(Registrant's telephone number)

SECURITIES REGISTERED PURSUANT TO SECTION 12(b) OF THE EXCHANGE ACT:
None

SECURITIES REGISTERED PURSUANT TO SECTION 12(g) OF THE EXCHANGE ACT:
Common Stock, \$0.001 par value per share

Indicate by check mark if the Registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes No

Indicate by check mark if the Registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Edgar Filing: Title Starts Online, Inc. - Form 10-K

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer
Non-accelerated filer

Accelerated filer
Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of June 30, 2009, the last business day of the Registrant's most recently completed second fiscal quarter, the market value of our common stock held by non-affiliates was \$0 as there were no sales or bid and ask as of June 30, 2009.

The number of shares of the Registrant's common stock, \$0.001 par value per share, outstanding as of March 29, 2010, was 1,386,225. We have no other classes of common equity.

Title Starts Online, Inc.
Annual Report on Form 10-K
For the Year Ended December 31, 2009

When used in this Report, the words “anticipate”, “expect”, “plan”, “believe”, “seek”, “estimate” and similar expressions are intended to identify forward-looking statements. These are statements that relate to future periods and include, but are not limited to, statements about the features, benefits and performance of our products, our ability to introduce new product offerings and increase revenue from existing products, expected expenses including those related to selling and marketing, product development and general and administrative, our beliefs regarding the health and growth of the market for our products, anticipated increase in our customer base, expansion of our products functionalities, expected revenue levels and sources of revenue, expected impact, if any, of legal proceedings, the adequacy of liquidity and capital resource, and expected growth in business. Forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from those projected. These risks and uncertainties include, but are not limited to, market acceptance for our products, our ability to attract and retain customers for existing and new products, our ability to control our expenses, our ability to recruit and retain employees, legislation and government regulation, shifts in technology, global and local business conditions, our ability to effectively maintain and update our product and service portfolio, the strength of competitive offerings, the prices being charged by those competitors and the risks discussed elsewhere herein. These forward-looking statements speak only as of the date hereof. We expressly disclaim any obligation or undertaking to release publicly any updates or revisions to any forward-looking statements contained herein to reflect any change in our expectations with regard thereto or any change in events, conditions or circumstances on which any such statement is based.

PART I

Item 1. Business

On December 28, 2009, we entered into and closed a Share Exchange Agreement with the shareholders of Advanced Mechanical Products, Inc., an Ohio corporation (“AMP”), each of which are accredited investors (“AMP Shareholders”) pursuant to which we acquired 100% of the outstanding securities of AMP in exchange for 1,063,636 shares of our common stock (the “AMP Acquisition”). Considering that, following the merger, the AMP Shareholders control the majority of our outstanding voting common stock and we effectively succeeded our otherwise minimal operations to those that are theirs, AMP is considered the accounting acquirer in this reverse-merger transaction. A reverse-merger transaction is considered, and accounted for as, a capital transaction in substance; it is equivalent to the issuance of AMP securities for our net monetary assets, which are de minimus, accompanied by a recapitalization. Accordingly, we have not recognized any goodwill or other intangible assets in connection with this reverse merger transaction. AMP is the surviving and continuing entities and the historical financials following the reverse merger transaction will be those of AMP. We were a “shell company” (as such term is defined in Rule 12b-2 under the Securities Exchange Act of 1934, as amended) immediately prior to our acquisition of AMP pursuant to the terms of the Share Exchange Agreement. As a result of such acquisition, our operations are now focused on the design, marketing and sale of modified automobiles with an all electric drivetrain and battery systems. Consequently, we believe that acquisition has caused us to cease to be a shell company as we no longer have nominal operations.

In addition, on December 29, 2009, subsequent to the acquisition of AMP, the Company entered into an Agreement and Release with Mark DeFoor, a significant shareholder of the Company, pursuant to which Mr. DeFoor agreed to return 3,105,000 shares of common stock of the Company to the Company for cancellation and has provided a full release of the Company in consideration of the transfer of all securities of Title Starts of Kansas City, LLC, the Company’s former wholly owned subsidiary, and all assets relating to the online abstract business.

Overview

Advanced Mechanical Products, Inc. (“AMP”) designs, sells and delivers modified automobiles with an all electric drivetrain and battery system that allows the vehicle to perform just like a vehicle with an internal combustion engine (“ICE”), but with no emissions or burning of fossil fuels. Using its drivetrain system, the Company converts an existing vehicle to an all electric vehicle instead of one that burns gasoline. Currently, the Company will convert a Saturn Sky, Pontiac Solstice or a 2010 Chevrolet Equinox provided from a buyer or a distributor by removing the vehicle’s engine, gasoline tank and drive train and replacing them with an electric motor, batteries and traction control components. The buyer provides either a new or a used vehicle to AMP that will be modified with the slip-in AMP electronic powertrain. The vehicle is then returned to the buyer for use. The product electric drivetrain is warranted with a 3 year or 36,000 mile warranty and the battery system is warranted for 8 years or 100,000 miles.

Our core goal is to establish and to build our brand as the brand that consumers immediately think of when they hear the words “Electric Car”. We intend to develop our brand using the good reputation of the vehicles we convert to electric. These vehicles will all ready have established themselves as high quality, stylish, safe, desirable and market leading vehicles in their ICE configurations. We intend to leverage the countless hours and dollars spent by the OEM to build and market these proven vehicles. Specifically, we have established relationships with automotive suppliers for sub-components that are designed for existing hybrid vehicles. Our relationships allow us to purchase drive motors, electric power steering, electric air conditioning and our power electronics at a basic cost without having invested a massive amount of time and capital to independently develop such components.

