil movement can create color bands at each dark-light edge, making the image unpleasant to view and making text difficult to read. For example, the liquid crystal on silicon display needs to run at least three times the "normal" frame rate or speed to produce color sequential images, which wastes power and makes for a difficult technological challenge as display resolutions increase.

Wide operating temperature range. Our OLEDs offer much less temperature sensitivity at both high and low temperatures than LCDs. LCDs are sluggish or non-operative much below freezing unless heaters are added and lose contrast above 50 degrees Celsius, while our OLEDs turn on instantly and can operate between -55 degrees Celsius and 130 degrees Celsius. We specify a smaller temperature range on most consumer products to accommodate lower cost packaging. This is an important characteristic for many portable products that may be used outdoors in many varying environmental conditions. It is especially important for military customers. Insensitivity to vibration, shock, and pressure are also important environmental control attributes.

Complementary lens and system technologies. We have developed a wide range of technologies which complement our core OLED and lens technologies and which will enhance our competitive position in the microdisplay and head-wearable display markets. These include:

Lens technology. High quality, large view lenses with a wide range for eye positioning are essential for using our displays in near-eye systems. We have developed advanced lens technology for microdisplays and personal head-wearable display systems and hold key patents in these areas. Our lens technology permits our OLED-on-silicon microdisplays to provide large field of view images that can be viewed for extended periods with reduced eye-fatigue. We have engaged a firm to manufacture our lenses in order to provide them in larger quantities to our customers and are using them in our own personal display systems.

We believe that the key advantages of our lens technology include:

- Can be very low cost, with minimal assembly. A one piece, molded plastic optic attached to the microdisplay has been introduced and may potentially serve consumer end-product markets. Since our process is plastic molding, our per unit production costs are low;
- Allows a compact and lightweight lens system that can greatly magnify a microdisplay to produce a large field of view. For example, our WF05 prism lens, in combination with our SVGA OLED microdisplay, provides a virtual view equivalent to that of a 105-inch diagonal display viewed at 12 feet;

- Can use single-piece molded microdisplay lenses to permit high light throughput making the display image brighter or permitting the use of less power for an acceptable brightness;
- Can be designed to provide focusing to enable users with various eyesight qualities to view images clearly; and
- Can optionally provide focal plane adjustment for simultaneous focusing of computer images and real world objects. For example, this characteristic is beneficial for word processing or spreadsheet applications where a person is typing data in from reference material. This feature can make it easier for people with moderately poor accommodation to use a head-wearable display as a portable computer-viewing accessory.

Personal display system technology. We have developed ergonomic technologies that make head-wearable displays easier to use in a wide variety of applications. For example, the use of our patented rotatable Eyeblocker(TM) provides a sharp image without requiring most users to squint. The Eyeblocker can also be moved to create an effective see-through appearance. To our knowledge, we have made the lightest weight, high-resolution head-wearable display with an over 35 degree diagonal field of view ever publicly demonstrated. We have also incorporated low cost, small size, high speed headtrackers to further enhance game and telepresence applications.

Sales and Marketing

We primarily provide display components for OEMs to incorporate into their branded products and sell through their own well-established distribution channels. In addition, we market head-wearable displays directly to various vertical market channels, such as medical, industrial, and government customers. A typical buyer is a manufacturer of a product requiring a specific resolution of visual display or viewfinder for insertion into a product such as a portable DVD headset, a PC-gaming headset, or an instrument.

We market our services in North America, Asia, and Europe primarily through direct technical sales from our headquarters. Regular purchase orders are processed by our customer service coordinators and technical questions related to product purchases or product applications are processed by our technical support team. As a market-driven company, we assess customer needs both quantitatively and qualitatively, through market research and direct communications. Because our microdisplays are the main functional component that defines many of our customers' end products, we work closely with potential customers to define our products to optimize the final design, typically on a senior engineer-to-engineer basis. Our personal display systems are sold through select value-added resellers and on-line through PC Mall, Google Checkout, and our e-commerce site, www.3dvisor.com.

We identify companies with end products and applications for which we believe that our products will provide a system level solution and for which our products can be a key differentiator. We target both market leaders and select early adopter companies; their acceptance validates our technology and approach in the market. We believe successful marketing will require relationships with recognized consumer brand companies.

Near term sales efforts for OLED microdisplays have been focused on our military, industrial, and medical customers. We have received production orders and design wins for both the SVGA+ and SVGA 3D displays. To date, we have shipped products and evaluation kits to more than 200 OEM customers. An OEM design cycle typically requires between 6 and 36 months, depending on the uniqueness of the market and the complexity of the end product. New product development may require several design iterations prior to commercialization. Some of our initial customers have completed their initial evaluation cycle and we continue to receive follow-on orders and notification of product purchase decisions. (See "Our Market Opportunity: Military; Commercial, Industrial, and Medical; and Consumer")

Customers

Customers for our products include both large multinational and smaller OEMs. We maintain relationships with OEMs in a diverse range of industries encompassing the military, industrial, medical, and consumer market sectors. During 2007, 51% of our net revenue was to firms based in the United States and 49% was to international firms as compared to 59% domestic revenue and 41% international revenue during 2006. In 2007, we had 10 customers that accounted for more than 54% of our total revenue as compared to 5 customers that accounted for more than 68% of our total revenue in 2006. In 2007, we did not have any customers that accounted for more than 10% of our total revenue as compared to 2006, when we had one customer that accounted for 13% of our total revenues.

Backlog

As of March 14, 2008, we had a backlog of approximately \$7.3 million for purchases through December 31, 2008. This backlog consists of purchase orders and purchase agreements but does not include expected revenue from R&D contracts or expected NRE (non-recurring engineering) programs under development.

The majority of our backlog consists of purchase agreements for delivery over the next 12 months. Most purchase orders are subject to rescheduling or cancellation by the customer with no or limited penalties. Because of the possibility of customer changes in delivery schedules or cancellations and potential delays in product shipments, our backlog as of a particular date may not be indicative of net sales for any succeeding period. Some customers have

experienced delays in their expected product launch schedules due to their own product development delays not directly related to our microdisplays, such as development of custom optics or other aspects of their end product, or by delays in government programs contracted to them.

Research and Development

Near-to-the-eye virtual imaging and OLED technology are relatively new technologies that have considerable room for substantial improvements in luminance, life, power efficiency, voltage swing, design compactness, field of view, optical range of visibility, headtracking options, wireless control and many other parameters. We anticipate that achieving reductions in manufacturing costs will require new technology developments. We also anticipate that improving the performance, capability and cost of our products will provide an important competitive advantage in our fast moving, high technology marketplace. Past and current research activities include development of improved OLED and display device structures, developing and/or evaluating new materials (including the synthesis of new organic molecules), manufacturing equipment and process development, electronics design methodologies and new circuits and the development of new lenses and related systems. In 2007, we spent approximately \$2.9 million on research and development. In 2007 we continued to research more efficient materials and processes. We also completed the primary designs of our new smaller display, the SVGA 3DS, as well as the design of the SXGA.

External relationships play an important role in our research and development efforts. Suppliers, equipment vendors, government organizations, contract research groups, external design companies, customer and corporate partners, consortia, and university relationships all enhance the overall research and development effort and bring us new ideas (See "Strategic Relationships").

U.S. Government-Funded Research

We have entered into several U.S. government contracts to fund a portion of our efforts to develop next-generation OLED technologies for a variety of applications. These include, among others, Small Business Innovation Research (SBIR) Phase II program contracts for continued research and development and the fabrication of prototypes. On contracts for which we are the prime contractor, we subcontract portions of the work to various entities and institutions, including the University of Michigan. Our recent government contracts include the following:

OLED Performance and Reliability Improvement for Active Matrix OLED Microdisplays. Armed forces as well as other security related agencies are relying increasingly on the benefits of OLED technology in active matrix microdisplays. Applications range from night vision thermal imaging to tactical awareness and communication systems to weapons-mounted sights, among others. As the systems capabilities are expanded, the need for higher brightness and ability to display static imagery such as maps and drawings is growing, placing higher demands on the OLED technology. In 2007 eMagin was awarded a contract managed by the Night Vision Electronic Sensors Directorate (NVESD) with funding by the Department of Defense Appropriations Bill. The objective of the program is to improve on the present performance of the microdisplay-based OLED technology from lifetime, efficiency and reliability standpoints. For 2007, we received approximately \$360 thousand of the \$1.12 million program. The FY 2008 Department of Defense Appropriations Bill has provided for continuation of a second phase of the program

Organic Light Emitting Diode (OLED) Display Technology for Military Aircraft. In 2007 we continued our efforts to develop a robust thin film encapsulation technique for OLED displays under a Small Business Technology Transfer (STTR) program from the US Navy. University of Michigan, Ann Arbor, MI is the university partner for this STTR. Many new schemes to encapsulate OLED devices with thin film techniques were developed, evaluated and tested under accelerated environmental condition. The contract expired on February 29, 2008. For 2007 we received approximately \$328 thousand in funding under this program.

Ultra High Resolution Display for Army Medicine. In 2007 we formally initiated efforts on a multiple year program under contract with the US Army TATRC (Telemedicine and Advanced Technologies Research Center) with funding provided by the FY 2006 and 2007 Department of Defense Appropriations Bills. The culmination of this multiple year effort will provide an ultra-high resolution, wide field of view display system suitable for dual-use application within Army medicine, U.S. military simulation and training, and commercial uses. We received approximately \$698 thousand in funding during 2007 under this contract and expect to receive approximately \$2 million during 2008.

High Dynamic Range Microdisplay Feasibility Study. The US Army/RDECOM/NVESD and eMagin Corporation have established a CRADA (Cooperative Research and Development Agreement) with the goal of evaluating and characterizing new and existing AMOLED microdisplay configurations with an emphasis on the usable lifetime of the displays. This work is aimed at developing AMOLED microdisplays capable of being fielded in a wide range of US Army applications. The effort is for a 3 month period and is a feasibility study aimed at evaluating several concepts leading to a higher dynamic range without changing the existing pixel driver design of the microdisplays. If successful, a second phase can be considered addressing a complete high dynamic range OLED microdisplay. The total program cost for the 3 month program is approximately \$236 thousand. The program started on March 14, 2008.

Manufacturing Facilities

We are located at IBM's Microelectronics Division facility, known as the Hudson Valley Research Park, located about 70 miles north of New York City in Hopewell Junction, New York. We lease approximately 33,000 square feet of space which houses our own equipment for OLED microdisplay fabrication and research and development, includes a 16,300 square foot class 10 clean room space, additional lower level clean room space, assembly space and administrative offices.

Facilities services provided by IBM include our clean room, pure gases, high purity de-ionized water, compressed air, chilled water systems, and waste disposal support. This infrastructure provided by our lease with IBM provides us with many of the resources of a larger corporation without the added overhead costs. It further allows us to focus our resources more efficiently on our product development and manufacturing goals.

We lease additional non-clean room facilities for chemical mixing, cleaning, chemical systems, and glass/silicon cutting. OLED chemicals can be purified in our facility with our own equipment, permitting the company to evaluate new chemicals in pilot production that are not yet available in suitable purity for OLED applications on the market.

Our display fabrication process starts with the silicon wafer, which is manufactured by a semiconductor foundry using conventional CMOS process. After a device is designed by a combination of internal and external designers with customer participation, we outsource wafer fabrication.

Our manufacturing process for OLED-on-silicon microdisplays has three main components: organic film deposition, organic film encapsulation (also known as sealing), and color filter processing. All steps are performed in semi-automated, hands-free environment suitable for high volume throughput. An automated cluster tool provides all OLED deposition steps in a highly controlled environment that is the centerpiece of our OLED fabrication. After wafer processing, each part is inspected using an automated inspection system, prior to shipment. We have electrical and optical instrumentation required to characterize the performance of our displays including photometric and color coordinate analysis. We are also equipped for integrated circuit and electronics design and display testing.

We also lease a facility in Bellevue, Washington where we operate our system development effort and business development activities. The facilities are well suited for designing and building limited volume prototypes and small quantity industrial or government products. Cables and electronic interfaces have recently been produced to permit our OEM customers to more rapidly create products and shorten their time-to-market. We plan to outsource medium to high volume subsystem production to low cost plastics, lenses, and assembly manufacturers. We are currently using domestic and international outside manufacturers and we are investigating new outsource opportunities.

We believe that manufacturing efficiency is an important factor for success in the consumer markets. We believe that high yield and maximum utilization of our equipment set will be key for profitability. The equipment required for initial profitable production is in place. Some equipment will be added when our production volume increases or as needed.

Intellectual Property

We have developed a significant intellectual property portfolio of patents, trade secrets and know-how, supported by our license from Eastman Kodak and our current patent portfolio.

Our license from Eastman Kodak gives us the right to use in miniature displays a portfolio in organic light emitting diode and optics technology, some of which are fundamental. Our agreement with Eastman Kodak provides for perpetual access to the OLED technology for our OLED-on-silicon applications, provided we remain active in the field and meet our contractual requirements to Eastman Kodak. We also generate intellectual property as a result of our internal research and development activities.

Our patents and patent applications cover a wide range of materials, device structures, processes, and fabrication techniques, such as methods of fabricating full color OLEDs. We believe that our patent applications relating to up-emitting structures on opaque substrates such as silicon wafers, which are critical for OLED microdisplays, and applications relating to the hermetic sealing of such structures are particularly important.

Our patents are concentrated in the following areas:

- OLED Materials, Structures, and Processes;
 - Display Color Processing and Sealing;
- Active Matrix Circuit Methodologies and Designs;
- Field Emission and General Display Technologies;

- Lenses and Tracking (Eye and Head);
- Ergonomics and Industrial Design; and
- Wearable Computer Interface Methodology

We also rely on proprietary processes, trade secrets, and know-how related to OLED technologies and materials which are not patented. To protect this information and know-how from unauthorized use or disclosure, we require all employees, and where appropriate, contractors, consultants, advisors and collaborators to enter into confidentiality and non-competition agreements, . There can be no assurance, however, that these agreements will provide meaningful protection for our trade secrets, know-how or other proprietary information in the event of any unauthorized use, misappropriation or disclosure of such trade secrets, know-how or other proprietary information.

We believe that our intellectual property portfolio, coupled with our strategic relationships and accumulated experience in the OLED field, gives us an advantage over potential competitors.

Competition

The industry in which we operate is highly competitive. We may face competition from legacy technologies such as CRTs as well as from alternative flat panel display technologies. We believe that our key competition will come from liquid crystal on silicon microdisplays, or LCOS, also known as reflective liquid crystal displays and small transmissive LCDs. While we believe that OLED-on-silicon has the capability to provide higher quality image quality images, greater environmental ruggedness, reduced electronics cost and complexity, and improved power efficiency advantages over either type of liquid crystal based microdisplays, there is no assurance that these benefits will be fully realized or that liquid crystal manufacturers will not suitably improve these parameters to reduce these potential advantages of OLEDs.

Most companies pursuing liquid crystal on silicon technology, such as Syntax/Brilliant Corporation, among others, have primarily focused on projection microdisplays, which do not compete directly with us.

In most near-to-the-eye imaging markets, we face more serious competition from developers of transmissive liquid crystal displays, such as those developed by Kopin, or possibly laser scanning systems, such as those developed by Microvision Corporation. Large amounts of investment in a intrinsically weaker technology can potentially overcome advantages of one technology over another.

To our knowledge, the only other company that has publicly stated plans to develop OLED microdisplays for near-eye applications is MicroEmissive Displays (MED) in Britain. MED has raised substantial funds and created a newer facility than ours. This competition has not been significant to date, but could become more serious if they enter our markets with directly relevant display designs and resolve their manufacturing and reliability-lifetime issues.

We may also compete with potential licensees of Universal Display Corporation, Eastman Kodak, or Sumitomo Corporation and other companies, each of which potentially can license OLED technology portfolios. Even though we could also potentially license technology from these developers, potential competitors could also obtain such licenses and may do so at more favorable royalty rates or allocate more resources to the competitive effort than we could obtain. However, should they decide to embark on developing microdisplays on silicon, we believe that our progress to date in this area gives us a substantial head start.

Employees

As of March 14, 2008, we had a total of 65 full time and part time staff. None of our employees are represented by a labor union. We have not experienced any work stoppages and consider our relations with our employees to be good.

Subsequent Events

On January 30, 2008 the Moriah Agreement (as defined below) was amended and restated (a) to provide Borrowing Base eligibility for Foreign Accounts at 70 percent of the accounts receivable balance so long as the individual account has not experienced a past due history during the previous two years, (b) to amend the note agreement to eliminate the optional conversion of principal up to \$2.0 million of principal into common stock at a price of \$1.50 per share in lieu of issuance of a warrant to purchase 750,000 shares of the Company's common stock at a price of \$1.50 per share with an expiration date of January 29, 2013, and (c) to amend the Company's share registration obligation to complete the filing of a registration statement within thirty days of the execution of the amendment.

On March 25, 2008 the Moriah Agreement was again amended (the "Moriah Amendment") to provide certain waivers, as described below, and a further extension of the period during which the Company is obligated to file a registration statement including shares issued or to be issued in connection with the Moriah Agreement. The Moriah Agreement, as amended, has specific terms to which the Company must comply including (a) maintaining a lockbox account into which payments from related accounts receivable must be deposited, (b) periodic certifications as to borrowing base

amounts equaling or exceeding net balances outstanding under the Line of Credit, and (c) a requirement that a registration statement with respect to shares held or to be issued to the lender be filed within thirty days of January 30, 2008. A delay in establishing the required lockbox account created a technical default under the Line of Credit agreement. Similarly, the production and subsequent discovery of defective displays resulted in an inadvertent overstatement of inventory during December 2007, January 2008 and early February 2008 that created a technical default under the agreement. Finally, the Company was not able to complete the registration of shares within the thirty day timeframe mandated in the amended agreement. Pursuant to the March Amendment, Moriah waived: (a) the lockbox account requirement through March 14, 2008, (b) compliance with the borrowing base requirement in so far as it related exclusively to the defective displays inadvertently included in inventory and (c) also extended the period for filing a registration statement for certain shares issued or to be issued to the lender until April 29, 2008.

On April 2, 2008, the Company completed a private placement of its common stock with several institutional investors for gross proceeds of \$1,650,000. The transaction involved the sale of 1,586,539 shares of common stock at \$1.04 per share, or the 5-day average closing price of the Company's common stock on the trading days immediately preceding the closing date. The Company also issued to the investors 793,273 warrants to buy our common stock at a price of \$1.30 per share. Pursuant to the transaction, the Company is obligated to file a registration statement for the shares issued as well as shares underlying the warrants by May 17, 2008.

ITEM 1A. RISK FACTORS

You should carefully consider the following risk factors and the other information included herein as well as the information included in other reports and filings made with the SEC before investing in our common stock. The following factors, as well as other factors affecting our operating results and financial condition, could cause our actual future results and financial condition to differ materially from those projected. The trading price of our common stock could decline due to any of these risks, and you may lose part or all of your investment.

RISKS RELATED TO OUR FINANCIAL RESULTS

We have a history of losses since our inception and may incur losses for the foreseeable future.

Our accumulated losses are \$199 million as of December 31, 2007. We have not yet achieved profitability and we can give no assurances that we will achieve profitability within the foreseeable future as we fund operating and capital expenditures in areas such as including markets development, sales and marketing, manufacturing equipment, acquisitions, and research and development. We cannot assure investors that we will ever achieve or sustain profitability or that our operating losses will not increase in the future.

We may not be able to execute our business plan and may not generate cash from operations.

As we have reported, our business is expected to experience significant revenue growth during the year ended December 31, 2008. We anticipate that our cash requirements to fund operating or investing cash requirements over the next twelve months may be greater than our current cash on hand and borrowing availability under our revolving credit facility. In the event that cash flow from operations is less than anticipated and we are unable to secure additional funding to cover our expenses, in order to preserve cash, we would be required to reduce expenditures and effect reductions in our corporate infrastructure, either of which could have a material adverse effect on our ability to continue our current level of operations. No assurance can be given that additional financing will be available, or if available, will be on acceptable terms.

We may be subject to fines, sanctions, and/or penalties of an indeterminable nature as a result of potential violations of federal securities laws.

In July 2006, we entered into a Note Purchase Agreement with Stillwater LLC, which provided for the purchase and sale of a 6% senior secured convertible note in principal amount of up to \$500,000 (the "Stillwater Note") and a warrant to purchase 70% percent of the number of shares issuable upon conversion of the Stillwater Note, at our sole discretion by delivery of a notice to Stillwater on December 14, 2006. We then filed a registration statement on Form S-3 to register the resale by Stillwater of up to 41,088,445 shares of our common stock. In July 2007, we amended the agreements with Stillwater. Amending the Stillwater agreements without first withdrawing the Registration Statement on Form S-3 may be inconsistent with Section 5 of the Securities Act of 1933, as amended, and we may be subject to fines, sanctions and/or penalties of an indeterminable nature as a result of potential violations of federal securities laws. If we are assessed fines and penalties our business will be materially affected.

The issuance of shares of common stock in connection with the conversion of the Notes may have not have been in compliance with certain state and federal securities laws and any damages that we may have to pay as a result of such issuance could have a material adverse effect on our revenues, profits, results of operations, financial condition and future prospects.

Our independent registered public accounting firm has expressed substantial doubt about our ability to continue as a going concern, which may hinder our ability to obtain future financing.

Our consolidated financial statements as of December 31, 2007 have been prepared under the assumption that we will continue as a going concern for the year ending December 31, 2008. Our independent registered public accounting firm has issued a report dated April 9, 2008 that included an explanatory paragraph expressing substantial doubt as to our ability to continue as a going concern without additional capital or financing becoming available. Our ability to continue as a going concern ultimately depends on our ability to generate a profit which is likely dependent upon our ability to obtain additional equity or debt financing, attain further operating efficiencies and, ultimately, to achieve profitable operations. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

RISKS RELATED TO MANUFACTURING

The manufacture of OLED-on-silicon is new and OLED microdisplays have not been produced in significant quantities.

If we are unable to produce our products in sufficient quantity, we will be unable to maintain and attract new customers. In addition, we cannot assure you that once we commence volume production we will attain yields at high throughput that will result in profitable gross margins or that we will not experience manufacturing problems which could result in delays in delivery of orders or product introductions.

We are dependent on a single manufacturing line.

We currently manufacture our products on a single manufacturing line. If we experience any significant disruption in the operation of our manufacturing facility or a serious failure of a critical piece of equipment, we may be unable to supply microdisplays to our customers. For this reason, some OEMs may also be reluctant to commit a broad line of products to our microdisplays without a second production facility in place. However, we try to maintain product inventory to fill the requirements under such circumstances. Interruptions in our manufacturing could be caused by manufacturing equipment problems, the introduction of new equipment into the manufacturing process or delays in the delivery of new manufacturing equipment. Lead-time for delivery of manufacturing equipment can be extensive. No assurance can be given that we will not lose potential sales or be unable to meet production orders due to production interruptions in our manufacturing line. In order to meet the requirements of certain OEMs for multiple manufacturing sites, we will have to expend capital to secure additional sites and may not be able to manage multiple sites successfully.

We could experience manufacturing interruptions, delays, or inefficiencies if we are unable to timely and reliably procure components from single-sourced suppliers.

