(Do not check if a smaller reporting company)

CALCULATION OF REGISTRATION FEE

Title Of Each Class Of Securities To Be Registered	Amount to be Registered	Proposed Maximum Aggregate Offering Price	Amount of Registration Fee
Common Units	204,902,226(1)	\$2,212,944,040(2)	\$157,783(3)

- (1) The number of common units of the registrant being registered is based upon the number of common units to be distributed to holders of units in KKR & Co. (Guernsey) L.P. ("KKR Guernsey"). Such number does not include 478,105,194 common units that are beneficially held by KKR Holdings L.P. ("KKR Holdings"). On a fully diluted basis, the registrant has 683,007,420 common units outstanding.
- (2) Represents the proposed maximum aggregate offering price, estimated solely for purpose of calculating the registration fee pursuant to Rules 457(c) under the Securities Act of 1933, as amended, and based on the market value of the units of KKR Guernsey. The proposed maximum aggregate offering price is the product of (i) \$10.80, the average of the bid and asked price per share of the common units on Euronext Amsterdam on March 5, 2010 and (ii) 204,902,226, the number of common units to be registered pursuant to this registration statement and based on the KKR Guernsey units outstanding.
- (3) Registration fees of \$38,375 have previously been paid with respect to \$1,250,000,000 aggregate initial offering price of securities of the registrant under the Registration Statement on Form S-1 (No. 333-144335) of the registrant filed on July 3, 2007. Pursuant to Rule 457(p), such unutilized filing fee may be applied to the filing fee payable pursuant to this Registration Statement.

The Registrant hereby amends this Registration Statement on such date or dates as may be necessary to delay its effective date until the Registrant shall file a further amendment which specifically states that this Registration Statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933 or until the Registration Statement shall become effective on such date as the Commission, acting pursuant to said Section 8(a), may determine.

Table of Contents

The information in this prospectus is not complete and may be changed. We may not offer these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities and it is not soliciting an offer to buy these securities in any jurisdiction where the offer or sale is not permitted.

SUBJECT TO COMPLETION, DATED MARCH 12, 2010

PRELIMINARY PROSPECTUS

KKR & Co. L.P.

204,902,226 Common Units

Representing Limited Partner Interests

We are registering the distribution of 204,902,226 common units representing limited partner interests in our business to holders of common units of KKR & Co. (Guernsey) L.P. and, concurrently with such distribution, listing our common units on the New York Stock Exchange under the symbol "KKR." We refer to KKR & Co. (Guernsey) L.P. as "KKR Guernsey," to the distribution of our common units to holders of KKR Guernsey units as the "In-Kind Distribution" and to the listing of our common units on the New York Stock Exchange as the "U.S. Listing."

Pursuant to the In-Kind Distribution, each KKR Guernsey unitholder will receive one of our common units for each unit of KKR Guernsey held when the U.S. Listing becomes effective. In the aggregate, the common units that will be distributed to holders of KKR Guernsey units represent a 30% interest in our business. The remaining 70% interest in our business is held by our principals, who beneficially own 478,105,194 common units through KKR Holdings L.P. On a fully diluted basis, we have an aggregate of 683,007,420 common units outstanding.

KKR Guernsey is a Guernsey limited partnership whose common units are currently listed on Euronext Amsterdam by NYSE Euronext, the regulated market of Euronext Amsterdam N.V., which we refer to as Euronext Amsterdam. The last reported sale price of KKR Guernsey units on March 11, 2010 was \$11.12 per unit. Because the assets of KKR Guernsey consist solely of its limited partner interests in our business, the In-Kind Distribution will result in a dissolution of KKR Guernsey and a delisting of its units from Euronext Amsterdam. To preserve a trading market for interests in our business, the In-Kind Distribution is conditioned upon our common units being approved for listing on the New York Stock Exchange subject to official notice of issuance.

KKR Guernsey unitholders will not be required to pay any consideration for the common units they receive in the In-Kind Distribution. No vote or further action of KKR Guernsey unitholders is required in connection with the registration, listing or distribution of our common units. We are not asking you for a proxy and request that you do not send us a proxy.

In reviewing this prospectus, you should carefully consider the matters described under the caption "Risk Factors" beginning on page 16 of this prospectus. These risks include but are not limited to the following:

We are managed by a general partner, which we refer to as our Managing Partner, and do not have our own directors or officers. Our unitholders will have only limited voting rights and will have no right to elect or remove our Managing Partner or its directors or officers. Through KKR Holdings, our principals generally have sufficient voting power to determine the outcome of any matters that may be submitted for a vote of our unitholders.

Edgar Filing: KKR & Co. L.P. - Form S-1

We believe that we will be treated as a partnership for U.S. federal income tax purposes and you therefore will be required to take into account your allocable share of items of our income, gain, loss and deduction in computing your U.S. federal income tax liability. You may not receive sufficient cash distributions to pay your allocable share of our net taxable income or even the tax liability that results from that income.

Various forms of legislation have been introduced that could, if enacted, preclude us from qualifying as a partnership for U.S. federal income tax purposes under the rules governing publicly traded partnerships and could require that we be treated as a corporation for U.S. federal income tax purposes. If the above or any similar legislation or regulation were to be enacted and apply to us, we would incur a material increase in our tax liability that could result in a reduction in the value of our common units.

Neither the Securities and Exchange Commission nor any other regulatory body has approved or disapproved these securities or passed upon the accuracy or adequacy of this prospectus. Any representation to the contrary is a criminal offense.

The date of this prospectus is _____, 2010.

You should rely only on the information contained in this prospectus or any free writing prospectus. We have not authorized anyone to provide you with additional or different information. The information in this prospectus is accurate only as of the date of this prospectus, regardless of the time of delivery of this prospectus or any distribution of our common units.

This prospectus has been prepared using a number of conventions, which you should consider when reading the information contained herein. Unless the context suggests otherwise, (i) references to "KKR," "we," "us," "our" and "our partnership" refer to KKR & Co. L.P. and its subsidiaries; (ii) references to "our Managing Partner" are to KKR Management LLC, which acts as our general partner; (iii) references to "KKR Guernsey" are to KKR & Co. (Guernsey) L.P. (f/k/a KKR Private Equity Investors, L.P. or "KPE"); (iv) references to the "Combined Business" of KKR refer to the business of KKR that resulted from the combination of its asset management business with the assets and liabilities of KKR Guernsey on October 1, 2009; (v) references to the "KKR Group Partnerships" are to KKR Management Holdings L.P. and KKR Fund Holdings L.P., which became holding companies for the Combined Business on October 1, 2009; and (vi) references to the "KPE Investment Partnership" are to KKR PEI Investments, L.P., a lower tier partnership through which KPE made all of its investments. Unless otherwise indicated, references to equity interests in the Combined Business,

or to percentage interests in the Combined Business, reflect the aggregate equity of the KKR Group Partnerships and are net of amounts that have been allocated to our principals in respect of the carried interest from the Combined Business as part of our "carry pool" and certain minority interests in our business that were not acquired by the KKR Group Partnerships in connection with our reorganization into a holding company structure and our acquisition of the assets and liabilities of KKR Guernsey. See "Organizational Structure" and "Management's Discussion and Analysis of Financial Condition and Results of Operations Impact of the Transactions." References to our "principals" are to our senior executives and operating consultants who hold interests in the Combined Business through KKR Holdings and references to our "senior principals" are to principals who also hold interests in our Managing Partner entitling them to vote for the election of its directors.

On October 1, 2009, we completed the acquisition of all of the assets and liabilities of KKR Guernsey and, in connection with such acquisition, completed a series of transactions pursuant to which the business of KKR was reorganized into a holding company structure. We refer to the acquisition of the assets and liabilities of KKR Guernsey as the "Combination Transaction," to our reorganization into a holding company structure as the "Reorganization Transactions" and to the Combination Transaction and the Reorganization Transactions collectively as the "Transactions." Our financial information for periods prior to the Transactions is based on a group, for accounting purposes, of certain combined and consolidated entities under the common control of our senior principals and under the common ownership of our principals and certain other individuals who have been involved in our business, and our financial information for periods subsequent to the Transactions is based on a group, for accounting purposes, consisting of KKR & Co. L.P. and its consolidated subsidiaries.

KKR Group Holdings L.P., which we refer to as "Group Holdings," is the parent of our consolidated accounting group for periods subsequent to October 1, 2009 and is the entity through which KKR Guernsey currently holds its interests in the KKR Group Partnerships. Group Holdings serves, directly and indirectly, as the general partner of the KKR Group Partnerships. Our Managing Partner serves as the ultimate general partner of Group Holdings and the KKR Group Partnerships. KKR Guernsey, through its interest in Group Holdings, holds 30% of the outstanding KKR Group Partnership Units. See "Summary The U.S. Listing KKR Group Partnership Units."

In this prospectus, the terms "assets under management" or "AUM" represent the assets from which we are entitled to receive fee income or a carried interest and general partner capital. We calculate the amount of AUM as of any date as the sum of: (i) the fair value of the investments of our investment funds plus uncalled capital commitments from these funds; (ii) the fair value of investments in our co-investment vehicles; (iii) the net asset value of certain of our fixed income products; and (iv) the value of outstanding structured finance vehicles. You should note that our calculation of AUM may differ from the calculations of other asset managers and, as a result, our measurements of AUM may not be comparable to similar measures presented by other asset managers. Our definition of AUM is not based on any definition of AUM that is set forth in the agreements governing the investment funds, vehicles or accounts that we manage.

In this prospectus, the terms "fee paying assets under management" or "FPAUM" represent only those assets under management from which we receive fees. FPAUM is the sum of all of the individual fee bases that are used to calculate our fees and differs from AUM in the following respects: (i) assets from which we do not receive a fee are excluded (i.e., assets with respect to which we receive only carried interest); and (ii) certain assets, primarily in our private equity funds, are reflected based on capital commitments and invested capital as opposed to fair value because fees are not impacted by changes in the fair value of underlying investments.

Unless otherwise indicated, references in this prospectus to our fully diluted common units outstanding, or to our common units outstanding on a fully diluted basis, reflect both actual common units outstanding as well as common units into which KKR Group Partnership Units not held by us are exchangeable pursuant to the terms of the exchange agreement described in this prospectus, but do not reflect common units available for issuance pursuant to our Equity Incentive Plan.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This prospectus contains forward-looking statements, which reflect our current views with respect to, among other things, our operations and financial performance. You can identify these forward-looking statements by the use of words such as "outlook," "believe," "expect," "potential," "continue," "may," "should," "seek," "approximately," "predict," "intend," "will," "plan," "estimate," "anticipate" or the negative version of these words or other comparable words. Forward-looking statements are subject to various risks and uncertainties. Accordingly, there are or will be important factors that could cause actual outcomes or results to differ materially from those indicated in these statements. These factors include, but are not limited to, those described under "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations". These factors should not be construed as exhaustive and should be read in conjunction with the other cautionary statements that are included in this prospectus. We do not undertake any obligation to publicly update or review any forward-looking statement, whether as a result of new information, future developments or otherwise.

MARKET AND INDUSTRY DATA

This prospectus includes market and industry data and forecasts that we have derived from independent reports, publicly available information, various industry publications, other published industry sources and internal data and estimates. Independent reports, industry publications and other published industry sources generally indicate that the information contained therein was obtained from sources believed to be reliable. Internal data and estimates are based upon information obtained from investors in our funds, trade and business organizations and other contacts in the markets in which we operate and our understanding of industry conditions. Although we believe that such information is reliable, we have not had this information verified by any independent sources.

Table of Contents

QUESTIONS AND ANSWERS ABOUT THE U.S. LISTING

The questions and answers below highlight only selected information with respect to the U.S. Listing. They may not contain all of the information that may be important to you. You should read carefully this entire prospectus to fully understand the U.S. Listing.

Q:
What is the U.S. Listing?

A:
We have elected to list our common units on the New York Stock Exchange. In connection with such listing, (i) KKR Guernsey will contribute its assets to us in return for our NYSE-listed common units, (ii) KKR Guernsey will make an in-kind distribution of our common units to its unitholders and will dissolve and (iii) each KKR Guernsey unit will cease to be traded on Euronext Amsterdam and will be cancelled.

Q:
What do I have to do to participate in the U.S. Listing and In-Kind Distribution?

A:
No action is required on your part. KKR Guernsey unitholders are not required to pay any cash or deliver any other consideration to us to receive our common units distributable to them in connection with the U.S. Listing.

Q:
What will I receive in connection with the U.S. Listing?

A:
Each KKR Guernsey unitholder will receive one of our common units for each unit of KKR Guernsey held upon the effectiveness of the U.S. Listing. Your proportionate interest in our business will not change.

Q:
What is being distributed in connection with the U.S. Listing?

A:
204,902,226 of our common units will be distributed in connection with the U.S. Listing. In the aggregate, the common units that will be distributed to holders of KKR Guernsey units represent a 30% interest in our business. The remaining 70% interest in our business is held by our principals, who beneficially own 478,105,194 common units through KKR Holdings L.P. On a fully diluted basis, we have an aggregate of 683,007,420 common units outstanding.

Q:
When will the In-Kind Distribution occur?

A:
The In-Kind Distribution will occur concurrently with the listing of our common units on the New York Stock Exchange.

Q:
If I sell my KKR Guernsey units on or before the U.S. Listing, am I still entitled to receive common units distributable with respect to the KKR Guernsey units I sold?

A:
If you have sold KKR Guernsey units on or prior to the U.S. Listing but your transaction has not been settled on or prior to the U.S. Listing, your transaction will be settled in our common units. If, however, you sold KKR Guernsey units on or prior to the U.S. Listing and your transaction has settled prior to the U.S. Listing, the purchaser of the KKR Guernsey units will be entitled to receive our common units distributable with respect to the KKR Guernsey units you sold.

Q:
How will KKR Guernsey distribute our common units?

A:
The distribution of our common units and cancellation of KKR Guernsey units will occur automatically through the clearing systems of your bank or broker.

Q: *What are the U.S. Federal income tax consequences to me of the U.S. Listing and Distribution?*

A: See "Material U.S. Federal Tax Considerations" in this prospectus.

Table of Contents

Q:

Are there risks associated with owning our common units?

A:

We are subject to both general and specific risks and uncertainties relating to our business. Our business is also subject to risks relating to the U.S. Listing. Following the U.S. Listing, we will also be subject to risks relating to being a publicly traded company in the United States. Accordingly, you should read carefully the information set forth in the section entitled "Risk Factors."

Table of Contents

SUMMARY

This summary highlights information contained elsewhere in this prospectus and does not contain all the information you should consider in connection with your receipt of our common units. You should read this entire prospectus carefully, including the section entitled "Risk Factors" and the historical financial statements and related notes included elsewhere herein.

Overview

KKR

Led by Henry Kravis and George Roberts, we are a global alternative asset manager with \$52.2 billion in AUM as of December 31, 2009 and a 34-year history of leadership, innovation and investment excellence. When our founders started our firm in 1976, they established the principles that guide our business approach today, including a patient and disciplined investment process; the alignment of our interests with those of our investors, portfolio companies and other stakeholders; and a focus on attracting world-class talent.

Our business offers a broad range of asset management services to our investors and provides capital markets services to our firm, our portfolio companies and our clients. Throughout our history, we have consistently been a leader in the private equity industry, having completed more than 170 private equity investments with a total transaction value in excess of \$425 billion. In recent years, we have grown our firm by expanding our geographical presence and building businesses in new areas, such as fixed income and capital markets. Our new efforts build on our core principles, leverage synergies in our business, and allow us to capitalize on a broader range of opportunities that we source. Additionally, we have increased our focus on servicing our existing investors and have invested meaningfully in developing relationships with new investors.

With over 600 people, we conduct our business through 14 offices on four continents, providing us with a pre-eminent global platform for sourcing transactions, raising capital and carrying out capital markets activities. We have grown our AUM significantly, from \$15.1 billion as of December 31, 2004 to \$52.2 billion as of December 31, 2009, representing a compounded annual growth rate of 28.1%. Our growth has been driven by value that we have created through our operationally focused investment approach, the expansion of our existing businesses, our entry into new lines of business, innovation in the products that we offer investors, an increased focus on providing tailored solutions to our clients and the integration of capital markets distribution activities.

On October 1, 2009, we completed our acquisition of all of the assets and liabilities of KPE and our Combined Business became listed on Euronext Amsterdam. This acquisition, which we refer to as the Combination Transaction, has provided us with a significant source of permanent capital to further grow our business and an equity currency that we may use to attract, retain and incentivize our employees and to fund opportunistic acquisitions. The Combination Transaction did not involve the payment of any cash consideration or involve an offering of any newly issued securities to the public, and our principals did not sell any interests in our Combined Business. Following the Combination Transaction, we operate our business through three business segments: Private Markets; Public Markets; and Capital Markets and Principal Activities.

Business Segments

Private Markets

Our Private Markets segment is comprised of our global private equity business, which manages and sponsors a group of investment funds and vehicles that invest capital for long-term appreciation, either through controlling ownership of a company or strategic minority positions. These funds and vehicles build on our sourcing advantage and the strong industry knowledge, operating expertise and

Table of Contents

regulatory and stakeholder management skills of our professionals, operating consultants and senior advisors to identify attractive investment opportunities and create and realize value for investors.

From our inception through December 31, 2009, we have raised 15 investment funds with approximately \$59.7 billion of capital commitments and have sponsored a number of fee and carry paying co-investment structures that allow us to commit additional capital to transactions. As of December 31, 2009, the segment had \$38.8 billion of AUM and its actively investing funds included geographically differentiated investment funds and vehicles with over \$13.7 billion of uncalled commitments, providing a significant source of capital that may be deployed globally.

Public Markets

Our Public Markets segment is comprised primarily of our fixed income businesses which manage capital in liquid credit strategies, such as leveraged loans and high yield bonds, and less liquid credit products, such as mezzanine debt and capital solutions investments. Our capital solutions effort focuses on special situations investing, including rescue financing, distressed investing, debtor-in-possession financing and exit financing.

We execute these investment strategies through a specialty finance company and a number of investment funds, structured finance vehicles and separately managed accounts. These funds, vehicles and accounts leverage our global investment platform, experienced investment professionals and ability to adapt our investment strategies to different market conditions to capitalize on investment opportunities that may arise at every level of the capital structure.