We will also incorporate the latest battery, motor and software advances available at the time. We intend to maintain several relationships with various suppliers and will not be locked into any one battery, motor, software or electronics vendor. To the greatest extent possible, we will use components that are being mass produced. We believe this will enable us to offer vehicles at mass produced pricing. All engineering and software development is done in house and is considered proprietary.

Market for Electric Vehicles

The market for electric vehicles represents a narrow but rapidly growing sector in the overall vehicle market. Currently the most productive market for electric vehicles is fleet operators, consisting of organizations that operate many vehicles from a central location including delivery operations, taxis, police and other government offices, the military, resorts, municipal bus lines and rental car agencies.

The consumer market for electric vehicles is still relatively small due to high prices and lack of electric vehicle infrastructure, however we believe this market is growing and is expected to continue to grow as the technology and price of electric vehicles improve.

Marketing

We break down our customers into two categories: Internet Sales and Distribution Network Sales. Internet sales are a primary method of sales used by most electric car companies today. Secondly, AMP is seeking to create a distribution channel through existing GM dealerships. We are seeking to utilize the dealers as “converters” of GM products to all electric vehicles. Similarly to how the dealer would enlist a local “low ride” or “hot rod” conversion shop to add value to their dealership, they become distributors of our customization to an all electric vehicle. This prevents them from being inhibited in their dealer relationship with the manufacturer. The dealer network pricing would be higher than the internet pricing. We would potentially stop selling online if the dealer network began driving the business. We plan to emphasize the following selling points:

- avoiding the fluctuation in fuel prices;
- saving the globe from carbon dioxide and global warming;
- the familiarity of the converted vehicle;
- assisting the country in breaking its dependence on foreign oil; and
- favorable social supports in laws, taxes, and subsidies

Research and Development

We conduct all of our research and development in-house at our facilities in Cincinnati, Ohio.

Competition

We expect that the electric car industry will compete on quality, price, performance and early to market status. Today, Tesla Automotive, an Original Equipment Manufacturer (OEM), is the only manufacturer of an all electric vehicle. The current Tesla vehicle is a two seater and costs over \$100,000. Two other near term competitive vehicles are the Chevy Volt and the Nissan Leaf. The Chevy Volt is a hybrid that uses both gasoline and electricity and not a pure EV, so it will attract a different type of buyer than our customer base. The Nissan Leaf seats 5 people and is all electric and is due out in late 2010. Specifications on the Leaf at this point are minimal but it appears that it will be at a similar price point to the AMP's Equinox however it will only travel 100 miles on a charge as opposed to our 150 mile range. We feel that our 50% greater range is a very significant differentiator that will help drive our sales

volume. Another important difference between the us and the Volt/Leaf offerings is that our vehicles are available 6 months earlier than their projected launch dates. Tesla, General Motors and Nissan are larger and better capitalized and will be able to take advantage of opportunities that the Company will not be able to pursue. Further, there are other smaller competitors that are seeking to enter the electric car company industry.

Intellectual Property

We have not applied for or received patent protection in the US or any other country, and, as a result, there is a distinct risk that we will not be able to adequately protect our intellectual property rights in these countries.

Government Regulation

We are in the business of modifying and selling automobiles and other vehicles, and accordingly we are subject to several laws related to automobile sales and operation.

The United States' laws related to automobile manufacturers regulate registration, safety criteria, type approval, inspection, maintenance, testing, etc. of automobiles. There are also laws regulating noise allowance and vibrations made by vehicles, and environmental laws. Complying with the strict regulation of automobile manufacturing is costly and could significantly affect our ability to become profitable. In addition, failure to comply with these laws could subject our Company to penalties, which could include severe fines or the removal of government approval to do business. Although we fully intend to comply with all applicable rules and regulations, we cannot assure that we will be able to do so.

In general, automobiles are subject to several environmental regulations, including air preservation, noise and vibration control. Accordingly, we are required to limit the air contaminants, noise and vibrations of our vehicles to certain levels. Failure to do so may impose fines or other penalties on the Company.

Number of Employees

We have 15 full time employees of which eleven are engaged in engineering and four sales/administration.

Item 1A. Risk Factors

Our limited operating history makes it difficult for us to evaluate our future business prospects and make decisions based on those estimates of our future performance.

We did not begin operations of our business until February 2007. We have a limited operating history and have not generated revenue. As a consequence, it is difficult, if not impossible, to forecast our future results based upon our historical data. Reliance on the historical results may not be representative of the results we will achieve, particularly in our combined form. Because of the uncertainties related to our lack of historical operations, we may be hindered in our ability to anticipate and timely adapt to increases or decreases in revenues or expenses. If we make poor budgetary decisions as a result of unreliable historical data, we could be less profitable or incur losses, which may result in a decline in our stock price.

AMP's results of operations have not resulted in profitability and we may not be able to achieve profitability going forward.

AMP incurred a net loss amounting to \$3,364,952 for the period from inception (February 20, 2007) through December 31, 2009. In addition, as of December 31, 2009, AMP has a working capital deficiency of \$569,718. If we incur additional significant operating losses, our stock price, may decline, perhaps significantly.