We maintain several single-source supplier relationships, either because alternative sources are not available or because the relationship is advantageous due to performance, quality, support, delivery, capacity, or price considerations. If the supply of a critical single-source material or component is delayed or curtailed, we may not be able to ship the related product in desired quantities and in a timely manner. Even where alternative sources of supply are available, qualification of the alternative suppliers and establishment of reliable supplies could result in delays and a possible loss of sales, which could harm operating results.

We expect to depend on semiconductor contract manufacturers to supply our silicon integrated circuits and other suppliers of key components, materials and services.

We do not manufacture the silicon integrated circuits on which we incorporate our OLED technology. Instead, we expect to provide the design layouts to semiconductor contract manufacturers who will manufacture the integrated circuits on silicon wafers. We also expect to depend on suppliers of a variety of other components and services, including circuit boards, graphic integrated circuits, passive components, materials and chemicals, and equipment support. Our inability to obtain sufficient quantities of high quality silicon integrated circuits or other necessary components, materials or services on a timely basis could result in manufacturing delays, increased costs and ultimately in reduced or delayed sales or lost orders which could materially and adversely affect our operating results.

RISKS RELATED TO OUR INTELLECTUAL PROPERTY

We rely on our license agreement with Eastman Kodak for the development of our products.

We rely on our license agreement with Eastman Kodak for the development of our products, and the termination of this license, Eastman Kodak's licensing of its OLED technology to others for microdisplay applications, or the sublicensing by Eastman Kodak of our OLED technology to third parties, could have a material adverse impact on our business.

Our principal products under development utilize OLED technology that we license from Eastman Kodak. We rely upon Eastman Kodak to protect and enforce key patents held by Eastman Kodak, relating to OLED display technology. Eastman Kodak's patents expire at various times in the future. Our license with Eastman Kodak could terminate if we fail to perform any material term or covenant under the license agreement. Since our license from Eastman Kodak is non-exclusive, Eastman Kodak could also elect to become a competitor itself or to license OLED technology for microdisplay applications to others who have the potential to compete with us. The occurrence of any of these events could have a material adverse impact on our business.

We may not be successful in protecting our intellectual property and proprietary rights.

We rely on a combination of patents, trade secret protection, licensing agreements and other arrangements to establish and protect our proprietary technologies. If we fail to successfully enforce our intellectual property rights, our competitive position could suffer, which could harm our operating results. Patents may not be issued for our current patent applications, third parties may challenge, invalidate or circumvent any patent issued to us, unauthorized parties could obtain and use information that we regard as proprietary despite our efforts to protect our proprietary rights, rights granted under patents issued to us may not afford us any competitive advantage, others may independently develop similar technology or design around our patents, our technology may be available to licensees of Eastman Kodak, and protection of our intellectual property rights may be limited in certain foreign countries. On April 30, 2007, the U.S. Supreme Court, in *KSR International Co. vs. Teleflex, Inc.*, mandated a more expansive and flexible approach towards a determination as to whether a patent is obvious and invalid, which may make it more difficult for patent holders to secure or maintain existing patents. Any future infringement or other claims or prosecutions related to our intellectual property could have a material adverse effect on our business. Any such claims, with or without merit, could be time consuming to defend, result in costly litigation, divert management's attention and resources, or require us to enter into royalty or licensing agreements. Such royalty or licensing agreements, if required, may not be available on terms acceptable to us, if at all. Protection of intellectual property has historically been a large yearly expense for eMagin. We have not been in a financial position to properly protect all of our intellectual property, and may not be in a position to properly protect our position or stay ahead of competition in new research and the protecting of the resulting intellectual property.

RISKS RELATED TO THE MICRODISPLAY INDUSTRY

The commercial success of the microdisplay industry depends on the widespread market acceptance of microdisplay systems products.

The market for microdisplays is emerging. Our success will depend on consumer acceptance of microdisplays as well as the success of the commercialization of the microdisplay market. As an OEM supplier, our customer's products must also be well accepted. At present, it is difficult to assess or predict with any assurance the potential size, timing and viability of market opportunities for our technology in this market. The viewfinder microdisplay market sector is well established with entrenched competitors with whom we must compete.

The microdisplay systems business is intensely competitive.

We do business in intensely competitive markets that are characterized by rapid technological change, changes in market requirements and competition from both other suppliers and our potential OEM customers. Such markets are typically characterized by price erosion. This intense competition could result in pricing pressures, lower sales, reduced margins, and lower market share. Our ability to compete successfully will depend on a number of factors, both within and outside our control. We expect these factors to include the following:

- our success in designing, manufacturing and delivering expected new products, including those implementing new technologies on a timely basis;
 - our ability to address the needs of our customers and the quality of our customer services;
 - the quality, performance, reliability, features, ease of use and pricing of our products;
 - successful expansion of our manufacturing capabilities;
 - our efficiency of production, and ability to manufacture and ship products on time;
- the rate at which original equipment manufacturing customers incorporate our product solutions into their own products;
 - the market acceptance of our customers' products; and

- product or technology introductions by our competitors.

Our competitive position could be damaged if one or more potential OEM customers decide to manufacture their own microdisplays, using OLED or alternate technologies. In addition, our customers may be reluctant to rely on a relatively small company such as eMagin for a critical component. We cannot assure you that we will be able to compete successfully against current and future competition, and the failure to do so would have a materially adverse effect upon our business, operating results and financial condition.

The display industry may be cyclical.

Our business strategy is dependent on OEM manufacturers building and selling products that incorporate our OLED displays as components into those products. Industry-wide fluctuations and downturns in the demand for flat panel displays could cause significant harm to our business. The OLED microdisplay sector may experience overcapacity, if and when all of the facilities presently in the planning stage come on line, leading to a difficult market in which to sell our products.

Competing products may get to market sooner than ours.

Our competitors are investing substantial resources in the development and manufacture of microdisplay systems using alternative technologies such as reflective liquid crystal displays (LCDs), LCD-on-Silicon ("LCOS") microdisplays, active matrix electroluminescence and scanning image systems, and transmissive active matrix LCDs. Our competitive position could be damaged if one or more of our competitors' products get to the market sooner than our products. We cannot assure you that our product will get to market ahead of our competitors or that we will be able to compete successfully against current and future competition. The failure to do so would have a materially adverse effect upon our business, operating results and financial condition.

Our competitors have many advantages over us.

As the microdisplay market develops, we expect to experience intense competition from numerous domestic and foreign companies including well-established corporations possessing worldwide manufacturing and production facilities, greater name recognition, larger retail bases and significantly greater financial, technical, and marketing resources than us, as well as from emerging companies attempting to obtain a share of the various markets in which our microdisplay products have the potential to compete. We cannot assure you that we will be able to compete successfully against current and future competition, and the failure to do so would have a materially adverse effect upon our business, operating results and financial condition.

Our products are subject to lengthy OEM development periods.

We plan to sell most of our microdisplays to OEMs who will incorporate them into products they sell. OEMs determine during their product development phase whether they will incorporate our products. The time elapsed between initial sampling of our products by OEMs, the custom design of our products to meet specific OEM product requirements, and the ultimate incorporation of our products into OEM consumer products is significant often with a duration of between one and three years. If our products fail to meet our OEM customers' cost, performance or technical requirements or if unexpected technical challenges arise in the integration of our products into OEM consumer products, our operating results could be significantly and adversely affected. Long delays in achieving customer qualification and incorporation of our products could adversely affect our business.

Our products will likely experience rapidly declining unit prices.

In the markets in which we expect to compete, prices of established products tend to decline significantly over time. In order to maintain our profit margins over the long term, we believe that we will need to continuously develop product enhancements and new technologies that will either slow price declines of our products or reduce the cost of producing and delivering our products. While we anticipate many opportunities to reduce production costs over time, there can be no assurance that these cost reduction plans will be successful, that we will have the resources to fund the expenditures necessary to implement certain cost-saving measures, or that our costs can be reduced as quickly as any reduction in unit prices. We may also attempt to offset the anticipated decrease in our average selling price by introducing new products, increasing our sales volumes or adjusting our product mix. If we fail to do so, our results of operations would be materially and adversely affected.

RISKS RELATED TO OUR BUSINESS

Our success depends on attracting and retaining highly skilled and qualified technical and consulting personnel.

We must hire highly skilled technical personnel as employees and as independent contractors in order to develop our products. The competition for skilled technical employees is intense and we may not be able to retain or recruit such personnel. We must compete with companies that possess greater financial and other resources than we do, and that

may be more attractive to potential employees and contractors. To be competitive, we may have to increase the compensation, bonuses, stock options and other fringe benefits offered to employees in order to attract and retain such personnel. The costs of attracting and retaining new personnel may have a materially adverse affect on our business and our operating results. In addition, difficulties in hiring and retaining technical personnel could delay the implementation of our business plan.

Our success depends in a large part on the continuing service of key personnel.

Changes in management could have an adverse effect on our business. We are dependent upon the active participation of several key management personnel and will also need to recruit additional management in order to expand according to our business plan. The failure to attract and retain additional management or personnel could have a material adverse effect on our operating results and financial performance.

The ineffectiveness of our internal control over financial reporting could result in a loss of investor confidence in our financial reports and have an adverse effect on our stock price.

Pursuant to Section 404 of the Sarbanes-Oxley Act of 2002 ("Section 404"), and the rules and regulations promulgated by the SEC to implement Section 404, we are required to include in our Form 10-K an annual report by our management regarding the effectiveness of our internal control over financial reporting. The report includes, among other things, an assessment of the effectiveness of our internal control over financial reporting as of the end of our fiscal year. This assessment must include disclosure of any material weaknesses in our internal control over financial reporting identified by management.

As of December 31, 2007, our internal control over financial reporting was ineffective due to the presence of material weaknesses, as more fully described in Item 9A of this Form 10-K. This could result in a loss of investor confidence in the accuracy and completeness of our financial reports, which may have an adverse effect on our stock price.

Our business depends on new products and technologies.

The market for our products is characterized by rapid changes in product, design and manufacturing process technologies. Our success depends to a large extent on our ability to develop and manufacture new products and technologies to match the varying requirements of different customers in order to establish a competitive position and become profitable. Furthermore, we must adopt our products and processes to technological changes and emerging industry standards and practices on a cost-effective and timely basis. Our failure to accomplish any of the above could harm our business and operating results.

We generally do not have long-term contracts with our customers.

Our business has primarily operated on the basis of short-term purchase orders. We are now receiving longer term purchase agreements, such as those which comprise our approximately \$7.3 million backlog, and procurement contracts, but we cannot guarantee that we will continue to do so. Our current purchase agreements can be cancelled or revised without penalty, depending on the circumstances. We plan production on the basis of internally generated forecasts of demand, which makes it difficult to accurately forecast revenues. If we fail to accurately forecast operating results, our business may suffer and the value of your investment in eMagin may decline.

Our business strategy may fail if we cannot continue to form strategic relationships with companies that manufacture and use products that could incorporate our OLED-on-silicon technology.

Our prospects will be significantly affected by our ability to develop strategic alliances with OEMs for incorporation of our OLED-on-silicon technology into their products. While we intend to continue to establish strategic relationships with manufacturers of electronic consumer products, personal computers, chipmakers, lens makers, equipment makers, material suppliers and/or systems assemblers, there is no assurance that we will be able to continue to establish and maintain strategic relationships on commercially acceptable terms, or that the alliances we do enter in to will realize their objectives. Failure to do so would have a material adverse effect on our business.

Our business depends to some extent on international transactions.

We purchase needed materials from companies located abroad and may be adversely affected by political and currency risk, as well as the additional costs of doing business with foreign entities. Some customers in other countries have longer receivable periods or warranty periods. In addition, many of the foreign OEMs that are the most likely long-term purchasers of our microdisplays expose us to additional political and currency risk. We may find it necessary to locate manufacturing facilities abroad to be closer to our customers which could expose us to various risks, including management of a multi-national organization, the complexities of complying with foreign laws and customs, political instability and the complexities of taxation in multiple jurisdictions.

Our business may expose us to product liability claims.

Our business may expose us to potential product liability claims. Although no such claims have been brought against us to date, and to our knowledge no such claim is threatened or likely, we may face liability to product users for damages resulting from the faulty design or manufacture of our products. While we plan to maintain product liability insurance coverage, there can be no assurance that product liability claims will not exceed coverage limits, fall outside the scope of such coverage, or that such insurance will continue to be available at commercially reasonable rates, if at all.

Our business is subject to environmental regulations and possible liability arising from potential employee claims of exposure to harmful substances used in the development and manufacture of our products.

We are subject to various governmental regulations related to toxic, volatile, experimental and other hazardous chemicals used in our design and manufacturing process. Our failure to comply with these regulations could result in the imposition of fines or in the suspension or cessation of our operations. Compliance with these regulations could require us to acquire costly equipment or to incur other significant expenses. We develop, evaluate and utilize new chemical compounds in the manufacture of our products. While we attempt to ensure that our employees are protected from exposure to hazardous materials, we cannot assure you that potentially harmful exposure will not occur or that we will not be liable to employees as a result.

RISKS RELATED TO OUR STOCK

The substantial number of shares that are or will be eligible for sale could cause our common stock price to decline even if eMagin is successful.

Sales of significant amounts of common stock in the public market, or the perception that such sales may occur, could materially affect the market price of our common stock. These sales might also make it more difficult for us to sell equity or equity-related securities in the future at a time and price that we deem appropriate. As of March 14, 2008, we have outstanding (i) options to purchase 904,323 shares and (ii) warrants to purchase 9,090,509 shares of common stock.

We have a staggered board of directors and other anti-takeover provisions, which could inhibit potential investors or delay or prevent a change of control that may favor you.

Our Board of Directors is divided into three classes and our Board members are elected for terms that are staggered. This could discourage the efforts by others to obtain control of eMagin. Some of the provisions of our certificate of incorporation, our bylaws and Delaware law could, together or separately, discourage potential acquisition proposals or delay or prevent a change in control. In particular, our board of directors is authorized to issue up to 10,000,000 shares of preferred stock (less any outstanding shares of preferred stock) with rights and privileges that might be senior to our common stock, without the consent of the holders of the common stock.

ITEM 1B. UNRESOLVED STAFF COMMENTS

Not applicable.

ITEM 2. PROPERTIES

Our corporate offices are located in Bellevue, Washington. Our Washington location includes administrative, finance, operations, research and development and sales and marketing functions and consists of leased space of approximately 19,000 square feet. The lease expires in 2009. Our manufacturing facility is located in Hopewell Junction, New York, where we lease approximately 33,000 square feet from IBM. The NY facility houses our equipment for OLED microdisplay fabrication, assembly operations, research and development, and administrative functions. The lease expires in 2009. We believe our facilities are adequate for our current and near-term needs. See Note 12 to our Consolidated Financial Statement for more information about our lease commitments.

ITEM 3. LEGAL PROCEEDINGS

A former employee (“plaintiff”) of the Company commenced legal action in the United States District Court for the Southern District of New York, on or about October 12, 2007, alleging that the plaintiff was subject to gender based discrimination and retaliation in violation of Title VII of the Civil Rights Act of 1964 (Case No. 07-CV-8827 (KMK)). The plaintiff seeks unspecified compensatory damages, punitive damages and attorneys’ fees. On November 26, 2007, the Company served and filed its Answer, in which it denied the material allegations of the Complaint and asserted numerous affirmative defenses. This action is presently in the discovery stage. The Company disputes the allegations of the Complaint and intends on vigorously defending this action.

On December 6, 2005, New York State Urban Development Corporation commenced action against eMagin in the Supreme Court of the State of New York, County of New York against eMagin, asserting breach of contract and

seeking to recover a \$150,000 grant which was made to eMagin based on goals set forth in the agreement for recruitment of employees. On July 13, 2006, eMagin agreed to a settlement with the New York State Urban Development Corporation to repay \$112,200 of the \$150,000 grant. The settlement requires that repayments be made on a monthly basis in the amount of \$3,116.67 per month commencing August 1, 2006 and ending on July 1, 2009.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITYHOLDERS

None.

21

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED SHAREHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Our common stock is traded on the OTC Bulletin Board under the symbol "EMAN". The following table sets forth the range of high and low prices per share of our common stock for each period indicated.

	2006		2007	
	High	Low	High	Low
First quarter	\$ 7.10	\$ 4.60	\$ 1.08	\$ 0.26
Second quarter	\$ 5.70	\$ 2.50	\$ 0.85	\$ 0.42
Third quarter	\$ 3.80	\$ 1.80	\$ 1.64	\$ 0.65
Fourth quarter	\$ 2.50	\$ 1.01	\$ 1.75	\$ 0.85

As of March 14, 2008, there were 497 holders of record of our common stock. Because brokers and other institutions hold many of the shares on behalf of shareholders, we are unable to determine the actual number of shareholders represented by these record holders.

Dividends

We have never declared or paid cash dividends on our common stock. We currently anticipate that we will retain all future earnings to fund the operation of our business and do not anticipate paying dividends on our common stock in the foreseeable future.

Recent Issuances of Unregistered Stock

On April 2, 2008, eMagin Corporation (the "Company") entered into a Securities Purchase Agreement, pursuant to which it sold to certain qualified institutional buyers and accredited investors an aggregate of 1,586,539 shares of the Company's common stock, par value \$0.001 per share, and warrants to purchase an additional 793,273 shares of common stock, for an aggregate purchase price of \$1,650,000. The purchase price of the common stock was \$1.04 per share and the strike price of the corresponding warrant was \$1.30 per share. The warrants expire April 2, 2013.

The Company and Moriah Capital, L.P. ("Moriah") entered into Amendment No. 2 to the Loan and Security Agreement dated as of March 25, 2008 (the "Second Amendment"). Pursuant to the Second Amendment, Moriah waived the Company's noncompliance with Sections 7.2, 7.3, 8.11, 9.1, 9.3, 9.5(c) and 11.5 of the Loan and Security Agreement to the extent such noncompliance resulted solely from the Company's inadvertently misstating the amount of its inventory that contained defective parts (the "Defective Inventory Count"), provided that on or before April 8, 2008 the Company repays Moriah all prior Advances (as defined in the Loan and Security Agreement), which exceed the Maximum Credit (as defined in the Loan and Security Agreement) if any, as a result of the Defective Inventory Count.

Pursuant to the Second Amendment, the Company has advised Moriah of certain delays in implementing the Lockbox Agreement, as required under the Loan and Security Agreement, which, if unwaived, would result in the Company's noncompliance with section 2.1(f) of the Loan and Security Agreement and with Section 3 of the Post-Closing Agreement between the Company and Moriah, dated August 7, 2007. Moriah agreed to waive noncompliance with Sections 2.1(f) of the Loan and Security Agreement and Section 3 of the Post-Closing Agreement in reliance on the Company's representation and warranty that all lockbox arrangements required to be implemented under Section 2.1(f) of the Loan and Security Agreement and under Section 3 of the Post-Closing Agreement have been consummated and

are in full force and effect as of March 12, 2008.

On January 30, 2008, the Company and Moriah entered into a Warrant Issuance Agreement (the “Warrant Issuance Agreement”). The Company and Moriah entered into Amendment No. 1 to the Warrant Issuance Agreement. Pursuant to the Amendment No. 1 to Warrant Issuance Agreement, the Company issued Moriah a Warrant to purchase 250,000 shares of the Company’s common stock at an exercise price of \$1.50 per share until March 25, 2013 (the “March 2008 Warrant”). Pursuant to the Amendment No. 1 to the Warrant Issuance Agreement, Section 3.2 of the Warrant Issuance Agreement was amended to provide that the Company has to file by April 29, 2008 a registration statement with the Securities and Exchange Commission to register 1,000,000 shares of the Company’s common stock issuable upon exercise of warrants issued to Moriah (including the March 2008 Warrant and a warrant to purchase 750,000 shares of the Common Stock which was previously issued to Moriah).

The Company entered into agreements, effective as of August 7, 2007 with Moriah, pursuant to which the Company may borrow an amount not to exceed \$2,500,000. Such funds may be drawn down by the Company in tranches of at least \$25,000 up to five times each month. In connection with the transaction, the Company issued, executed and delivered to Moriah a Secured Convertible Revolving Loan Note (the "Moriah Agreement") with a principal amount not to exceed \$2,500,000, of which up to \$2,000,000 is convertible into up to 1,333,333 shares (at a conversion price of \$1.50 per share), and a Securities Issuance Agreement pursuant to which the Company issued 162,500 shares of its common stock, which shares had an aggregate market value at the Closing Date of \$195,000.

On July 23, 2007, we entered into Amendment Agreements with the holders of the Notes issued July 21, 2006 and March 28, 2007 (each a "Holder" and collectively, the "Holders") and agreed to issue each Holder an amended and restated Note (the "Amended Notes") in the principal amount equal to the principal amount outstanding as of July 23, 2007.

The changes to the Amended Notes include the following:

- The due date for the outstanding Notes (totaling after conversions an aggregate of \$6,020,000) has been extended to December 21, 2008;
- The Amended Notes are convertible into (i) 8,407,612 shares of the Company's common stock. The conversion price for \$5,770,000 of principal was revised from \$2.60 to \$0.75 per share. The conversion price of \$0.35 per share for \$250,000 of principal was unchanged;
- \$3,010,000 of the Notes can convert into (ii) 3,010 shares of the Company's newly formed Series A Convertible Preferred Stock (the "Preferred") at a conversion price of \$1,000 per share. The Preferred is convertible into common stock at the same price allowable by the Amended Notes, subject to adjustment as provided for in the Certificate of Designations;
- The Amended Notes adjust the exercise price from \$3.60 to \$1.03 per share for 1,553,468 Warrants and require the issuance of 3,831,859 Warrants exercisable at \$1.03 per share pursuant to which the holders may acquire common stock, until July 21, 2011; and
 - As of July 23, 2007 the interest rate was raised from 6% to 8%.

On March 28, 2007, we entered into an amendment of the Note Purchase Agreement (the "Stillwater Note Purchase Agreement") for the sale of \$500 thousand of senior secured debentures (the "Stillwater Note") and warrants to purchase approximately 1.0 million shares of common stock, par value \$.001 per share. The investor purchased the Stillwater Note with a conversion price of \$0.35 per share that may convert into approximately 1.4 million shares of common stock and warrants exercisable at \$0.48 per share into approximately 1.0 million shares of common stock expiring in 4.2 years. On April 9, 2007, we closed the transaction and received approximately \$460 thousand, net of offering costs of approximately \$40 thousand which are amortized over the life of the Stillwater Note. On July 23, 2007, Stillwater elected to convert approximately \$252 thousand of the 6% Senior Secured Convertible Note ("Original Note") representing \$250 thousand of the principal amount of the Note due on July 23, 2007 and approximately \$2 thousand of accrued and unpaid interest. The investor received 720,476 shares of Common Stock at the conversion price of \$0.35. The remaining principal amount was amended on July 23, 2007 to an Amended Note as referred to above.