As of December 31, 2009, the segment had \$13.4 billion of AUM, including \$0.9 billion of assets managed in a publicly traded specialty finance company, \$8.1 billion of assets managed in structured finance vehicles and \$4.4 billion of assets managed in other types of investment vehicles and separately managed accounts. This AUM includes \$0.8 billion of uncalled commitments to this segment.

Capital Markets and Principal Activities

Our Capital Markets and Principal Activities segment combines the assets we acquired in the Combination Transaction with our global capital markets business. Our capital markets business supports our firm, our portfolio companies and our clients by providing tailored capital markets advice and developing and implementing both traditional and non-traditional capital solutions for investments and companies seeking financing. Our capital markets services include arranging debt and equity financing for transactions, placing and underwriting securities offerings, structuring new investment products and providing capital markets services. To allow us to carry out these activities, we are registered or authorized to carry out certain broker-dealer activities in various countries in North America, Europe and Asia.

The assets that we acquired in the Combination Transaction have provided us with a significant source of capital to further grow and expand our business, increase our participation in our existing portfolio of businesses and further align our interests with those of our investors and other stakeholders. We believe that the market experience and skills of our capital markets professionals and the investment expertise of professionals in our Private Markets and Public Markets segments will allow us to continue to grow and diversify this asset base over time.

Strengths

Over our history, we have developed a business approach that centers around three key principles: (i) adhere to a patient and disciplined investment process; (ii) align our interests with those of our investors and other stakeholders; and (iii) attract world-class talent for our firm and portfolio companies. Based on these principles, we have developed a number of strengths that we believe

Table of Contents

differentiate us as an alternative asset manager and provide additional competitive advantages that can be leveraged to grow our business and create value. These include:

Firm Culture and People

When our founders started our firm in 1976, leveraged buyouts were a novel form of corporate finance. With no financial services firm to use as a model and with little interest in copying an existing formula, our founders sought to build a firm based on principles and values that would provide a proper institutional foundation for years to come. We believe that our success and industry leadership has been largely attributable to the culture of our firm and the values that we live by. We believe that our experienced and talented people, who represent our culture and values, have been the key to our success and growth. These values and our "one firm" culture will not change as a result of the U.S. Listing.

Leading Brand Name

The "KKR" name is associated with: experience and success in private equity transactions worldwide; a focus on operational value creation in portfolio companies; a strong investor base; a global network of leading business relationships; a reputation for integrity and fair dealing; creativity and innovation; and superior investment performance. The strength of this brand helps us attract world-class talent, raise capital and obtain access to investment opportunities. It has also provided the firm with a foundation to expand and diversify into new business lines. We intend to leverage the strength of our brand as we continue to grow our businesses.

Global Presence and Integrated One Firm Approach

We are a global firm. Although our operations span multiple continents and business lines, we have a common culture and are focused on sharing knowledge, resources and best practices throughout our offices and across asset classes. With offices in 14 major cities on four continents, we have created an integrated global platform for sourcing and making investments in multiple asset classes and throughout the capital structure. Our global and diversified operations are supported by extensive local market knowledge, which allows us to deploy capital across a number of geographical markets and raise capital from a broad base of investors globally.

Our investment processes are overseen by investment committees that operate globally and a portfolio management committee monitors our private equity investments. Where appropriate, investment professionals across our various businesses work together and with our capital markets team to source and execute investment opportunities. We believe that operating as an integrated firm enhances the growth and stability of our business and helps optimize the decisions we make across asset classes and geographies.

Sourcing Advantage

We believe that we have a competitive advantage for sourcing new investment opportunities as a result of our internal deal generation strategies, industry expertise and global network. Across our businesses, our investment professionals are organized into industry groups and work closely with our operating consultants and senior advisors to identify attractive businesses. These teams conduct their own primary research, develop views on industry themes and trends, and identify companies in which we may want to invest.

We also maintain relationships with leading executives from major companies, commercial and investment banks and other investment and advisory institutions. Through our industry focus and global network, we often are able to obtain exclusive or limited access to investments that we identify. Our reputation as a patient and long-term investor also makes us an attractive source of capital for

Table of Contents

companies and, through our relationships with major financial institutions, we generate additional transaction opportunities.

Distinguished Track Record Across Economic Cycles

We have successfully employed our patient and disciplined investment process through all types of economic and financial conditions, developing a track record that distinguishes the firm. From our inception through December 31, 2009, our private equity funds with at least 36 months of investment activity generated a cumulative gross IRR of 25.8%, compared to the 11.5% gross IRR achieved by the S&P 500 Index over the same period. Additionally, we established our fixed income business in 2004 and, despite difficult market conditions, the returns in each of our core strategies since inception have outperformed relevant benchmarks.

Sizeable Long-Term Capital Base

As of December 31, 2009, we had \$52.2 billion of AUM, making us one of the largest independent alternative asset managers in the world. Our private equity funds and certain of our co-investment vehicles receive capital commitments from investors that may be called for during an investment period that typically lasts for six years and may remain invested for up to approximately 12 years. In addition, our specialty finance company as well as our structured finance vehicles include capital that has either long-dated or no maturities. As of December 31, 2009, approximately 93%, or \$48.6 billion, of our AUM had a contractual life at inception of at least 10 years, which has provided a stable source of long-term capital for our business.

Long-Standing Investor Relationships

We have established strong relationships with our investors, which has allowed us to raise significant amounts of capital for investment across a broad range of asset classes. We have a diversified group of investors, including some of the largest public and private pension plans, global financial institutions, university endowments and other institutional and public market investors. Many of these investors have invested with us for decades in various products that we have sponsored. We continue to develop relationships with new significant investors worldwide, providing an additional source of capital for our investment vehicles. We believe that the strength, breadth, duration and diversity of our investor relationships provides us with a significant advantage for raising capital from existing and new sources and will help us continue to grow our business.

Alignment of Interests

Since our inception, one of our fundamental philosophies has been to align the interests of the firm and our people with the interests of our investors, portfolio companies and other stakeholders. We achieve this by putting our own capital behind our ideas. We and our principals have over \$6.5 billion invested in or committed to our own funds and portfolio companies, including \$4.2 billion funded through our balance sheet, \$1.3 billion of additional commitments to investment funds and \$1.0 billion in personal investments.

Creativity and Innovation

We pioneered the development of the leveraged buyout and have worked throughout our history to create new and innovative structures for both raising capital and making investments. Our history of innovation includes establishing permanent capital vehicles for our Public Markets and Private Markets segments and developing new capital markets and distribution capabilities in North America, Europe and Asia.

Table of Contents

Growth Strategy

We intend to grow our business and create value for our common unitholders by:

generating superior returns on assets that we manage and our principal assets;

growing our assets under management;

entering new businesses and creating new products that leverage our core competencies;

continuing our expansion into new geographies with respect to both investing and raising capital;

expanding our capital markets business; and

using our principal assets to grow and invest in our business.

Why We are Undertaking the U.S. Listing

Our decision to pursue a U.S. Listing is based on our conclusion that the U.S. Listing will benefit KKR Guernsey unitholders over the long term. We view the U.S. Listing as part of our continued commitment to KKR Guernsey's unitholders, who supported us in the initial formation of KPE and its recent combination with our business. We believe that the U.S. Listing offers the opportunity to build our firm by providing new opportunities to invest in our business, attract and incentivize world-class people, and enhance the diversity, scale and capital of our business.

The Combination Transaction and Reorganization Transactions

On October 1, 2009, we completed the acquisition of all of the assets and liabilities of KKR Guernsey and, in connection with such acquisition, completed a series of transactions pursuant to which the business of KKR was reorganized into a holding company structure. We refer to these transactions as the "Transactions." Following the Transactions, KKR Guernsey holds a 30% economic interest in our Combined Business through Group Holdings, and our principals hold a 70% economic interest in our Combined Business through KKR Holdings. Our senior principals also control us through their control of our Managing Partner. For a description of the Combination Transaction, the Reorganization Transactions and the components of our business owned by the KKR Group Partnerships, see "Organizational Structure."

Risks Related to Our Common Units

Holding our common units involves substantial risks and uncertainties. Some of the more significant challenges and risks related to our common units include:

our business is materially affected by conditions in the financial markets and economic conditions, and recent disruptions in the global financial markets, including considerable declines in the valuations of debt and equity securities, have negatively impacted our financial performance, increased the cost of financing leveraged buyout transactions and limited the availability of that financing;

we are dependent on our principals, including our founders and other key personnel;

our net income and cash flow are volatile;

Edgar Filing: KKR & Co. L.P. - Form S-1

any underperformance of our investments could adversely affect our ability to maintain or grow our AUM;

our unitholders have limited ability to influence decisions regarding our business;

our business is subject to extensive regulation and scrutiny, which may make our business more difficult to operate;

Table of Contents

the valuation methodologies for certain assets in our funds are subject to significant management judgment;

our organizational structure may give rise to the potential for conflicts of interest among our Managing Partner, its affiliates and us;

many of our funds focus on illiquid investments;

there is no established trading market for our common units in the United States;

we may be subject to substantial litigation and as a result incur significant liabilities and suffer damage to our professional reputation;

you may be required to make tax payments in connection with your ownership of our common units in excess of the cash distributions you receive in any specific year;

our emphasis on private equity investments, which are among the largest in the industry, involve particular risks and uncertainties; and

our investments in companies that are based outside of the United States present potentially greater risks than similar investments in the United States.

In addition, legislation has been introduced that would tax as a corporation a publicly traded partnership, such as us, that directly or indirectly derives income from investment advisor or asset management services. Separately, legislation has been passed in the U.S. House of Representatives that would generally (i) treat carried interest as non-qualifying income under the tax rules applicable to publicly traded partnerships, which could preclude us from qualifying as a partnership for U.S. federal income tax purposes, and (ii) tax carried interest as ordinary income for U.S. federal income taxes, which could require to hold our interest in carried interest through taxable subsidiary corporations. If any of these pieces of legislation or any similar legislation or regulation were to be enacted and apply to us, we would incur a material increase in our tax liability, which could result in a reduction in the value of our common units. Please see "Risk Factors" for a discussion of these and additional factors related to our common units.

Table of Contents

The U.S. Listing

Issuer	KKR & Co. L.P., a Delaware limited partnership.
U.S. Listing	On February 24, 2010, we delivered to KKR Guernsey a notice of our intention to exercise a right to seek a listing of our common units on the New York Stock Exchange and to have KKR Guernsey make an in-kind distribution of our common units to holders of KKR Guernsey units upon completion of the U.S. Listing. Pursuant to the In-Kind Distribution, each KKR Guernsey unitholder will receive one of our common units for each KKR Guernsey unit when the U.S. Listing becomes effective. Because the assets of KKR Guernsey consist solely of its interests in our business, the In-Kind Distribution will result in the dissolution of KKR Guernsey and a delisting of its units from Euronext Amsterdam. To preserve a trading market for interests in our business, the In-Kind Distribution is conditioned upon our common units being approved for listing on the New York Stock Exchange subject to official notice of issuance.
Common units	Our common units represent limited partner interests in our partnership. The remaining 70% of our fully diluted common units are beneficially held by our principals through KKR Holdings in the form of exchangeable KKR Group Partnership Units as described below. See "KKR Group Partnership Units." On a fully diluted basis, we have an aggregate of 683,007,420 common units outstanding.
KKR Group Partnership Units	In October 2009, our Combined Business was reorganized under the KKR Group Partnerships. Each KKR Group Partnership has an identical number of partner interests and, when held together, one Class A partner interest in each of the KKR Group Partnerships together represents one "KKR Group Partnership Unit." Upon completion of the U.S. Listing and In-Kind Distribution, we will hold KKR Group Partnership Units representing a 30% interest in the Combined Business and our principals will hold KKR Group Partnership Units representing a 70% interest in the Combined Business through their interests in KKR Holdings. KKR Group Partnership Units that are held by KKR Holdings are exchangeable for our common units on a one-for-one basis, subject to customary conversion rate adjustments for splits, unit distributions and reclassifications and compliance with applicable lock-up, vesting and transfer restrictions. See " Exchange Rights."
Voting Rights; Special Voting Units	Our Managing Partner, which serves as our sole general partner, will manage all of our business and affairs. You will not hold securities of our Managing Partner. Unlike the holders of common stock in a corporation, you will have only limited voting rights relating to certain matters affecting your investment and you will not have the right to elect or remove our Managing Partner or its directors, who will be appointed by our senior principals.

Table of Contents

	<p>Through KKR Holdings, our principals will hold special voting units in our partnership in an amount that is equal to the number of exchangeable KKR Group Partnership Units that KKR Holdings holds from time to time. These special voting units will entitle our principals to cast an equivalent number of votes on those few matters that may be submitted to a vote of our unitholders. Due to the foregoing, our principals generally will have sufficient voting power to determine the outcome of any matter that may be submitted to a unitholder vote. See "Description of Our Limited Partnership Agreement Meetings; Voting."</p>
Distribution Policy	<p>We intend to make quarterly cash distributions in amounts that in the aggregate are expected to constitute substantially all of the cash earnings of our asset management business in excess of amounts determined by our Managing Partner to be necessary or appropriate to provide for the conduct of our business, to make appropriate investments in our business and our investment funds and to comply with applicable law and any of our debt instruments or other agreements. We do not intend to distribute gains on our principal assets, other than potentially certain tax distributions to the extent that distributions for the relevant tax year were otherwise insufficient to cover certain tax liabilities of our partners, as calculated by us. For the purposes of our distribution policy, our distributions are expected to consist of (i) our fee related earnings net of taxes and certain other adjustments, (ii) carry distributions received from our investment funds and vehicles that have not been allocated as part of our carry pool, and (iii) certain tax distributions, if any. See "Distribution Policy."</p>
Exchange Rights	<p>We are party to an exchange agreement pursuant to which KKR Holdings may, up to four times each year, exchange KKR Group Partnership Units held by them for our common units on a one-for-one basis, subject to customary conversion rate adjustments for splits, unit distributions and reclassifications and compliance with applicable lock-up, vesting and transfer restrictions. Under certain circumstances, we may settle exchanges of KKR Group Partnership Units with cash in an amount equal to the fair market value of our common units that would otherwise be deliverable in such exchanges. See "Organizational Structure Exchange Agreement" and "Certain Relationships and Related Transactions Exchange Agreement."</p>

Table of Contents

Tax Receivable Agreement

When KKR Holdings or its transferees transfers their interests in us, we expect, as a result, an increase in the tax basis of certain of our assets that would not otherwise have been available to us. This increase in tax basis may increase depreciation and amortization deductions for U.S. federal income tax purposes and therefore reduce the amount of tax that our corporate subsidiary would otherwise be required to pay in the future.

We have entered into a tax receivable agreement with KKR Holdings pursuant to which we will be required to pay to KKR Holdings or its transferees 85% of the amount of cash savings, if any, in U.S. federal, state and local income tax that we actually realize as a result of tax benefits resulting from certain exchanges made pursuant to our exchange agreement with KKR Holdings, as well as 85% of the amount of any such savings we actually realize as a result of increases in tax basis that arise due to payments under the tax receivable agreement. A termination of the agreement or a change of control could give rise to similar payments based on tax savings that we would be deemed to realize in connection with such events. In the event that other of our current or future subsidiaries become taxable as corporations and acquire KKR Group Partnership Units in the future, or if we become taxable as a corporation for U.S. federal income tax purposes, each will become subject to a tax receivable agreement with substantially similar terms. See "Certain Relationships and Related Party Transactions Tax Receivable Agreement." Although we are not aware of any issue that would cause the IRS to challenge a tax basis increase, neither KKR Holdings nor its transferees will reimburse us for any payments previously made under the tax receivable agreement if such tax basis increase, or the benefits of such increases, were successfully challenged by the IRS. See "Certain Relationships and Related Party Transactions Tax Receivable Agreement."

NYSE symbol

We intend to list our common units on the NYSE under the symbol "KKR."

Risk factors

See "Risk Factors" for a discussion of risks you should carefully consider in connection with our common units.

In this prospectus, unless otherwise indicated, the number of fully diluted common units outstanding and other information that is based thereon does not reflect 102,451,113 additional common units that have been reserved for future issuance under our Equity Incentive Plan. The issuance of common units pursuant to awards under the Equity Incentive Plan would dilute common unitholders and KKR Holdings pro rata in accordance with their respective percentage interests in the KKR Group Partnerships.

KKR & Co. L.P. was formed as a Delaware limited partnership on June 25, 2007. Our Managing Partner was formed as a Delaware limited liability company on June 25, 2007. Our principal executive offices are located at 9 West 57th Street, Suite 4200, New York, New York 10019, and our telephone number is +1 (212) 750-8300. Our website is located at *www.kkr.com*.

Table of Contents**Summary Historical Combined Financial Data**

The following summary historical consolidated and combined financial information and other data of KKR should be read together with "Organizational Structure," "Unaudited Pro Forma Financial Information," "Selected Historical Financial and Other Data," "Management's Discussion and Analysis of Financial Condition and Results of Operations" and the consolidated and combined financial statements and related notes included elsewhere in this prospectus. We derived the summary historical consolidated and combined financial data as of December 31, 2008 and 2009 and for the years ended December 31, 2007, 2008 and 2009 from the audited consolidated and combined financial statements included elsewhere in this prospectus. We derived the summary historical consolidated and combined financial data as of December 31, 2007 from audited combined financial statements that are not included in this prospectus. The summary historical consolidated and combined financial information presented below reflects the economic impact of the Transactions for periods following October 1, 2009.