Our management is developing plans to alleviate the negative trends and conditions described above. Our business plan is speculative and unproven. There is no assurance that we will be successful in executing our business plan or that even if we successfully implement our business plan, that we will be able to curtail our losses now or in the future. Further, as we are a new enterprise, we expect that net losses will continue and our working capital deficiency will exacerbate.

We depend upon key personnel and need additional personnel.

Our success depends on the continuing services of Stephen Burns, our sole executive officer and director. The loss of Mr. Burns could have a material and adverse effect on our business operations. Additionally, the success of the Company's operations will largely depend upon its ability to successfully attract and maintain competent and qualified key management personnel. As with any company with limited resources, there can be no guaranty that the Company will be able to attract such individuals or that the presence of such individuals will necessarily translate into profitability for the Company. Our inability to attract and retain key personnel may materially and adversely affect our business operations.

We must effectively manage the growth of our operations, or our company will suffer.

To manage our growth, we believe we must continue to implement and improve our operational, manufacturing, and research and development departments. We may not have adequately evaluated the costs and risks associated with this expansion, and our systems, procedures, and controls may not be adequate to support our operations. In addition, our

management may not be able to achieve the rapid execution necessary to successfully offer our products and services and implement our business plan on a profitable basis. The success of our future operating activities will also depend upon our ability to expand our support system to meet the demands of our growing business. Any failure by our management to effectively anticipate, implement, and manage changes required to sustain our growth would have a material adverse effect on our business, financial condition, and results of operations.

Our business requires substantial capital, and if we are unable to maintain adequate financing sources our profitability and financial condition will suffer and jeopardize our ability to continue operations.

We require substantial capital to support our operations. If we are unable to maintain adequate financing or other sources of capital are not available, we could be forced to suspend, curtail or reduce our operations, which could harm our revenues, profitability, financial condition and business prospects.

We face intense competition which could cause us to lose market share.

In the electric vehicle market in the United States, we compete with large manufacturers, including GM, Tesla and Nissan who have more significant financial resources, established market positions, long-standing relationships with customers and dealers, and who have more

significant name recognition, technical, marketing, sales, manufacturing, distribution, financial and other resources than we do. Each of these companies is currently selling a hybrid or electric vehicle or are working to develop, market, and sell advanced technology vehicles in the United States market. The resources available to our competitors to develop new products and introduce them into the marketplace exceed the resources currently available to us. This intense competitive environment may require us to make changes in our products, pricing, licensing, services, distribution, or marketing to develop a market position.

Changes in the market for electric vehicles could cause our products to become obsolete or lose popularity.

The electric vehicle industry is in its infancy and has experienced substantial change in the last few years. To date, demand for and interest in electric vehicles has been sporadic. As a result, growth in the electric vehicle industry depends on many factors, including:

- continued development of product technology;
- the environmental consciousness of customers;
- the ability of electric vehicles to successfully compete with vehicles powered by internal combustion engines;
- limitation of widespread electricity shortages; and
- whether future regulation and legislation requiring increased use of nonpolluting vehicles is enacted.

We cannot assure you that growth in the electric vehicle industry will continue. Our business may suffer if the electric vehicle industry does not grow or grows more slowly than it has in recent years or if we are unable to maintain the pace of industry demands.

We may be unable to keep up with changes in electric vehicle technology and, as a result, may suffer a decline in our competitive position.

Our current products are designed for use with, and are dependent upon, existing electric vehicle technology. As technologies change, we plan to upgrade or adapt our products in order to continue to provide products with the latest technology. However, our products may become obsolete or our research and development efforts may not be sufficient to adapt to changes in or create necessary technology. As a result, our potential inability to adapt and develop the necessary technology may harm our competitive position.

The failure of certain key suppliers to provide us with components could have a severe and negative impact upon our business.

We rely on a small group of suppliers to provide us with components for our products. If these suppliers become unwilling or unable to provide components, there are a limited number of alternative suppliers who could provide them. Changes in business conditions, wars, governmental changes, and other factors beyond our control or which we do not presently anticipate could affect our ability to receive components from our suppliers. Further, it could be difficult to find replacement components if our current suppliers fail to provide the parts needed for these products. A failure by our major suppliers to provide these components could severely restrict our ability to manufacture our products and prevent us from fulfilling customer orders in a timely fashion.

Product liability or other claims could have a material adverse effect on our business.

The risk of product liability claims, product recalls, and associated adverse publicity is inherent in the manufacturing, marketing, and sale of electrical vehicles. Although we have product liability insurance for our consumer products, that insurance may be inadequate to cover all potential product claims. We also carry liability insurance on our automobile products. Any product recall or lawsuit seeking significant monetary damages either in excess of our coverage, or outside of our coverage, may have a material adverse effect on our business and financial condition. We may not be able to secure additional product liability insurance coverage on acceptable terms or at reasonable costs when needed. A successful product liability claim against us could require us to pay a substantial monetary award. Moreover, a product recall could generate substantial negative publicity about our products and business and inhibit or prevent commercialization of other future product candidates. We cannot assure you that such claims and/or recalls will not be made in the future.

We must devote substantial resources to implementing a product distribution network.

Dealers are often hesitant to provide their own financing to contribute to our product distribution network. As a result, we anticipate that we may have to provide financing or other consignment sale arrangements for dealers who would like to participate as our regional distribution centers. The further expansion of our product distribution network will require a significant capital investment and will require extensive amounts of time from our management. A capital investment such as this presents many risks, foremost among them being that we may not realize a significant return on our investment if the network is not profitable. Our inability to collect receivables from dealers could cause us to suffer losses. Lastly, the amount of time that our management will need to devote to this project may divert them from performing other functions necessary to assure the success of our business.