ITEM 6. SELECTED FINANCIAL DATA

The following selected consolidated financial data should be read in conjunction with our consolidated financial statements and related notes and "Management's Discussion and Analysis of Financial Condition and Results of Operations". The statements of operations data for the years ended December 31, 2007, 2006, and 2005 and the balance sheet data at December 31, 2007 and 2006 are derived from our audited financial statements which are included elsewhere in this Form 10-K. The statement of operations data for the year ended December 31, 2004 and 2003 and the balance sheet data at December 31, 2005, 2004 and 2003 are derived from our audited financial statements which are not included in this Form 10-K. The historical results are not necessarily indicative of results to be expected for

future periods. The following information is presented in thousands, except per share data.

Consolidated Statements of Operations Data:

	2007	For the Year Ended December 31,			2003
		2006	2005	2004	
	(In thousands, except per share data)				
Revenue	\$ 17,554	\$ 8,169	\$ 3,745	\$ 3,593	\$ 2,578
Cost of goods sold	12,628	11,359	10,219	5,966	5,141
Gross profit (loss)	4,926	(3,190)	(6,474)	(2,373)	(2,563)
Operating expenses:					
Research and development	2,949	4,406	4,020	898	19
Selling, general and administrative	6,591	8,860	6,316	4,428	5,712
Total operating expenses	9,540	13,266	10,336	5,326	5,731
Loss from operations	(4,614)	(16,456)	(16,810)	(7,699)	(8,294)
Other (expense) income, net	(13,874)	1,190	282	(5,012)	3,571
Net loss	\$ (18,488)	\$ (15,266)	\$ (16,528)	\$ (12,711)	\$ (4,723)
Basic and diluted loss per share	\$ (1.59)	\$ (1.52)	\$ (1.94)	\$ (1.98)	\$ (1.31)
Shares used in calculation of loss per share:					
Basic and diluted	11,633	10,058	8,541	6,428	3,599

Consolidated Balance Sheet Data:

	2007	2006	December 31,		
			2005	2004	2003
Cash and cash equivalents	\$ 713	\$ 1,415	\$ 6,727	\$ 13,457	\$ 1,054
Working capital (deficit)	\$ (4,708)	\$ (305)	\$ 8,868	\$ 14,925	\$ 106
Total assets	\$ 6,648	\$ 7,005	\$ 14,142	\$ 18,436	\$ 3,749
Long-term obligations	\$ 60	\$ 2,229	\$ 56	\$ 22	\$ 6,161
Total Shareholders' (capital deficit) equity	\$ (3,975)	\$ (1,164)	\$ 10,401	\$ 16,447	\$ (4,767)

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATION

Introduction

The following discussion should be read in conjunction with the Financial Statements and Notes thereto. Our fiscal year ends December 31. This document contains certain forward-looking statements including, among others, anticipated trends in our financial condition and results of operations and our business strategy. (See Part I, Item 1A, "Risk Factors "). These forward-looking statements are based largely on our current expectations and are subject to a number of risks and uncertainties. Actual results could differ materially from these forward-looking statements. Important factors to consider in evaluating such forward-looking statements include (i) changes in external factors or in our internal budgeting process which might impact trends in our results of operations; (ii) unanticipated working capital or other cash requirements; (iii) changes in our business strategy or an inability to execute our strategy due to unanticipated changes in the industries in which we operate; and (iv) various competitive market factors that may prevent us from competing successfully in the marketplace.

Overview

We design and manufacture miniature displays, which we refer to as OLED-on-silicon-microdisplays, and microdisplay modules for virtual imaging, primarily for incorporation into the products of other manufacturers. Microdisplays are typically smaller than many postage stamps, but when viewed through a magnifier they can contain all of the information appearing on a high-resolution personal computer screen. Our microdisplays use organic light emitting diodes, or OLEDs, which emit light themselves when a current is passed through the device. Our technology permits OLEDs to be coated onto silicon chips to produce high resolution OLED-on-silicon microdisplays.

We believe that our OLED-on-silicon microdisplays offer a number of advantages in near to the eye applications over other current microdisplay technologies, including lower power requirements, less weight, fast video speed without flicker, and wider viewing angles. In addition, many computer and video electronic system functions can be built directly into the OLED-on-silicon microdisplay, resulting in compact systems with lower expected overall system costs relative to alternate microdisplay technologies.

Since our inception in 1996 through 2004, we derived the majority of our revenues from fees paid to us under research and development contracts, primarily with the U.S. federal government. We have devoted significant resources to the development and commercial launch of our products. We commenced limited initial sales of our SVGA+ microdisplay in May 2001 and commenced shipping samples of our SVGA-3D microdisplay in February 2002. From inception to December 31, 2007, we have recognized an aggregate of approximately \$35.7 million from sales of our products, and as of March 14, 2008, we have a backlog of approximately \$7.3 million in products ordered for delivery through December 31, 2008. These products are being applied or considered for near-eye and headset applications in products such as entertainment and gaming headsets, handheld Internet and telecommunication appliances, viewfinders, and wearable computers to be manufactured by original equipment manufacturer (OEM) customers. We have also shipped a limited number of our Z800 3DVisor personal display systems. In addition to marketing OLED-on-silicon microdisplays as components, we also offer microdisplays as an integrated package, which we call Microviewer that includes a compact lens for viewing the microdisplay and electronic interfaces to convert the signal from our customer's product into a viewable image on the microdisplay. We are also developing head-wearable displays, including our Z800 3DVisor that incorporate our Microviewer.

We license our core OLED technology from Eastman Kodak and we have developed our own technology to create high performance OLED-on-silicon microdisplays and related optical systems. We believe our technology licensing agreement with Eastman Kodak, coupled with our own intellectual property portfolio, gives us a leadership position in

OLED and OLED-on-silicon microdisplay technology. We believe that we are the only company to demonstrate publicly and market full-color small molecule OLED-on-silicon microdisplays.

Company History

Historically, we have been a developmental stage company. As of January 1, 2003, we were no longer classified as a development stage company. We have transitioned to manufacturing our product and intend to significantly increase our marketing, sales, and research and development efforts, and expand our operating infrastructure. Currently, most of our operating expenses are fixed. If we are unable to generate significant revenues, our net losses in any given period could be greater than expected.

Critical Accounting Policies

The Securities and Exchange Commission ("SEC") defines "critical accounting policies" as those that require application of management's most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain and may change in subsequent periods. Not all of the accounting policies require management to make difficult, subjective or complex judgments or estimates. However, the following policies could be deemed to be critical within the SEC definition.

Revenue and Cost Recognition

Revenue on product sales is recognized when persuasive evidence of an arrangement exists, such as when a purchase order or contract is received from the customer, the price is fixed, title and risk of loss to the goods has changed and there is a reasonable assurance of collection of the sales proceeds. We obtain written purchase authorizations from our customers for a specified amount of product at a specified price and consider delivery to have occurred at the time of shipment. We record a reserve for estimated sales returns, which is reflected as a reduction of revenue at the time of revenue recognition. Products sold directly to consumers have a fifteen day right of return. Revenue on consumer products is deferred until the right of return has expired.

Revenues from research and development activities relating to firm fixed-price contracts are generally recognized on the percentage-of-completion method of accounting as costs are incurred (cost-to-cost basis). Revenues from research and development activities relating to cost-plus-fee contracts include costs incurred plus a portion of estimated fees or profits based on the relationship of costs incurred to total estimated costs. Contract costs include all direct material and labor costs and an allocation of allowable indirect costs as defined by each contract, as periodically adjusted to reflect revised agreed upon rates. These rates are subject to audit by the other party.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements as well as the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. These estimates and assumptions relate to recording net revenue, collectibility of accounts receivable, useful lives and impairment of tangible and intangible assets, accruals, income taxes, inventory realization and other factors. Management has exercised reasonable judgment in deriving these estimates. Consequently, a change in conditions could affect these estimates.

Fair Value of Financial Instruments

eMagin's cash, cash equivalents, accounts receivable, short-term investments, accounts payable and debt are stated at cost which approximates fair value due to the short-term nature of these instruments.

Stock-based Compensation

eMagin maintains several stock equity incentive plans. The 2005 Employee Stock Purchase Plan (the "ESPP") provides our employees with the opportunity to purchase common stock through payroll deductions. Employees purchase stock semi-annually at a price that is 85% of the fair market value at certain plan-defined dates. As of December 31, 2007, the number of shares of common stock available for issuance was 225,000. As of December 31, 2007, the plan had not been implemented.

The 2003 Stock Option Plan (the "2003 Plan") provides for grants of shares of common stock and options to purchase shares of common stock to employees, officers, directors and consultants. Under the 2003 plan, an ISO grant is granted at the market value of our common stock at the date of the grant and a non-ISO is granted at a price not to be less than 85% of the market value of the common stock. These options have a term of up to 10 years and vest over a schedule determined by the Board of Directors, generally over a five year period. The amended 2003 Plan provides for an annual increase of 3% of the diluted shares outstanding on January 1 of each year for a period of 9 years which commenced January 1, 2005.

Effective January 1, 2006, the Company adopted the provisions of SFAS No. 123R, "Share-Based Payment" ("SFAS 123R"), which requires the Company to recognize expense related to the fair value of the Company's share-based compensation issued to employees and directors. SFAS 123R requires companies to estimate the fair value of share-based payment awards on the date of grant using an option-pricing model. The value of the portion of the award that is ultimately expected to vest is recognized as expense over the requisite service periods in the Company's condensed consolidated statement of operations. The Company uses the straight-line method for recognizing compensation expense. An estimate for forfeitures is included in compensation expense for awards under SFAS 123R. See Note 11 to the financial statements for a further discussion on stock-based compensation.

Results of Operations

The following table presents certain financial data as a percentage of total revenue for the periods indicated. Our historical operating results are not necessarily indicative of the results for any future period.

Consolidated Statements of Operations Data:	As a Percentage of Total Revenue		
	2007	2006	2005
Revenue	100%	100%	100%
Cost of goods sold	72	139	273
Gross profit (loss)	28	(39)	(173)
Operating expenses:			
Research and development	17	54	107
Selling, general and administrative operating expenses	38	109	169
operating expenses	55	163	276
Loss from operations	(27)	(202)	(449)
Other (expense) income	(78)	15	8
Net loss	(105) %	(187) %	(441) %

Year Ended December 31, 2007 Compared to Year Ended December 31, 2006

Revenues

Revenues increased by approximately \$9.4 million to a total of approximately \$17.6 million for the year ended December 31, 2007 from approximately \$8.2 million for the year ended December 31, 2006, representing an increase of 115%. This increase was primarily due to increased microdisplay sales and increased availability of finished displays due to manufacturing improvements. Our contract revenue increased approximately \$1.2 million while our product revenue increased approximately \$8.2 million. Average price per unit for microdisplays was \$371 in 2007 and \$386 in 2006. Our current expectation is that revenue will continue to grow in 2008 if we successfully execute our business plan.

Cost of Goods Sold

Cost of goods sold includes direct and indirect costs associated with production of our products. Cost of goods sold for the years ended December 31, 2007 and 2006 was approximately \$12.6 million and \$11.4, respectively, an increase of \$1.3 million. The increase included an inventory write-off of approximately \$0.4 million and an increase in our warranty return reserve of approximately \$0.6 million, both related to a non-recurring production issue that occurred during the fourth quarter of 2007.

The gross profit was approximately \$4.9 million for the year ended December 31, 2007 and the gross loss was approximately (\$3.2) million for the year ended December 31, 2006. The gross margin was 28% for the year ended December 31, 2007 as compared to the gross loss of (39%) for the year ended December 31, 2006. The gross margin improvement was attributed to fuller utilization of our fixed production overhead due to higher unit production volume.

Research and Development Expenses

Research and development expenses include salaries, development materials and other costs specifically allocated to the development of new microdisplay products, OLED materials and subsystems. Research and development expenses for the year ended December 31, 2007 were approximately \$2.9 million as compared to approximately \$4.4 million for the year ended December 31, 2006. The decrease was due to the re-deployment of research and development personnel to production contract services which are included in cost of goods sold.

Selling, General and Administrative Expenses

Selling, general and administrative expenses consist primarily of salaries and fees for professional services, legal fees incurred in connection with patent filings, SEC and related matters, as well as other marketing and administrative expenses. General and administrative expenses decreased by approximately \$2.3 million to a total of approximately \$6.6 million for the year ended December 31, 2007 from \$8.9 million for the year ended December 31, 2006. The decrease was primarily related to a reduction of marketing, tradeshow and personnel costs.

Other (Expense) Income

Other (expense) income, net consists primarily of interest income earned on investments, interest expense related to the secured debt, loss from the change in the derivative liability, loss on the extinguishment of debt and other income from the licensing of intangible assets.

For the year ended December 31, 2007, interest expense was approximately \$3.1 million as compared to \$1.3 million for the year ended December 31, 2006. Interest expense for 2007 consisted of interest expense associated with debt of approximately \$744 thousand; the amortization of the deferred costs associated with debt of approximately \$418 thousand; and the amortization of the debt discount associated with the debt of approximately \$1.9 million. Interest expense for the year ended December 31, 2006 was comprised of interest associated with debt of approximately \$124 thousand; the amortization of the deferred costs associated with the notes payable of approximately \$221 thousand; and the amortization of the debt discount associated with the debt of approximately \$956 thousand.

For the year ended December 31, 2007, the change in the derivative liability was a loss of approximately \$853 thousand as compared to a gain of approximately \$2.4 million ended December 31, 2006.

The loss on extinguishment of debt was \$10.7 million for the year ended December 31, 2007 as compared to \$0 for the year ended December 31, 2006. See Note 8 to the financial statements: Debt for additional information.

Other income for the year ended December 31, 2007 was approximately \$815 thousand which consisted of interest income of approximately \$43 million, a gain on the license of intangible assets of \$869 thousand, offset by a write-off of a miscellaneous receivable of \$103 thousand, and other income of \$7 thousand as compared to \$91 thousand for the year ended December 31, 2006. See Note 12 to the financial statements: Commitments and Contingencies – Royalties for additional information.

Off-Balance Sheet Arrangements

We have no off balance sheet arrangements that are reasonably likely to have a current or future effect on our financial condition, revenues, results of operations, liquidity or capital expenditures.

Year Ended December 31, 2006 Compared to Year Ended December 31, 2005

Revenues

Revenues increased by approximately \$4.5 million to a total of approximately \$8.2 million for the year ended December 31, 2006 from approximately \$3.7 million for the year ended December 31, 2005, representing an increase of 118%. This increase was due to increased microdisplay demand and the broadening of our product revenue through the sales of the Z800 3D Visor. Our contract revenue increased approximately \$150 thousand while our product revenue increased approximately \$4.3 million. Average price per unit for microdisplays was \$386 in 2006 and \$372 in 2005.

Cost of Goods Sold

Cost of goods sold includes direct and indirect costs associated with production of our products. Cost of goods sold for the years ended December 31, 2006 and 2005 was approximately \$11.4 million and approximately \$10.2, respectively, an increase of \$1.2 million. The gross loss was approximately (\$3.2) million and approximately (\$6.5) million, respectively, for the years ended December 31, 2006 and 2005, respectively. The gross loss was (39%) for the year ended December 31, 2006 as compared to (173%) for the year ended December 31, 2005. The increase in cost of goods sold for the year ended December 31, 2006 was attributed to higher materials usage to support increased production as well as approximately \$343 thousand of stock compensation expense reflected in accordance with SFAS No. 123R in 2006. The decrease in gross loss was attributed to fuller utilization of our fixed production overhead due to higher unit volume.

Research and Development Expenses

Research and development expenses included salaries, development materials and other costs specifically allocated to the development of new microdisplay products, OLED materials and subsystems. Research and development expenses for the year ended December 31, 2006 were approximately \$4.4 million as compared to approximately \$4.0 million for the year ended December 31, 2005. The increase was primarily due to the stock-based compensation expense of approximately \$435 thousand in 2006.

Selling, General and Administrative Expenses

Selling, general and administrative expenses consist primarily of salaries and fees for professional services, legal fees incurred in connection with patent filings and related matters, as well as other marketing and administrative expenses. General and administrative expenses increased by approximately \$2.9 million to a total of approximately \$8.9 million for the year ended December 31, 2006 from \$6.3 million for the year ended December 31, 2005. The increase in selling, general and administrative expenses was due primarily to stock-based compensation expense of approximately \$2.9 million and an increase in marketing expenses related to our Z800 3DVisor.

Other Income (Expense)

Other income, net consists primarily of interest income earned on investments, interest expense related to the secured debentures, and gain from the change in the derivative liability. For the year ended December 31, 2006, interest income was approximately \$91 thousand as compared to approximately \$210 thousand for the year ended December 31, 2005. The decrease in interest income was primarily a result of lower cash balances available for investment. For the year ended December 31, 2006, interest expense was approximately \$1.3 million as compared to approximately \$4 thousand for the year ended December 31, 2005. The increase in the interest expense was a result of interest associated with our notes payable of approximately \$124 thousand, the amortization of the deferred costs associated with the notes payable of approximately \$221 thousand, and the amortization of the debt discount of approximately \$956 thousand. For the year ended December 31, 2006, income from the change in the derivative liability was approximately \$2.4 million as compared to \$0 for the year ended December 31, 2005.

Liquidity and Capital Resources

As of December 31, 2007, we had approximately \$0.8 million of cash and investments as compared to \$1.6 million as of December 31, 2006. The decrease of approximately \$0.8 million was due primarily to cash used for operating activities.

For the year ended December 31, 2007, net cash used by operating activities was approximately \$1.9 million, primarily attributable to our \$18.5 million net loss offset primarily by the non-cash expense components of loss on extinguishment of debt of \$10.7 million, stock based compensation of \$1.7 million, amortization of discount on notes payable of \$1.9 million, and issuance of common stock for services of \$1.3 million. Net cash used by operating activities for the year ended December 31, 2006 was approximately \$10.4 million, primarily attributable to our net loss of approximately \$15.3 million.

For the year ended December 31, 2007, net cash from investing activities was approximately \$61 thousand primarily related to the maturing of investments. Net cash used by investing activities for the year ended December 31, 2006 was approximately \$257 thousand primarily related to equipment purchases.

Net cash provided by financing activities for the year ended December 31, 2007 was approximately \$1.2 million and was comprised primarily of approximately \$1.6 million in proceeds from debt issuance and offset by payments on long-term debt and capitalized lease obligations of approximately \$63 thousand and deferred financing costs of approximately \$368 thousand. Net cash provided by financing activities during the year ended December 31, 2006 was approximately \$5.3 million and was comprised primarily of approximately \$6.0 million in proceeds from debt issuance offset by payments on long-term debt and capitalized lease obligations of approximately \$55 thousand and deferred financing costs of approximately \$591 thousand.

Our consolidated financial statements as of December 31, 2007 have been prepared under the assumption that we will continue as a going concern for the year ending December 31, 2008. Our independent registered public accounting firm has issued a report dated April 9, 2008 that included an explanatory paragraph expressing substantial doubt in our ability to continue as a going concern without additional capital becoming available. Our ability to continue as a going concern ultimately is dependent on our ability to generate a profit which is likely dependent upon our ability to obtain additional equity or debt financing, attain further operating efficiencies and, ultimately, to achieve profitable operations. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

As we have reported our business experienced significant revenue growth during the year ended December 31, 2007. This trend, if it continues, may result in higher accounts receivable levels and may require increased production and/or higher inventory levels. In addition, in December 2008, we will be obligated to repay approximately \$6.0 million to

the note holders. If the funds are not available, we will negotiate with the note holders to defer the payment but no assurances can be made that they will agree. We anticipate that our cash requirements to fund these requirements as well as other operating or investing cash requirements over the next twelve months will be greater than our current cash on hand. We anticipate that we will still require additional funds over the next twelve months. We do not currently have commitments for these funds and no assurance can be given that additional financing will be available, or if available, will be on acceptable terms. If we are unable to obtain sufficient funds during the next twelve months we will further reduce the size of our organization and may be forced to reduce and/or curtail our production and operations, all of which could have a material adverse impact on our business prospects.

In addition to the foregoing, as previously reported, we have retained CIBC World Markets Corporation and Larkspur Capital Corporation to assist us in investigating and evaluating various strategic alternatives, ranging from investment to acquisition.

Contractual Obligations

The following chart describes the outstanding contractual obligations of eMagin as of December 31, 2007 (in thousands):

	Total	Payments due by period		
		1 Year	2-3 Years	4-5 Years
Operating lease obligations	\$ 1,982	\$ 1,444	\$ 538	\$ —
Purchase obligations (a)	1,647	1,647	—	—
Other long-term liabilities (b)	7,119	6,597	272	250
Total	\$ 10,748	\$ 9,688	\$ 810	\$ 250

(a) The majority of purchase orders outstanding contain no cancellation fees except for minor re-stocking fees.

(b) This amount represents the obligation for Notes and estimated interest, royalty payments, capitalized software and the New York Urban Development settlement.

Effect of Recently Issued Accounting Pronouncements

See Note 3 of the Consolidated Financial Statements in Item 8 for a full description of recent accounting pronouncements, including the expected dates of adoption and estimated effects on results of operations and financial condition.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market rate risk

We are exposed to market risk related to changes in interest rates and foreign currency exchanges rates.

Interest rate risk

We hold our assets in cash and cash equivalents. We do not hold derivative financial instruments or equity securities.

Foreign currency exchange rate risk

Our revenue and expenses are denominated in U.S. dollars. We have conducted some transactions in foreign currencies and expect to continue to do so; we do not anticipate that foreign exchange gains or losses will be significant. We have not engaged in foreign currency hedging to date.

Our international business is subject to risks typical of international activity, including, but not limited to, differing economic conditions; change in political climates; differing tax structures; and other regulations and restrictions. Accordingly, our future results could be impacted by changes in these or other factors.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Stockholders
eMagin Corporation

We have audited the accompanying consolidated balance sheets of eMagin Corporation (the "Company") as of December 31, 2007 and 2006, and the related consolidated statements of operations, shareholders' equity (capital deficit) and cash flows for each of the three years in the period ended December 31, 2007. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. We were not engaged to perform an audit of the Company's internal control over financial reporting. Our audits include consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of eMagin Corporation as of December 31, 2007 and 2006, and the consolidated results of its operations and its consolidated cash flows for each of the three years in the period ended December 31, 2007 in conformity with accounting principles generally accepted in the United States of America.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 2 to the consolidated financial statements, the Company has had recurring losses from operations which it believes will continue, and has working capital and capital deficits at December 31, 2007. These factors raise substantial doubt about the Company's ability to continue as a going concern. Management's plans in regard to these matters are also discussed in Note 2. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

As discussed in Note 2 to the consolidated financial statements, the Company changed its method of accounting for stock-based compensation effective January 1, 2006.

During the year ended December 31, 2007, the Company

·Entered into an intellectual property agreement with Kodak where Kodak was assigned the rights to a specific patent and as part of the consideration waived the royalty payments for the first six months of 2007 and reduced the royalty payment to 50% for the third and fourth quarters of 2007. \$869 thousand was recorded as other income from the gain on the licensing of intangible assets;

·Entered into an amended Note Purchase Agreement with investors and issued warrants that are exercisable at \$1.03 per share into approximately 5.4 million shares of common stock valued at \$5.5 million.

See notes to Consolidated Financial Statements.

eMAGIN CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Note 1 - NATURE OF BUSINESS

eMagin Corporation and its wholly owned subsidiary (the “Company”) designs, develops, manufactures, and markets virtual imaging products for consumer, commercial, industrial and military applications. The Company’s products are sold mainly in North America, Asia, and Europe.