	For the Years Ended December 31,

Uncalled commitments (period end)(11)	\$ 11,530,417	\$ 14,930,142	\$ 14,544,427

- (1) Includes non-cash charges arising from the issuance and vesting of interests in KKR Holdings upon and following the completion of the Transactions on October 1, 2009 in the amounts of \$481.4 million recorded in employee compensation and benefits expense and \$81.0 million recorded in general, administrative and other expense. In addition, allocations to our carry pool resulted in \$163.1 million recorded in employee compensation and benefits expense and \$4.1 million recorded in general, administrative and other expense.
- (2) Prior to the Transactions, most of the entities in our consolidated group were taxed as partnerships and our income was generally allocated to, and the resulting tax liability generally was borne by, our principals at an individual level. Accordingly, the taxes they paid are not reflected in our consolidated and combined financial statements. Following the Transactions, certain of our income will be subject to corporate tax.
- (3) Subsequent to the Transactions, net income (loss) attributable to Group Holdings reflects only those amounts that are allocable to KKR Guernsey's 30% interest in our Combined Business. Net Income (Loss) that is allocable to our principals' 70% interest in our Combined Business is reflected in net income (loss) attributable to noncontrolling interests held by KKR Holdings.
- (4) As of December 31, 2009, total Group Holdings partners' capital reflects only the portion of equity attributable to Group Holdings (reflecting KKR Guernsey's 30% interest in our Combined Business) and differs from partners' capital reported on a segment basis primarily as a result of the exclusion of the following items from our segment presentation: (i) the impact of income taxes; (ii) charges relating to the amortization of intangible assets; (iii) non-cash equity based charges; and (iv) allocations of equity to KKR Holdings. For a reconciliation to the \$4,152.9 million of partners' capital reported on a segment basis, please see "Management's Discussion and Analysis

Table of Contents

of Financial Condition and Results of Operations Segment Partners' Capital." KKR Holdings' 70% interest in our Combined Business is reflected as noncontrolling interests held by KKR Holdings and is not included in total Group Holdings partners' capital.

- (5) Our Capital Markets and Principal Activities segment was formed by combining the assets we acquired in the Combination Transaction with our global capital markets business upon completion of the Transactions on October 1, 2009. Accordingly, no segment data is reported for the Capital Markets and Principal Activities segment for the years ended December 31, 2007 and 2008. See "Unaudited Pro Forma Financial Information" for a summary of the economic impact of the Transactions.
- (6) Fee related earnings ("FRE") is comprised of segment operating revenues, less segment operating expenses. The components of FRE on a segment basis differ from the equivalent U.S. GAAP amounts on a combined basis as a result of: (i) the inclusion of management fees earned from consolidated funds that were eliminated in consolidation; (ii) the exclusion of expenses of consolidated funds; (iii) the exclusion of charges relating to the amortization of intangible assets; (iv) the exclusion of charges relating to carry pool allocations; (v) the exclusion of non-cash equity charges and other non-cash compensation charges; (vi) the exclusion of certain reimbursable expenses and (vii) the exclusion of certain non-recurring items.
- (7) Economic net income ("ENI") is a measure of profitability for our reportable segments and is comprised of: (i) FRE; plus (ii) segment investment income, which is reduced for carry pool allocations and management fee refunds; less (iii) certain economic interests in our segments held by third parties. ENI differs from net income on a U.S. GAAP basis as a result of: (i) the exclusion of the items referred to in FRE above; (ii) the exclusion of investment income relating to noncontrolling interests; and (iii) the exclusion of income taxes.
- (8) Assets under management ("AUM") represent the assets from which we are entitled to receive fee income or a carried interest and general partner capital. We calculate the amount of AUM as of any date as the sum of: (i) the fair value of the investments of our investment funds plus uncalled capital commitments from these funds; (ii) the fair value of investments in our co-investment vehicles; (iii) the net asset value of certain of our fixed income products; and (iv) the value of outstanding structured finance vehicles. You should note that our calculation of AUM may differ from the calculations of other asset managers and, as a result, our measurements of AUM may not be comparable to similar measures presented by other asset managers. Our definition of AUM is not based on any definition of AUM that is set forth in the agreements governing the investment funds, vehicles or accounts that we manage. The AUM amounts reported as of December 31, 2007 and 2008 reflect the NAV of KPE and its commitments to our investment funds as those periods are prior to the Combination Transaction on October 1, 2009. Subsequent to the Combination Transaction, we began reporting AUM excluding the NAV of KPE and its commitments to our private equity funds. On a pro forma basis, giving effect to the exclusion of KPE, AUM as of December 31, 2007 and 2008 would have been \$47.2 billion and \$44.9 billion, respectively.
- (9) Fee paying assets under management ("FPAUM") represents only those assets under management from which we receive fees. FPAUM is the sum of all of the individual fee bases that are used to calculate our fees and differs from AUM in the following respects: (i) assets from which we do not receive a fee are excluded (i.e., assets with respect to which we receive only carried interest); and (ii) certain assets, primarily in our private equity funds, are reflected based on capital commitments and invested capital as opposed to fair value because fees are not impacted by changes in the fair value of underlying investments. The FPAUM amounts reported as of December 31, 2007 and 2008 reflect the NAV of KPE as those periods are prior to the Combination Transaction on October 1, 2009. Subsequent to the Combination Transaction, we began reporting FPAUM excluding the NAV of KPE in its entirety as fees paid by KPE to our

Table of Contents

management companies are eliminated as intersegment transactions. On a pro forma basis, giving effect to the exclusion of KPE, FPAUM as of December 31, 2007 and 2008 would have been \$35.2 billion and \$40.2 billion, respectively.

(10) Committed dollars invested is the aggregate amount of capital commitments that have been invested by our investment funds and carry-yielding co-investment vehicles during a given period. Such amounts include: (i) capital invested by fund investors and co-investors with respect to which we are entitled to a carried interest and (ii) capital invested by us.

(11) Uncalled commitments represent unfunded capital commitments that our investment funds and carry-paying co-investment vehicles have received from partners to contribute capital to fund future investments.

Table of Contents

RISK FACTORS

You should carefully consider the following information about these risks, together with the other information contained in this prospectus in connection with U.S. Listing and holding our common units.

Risks Related to Our Business

Difficult market conditions can adversely affect our business in many ways, including by reducing the value or performance of the investments that we manage or by reducing the ability of our funds to raise or deploy capital, each of which could negatively impact our net income and cash flow and adversely affect our financial condition.

Our business is materially affected by conditions in the financial markets and economic conditions or events throughout the world, such as interest rates, availability of credit, inflation rates, economic uncertainty, changes in laws (including laws relating to taxation), trade barriers, commodity prices, currency exchange rates and controls and national and international political circumstances (including wars, terrorist acts or security operations). These factors are outside our control and may affect the level and volatility of securities prices and the liquidity and the value of our investments. In addition, we may not be able to or may choose not to manage our exposure to these conditions and/or events. The market conditions surrounding each of our businesses, and in particular our private equity business, had been quite favorable for a number of years. A significant portion of the investments of our private equity funds were made during this period. Market conditions, however, significantly deteriorated in 2008 and 2009 and generally remain at depressed levels. Global financial markets experienced considerable declines in the valuations of equity and debt securities, an acute contraction in the availability of credit and the failure of a number of leading financial institutions. Many economies around the world, including the U.S. economy, are in a period of significant decline in employment, household wealth, and lending. These events have led to a significantly diminished availability of credit and an increase in the cost of financing. The lack of credit has materially hindered the initiation of new, large-sized transactions for our private equity business and, together with declines in valuations of equity and debt securities, has adversely impacted our recent operating results reflected in our combined financial statements included in this prospectus. Our profitability may also be adversely affected by our fixed costs and the possibility that we would be unable to scale back other costs within a time frame sufficient to match any decreases in net income relating to changes in market and economic conditions.

Our funds may be affected by reduced opportunities to exit and realize value from their investments as lack of financing makes it more difficult for potential buyers to raise sufficient capital to purchase assets in our funds' portfolios, by lower than expected returns on investments made prior to the deterioration of the credit markets, which could cause us to realise diminished or no carried interest, and by the fact that we may not be able to find suitable investments for the funds to effectively deploy capital, which could adversely affect our ability to raise new funds because we can generally only raise capital for a successor fund following the substantial deployment of capital from the existing fund. In the event of poor performance by existing funds or in the absence of improvements in market or economic conditions, fundraising conditions are likely to remain challenging and pressures by investors for lower fees, different fee sharing arrangements or fee concessions will likely continue and could increase. The outcome of such negotiations could result in our agreement to terms that are materially less favorable to us than for prior funds we have managed or funds managed by our competitors. We might also choose in such circumstances to reduce the size of any new funds so as to include only those investors willing to participate on terms we view as acceptable, which could also reduce our revenues. During 2009, we believe that certain fund sponsors decreased the amount of fees they charge investors for fund management. Investors may also seek to redeploy capital away from certain of our fixed income vehicles, which permit redemptions on relatively short notice, in order to meet liquidity needs or invest in other asset classes.

Table of Contents

During periods of difficult market or economic conditions or slowdowns (which may be across one or more industries, sectors or geographies), companies in which we have invested may experience decreased revenues, financial losses, credit rating downgrades, difficulty in obtaining access to financing and increased funding costs. These companies may also have difficulty in expanding their businesses and operations or be unable to meet their debt service obligations or other expenses as they become due, including expenses payable to us. Negative financial results in our funds' portfolio companies may result in lower investment returns for our investment funds, which could materially and adversely affect our operating results and cash flow. To the extent the operating performance of such portfolio companies (as well as valuation multiples) do not improve or other portfolio companies experience adverse operating performance, our funds may sell those assets at values that are less than we projected or even at a loss, thereby significantly affecting those funds' performance and consequently our operating results and cash flow. During such periods of economic difficulty, our investment funds' portfolio companies may also have difficulty expanding their businesses and operations or meeting their debt service obligations or other expenses as they become due, including amounts payable to us. Furthermore, negative market conditions or a specific market dislocation may result in lower investment returns for our funds, which would further adversely affect our net income. Adverse conditions may also increase the risk of default with respect to private equity, fixed income and other equity investments that we manage. Although market conditions have recently shown some signs of improvement, we are unable to predict whether economic and market conditions may continue to improve. Even if economic and market conditions do improve broadly and significantly over the long term, adverse conditions in particular sectors may cause our performance to suffer.

Changes in the debt financing markets have negatively impacted the ability of our private equity funds and their portfolio companies to obtain attractive financing for their investments and have increased the cost of such financing if it is obtained, which could lead to lower-yielding investments and potentially decreasing our net income.

During 2008 and 2009, the markets for debt financing contracted significantly, particularly in the area of acquisition financings for private equity and real estate transactions. Large commercial and investment banks, which have traditionally provided such financing, have demanded higher rates, higher equity requirements as part of private equity and real estate investments, more restrictive covenants and generally more onerous terms in order to provide such financing, and in some cases are refusing to provide financing for acquisitions the type of which would have been readily financed in earlier years. In the event that our funds are unable to obtain committed debt financing for potential acquisitions or can only obtain debt at an increased interest rate or on unfavorable terms, our funds may have difficulty completing otherwise profitable acquisitions or may generate profits that are lower than would otherwise be the case, either of which could lead to a decrease in the investment income earned by us. Any failure by lenders to provide previously committed financing can also expose us to potential claims by sellers of businesses which we may have contracted to purchase. Similarly, our portfolio companies regularly utilize the corporate debt markets in order to obtain financing for their operations. To the extent that the current credit markets have rendered such financing difficult to obtain or more expensive, this may negatively impact the operating performance of those portfolio companies and, therefore, the investment returns on our funds. In addition, to the extent that the current markets make it difficult or impossible to refinance debt that is maturing in the near term, we or some of our portfolio companies may be unable to repay such debt at maturity and may be forced to sell assets, undergo a recapitalization or seek bankruptcy protection.

Table of Contents

Recent developments in the U.S. and global financial markets have created a great deal of uncertainty for the asset management industry, and these developments may adversely affect the investments made by our funds or their portfolio companies or reduce the ability of our funds to raise or deploy capital, each of which could further materially reduce our revenue, net income and cash flow.

Recent developments in the U.S. and global financial markets have illustrated that the current environment is one of extraordinary and unprecedented uncertainty and instability for the asset management industry. With global credit markets experiencing substantial disruption (especially in the mortgage finance markets) and liquidity shortages, financial instability spread globally. In response to the financial crises affecting the banking system and financial markets and going concern threats to investment banks and other financial institutions, in October 2008, the U.S. government passed the Emergency Economic Stabilization Act of 2008, authorizing the U.S. Secretary of the Treasury to purchase up to \$700 billion in distressed mortgage related assets from financial institutions, the U.S. Federal Reserve announced the creation of a special-purpose facility to buy commercial paper in order to stabilize financial markets and the U.S. Treasury Department announced a capital purchase program under the Emergency Economic Stabilization Act of 2008 pursuant to which the Treasury may purchase up to \$250 billion of senior preferred shares in certain financial institutions. The U.K. government similarly announced a plan to recapitalize some of the country's largest financial institutions. In March 2009, the U.S. Department of the Treasury and the Federal Reserve announced the launch of the Term Asset-Backed Securities Loan Facility, which provides up to \$200 billion of financing (which may be increased to up to \$1 trillion) to certain U.S. entities to purchase qualifying asset-backed securities, and the U.S. Department of the Treasury announced plans for the Public Private Investment Partnership Program for legacy assets, which is intended to facilitate the purchase of various loans and securities held by financial institutions. In addition, there has also been substantial consolidation in the financial services industry. Although market conditions have recently shown some signs of improvement, there can be no assurances that conditions in the global financial markets will not worsen and/or further adversely affect our investments, access to leverage and overall performance.

Adverse economic and market conditions may adversely affect our liquidity position, which could adversely affect our business operations in the future.

We expect that our primary liquidity needs will consist of cash required to: (i) continue to grow our business, including funding our capital commitments made to existing and future funds and any net capital requirements of our capital markets companies, (ii) service debt obligations, including indebtedness acquired from KKR Guernsey in connection with the Combination Transaction and any contingent liabilities that give rise to future cash payments, (iii) fund cash operating expenses, (iv) pay amounts that may become due under our tax receivable agreement with KKR Holdings; and (v) make cash distributions in accordance with our distribution policy. These liquidity requirements are significant and, in some cases, involve capital that will remain invested for extended periods of time. As of December 31, 2009, we have approximately \$1,272.3 million of remaining unfunded capital commitments to our investment funds, including \$827.3 million of unfunded commitments acquired from KKR Guernsey. Our commitments to our funds will require significant cash outlays over time, and there can be no assurance that we will be able to generate sufficient cash flows from realizations of investments to fund them. In addition, as of December 31, 2009, we had \$733.7 million of borrowings outstanding under our credit facilities and \$546.7 million of cash and cash equivalents. While we have long-term committed financings with substantial facility limits, the terms of those facilities will expire in 2012 and 2013, respectively (see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources"), and any borrowings thereunder will require refinancing or renewal, which could result in higher borrowing costs, or issuing equity. If the current credit market conditions were to worsen, we may not be able to renew all or part of these credit facilities or find alternate sources of financing on commercially reasonable terms or raise equity. In that event, our uses of cash could exceed our sources of cash, thereby potentially adversely affecting our

Table of Contents

liquidity or causing us to sell assets on unfavorable terms. In addition, the underwriting commitments for our capital markets business may require significant cash obligations, and these commitments may also put pressure on our liquidity. The holding company for our capital markets business has entered into a credit agreement that provides for revolving borrowings of up to \$500 million, which can be used in connection with our ongoing business activities, including placing and underwriting securities offerings. To the extent we commit to buy and sell an issue of securities in firm commitment underwritings or otherwise, we may be required to borrow under this credit agreement to fund such obligations, which, depending on the size and timing of the obligations, may limit our ability to enter into other underwriting arrangements or similar activities, service existing debt obligations or otherwise grow our business.

The "clawback" or "net loss sharing" provisions in our governing agreements may give rise to a contingent obligation that may require us to return or contribute amounts to our funds and investors.

The partnership documents governing our traditional private equity funds generally include a "clawback" or, in certain instances, a "net loss sharing" provision that, if triggered, may give rise to a contingent obligation that may require the general partner to return or contribute amounts to the fund for distribution to investors at the end of the life of the fund. Under a "clawback" provision, upon the liquidation of a fund, the general partner is required to return, on an after-tax basis, previously distributed carry to the extent that, due to the diminished performance of later investments, the aggregate amount of carry distributions received by the general partner during the term of the fund exceed the amount to which the general partner was ultimately entitled. Excluding carried interest received by the general partners of our 1996 Fund (which was not contributed to us in the Transactions), as of December 31, 2009, the amount of carried interest we have received that is subject to this clawback obligation was \$84.9 million, assuming that all applicable private equity funds were liquidated at their December 31, 2009 fair values. Had the investments in such funds been liquidated at zero value, the clawback obligation would have been \$716.2 million. Under a "net loss sharing provision," upon the liquidation of a fund, the general partner is required to contribute capital to the fund, to fund 20% of the net losses on investments. In these vehicles, such losses would be required to be paid by us to the limited partners in those vehicles in the event of a liquidation of the fund regardless of whether any carried interest had previously been distributed. Based on the fair market values as of December 31, 2009, our obligation in connection with the net loss sharing provision would have been approximately \$93.6 million. If the vehicles were liquidated at zero value, the contingent repayment obligation in connection with the net loss sharing provision as of December 31, 2009 would have been approximately \$1,182.7 million.

Prior to the Transactions, certain of our principals who received carried interest distributions with respect to the private equity funds had personally guaranteed, on a several basis and subject to a cap, the contingent obligations of the general partners of the private equity funds to repay amounts to fund limited partners pursuant to the general partners' clawback obligations. The terms of the Transactions require that our principals remain responsible for clawback obligations relating to carry distributions received prior to the Transactions up to a maximum of \$223.6 million. Carry distributions arising subsequent to the Transactions may give rise to clawback obligations that may be allocated generally to carry pool participants and the Combined Business in accordance with the terms of the instruments governing the KKR Group Partnerships. Unlike the "clawback" provisions, the Combined Business will be responsible for amounts due under net loss sharing arrangements and will indemnify our principals for any personal guarantees that they have provided with respect to such amounts.

Our earnings and cash flow are highly variable due to the nature of our business and we do not intend to provide earnings guidance, each of which may cause the value of interests in our business to be volatile.