Regulatory requirements may have a negative impact upon our business.

While our products are subject to substantial regulation under federal, state, and local laws, we believe that the products we have sold are materially in compliance with all applicable laws. However, to the extent the laws change, or if we introduce new products in the future, some or all of our products may not comply with applicable federal, state, or local laws. Further, certain federal, state, and local laws and industrial standards currently regulate electrical and electronics equipment. Although standards for electric vehicles are not yet generally available or accepted as industry standards, our products may become subject to federal, state, and local regulation in the future. Compliance with this regulation could be burdensome, time consuming, and expensive.

Our automobile products are subject to environmental and safety compliance with various federal and state regulations, including regulations promulgated by the EPA, NHTSA, and various state boards, and compliance certification is required for each new model year. The cost of these compliance activities and the delays and risks associated with obtaining approval can be substantial. The risks, delays, and expenses incurred in connection with such compliance could be substantial.

Our success is heavily dependent on protecting our intellectual property rights.

We rely on trade secret protections to protect our proprietary technology. Our success will, in part, depend on our ability to obtain trademarks and patents. We presently do not hold patents registered with the United States Patent and Trademark Office. Although we have entered into confidentiality agreements with our employees and consultants, we cannot be certain that others will not gain access to these trade secrets. Others may independently develop substantially equivalent proprietary information and techniques or otherwise gain access to our trade secrets.

We may be exposed to liability for infringing intellectual property rights of other companies.

Our success will, in part, depend on our ability to operate without infringing on the proprietary rights of others. Although we have conducted searches and are not aware of any patents and trademarks which our products or their use might infringe, we cannot be certain that infringement has not or will not occur. We could incur substantial costs, in addition to the great amount of time lost, in defending any patent or trademark infringement suits or in asserting any patent or trademark rights, in a suit with another party.

We have not paid dividends in the past and do not expect to pay dividends in the future. Any return on investment may be limited to the value of our common stock

We have never paid cash dividends on our common stock and do not anticipate paying cash dividends in the foreseeable future. The payment of dividends on our common stock will depend on earnings, financial condition and other business and economic factors affecting it at such time as the board of directors may consider relevant. If we do not pay dividends, our common stock may be less valuable because a return on your investment will only occur if its stock price appreciates.

Our stock price and trading volume may be volatile, which could result in substantial losses for our stockholders.

The equity trading markets may experience periods of volatility, which could result in highly variable and unpredictable pricing of equity securities. The market price of our common stock could change in ways that may or may not be related to our business, our industry or our operating performance and financial condition. In addition, the trading volume in our common stock may fluctuate and cause significant price variations to occur. We have experienced significant volatility in the price of our stock over the past few years. We cannot assure you that the

market price of our common stock will not fluctuate or decline significantly in the future. In addition, the stock markets in general can experience considerable price and volume fluctuations.

We have not voluntarily implemented various corporate governance measures, in the absence of which, shareholders may have more limited protections against interested director transactions, conflict of interest and similar matters.

Recent Federal legislation, including the Sarbanes-Oxley Act of 2002, has resulted in the adoption of various corporate governance measures designed to promote the integrity of the corporate management and the securities markets. Some of these measures have been adopted in response to legal requirements. Others have been adopted by companies in response to the requirements of national securities exchanges, such as the NYSE or the NASDAQ Stock Market, on which their securities are listed. Among the corporate governance measures that are required under the rules of national securities exchanges are those that address board of directors' independence, audit committee oversight, and the adoption of a code of ethics. While we intend to adopt certain corporate governance measures such as a code of ethics and established an audit committee, Nominating and Corporate Governance Committee, and Compensation Committee of our board of directors, we presently do not have any independent directors. We intend to expand our board membership in future periods to include independent directors. It is possible that if we were to have independent directors on our board, stockholders would benefit from somewhat greater assurances that internal corporate decisions were being made by disinterested directors and that policies had been implemented to define responsible conduct. For example, in the absence of audit, nominating and compensation committees comprised of at least a majority of independent directors, decisions concerning matters such as compensation packages to our senior officers and recommendations for director nominees may be made by our sole director who has an interest in the outcome of the matters being decided. Prospective investors should bear in mind our current lack of both corporate governance measures and independent directors in formulating their investment decisions.

We may be exposed to potential risks relating to our internal controls over financial reporting and our ability to have those controls attested to by our independent auditors.

As directed by Section 404 of the Sarbanes-Oxley Act of 2002 ("SOX 404"), the Securities and Exchange Commission adopted rules requiring smaller reporting companies, such as our company, to include a report of management on the company's internal controls over financial reporting in their annual reports for fiscal years ending on or after December 15, 2007. We will be required to include the management report in the annual report for the year ending December 31, 2009. In addition, for our fiscal year ending December 31, 2009 the independent registered public accounting firm auditing our financial statements must also attest to and report on management's assessment of the effectiveness of our internal controls over financial reporting as well as the operating effectiveness of our internal controls. In the event we are unable to receive a positive attestation from our independent auditors with respect to our internal controls, investors and others may lose confidence in the reliability of our financial statements and our ability to obtain financing as needed could suffer.

If a public market for our common stock develops, trading will be limited under the SEC's penny stock regulations, which will adversely affect the liquidity of our common stock.