Note 2 - SIGNIFICANT ACCOUNTING POLICIES

Principles of consolidation

The accompanying audited consolidated financial statements include the accounts of eMagin Corporation and its wholly owned subsidiary. All intercompany transactions have been eliminated in consolidation.

Basis of presentation

The consolidated financial statements have been prepared assuming that the Company will continue as a going concern. The Company has had recurring losses from operations which it believes will continue for the foreseeable future. The Company’s cash requirements over the next twelve months are greater than the Company’s current cash, cash equivalents, and investments. At December 31, 2007, the Company has working capital and capital deficits. These factors raise substantial doubt regarding the Company’s ability to continue as a going concern without continuing to obtain additional funding. The Company does not have commitments for such financing and no assurance can be given that additional financing will be available, or if available, will be on acceptable terms. If the Company is unable to obtain sufficient funds during the next twelve months, the Company will further reduce the size of its organization and/or curtail operations which will have a material adverse impact on the Company’s business prospects. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty. To partially address the liquidity issue, the Company completed a private placement of its common stock for gross proceeds of \$1.65 million on April 2, 2008. Please see Note 17 – Subsequent Events for additional information.

On November 3, 2006, the Company effected a one-for-ten (1-for-10) reverse stock split of its issued and outstanding common stock. All common and per share amounts in the accompanying financial statements have been adjusted to reflect the 1-for-10 reverse stock split.

Use of estimates

In accordance with accounting principles generally accepted in the United States of America, management utilizes certain estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. On an on-going basis, management evaluates its estimates and judgments. Management bases its estimates and judgments on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results could differ from those estimates.

Revenue and cost recognition

Revenue is recognized when products are shipped to customers, net of allowances for anticipated returns. The Company’s revenue-earning activities generally involve delivering products and revenues are considered to be earned

when the Company has completed the process by which it is entitled to such revenues. Revenue is recognized when persuasive evidence of an arrangement exists, delivery has occurred, selling price is fixed or determinable and collection is reasonably assured. The Company defers revenue recognition on products sold directly to the consumer with a fifteen day right of return. Revenue is recognized upon the expiration of the right of return.

The Company also earns revenues from certain R&D activities under both firm fixed-price contracts and cost-type contracts, including some cost-plus-fee contracts. Revenues relating to firm fixed-price contracts are generally recognized on the percentage-of-completion method of accounting as costs are incurred (cost-to-cost basis). Revenues on cost-plus-fee contracts include costs incurred plus a portion of estimated fees or profits based on the relationship of costs incurred to total estimated costs. Contract costs include all direct material and labor costs and an allocation of allowable indirect costs as defined by each contract, as periodically adjusted to reflect revised agreed upon rates. These rates are subject to audit by the other party.

Research and development expenses

Research and development costs are expensed as incurred.

Cash and cash equivalents

All highly liquid instruments with an original maturity of three months or less at the date of purchase are considered to be cash equivalents.

Investments-held to maturity

Securities that the Company has the positive intent and ability to hold to maturity are classified as held-to-maturity and are carried at amortized cost on the accompanying balance sheet.

Accounts receivable

The majority of the Company's commercial accounts receivable is due from Original Equipment Manufacturers ("OEM's"). Credit is extended based on evaluation of a customer's financial condition and, generally, collateral is not required. Accounts receivable are payable in U.S. dollars, are due within 30-90 days and are stated at amounts due from customers net of an allowance for doubtful accounts. Any account outstanding longer than the contractual payment terms is considered past due.

Allowance for doubtful account

The allowance for doubtful accounts reflects an estimate of probable losses inherent in the accounts receivable balance. The allowance is determined based on a variety of factors, including the length of time receivables are past due, historical experience, the customer's current ability to pay its obligation, and the condition of the general economy and the industry as a whole. The Company will record a specific reserve for individual accounts when the Company becomes aware of a customer's inability to meet its financial obligations, such as in the case of bankruptcy filings or deterioration in the customer's operating results or financial position. If circumstances related to customers change, the Company would further adjust estimates of the recoverability of receivables.

Inventory

Inventory is stated at the lower of cost or market. Cost is determined using the first-in first-out method. Cost includes materials, labor, and manufacturing overhead related to the purchase and production of inventories. The Company regularly reviews inventory quantities on hand, future purchase commitments with the Company's suppliers, and the estimated utility of the inventory. If the Company review indicates a reduction in utility below carrying value, the inventory is reduced to a new cost basis.

Equipment, furniture and leasehold improvements

Equipment, furniture and leasehold improvements are stated at cost. Depreciation on equipment is calculated using the straight-line method of depreciation over its estimated useful life. Amortization of leasehold improvements is calculated by using the straight-line method over the shorter of their estimated useful lives or lease terms. Expenditures for maintenance and repairs are charged to expense as incurred.

In accordance with SFAS No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets," the Company performs impairment tests on its long-lived assets when circumstances indicate that their carrying amounts may not be

recoverable. If required, recoverability is tested by comparing the estimated future undiscounted cash flows of the asset or asset group to its carrying value. Impairment losses, if any, are recognized based on the excess of the assets' carrying amounts over their estimated fair values.

Intangible Assets

The Company's intangible assets consist of patents that are amortized over their estimated useful lives of fifteen years using the straight line method. Total intangible amortization expense was approximately \$4 thousand for each of the years ended December 31, 2007, 2006, and 2005, respectively.

Advertising

Costs related to advertising and promotion of products is charged to sales and marketing expense as incurred. Advertising expense for the years ended December 31, 2007, 2006, and 2005 was \$10 thousand, \$296 thousand, and \$108 thousand, respectively.

Income taxes

The Company accounts for income taxes in accordance with the provisions of Statement of Financial Accounting Standards No. 109, "Accounting for Income Taxes" ("SFAS No. 109"). SFAS No. 109 requires that the Company recognize deferred tax liabilities and assets for the expected future tax consequences of events that have been included in the financial statements or tax returns. Under this method, deferred tax liabilities and assets are determined on the basis of the difference between the tax basis of assets and liabilities and their respective financial reporting amounts ("temporary differences") at enacted tax rates in effect for the years in which the temporary differences are expected to reverse. The Company records an estimated valuation allowance on its deferred income tax assets if it is more likely than not that these deferred income tax assets will not be realized.

Loss per common share

In accordance with SFAS No. 128, "Basic Earnings Per Share", net loss per common share amounts ("basic EPS") is computed by dividing net loss by the weighted average number of common shares outstanding and excluding any potential dilution. Net loss per common share amounts assuming dilution ("diluted EPS") reflects the potential dilution from the exercise of stock options and warrants. These common equivalent shares have been excluded from the computation of diluted EPS for all periods presented as their effect is antidilutive. The years ended December 31, 2007, 2006, and 2005 do not include options and warrants to purchase common equivalent shares of 9,234,832, 4,613,919, and 4,424,988, respectively, as their effect would be antidilutive.

Comprehensive income (loss)

SFAS No. 130, "Reporting Comprehensive Income", requires companies to report all changes in equity during a period, except those resulting from investment by owners and distributions to owners, for the period in which they are recognized. Comprehensive income (loss) is the total of net income (loss) and other comprehensive income (loss) items, such as unrealized gains or losses on foreign currency translation adjustments. Comprehensive income (loss) must be reported on the face of the annual financial statements. The Company's operations did not give rise to any material items includable in comprehensive income (loss), which were not already in net loss for the years ended December 31, 2007, 2006, and 2005. Accordingly, the Company's comprehensive loss is the same as its net income (loss) for the periods presented.

Stock-based compensation

On January 1, 2006, the Company adopted the provisions of SFAS No. 123R, "Share-Based Payment", which requires the Company to recognize expense related to the fair value of the Company's share-based compensation issued to employees and directors. Prior to January 1, 2006, the Company accounted for share-based compensation under the recognition and measurement provisions of APB No. 25 and related interpretations, as permitted by SFAS No. 123. We adopted SFAS No. 123R using the modified prospective transition method. Accordingly, periods prior to adoption have not been restated. Compensation cost recognized for the twelve months ended December 31, 2007 and 2006 includes a) compensation cost for all share-based compensation granted prior to, but not vested as of January 1, 2006, based on the grant-date fair value estimated in accordance with the original provisions of SFAS No. 123 and b) compensation cost for all share-based compensation granted beginning January 1, 2006, based on the grant-date fair value estimated in accordance with the provisions of SFAS No. 123R. The compensation cost was recognized using the straight-line attribution method. See Note 11 for a further discussion on stock-based compensation.

Fair value of financial instruments

At December 31, 2007, the Company's cash, cash equivalents, accounts receivable, short-term investments, accounts payable and debt are shown at cost which approximates fair value due to the short-term nature of these instruments.

Concentration of Credit Risk

Financial instruments which potentially subject the Company to concentrations of credit risk consist of cash and cash equivalents. The Company's cash and cash equivalents are deposited with financial institutions which, at times, may exceed federally insured limits. To date, the Company has not experienced any loss associated with this risk.

Note 3- RECENTLY ISSUED ACCOUNTING STANDARDS

In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurements" (SFAS 157"). SFAS 157 provides guidance for using fair value to measure assets and liabilities. It also responds to investors' requests for expanded information about the extent to which companies measure assets and liabilities at fair value, the information used to measure fair value, and the effect of fair value measurements on earnings. SFAS 157 applies whenever other standards require (or permit) assets or liabilities to be measured at fair value, and does not expand the use of fair value in any new circumstances. SFAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007. SFAS 157 is effective for the Company on January 1, 2008 and is not expected to have a material impact on its consolidated results of operations and financial condition.

In February 2007, the FASB issued Statement No. 159, “The Fair Value Option for Financial Assets and Financial Liabilities: (“SFAS159”). SFAS159 allows entities the option to measure eligible financial instruments at fair value as of specified dates. Such election, which may be applied on an instrument by instrument basis, is typically irrevocable once elected. SFAS 159 is effective for fiscal years beginning after November 15, 2007, and early application is allowed under certain circumstances. SFAS 159 is effective for the Company on January 1, 2008 and is not expected to have a material impact on its consolidated results of operations and financial condition.

In June 2007, the FASB ratified EITF No. 07-03, “Accounting for Nonrefundable Advance Payments for Goods or Services Received for Future Research and Development Activities (“EITF 07-03”). EITF 07-03 requires that nonrefundable advance payments for goods or services that will be used or rendered for future research and development activities be deferred and capitalized and recognized as an expense as the goods are delivered or the related services are performed. EITF 07-03 is effective, on a prospective basis, for fiscal years beginning after December 15, 2007. The Company will be required to adopt EITF 07-03 in the first quarter of 2008. The Company does not expect the adoption of EITF 07-03 to have a material effect on its operations or financial position.

Note 4- RECEIVABLES

Receivables consisted of the following (in thousands):

	December 31,	
	2007	2006
Trade receivables	\$ 2,741	\$ 1,351
Less allowance for doubtful accounts	(358)	(443)
Net receivables	\$ 2,383	\$ 908

Note 5 - INVENTORY

The components of inventories were as follows (in thousands):

	December 31,	
	2007	2006
Raw materials	\$ 1,069	\$ 1,146
Work in process	370	558
Finished goods	376	781
Total inventory	\$ 1,815	\$ 2,485

Note 6 – PREPAID EXPENSES AND OTHER CURRENT ASSETS

Prepaid expenses and other current assets consist of the following (in thousands):

	December 31,	
	2007	2006
Vendor prepayments	\$ 537	\$ 294
Other prepaid expenses*	310	353
Other current assets	3	9
Total prepaid expenses and other current assets	\$ 850	\$ 656

*No individual amounts greater than 5% of current assets.

Note 7 – EQUIPMENT, FURNITURE AND LEASEHOLD IMPROVEMENTS

Equipment, furniture and leasehold improvements consist of the following (in thousands):

	December 31,	
	2007	2006
Computer hardware and software	\$ 1,025	\$ 1,017
Lab and factory equipment	3,318	3,312
Furniture, fixtures, and office equipment	306	306
Assets under capital leases	66	66
Leasehold improvements	473	473
Total equipment, furniture and leasehold improvements	5,188	5,174
Less: accumulated depreciation	(4,896)	(4,508)
Equipment, furniture and leasehold improvements, net	\$ 292	\$ 666

Depreciation expense was \$388 thousand, \$837 thousand, and \$904 thousand for the years ended December 31, 2007, 2006, and 2005, respectively. Assets under capital leases are fully amortized.

Note 8 - DEBT

Debt is as follows (in thousands):

	December 31,	
	2007	2006
Current portion of long-term debt:		
Capitalized lease obligations	\$ —	\$ 6
Other debt	44	58
Line of credit	1,108	—
6% Senior Secured Convertible Notes	—	2,880
Less: Unamortized discount on notes payable	—	(1,721)
8% Amended Senior Secured Convertible Notes	5,962	—
Less: Unamortized discount on notes payable	(25)	—
Current portion of long-term debt, net	7,089	1,223
Long-term debt:		
Other debt	60	104
6% Senior Secured Convertible Notes	—	2,890
Less: Unamortized discount on notes payable	—	(765)
Long-term debt, net	60	2,229
Total debt, net	\$ 7,149	\$ 3,452

Maturities with respect to the other debt, line of credit and the 8% Amended Senior Secured Convertible Notes as of December 31, 2007 are as follows (in thousands):

Years Ending December 31,

2008	\$ 7,089
2009	60

On July 23, 2007, an investor elected to convert approximately \$252 thousand of the 6% Senior Secured Convertible Note ("Original Note") representing \$250 thousand of the principal amount of the Note due on July 23, 2007 and approximately \$2 thousand of accrued and unpaid interest. The investor received 720,476 shares of Common Stock at the conversion price of \$0.35.

On July 23, 2007, the Company entered into Amended Agreements with the note holders of the Original Notes issued July 21, 2006 and March 28, 2007 and agreed to issue each holder an 8% Amended Senior Secured Convertible Note ("Amended Note") in the principal amount equal to the principal amount outstanding as of July 23, 2007 which was in total approximately \$6.0 million. The significant changes to the Amended Notes include the following:

- The due dates have been changed from July 23, 2007 and January 21, 2008 to December 21, 2008;
 - The annual interest has been changed from 6% to 8%;
- The Amended Notes are convertible into 8,407,612 shares of the Company's common stock. The conversion price for \$5.8 million of principal is at a conversion price of \$0.75, originally \$2.60 and the conversion price for \$250,000 of principal remains the same at \$0.35;

- The Agreement adjusts the exercise price of the amended Warrants from \$3.60 to \$1.03 per share for 1,553,468 shares of common stock and requires the issuance of warrants for an additional 3,831,859 shares of common stock at \$1.03 per share with an expiration date of July 21, 2011. The warrants are subject to anti-dilution adjustment rights;
- 50% of the Amended Notes can be converted into the Company's newly designated Series A Senior Secured Convertible Preferred Stock which is convertible into common stock at the same rate as the Amended Notes;
- The liquidated damages of 1% per month will no longer accrue and the deferred balance at July 23, 2007 is forgiven; and
 - There is no minimum cash or cash equivalents balance requirement.

Under the guidance of EITF 96-19, "Debtor's Accounting for a Modification or Exchange of Debt Instruments", the Company determined the change in the present value of the expected cash flows between the Amended Notes and the Original Notes issued July 21, 2006 was greater than 10%; therefore (a) for financial reporting purposes, the modifications to the Original Notes issued July 21, 2006 were treated as an extinguishment of debt and (b) on July 23, 2007, the Company recorded a loss on extinguishment of debt of approximately \$10.7 million reflecting the difference between (i) the recorded amount of debt, net of related discounts, of approximately \$4.8 million and (ii) the fair value of the new debt instrument of approximately \$10.7 plus the change in the fair value of the warrants on July 23, 2007, the date of the modification, of approximately \$4.7 million. The Company has also recorded a beneficial conversion charge of approximately \$5.1 million on the Amended Notes adjusting the Amended Notes to their face value of approximately \$5.8 million. The Original Note issued on March 28, 2007 and amended on July 23, 2007 was not treated as an extinguishment but a modification.

On August 16, 2007, an investor elected to convert approximately \$58 thousand of the Amended Note. The investor received 76,923 shares of Common Stock at the conversion price of \$0.75.

On August 7, 2007, the Company entered into a loan agreement with Moriah Capital, L.P. ("Moriah") and established a revolving line of credit (the "Loan") of \$2.5 million. The Company is permitted to borrow an amount not to exceed 90% of its eligible accounts receivable and 50% of its eligible inventory capped at \$600 thousand. As part of the transaction, the Company issued 162,500 shares of unregistered common stock valued at \$195 thousand and paid a servicing fee of \$82,500 to Moriah which will be amortized to interest expense over the life of the agreement. For the year ended December 31, 2007, approximately \$93 thousand was amortized to interest expense. In conjunction with entering into this loan and issuing unregistered common stock, the Company granted Moriah registration rights. The Loan can be converted into shares of the Company's common stock pursuant to the terms of the Loan Conversion agreement. The Loan matures on August 8, 2008 however the Company has the option of extending it an additional year. On January 30 and on March 25, 2008, the loan agreement was amended. Please see Note 17 - Subsequent Events for additional information.

For the year ended December 31, 2007, interest expense consisted of interest paid or accrued on outstanding debt of \$836 thousand.

Note 9 - INCOME TAXES

The difference between the statutory federal income tax rate on the Company's pre-tax income and the Company's effective income tax rate is summarized as follows:

	For the years ended December 31,		
	2007	2006	2005
U.S. Federal income tax provision (benefit) at federal statutory rate	(34)%	(34)%	(35)%
Change in valuation allowance	2%	32%	35%

Edgar Filing: EMAGIN CORP - Form 10-K

Permanent difference	32%	2%	—
	0%	0%	0%

The tax effects of significant items comprising the Company's deferred taxes as of December 31 are as follows (numbers are in thousands):

	For the years ended December 31,		
	2007	2006	2005
Federal and state net operating loss carry-forwards	\$ 42,266	\$ 41,554	\$ 37,159
Research and development carry-forwards	1,397	—	—
Other provision and expenses not currently deductible	1,746	520	216
Total deferred tax assets	45,409	42,074	37,375
Less valuation allowance	(45,409)	(42,074)	(37,375)
Net deferred tax asset	\$ 0	\$ 0	\$ 0

As of December 31, 2007, eMagin has federal and state net operating loss carryforwards of approximately \$150 million and \$1.4 million that will be available to offset future taxable income, if any, through December 2027. The utilization of net operating losses is subject to a limitation due to the change of ownership provisions under Section 382 of the Internal Revenue Code and similar state provisions. Such limitation may result in the expiration of the net operating losses before their utilization. The Company has done preliminary analysis regarding prior year ownership changes, and although more analysis needs to be done, we have tentatively determined that the Section 382 limitation on the utilization of net operating losses is not material.

As of December 31, 2007 and 2006, the Company has net deferred tax assets of approximately of \$45 and \$42 million, respectively, primarily resulting from the future tax benefit of net operating loss carryforwards. Such net deferred tax assets are fully offset by a valuation allowance due to the uncertainty as to their realizability. A valuation allowance has been established to reserve for the deferred tax assets arising from the net operating losses and other temporary differences due to the uncertainty that their benefit will be realized in the future. The valuation allowance increased approximately \$3.3 million for the year ended December 31, 2007 and \$4.7 million for the year ended December 31, 2006.

The Company adopted the provisions of FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes, on January 1, 2007. The Company did not have unrecognized tax benefits which would require an adjustment to the January 1, 2007 beginning balance of retained earnings. The Company did not have any unrecognized tax benefits at January 1, 2007 and December 31, 2007.

The Company recognizes interest accrued and penalties related to unrecognized tax benefits in tax expense. During the years ended December 31, 2007 and 2006 the Company recognized no interest and penalties.

The Company files income tax returns in the U.S. federal jurisdiction and New York. The tax years 2004-2006 remain open to examination by major taxing jurisdictions to which the Company is subject.

Note 10 - SHAREHOLDERS' EQUITY

Preferred Stock

2007

The Company has designated but not issued 3,198 shares of the Company's preferred stock as Series A Senior Secured Convertible Preferred Stock ("the Preferred Stock") at a stated value of \$1,000 per share. The Preferred Stock is entitled to cumulative dividends which accrue at a rate of 8% per annum, payable on December 21, 2008. Each share of the Preferred Stock has voting rights equal to (1) in any case in which the Preferred Stock votes together with the Company's Common Stock or any other class or series of stock of the Company, the number of shares of Common Stock issuable upon conversion of such shares of Preferred Stock at such time (determined without regard to the shares of Common Stock so issuable upon such conversion in respect of accrued and unpaid dividends on such share of Preferred Stock) and (2) in any case not covered by the immediately preceding clause one vote per share of Preferred Stock. The Preferred Stock has a mandatory redemption at December 21, 2008.

Common Stock

2007

On August 16, 2007, an investor elected to convert approximately \$58 thousand of the Amended Note. The investor received 76,923 shares of Common Stock at the conversion price of \$0.75.

On August 7, 2007, the Company entered into a loan agreement with Moriah Capital, L.P. ("Moriah") and established a revolving line of credit (the "Loan") of \$2.5 million. As part of the transaction, the Company issued 162,500 shares of unregistered common stock valued at \$195 thousand, recognized as deferred financing costs, and paid a servicing fee of \$82,500 to Moriah which will be amortized to interest expense over the life of the agreement. For the year ended December 31, 2007 approximately \$116 thousand was amortized to interest expense. In conjunction with entering into this loan and issuing unregistered common stock, the Company granted Moriah registration rights. The Loan can be converted to shares of the Company's common stock pursuant to the terms of the Loan Conversion agreement. The Loan matures on August 8, 2008 however the Company has the option of extending it an additional year. On January

30, and March 25, 2008, the loan agreement was amended. Please see Note 17 - Subsequent Events for additional information.

A registration rights agreement was entered into in connection with the Loan which requires the Company to file a registration statement for the resale of the common stock issued. The Company must use its best efforts to have the registration statement declared effective by the end of a specified grace period and also maintain the effectiveness of the registration statement until all shares of common stock have been sold or may be sold without volume restrictions pursuant to Rule 144(k) of the Securities Act. Please see Note 17 – Subsequent Events for additional information.

On July 23, 2007, the Company entered into Agreements with the note holders and agreed to issue each holder an Amended Note in the principal amount equal to the principal amount outstanding as of July 23, 2007 which was in total approximately \$6.0 million. The Amended Notes are convertible into 8,407,612 shares of the Company's common stock. The conversion price for \$5.8 million of principal is at a conversion price of \$0.75 and the conversion price for \$250 thousand of principal remains the same at \$0.35. The Agreement adjusts the exercise price of the amended Warrants from \$3.60 to \$1.03 per share for 1,553,468 shares of common stock and requires the issuance of warrants for an additional 3,831,859 shares of common stock at \$1.03 per share with an expiration date of July 21, 2011. The warrants are subject to anti-dilution adjustment rights. 50% of the Amended Notes can be converted into the Company's newly designated Series A Senior Secured Convertible Preferred Stock which is convertible into common stock at the same rate as the Amended Notes.