Our earnings are highly variable from quarter to quarter due to the volatility of investment returns of most of our funds and other investment vehicles and our principal assets and the fee income earned

Table of Contents

from our funds. We recognize earnings on investments in our funds based on our allocable share of realized and unrealized gains (or losses) reported by such funds, and a decline in realized or unrealized gains, or an increase in realized or unrealized losses, would adversely affect our net income. Fee income, which we recognize when contractually earned, can vary due to fluctuations in AUM, the number of investment transactions made by our funds, the number of portfolio companies we manage and the fee provisions contained in our funds and other investment products. We may create new funds or investment products or vary the terms of our funds or investment products, which may alter the composition or mix of our income from time to time. We may also experience fluctuations in our results from quarter to quarter, including our revenue and net income, due to a number of other factors, including changes in the values of our funds' investments, changes in the amount of distributions or interest earned in respect of investments, changes in our operating expenses, the degree to which we encounter competition and general economic and market conditions. Such variability may lead to variability in the value of interests in our business and cause our results for a particular period not to be indicative of our performance in future periods. It may be difficult for us to achieve steady growth in net income and cash flow on a quarterly basis, which could in turn lead to large adverse movements in the value of interests in our business.

The timing and receipt of carried interest from our private equity funds are unpredictable and will contribute to the volatility of our cash flows. Carried interest payments from private equity investments depend on our funds' performance and opportunities for realizing gains, which may be limited. It takes a substantial period of time to identify attractive private equity investment opportunities, to raise all the funds needed to make an investment and then to realize the cash value (or other proceeds) of an investment through a sale, public offering or other exit. To the extent a private equity investment is not profitable, no carried interest shall be received from our private equity funds with respect to that investment and, to the extent such investment remains unprofitable, we will only be entitled to a management fee on that investment. Even if a private equity investment proves to be profitable, it may be several years before any profits can be realized in cash. We cannot predict when, or if, any realization of investments will occur. In particular, since the latter half of 2007, the credit dislocation and related reluctance of many finance providers, such as commercial and investment banks, to provide financing have made it difficult for potential purchasers to secure financing to purchase companies in our investment funds' portfolio, thereby decreasing potential realization events and the potential to earn carried interest. A downturn in the equity markets also makes it more difficult to exit investments by selling equity securities. If we were to have a realization event in a particular quarter, the event may have a significant impact on our cash flows during the quarter that may not be replicated in subsequent quarters. A decline in realized or unrealized gains, or an increase in realized or unrealized losses, would adversely affect our investment income, which could further increase the volatility of our quarterly results.

A decline in the pace or size of investment by our funds or an increase in the amount of transaction fees we share with our investors would result in our receiving less revenue from transaction fees.

The transaction fees that we earn are driven in part by the pace at which our funds make investments and the size of those investments. Any decline in that pace or the size of such investments would reduce our transaction fees and could make it more difficult for us to raise capital. Many factors could cause such a decline in the pace of investment, including the inability of our investment professionals to identify attractive investment opportunities, competition for such opportunities among other potential acquirers, decreased availability of capital on attractive terms and our failure to consummate identified investment opportunities because of business, regulatory or legal complexities and adverse developments in the U.S. or global economy or financial markets. In particular, the current limited financing options for leveraged buy-outs resulting from the credit market dislocation has significantly reduced the pace and size of traditional buyout investments by our funds. In addition, we have confronted and expect to continue to confront requests from a variety of investors and groups

Table of Contents

representing investors to increase the percentage of transaction fees we share with our investors. To the extent we accommodate such requests, it would result in a decrease in the amount of fee revenue we earn.

The asset management business is intensely competitive, which could have a material adverse impact on our business.

We compete as an asset manager for both investors and investment opportunities. Our competitors consist primarily of sponsors of public and private investment funds, business development companies, investment banks, commercial finance companies and operating companies acting as strategic buyers of businesses. We believe that competition for investors is based primarily on investment performance; investor liquidity and willingness to invest; investor perception of investment managers' drive, focus and alignment of interest; business reputation; the duration of relationships with investors; the quality of services provided to investors; pricing; fund terms (including fees); and the relative attractiveness of the types of investments that have been or will be made. We believe that competition for investment opportunities is based primarily on the pricing, terms and structure of a proposed investment and certainty of execution.

Due to the global economic downturn and relatively poor investment returns, institutional investors have suffered from decreasing returns, liquidity pressure, increased volatility and difficulty maintaining targeted asset allocations, and a significant number of investors have materially decreased or temporarily suspended making new fund investments during this period. As the economy begins to recover, such investors may elect to reduce their overall portfolio allocations to alternative investments such as private equity funds, resulting in a smaller overall pool of available capital in our industry. Investors may also seek to redeploy capital away from certain of our fixed income vehicles, which permit redemptions on relatively short notice in order to meet liquidity needs or invest in other asset classes.

In the event all or part of this analysis proves true, when trying to raise new capital we will be competing for less available capital in an increasingly competitive environment which could lead to terms less favorable to us as well as difficulty in raising new capital. Such changes would adversely affect our revenues and profitability.

A number of factors serve to increase our competitive risks:

a number of our competitors in some of our businesses have greater financial, technical, marketing and other resources and more personnel than we do;

a significant number of investors have materially decreased or temporarily suspended making new fund investments recently because of the global economic downturn and relatively poor returns in their overall alternative asset investment portfolios in 2008 and 2009;

some of our competitors may have better expertise or be regarded by investors as having better expertise in a specific asset class or geographic region than we do;

some of our funds may not perform as well as competitors' funds or other available investment products;

investors may reduce their investments in our funds or not make additional investments in our funds based upon their available capital;

several of our competitors have recently raised during a period of easier fundraising, or are expected to raise, significant amounts of capital, which fundraising efforts may occur on or around the same time as ours, and many of them have similar investment objectives and strategies to our funds, which may create additional competition for investment opportunities and may reduce the size and duration of pricing inefficiencies that many alternative investment strategies seek to exploit;

Table of Contents

some of these competitors may also have a lower cost of capital and access to funding sources that are not available to us, which may create competitive disadvantages for us with respect to investment opportunities;

some of our competitors may have higher risk tolerances, different risk assessments or lower return thresholds, which could allow them to consider a wider variety of investments and to bid more aggressively than us for investments;

our competitors that are corporate buyers may be able to achieve synergistic cost savings in respect of an investment, which may provide them with a competitive advantage in bidding for an investment;

there are relatively few barriers to entry impeding the formation of new funds, including a relatively low cost of entering these businesses, and the successful efforts of new entrants into our various lines of business, including major commercial and investment banks and other financial institutions, have resulted in increased competition;

some investors may prefer to invest with an investment manager that is not publicly traded, is smaller, or manages fewer investment products; and

other industry participants will from time to time seek to recruit our investment professionals and other employees away from us.

We may lose investment opportunities in the future if we do not match investment prices, structures and terms offered by competitors. Alternatively, we may experience decreased investment returns and increased risks of loss if we match investment prices, structures and terms offered by competitors. Moreover, if we are forced to compete with other alternative asset managers on the basis of price, we may not be able to maintain our current fund fee, carried interest or other terms. There is a risk that fees and carried interest in the alternative investment management industry will decline, without regard to the historical performance of a manager. Fee or carried interest income reductions on existing or future funds, without corresponding decreases in our cost structure, would adversely affect our revenues and profitability.

In addition, if interest rates were to rise or if market conditions for competing investment products improve and such products begin to offer rates of return superior to those achieved by our funds, the attractiveness of our funds relative to investments in other investment products could decrease. This competitive pressure could adversely affect our ability to make successful investments and limit our ability to raise future funds, either of which would adversely impact our business, results of operations and cash flow.

Our structure involves complex provisions of U.S. federal income tax laws for which no clear precedent or authority may be available. These structures also are subject to potential legislative, judicial or administrative change and differing interpretations, possibly on a retroactive basis.

The U.S. federal income tax treatment of our unitholders depends in some instances on determinations of fact and interpretations of complex provisions of U.S. federal income tax laws for which no clear precedent or authority may be available. You should be aware that the U.S. federal income tax rules are constantly under review by persons involved in the legislative process, the Internal Revenue Service, or IRS, and the U.S. Department of the Treasury frequently resulting in revised interpretations of established concepts, statutory changes, revisions to regulations and other modifications and interpretations. The present U.S. federal income tax treatment of owning our common units may be modified by administrative, legislative or judicial interpretation at any time, and any such action may affect investments and commitments previously made. For instance, changes to the U.S. federal tax laws and interpretations thereof could make it more difficult or impossible for us to be treated as a partnership that is not taxable as a corporation for U.S. federal income tax purposes, affect the tax considerations of owning our common units, change the character or treatment of portions of

Table of Contents

our income (including, for instance, the treatment of carried interest as ordinary income rather than capital gain) and adversely impact your investment in our common units. See the discussion below under " Legislation has been introduced in the U.S. Congress in various forms that, if enacted, (i) could preclude us from qualifying as a partnership and/or (ii) could tax carried interest as ordinary income for U.S. federal income tax purposes and require us to hold carried interest through taxable subsidiary corporations. If this or any similar legislation or regulation were to be enacted and apply to us, we would incur a material increase in our tax liability that could result in a reduction in the market price of our common units." Our organizational documents and agreements permit the Managing Partner to modify the amended and restated partnership agreement from time to time, without the consent of the unitholders, to address certain changes in U.S. federal income tax regulations, legislation or interpretation. In some circumstances, such revisions could have a material adverse impact on some or all unitholders. Moreover, certain assumptions and conventions will be applied in an attempt to comply with applicable rules and to report income, gain, deduction, loss and credit to unitholders in a manner that reflects such unitholders' beneficial ownership of partnership items, taking into account variation in ownership interests during each taxable year because of trading activity. However, those assumptions and conventions may not be in compliance with all aspects of applicable tax requirements. It is possible that the IRS will assert successfully that the conventions and assumptions used by us do not satisfy the technical requirements of the Internal Revenue Code and/or Treasury regulations and could require that items of income, gain, deductions, loss or credit, including interest deductions, be adjusted, reallocated or disallowed in a manner that adversely affects our unitholders.

Legislation has been introduced in the U.S. Congress in various forms that, if enacted, (i) could preclude us from qualifying as a partnership and/or (ii) could tax carried interest as ordinary income for U.S. federal income tax purposes and require us to hold carried interest through taxable subsidiary corporations. If this or any similar legislation or regulation were to be enacted and apply to us, we would incur a material increase in our tax liability that could result in a reduction in the market price of our common units.

In 2007, legislation was introduced in the U.S. Congress that would tax as corporations publicly traded partnerships that directly or indirectly derive income from investment advisor or asset management services. In 2008, the U.S. House of Representatives passed a bill that would generally (i) treat carried interest as non-qualifying income under the tax rules applicable to publicly traded partnerships, which could preclude us from qualifying as a partnership for U.S. federal income tax purposes, and (ii) tax carried interest as ordinary income for U.S. federal income taxes, rather than in accordance with the character of income derived by the underlying fund. In December 2009, the U.S. House of Representatives passed substantially similar legislation. Such legislation would tax carried interest as ordinary income starting this taxable year. In addition, the Obama administration proposed in its published revenue proposals for both 2010 and 2011 that the current law regarding the treatment of carried interest be changed to subject such income to ordinary income tax. Certain versions of the proposed legislation (including the legislation passed in December 2009) contain a transition rule that may delay the applicability of certain aspects of the legislation for a partnership that is a publicly traded partnership on the date of enactment of the legislation.

If the changes suggested by the administration or any of the proposed legislation or similar legislation were adopted, income attributable to carried interest may not meet the qualifying income requirements under the publicly traded partnership rules, and, therefore, we could either be precluded from qualifying as a partnership for U.S. federal income tax purpose or be required to hold interests in entities earning such income through a taxable U.S. corporation. If we were taxed as a corporation, our effective tax rate would increase significantly. The federal statutory rate for corporations is currently 35%. In addition, we would likely be subject to increased state and local taxes. Therefore, if any such legislation or similar legislation were to be enacted and apply to us, it would materially increase our tax liability, which could well result in a reduction in the market price of our common units.

In addition, if the proposed legislation is adopted, it could increase the amount of tax KKR's principals and other professionals would be required to pay, thereby adversely affecting KKR's ability to offer attractive incentive opportunities for key personnel.

Table of Contents

We depend on our founders and other key personnel, the loss of whose services would have a material adverse effect on our business, results and financial condition.

We depend on the efforts, skills, reputations and business contacts of our principals, including our founders, Henry Kravis and George Roberts, and other key personnel, the information and deal flow they and others generate during the normal course of their activities and the synergies among the diverse fields of expertise and knowledge held by our professionals. Accordingly, our success depends on the continued service of these individuals, who are not obligated to remain employed with us. The loss of the services of any of them could have a material adverse effect on our revenues, net income and cash flows and could harm our ability to maintain or grow AUM in existing funds or raise additional funds in the future.

Our principals and other key personnel possess substantial experience and expertise and have strong business relationships with investors in our funds and other members of the business community. As a result, the loss of these personnel could jeopardize our relationships with investors in our funds and members of the business community and result in the reduction of AUM or fewer investment opportunities. For example, if any of our principals were to join or form a competing firm, our business, results and financial condition could suffer.

Furthermore, the agreements governing our traditional private equity funds and certain fixed income funds managed by us provide that in the event certain "key persons" in these funds (for example, both of Messrs. Kravis and Roberts, and, in the case of certain geographically or product focused funds, one or more of the executives focused on such funds) generally cease to actively manage a fund, investors in the fund will be entitled to: (i) in the case of our traditional private equity funds, reduce, in whole or in part, their capital commitments available for further investments; and (ii) in the case of certain of our fixed income funds, withdraw all or any portion of their capital accounts, in each case on an investor-by-investor basis. The occurrence of such an event would likely have a significant negative impact on our revenue, net income and cash flow.

If we cannot retain and motivate our principals and other key personnel and recruit, retain and motivate new principals and other key personnel, our business, results and financial condition could be adversely affected.

Our most important asset is our people, and our continued success is highly dependent upon the efforts of our principals and other professionals, and to a substantial degree on our ability to retain and motivate our principals and other key personnel and to strategically recruit, retain and motivate new talented personnel, including new principals. However, we may not be successful in these efforts as the market for qualified investment professionals is extremely competitive. Our ability to recruit, retain and motivate our professionals is dependent on our ability to offer highly attractive incentive opportunities. If legislation, such as the legislation proposed in April 2009 (and repropounded in 2010) were to be enacted, income and gains recognized with respect to carried interest would be treated for U.S. federal income tax purposes as ordinary income rather than as capital gain. Such legislation would materially increase the amount of taxes that we, our principals and other professionals would be required to pay, thereby adversely affecting our ability to offer such attractive incentive opportunities. See " Risks Related to U.S. Taxation". The loss of even a small number of our investment professionals could jeopardize the performance of our funds and other investment products, which would have a material adverse effect on our results of operations. Efforts to retain or attract investment professionals may result in significant additional expenses, which could adversely affect our profitability.

Our principals hold interests in our business through KKR Holdings. These individuals receive financial benefits from our business in the form of distributions and amounts funded by KKR Holdings and through their direct and indirect participation in the value of KKR Group Partnership Units held by KKR Holdings. While all of our employees and our principals receive base salaries from us, profit-based cash amounts for certain individuals are borne by KKR Holdings. There can be no assurance that KKR Holdings will have sufficient cash available to continue to make profit-based cash payments.

Table of Contents

In addition, we might not be able to provide our principals with equity interests in our business to the same extent or with the same tax consequences as we did prior to October 1, 2009, and distributions in respect of these interests may not equal the cash distributions previously received by these individuals prior to October 1, 2009 and may not be sufficient to retain and motivate our principals and other key personnel, nor may they be sufficiently attractive to strategically recruit, retain and motivate new talented personnel. The value of the interests held by our principals in KKR Holdings may fall (as reflected in the market price of our common units), which could counteract the incentives we are seeking to put in place. Therefore, in order to recruit and retain existing and future investment professionals, we may need to increase the level of compensation that we pay to them, which may cause a higher percentage of our revenue to be paid out in the form of compensation, which would have an adverse impact on our profit margins. In addition, the issuance of equity interests in our business to employees could dilute common unitholders and KKR Holdings.

In addition, there is no guarantee that the confidentiality and restrictive covenant agreements to which our principals are subject, together with our other arrangements with them, will prevent them from leaving us, joining our competitors or otherwise competing with us or that these agreements will be enforceable in all cases. These agreements will expire after a certain period of time, at which point each of our principals would be free to compete against us and solicit investors in our funds, clients and employees. Depending on which entity is a party to these agreements, we may not be able to enforce them, and these agreements might be waived, modified or amended at any time without our consent. See "Certain Relationships and Related Party Transactions Confidentiality and Restrictive Covenant Agreements."

We strive to maintain a work environment that reinforces our culture of collaboration, motivation and alignment of interests with investors. If we do not continue to develop and implement the right processes and tools to manage our changing enterprise and maintain our culture, our ability to compete successfully and achieve our business objectives could be impaired, which could negatively impact our business, financial condition and results of operations.

Operational risks may disrupt our businesses, result in losses or limit our growth.

We rely heavily on our financial, accounting and other data processing systems. If any of these systems does not operate properly or is disabled, we could suffer financial loss, a disruption of our businesses, liability to our funds, regulatory intervention or reputational damage. In addition, we operate in businesses that are highly dependent on information systems and technology. Our information systems and technology may not continue to be able to accommodate our growth, and the cost of maintaining such systems may increase from our current level. Such a failure to accommodate growth, or an increase in costs related to such information systems, could have a material adverse effect on our business. Furthermore, we depend on our principal offices in New York City, where most of our administrative personnel are located, for the continued operation of our business. A disaster or a disruption in the infrastructure that supports our businesses, including a disruption involving electronic communications or other services used by us or third parties with whom we conduct business, or directly affecting our principal offices, could have a material adverse impact on our ability to continue to operate our business without interruption. Our disaster recovery programs may not be sufficient to mitigate the harm that may result from such a disaster or disruption. In addition, insurance and other safeguards might only partially reimburse us for our losses, if at all. Finally, we rely on third party service providers for certain aspects of our business, including for certain information systems, technology and administration and compliance matters. Any interruption or deterioration in the performance of these third parties could impair the quality of our and our funds' operations and could impact our reputation and adversely affect our businesses and limit our ability to grow.

Table of Contents

The time and attention that our principals and other employees devote to assets that were not contributed to the KKR Group Partnerships as part of the Transactions will not financially benefit the KKR Group Partnerships and may reduce the time and attention these individuals devote to the KKR Group Partnerships' business.