The trading price of our common stock is less than \$5.00 per share and, as a result, our common stock is considered a "penny stock," and trading in our common stock would be subject to the requirements of Rule 15c-9 under the Exchange Act. Under this rule, broker/dealers who recommend low-priced securities to persons other than established customers and accredited investors must satisfy special sales practice requirements. Generally, the broker/dealer must make an individualized written suitability determination for the purchaser and receive the purchaser's written consent prior to the transaction.

SEC regulations also require additional disclosure in connection with any trades involving a "penny stock," including the delivery, prior to any penny stock transaction, of a disclosure schedule explaining the penny stock market and its associated risks. These requirements severely limit the liquidity of securities in the secondary market because few broker or dealers are likely to undertake these compliance activities. In addition to the applicability of the penny stock rules, other risks associated with trading in penny stocks could also be price fluctuations and the lack of a liquid market. An active and liquid market in our common stock may never develop due to these factors.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

Our principal offices are located at 4540 Alpine Road, Blue Ash, Ohio 45242, which include 3,000 square feet in office space and 12,000 square feet in manufacturing/development space. We pay \$8,500 per month in rent and our lease is for two years. We expect that this facility will provide adequate space for the next two years.

Item 3. Legal Proceedings

We are currently not a party to any legal or administrative proceedings and are not aware of any pending or threatened legal or administrative proceedings against us in all material aspects. We may from time to time become a party to various legal or administrative proceedings arising in the ordinary course of our business.

Item 4. (Removed and Reserved)

Not applicable.

8

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Market Information

Our common stock was listed on the OTC Bulletin Board on July 14, 2009. The symbol is TTSO. There has been no active trading and no high or low bid prices.

Holder of our Common Stock

As of March 29, 2010, there were approximately 32 stockholders of record of our common stock. This number does not include shares held by brokerage clearing houses, depositories or others in unregistered form. The stock transfer agent for our securities is Empire Stock Transfer, Inc., 1859 Whitney Mesa Drive, Henderson, Nevada 89014.

Dividends

The Company has never declared or paid any cash dividends on its common stock. The Company currently intends to retain future earnings, if any, to finance the expansion of its business. As a result, the Company does not anticipate paying any cash dividends in the foreseeable future.

Securities Authorized for Issuance Under Equity Compensation Plans

The Company does not have an authorized equity compensation plan.

Penny Stock Rules

The Securities and Exchange Commission has also adopted rules that regulate broker-dealer practices in connection with transactions in penny stocks. Penny stocks are generally equity securities with a price of less than \$5.00 (other than securities registered on certain national securities exchanges or quoted on the NASDAQ system, provided that current price and volume information with respect to transactions in such securities is provided by the exchange or system).

Our shares constitute penny stock under the Securities and Exchange Act. The shares will remain penny stocks for the foreseeable future. The classification of penny stock makes it more difficult for a broker-dealer to sell the stock into a secondary market, which makes it more difficult for a stockholder to liquidate his or her shares. Any broker-dealer engaged by the purchaser for the purpose of selling his or her shares in the Company will be subject to Rules 15g-1 through 15g-10 of the Securities and Exchange Act. Rather than creating a need to comply with those rules, some broker-dealers will refuse to attempt to sell penny stock.

The penny stock rules require a broker-dealer, prior to a transaction in a penny stock not otherwise exempt from those rules, to deliver a standardized risk disclosure document, which:

- contains a description of the nature and level of risk in the market for penny stock in both public offerings and secondary trading;

Edgar Filing: Title Starts Online, Inc. - Form 10-K

- contains a description of the broker's or dealer's duties to the customer and of the rights and remedies available to the customer with respect to a violation of such duties or other requirements of the Securities Act of 1934, as amended;
- contains a brief, clear, narrative description of a dealer market, including "bid" and "ask" price for the penny stock and the significance of the spread between the bid and ask price;
- contains a toll-free telephone number for inquiries on disciplinary actions;
- defines significant terms in the disclosure document or in the conduct of trading penny stocks; and
- contains such other information and is in such form (including language, type, size and format) as the Securities and Exchange Commission shall require by rule or regulation;

The broker-dealer also must provide, prior to effecting any transaction in a penny stock, to the customer:

- the bid and offer quotations for the penny stock;
- the compensation of the broker-dealer and its salesperson in the transaction;
- the number of shares to which such bid and ask prices apply, or other comparable information relating to the depth and liquidity of the market for such stock; and
- monthly account statements showing the market value of each penny stock held in the customer's account.

In addition, the penny stock rules require that prior to a transaction in a penny stock not otherwise exempt from those rules; the broker-dealer must make a special written determination that the penny stock is a suitable investment for the purchaser and receive the purchaser's written acknowledgment of the receipt of a risk disclosure statement, a written agreement to transactions involving penny stocks, and a signed and dated copy of a written suitability statement. These disclosure requirements will have the effect of reducing the trading activity in the secondary market for our stock because it will be subject to these penny stock rules. Therefore, stockholders may have difficulty selling their securities.

Unregistered Sales of Equity Securities

On December 28, 2009, we entered into and closed a Share Exchange Agreement with the AMP Shareholders pursuant to which we acquired 100% of the outstanding securities of AMP in exchange for 1,063,636 shares of our common stock.

On December 28, 2009, the Company entered a Conversion Agreement with Bowden Transportation Ltd. ("Bowden") pursuant to which Bowden agreed to convert a loan in the amount of \$20,000 provided to AMP on December 21, 2009 into 500 shares of Series A Preferred Stock (the "Series A Stock").