The Company had recorded the fair value of the warrants associated with the Note as a liability as the warrant agreement required a potential net-cash settlement in the first year of the warrant agreement if the registration statement is not effective as required by EITF 00-19 "Accounting for Derivative Financial Instruments Indexed to and Potentially Settled in, a Company's Own Stock" ("EITF 00-19"). The liability was adjusted to fair value at each reporting period. As of July 23, 2007, the potential net-cash settlement had expired. As a result, the fair value of the warrant liability on July 23, 2007, approximately \$2.7 million, was reversed. For the year ended December 31, 2007, the Company recorded losses of approximately \$0.8 million from the change in the fair value of the warrant derivative liability. The change in the fair value of the warrant liability was recorded in the Consolidated Statement of Operations as other income (expense).

On July 23, 2007, an investor converted \$250 thousand of the principal amount of the Original Note due on July 23, 2007 and approximately \$2 thousand of accrued and unpaid interest totaling \$252 thousand and received 720,476 shares of Common Stock at the conversion price of \$0.35. On August 16, 2007, an investor elected to convert approximately \$58 thousand of the Amended Note. The investor received 76,923 shares of Common Stock at the conversion price of \$0.75.

On March 28, 2007, the Company entered into a Note Purchase Agreement for the sale of \$500 thousand of 6% senior secured convertible debentures (the "Note") and warrants to purchase approximately 1,000,000 shares of common stock, par value \$.001 per share. The investor purchased the Note with a conversion price of \$0.35 per share that may convert into approximately 1,400,000 shares of common stock and issued warrants exercisable at \$0.48 per share for approximately 1,000,000 shares of common stock expiring in July 2011. On April 9, 2007, the Company closed the transaction and received approximately \$460 thousand, net of offering costs of approximately \$40 thousand, which are amortized over the life of the Note. The Note was amended on July 23, 2007 as described in Note 8: Debt.

As a result of the issuance of the Note, the outstanding 116,573 Series A Common Stock Purchase Warrants, that were issued to certain accredited and/or institutional investors pursuant to the Securities Purchase Agreement dated January 9, 2004, were re-priced from \$2.60 to \$0.35 and the outstanding 650,000 Series F Common Stock Purchase Warrants, that were issued to certain accredited and/or institutional investors pursuant to the Securities Purchase Agreement dated October 25, 2004, were re-priced from \$8.60 to \$7.12. As a result of the issuance of the Amended Notes the outstanding 650,000 Series F Common Stock Purchase Warrants that were issued to certain accredited and/or institutional investors pursuant to the Securities Purchase Agreement dated October 25, 2004, were re-priced from \$7.12 to \$4.39 in accordance with the anti-dilution provision of the original agreement. These warrants were further re-priced in connection with the loan agreement with Moriah from \$4.39 to \$4.09. The repricing of the warrants has no effect on the financial statements.

For the year ended December 31, 2007, there were no stock options exercised and the Company received approximately \$3 thousand in proceeds for warrants exercised. For the year ended December 31, 2007, the Company also issued approximately 1.5 million shares of common stock for payment of approximately \$1.3 million for services rendered and to be rendered in the future. As such, the Company recorded the fair value of the services rendered in prepaid expenses and selling, general and administrative expenses in the accompanying consolidated statement of operations for the year ended December 31, 2007.

2006

At the Company's 2006 Annual Meeting of Shareholders held on October 20, 2006, the Company's shareholders approved an amendment to the Company's certificate of incorporation to effect a reverse stock split of the issued and outstanding common stock on a ratio of 1-for-10. On November 3, 2006, the reverse stock split became effective. The Company has adjusted its shareholders' equity accounts by reducing its stated capital and increasing its additional paid-in capital by approximately \$91 thousand as of December 31, 2006 and 2005 to reflect the reduction in outstanding shares as a result of the reverse stock split.

On July 21, 2006, the Company entered into several Note Purchase Agreements for the sale of approximately \$5.99 million of senior secured debentures (the "Notes") and warrants to purchase approximately 1.8 million shares of common stock, par value \$.001 per share. The investors purchased \$5.99 million principal amount of Notes with conversion prices of \$2.60 per share that may convert into approximately 2.3 million shares of common stock and 5 year warrants exercisable at \$3.60 per share into approximately 1.6 million shares of common stock. If the Notes are not converted, 50% of the principal amount will be due on July 23, 2007 and the remaining 50% will be due on January 21, 2008. Commencing September 1, 2006, 6% interest is payable in quarterly installments on outstanding notes. For the year ended December 31, 2006, the Company paid approximately \$124 thousand of interest to investors. The Company received approximately \$5.4 million, net of deferred financing costs of approximately \$0.6 million which are amortized over the life of the Notes. The Company amortized approximately \$221 thousand of deferred financing costs in 2006. For the year ended December 31, 2006, two note holders converted their promissory notes valued at approximately \$220 thousand and were issued an aggregate of approximately 85,000 shares.

Under EITF 00-19 “Accounting for Derivative Financial Instruments Indexed to and Potentially Settled in, a Company’s Own Stock”, the fair value of the warrants, \$3.6 million, have been recorded as a liability since the warrant agreement requires a potential net-cash settlement in the first year of the warrant agreement if the registration statement is not effective. As of December 31, 2006, the registration statement is effective. The liability will be adjusted to fair value at each reporting period. The change in the fair value of the warrants will be recorded in the Consolidated Statement of Operations as other income (expense). For the twelve months ended December 31, 2006, the Company recorded approximately \$2.4 million of gain from the change in the fair value of the derivative liability.

An additional \$0.5 million was to be invested through the exercise of a warrant to purchase approximately 192,000 shares of common stock at \$2.60 per share on or prior to December 14, 2006, or at the election of the Company, by the purchase of additional Notes and warrants. The Company determined the relative fair value of the warrants to be approximately \$157,000 which was recorded as an other asset. The following assumptions were used to determine the fair value of the warrant:

Dividend yield	0%
Risk free interest rates	5.25%
Expected volatility	122%
Expected term (in years)	0.4 years

The investor elected not to exercise its warrants prior to December 14, 2006. The fair value of the warrants which was recorded as an other asset was written off as a sales, general and administrative expense.

In connection with the Notes, a registration rights agreement was entered into which requires the Company to file a registration statement for the resale of the common stock underlying the Notes and the warrants. The Company must use its best efforts to have the registration statement declared effective by the end of a specified grace period and also maintain the effectiveness of the registration statement until all shares of common stock underlying the Notes and the warrants have been sold or may be sold without volume restrictions pursuant to Rule 144(k) of the Securities Act. If the Company fails to have the registration statement declared effective within the grace period or fails to maintain the effectiveness as set forth in the preceding sentence, the Company is required to pay each investor cash payments equal to 1.0% of the aggregate purchase price monthly until the failure is cured. If the Company fails to pay the liquidated damages, interest at 16.0% will accrue until the liquidated damages are paid in full. The registration statement was filed and declared effective by the Securities and Exchange Commission within the specified grace period.

The Company accounts for the registration rights agreement as a separate freestanding instrument and accounts for the liquidated damages provision as a derivative liability subject to SFAS 133. The estimated fair value of the derivative liability is based on an estimate of the probability and costs of cash penalties being incurred. The Company determined that the fair value of the liability was immaterial and it is not recorded in accrued liabilities. The Company will revalue the potential liability at each balance sheet date.

As a result of the issuance of the Notes, the outstanding 116,576 Series A Common Stock Purchase Warrants, that were issued to certain accredited and/or institutional investors pursuant to the Securities Purchase Agreement dated January 9, 2004, were re-priced from \$5.50 to \$2.60 and the outstanding 650,001 Series F Common Stock Purchase Warrants, that were issued to certain accredited and/or institutional investors pursuant to the Securities Purchase Agreement dated October 25, 2004, were re-priced from \$10.90 to \$8.60.

For the year ended December 31, 2006, the Company received approximately \$10 thousand for the exercise of 5,000 options and there were no warrants exercised. For year ended December 31, 2006, the Company issued approximately 254,000 shares of common stock in lieu of cash payments in the amount of approximately \$580 thousand as

compensation for services rendered and to be rendered in the future. The fair value of the services was measured at market value of the common stock at the time of payment. As such, the Company recorded the fair value of the services rendered in selling, general and administrative expenses in the accompanying audited consolidated statement of operations for the year ended December 31, 2006.

The 2004 Non-Employee Compensation Plan (the "2004 Plan") was established to help the Company retain consultants, professionals and service providers. The Board of Directors will select the recipient of the awards, the nature of the awards and the amount. At the 2006 Annual Shareholder meeting, the shareholders approved an increase in the number of authorized shares of common stock usable from 200,000 to 950,000. This number is subject to adjustment in the event of a recapitalization, reorganization or similar event.

2005

On October 20, 2005, the Company entered into a Securities Purchase Agreement, pursuant to which the Company sold and issued 1,661,906 shares of common stock, par value \$0.001 per share, at a price of \$5.50 per share and warrants to purchase up to 997,143 shares of common stock for an aggregate purchase price of approximately \$9.14 million. The net proceeds received after expenses were approximately \$8.4 million.

The warrants are exercisable at a price of \$10.00 per share and expire on April 20, 2011. Of the 997,143 warrants, 664,763 of the warrants are exercisable on or after May 20, 2006. The remaining 332,381 are exercisable after March 31, 2007, however these warrants will be cancelled if the Company's net revenue for fiscal year 2006 exceeds \$20 million or if the investor has sold more than 25% of the shares purchased under the securities purchase agreement prior to December 31, 2006.

45

As a result of the above transaction, the outstanding 121,335 Series A Common Stock Purchase Warrants, that were issued to participants of the Securities Purchase Agreement dated January 9, 2004, were re-priced from \$10.50 to \$5.50 and the outstanding 650,001 Series F Common Stock Purchase Warrants, that were issued to participants of the Securities Purchase Agreement dated October 25, 2004, were re-priced from \$12.10 to \$10.90.

A registration rights agreement was entered into in connection with the private placement which requires the Company to file a registration statement for the resale of the common stock and the shares underlying the warrants. The Company must use its best efforts to have the registration statement declared effective by the end of a specified grace period and also maintain the effectiveness of the registration statement until all common stock have been sold or may be sold without volume restrictions pursuant to Rule 144(k) of the Securities Act. If the Company fails to have the registration statement declared effective within the grace period or fails to maintain the effectiveness, the agreement requires the Company to pay each investor cash payments equal to 2.0% of the aggregate purchase price monthly until the failure is cured. If the Company fails to pay the liquidated damages, interest at 15.0% will accrue until the liquidated damages are paid in full. The registration statement was filed and declared effective within the specified grace period. As of December 31, 2006, the registration statement remains effective.

The Company accounts for the registration rights agreement as a separate freestanding instrument and accounts for the liquidated damages provision as a derivative liability subject to SFAS 133. The estimated fair value of the liability is based on an estimate of the probability and costs of cash penalties being incurred. The Company determined that the fair value of the liability was immaterial and it is not recorded in accrued liabilities. The Company will revalue the potential liability at each balance sheet date.

In 2005, the Company received approximately \$1.6 million for the exercise of approximately 11,100 options and 306,000 warrants. The Company also issued approximately 54,300 shares of common stock for the payment of \$461 thousand of services rendered and to be rendered in the future. The fair value of the services was measured at market value of the common stock at the time of payment. As such, the Company recorded the fair value of the services rendered in selling, general and administrative expenses in the accompanying audited consolidated statement of operations for the year ended December 31, 2005.

Note 11 - STOCK COMPENSATION

Employee stock purchase plan

In 2005, the stockholders approved the 2005 Employee Stock Purchase Plan ("ESPP"). The ESPP provides the Company's employees with the opportunity to purchase common stock through payroll deductions. Employees purchase stock semi-annually at a price that is 85% of the fair market value at certain plan-defined dates. At December 31, 2006, the number of shares of common stock available for issuance was 225,000 and the plan will automatically increase 75,000 shares on January 1 of each year for a period of three years starting January 1, 2006. As of December 31, 2007, the plan had not been implemented.

Incentive compensation plans

In 2000, the Company established the 2000 Stock Option Plan (the "2000 Plan"). The Plan permits the granting of options and stock purchase rights to employees and consultants of the Company. The 2000 Plan allows for the grant of incentive stock options meeting the requirements of Section 422 of the Internal Revenue Code of 1986 (the "Code") or non-qualified stock options which are not intended to meet such requirements.

In 2003, the Company established the 2003 Stock Option Plan (the "2003 Plan"). The 2003 Plan provided for the granting of options to purchase an aggregate of 9,200,000 shares of the common stock to employees and consultants. On July 2, 2003, the shareholders approved the plan and the 2003 Plan was subsequently amended by the Board of

Directors on July 2, 2003 to reduce the number of additional shares that may be provided for issuance under the "evergreen" provisions of the 2003 Plan. The amended 2003 Plan provides for an increase of 2,000,000 shares in January 2004 and an annual increase on January 1 of each year for a period of nine (9) years commencing on January 1, 2005 of 3% of the diluted shares outstanding. The shareholders approved an amendment to the 2003 Plan to provide grants of shares of common stock in addition to options to purchase shares of common stock. In 2005, approximately 2.4 million shares were added to the plan.

On February 20, 2008, the Board of Directors authorized the establishment of the 2007 Incentive Stock Plan. Please see Note 17 - Subsequent events for addition information.

Vesting terms of the options range from immediate vesting to a ratable vesting period of 5 years. Option activity for the years ended December 31, 2007, 2006 and 2005 is summarized as follows:

	Number of Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (In Years)	Aggregate Intrinsic Value
Balances at December 31, 2004	1,355,916	\$ 11.40		
Options granted	582,400	9.60		
Options exercised	(11,059)	3.40		
Options cancelled	(121,993)	13.90		
Balances at December 31, 2005	1,805,264	10.90		
Options granted	185,744	4.30		
Options exercised	(5,000)	2.10		
Options forfeited	(453,115)	7.47		
Options cancelled	(467,148)	11.97		
Balances at December 31, 2006	1,065,745	2.94		
Options granted	228,577	1.41		
Options exercised	—	—		
Options forfeited	(203,943)	2.90		
Options cancelled	(196,056)	2.67		
Balances at December 31, 2007	894,323	\$ 2.62	5.36	\$6,524
Vested or expected to vest at December 31, 2007 (1)	877,408	\$ 2.67	5.36	\$—
Exercisable at December 31, 2007	682,883	\$ 2.57	5.53	\$—

(1) The expected to vest options are the result of applying the pre-vesting forfeiture rate assumptions to total unvested options.

At December 31, 2007, there were 813,185 shares available for grant under the 2003 Plan and the 2000 Plan.

The following table summarizes information about stock options outstanding at December 31, 2007:

	Options Outstanding			Options Exercisable	
	Number Outstanding	Weighted Average Remaining Contractual Life (In Years)	Weighted Average Exercise Price	Number Exercisable	Weighted Average Exercisable Price
\$1.00 - \$1.51	228,577	9.60	\$ 1.41	205,277	\$ 1.46
\$2.60 - \$2.70	624,546	3.91	2.61	445,506	2.60
\$3.50 - \$5.80	12,000	4.68	5.61	12,000	5.61
\$6.60 - \$22.50	29,200	3.57	10.91	20,100	11.23
	894,323	5.36	\$ 2.62	682,883	\$ 2.57

(1) The expected to vest options are the result of applying the pre-vesting forfeiture rate assumptions to total outstanding options.

The aggregate intrinsic value in the table above represents the difference between the exercise price of the underlying options and the quoted price of the Company's common stock for the options that were in-the-money. As of December 31, 2007 there were 23,300 options that were in-the-money. The Company's closing stock price was \$1.28 as of December 31, 2007. The Company issues new shares of common stock upon exercise of stock options.

On July 21, 2006, certain employees and Directors of the Company agreed to cancel approximately 467,000 shares underlying existing stock options in return for the re-pricing of approximately 869,000 existing options at \$2.60 per share having a weighted average original exercise price of \$11.97. Option grants that have not been re-priced remain unchanged. The unvested options which were re-priced continue to vest on original vesting schedules, but in no event vest prior to January 19, 2007. Previously vested options which were re-priced were fully vested on January 19, 2007. Re-priced grants will be forfeited if the individual leaves voluntarily. The Company has accounted for the re-pricing and cancellation transactions as a modification under SFAS No. 123R.

Stock based compensation

On January 1, 2006, the Company adopted the provisions of SFAS No. 123R, which requires the Company to recognize expense related to the fair value of the Company's share-based compensation issued to employees and directors. Prior to January 1, 2006, the Company accounted for share-based compensation under the recognition and measurement provisions of APB No. 25 and related interpretations, as permitted by SFAS No. 123. The Company adopted SFAS No. 123R using the modified prospective transition method. Accordingly, periods prior to adoption have not been restated. Compensation cost recognized for the twelve months ended December 31, 2007 and 2006 includes a) compensation cost for all share-based compensation granted prior to, but not vested as of January 1, 2006, based on the grant-date fair value estimated in accordance with the original provisions of SFAS No.123 and b) compensation cost for all share-based compensation granted beginning January 1, 2006, based on the grant-date fair value estimated in accordance with the provisions of SFAS No.123R. The compensation cost was recognized using the straight-line attribution method.

The following table summarizes the allocation of stock-based compensation to expense categories for the years ended December 31, 2007 and 2006 (in thousands):

	For the years ended December 31,	
	2007	2006
Cost of revenue	\$ 215	\$ 343
Research and development	357	435
Selling, general and administrative	1,080	2,113
Total stock compensation expense	\$ 1,652	\$ 2,891

For the year ended December 31, 2007, stock compensation was approximately \$1.7 million. At December 31, 2007, total unrecognized compensation costs related to stock options was approximately \$1.7 million, net of estimated forfeitures. Total unrecognized compensation cost will be adjusted for future changes in estimated forfeitures and is expected to be recognized over a weighted average period of approximately 2.6 years. For the year ended December 31, 2006, stock compensation was approximately \$2.9 million.

The Company recognizes compensation expense for options granted to non-employees in accordance with the provision of Emerging Issues Task Force ("EITF") consensus Issue 96-18, "Accounting for Equity Instruments that are Issued to Other Than Employees for Acquiring, or in Conjunction with Selling Goods or Services," which requires using a fair value options pricing model and re-measuring such stock options to the current fair market value at each reporting period as the underlying options vest and services are rendered.

In determining the fair value of stock options granted during the years ended December 31, 2007, 2006, and 2005, the following key assumptions were used in the Black-Scholes option pricing model:

	For the years ended December 31,		
	2007	2006	2005
Dividend yield	0%	0%	0%
Risk free interest rates	3.28% - 4.23%	4.59% - 4.82%	4.4%
Expected volatility	105% -106%	123% - 126%	126%
Expected term (in years)	5 years	5 years	5 years

We have not declared or paid any dividends and do not currently expect to do so in the near future. The risk-free interest rate used in the Black-Scholes is based on the implied yield currently available on U.S. Treasury securities with an equivalent term. Expected volatility is based on the weighted average historical volatility of the Company's common stock for the most recent five year period. The expected term of options represents the period that eMagin's stock-based awards are expected to be outstanding and was determined based on historical experience and vesting schedules of similar awards.

The following table shows the proforma effect on eMagin's net loss and net loss per share had compensation expense been determined based on the fair value at the award grant date in accordance with SFAS No. 123 for the twelve months ended December 31, 2005 (in thousands, except per share data):

	For the year ended December 31, 2005
Net loss applicable to common stockholders, as reported	\$ (16,528)
Add: Stock-based employee compensation expense included in reported net loss	—
Deduct: Stock-based employee compensation expense determined under fair value method	(3,035)
Pro forma net loss	\$ (19,563)
Net loss per share:	
Basic and diluted, as reported	\$ (1.94)
Basic and diluted, pro forma	\$ (2.29)

Warrants

At December 31, 2007, 8,340,509 warrants to purchase shares of common stock are outstanding and exercisable at exercise prices ranging from \$0.35 to \$27.60 and expiration dates ranging from June 10, 2008 to February 27, 2012.

	Outstanding Warrants	
	Shares	Weighted Average Exercise Price
Balances at December 31, 2004	2,161,823	\$ 11.40
Warrants granted	997,143	10.00
Warrants exercised	(370,820)	6.10
Warrants cancelled	(168,421)	26.70
Balances at December 31, 2005	2,619,725	\$ 10.20
Warrants granted	1,805,037	3.49
Warrants exercised	—	—
Warrants expired	(876,588)	6.90
Balances at December 31, 2006	3,548,174	\$ 7.05
Warrants granted	4,831,859	0.88
Warrants exercised	(9,524)	0.35
Warrants expired	(30,000)	4.26
Balances at December 31, 2007	8,340,509	\$ 2.65

On January 30 and March 25, 2008, the loan agreement with Moriah was amended and restated and 750,000 warrants and 250,000 warrants, respectively, were issued with exercise prices of \$1.50 per share. Please see Note 17 – Subsequent Events for additional information.

Note 12 - COMMITMENTS AND CONTINGENCIES

Royalties

The Company, in accordance with a royalty agreement with Eastman Kodak, is obligated to make minimum annual royalty payments of \$125 thousand which commenced on January 1, 2001. Under this agreement, the Company must pay to Eastman Kodak a certain percentage of net sales with respect to certain products, which percentages are defined in the agreement. The percentages are on a sliding scale depending on the amount of sales generated. Any minimum royalties paid will be credited against the amounts due based on the percentage of sales. The royalty agreement terminates upon the expiration of the issued patent which is the last to expire.

Effective May 30, 2007, Kodak and eMagin entered into an intellectual property agreement where eMagin has assigned Kodak the rights, title, and interest to a Company owned patent currently not being used by the Company and in consideration, Kodak has waived the royalties due under existing licensing agreements for the first six months of 2007, and reduced the royalty payments by 50% for the second half of 2007 and for the entire calendar year of 2008. In addition, the minimum royalty payment is delayed until December 1st for the years 2007 and 2008. The Company recorded approximately \$868 thousand for the year ended December 31, 2007 as income from the license of intangible assets and included this amount in other income on the Consolidated Statement of Operations.

For the years ended December 31, 2007, 2006, and 2005, royalty expense of approximately \$1.2 million, \$515 thousand, and \$191 thousand, respectively, is included in cost of goods sold.

Operating leases

The Company leases office facilities and office, lab and factory equipment under operating leases expiring through 2009. The Company currently has lease commitments for space in Hopewell Junction, New York and Bellevue, Washington.

The Company's manufacturing facilities are leased from IBM in New York. eMagin leases approximately 40,000 square feet to house its equipment for OLED microdisplay fabrication and for research and development, an assembly area and administrative offices. In 2004, eMagin entered into an agreement to extend the term of the lease until 2009.

In July 2005, eMagin signed a sub-lease agreement for approximately 19,000 square feet in Bellevue Washington. The leased space is used as the Company's corporate headquarters. This lease will expire in 2009. The Company's lease at the Redmond Washington location expired in August 2005 and was not renewed.

The future minimum lease payments through 2009 are as follows (in thousands):

2008	\$ 1,444
2009	538
	\$ 1,982

Rent expense for the years ended December 31, 2007, 2006, and 2005 was approximately \$1.3 million, \$1.3 million, and \$1.0 million, respectively. The Redmond lease was paid in common stock valued at \$42 thousand for the 2005 and 2004 rent period.