As of December 31, 2009, the unrealized value of the investments held by the 1987 Fund, the 1993 Fund and the 1996 Fund totaled \$0.8 billion, or approximately 2% of our AUM. Because we believe the general partners of these funds will not receive meaningful proceeds from further realizations, we did not acquire general partner interests in them in connection with the Transactions. We will, however, continue to provide the funds with management and other services until their liquidation. While we will not receive meaningful fees for providing these services, our principals and other employees will be required to devote a portion of their time and attention to the management of those entities. The devotion of the time and attention of our principals and employees to those activities will not financially benefit the KKR Group Partnerships and may reduce the time and attention they devote to the KKR Group Partnerships' business.

Our organizational documents do not limit our ability to enter into new lines of businesses, and we may expand into new investment strategies, geographic markets and businesses, each of which may result in additional risks and uncertainties in our businesses.

We intend, to the extent that market conditions warrant, to seek to grow our businesses by increasing AUM in existing businesses, pursuing new investment strategies, including investment opportunities in new asset classes, developing new types of investment structures and products (such as managed accounts and structured products), and expanding into new geographic markets and businesses. We recently opened offices in Mumbai, India, Seoul, Korea and Dubai, UAE, and also developed a capital markets business in the United States, Europe and Asia, which we intend to grow and diversify. We may pursue growth through acquisitions of other investment management companies, acquisitions of critical business partners or other strategic initiatives, which may include entering into new lines of business. In addition, we expect opportunities will arise to acquire other alternative or traditional asset managers. To the extent we make strategic investments or acquisitions, undertake other strategic initiatives or enter into a new line of business, we will face numerous risks and uncertainties, including risks associated with (i) the required investment of capital and other resources; (ii) the possibility that we have insufficient expertise to engage in such activities profitably or without incurring inappropriate amounts of risk; (iii) the possibility of diversion of management's attention from our core business; (iv) the possibility of disruption of our ongoing business; (v) combining or integrating operational and management systems and controls; (vi) potential increase in investor concentration; and (vii) the broadening of our geographic footprint, including the risks associated with conducting operations in foreign jurisdictions. Entry into certain lines of business may subject us to new laws and regulations with which we are not familiar, or from which we are currently exempt, and may lead to increased litigation and regulatory risk. If a new business generates insufficient revenues or if we are unable to efficiently manage our expanded operations, our results of operations will be adversely affected. Our strategic initiatives may include joint ventures, in which case we will be subject to additional risks and uncertainties in that we may be dependent upon, and subject to liability, losses or reputational damage relating to, systems, controls and personnel that are not under our control.

Extensive regulation of our businesses affects our activities and creates the potential for significant liabilities and penalties. The possibility of increased regulatory focus or legislative or regulatory changes could result in additional burdens on our business.

Our business is subject to extensive regulation. We are subject to regulation, including periodic examinations, by governmental and self-regulatory organizations in the jurisdictions in which we operate around the world. Many of these regulators, including U.S. and foreign government agencies and self-regulatory organizations, are empowered to conduct investigations and administrative proceedings

Table of Contents

that can result in fines, suspensions of personnel or other sanctions, including censure, the issuance of cease-and-desist orders or the suspension or expulsion of applicable licenses and memberships. Even if an investigation or proceeding does not result in a sanction or the sanction imposed against us or our personnel by a regulator were small in monetary amount, the adverse publicity relating to the investigation, proceeding or imposition of these sanctions could harm our reputation and cause us to lose existing clients and investors or fail to gain new clients and investors.

As a result of market disruption as well as highly publicized financial scandals, regulators and investors have exhibited concerns over the integrity of the U.S. financial markets, and the businesses in which we operate both in the United States and outside the United States are likely to be subject to further regulation. There has been an active debate both nationally and internationally over the appropriate extent of regulation and oversight of private investment funds and their managers. There are proposals in the U.S. Congress and emanating from the U.S. Department of the Treasury that would identify various kinds of private funds as being potentially systemically significant and subject to increased reporting, oversight and regulation. Any changes in the regulatory framework applicable to our business may impose additional expenses on us, require the attention of senior management or result in limitations in the manner in which our business is conducted. Moreover, as calls for additional regulation have increased, there may be a related increase in regulatory investigations of the trading and other investment activities of alternative asset management funds, including our funds. Such investigations may impose additional expenses on us, may require the attention of senior management and may result in fines if any of our funds are deemed to have violated any regulations.

Recent legislative or regulatory proposals in the U.S. include designating a federal agency or representatives of several agencies as the financial system's systemic risk regulator with authority to review the activities of all financial institutions, including alternative asset managers, and to impose regulatory standards on any companies deemed to pose a threat to the financial health of the U.S. economy; authorizing federal regulatory agencies to ban compensation arrangements at financial institutions that give employees incentives to engage in conduct that could pose risks to the nation's financial system; granting the U.S. government resolution authority to take emergency measures with regard to financial institutions that fall outside the existing resolution authority of the Federal Deposit Insurance Corporation, including the authority to place an institution into conservatorship or receivership; creating a new consumer financial protection agency or a consumer financial protection bureau within the Federal Deposit Insurance Corporation or the U.S. Department of the Treasury; subjecting certain types of large financial institutions to an incremental tax based on the amount of AUM or income and the type of financial services provided; and establishing new ground rules for private equity investments in failed banks that make the acquisition of a failed bank less attractive for a private equity fund. In addition, certain constituencies have recently been advocating for greater legislative and regulatory oversight of private equity firms and transactions and to prevent pension funds from investing in private equity funds.

Members of the U.S. Senate have proposed the Hedge Fund Transparency Act, which would apply to private equity funds, venture capital funds, real estate funds and other private investment vehicles with at least \$50 million in assets under management. If enacted, the bill would require such funds to register with the SEC, maintain books and records in accordance with SEC requirements and become subject to SEC examinations and information requests in order to remain exempt from the substantive provisions of the Investment Company Act. The proposed legislation also requires each fund to file annual disclosures, which would be made public, containing detailed information about the fund. The proposed legislation also requires each fund to establish anti-money laundering programs. In addition, the Obama administration delivered proposed legislation that, if enacted, would require advisors to hedge funds and other private pools of capital with over \$30 million in assets under management to register as Investment Advisors with the SEC under the Investment Advisers Act of 1940. The proposed legislation would subject advisors to substantial regulatory reporting requirements and expand the SEC's examination and enforcement authority. In 2009, the U.S. House of Representatives passed

Table of Contents

legislation that would empower federal regulators to prescribe regulations to prohibit any incentive-based payment arrangements that the regulators determine encourage financial institutions to take risks that could threaten the soundness of the financial institutions or adversely affect economic conditions and financial stability. At this time, we cannot predict what form this legislation would take, and what effect, if any, it may have on our business or the markets in which we operate. It is impossible to determine the extent of the impact of any new laws, regulations or initiatives that may be proposed, or whether any of the proposals will become law. If enacted, the proposed legislation could negatively impact our funds in a number of ways, including increasing the funds' regulatory costs, imposing additional burdens on the funds' staff, and potentially requiring the disclosure of sensitive information. In addition, we may be adversely affected by changes in the interpretation or enforcement of existing laws and rules by these governmental authorities and self-regulatory organizations. Compliance with any new laws or regulations could make compliance more difficult and expensive and affect the manner in which we conduct business.

On April 30, 2009, the European Commission published a draft of a proposed EU Directive on Alternative Investment Fund Managers, or AIFM. The Directive, if adopted in the form proposed, would apply to all AIFMs operating within the EU with more than €100 million in assets under management, including both hedge funds and private equity funds. AIFMs would be required to seek authorization from their home jurisdiction within the EU, which would require the disclosure of such information as fair valuation of assets, investment strategy, and markets in which investments are made on a regular basis. The Directive, if adopted, would also set a threshold for regulatory capital, allow regulators to set a threshold for leverage and create reporting obligations to companies in which a controlling stake is held. Such rules could have a particularly adverse effect on our investment businesses by among other things (i) imposing costly requirements to hire an independent valuation firm based in the EU to value all of our funds' assets and to hire an independent depository based in the EU to hold all of our investments, (ii) imposing extensive disclosure obligations on our funds' portfolio companies, (iii) prohibiting us from marketing our investment funds to any investors based in a EU country for three years after enactment of the directive and significantly restricting those marketing activities thereafter, and (iv) potentially in effect restricting our funds' investments in companies based in EU countries. The Directive, if adopted in its current form, could limit, both in absolute terms and in comparison to EU-based investment managers and funds, our operating flexibility, our ability to market our funds, and our fund raising and investment opportunities, as well as expose us to conflicting regulatory requirements in the United States and the EU.

We regularly rely on exemptions in the United States from various requirements of the Securities Act, the Exchange Act, the Investment Company Act of 1940, or Investment Company Act, and the U.S. Employee Retirement Income Security Act of 1974, or ERISA, in conducting our asset management activities. These exemptions are sometimes highly complex and may in certain circumstances depend on compliance by third parties whom we do not control. If for any reason these exemptions were to become unavailable to us, we could become subject to regulatory action or third-party claims and our business could be materially and adversely affected. See " Risks Related to Our Organizational Structure If we were deemed to be an "investment company" subject to regulation under the Investment Company Act, applicable restrictions could make it impractical for us to continue our business as contemplated and could have a material adverse effect on our business." Moreover, the requirements imposed by our regulators are designed primarily to ensure the integrity of the financial markets and to protect investors in our funds and are not designed to protect holders of interests in our business. Consequently, these regulations often serve to limit our activities. In addition, the regulatory environment in which our fund investors operate may affect our business. For example, changes in antitrust laws or the enforcement of antitrust laws could affect the level of mergers and acquisitions activity, and changes in state laws may limit investment activities of state pension plans. We may also be adversely affected as a result of new or revised legislation or regulations imposed by the

Table of Contents

SEC, other governmental regulatory authorities or self-regulatory organizations that supervise the financial markets.

Our operations are subject to regulation and supervision in a number of domestic and foreign jurisdictions, and the level of regulation and supervision to which we are subject varies from jurisdiction to jurisdiction and is based on the type of business activity involved. See "Business Regulation."

We are subject to substantial litigation risks and may face significant liabilities and damage to our professional reputation as a result of litigation allegations and negative publicity.

The investment decisions we make in our asset management business and the activities of our investment professionals on behalf of our portfolio companies may subject them and us to the risk of third-party litigation arising from investor dissatisfaction with the performance of our funds, the activities of our portfolio companies and a variety of other litigation claims. See "Business Legal Proceedings." By way of example, we, our funds and certain of our employees are each exposed to the risks of litigation relating to investment activities in our funds and actions taken by the officers and directors (some of whom may be KKR employees) of portfolio companies, such as the risk of shareholder litigation by other shareholders of public companies or holders of debt instruments of companies in which our funds have significant investments. We are also exposed to risks of litigation or investigation in the event of any transactions that presented conflicts of interest that were not properly addressed.

To the extent investors in our investment funds suffer losses resulting from fraud, gross negligence, willful misconduct or other similar misconduct, investors may have remedies against us, our private equity funds, our principals or our affiliates under federal securities law and state law. Investors in our funds do not have legal remedies against us, the general partners of our funds, our funds, our principals or our affiliates solely based on their dissatisfaction with the investment performance of those funds. While the general partners and investment advisors to our private equity funds, including their directors, officers, other employees and affiliates, are generally indemnified to the fullest extent permitted by law with respect to their conduct in connection with the management of the business and affairs of our private equity funds, such indemnity generally does not extend to actions determined to have involved fraud, gross negligence, willful misconduct or other similar misconduct.

If any lawsuits were brought against us and resulted in a finding of substantial legal liability, the lawsuit could materially adversely affect our business, financial condition or results of operations or cause significant reputational harm to us, which could seriously impact our business. We depend to a large extent on our business relationships and our reputation for integrity and high-caliber professional services to attract and retain investors and to pursue investment opportunities for our funds. As a result, allegations of improper conduct by private litigants or regulators, whether the ultimate outcome is favorable or unfavorable to us, as well as negative publicity and press speculation about us, our investment activities or the private equity industry in general, whether or not valid, may harm our reputation, which may be more damaging to our business than to other types of businesses.

In addition, with a workforce composed of many highly paid professionals, we face the risk of litigation relating to claims for compensation, which may, individually or in the aggregate, be significant in amount. The cost of settling any such claims could negatively impact our business, financial condition and results of operations.

Employee misconduct could harm us by impairing our ability to attract and retain clients and subjecting us to significant legal liability and reputational harm.

There is a risk that our principals and employees could engage in misconduct that adversely affects our business. We are subject to a number of obligations and standards arising from our business and our authority over the assets we manage. The violation of these obligations and standards by any of our employees would adversely affect our clients and us. Our business often requires that we deal with

Table of Contents

confidential matters of great significance to companies in which we may invest. If our employees were improperly to use or disclose confidential information, we could suffer serious harm to our reputation, financial position and current and future business relationships, as well as face potentially significant litigation. It is not always possible to detect or deter employee misconduct, and the extensive precautions we take to detect and prevent this activity may not be effective in all cases. If any of our employees were to engage in misconduct or were to be accused of such misconduct, our business and our reputation could be adversely affected.

Risks Related to the Assets We Manage

As an asset manager, we sponsor and manage funds and vehicles that make investments worldwide on behalf of third-party investors and, in connection with those activities, are required to deploy our own capital in those investments. The investments of these funds and vehicles are subject to many risks and uncertainties, including those that are discussed below. In addition, we have principal investments and manage those assets on our own behalf. As a result, the gains and losses on such assets are reflected in our net income and the risks set forth below relating to the assets that we manage will directly affect our operating performance.

The historical returns attributable to our funds, including those presented in this prospectus, should not be considered as indicative of the future results of our funds or of our future results or of any returns on our common units.

We have presented in this prospectus net and gross IRRs, multiples of invested capital and realized and unrealized investment values for funds that we have sponsored and managed. The historical and potential future returns of the funds that we manage are not directly linked to returns on KKR Group Partnership Units.

Moreover, with respect to the historical returns of our funds:

the rates of returns of our funds reflect unrealized gains as of the applicable valuation date that may never be realized, which may adversely affect the ultimate value realized from those funds' investments;

you will not benefit from any value that was created in our funds prior to October 1, 2009 to the extent such value has been realized even though such realizations may be subject to certain "clawback" obligations under the partnership documents of our funds;

the historical returns that we present in this prospectus derive largely from the performance of our earlier private equity funds, whereas future fund returns will depend increasingly on the performance of our newer funds, which may have little or no investment track record;

the future performance of our funds will be affected by macroeconomic factors, including negative factors arising from recent disruptions in the global financial markets that were not prevalent in the periods relevant to the historical return data included in this prospectus;

in some historical periods, the rates of return of some of our funds have been positively influenced by a number of investments that experienced a substantial decrease in the average holding period of such investments and rapid and substantial increases in value following the dates on which those investments were made; the actual or expected length of holding periods related to investments has increased in recent periods and there can be no assurance that prior trends will re-emerge;

our newly established funds may generate lower returns during the period that they take to deploy their capital;

Edgar Filing: KKR & Co. L.P. - Form S-1

our funds' returns have benefited from investment opportunities and general market conditions that may not repeat themselves, including favorable borrowing conditions in the debt markets in

Table of Contents

2006 and 2007 that have not existed since, thereby increasing both the cost and difficulty of financing transactions, and there can be no assurance that our current or future funds will be able to avail themselves of comparable investment opportunities or market conditions; and

we may create new funds in the future that reflect a different asset mix in terms of allocations among funds, investment strategies, geographic and industry exposure and vintage year.

In addition, future returns will be affected by the risks described elsewhere in this prospectus, including risks of the industry sectors and businesses in which a particular fund invests. See "Risk Factors Recent developments in the U.S. and global financial markets have created a great deal of uncertainty for the asset management industry, and these developments may adversely affect the investments made by our funds or their portfolio companies or reduce the ability of our funds to raise or deploy capital, each of which could further materially reduce our revenue, net income and cash flow."

Valuation methodologies for certain assets in our funds can be subject to significant subjectivity and the fair value of assets established pursuant to such methodologies may never be realized, which could result in significant losses for our funds.

There are no readily ascertainable market prices for a substantial majority of illiquid investments of our investment funds and our finance vehicles. When determining fair values of investments, we use the last reported market price as of the statement of financial condition date for investments that have readily observable market prices. When an investment does not have a readily available market price, the fair value of the investment represents the value, as determined by us in good faith, at which the investment could be sold in an orderly disposition over a reasonable period of time between willing parties other than in a forced or liquidation sale. There is no single standard for determining fair value in good faith and in many cases fair value is best expressed as a range of fair values from which a single estimate may be derived. When making fair value determinations, we typically use a market multiples approach that considers a specified financial measure (such as EBITDA) and/or a discounted cash flow analysis. KKR also considers a range of additional factors that we deem relevant, including the applicability of a control premium or illiquidity discount, the presence of significant unconsolidated assets and liabilities, any favorable or unfavorable tax attributes, the method of likely exit, estimates of assumed growth rates, terminal values, discount rates, capital structure and other factors. These valuation methodologies involve a significant degree of management judgment.

Because valuations, and in particular valuations of investments for which market quotations are not readily available, are inherently uncertain, may fluctuate over short periods of time and may be based on estimates, determinations of fair value may differ materially from the values that would have resulted if a ready market had existed. Even if market quotations are available for our investments, such quotations may not reflect the value that we would actually be able to realize because of various factors, including possible illiquidity. Our partners' capital could be adversely affected if the values of investments that we record is materially higher than the values that are ultimately realized upon the disposal of the investments and changes in values attributed to investments from quarter to quarter may result in volatility in our AUM and such changes could materially affect the results of operations that we report from period to period. There can be no assurance that the investment values that we record from time to time will ultimately be realized and that you will be able to realize the investment values that are presented in this prospectus.

Because there is significant uncertainty in the valuation of, or in the stability of the value of, illiquid investments, the fair values of investments reflected in an investment fund's or finance vehicle's NAV do not necessarily reflect the prices that would actually be obtained by us on behalf of the fund or finance vehicle when such investments are realized. Realizations at values significantly lower than the values at which investments have been reflected in prior fund NAVs would result in losses for the applicable fund and the loss of potential carried interest and other fees. Also, if realizations of our

Table of Contents

investments produce values materially different than the carrying values reflected in prior fund NAVs, investors may lose confidence in us, which could in turn result in difficulty in raising capital for future funds.