On December 28, 2009, the Company entered a Conversion Agreement with Han Solutions II, LLC ("Han") pursuant to which Han agreed to convert a loan in the amount of \$315,000 provided to AMP from October 28, 2009 through December 21, 2009 into 7,875 shares of Series A Stock.

The Series A Stock is convertible, at any time at the option of the holder, into common shares of the Company based on a conversion price of \$4.70588 per share. The Series A Stock has a \$40 stated value per share. The holders of the Series A Stock are not entitled to convert the Series A Stock and receive shares of common stock such that the number of shares of common stock held by them in the aggregate and their affiliates after such conversion or exercise does not exceed 4.99% of the then issued and outstanding shares of common stock. The Series A Stock has voting rights on an as converted basis. Holders of the Series A Stock are not entitled to receive dividends and do not hold any liquidation rights.

On December 28, 2009, the Company entered a Conversion Agreement with Ziu Zhang ("Zhang") pursuant to which Zhang agreed to convert a loan in the amount of \$50,000 provided to AMP on November 30, 2009 into 10,638 shares of common stock of the Company.

On December 28, 2009, the Company assumed a Services Agreement entered between AMP and Pharmacy Management Services pursuant to which the Company issued Pharmacy Management Strategies LLC a common stock

purchase warrant to acquire 500,000 shares of common stock at \$5.60 per share for a term of five years. Half of the shares of common stock issuable under this warrant vested immediately and the balance shall vest one year from the date of the agreement.

On December 29, 2009, subsequent to the acquisition of AMP, the Company entered into an Agreement and Release with Mark DeFoor, a significant shareholder of the Company, pursuant to which Mr. DeFoor agreed to return 3,105,000 shares of common stock of the Company to the Company for cancellation and has provided a full release of the Company in consideration of the transfer of all securities of Title Starts of Kansas City, LLC, the Company's former wholly owned subsidiary, and all assets relating to the online abstract business.

On January 15, 2010, the Company entered a Subscription Agreement with Han pursuant to which Han acquired 625 shares of Series A Stock in consideration of \$25,000.

On January 13, 2010, the Company entered into a letter agreement with Maggie Moran, a director of the Company, The Company has agreed to pay Ms. Moran \$40,000 per year and issue Ms. Moran an option to acquire 23,214 shares of common stock for five years with an exercise price of \$5.60 per share. The options vest at 5,357 upon Ms. Moran executing her letter of appointment and 3,571 every six months thereafter.

From January 7, 2010 to March 4, 2010, the Company entered into subscription agreements with various accredited investors pursuant to which the investors purchased 72,308 shares of the Company's common stock for an aggregate purchase price of \$330,275.

On February 2, 2010, the Company compensated John Carris Investments LLC, as placement agent ("JCI"), for assisting in the sale of common stock by issuing JCI a common stock purchase warrant to purchase 16,943 shares of the Company's common stock at an exercise price of \$4.70 per share.

On March 1, 2010, the Company issued a 6% promissory note in the principal amount of \$100,000 (the "March 2010 Note") to an accredited investor (the "March 2010 Lender") in consideration of \$100,000. In addition to the March 2010 Note, the March 2010 Lender also received a Common Stock Purchase Warrant to acquire 8,929 shares of common stock at an exercise price of \$5.60 per share exercisable for a period of three years. The March 2010 Note bears interest at the rate of 6% per annum. The March 2010 Note matures on the earlier of the Company closing a financing or June 30, 2010. The full principal amount of the note is due upon a default.

On March 15, 2010, the Company entered into subscription agreements with two accredited investors pursuant to which the investors purchased 44,643 shares of the Company's common stock for an aggregate purchase price of \$250,000.

On March 15, 2010, the Company compensated JCI for assisting in the sale of common stock with the issuance of a common stock purchase warrant to purchase 4,464 shares of the Company's common stock at an exercise price of \$5.60 per share.

This issuance of these above securities is exempt from the registration requirements under Rule 4(2) of the Securities Act of 1933, as amended, and/or Rule 506 as promulgated under Regulation D.

Issuer Purchases of Equity Securities

Except for the transaction entered with Mark DeFoor, pursuant to which he cancelled 3,105,000 shares of common stock, the Company has not repurchased its securities during the year ended December 31, 2009.

Item 6. Selected Financial Data

As a smaller reporting company, we are not required to include disclosure under this item.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward Looking Statements

Some of the statements contained in this Form 10-K that are not historical facts are "forward-looking statements" which can be identified by the use of terminology such as "estimates," "projects," "plans," "believes," "expects," "anticipates," "intends," or the negative or other variations, or by discussions of strategy that involve risks and uncertainties. We urge you to be cautious of the forward-looking statements, that such statements, which are contained in this Form 10-K, reflect our current beliefs with respect to future events and involve known and unknown risks, uncertainties and other factors affecting our operations, market growth, services, products and licenses. No assurances can be given regarding the achievement of future results, as actual results may differ materially as a result of the risks we face, and actual events may differ from the assumptions underlying the statements that have been made regarding anticipated events. Factors that may cause actual results, our performance or achievements, or industry results, to differ materially from those contemplated by such forward-looking statements include without limitation:

- Our ability to attract and retain management;
- Our ability to raise capital when needed and on acceptable terms and conditions;
- The intensity of competition;
- General economic conditions;
- Changes in regulations;
- Whether the market for electric vehicles continues to grow, and, if it does, the pace at which it may grow; and
- Our ability to compete against large competitors in a rapidly changing market for electric vehicles.