Employee benefit plans

eMagin has a defined contribution plan (the 401(k) Plan) under Section 401(k) of the Internal Revenue Code, which is available to all employees who meet established eligibility requirements. Employee contributions are generally limited to 15% of the employee's compensation. Under the provisions of the 401(k) Plan, eMagin may match a portion of the participating employees' contributions. There was no matching contribution to the 401(k) Plan for the years ended December 31, 2007, 2006 and 2005.

Legal proceedings

A former employee ("plaintiff") of the Company commenced legal action in the United States District Court for the Southern District of New York, on or about October 12, 2007, alleging that the plaintiff was subject to gender based discrimination and retaliation in violation of Title VII of the Civil Rights Act of 1964 (Case No. 07-CV-8827 (KMK)). The plaintiff seeks unspecified compensatory damages, punitive damages and attorneys' fees. On November 26, 2007, the Company served and filed its Answer, in which it denied the material allegations of the Complaint and asserted numerous affirmative defenses. This action is presently in the discovery stage. The Company disputes the allegations of the Complaint and intends on vigorously defending this action.

On December 6, 2005, New York State Urban Development Corporation commenced action against eMagin in the Supreme Court of the State of New York, County of New York against eMagin, asserting breach of contract and seeking to recover a \$150,000 grant which was made to eMagin based on goals set forth in the agreement for recruitment of employees. On July 13, 2006, eMagin agreed to a settlement with the New York State Urban

Development Corporation to repay \$112,200 of the \$150,000 grant. The settlement requires that repayments be made on a monthly basis in the amount of \$3,116.67 per month commencing August 1, 2006 and ending on July 1, 2009.

Note 13 – RELATED PARTY TRANSACTIONS

2007

On July 23, 2007, the Company entered into Agreements with the note holders and issued 8% Amended Senior Secured Convertible Notes (“Amended Notes”) to the note holders in the principal amount equal to the principal amount outstanding as of July 23, 2007. The due date for the principal payment has been extended to December 21, 2008 and the interest rate increased to 8%. The Amended Notes are convertible into 8,407,612 shares of the Company’s common stock. The conversion price for approximately \$5,770,000 of principal was revised from \$2.60 to \$.75 per share and the conversion price of \$.35 per share for \$250,000 of principal was unchanged. \$3,010,000 of the Notes can convert into 3,010 shares of the Company’s newly formed Series A Convertible Preferred Stock (the “Preferred”) at a conversion price of \$1,000 per share. The Preferred is convertible into common stock at the same price allowable by the Amended Notes, subject to adjustment as provided for in the Certificate of Designations. The Amended Notes adjust the exercise price from \$3.60 to \$1.03 per share for 1,553,468 warrants and require the issuance of 3,831,859 warrants exercisable at \$1.03 per share pursuant to which the note holders may acquire common stock, until July 21, 2011.

50

Two employees and one board member participated in the Agreements. Olivier Prache, Senior VP of Display Operations, has an Amended Note of \$10 thousand which may be converted into 13,333 shares, received 9,333 warrants which are exercisable at \$1.03 per share, and has 5,385 warrants which are exercisable at \$3.60 per share. John Atherly, former CFO as of January 2, 2008, has an Amended Note of \$40 thousand which may be converted into 53,333 shares and received 37,333 warrants which are exercisable at \$1.03 per share. Paul Cronson, Board member, through Navacorp III, LLC, has an Amended Note of \$200 thousand which may be converted into 266,666 shares and received 186,666 warrants which are exercisable at \$1.03 per share.

Stillwater LLC is a beneficial owner of more than 5% of the Company's common stock. Rainbow Gate Corporation, a corporation in which its investment manager is the sole member of Stillwater LLC and its controlling shareholder is the same as Ginola Limited, has an Amended Note of \$700 thousand which may be converted into 933,333 shares and received 653,333 warrants exercisable at \$1.03 per share. Ginola Limited has an Amended Note of \$800 thousand which may be converted into 1,066,333 shares and received 746,666 warrants exercisable at \$1.03 per share. Stillwater LLC disclaims beneficial ownership of shares owned by Rainbow Gate Corporation.

Alexandra Global Master Fund Ltd ("Alexandra") is a beneficial owner of more than 5% of the Company's common stock. Alexandra has an Amended Note of \$3 million which may be converted into 4 million shares and received 2.8 million warrants exercisable at \$1.03 per share.

On March 28, 2007, the Company entered into an amendment to the Stillwater Agreement, originally dated July 21, 2006. On April 9, 2007, the sale of the Stillwater Note and Warrant was complete and the Company issued a 6% Senior Secured Convertible Note in the principal amount of \$500,000 and warrants to purchase 1,000,000 shares of the Company's common stock at an exercise price of \$0.48. On July 23, 2007, Stillwater elected to convert \$250,000 of the principal amount of the Note and approximately \$2,167 of accrued and unpaid interest. Stillwater received 720,476 shares of Common Stock at the conversion price of \$0.35. The remaining 50% was amended to an 8% Amended Senior Secured Convertible Note on July 23, 2007.

A family member of an outside director of eMagin is the holder of a Series A warrant to purchase an aggregate of 4,286 shares of common stock. As a result of the Stillwater transaction, the exercise price of all Series A warrants was reduced from \$5.50 to \$0.35 per share. Family members of an outside director of eMagin are holders of Series F warrants to purchase an aggregate of 10,000 shares of common stock. As a result of the debt transactions, the exercise price of all Series F warrants was ultimately reduced from \$8.60 to \$4.09 per share.

2006

On July 21, 2006, the Company entered into several Note Purchase Agreements for the sale of approximately \$5.99 million of senior secured debentures (the "Notes") and warrants to purchase approximately 1,800,000 shares of common stock, par value \$.001 per share. The investors purchased \$5.99 million principal amount of Notes with conversion prices of \$2.60 per share that may convert into approximately 2.3 million shares of common stock and 5 year warrants exercisable at \$3.60 per share into approximately 1,600,000 million shares of common stock. If the Notes are not converted, 50% of the principal amount will be due on July 23, 2007 and the remaining 50% will be due on January 21, 2008. Commencing September 1, 2006, 6% interest was payable in quarterly installments on outstanding notes. The Notes were amended on July 23, 2007.

In the Note Purchase transaction, two employees and a board member participated. Olivier Prache, Senior VP of Display Operations, purchased a \$30 thousand promissory note which may be converted into 11,539 shares and received 8,077 warrants which are exercisable at \$3.60 per share. Mr. Prache converted \$20 thousand of his promissory note and received 7,693 shares. John Atherly, CFO, purchased a \$40 thousand promissory note which may be converted into 15,385 shares and received 10,770 warrants exercisable at \$3.60 per share. Paul Cronson, Board member, through Navacorp III, LLC purchased a \$200 thousand promissory note which may be converted into

76,923 shares and received 53,847 warrants exercisable at \$3.60 per share. The Notes were amended on July 23, 2007.

Stillwater LLC is a beneficial owner of more than 5% of the Company's common stock. Rainbow Gate Corporation, a corporation in which its investment manager is the sole member of Stillwater LLC and its controlling shareholder is the same as Ginola Limited, purchased a \$700 thousand promissory note which may be converted into 269,231 shares and received 188,462 warrants exercisable at \$3.60 per share. Ginola Limited purchased an \$800 thousand promissory note which may be converted into 307,693 shares and received 215,385 warrants exercisable at \$3.60 per share. Stillwater LLC disclaims beneficial ownership of shares owned by Rainbow Gate Corporation. The Notes were amended on July 23, 2007.

A family member of an outside director of eMagin is the holder of a Series A warrant to purchase an aggregate of 4,286 shares of common stock. As a result of the Note Purchase transaction, the exercise price of all Series A warrants was reduced from \$5.50 to \$2.60 per share. Family members of an outside director of eMagin are holders of Series F warrants to purchase an aggregate of 10,000 shares of common stock. As a result of the Note Purchase transaction, the exercise price of all Series F warrants was reduced from \$10.90 to \$8.60 per share.

eMagin has entered into a financial advisory agreement with Larkspur Capital Corporation. Paul Cronson, a director of eMagin, is a founder and shareholder of Larkspur Capital Corporation. The Company has agreed to pay a minimum fee of \$500 thousand to Larkspur Capital Corporation in the event certain transactions occur, i.e. sale of the Company's assets or change of control.

2005

On October 20, 2005, the Company entered into a Securities Purchase Agreement to sell to certain qualified institutional buyers and accredited investors an aggregate of 1,661,906 shares of eMagin's common stock, par value \$0.001 per share (the "Shares"), and warrants to purchase an additional 997,143 shares of common stock, for an aggregate purchase price of approximately \$9.1 million. The purchase price of the common stock and corresponding warrant was \$5.50 per share.

The warrants are exercisable at a price of \$10.00 per share and expire on October 20, 2010. Of the 997,143 warrants, 664,762 of the warrants are exercisable on or after May 20, 2006. The remaining 332,380 are exercisable after March 31, 2007.

Stillwater LLC is a beneficial owner of more than 5% of the Company's common stock. Rainbow Gate Corporation, a corporation in which its investment manager is the sole member of Stillwater LLC and its controlling shareholder is the same as Ginola Limited, participated in the sale of equity pursuant to the Securities Purchase Agreement by investing \$500 thousand. Stillwater LLC disclaims beneficial ownership of shares owned by Rainbow Gate Corporation.

Chelsea Trust Company, as trustee of a trust with the same directors and/or controlling shareholders as Ginola Limited, participated in the sale of equity pursuant to the Securities Purchase Agreement by investing \$250 thousand. Ginola Limited disclaims beneficial ownership of shares owned by Chelsea Trust Company.

In connection with the issuance of the Shares and the warrants pursuant to the Securities Purchase Agreement, the Company was required to lower the exercise prices of existing Series A and F warrants from \$10.50 and \$12.10 per share, respectively, to \$5.50 and \$10.90 per share, respectively, pursuant to the anti-dilution provisions of the Series A and F warrants.

A family member of an outside director of eMagin is the holder of a Series A warrant to purchase an aggregate of 4,286 shares of common stock. Accordingly, the exercise price of all Series A warrants was reduced from \$10.50 to \$5.50 per share.

Note 14 – SEPARATION AND EMPLOYMENT AGREEMENTS

Executive Separation and Consulting Agreement

On January 11, 2007, Gary Jones resigned as the President, Chief Executive Officer, and as a Director of the Company. Mr. Jones and the Company entered into an Executive Separation and Consulting Agreement ("the Agreement"). Under the Agreement, the Company made a payment to Mr. Jones in an amount equal to: all accrued salary as of the date of the Agreement plus an additional 30 days of salary (approximately \$47 thousand); 360 hours of unused vacation (approximately \$55 thousand); advance for legal and accounting fees associated with 2004 stock options (\$30 thousand); and an advance for future travel expenditures (\$5 thousand). Mr. Jones also received 500,000 shares of registered common stock of the Company valued at \$430 thousand. In his consulting relationship, Mr. Jones will be paid \$460 thousand upon the consummation of a strategic transaction. The Company will provide up to \$7.5 thousand for reasonable moving expenses of personal property from the New York office. In addition, the Company will pay up to an additional \$30 thousand to Mr. Jones related to personal legal fees.

Compensation Agreement

On January 11, 2007, Dr. K.C. Park was appointed Interim Chief Executive Office, President, and a Director of the Company. On February 12, 2007, the Company entered into a Compensation Agreement (“the Agreement”) with Dr. Park. Under the Agreement, the Company paid Dr. Park an annual base salary equal to \$300 thousand plus a quarterly increase in his base salary in the amount of \$12.5 thousand per fiscal quarter through December 31, 2007. The Company agreed to issue Dr. Park an aggregate of 250,000 restricted shares of common stock within 10 business days of the completion of a change of control of the Company. In addition, if a change of control transaction is completed and Dr. Park is not offered a senior executive position in the new organization, the Company has agreed to pay Dr. Park three month’s salary. K.C. Park resigned effective January 31, 2008. Please see Note 17 - Subsequent Events.

Effective January 30, 2008, the Company entered into an amended employment agreement with Susan K. Jones, its Chief Marketing and Strategy Officer. The amended agreement provides for an increase in compensation, extends the term of the agreement to January 31, 2010, changes certain incentive award payment requirements, clarifies the basis for incentive award determination, and extends the change-of-control/material change/termination-without-cause compensation payout periods. Please see Note 17 - Subsequent Events.

Note 15 - CONCENTRATIONS

The Company had no customers that accounted for more than 10% of its total revenues in 2007. In 2006, the Company had one customer that accounted for 13% of its total revenues. In 2005, the Company had no customers that accounted for more than 10% of its total revenues.

For the year ended December 31, 2007, approximately 51% of the Company’s net revenues were made to customers in the United States and approximately 49% of the Company’s net revenues were made to international customers. For the year ended December 31, 2006, approximately 59% of the Company's net revenues were made to customers in the United States and approximately 41% of the Company's net revenues were made to international customers. For the year ended December 31, 2005, approximately 49% of the Company’s net revenues were made to customers in the United States and approximately 51% of the Company’s net revenues were made to international customers.

There were 5 customers which comprised 54% of the outstanding accounts receivable at December 31, 2007. At December 31, 2006, there were 5 customers which comprised 69% of the outstanding accounts receivable.

The Company purchases principally all of its silicon wafers from a single supplier located in Taiwan.

Note 16 – AMEX DELISTING

On October 9, 2006, the Company received notice from the American Stock Exchange (the “AMEX”) Listing Qualifications Department stating that the Company does not meet certain continued listing standards as set forth in Part 10 of the AMEX Company Guide (the “Company Guide”). Specifically, pursuant to a review by the AMEX of the Company’s 10-Q for the three and six months ended June 30, 2006, the AMEX has determined that the Company is not in compliance with Sections 1003(a)(ii) and 1003(a)(iii) of the Company Guide, respectively, which state, in relevant part, that the AMEX will normally consider suspending dealings in, or removing from the list, securities of a company that (a) has stockholders' equity of less than \$4.0 million if such company has sustained losses from continuing operations and/or net losses in three of its four most recent fiscal years; or (b) has stockholders' equity of less than \$6.0 million if such company has sustained losses from continuing operations and/or net losses in its five most recent fiscal years, respectively.

On November 6, 2006, the Company submitted a plan advising the AMEX of actions that it would take, which may bring it into compliance with Sections 1003 (a)(ii) and 1003(a)(iii) of the Company Guide within a maximum of 18 months of receipt of the notice letter. On January 5, 2007, the Company received notice from the staff of the AMEX indicating that it intended to strike the Company’s common stock from listing on AMEX by filing a delisting application with the Securities and Exchange Commission as it had determined that the Company has failed to comply with the continued listing standards. The Company requested a verbal hearing which was held on February 27, 2007.

On March 1, 2007, the Company received notice from the AMEX indicating that the AMEX would initiate the delisting process with respect to the Company’s common stock. On March 12, 2007, in accordance with Part 12 of the Company Guide, the Company was suspended from trading on the AMEX. The Company’s common stock is trading on the Over-the-Counter Bulletin Board under the symbol, EMAN.

The delisting from the AMEX triggered a compliance condition on the notes payable. As a result the Company was required to pay the note holders monthly interest at 1% rather than .5% on the outstanding principal of the notes payable. The Company received a waiver from the note holders that allowed the Company to accrue the interest and delay the interest payment until the earliest of the Company (i) completing \$2 million of debt or equity financing or (ii) the occurrence of a Repurchase Event per the note. On July 23, 2007, the Company entered into Amended Agreements with the note holders where the 1% monthly interest will no longer accrue and the accrued interest was forgiven.

Note 17 – SUBSEQUENT EVENTS

Effective January 2, 2008, John Atherly resigned as Chief Financial Officer. There was no separation agreement executed between Mr. Atherly and the Company. Michael D. Fowler became the Company’s Interim Chief Financial Officer effective December 27, 2007.

Effective January 31, 2008, K.C. Park resigned as Interim Chief Executive Officer, President and Director. Dr. Park and the Company entered into a Separation Agreement and General Release (“Separation Agreement”). The Company will pay Dr. Park severance of \$60 thousand to be payable over a three month period. Dr. Park and the Company also entered into a Consulting Agreement (“Agreement”) for a term beginning February 1 and ending on August 1, 2008. He will be paid a sum of \$75 thousand, payable in monthly installments of \$10 thousand for the first three months of the term and \$15 thousand for the remaining three months of the term. In addition to the compensation, Dr. Park will be entitled to receive non-qualified stock options to acquire 18,750 shares of common stock on each three month anniversary of the Agreement at the fair market value on the date of the grant and will be fully vested and exercisable on the date of the grant. If the Agreement is not renewed at the end of the term, he will be entitled to an additional grant of 18,750 shares of common stock with the same terms. In addition, on May 1, 2008, Dr. Park will be entitled to receive non-qualified stock options to acquire 51,703 shares of common stock at the fair market value and will be

fully vested.

53

Effective January 30, 2008, the Company entered into an amended employment agreement with Susan K. Jones, its Chief Marketing and Strategy Officer. The amended agreement provides for an increase in compensation, extends the term of the agreement to January 31, 2010, changes certain incentive award payment requirements, clarifies the basis for incentive award determination, and extends the change-of-control/material change/termination-without-cause compensation payout periods.

Michael D. Fowler, the Company's Interim Chief Financial Officer, has indicated his intention to resign his position with the Company following the filing of the Annual Report on Form 10-K for December 31, 2007 to pursue other interests.

Line of Credit

On January 30, 2008, the Company amended and restated its Loan and Security Agreement ("Amended Loan Agreement") with Moriah. The Amended Loan Agreement's borrowing base calculation was modified to include 70% of eligible foreign accounts. The Loan conversion agreement was terminated. The amendment eliminated optional conversion of principal up to \$2.0 million into common stock at \$1.50, in lieu of issuance of a Warrant to purchase 750,000 shares of its common stock at a price of \$1.50 per share with an expiration date of January 29, 2013.

The Amended Loan Agreement has specific terms to which the Company must comply including (a) maintaining a lockbox account into which payments from related accounts receivable must be deposited, (b) periodic certifications as to borrowing base amounts equaling or exceeding net balances outstanding under the Line of Credit, and (c) a requirement that a registration statement with respect to shares held or to be issued to the lender be filed within thirty days of January 30, 2008. A delay in establishing the required lockbox account created a technical default under the Line of Credit agreement. Similarly, the production and subsequent discovery of defective displays resulted in an inadvertent overstatement of inventory during December, January and early February that created a technical default under the agreement. Finally, the Company was not able to complete the registration of shares within the thirty day timeframe mandated in the amended agreement. On March 25, 2008 the Company received a waiver from the lender (a) waiving compliance with the lockbox account requirement through March 14, 2008, (b) waiving compliance with the borrowing base requirement in so far as it related exclusively to the defective displays inadvertently included in inventory, and (c) extending the period for filing a registration statement for certain shares held or to be issued to the lender until April 29, 2008.

Effective March 25, 2008, the Company amended the Warrant Issuance Agreement ("Amended Warrant Agreement") with Moriah. In connection with such amendment, the Company issued a Warrant to purchase an additional 250,000 shares of its common stock at a price of \$1.50 expiring March 25, 2013.

Incentive Compensation Plan

On February 20, 2008, the Board of Directors authorized the establishment of the 2007 Incentive Stock Plan with 2,000,000 options available for grant. The 2007 Incentive Stock Plan is intended to provide long-term performance incentives to directors, executives, selected employees and consultants and reward them for making major contributions to the success and well being of the Company.

Private Placement

On April 2, 2008, the Company completed a private placement of its common stock with several institutional investors for gross proceeds of \$1.65 million. The transaction involved the sale of 1,586,539 shares of common stock at \$1.04 per share, or the 5-day average closing price of the Company's common stock on the trading days immediately preceding the closing date. The Company also issued to the investors 793,273 warrants to buy our common stock at a price of \$1.30 per share. Pursuant to the transaction, the Company is obligated to file a registration statement for the

shares issued as well as shares underlying the warrants by May 17, 2008.

Note 18 – QUARTERLY FINANCIAL INFORMATION (UNAUDITED)

Summarized quarterly financial information for 2007 and 2006 are as follows (in thousands except per share data):

	Quarters Ended			
	March 31, 2007	June 30, 2007	September 30, 2007	December 31, 2007

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

(a) Disclosure Controls and Procedures

Our principal executive and principal financial officers have evaluated the effectiveness of our disclosure controls and procedures, as defined in Rules 13a – 15(e) and 15d – 15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), as of the end of the period covered by this annual report. They have concluded that, based on such evaluation, our disclosure controls and procedures were not effective due to the material weaknesses in our internal control over financial reporting as of December 31, 2007, as further described below.

(b) Management’s Annual Report on Internal Control Over Financial Reporting

Overview

Internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) refers to the process designed by, or under the supervision of, our principal executive officer and principal financial officer, and effected by our board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Management is responsible for establishing and maintaining adequate internal control over financial reporting for eMagin.

Internal control over financial reporting cannot provide absolute assurance of achieving financial reporting objectives because of its inherent limitations. Internal control over financial reporting is a process that involves human diligence and compliance and is subject to lapses in judgment and breakdowns resulting from human failures. Internal control over financial reporting also can be circumvented by collusion or improper management override. Because of such limitations, there is a risk that material misstatements may not be prevented or detected on a timely basis by internal control over financial reporting. However, these inherent limitations are known features of the financial reporting process. Therefore, it is possible to design into the process safeguards to reduce, though not eliminate, this risk.

Management has used the framework set forth in the report entitled “Internal Control -- Integrated Framework” published by the Committee of Sponsoring Organizations (“COSO”) of the Treadway Commission to evaluate the effectiveness of eMagin’s internal control over financial reporting. As a result of the material weaknesses described below, management has concluded that the Company’s internal control over financial reporting was not effective as of December 31, 2007.

Management’s Assessment

Management has determined that, as of the December 31, 2007 measurement date, there were material weaknesses in both the design and effectiveness of our internal control over financial reporting. Management has assessed these deficiencies and has determined that there were four general categories of material weaknesses in eMagin’s internal control over financial reporting. As a result of our assessment that material weaknesses in our internal control over financial reporting existed as of December 31, 2007, management has concluded that our internal control over financial reporting was not effective as of December 31, 2007. A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting such that there is a reasonable possibility that a material

misstatement of our annual or interim financial statements will not be prevented or detected on a timely basis.

In management's opinion, our assessment as of December 31, 2007 regarding the existence of material weaknesses in our internal control over financial reporting relates to (1) the absence of adequate staffing, proper role descriptions, inadequate training and excessive employee turnover, (2) the lack of controls or ineffectively designed controls, (3) the failure in design and operating effectiveness of information technology controls over financial reporting, and (4) failures in operating control effectiveness identified during the testing of the internal control over financial reporting. Management and our audit committee have assigned a high priority to the short-term and long-term improvement of our internal control over financial reporting.

The material weaknesses we have identified include:

Deficiencies pertaining to a lack of human resources within our finance and accounting functions. During the latter part of 2007 we experienced significant turnover of personnel in our finance and accounting department, including the positions of Chief Financial Officer and Staff Accountant. The reduced staffing resulted in instances of altered responsibilities and improper role definition leading to lapses in proper segregation of duties. The lack of appropriately skilled personnel and less effective monitoring activities related to employee turnover could result in material misstatements to financial statements not being detected in a timely manner.