Even if market quotations are available for our investments, such quotations may not reflect the value that could actually be realized because of various factors, including the possible illiquidity associated with a large ownership position, subsequent illiquidity in the market for a company's securities, future market price volatility or the potential for a future loss in market value based on poor industry conditions or the market's view of overall company and management performance.

In addition, because we value our entire portfolio only on a quarterly basis, subsequent events that may have a material impact on those valuations may not be reflected until the next quarterly valuation date.

Dependence on significant leverage in investments by our funds could adversely affect our ability to achieve attractive rates of return on those investments.

Because many of our funds' investments rely heavily on the use of leverage, our ability to achieve attractive rates of return on investments will depend on our continued ability to access sufficient sources of indebtedness at attractive rates. For example, our fixed income funds use varying degrees of leverage when making investments. Similarly, in many private equity investments, indebtedness may constitute up to 70% or more of a portfolio company's total debt and equity capitalization, including debt that may be incurred in connection with the investment, and a portfolio company's indebtedness may also increase in recapitalization transactions subsequent to the company's acquisition. The absence of available sources of sufficient debt financing for extended periods of time could therefore materially and adversely affect our funds and our portfolio companies. Also, an increase in either the general levels of interest rates or in the risk spread demanded by sources of indebtedness such as we experienced during 2009 would make it more expensive to finance those investments. In addition, increases in interest rates could decrease the value of fixed-rate debt investments that our specialty finance company or our funds make. Increases in interest rates could also make it more difficult to locate and consummate private equity investments because other potential buyers, including operating companies acting as strategic buyers, may be able to bid for an asset at a higher price due to a lower overall cost of capital or their ability to benefit from a higher amount of cost savings following the acquisition of the asset. In addition, a portion of the indebtedness used to finance private equity investments often includes high-yield debt securities issued in the capital markets. Capital markets are volatile, and there may be times when we might not be able to access those markets at attractive rates, or at all, when completing an investment.

Investments in highly leveraged entities are also inherently more sensitive to declines in revenues, increases in expenses and interest rates and adverse economic, market and industry developments. The incurrence of a significant amount of indebtedness by an entity could, among other things:

subject the entity to a number of restrictive covenants, terms and conditions, any violation of which would be viewed by creditors as an event of default and could materially impact our ability to realize value from our investment;

allow even moderate reductions in operating cash flow to render it unable to service its indebtedness;

give rise to an obligation to make mandatory prepayments of debt using excess cash flow, which might limit the entity's ability to respond to changing industry conditions to the extent additional cash is needed for the response, to make unplanned but necessary capital expenditures or to take advantage of growth opportunities;

limit the entity's ability to adjust to changing market conditions, thereby placing it at a competitive disadvantage compared to its competitors who have relatively less debt;

Table of Contents

limit the entity's ability to engage in strategic acquisitions that might be necessary to generate attractive returns or further growth; and

limit the entity's ability to obtain additional financing or increase the cost of obtaining such financing, including for capital expenditures, working capital or other general corporate purposes.

A leveraged company's income and equity also tend to increase or decrease at a greater rate than would otherwise be the case if money had not been borrowed. As a result, the risk of loss associated with a leveraged company is generally greater than for companies with comparatively less debt. For example, leveraged companies could default on their debt obligations due to a decrease in revenues and cash flow precipitated by the ongoing economic downturn or by poor relative performance at such a company.

When our funds' existing portfolio investments reach the point when debt incurred to finance those investments matures in significant amounts and must be either repaid or refinanced, those investments may materially suffer if they have generated insufficient cash flow to repay maturing debt and there is insufficient capacity and availability in the financing markets to permit them to refinance maturing debt on satisfactory terms, or at all. If the current limited availability of financing for such purposes were to persist for several years, when significant amounts of the debt incurred to finance our funds' existing portfolio investments start to come due, these investments could be materially and adversely affected.

The majority owned subsidiaries of KFN, the publicly traded specialty finance company managed by us, regularly use and have used significant leverage to finance their assets. An inability by such subsidiaries to continue to raise or utilize leverage or to maintain adequate levels of collateral under the terms of their collateralized loan obligations could limit their ability to grow their business, reinvest principal cash, distribute cash to KFN or fully execute their business strategy, and KFN's results of operations may be adversely affected. In addition, the debt that KFN has incurred will mature in significant amounts in 2011 and 2012 and there can be no assurance that KFN will be able to refinance any of its indebtedness on commercially reasonable terms or at all. In the absence of improved operating results and access to capital resources, KFN could face substantial liquidity problems and might be required to dispose of material assets or operations to meet its debt service and other obligations.

Among the sectors particularly challenged by the current crisis in the global credit markets are the CLO and leveraged finance markets. KFN has significant exposure to these markets through its CLO subsidiaries, each of which is a Cayman Islands incorporated special purpose company that issued to KFN and other investors notes secured by a pool of collateral consisting primarily of corporate leveraged loans. In most cases, KFN's CLO holdings are deeply subordinated, representing the CLO subsidiary's substantial leverage, which increases both the opportunity for higher returns as well as the magnitude of losses when compared to holders or investors that rank more senior to KFN in right of payment. As a result, during the current continuing economic downturn, KFN and its investors are at greater risk of suffering losses related to the CLO subsidiaries. KFN's CLO subsidiaries have experienced an increase in downgrades, depreciations in market value and defaults in respect of leveraged loans in their collateral. There can be no assurance that market conditions giving rise to these types of consequences will not occur, subsist or become more acute in the future. Because KFN's CLO structures involve complex collateral and other arrangements, the documentation for such structures is complex, is subject to differing interpretations and involves legal risk. In July 2009, KFN surrendered for cancellation approximately \$298.4 million in aggregate of notes issued to it by certain of its CLOs. The surrendered notes were cancelled and the obligations due under such notes were deemed extinguished. Certain holders of KFN's securities issued by one of KFN's CLOs challenged the surrender for cancellation and KFN subsequently reached a settlement agreement with such holders that restricts KFN's ability to restructure certain CLO debt obligations in the future, which may reduce KFN's financial flexibility in the event of future adverse market or credit conditions. In addition, certain noteholders of one of KFN's other CLOs recently notified KFN of a similar dispute and it may become a party to similar disputes with other noteholders of its CLOs in the future.

Table of Contents

Any of the foregoing circumstances could have a material adverse effect on our financial condition, results of operations and cash flow.

The due diligence process that we undertake in connection with our investments may not reveal all facts that may be relevant in connection with an investment.

Before making our investments, we conduct due diligence that we deem reasonable and appropriate based on the facts and circumstances applicable to each investment. The objective of the due diligence process is to identify attractive investment opportunities based on the facts and circumstances surrounding an investment, to identify possible risks associated with that investment and, in the case of private equity investments, to prepare a framework that may be used from the date of an acquisition to drive operational achievement and value creation. When conducting due diligence, we typically evaluate a number of important business, financial, tax, accounting, environmental and legal issues in determining whether or not to proceed with an investment. Outside consultants, legal advisors, accountants and investment banks are involved in the due diligence process in varying degrees depending on the type of investment. Nevertheless, when conducting due diligence and making an assessment regarding an investment, we rely on resources available to us, including information provided by the target of the investment and, in some circumstances, third-party investigations. The due diligence process may at times be subjective with respect to newly organized companies for which only limited information is available. Accordingly, we cannot be certain that the due diligence investigation that we will carry out with respect to any investment opportunity will reveal or highlight all relevant facts (including fraud) that may be necessary or helpful in evaluating such investment opportunity, including the existence of contingent liabilities. We also cannot be certain that our due diligence investigations will result in investments being successful or that the actual financial performance of an investment will not fall short of the financial projections we used when evaluating that investment.

Our asset management activities involve investments in relatively high-risk, illiquid assets, and we may fail to realize any profits from these activities for a considerable period of time or lose some or all of the capital invested.

Many of our funds hold investments in securities that are not publicly traded. In many cases, our funds may be prohibited by contract or by applicable securities laws from selling such securities for a period of time. Our funds will generally not be able to sell these securities publicly unless their sale is registered under applicable securities laws, or unless an exemption from such registration is available. The ability of many of our funds to dispose of investments is heavily dependent on the public equity markets. For example, the ability to realize any value from an investment may depend upon the ability to complete an initial public offering of the portfolio company in which such investment is made. Even if the securities are publicly traded, large holdings of securities can often be disposed of only over a substantial length of time, exposing our investment returns to risks of downward movement in market prices during the intended disposition period. Accordingly, under certain conditions, our funds may be forced to either sell securities at lower prices than they had expected to realize or defer sales that they had planned to make, potentially for a considerable period of time. We have made and expect to continue to make significant capital investments in our current and future funds. Contributing capital to these funds is risky, and we may lose some or all of the principal amount of our investments.

The investments of our funds are subject to a number of inherent risks.

Our results are highly dependent on our continued ability to generate attractive returns from our investments. Investments made by our private equity and fixed income funds involve a number of significant risks inherent to private equity and fixed income investing, including the following:

companies in which private equity and fixed income investments are made may have limited financial resources and may be unable to meet their obligations under their securities, which

Table of Contents

may be accompanied by a deterioration in the value of their equity securities or any collateral or guarantees provided with respect to their debt;

companies in which private equity and fixed income investments are made are more likely to depend on the management talents and efforts of a small group of persons and, as a result, the death, disability, resignation or termination of one or more of those persons could have a material adverse impact on their business and prospects;

companies in which private equity and fixed income investments are made may from time to time be parties to litigation, may be engaged in rapidly changing businesses with products subject to a substantial risk of obsolescence and may require substantial additional capital to support their operations, finance expansion or maintain their competitive position;

instances of fraud and other deceptive practices committed by senior management of portfolio companies in which our funds invest may undermine our due diligence efforts with respect to such companies, and if such fraud is discovered, negatively affect the valuation of a fund's investments as well as contribute to overall market volatility that can negatively impact a fund's investment program;

our funds may make investments that they do not advantageously dispose of prior to the date the applicable fund is dissolved, either by expiration of such fund's term or otherwise, resulting in a lower than expected return on the investments and, potentially, on the fund itself;

our funds generally establish the capital structure of portfolio companies on the basis of financial projections based primarily on management judgments and assumptions, and general economic conditions and other factors may cause actual performance to fall short of these financial projections, which could cause a substantial decrease in the value of our equity holdings in the portfolio company and cause our funds' performance to fall short of our expectations; and

executive officers, directors and employees of an equity sponsor may be named as defendants in litigation involving a company in which a private equity investment is made or is being made, and we or our funds may indemnify such executive officers, directors or employees for liability relating to such litigation.

We often pursue investment opportunities that involve business, regulatory, legal or other complexities.

As an element of our investment style, we often pursue complex investment opportunities. This can often take the form of substantial business, regulatory or legal complexity that would deter other investment managers. Our tolerance for complexity presents risks, as such transactions can be more difficult, expensive and time-consuming to finance and execute; it can be more difficult to manage or realize value from the assets acquired in such transactions; and such transactions sometimes entail a higher level of regulatory scrutiny or a greater risk of contingent liabilities. We may cause our funds to acquire an investment that is subject to contingent liabilities, which could be unknown to us at the time of acquisition or, if they are known to us, we may not accurately assess or protect against the risks that they present. Acquired contingent liabilities could thus result in unforeseen losses for our funds. In addition, in connection with the disposition of an investment in a portfolio company, a fund may be required to make representations about the business and financial affairs of such portfolio company typical of those made in connection with the sale of a business. A fund may also be required to indemnify the purchasers of such investment to the extent that any such representations are inaccurate. These arrangements may result in the incurrence of contingent liabilities by a fund, even after the disposition of an investment. Any of these risks could harm the performance of our funds.

Table of Contents

Our private equity investments are typically among the largest in the industry, which involves certain complexities and risks that are not encountered in small- and medium-sized investments.

Our private equity funds make investments primarily in companies with large capitalizations, which involves certain complexities and risks that are not encountered in small- and medium-sized investments. For example, larger transactions may be more difficult to finance and exiting larger deals may present incremental challenges. In addition, larger transactions may pose greater challenges in implementing changes in the company's management, culture, finances or operations, and may entail greater scrutiny by regulators, interest groups and other third parties. Recently, these constituencies have been more active in opposing some larger investments by certain private equity firms.

In some transactions, the amount of equity capital that is required to complete a large capitalization private equity transaction has increased significantly, which has resulted in some of the largest private equity transactions being structured as "consortium transactions." A consortium transaction involves an equity investment in which two or more other private equity firms serve together or collectively as equity sponsors. While we have sought to limit where possible the amount of consortium transactions in which we have been involved, we have participated in a significant number of those transactions. Consortium transactions generally entail a reduced level of control by our firm over the investment because governance rights must be shared with the other consortium investors. Accordingly, we may not be able to control decisions relating to a consortium investment, including decisions relating to the management and operation of the company and the timing and nature of any exit, which could result in the risks described in " Our funds have made investments in companies that we do not control, exposing us to the risk of decisions made by others with which we may not agree." Any of these factors could increase the risk that our larger investments could be less successful. The consequences to our investment funds of an unsuccessful larger investment could be more severe given the size of the investment.

Our funds and accounts have made investments in companies that we do not control, exposing us to the risk of decisions made by others with which we may not agree.

Our funds and accounts hold investments that include debt instruments and equity securities of companies that we do not control. Such instruments and securities may be acquired by our funds and accounts through trading activities or through purchases of securities from the issuer. In addition, our funds and accounts may acquire minority equity interests, particularly when sponsoring investments as part of a large investor consortium, and may also dispose of a portion of their majority equity investments in portfolio companies over time in a manner that results in the funds or accounts retaining a minority investment. Those investments will be subject to the risk that the company in which the investment is made may make business, financial or management decisions with which we do not agree or that the majority stakeholders or the management of the company may take risks or otherwise act in a manner that does not serve our interests. If any of the foregoing were to occur, the value of investments by our funds or accounts could decrease and our financial condition, results of operations and cash flow could be adversely affected.

We expect to make investments in companies that are based outside of the United States, which may expose us to additional risks not typically associated with investing in companies that are based in the United States.

Many of our funds and accounts invest a significant portion of their assets in the equity, debt, loans or other securities of issuers that are based outside of the United States. A substantial amount of these investments consist of private equity investments made by our private equity funds. For example, as of December 31, 2009, approximately 39.7% of the unrealized value of the investments of those funds and accounts was attributable to foreign investments. Investing in companies that are based outside of the United States, particularly in countries characterized as having emerging markets,

Table of Contents

involves risks and considerations that are not typically associated with investments in companies established in the United States. These risks may include the following:

the possibility of exchange control regulations, restrictions on repatriation of profit on investments or of capital invested, political and social instability, nationalization or expropriation of assets;

the imposition of non-U.S. taxes;

differences in the legal and regulatory environment or enhanced legal and regulatory compliance;

limitations on borrowings to be used to fund acquisitions or dividends;

political hostility to investments by foreign or private equity investors;

less liquid markets;

reliance on a more limited number of commodity inputs, service providers and/or distribution mechanisms;

adverse fluctuations in currency exchange rates and costs associated with conversion of investment principal and income from one currency into another;

higher rates of inflation;

less available current information about an issuer;

higher transaction costs;

less government supervision of exchanges, brokers and issuers;

less developed bankruptcy and other laws;

difficulty in enforcing contractual obligations;

lack of uniform accounting, auditing and financial reporting standards;

less stringent requirements relating to fiduciary duties;

fewer investor protections; and

greater price volatility.

Certain legislation has recently been adopted in Australia, Denmark, Germany, and Italy, among other countries, that limits the tax deductibility of interest expense incurred by companies in those countries. These measures will most likely adversely affect Danish and German portfolio companies in which our private equity funds have investments and limit the benefits of additional investments in those countries.

Although we expect that most of our funds' and accounts' capital commitments will be denominated in U.S. dollars, investments that are denominated in a foreign currency will be subject to the risk that the value of a particular currency will change in relation to one or more other currencies. Among the factors that may affect currency values are trade balances, levels of short-term interest rates, differences in relative values of similar assets in different currencies, long-term opportunities for investment and capital appreciation and political developments. We may employ hedging techniques to minimize these risks, but we can offer no assurance that such strategies will be effective. If we engage in hedging transactions, we may be exposed to additional risks associated with such transactions. See " Risk management activities may adversely affect the return on our investments."

Table of Contents

Third party investors in our funds with commitment-based structures may not satisfy their contractual obligation to fund capital calls when requested by us, which could adversely affect a fund's operations and performance.

Investors in certain of our funds make capital commitments to those funds that the funds are entitled to call from those investors at any time during prescribed periods. We depend on investors fulfilling their commitments when we call capital from them in order for such funds to consummate investments and otherwise pay their obligations (for example, management fees) when due. To date, we have not had investors fail to honor capital calls to any meaningful extent. Any investor that did not fund a capital call would generally be subject to several possible penalties, including having a significant amount of existing investment forfeited in that fund. However, the impact of the penalty is directly correlated to the amount of capital previously invested by the investor in the fund and if an investor has invested little or no capital, for instance early in the life of the fund, then the forfeiture penalty may not be as meaningful. Investors may in the future also negotiate for lesser or reduced penalties at the outset of the fund, thereby inhibiting our ability to enforce the funding of a capital call. If investors were to fail to satisfy a significant amount of capital calls for any particular fund or funds, the operation and performance of those funds could be materially and adversely affected.

Our equity investments and many of our debt investments often rank junior to investments made by others, exposing us to greater risk of losing our investment.

In many cases, the companies in which our funds invest have, or are permitted to have, outstanding indebtedness or equity securities that rank senior to our fund's investment. By their terms, such instruments may provide that their holders are entitled to receive payments of distributions, interest or principal on or before the dates on which payments are to be made in respect of our investment. Also, in the event of insolvency, liquidation, dissolution, reorganization or bankruptcy of a company in which an investment is made, holders of securities ranking senior to our investment would typically be entitled to receive payment in full before distributions could be made in respect of its investment. After repaying senior security holders, the company may not have any remaining assets to use for repaying amounts owed in respect of our investment. To the extent that any assets remain, holders of claims that rank equally with our investment would be entitled to share on an equal and ratable basis in distributions that are made out of those assets. Also, during periods of financial distress or following an insolvency, the ability of our funds to influence a company's affairs and to take actions to protect their investments may be substantially less than that of the senior creditors.