All written and oral forward-looking statements made in connection with this Form 10-K that are attributable to us or persons acting on our behalf are expressly qualified in their entirety by these cautionary statements. Given the

uncertainties that surround such statements, you are cautioned not to place undue reliance on such forward-looking statements.

Our Plan of Operation should be read in conjunction with our financial statements included herein.

Overview

On December 28, 2009, we entered into and closed a Share Exchange Agreement with the AMP Shareholders pursuant to which we acquired 100% of the outstanding securities of AMP in exchange for 1,063,636 shares of our common stock. Considering that, following the merger, the AMP Shareholders control the majority of our outstanding voting common stock and we effectively succeeded our otherwise minimal operations to those that are theirs, AMP is considered the accounting acquirer in this reverse-merger transaction. A reverse-merger transaction is considered, and accounted for as, a capital transaction in substance; it is equivalent to the issuance of AMP securities for our net monetary assets, which are de minimus, accompanied by a recapitalization. Accordingly, we have not recognized any goodwill or other intangible assets in connection with this reverse merger transaction. AMP is the surviving and continuing entities and the historical financials following the reverse merger transaction will be those of AMP. We were a "shell company" (as such term is defined in Rule 12b-2 under the Securities Exchange Act of 1934, as amended) immediately prior to our acquisition of AMP pursuant to the terms of the Share Exchange Agreement. As a result of such acquisition, our operations are now focused on the design, marketing and sale of modified automobiles with an all electric drivetrain and battery systems. Consequently, we believe that acquisition has caused us to cease to be a shell company as we no longer have nominal operations.

On December 29, 2009, subsequent to the acquisition of AMP, the Company entered into an Agreement and Release with Mark DeFoor, a significant shareholder of the Company, pursuant to which Mr. DeFoor agreed to return 3,105,000 shares of common stock of the Company to the Company for cancellation and has provided a full release of the Company in consideration of the transfer of all securities of Title Starts of Kansas City, LLC, the Company's former wholly owned subsidiary, and all assets relating to the online abstract business.

Results of Operations

Year Ended December 31, 2009 Compared to Year Ended December 31, 2008

Revenue. We did not generate revenue for the years ended December 31, 2009 and 2008.

Expenses. Our expenses for the year ended December 31, 2009 were \$1,528,020 and included payroll and payroll taxes (\$710,216), batteries, motors and supplies (\$301,797) and legal and professional fees (\$136,145). Our expenses for the year ended December 31, 2008 were \$1,383,884 and included payroll and payroll taxes (\$389,508), batteries, motors and supplies (\$320,972) and legal and professional fees (\$311,408). The reason for the increase in comparing the year ended 2009 to 2008 was an increase in activity in developing our products which included the hiring of additional employees.

Net loss. Net loss for the years ended December 31, 2009 and 2008 were \$1,524,924 and \$1,383,884, respectively.

Liquidity and Capital Resources

As of December 31, 2009, we had current assets of \$13,688 including cash of \$0 and current liabilities of \$583,406. As of December 31, 2008, we had current assets of \$79,584 including cash of \$58,303 and current liabilities of \$224,147.

Operating Activities

Our operating activities from continuing operations resulted in a net cash used by operations of \$1,243,039 for the year ended December 31, 2009 compared to net cash used by operations of \$1,037,159 for the year ended December 31, 2008. The net cash used by operations for the year ended December 31, 2009 reflects a net loss of \$1,524,923 offset by depreciation of \$34,864, customer deposits of \$96,000, account payables of \$155,672 and other minor factors. The net cash used by operations for the year ended December 31, 2008 reflects a net loss of \$1,383,884 offset by depreciation of \$61,171, account payables of \$224,147, advertising of \$50,000 and other minor factors.

Investing Activities

Our investing activities resulted in a net cash inflow of \$7,649 for the year ended December 31, 2009 compared to a net cash inflow of \$8,433 for the year ended December 31, 2008. Cash used in investing activities principally represents capital expenditures offset by proceeds from the sale of assets and repayments of an advance to a related party.

Financing Activities

Our financing activities resulted in a cash inflow of \$1,176,087 for the year ended December 31, 2009 and \$825,000 for the year ended December 31, 2008, which principally represents issuance of common and preferred stock.

Presently, due to the lack of revenue we are not able to meet our operating and capital expenses. There is doubt about our ability to continue as a going concern, as the continuation of our business is dependent upon successful roll out of our products and maintaining a break even or profitable level of operations. We have incurred operating losses since inception, and this is likely to continue through the fiscal year ending December 31, 2010.

From October 2009 through December 2009, AMP received \$445,000 in bridge loans, which provided the funding to remain in operation during the second half of 2009. On December 28, 2009, following the acquisition of AMP by the Company, \$385,000 of the bridge loans were converted into equity of the Company.

We require funds to enable us to address our minimum current and ongoing expenses, expand marketing and promotion activity connected with the development and marketing of our products and to increase market share. Our cash on hand will not be sufficient to satisfy all of our cash requirements as we continue to progress and expand. We estimate that we will require between \$2,000,000 and \$2,500,000 to carry out our business plan for the next twelve months. Because we cannot anticipate when we will be able to generate revenues from sales, we will need to raise additional funds to continue to develop our business, respond to competitive pressures and to respond to unanticipated requirements or expenses. If we are not able to generate significant revenues from the sale of our products, we will not be able to maintain our operations or achieve a profitable level of operations.