Deficiencies pertaining to the lack of controls or ineffectively designed controls. Our control design analysis and process walk-throughs disclosed a number of instances where review approvals were undocumented, where established policies and procedures were not defined, and controls were not in place.

Deficiencies related to information technology control design and operating effectiveness weaknesses. This material weakness resulted from the absence of key formalized information technology policies and procedures and could result in (1) unauthorized system access, (2) application changes being implemented without adequate reliability testing, (3) inconsistent investigation of system errors and the absence of timely or properly considered remedial actions, and (4) over reliance on spreadsheet applications without quality control assurances. These factors could lead to material errors and misstatements to financial statements occurring without timely detection.

Deficiencies related to failures in operating effectiveness of the internal control over financial reporting. Certain internal control procedures were developed during the latter part of 2007. When testing occurred to confirm the effectiveness of the internal control over financial reporting, controls were not operating effectively. Insufficient time remained to remediate these material weaknesses prior to year-end.

This annual report does not include an attestation report of the Company's registered accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's registered public accounting firm pursuant to temporary rules of the Securities and Exchange Commission

(c) Changes in Internal Control over Financial Reporting

There has been no change in our internal control over financial reporting, as defined in Rules 13a-15(f) of the Exchange Act, during our most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting. However, we have initiated or intend to initiate a number of remediation measures to address the control deficiencies and material weaknesses identified above. The remediation measures include or are expected to include the following:

- Hiring of more qualified and experienced accounting personnel to perform month-end reviews and closing processes as well as to allow additional oversight and supervision.
- Reassigning and altering functional responsibilities among new and existing employees to provide appropriate segregation of duties among functional groups within the Company.
- Updating of our policies and procedures along with control matrices and implementing testing procedures to ensure ongoing compliance.
- Establishing programs to provide ongoing training and professional education and development plans for accounting department personnel.
- Adding additional information technology staffing and implementing information technology policies and procedures to ensure adequate system controls are in place and compliance testing occurs on a regular basis.
- Restoring our executive management team with qualified and experienced business leaders to provide day-to-day management oversight and strategic direction.

We intend to adopt additional remediation measures related to the identified control deficiencies as necessary as well as to continue to evaluate our internal controls on an ongoing basis in order to upgrade and enhance when appropriate. Our audit committee has taken an active role in reviewing and discussing the internal control deficiencies with our auditors and financial management. Our management and the audit committee will actively monitor the implementation and effectiveness of the remediation efforts undertaken by our financial management.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, OFFICERS AND CORPORATE GOVERNANCE.

The following table sets forth the names of our directors and executive officers as of March 31, 2008:

Name	Age	Position
Adm. Thomas Paulsen (Ret.) (2)(3*)	71	Interim Chief Executive Officer and President, Chairman of the Board, Director
Michael D. Fowler	64	Interim Chief Financial Officer
Susan K. Jones	56	Chief Market and Strategy Officer, Secretary
Claude Charles (1)	71	Director
Paul Cronson	51	Director
Irwin Engelman (1*)	73	Director
Dr. Jacob Goldman (2*)(3)	86	Director
Brig. Gen. Stephen Seay (Ret.) (1)(3)	61	Director

(1) Audit Committee

(2) Governance & nominating Committee

(3) Compensation Committee

* Committee Chair

Rear Admiral Thomas Paulsen was appointed Interim CEO and President in January 2008 and has served as a director since July 2003. Admiral Thomas Paulsen served for over 34 years in the US Navy in Command Control, Communications and Intelligence (C3I), Telecommunications, Network Systems Operations, Computers and Computer Systems Operations until his retirement in 1994 as a Rear Admiral. He then served as Chief Information Officer for Williams Telecommunications. Admiral Paulsen has served as a director of Umbanet, Inc. since 2002. Since 2000, Admiral Paulsen has served on the Board of Governors of the Institute of Knowledge Management, George Washington University. Since 1994, he has served as the Chairman of the Advisory Board and President Emeritus of the Center for Advanced Technologies (CAT) and a Managing Partner on the National Knowledge and Intellectual Property Management Taskforce, a not-for-profit company headquartered in Dallas, Texas, and is a member of the Board of Governors for the Japanese American National Museum, Los Angeles, California.

Michael D. Fowler became the Company's Interim Chief Financial Officer on December 27, 2007. Mr. Fowler has been a partner with Tatum, LLC ("Tatum") for 4 years. Tatum is an executive services firm. From 2005 to 2007, Mr. Fowler served as Chief Financial Officer for Torrent Energy, a NASDAQ-traded natural gas exploration company. From 2004-2005, Mr. Fowler served as the Chief Financial Officer for Pacific West Bank. From 2003-2005, Mr. Fowler provided strategic financial planning services to a number of companies, including Swan Island Networks, a security software provider to the Departments of Homeland Security and Defense, Apex Construction Systems, a building materials manufacturer and Portland Teachers Credit Union, a regional financial institution. From 2001 to 2003, Mr. Fowler served as the Chief Financial Officer of Wellpartner, Inc. a venture-backed, internet/mail order pharmacy Company. Mr. Fowler has a Master of Business Administration and a Bachelor of Science in electrical engineering from University of Utah.

Susan K. Jones has served as Executive Vice President and Secretary since 1992, and assumed responsibility of Chief Marketing and Strategy Officer in 2001. Ms. Jones has more than 30 years of industrial experience, including senior research, management, and marketing assignments at Texas Instruments and Merck, Sharp, & Dohme

Pharmaceuticals. Ms. Jones serves on the boards or chairs committees for industry organizations including IEEE, SPIE, and SID. Ms. Jones served as a director of eMagin Corporation from 1993 to 2000 and was a director of Virtual Vision, Inc. Ms. Jones graduated from Lamar University with a B.S. in chemistry and biology, holds more than a dozen patents, and has authored more than 100 papers and talks.

Claude Charles has served as a director since April of 2000. Mr. Charles has served as President of Azure Capital Limited since 1999. From 1996 to 1998 Mr. Charles was Chairman of Equinox Group Holdings. Prior to 1996, Mr. Charles has also served as a director and in senior executive positions at SG Warburg and Co. Ltd., Peregrine Investment Holdings, Trident International Finance Ltd., and Dow Banking Corporation. Mr. Charles holds a B.S. in economics from the Wharton School at the University of Pennsylvania and a M.S. in international finance from Columbia University.

Paul Cronson has served as a director since July of 2003. Mr. Cronson is Managing Director of Larkspur Capital Corporation, which he founded in 1992. Larkspur is a broker dealer that is a member of the National Association of Securities Dealers and advises companies seeking private equity or debt. Mr. Cronson's career in finance began in 1979 at Laidlaw, Adams Peck where he worked in asset management and corporate finance. From 1983 to 1985, Mr. Cronson worked with Samuel Montagu Co., Inc. in London, where he marketed eurobond issuers and structured transactions. Subsequently from 1985 to 1987, he was employed by Chase Investment Bank Ltd., where he structured international debt securities and he developed "synthetic asset" products using derivatives. Returning to the U.S., he joined Peter Sharp Co., where he managed a real estate portfolio, structured financings and assisted with capital market investments until 1992. Mr. Cronson received his BA from Columbia College in 1979, and his MBA from Columbia University School of Business Administration in 1982. He is on the Board of Umbanet, in New York City, a private company specializing in email based distributed applications and secure messaging.

Irwin Engelman has served as a director since May of 2005. He is currently a consultant to various industrial companies. He is currently a director of Sanford Bernstein Mutual Funds, a publicly-traded company, and a member of its audit committee. From November 1999 until April 2002, he served as Executive Vice President and Chief Financial Officer of YouthStream Media Networks, Inc., a media and retailing company serving high school and college markets. From 1992 until April 1999, he served as Executive Vice President and Chief Financial Officer of MacAndrews and Forbes Holdings, Inc., a privately-held financial holding company. From November 1998 until April 1999, he also served as Vice Chairman, Chief Administrative Officer and a director of Revlon, Inc., a publicly-traded consumer products company. From 1978 until 1992, he served as an executive officer of various public companies including International Specialty Products, Inc. (a subsidiary of GAF Holdings Inc.), CitiTrust Bancorporation, General Foods Corporation and The Singer Company. Mr. Engelman received a BBA in Accounting from Baruch College in 1955 and a Juris Doctorate from Brooklyn Law School in 1961. He was admitted practice law in the State of New Jersey in 1962. In addition, he was licensed as a CPA in the State of New Jersey in 1966.

Dr. Jack Goldman joined our board of directors in February of 2003. Dr. Goldman is the retired senior vice-president for R&D and chief technical officer of the Xerox Corporation. While at Xerox, he founded and directed the celebrated Xerox PARC laboratory. Prior to joining Xerox, Dr. Goldman was Director of Ford Motor Company's Scientific Research Laboratory. He also served as Visiting Edwin Webster Professor at MIT. Dr. Goldman presently serves on the Boards of Directors of Umbanet Inc. and Medis Technologies Inc., and he has served on the Boards of Xerox, General Instrument Corp., United Brands, Intermagnetics General, GAF and Bank Leumi USA. He has also been active in government and professional advisory roles including service on the US Dept. of Commerce Technical Advisory Board, chairman of Statutory Visiting Committee of The National Bureau of Standards (National Institute of Standards and Technology), vice-president of the American Association for the Advancement of Science and president of the Connecticut Academy of Science and Engineering.

General Stephen Seay was elected to the Board of Directors in January 2006. In his 33-year Army career, General Stephen Seay held a wide variety of command and staff positions, most importantly as a soldier's soldier volunteering for his final assignment with his troops in Iraq. Most recently he was Program Executive Officer for Simulation, Training and Instrumentation, and Commanding General, Joint Contracting Command-Iraq/Head of Contracting Authority, Operation Iraqi Freedom. He has also served as Program Manager for a joint system, headed the Joint Target Oversight Council and was Commanding General, Simulation, Training and Instrumentation Command (STRICOM), Army Materiel Command. Earlier, as a Field Artillery officer, he commanded at all levels, rising to corps artillery commander. He served as Chief of Staff, United States Army, Europe (Forward) and National Security Element, Tazsar, Hungary, during Operation Joint Endeavor. He held resource management, operations research, and acquisition positions during three tours on Department of the Army staff. Stephen Seay holds a Bachelor of Science degree from the University of New Hampshire and a Master of Science degree from North Carolina State University.

CORPORATE GOVERNANCE

Code of Ethics

We have adopted a Code of Business Conduct and Ethics that applies to all of our directors, officers and employees, including our principal executive officer, principal financial officer and principal accounting officer. The Code of Business Conduct and Ethics is posted on our website at <http://www.emagin.com/investors>.

We intend to satisfy the disclosure requirement under Item 10 of Form 8-K regarding an amendment to, or waiver from, a provision of this Code of Business Conduct and Ethics by filing a Current Report on Form 8-K with the SEC, disclosing such information.

Section 16(a) Beneficial Ownership Reporting Compliance

Section 16(a) of the Securities Exchange Act of 1934, as amended, requires our directors and executive officers and persons who own more than 10% of the issued and outstanding shares of eMagin common stock to file reports of initial ownership of common stock and other equity securities and subsequent changes in that ownership with the SEC and the NYSE. Officers, directors and greater than ten percent stockholders are required by SEC regulation to furnish us with copies of all Section 16(a) forms they file. To our knowledge, based solely on a review of the copies of such reports furnished to us and written representations that no other reports were required, during the fiscal year ended December 31, 2007 all Section 16(a) filing requirements applicable to our officers, directors and greater than 10% beneficial owners were complied with except as noted below:

There was one Form 4 filed late by Dr. K. C. Park and Susan K. Jones filed a Form 5 as a result of certain unfiled Form 4 filings.

General Information Concerning the Board of Directors

The Board of Directors of eMagin is classified into three classes: Class A, Class B and Class C. As of March 31, 2008, Irwin Engelman is the only Class A Director, and will hold office until the next Annual Meeting of our stockholders. Paul Cronson, Admiral Thomas Paulsen, and General Stephen Seay are Class B directors who will hold office until the 2009 Annual Meeting. Claude Charles and Dr. Jacob Goldman are Class C directors who will hold office until the next Annual Meeting. There was no Annual Meeting held during 2007. In each case, each director will hold office until his successor is duly elected or appointed and qualified in the manner provided in our Amended and Restated Certificate of Incorporation and our Amended and Restated Bylaws, or as otherwise provided by applicable law.

Our Board of Directors held 20 meetings during 2007. Our independent directors met in executive session on a periodic basis in connection with regular meetings, as well as in their capacity as members of our Audit Committee and Compensation Committee.

Compensation of Directors

Non-management directors receive options under the 2003 Stock Option Plan. Under the 2003 Plan, a grant of options to purchase 6,000 shares of common stock will automatically be granted on the date a director is first elected or otherwise validly appointed to the Board with an exercise price per share equal to 100% of the market value of one share on the date of grant. Such options granted will expire ten years after the date of grant and will become exercisable in four equal installments commencing on the date of grant and annually thereafter. For calendar years 2007 and 2008, Directors shall receive an annual cash retainer of \$10,000 and an annual stock retainer of 25,000 options, fully vested, at market price on the date of issuance. In addition to the options to purchase 6,000 shares of common stock automatically granted upon joining the Board, each Director thereafter will receive an annual grant of options to purchase 1,000 shares of common stock at the fair market value as determined on the date of grant, which options will vest on December 31 in the year granted. Directors receive an additional 500 upon re-election. Directors are also granted options based on committee assignments consisting of options to purchase 500 shares per year for members of the compensation committee, 1,000 shares for the governance committee and 1,500 shares for the audit committee. Each committee chair will receive 250 additional shares. In addition, each non-management director receives \$1,000 for each in-person Board meeting, and \$500 for each teleconference meeting or Committee meeting. Directors are eligible for reimbursement for ordinary expenses incurred in connection with attendance at such meetings.

The Audit Committee is responsible for determining the adequacy of our internal accounting and financial controls, supervising matters relating to audit functions, reviewing and setting internal policies and procedures regarding audits, accounting and other financial controls, reviewing the results of our audit performed by the independent public accountants, and recommending the selection of independent public accountants. The Audit Committee has adopted an Audit Charter, which is posted on our website at <http://www.emagin.com/investors>. The Audit Committee is composed of three Directors, Claude Charles, Irwin Engelman, and Adm. Stephen Seay. The Board has determined that each of the members of the Audit Committee is unrelated, an outside member with no other affiliation with us and is independent. The Board has determined that Mr. Engelman is an "audit committee financial expert" as defined by the SEC. During 2007, the Audit Committee held 5 meetings via teleconference.

Compensation Committee. The Compensation Committee determines matters pertaining to the compensation and expense reporting of certain of our executive officers, and administers our stock option, incentive compensation, and employee stock purchase plans. The Compensation Committee is presently composed of three Directors, Jack Goldman, Thomas Paulsen, and Stephen Seay, each of whom the Board has determined to be independent and none of whom has been an employee of the Company. During 2007, the Compensation Committee held 4 meetings in person or through a conference call.

Governance and Nominating Committee. The Governance and Nominating Committee is responsible for considering potential Board members, nominating Directors for election to the Board, implementing the Company's corporate governance and ethics policies, and for all other purposes outlined in the Governance and Nominating Committee Charter, which is posted on our website at <http://www.emagin.com/investors>. The Governance and Nominating Committee is composed of Jack Goldman and Thomas Paulsen, each of whom the Board has determined to be independent. During 2007, the Governance and Nominating Committee held 1 meeting.

Nomination of Directors

As provided in its charter and our company's corporate governance principles, the Governance and Nominating Committee is responsible for identifying individuals qualified to become directors. The Governance and Nominating Committee seeks to identify director candidates based on input provided by a number of sources, including (1) the Governance and Nominating Committee members, (2) our other directors, (3) our stockholders, (4) our Chief Executive Officer or Chairman, and (5) third parties such as professional search firms. In evaluating potential candidates for director, the Nominating and Corporate Governance Committee considers the entirety of each candidate's credentials.

Qualifications for consideration as a director nominee may vary according to the particular areas of expertise being sought as a complement to the existing composition of the Board of Directors. However, at a minimum, candidates for director must possess:

- high personal and professional ethics and integrity;
- the ability to exercise sound judgment;
- the ability to make independent analytical inquiries;
- a willingness and ability to devote adequate time and resources to diligently perform Board and committee duties; and
- the appropriate and relevant business experience and acumen

In addition to these minimum qualifications, the Governance and Nominating Committee also takes into account when considering whether to nominate a potential director candidate the following factors:

- whether the person possesses specific industry expertise and familiarity with general issues affecting our business;
- whether the person's nomination and election would enable the Board to have a member that qualifies as an "audit committee financial expert" as such term is defined by the Securities and Exchange Commission (the "SEC") in Item 401 of Regulation S-K;
- whether the person would qualify as an "independent" director under the listing standards of the OTC Bulletin Board;
 - the importance of continuity of the existing composition of the Board of Directors to provide long term stability and experienced oversight; and
- the importance of diversified Board membership, in terms of both the individuals involved and their various experiences and areas of expertise.

ITEM 11. EXECUTIVE COMPENSATION

COMPENSATION DISCUSSION AND ANALYSIS

This section describes the compensation program for our executive officers. In particular, this section focuses on our 2007 compensation program and related decisions.

Compensation Discussion and Analysis

The objectives of our compensation program are as follows:

- Reward performance that drives substantial increases in shareholder value, as evidenced through both future operating profits and increased market price of our common shares; and
- Attract, hire and retain well-qualified executives.

The compensation level of our executives generally reflects their unique position and incentive to positively affect our future operating performance and shareholder value. Part of the compensation of our executives is from equity compensation, primarily through stock option grants or restricted stock awards. The stock option exercise price is generally the fair market value of the stock on the date of grant. Therefore, a gain is only recognized if the value of the stock increases, which promotes a long term alignment between the interests of the Company's executives and its shareholders. For that reason, stock options are a component of 100% of our employees' salary package.

Specific salary and bonus levels, as well as the amount and timing of equity incentive grants, are determined informally and judgmentally, on an individual-case basis, taking into consideration each executive's unique talents and experience as they relate to our needs. Executive compensation is paid or granted pursuant to each executive's compensation agreement. Compensation adjustments are made occasionally based on changes in an executive's level

of responsibility or on changed local and specific executive employment market conditions.

The Board of Directors has established a Compensation Committee, comprised exclusively of independent outside directors which approves all compensation and awards to executive management. The members of the Compensation Committee have extensive executive level experience in other companies and bring a perspective of reasonableness to compensation matters with our Company. In addition, the Compensation committee compares executive compensation practices of similar companies at similar stages of development.

Generally on its own initiative, at least annually, the Compensation Committee reviews the performance of executives and establishes compensation levels based on the performance evaluation, historical compensation levels of the executives, levels of responsibility and contributions to the Company, and comparable position studies provided by independent sources. With respect to equity compensation, the Compensation Committee approves all option grants, generally based on the recommendation of the president and chief executive officer and has delegated granting authority to the president and chief executive officer or, on occasion, his designee. Executives are eligible to receive bonus compensation at the discretion of the Compensation Committee, which is primarily based on the achievement of certain goals and objectives and the executive's contributions to the Company. Executives also are entitled to participate in the same benefit plans that are available to other Company employees.

Compensation for the Chairman, Interim Chief Executive Officer and President

Admiral Paulsen is currently serving as Interim Chief Executive Officer. Admiral Paulsen receives an annual stipend of \$60,000 for serving as Non-Executive Chairman of the Board. No change has occurred in Admiral Paulsen's compensation as a director of the Company as a result of his accepting the temporary position of Interim Chief Executive Officer and President.

Summary Compensation Table

The following table sets forth information regarding compensation paid to our principal executive officer, principal financial officer, and our highest paid executive officer, all of whose total annual salary and bonus for the years ended December 31, 2007, 2006 and 2005 exceeded \$100,000.

SUMMARY COMPENSATION TABLE

Name and Year principal position	Salary (\$)	Bonus (\$)	Stock Awards (\$)	Option awards (\$), (a)	Non-equity incentive plan compensation (\$)	Change in pension value and non qualified deferred compensation (\$)	All Other Compensation (\$)	Total (\$)
K.C. Park, Interim President and Chief Executive Officer (1)								
2007	313,462	-	40,000	(4)	-	-	-	353,462
2006	200,000	-	-	-	-	-	-	-
2005	119,923	-	-	141,362	-	-	-	141,362
Gary Jones, President and Chief Executive Officer (2)								
2007	102,060	-	430,000	(5)	-	-	51,638	(6) 583,698
2006	368,170	-	-	-	-	-	127,928	(7) 496,098
2005	320,313	-	-	404,150	-	-	147,420	(7) 871,883
John D. Atherly, Chief Financial Officer (3)								
2007	243,000	-	-	-	-	-	-	243,000
2006	242,308	-	-	-	-	-	-	242,308
2005	221,406	-	-	316,240	-	-	-	537,646

Susan Jones, Executive Vice President, Chief Marketing and Strategy Officer, and Secretary	2007	278,888	-	-	-	-	-	175,184	(8)	454,072
	2006	289,163	-	-	-	-	-	81,379	(8)	370,542
	2005	259,568	26,049	-	316,240	-	-	26,049	(8)	627,906

(1) Dr. Park was appointed Interim President and Chief Executive Officer in January 2007 and resigned his post in January 2008. Prior to January 2007, Dr. Park served as Executive Vice President of International Operations.

(2) Mr. Jones resigned as President and Chief Executive Officer in January 2007.

(3) Mr. Atherly resigned as Chief Financial Officer in January 2008.

(4) This amount represents a retention bonus in the form of a stock grant that was issued to the named executive officer.

(5) This amount represents a payment in the form of a stock grant pursuant to Mr. Jones' severance agreement. Previously granted options that remained unexercised were also forfeited pursuant to the severance agreement.

(6) This amount represents legal and accounting fee reimbursement for the benefit of the named executive officer.

(7) This amount represents relocation expense reimbursement for the benefit of the named executive officer.

(8) This amount represents deferred dollar amount earned in sales incentive compensation by the named executive officer.

Column note:

(a) The amounts in this column represent the fair value of option awards to the named executive officer as computed on the date of the option grants using the Black-Scholes option-pricing model.

Grants of Plan-Based Awards

There were no grants of plan-based awards to named executive officers for the year ended December 31, 2007.

Outstanding Equity Awards at Fiscal Year-End

The following table sets forth information with respect to the outstanding equity awards of our principal executive officers and principal financial officer during 2007, and each person who served as an executive officer of eMagin Corporation as of December 31, 2007:

Name and principal position	OUTSTANDING EQUITY AWARDS AT YEAR-END					Stock awards			Equity incentive plan awards: Market or payout value of unearned shares, units or rights that have not vested
	Option awards	Equity incentive plan awards: Number of securities underlying unexercised options		Options exercise price	Option expiration	Number of shares or units of stock that have not vested	Market value of shares or units of stock that have not vested	Equity incentive plan awards: Number of shares other rights that have not vested	Equity incentive plan awards: Market or payout value of unearned shares, units or rights that have not vested
	Number of securities underlying unexercised options (#)	Number of securities underlying unexercised options (#)	Equity incentive plan awards: Number of securities underlying unexercised options (#), (a)	Options exercise price (\$)	Option expiration Date	Number of shares or units of stock that have not vested (#)	Market value of shares or units of stock that have not vested (\$)	Equity incentive plan awards: Number of shares other rights that have not vested (#)	Equity incentive plan awards: Market or payout value of unearned shares, units or rights that have not vested (\$)

(1) Dr. Park was appointed Interim President and Chief Executive Officer in January 2007 and resigned his post in January 2008.