Risk management activities may adversely affect the return on our investments.

When managing exposure to market risks, we frequently use hedging strategies or certain forms of derivative instruments to limit our exposure to changes in the relative values of investments that may result from market developments, including changes in prevailing interest rates and currency exchange rates. The scope of risk management activities undertaken by us varies based on the level and volatility of interest rates, prevailing foreign currency exchange rates, the types of investments that are made and other changing market conditions. The use of hedging transactions and other derivative instruments to reduce the effects of a decline in the value of a position does not eliminate the possibility of fluctuations in the value of the position or prevent losses if the value of the position declines. However, such activities can establish other positions designed to gain from those same developments, thereby offsetting the decline in the value of the position. Such transactions may also limit the opportunity for gain if the value of a position increases. Moreover, it may not be possible to limit the exposure to a market development that is so generally anticipated that a hedging or other derivative transaction cannot be entered into at an acceptable price.

The success of any hedging or other derivative transactions that we enter into generally will depend on our ability to correctly predict market changes. As a result, while we may enter into such

Table of Contents

transactions in order to reduce our exposure to market risks, unanticipated market changes may result in poorer overall investment performance than if the hedging or other derivative transaction had not been executed. In addition, the degree of correlation between price movements of the instruments used in connection with hedging activities and price movements in a position being hedged may vary. Moreover, for a variety of reasons, we may not seek or be successful in establishing a perfect correlation between the instruments used in hedging or other derivative transactions and the positions being hedged. An imperfect correlation could prevent us from achieving the intended result and could give rise to a loss. In addition, it may not be possible to fully or perfectly limit our exposure against all changes in the value of its investments, because the value of investments is likely to fluctuate as a result of a number of factors, some of which will be beyond our control or ability to hedge.

Certain of our funds may make a limited number of investments, or investments that are concentrated in certain geographic regions or asset types, which could negatively affect their performance to the extent those concentrated investments perform poorly.

The governing agreements of our funds contain only limited investment restrictions and only limited requirements as to diversification of fund investments, either by geographic region or asset type. During periods of difficult market conditions or slowdowns in these sectors or geographic regions, decreased revenues, difficulty in obtaining access to financing and increased funding costs may be exacerbated by this concentration of investments, which would result in lower investment returns. Because a significant portion of a fund's capital may be invested in a single investment or portfolio company, a loss with respect to such investment or portfolio company could have a significant adverse impact on such fund's capital. Accordingly, a lack of diversification on the part of a fund could adversely affect a fund's performance and therefore, our financial condition and results of operations.

Our funds and accounts may make investments that could give rise to a conflict of interest.

Our funds and accounts invest in a broad range of asset classes throughout the corporate capital structure. These investments include investments in corporate loans and debt securities, preferred equity securities and common equity securities. In certain cases, we may manage separate funds or accounts that invest in different parts of the same company's capital structure. For example, our fixed income funds may invest in different classes of the same company's debt and may make debt investments in a company that is owned by one of our private equity funds. In those cases, the interests of our funds and accounts may not always be aligned, which could create actual or potential conflicts of interest or the appearance of such conflicts. For example, one of our private equity funds could have an interest in pursuing an acquisition, divestiture or other transaction that, in its judgment, could enhance the value of the private equity investment, even though the proposed transaction would subject one of our fixed income fund's debt investments to additional or increased risks. Similarly, a decision to acquire material non-public information about a company while pursuing an investment opportunity for a particular fund or account may give rise to a potential conflict of interest when it results in our having to restrict the ability of other funds or accounts to take any action. Finally, our ability to effectively implement a public securities strategy may be limited to the extent that contractual obligations entered into in the ordinary course of our traditional private equity business impose restrictions on our engaging in transactions that we may be interested in otherwise pursuing.

We may also cause different private equity funds to invest in a single portfolio company, for example where the fund that made an initial investment no longer has capital available to invest. Conflicts may also arise where we make principal investments for our own account. In certain cases, we will require that a transaction or investment be approved by an independent valuation expert, be subject to a fairness opinion, be based on arms-length pricing data or be calculated in accordance with a formula provided for in a fund's governing documents prior to the completion of the relevant transaction to address potential conflicts of interest. Such instances include principal transactions where we or our affiliates warehouse an investment in a portfolio company for the benefit of one or more of

Table of Contents

our funds or accounts pending the contribution of committed capital by the investors in such funds or accounts, follow-on investments by a fund other than a fund which made an initial investment in a company or transactions in which we arrange for one of our funds or accounts to buy a security from, or sell a security to, another one of our funds or accounts. In addition, we or our affiliates may receive fees or other compensation in connection with specific transactions that may give rise to conflicts. Appropriately dealing with conflicts of interest is complex and difficult and we could suffer reputational damage or potential liability if we fail, or appear to fail, to deal appropriately with conflicts as they arise. Regulatory scrutiny of, or litigation in connection with, conflicts of interest could have a material adverse effect on our reputation which could in turn materially adversely affect our business in a number of ways, including as a result of an inability to raise additional funds and a reluctance of counterparties to do business with us.

If KFN were deemed to be an "investment company" subject to regulation under the Investment Company Act, applicable restrictions could have an adverse effect on our business.

Our business would be adversely affected if KFN, the publicly traded specialty finance company managed by us, was to be deemed to be an investment company under the Investment Company Act. A person will generally be deemed to be an "investment company" for purposes of the Investment Company Act if, absent an available exception or exemption, it (i) is or holds itself out as being engaged primarily, or proposes to engage primarily, in the business of investing, reinvesting or trading in securities; or (ii) owns or proposes to acquire investment securities having a value exceeding 40% of the value of its total assets (exclusive of U.S. government securities and cash items) on an unconsolidated basis. We believe KFN is not and does not propose to be primarily engaged in the business of investing, reinvesting or trading in securities, and we do not believe that KFN has held itself out as such. KFN conducts its operations primarily through its majority owned subsidiaries, each of which is excepted from the definition of an investment company under the Investment Company Act. KFN monitors its holdings regularly to confirm its continued compliance with the 40% test described in clause (ii) above, and restricts its subsidiaries with respect to the assets in which each of them can invest and/or the types of securities each of them may issue in order to ensure conformity with exceptions provided by, and rules and regulations promulgated under, the Investment Company Act. If the SEC were to disagree with KFN's treatment of one or more of its subsidiaries as being excepted from the Investment Company Act, with its determination that one or more of its other holdings are not investment securities for purposes of the 40% test, or with its determinations as to the nature of its business or the manner in which it holds itself out, KFN and/or one or more of its subsidiaries could be required either (i) to change substantially the manner in which it conducts its operations to avoid being subject to the Investment Company Act or (ii) to register as an investment company. Either of these would likely have a material adverse effect on KFN, its ability to service its indebtedness and to make distributions on its shares, and on the market price of its shares and securities, and could thereby materially adversely affect our business, financial condition and results of operations.

Risks Related to the U.S. Listing and Our Common Units

The requirements of being a public entity and sustaining growth may strain our resources.

Following a U.S. Listing, we will be subject to the reporting requirements of the Securities Exchange Act of 1934, or the Exchange Act, and requirements of the Sarbanes-Oxley Act of 2002, or the Sarbanes-Oxley Act. These requirements may place a strain on our systems and resources. The Exchange Act will require that we file annual, quarterly and current reports with respect to our business and financial condition. The Sarbanes-Oxley Act will require that we maintain effective disclosure controls and procedures and internal controls over financial reporting, which are discussed below. In order to maintain and improve the effectiveness of our disclosure controls and procedures, significant resources and management oversight will be required. We will be implementing additional procedures and processes for the purpose of addressing the standards and requirements applicable to

Table of Contents

public companies. In addition, sustaining our growth will also require us to commit additional management, operational and financial resources to identify new professionals to join the firm and to maintain appropriate operational and financial systems to adequately support expansion. These activities may divert management's attention from other business concerns, which could have a material adverse effect on our business, financial condition, results of operations and cash flows. We may also incur costs that we have not previously incurred for expenses for compliance with the Sarbanes-Oxley Act and rules of the SEC and the New York Stock Exchange, hiring additional accounting, legal and administrative personnel, and various other costs related to being a public company.

We have not evaluated our internal controls over financial reporting for purposes of compliance with Section 404 of the Sarbanes-Oxley Act.

We have not previously been required to comply with the requirements of the Sarbanes-Oxley Act, including the internal control evaluation and certification requirements of Section 404 of that statute, and we will not be required to comply with all of those requirements until after we have been subject to the reporting requirements of the Exchange Act for a specified period of time. Accordingly, we have not determined whether or not our existing internal controls over financial reporting systems comply with Section 404. The internal control evaluation required by Section 404 will divert internal resources and will take a significant amount of time, effort and expense to complete. If it is determined that we are not in compliance with Section 404, we will be required to implement remedial procedures and re-evaluate our internal control over financial reporting. We may experience higher than anticipated operating expenses as well as higher independent auditor and consulting fees during the implementation of these changes and thereafter. Further, we may need to hire additional qualified personnel in order for us to comply with Section 404. If we are unable to implement any necessary changes effectively or efficiently, our operations, financial reporting or financial results could be adversely affected and we could obtain an adverse report on internal controls from our independent registered public accountants. In particular, if we are not able to implement the requirements of Section 404 in a timely manner or with adequate compliance, our independent registered public accountants may not be able to certify as to the effectiveness of our internal control over financial reporting. Matters impacting our internal controls may cause us to be unable to report our financial information on a timely basis and thereby subject us to adverse regulatory consequences, including sanctions by the SEC, or violations of applicable stock exchange listing rules. There could also be a negative reaction in the financial markets due to a loss of investor confidence in us and the reliability of our financial statements. Confidence in the reliability of our financial statements is also likely to suffer if our independent registered public accounting firm reports a material weakness in our internal control over financial reporting. This could materially adversely affect us and lead to a decline in the market price of our units.

As a limited partnership, we would qualify for some exemptions from the corporate governance and other requirements of the New York Stock Exchange.

We are a limited partnership and as a result would qualify for exceptions from certain corporate governance and other requirements of the rules of the New York Stock Exchange. Pursuant to these exceptions, limited partnerships may, and we intend to, elect not to comply with certain corporate governance requirements of the New York Stock Exchange, including the requirements: (i) that the listed company have a nominating and corporate governance committee that is composed entirely of independent directors; and (ii) that the listed company have a compensation committee that is composed entirely of independent directors. In addition, as a limited partnership, we will not be required to hold annual unitholder meetings. Accordingly, you will not have the same protections afforded to equity holders of entities that are subject to all of the corporate governance requirements of the New York Stock Exchange.

Table of Contents

Our founders are able to determine the outcome of any matter that may be submitted for a vote of our limited partners.

KKR Holdings owns 70% of the KKR Group Partnership Units and our principals generally have sufficient voting power to determine the outcome of those few matters that may be submitted for a vote of the holders of our common units, including a merger or consolidation of our business, a sale of all or substantially all of our assets and amendments to our partnership agreement that may be material to holders of our common units. In addition, our limited partnership agreement contains provisions that enable us to take actions that would materially and adversely affect all holders of our common units or a particular class of holders of common units upon the majority vote of all outstanding voting units, and since more than a majority of our voting units are controlled by our principals, our principals have the ability to take actions that could materially and adversely affect the holders of our common units either as a whole or as a particular class.

The voting rights of holders of our common units are further restricted by provisions in our limited partnership agreement stating that any of our common units held by a person that beneficially owns 20% or more of any class of our common units then outstanding (other than our Managing Partner or its affiliates, or a direct or subsequently approved transferee of our Managing Partner or its affiliates) cannot be voted on any matter. Our limited partnership agreement also contains provisions limiting the ability of the holders of our common units to call meetings, to acquire information about our operations, and to influence the manner or direction of our management. Our limited partnership agreement does not restrict our Managing Partner's ability to take actions that may result in our partnership being treated as an entity taxable as a corporation for U.S. federal (and applicable state) income tax purposes. Furthermore, holders of our common units would not be entitled to dissenters' rights of appraisal under our limited partnership agreement or applicable Delaware law in the event of a merger or consolidation, a sale of substantially all of our assets or any other transaction or event.

Our limited partnership agreement contains provisions that reduce or eliminate duties (including fiduciary duties) of our Managing Partner and limit remedies available to unitholders for actions that might otherwise constitute a breach of duty. It will be difficult for unitholders to successfully challenge a resolution of a conflict of interest by Managing Partner or by its conflicts committee.

Our limited partnership agreement contains provisions that require holders of our common units to waive or consent to conduct by our Managing Partner and its affiliates that might otherwise raise issues about compliance with fiduciary duties or applicable law. For example, our limited partnership agreement provides that when our Managing Partner is acting in its individual capacity, as opposed to in its capacity as our Managing Partner, it may act without any fiduciary obligations to holders of our common units, whatsoever. When our Managing Partner, in its capacity as our general partner, or our conflicts committee is permitted to or required to make a decision in its "sole discretion" or "discretion" or that it deems "necessary or appropriate" or "necessary or advisable," then our Managing Partner or the conflicts committee will be entitled to consider only such interests and factors as it desires, including its own interests, and will have no duty or obligation (fiduciary or otherwise) to give any consideration to any interest of or factors affecting us or any holder of our common units and will not be subject to any different standards imposed by our limited partnership agreement, the Delaware Revised Uniform Limited Partnership Act, which is referred to as the Delaware Limited Partnership Act, or under any other law, rule or regulation or in equity.

The above modifications of fiduciary duties are expressly permitted by Delaware law. Hence, we and holders of our common units will only have recourse and be able to seek remedies against our Managing Partner if our Managing Partner breaches its obligations pursuant to our limited partnership agreement. Unless our Managing Partner breaches its obligations pursuant to our limited partnership agreement, we and holders of our common units will not have any recourse against our Managing Partner even if our Managing Partner were to act in a manner that was inconsistent with traditional

Table of Contents

fiduciary duties. Furthermore, even if there has been a breach of the obligations set forth in our limited partnership agreement, our limited partnership agreement provides that our Managing Partner and its officers and directors will not be liable to us or holders of our common units, for errors of judgment or for any acts or omissions unless there has been a final and non-appealable judgment by a court of competent jurisdiction determining that our Managing Partner or its officers and directors acted in bad faith or engaged in fraud or willful misconduct. These provisions are detrimental to the holders of our common units because they restrict the remedies available to unitholders for actions that without such limitations might constitute breaches of duty including fiduciary duties.

Whenever a potential conflict of interest exists between us and our Managing Partner, our Managing Partner may resolve such conflict of interest. If our Managing Partner determines that its resolution of the conflict of interest is on terms no less favorable to us than those generally being provided to or available from unrelated third parties or is fair and reasonable to us, taking into account the totality of the relationships between us and our Managing Partner, then it will be presumed that in making this determination, our Managing Partner acted in good faith. A holder of our common units seeking to challenge this resolution of the conflict of interest would bear the burden of overcoming such presumption. This is different from the situation with Delaware corporations, where a conflict resolution by an interested party would be presumed to be unfair and the interested party would have the burden of demonstrating that the resolution was fair.

Also, if our Managing Partner obtains the approval of the conflicts committee of our Managing Partner, the resolution will be conclusively deemed to be fair and reasonable to us and not a breach by our Managing Partner of any duties it may owe to us or holders of our common units. This is different from the situation with Delaware corporations, where a conflict resolution by a committee consisting solely of independent directors may, in certain circumstances, merely shift the burden of demonstrating unfairness to the plaintiff. If you receive a common unit, you will be treated as having consented to the provisions set forth in our limited partnership agreement, including provisions regarding conflicts of interest situations that, in the absence of such provisions, might be considered a breach of fiduciary or other duties under applicable state law. As a result, unitholders will, as a practical matter, not be able to successfully challenge an informed decision by the conflicts committee. See "Conflicts of Interest and Fiduciary Responsibilities."

There may not be an active U.S. market for our common units, which may cause our common units to trade at a discounted price and make it difficult to sell the common units you receive.

Prior to the U.S. Listing our units were not listed on a U.S. securities exchange. It is possible that an active market for our common units will not develop, which would make it difficult for you to sell your common units at an attractive price or at all. As no current holders of our common units are obligated to sell any units, volume of trading in our common units may be very limited.

The market price and trading volume of our common units may be volatile, which could result in rapid and substantial losses for our common unitholders.

Even if an active U.S. trading market for our common units develops, the market price of our common units may be highly volatile and could be subject to wide fluctuations. In addition, the trading volume in our common units may fluctuate and cause significant price variations to occur. If the market price of our common units declines significantly, you may be unable to sell your common units at an attractive price, if at all. The market price of our common units may fluctuate or decline significantly in the future. Some of the factors that could negatively affect the price of our common units or result in fluctuations in the price or trading volume of our common units include:

variations in our quarterly operating results or distributions, which may be substantial;

Table of Contents

our policy of taking a long-term perspective on making investment, operational and strategic decisions, which is expected to result in significant and unpredictable variations in our quarterly returns;

failure to meet analysts' earnings estimates;

publication of research reports about us or the investment management industry or the failure of securities analysts to cover our common units after this offering;

additions or departures of our principals and other key management personnel;

adverse market reaction to any indebtedness we may incur or securities we may issue in the future;

changes in market valuations of similar companies;

speculation in the press or investment community;

changes or proposed changes in laws or regulations or differing interpretations thereof affecting our business or enforcement of these laws and regulations, or announcements relating to these matters;

a lack of liquidity in the trading of our common units;

adverse publicity about the asset management industry generally or individual scandals, specifically; and

general market and economic conditions.

An investment in our common units is not an investment in any of our funds, and the assets and revenues of our funds are not directly available to us.

This prospectus solely relates to our common units, and is not an offer directly or indirectly of any securities of any of our funds. Our common units are securities of KKR & Co. L.P. only. While our historical consolidated and combined financial information includes financial information, including assets and revenues, of certain funds on a consolidated basis, and our future financial information will continue to consolidate certain of these funds, such assets and revenues are available to the fund and not to us except to a limited extent through management fees, carried interest or other incentive income, distributions and other proceeds arising from agreements with funds, as discussed in more detail in this prospectus.