The financial requirements of our Company will be dependent upon the financial support through credit facilities and additional sales of our equity securities. The issuance of additional equity securities by us may result in a significant dilution in the equity interests of our current shareholders. Should additional financing be needed, there is no assurance that we will be able to obtain further funds required for our continued operations or that additional financing will be available to us when needed or, if available, that it can be obtained on commercially reasonable terms. If we are not able to obtain the additional financing on a timely basis, we will not be able to meet our other obligations as they become due and we will be forced to scale down or perhaps even cease our operations.

We can give no assurance that we will be successful in implementing any phase, all phases of the proposed business plan, or that we will be able to continue as a going concern.

Credit Facility

Presently we have no revolving Credit Facility established. There is no guarantee that we will be able to enter into an agreement to establish a line of credit or that if we do enter into such agreement that it will be on favorable terms.

Off-Balance Sheet Arrangements

The Company does not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on the Company's financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to investors.

Critical Accounting Policies and Estimates

The following accounting principles and practices of AMP (or the Company) are set forth to facilitate the understanding of data presented in the consolidated financial statements:

Nature of operations

A developing stage company, AMP is a technology-driven business that delivers a full-performance, all electric, powertrain for passenger vehicles. Operating with three specific approaches, AMP converts existing internal combustion engine based vehicles to AMP designed and manufactured all electric powertrains, provides original equipment manufacturers (OEM's) with AMP designed and manufactured modular electric components, and provides electric powertrain engineering and consulting services to end-users. AMP has not recorded revenue since inception in February 2007, and is developing its operations through a sale, design and manufacturing facility located in Cincinnati, Ohio.

Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Property and depreciation

Property and equipment is recorded at cost. Depreciation is provided on the straight-line and accelerated methods over the estimated useful lives of the respective assets.

Advertising

Advertising and public relation costs are charged to operations when incurred. Advertising and public relation expense was approximately \$55,000, \$151,500 for the years ended December 31, 2009 and 2008 and \$241,500 for the period from inception to December 31, 2009, respectively.

Income taxes

With the consent of its shareholders, at the date of inception, AMP elected under the Internal Revenue Code to be taxed as an S corporation. Since shareholders of an S corporation are taxed on their proportionate share of the Company's taxable income, an S corporation is generally not subject to either federal or state income taxes at the corporate level. On December 28, 2009 pursuant to the merger transaction with TSO, Inc. the company revoked its election to be taxed as an S-corporation. As minimal activity occurred from the date of this merger to December 31, 2009, no provision or liability for federal or state income taxes has been included in the financial statements. TSO had not filed income tax returns during its period as a shell company.

Research and development costs

AMP expenses research and development costs as they are incurred. Research and development expense incurred was approximately \$1,140,000 and \$748,000 for the years ended December 31, 2009 and 2008 and \$2,159,000 for the period from inception to December 31, 2009, respectively, consisting of consulting, payroll and payroll taxes, engineering temporaries, purchased supplies, legal fees, parts and small tools.

Concentrations

AMP maintains its bank deposits in accounts that, at times, may exceed federally insured limits. AMP has not experienced any losses in such accounts and management does not believe it is exposed to significant risk on cash and cash equivalents.

Subsequent events

The Company evaluates events and transactions occurring subsequent to the date of the financial statements for matters requiring recognition or disclosure in the financial statements. The accompanying financial statements consider events through March 31, 2010.

From January 7, 2010 to February 1, 2010, TSO entered into subscription agreements with various accredited investors (the "January 2010 Accredited Investors") pursuant to which the January 2010 Accredited Investors purchased 59,560 shares of the Company's common stock (the "January 2010 Subscription Shares") for an aggregate purchase price of \$280,275.

On March 1, 2010, TSO issued a 6% promissory note in the principal amount of \$100,000 (the "March 2010 Note") to an accredited investor (the "March 2010 Lender") in consideration of \$100,000. In addition to the March 2010 Note, the March 2010 Lender also received a Common Stock Purchase Warrant to acquire 8,929 shares of common stock at an exercise price of \$5.60 per share exercisable for a period of three years. The March 2010 Note bears interest at the rate of 6% per annum. The March 2010 Note matures on the earlier of the Company closing a financing or June 30, 2010. The full principal amount of the note is due upon a default.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Stockholders
Title Starts, Online, Inc. (A Developing Stage Company)
Cincinnati, Ohio

We have audited the accompanying balance sheets of Title Starts Online, Inc. (A Developing Stage Company) as of December 31, 2009 and 2008 and the related statements of operations, stockholders' equity, and cash flows for the years then ended and for the period from inception, February 20, 2007, to December 31, 2009. These financial statements are the responsibility of the company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Title Starts Online, Inc. as of December 31, 2009 and 2008, and the results of its operations and its cash flows for the years then ended and for the period from inception, February 20, 2007, to December 31, 2009 in conformity with accounting principles generally accepted in the United States of America.

The accompanying financial statements have been prepared assuming the Company will continue as a going concern. As described in note 1, the Company has not had any sales and has negative working capital and stockholder's deficits, which raise substantial doubt about its ability to continue as a going concern. Management's plan in regard to this matter is also discussed in note 1. The financial statements do not include any adjustments that might result from the outcome of these uncertainties.