(2) Mr. Atherly resigned as Chief Financial Officer in January 2008 and has forfeited all options shown above.

(3) 25,000 options subject to vesting when the Company completes four consecutive EBITDA positive quarters.

Column note:

On November 3, 2006, a reverse stock split, ratio of 1-for-10, became effective. All stock options presented reflect the stock split.

(a) The options in this column were repriced. On July 21, 2006, certain employees agreed to cancel a portion of their existing stock options in return for repricing the remaining stock options at \$2.60 per share. The repriced unvested options continued to vest on the original schedule.

Option Exercises and Stock Vested

No executive officer identified in the Summary Compensation Table above exercised an option in fiscal year 2007. There were no shares of stock awarded or vested with respect to any of those executive officers.

Pension Benefits

eMagin does not have any plan which provides for payments or other benefits at, following, or in connection with retirement.

Non-qualified Deferred Compensation

eMagin does not have any defined contribution or other plan which provides for the deferral of compensation on a basis that is not tax-qualified.

Employment Agreements

Effective January 1, 2006, the Company entered into a revised executive employment agreement with Susan K. Jones, Chief Marketing and Strategy Officer. The agreement is effective for an initial term of three years. The agreement provides for an annual salary, benefits made available by the Company to its employees and eligibility for an incentive bonus pursuant to one or more incentive compensation plans established by the Company from time to time. The Company may terminate the employment of Ms. Jones at any time with or without notice and with or without cause (as such term is defined in the agreements). If Ms. Jones' employment is terminated without cause, or if Ms. Jones resigns with good reason (as such term is defined in the agreements), or Ms. Jones' position is terminated or significantly changed as result of change of control (as such term is defined in the agreements), Ms. Jones shall be entitled to receive salary until the end of the agreement's full term or twelve months, whichever is greater, payment for accrued vacation, and bonuses which would have been accrued during the term of the agreement. If Ms. Jones voluntarily terminates employment with the Company, other than for good reason or is terminated with cause (as such term is defined in the agreement), she shall cease to accrue salary, vacation, benefits, and other compensation on the date of the voluntary or with cause termination. The Executive Employment Agreement includes other conventional terms and also contains invention assignment, non-competition, non-solicitation and non-disclosure provisions. On April 17, 2006, the parties entered into amendments to the employment agreements pursuant to which the parties clarified that the Company has agreed to pay for health benefits equivalent to medical and dental benefits provided during Ms. Jones' full time employment until the end of the agreement's full term or twenty-four (24) months, whichever is greater.

Effective January 30, 2008, the Company entered into an amended employment agreement with Susan K. Jones, its Chief Marketing and Strategy Officer. The amended agreement provides for an annual base salary of \$315 thousand, an extension of the term of the agreement to January 31, 2010, modification and clarification of the basis for the incentive component of her salary, and extension of the change-of-control/material change/termination-without-cause compensation payout periods to the greater of 18 months or the remaining term of the amended employment agreement.

On January 11, 2007, Dr. K.C. Park was appointed Interim Chief Executive Officer, President, and a Director of the Company. On February 12, 2007, the Company entered in a Compensation Agreement ("the Agreement") with Dr. Park. Under the Agreement, the Company has agreed to pay Dr. Park an annual base salary equal to \$300 thousand plus a quarterly increase in his base salary in the amount of \$12.5 thousand per fiscal quarter through December 31, 2007. The Company agreed to issue Dr. Park an aggregate of 250,000 restricted shares of common stock within 10 business days of the completion of a change of control of the Company. In addition, if a change of control transaction is completed and Dr. Park is not offered a senior executive position in the new organization, the Company has agreed

to pay Dr. Park three month's salary. On January 31, 2008, Dr. Park resigned his positions as Interim Chief Executive Officer, President and Director.

Potential Payments Upon Termination or Change-in-Control

The following table sets forth information regarding potential payments and benefits Ms. Jones would receive upon termination of employment under specified circumstances, assuming that the triggering event in question occurred on December 31, 2007, the last business day of the fiscal year:

Name	Voluntary Resignation w/o Good Reason	Voluntary Resignation for Good Reason	Involuntary Termination without Cause	Involuntary Termination with Cause	Involuntary Termination with a Change in Control
Susan Jones					
Cash severance	\$ —	\$ 566,860(1)	\$ 566,860(1)	\$ —	\$ 566,860(1)
Post-termination health and welfare	\$ —	\$ —	\$ 11,988(2)	\$ —	\$ —
Vesting of stock options	\$ —	\$ —	\$(3)	\$ —	\$ —

(1) This amount reflects the lump sum that is payable within thirty days of the triggering event to the named executive. All calculations were made as of December 31, 2007 using then current salary figures for the named executive.

(2) This amount reflects the COBRA payments for health and dental benefits that eMagin would make on behalf of the named executive.

(3) This amount would reflect the value of the stock option awards that were unvested as of December 31, 2007 which would accelerate and vest under the terms of eMagin's option plans following a triggering event. As of December 31, 2007, all stock options were fully vested.

Director Compensation Arrangements

The following table sets forth with respect to the named director, compensation information inclusive of equity awards and payments made in the year ended December 31, 2007. The table includes only directors that were not employees of eMagin Corporation. Any director who was also an executive officer is included in the Summary Compensation Table.

Name	Fees earned or paid in cash(\$)	Stock awards (\$)	Option awards(\$)	Non-equity incentive plan compensation(\$)	Change in pension value and nonqualified deferred compensation earnings(\$)	All other compensation (\$)	Total(\$)
Claude Charles	8,000	-	42,932	-	-	-	50,932
Paul Cronson	8,000	-	40,228	-	-	-	48,228
Irwin							
Engelman	8,000	-	33,924	-	-	-	41,924

Column note:

On November 3, 2006, a reverse stock split, ratio of 1-for-10, became effective. All stock options presented reflect the stock split.

Compensation Committee Interlocks and Insider Participation

None of the members of our Compensation Committee has been an officer or employee of eMagin during years ending December 31, 2005, 2006 and 2007. In addition, during the most recent fiscal year, no eMagin executive officer served on the Compensation Committee (or equivalent), or the Board, of another entity whose executive officer(s) served on our Compensation Committee or Board. On January 31, 2008, Dr. K.C. Park resigned as our Interim Chief Executive Officer and President; and Thomas Paulsen, a director and Chairman of both the Board of

Directors and the Compensation Committee, assumed that role on an interim basis until Dr. Park's replacement is named. No change in Admiral Paulsen's compensation as a director of the Company has occurred as a result of his accepting the temporary position of Interim Chief Executive Officer and President.

Compensation Committee Report

The Committee has reviewed the Compensation Discussion and Analysis and discussed that analysis with management. Based on its review and discussions with management, the Committee recommended to the Board that the Compensation Discussion and Analysis be included in eMagin's 10-K. This report is provided by the following independent directors, who comprise the Committee:

Thomas Paulsen (Chairman)

Jacob Goldman

Stephen Seay

ITEM 12. EQUITY COMPENSATION PLAN INFORMATION AND SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Equity Compensation Plan Information

The following table sets forth the aggregate information of our equity compensation plans in effect as of December 31, 2007:

Plan	Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted-average exercise price of outstanding options, warrants and rights	Number of securities remaining available for future issuance under equity compensation plans excluding securities reflected in first column
Equity compensation plans approved by security holders	487,674	\$ 2.14	817,215
Equity compensation plans not approved by security holders	406,649	\$ 3.02	

Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The following table sets forth the number of shares known to be owned by all persons who own at least 5% of eMagin's outstanding common stock, the Company's directors, the executive officers, and the directors and executive officers as a group as of April 2, 2008, unless otherwise noted. Unless otherwise indicated, the stockholders listed in the table have sole voting and investment power with respect to the shares indicated.

Name of Beneficial Owner	Common Stock Beneficially Owned	Percentage of Common Stock
Moriah Capital L.P. (1)	1,162,500	3.5%
Stillwater LLC (2)	5,902,171	17.6%
Alexandra Global Master Fund Ltd (3)	3,120,455	9.3%
Ginola Limited (4)	5,061,384	15.1%
Susan K Jones (5)	960,996	2.9%
Rainbow Gate Corporation (6)	1,933,796	5.8%
Kettle Hill (7)	721,155	1.7%
Paul Cronson (8)	539,899	1.6%
K. C. Park (8)	52,660	*
Claude Charles (10)	50,400	*
Jack Goldman (11)	48,727	*
Thomas Paulsen (12)	47,101	*
Engelman, Irwin (13)	35,076	*
Seay, Stephen (14)	32,800	*
All executive officers and directors as a group (consisting of 8 individuals) (15)	1,714,999	5.1%

*Less than 1% of the outstanding common stock

** Beneficial Ownership is determined in accordance with the rules of the Securities and Exchange Commission and generally includes voting or investment power with respect to securities. Shares of common stock subject to options, warrants, or convertible debt currently exercisable or convertible, or exercisable or convertible within 60 days of April 2, 2008 are deemed outstanding for computing the percentage of the person holding such option or warrant. Percentages are based on a total of 14,207,439 shares of common stock outstanding on April 2, 2008, and the shares issuable upon the exercise of options, warrants exercisable, and debt convertible on or within 60 days of April 2, 2008, as described below.

- (1) This figure represents (i) 162,500 shares owned by Moriah Capital, L.P and (ii) warrants held by Moriah Capital L.P. to purchase 1,000,000 shares.
- (2) This figure represents: (i) 2,224,769 shares owned by Stillwater LLC, which includes 262,842 shares owned by Rainbow Gate Corporation, in which the sole member of Stillwater LLC is the investment manager of Rainbow Gate Corporation; (ii) warrants held by Stillwater LLC to purchase 2,029,784 shares, which includes warrants to purchase 737,621 shares held by Rainbow Gate Corporation, in which the sole member of Stillwater LLC is the investment manager of Rainbow Gate Corporation; and (iii) 1,647,618 shares of common stock underlying an 8% senior convertible note which includes 933,333 shares of common stock underlying an 8% senior convertible note held by Rainbow Gate Corporation, which the sole member of Stillwater LLC is the investment manager of Rainbow Gate Corporation. Mortimer D.A. Sackler exercises the sole voting power with respect to the shares held in the name of Stillwater LLC, and Mortimer D.A. Sackler exercises the sole voting power with respect to the shares held in the name of Rainbow Gate Corporation
- (3) This figure represents: (1) 363,636 shares owned by Alexandra Global Master Fund; (ii) warrants held to purchase 1,018,182 shares; and (iii) 1,738,637 shares of common stock underlying an 8% senior convertible note. Alexandra Investment Management, LLC, a Delaware limited liability company (“AIM”), serves as investment adviser to Alexandra Global Master Fund Ltd., a British Virgin Islands company (“Alexandra”). By reason of such relationship, AIM may be deemed to share dispositive power over the shares of common stock stated as beneficially owned by Alexandra. AIM disclaims beneficial ownership of such shares of common stock. Mr. Mikhail A. Filimonov (“Filimonov”) is the Chairman, Chief Executive Officer, Chief Investment Officer and a managing member of AIM. By reason of such relationships, Filimonov may be deemed to share dispositive power over the shares of common stock stated as beneficially owned by Alexandra. Filimonov disclaims beneficial ownership of such shares of common stock.
- (4) This figure represents: (i) 1,226,934 shares owned by Ginola Limited, which include 262,842 shares held indirectly by Rainbow Gate Corporation, 65,080 shares owned by Ogier Trustee(Jersey) Limited, as trustee, 57,371 shares owned by Chelsea Trust Company Limited, as trustee, and 240,385 shares owned by Crestflower Corporation. Ginola Limited disclaims beneficial ownership of the shares owned by Crestflower Corporation, Ogier Trustee (Jersey) Limited, as trustee, and Chelsea Trust Company Limited, as trustee; and (ii) warrants held by Ginola Limited to purchase 1,834,451 common shares, which includes warrants to purchase 737,621 shares held by Rainbow Gate Corporation, in which the sole shareholder of Ginola Limited is also the sole shareholder of Rainbow Gate Corporation, and warrants to purchase 32,540 shares owned by Ogier Trustee (Jersey) Limited, as trustee, 27,273 shares of common stock issuable upon exercise of a common stock purchase warrant held indirectly by Chelsea Trust Company Limited, as trustee, and 120,193 shares of common stock issuable upon exercise of common stock purchase warrant held by Crestflower Corporation (Ginola Limited disclaims beneficial ownership of the shares owned by Ogier Trustee (Jersey) Limited, as trustee and Chelsea Trust Company Limited, as trustee); and (iii) 1,999,999 shares of common stock underlying an 8% senior convertible note, which includes 933,333 shares of common stock underlying an 8% senior convertible note held by Rainbow Gate Corporation, in which the sole shareholder of Ginola Limited is also the sole shareholder of Rainbow Gate Corporation. Stillwater LLC and Ginola Limited are beneficially owned by separate individuals and therefore do not exert voting control over one another. However, Stillwater LLC does include the shares held by Rainbow Gate as “beneficially owned” since the sole member of Stillwater LLC is investment manager and sole director of Rainbow Gate Corporation and exerts voting control over such shares Jonathan White, Christopher Renouf, Richard Thomas, Peter Bertram, Marc Yates, Steven Meiklejohn, Clive Chaplin, Michael Lombardi, Nicholas Kershaw, Christopher Byrne, Simon Willing, Matthew Swan, Paul Willing, Philip Norman, Nicholas Ward, Philip Le Cornu, Peter Gatehouse, Susan Ford, Robert Fraser, Paul Perris, Raulin Amy, Daniel Richards, Jane Pearce, Roger Le Tissier, William Simpson, Marcus Leese, Simon Davies exercise the shared voting power with respect to the shares held in the name of Ogier Trustee (Jersey) Limited. Stuart Baker, Joerg Fischer, Charles Lubar, Christopher Mitchell, Leslie Schreyer, and Jonathan White exercise the shared voting power with respect to the shares held in the name of Chelsea Trust Company Limited. Jonathan White, Joerg Fischer and Steven Meiklejohn exercise the shared voting power with respect to the shares held in the name of Crestflower Corporation. Jonathan White, Joerg Fischer and Steven Meiklejohn are the directors of Ginola Limited and exercise

the shared voting power with respect to the shares held in the name of Ginola Limited.

(5) This figure represents shares owned by Gary Jones and Susan Jones who are married to each other, including (i) 672,799 shares owned by Gary Jones and 158,792 shares owned by Susan Jones; and (ii) 129,405 shares of common stock issuable upon exercise of stock options held by Susan Jones.

(6) This figure represents: (1) 262,642 shares owned by Rainbow Gate Corporation; (ii) warrants held by to purchase 737,621 shares; and (iii) 933,333 shares of common stock underlying an 8% senior convertible note. Mortimer D.A. Sackler exercises the sole voting power with respect to the shares held in the name of Rainbow Gate Corporation.

(7) This figure represents (i) 480,769 shares of common stock owned by Kettle Hill of which 110,577 shares held by Kettle Hill Partners, LP, 197,115 shares held by Kettle Hill Partners II, LP, and 173,077 shares held by Kettle Hill Offshore, Ltd. and (ii) warrants held by Kettle Hill to purchase 240,386 common shares which includes warrants to purchase 55,289 shares held by Kettle Hill Partners, LP, warrants to purchase 98,558 shares held by Kettle Hill Partners II, LP, and warrants to purchase 86,539 shares held by Kettle Hill Offshore, Ltd. Kettle Hill Capital Management, LLC acts as investment manager for Kettle Hill Partners, LP, Kettle Hill Partners II LP, and Kettle Hill Offshore, Ltd.

(8) This figure represents 19,198 shares owned by Mr. Cronson, 208,235 shares underlying warrants, 45,800 shares underlying options, and 266,666 shares of common stock underlying an 8% senior convertible note held directly and indirectly by Paul Cronson. This includes (i) 12,097 common stock shares and 4,286 shares underlying warrants held indirectly by a family member of Paul Cronson; (ii) 4,366 shares underlying warrants held indirectly by Larkspur Corporation of which he is the Managing Director and (iii) 186,666 shares underlying warrants and 266,666 shares of common stock underlying an 8% senior convertible note held indirectly by Navacorp III, LLC. Mr. Paul Cronson exercises the sole voting power with respect to the shares held in the name of Larkspur Corporation, and Paul Cronson exercises the sole voting power with respect to the shares held in the name of Navacorp III, LLC.

(9) This figure represents: (i) 957 shares owned by Dr. Park; and (ii) 51,703 shares of common stock issuable upon exercise of stock options.

(10) This figure represents shares underlying options.

(11) This figure represents shares underlying options.

(12) This figure represents shares underlying options.

(13) This figure represents shares underlying options.

(14) This figure represents shares underlying options.

(15) This figure represents: (i) 851,746 shares; (ii) warrants held to purchase 208,235 shares; (iii) 441,012 shares of common stock issuable upon exercise of stock options.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS AND DIRECTOR INDEPENDENCE

On July 23, 2007, the Company entered into Agreements with the note holders and issued 8% Amended Senior Secured Convertible Notes (“Amended Notes”) to the note holders in the principal amount equal to the principal amount outstanding as of July 23, 2007. The due date for the principal payment has been extended to December 21, 2008 and the interest rate increased to 8%. The Amended Notes are convertible into 8,407,612 shares of the Company’s common stock. The conversion price for approximately \$5,770,000 of principal was revised from \$2.60 to \$.75 per share and the conversion price of \$.35 per share for \$250,000 of principal was unchanged. \$3,010,000 of the Notes can convert into 3,010 shares of the Company’s newly formed Series A Convertible Preferred Stock (the “Preferred”) at a conversion price of \$1,000 per share. The Preferred is convertible into common stock at the same price allowable by the Amended Notes, subject to adjustment as provided for in the Certificate of Designations. The Amended Notes adjust the exercise price from \$3.60 to \$1.03 per share for 1,553,468 warrants and require the issuance of 3,831,859 warrants exercisable at \$1.03 per share pursuant to which the note holders may acquire common stock, until July 21, 2011.

Two employees and one board member participated in the Agreements. Olivier Prache, Senior VP of Display Operations, has an Amended Note of \$10 thousand which may be converted into 13,333 shares, received 9,333 warrants which are exercisable at \$1.03 per share, and has 5,385 warrants which are exercisable at \$3.60 per share. John Atherly, former CFO as of January 2, 2008, has an Amended Note of \$40 thousand which may be converted into 53,333 shares and received 37,333 warrants which are exercisable at \$1.03 per share. Paul Cronson, Board member, through Navacorp III, LLC, has an Amended Note of \$200 thousand which may be converted into 266,666 shares and received 186,666 warrants which are exercisable at \$1.03 per share.

Stillwater LLC is a beneficial owner of more than 5% of the Company’s common stock. Rainbow Gate Corporation, a corporation in which its investment manager is the sole member of Stillwater LLC and its controlling shareholder is the same as Ginola Limited, has an Amended Note of \$700 thousand which may be converted into 933,333 shares and received 653,333 warrants exercisable at \$1.03 per share. Ginola Limited has an Amended Note of \$800 thousand which may be converted into 1,066,333 shares and received 746,666 warrants exercisable at \$1.03 per share. Stillwater LLC disclaims beneficial ownership of shares owned by Rainbow Gate Corporation.

Alexandra Global Master Fund Ltd (“Alexandra”) is a beneficial owner of more than 5% of the Company’s common stock. Alexandra has an Amended Note of \$3 million which may be converted into 4 million shares and received 2.8 million warrants exercisable at \$1.03 per share.

On March 28, 2007, the Company entered into an amendment to the Stillwater Agreement, originally dated July 21, 2006. On April 9, 2007, the sale of the Stillwater Note and Warrant was complete and the Company issued a 6% Senior Secured Convertible Note in the principal amount of \$500,000 and warrants to purchase 1,000,000 shares of the Company’s common stock at an exercise price of \$0.48. On July 23, 2007, Stillwater elected to convert \$250,000 of the principal amount of the Note and approximately \$2,167 of accrued and unpaid interest. Stillwater received 720,476 shares of Common Stock at the conversion price of \$0.35. The remaining 50% was amended to an 8% Amended Senior Secured Convertible Note on July 23, 2007.

A family member of an outside director of eMagin is the holder of a Series A warrant to purchase an aggregate of 4,286 shares of common stock. As a result of the Stillwater transaction, the exercise price of all Series A warrants was reduced from \$5.50 to \$0.35 per share. Family members of an outside director of eMagin are holders of Series F warrants to purchase an aggregate of 10,000 shares of common stock. As a result of the debt transactions, the exercise price of all Series F warrants was ultimately reduced from \$8.60 to \$4.09 per share.

Director Independence

Board of Directors has determined that Messrs. Thomas Paulsen, Claude Charles, Jacob Goldman, Irwin Engelman, and Stephen Seay are each independent directors as of December 31, 2007. Thomas Paulsen was appointed Interim CEO and President in January 2008 and is no longer independent.

The Board of Directors has established a compensation committee which is currently comprised of Thomas Paulsen, Jacob Goldman, and Stephen Seay each of whom is independent as of December 31, 2007. As of January 2008, Thomas Paulsen is no longer independent.

The Board of Directors has established a corporate governance and nominating committee, which is comprised of Thomas Paulsen and Jacob Goldman, each of whom is independent as of December 31, 2007. As of January 2008, Thomas Paulsen is no longer independent.

The Board of Directors has a separately designated audit committee established in accordance with Section 3(a)(58)(A) of the Securities Exchange Act of 1934, which is currently comprised of Claude Charles, Irwin Engelman, and Steve Seay. The members of the Audit Committee are independent.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

Eisner LLP has served as eMagin's independent auditors for the years ended December 31, 2007 and 2006. For the year ended December 31, 2007, the fees for audit services totaled approximately \$318 thousand which included approximately \$251 thousand associated with the annual audit and reviews of the Company's quarterly reports on Form 10-Q and approximately \$67 thousand associated with the Company's statutory and regulatory filings. For the year ended December 31, 2006, the fees for audit services totaled approximately \$203 thousand which included approximately \$186 thousand associated with the annual audit and reviews of the Company's quarterly reports on Form 10-Q and approximately \$23 thousand associated with the Company's statutory and regulatory filings.

The Audit Committee pre-approves all audit and non-audit services performed by the Company's auditor and the fees to be paid in connection with such services in order to assure that the provision of such services does not impair the auditor's independence.

ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES

(a) Financial Statements and Schedules

1. Financial Statements

The following consolidated financial statements are filed as part of this report under Item 8 of Part II "Financial Statements and Supplementary Data.:

- A. Consolidated Balance Sheets at December 31, 2007 and 2006.