Our common unit price may decline due to the large number of common units eligible for future sale and for exchange, and issuable pursuant to our equity incentive plan.

The market price of our common units could decline as a result of sales of a large number of common units in the market or the perception that such sales could occur. These sales, or the possibility that these sales may occur, also might make it more difficult for us to sell common units in the future at a time and at a price that we deem appropriate. Following the U.S. Listing, we expect to have 204,902,226 common units outstanding, excluding common units beneficially owned by KKR Holdings in the form of KKR Group Partnership Units discussed below and common units available for future issuance under the KKR & Co. L.P. Equity Incentive Plan, which we refer to as our Equity Incentive Plan. All of the common units distributed to KKR Guernsey Unitholders in the In-Kind Distribution will be freely tradable without restriction or further registration under the Securities Act by persons other than our "affiliates." See "Common Units Eligible for Future Sale."

Edgar Filing: KKR & Co. L.P. - Form S-1

KKR Holdings owns 478,105,194 KKR Group Partnership Units that may be exchanged, up to four times each year, for our common units on a one-for-one basis, subject to customary conversion rate adjustments for splits, unit distributions and reclassifications. Except for interests held by our founders

Table of Contents

and certain interests held by other executives that were vested upon grant, interests in KKR Holdings that are held by our principals are subject to time based vesting over a 5-year period or performance based vesting and, following such vesting, additional restrictions on exchange for a period of one or two years. The common units issued upon such exchanges would be "restricted securities," as defined in Rule 144 under the Securities Act, unless we register such issuances. However, we will enter into a registration rights agreement with KKR Holdings that will require us to register these common units under the Securities Act. The market price of our common units could decline as a result of the exchange or the perception that an exchange may occur of a large number of KKR Group Partnership Units for our common units. These exchanges, or the possibility that these exchanges may occur, also might make it more difficult for holders of our common units to sell our common units in the future at a time and at a price that they deem appropriate.

As discussed above, we may issue additional common units pursuant to our Equity Incentive Plan. The total number of common units which may initially be issued under our Equity Incentive Plan is equivalent to 15% of the number of fully diluted common units outstanding as of the effective date of the plan. See "Management KKR & Co. L.P. Equity Incentive Plan." The amount may be increased each year to the extent that we issue additional equity. In addition, our limited partnership agreement authorizes us to issue an unlimited number of additional partnership securities and options, rights, warrants and appreciation rights relating to partnership securities for the consideration and on the terms and conditions established by our Managing Partner in its sole discretion without the approval of our unitholders, including awards representing our common units under the Equity Incentive Plan. In accordance with the Delaware Limited Partnership Act and the provisions of our partnership agreement, we may also issue additional partner interests that have designations, preferences, rights, powers and duties that are different from, and may be senior to, those applicable to our common units.

Risks Related to Our Organizational Structure

Potential conflicts of interest may arise among our Managing Partner, our affiliates and us. Our Managing Partner and our affiliates have limited fiduciary duties to us and the holders of KKR Group Partnership Units, which may permit them to favor their own interests to our detriment and that of the holder of KKR Group Partnership Units.

Our Managing Partner, which is our general partner, will manage the business and affairs of our business, and will be governed by a board of directors that is co-chaired by our founders, who also serve as our Co-Chief Executive Officers. Conflicts of interest may arise among our Managing Partner and its affiliates, on the one hand, and us and our unitholders, on the other hand. As a result of these conflicts, our Managing Partner may favor its own interests and the interests of its affiliates over us and our unitholders. These conflicts include, among others, the following:

Our Managing Partner determines the amount and timing of the KKR Group Partnership's investments and dispositions, indebtedness, issuances of additional partner interests, tax liabilities and amounts of reserves, each of which can affect the amount of cash that is available for distribution to holders of KKR Group Partnership Units;

Our Managing Partner is allowed to take into account the interests of parties other than us in resolving conflicts of interest, which has the effect of limiting its duties, including fiduciary duties, to us. For example, our affiliates that serve as the general partners of our funds have fiduciary and contractual obligations to our fund investors, and such obligations may cause such affiliates to regularly take actions that might adversely affect our near-term results of operations or cash flow. Our Managing Partner will have no obligation to intervene in, or to notify us of, such actions by such affiliates;

Table of Contents

Because our principals will indirectly hold their KKR Group Partnership Units through entities that are not subject to corporate income taxation and we will hold some of the KKR Group Partnership Units through a wholly owned subsidiary that is taxable as a corporation, conflicts may arise between our principals and us relating to the selection and structuring of investments, declaring distributions and other matters;

As discussed above, our Managing Partner has limited its liability and reduced or eliminated its duties, including fiduciary duties, under our partnership agreement, while also restricting the remedies available to holders of KKR Group Partnership Units for actions that, without these limitations, might constitute breaches of duty, including fiduciary duties. In addition, we have agreed to indemnify our Managing Partner and its affiliates to the fullest extent permitted by law, except with respect to conduct involving bad faith, fraud or willful misconduct. By receiving our common units, you will have agreed and consented to the provisions set forth in our partnership agreement, including the provisions regarding conflicts of interest situations that, in the absence of such provisions, might constitute a breach of fiduciary or other duties under applicable law;

Our partnership agreement does not restrict our Managing Partner from paying us or our affiliates for any services rendered, or from entering into additional contractual arrangements with any of these entities on our behalf, so long as the terms of any such additional contractual arrangements are fair and reasonable to us as determined under our partnership agreement. The conflicts committee will be responsible for, among other things, enforcing our rights and those of our unitholders under certain agreements, against KKR Holdings and certain of its subsidiaries and designees, a general partner or limited partner of KKR Holdings, or a person who holds a partnership or equity interest in the foregoing entities;

Our Managing Partner determines how much debt we incur and that decision may adversely affect any credit ratings we receive;

Our Managing Partner determines which costs incurred by it and its affiliates are reimbursable by us;

Other than as set forth in the confidentiality and restrictive covenant agreements to which our principals are subject, which may not be enforceable by KKR or otherwise waived, modified or amended, affiliates of our Managing Partner and existing and former personnel employed by our Managing Partner are not prohibited from engaging in other businesses or activities, including those that might be in direct competition with us;

Our Managing Partner controls the enforcement of obligations owed to the KKR Group Partnerships by us and our affiliates; and

Our Managing Partner or our Managing Partner conflicts committee decides whether to retain separate counsel, accountants or others to perform services for us.

See "Certain Relationships and Related Party Transactions" and "Conflicts of Interest and Fiduciary Responsibilities."

Certain actions by our Managing Partner's board of directors require the approval of the Class A shares of our Managing Partner, all of which are held by our senior principals.

All of our Managing Partner's outstanding Class A shares are held by our senior principals. Although the affirmative vote of a majority of the directors of our Managing Partner is required for any action to be taken by our Managing Partner's board of directors, certain specified actions approved

Table of Contents

by our Managing Partner's board of directors will also require the approval of a majority of the Class A shares of our Managing Partner. These actions consist of the following:

the entry into a debt financing arrangement by us in an amount in excess of 10% of our existing long-term indebtedness (other than the entry into certain intercompany debt financing arrangements);

the issuance by our partnership or our subsidiaries of any securities that would (i) represent, after such issuance, or upon conversion, exchange or exercise, as the case may be, at least 5% on a fully diluted, as converted, exchanged or exercised basis, of any class of our or their equity securities or (ii) have designations, preferences, rights, priorities or powers that are more favorable than those of KKR Group Partnership Units;

the adoption by us of a shareholder rights plan;

the amendment of our limited partnership agreement or the limited partnership agreements of the KKR Group Partnerships;

the exchange or disposition of all or substantially all of our assets or the assets of any KKR Group Partnership;

the merger, sale or other combination of the partnership or any KKR Group Partnership with or into any other person;

the transfer, mortgage, pledge, hypothecation or grant of a security interest in all or substantially all of the assets of the KKR Group Partnerships;

the appointment or removal of a Chief Executive Officer or a Co-Chief Executive Officer of our Managing Partner or our partnership;

the termination of the employment of any of our officers or the officers of any of our subsidiaries or the termination of the association of a partner with any of our subsidiaries, in each case, without cause;

the liquidation or dissolution of the partnership, our Managing Partner or any KKR Group Partnership; and

the withdrawal, removal or substitution of our Managing Partner as our general partner or any person as the general partner of a KKR Group Partnership, or the transfer of beneficial ownership of all or any part of a general partner interest in our partnership or a KKR Group Partnership to any person other than one of its wholly owned subsidiaries.

Messrs. Kravis and Roberts collectively hold Class A shares representing a majority of the total voting power of the outstanding Class A shares. While neither of them acting alone will be able to control the voting of the Class A shares, they will be able to control the voting of such shares if they act together.

Our common unitholders do not elect our Managing Partner or vote on our Managing Partner's directors and have limited ability to influence decisions regarding our business.

Our common unitholders do not elect our Managing Partner or its board of directors and, unlike the holders of common stock in a corporation, have only limited voting rights on matters affecting our business and therefore limited ability to influence decisions regarding our

business. Furthermore, if our common unitholders are dissatisfied with the performance of our Managing Partner, they have no ability to remove our Managing Partner, with or without cause.

Table of Contents

The control of our Managing Partner may be transferred to a third party without our consent.

Our Managing Partner may transfer its general partner interest to a third party in a merger or consolidation or in a transfer of all or substantially all of its assets without our consent or the consent of our common unitholders. Furthermore, the members of our Managing Partner may sell or transfer all or part of their limited liability company interests in our Managing Partner without our approval, subject to certain restrictions as described elsewhere in this prospectus. A new general partner may not be willing or able to form new funds and could form funds that have investment objectives and governing terms that differ materially from those of our current funds. A new owner could also have a different investment philosophy, employ investment professionals who are less experienced, be unsuccessful in identifying investment opportunities or have a track record that is not as successful as our track record. If any of the foregoing were to occur, we could experience difficulty in making new investments, and the value of our existing investments, our business, our results of operations and our financial condition could materially suffer.

We intend to pay periodic distributions to the holders of our common units, but our ability to do so may be limited by our holding company structure and contractual restrictions.

We intend to pay cash distributions on a quarterly basis. We are a holding company and will have no material assets other than the KKR Group Partnership Units that we will hold through wholly-owned subsidiaries and will have no independent means of generating income. Accordingly, we intend to cause the KKR Group Partnerships to make distributions on the KKR Group Partnership Units, including KKR Group Partnership Units that we directly or indirectly hold, in order to provide us with sufficient amounts to fund distributions we may declare. If the KKR Group Partnerships make such distributions, other holders of KKR Group Partnership Units, including KKR Holdings, will be entitled to receive equivalent distributions pro rata based on their KKR Group Partnership Units, as described under "Distribution Policy."

The declaration and payment of any future distributions will be at the sole discretion of our Managing Partner, which may change our distribution policy at any time. Our Managing Partner will take into account general economic and business conditions, our strategic plans and prospects, our business and investment opportunities, our financial condition and operating results, compensation expense, working capital requirements and anticipated cash needs, contractual restrictions and obligations (including payment obligations pursuant to the tax receivable agreement), legal, tax and regulatory restrictions, restrictions or other implications on the payment of distributions by us to the holders of KKR Group Partnership Units or by our subsidiaries to us and such other factors as our Managing Partner may deem relevant. Under the Delaware Limited Partnership Act, we may not make a distribution to a partner if after the distribution all our liabilities, other than liabilities to partners on account of their partnership interests and liabilities for which the recourse of creditors is limited to specific property of the partnership, would exceed the fair value of our assets. If we were to make such an impermissible distribution, any limited partner who received a distribution and knew at the time of the distribution that the distribution was in violation of the Delaware Limited Partnership Act would be liable to us for the amount of the distribution for three years. Furthermore, by paying cash distributions rather than investing that cash in our businesses, we risk slowing the pace of our growth, or not having a sufficient amount of cash to fund our operations, new investments or unanticipated capital expenditures, should the need arise.

Our ability to characterize such distributions as capital gains or qualified dividend income may be limited, and you should expect that some or all of such distributions may be regarded as ordinary income.

Table of Contents

We will be required to pay our principals for most of the benefits relating to any additional tax depreciation or amortization deductions we may claim as a result of the tax basis step-up we receive in connection with subsequent exchanges of our common units and related transactions.

We and our intermediate holding company may be required to acquire KKR Group Partnership Units from time to time pursuant to our exchange agreement with KKR Holdings. To the extent this occurs, the exchanges are expected to result in an increase in our intermediate holding company's share of the tax basis of the tangible and intangible assets of KKR Management Holdings L.P., primarily attributable to a portion of the goodwill inherent in our business, that would not otherwise have been available. This increase in tax basis may increase (for tax purposes) depreciation and amortization and therefore reduce the amount of income tax our intermediate holding company would otherwise be required to pay in the future. This increase in tax basis may also decrease gain (or increase loss) on future dispositions of certain capital assets to the extent tax basis is allocated to those capital assets.

We are party to a tax receivable agreement with KKR Holdings requiring our intermediate holding company to pay to KKR Holdings or transferees of its KKR Group Partnership Units 85% of the amount of cash savings, if any, in U.S. federal, state and local income tax that the intermediate holding company actually realizes as a result of this increase in tax basis, as well as 85% of the amount of any such savings the intermediate holding company actually realizes as a result of increases in tax basis that arise due to future payments under the agreement. A termination of the agreement or a change of control could give rise to similar payments based on tax savings that we would be deemed to realize in connection with such events. This payment obligation will be an obligation of our intermediate holding company and not of either KKR Group Partnership. In the event that any of our current or future subsidiaries become taxable as corporations and acquire KKR Group Partnership Units in the future, or if we become taxable as a corporation for U.S. federal income tax purposes, we expect that each such entity will become subject to a tax receivable agreement with substantially similar terms. While the actual increase in tax basis, as well as the amount and timing of any payments under this agreement, will vary depending upon a number of factors, including the timing of exchanges, the price of our common units at the time of the exchange, the extent to which such exchanges are taxable and the amount and timing of our taxable income, we expect that as a result of the size of the increases in the tax basis of the tangible and intangible assets of the KKR Group Partnerships, the payments that we may be required to make to our existing owners will be substantial. The payments under the tax receivable agreement are not conditioned upon our existing owners' continued ownership of us. We may need to incur debt to finance payments under the tax receivable agreement to the extent our cash resources are insufficient to meet our obligations under the tax receivable agreement as a result of timing discrepancies or otherwise. In particular, our intermediate holding company's obligations under the tax receivable agreement would be effectively accelerated in the event of an early termination of the tax receivable agreement by our intermediate holding company or in the event of certain mergers, asset sales and other forms of business combinations or other changes of control. In these situations, our obligations under the tax receivable agreement could have a substantial negative impact on our liquidity.

Payments under the tax receivable agreement will be based upon the tax reporting positions that our Managing Partner will determine. We are not aware of any issue that would cause the IRS to challenge a tax basis increase. However, neither KKR Holdings nor its transferees will reimburse us for any payments previously made under the tax receivable agreement if such tax basis increase, or the tax benefits we claim arising from such increase, is successfully challenged by the IRS. As a result, in certain circumstances, payments to KKR Holdings or its transferees under the tax receivable agreement could be in excess of the intermediate holding company's cash tax savings. The intermediate holding company's ability to achieve benefits from any tax basis increase, and the payments to be made under this agreement, will depend upon a number of factors, as discussed above, including the timing and amount of our future income.

Table of Contents

If we were deemed to be an "investment company" subject to regulation under the Investment Company Act, applicable restrictions could make it impractical for us to continue our business as contemplated and could have a material adverse effect on our business.

A person will generally be deemed to be an "investment company" for purposes of the Investment Company Act if:

it is or holds itself out as being engaged primarily, or proposes to engage primarily, in the business of investing, reinvesting or trading in securities; or

absent an applicable exemption, it owns or proposes to acquire investment securities having a value exceeding 40% of the value of our total assets (exclusive of U.S. government securities and cash items) on an unconsolidated basis.

We believe that we are engaged primarily in the business of providing asset management services and not in the business of investing, reinvesting or trading in securities. We regard ourselves as an asset management firm and do not propose to engage primarily in the business of investing, reinvesting or trading in securities. Accordingly, we do not believe that we are an "orthodox" investment company as defined in Section 3(a)(1)(A) of the Investment Company Act and described in the first bullet point above.

With regard to the provision described in the second bullet point above, we have no material assets other than our equity interest as general partner of one of the KKR Group Partnerships and our equity interest in a wholly owned subsidiary, which in turn has no material assets other than the equity interest as general partner of the other KKR Group Partnership. Through these interests, we will directly or indirectly be the sole general partners of the KKR Group Partnerships and will be vested with all management and control over the KKR Group Partnerships. We do not believe our equity interest in our wholly owned subsidiary or our equity interests directly or through our wholly owned subsidiary in the KKR Group Partnerships are investment securities. Moreover, because we believe that the capital interests of the general partners of our funds in their respective funds are neither securities nor investment securities, we believe that if other exemptions to registration under the Investment Company Act were to cease to apply, then less than 40% of the partnership's total assets (exclusive of U.S. government securities and cash items) on an unconsolidated basis would be comprised of assets that could be considered investment securities. In this regard, as a result of the Combination Transaction, we succeeded to a significant number of investment securities previously held by KPE and now held by our KKR Group Partnerships. We monitor these holdings regularly to confirm our continued compliance with the 40% test described in the second bullet point above. The need to comply with this 40% test may cause us to restrict our business and subsidiaries with respect to the assets in which we can invest and/or the types of securities we may issue, sell investment securities, including on unfavorable terms, acquire assets or businesses that could change the nature of our business or potentially take other actions which may be viewed as adverse by the holders of our common units, in order to ensure conformity with exceptions provided by, and rules and regulations promulgated under, the Investment Company Act.

The Investment Company Act and the rules thereunder contain detailed parameters for the organization and operation of investment companies. Among other things, the Investment Company Act and the rules thereunder limit or prohibit transactions with affiliates, impose limitations on the issuance of debt and equity securities, generally prohibit the issuance of options and impose certain governance requirements. We intend to conduct our operations so that we will not be deemed to be an investment company under the Investment Company Act. If anything were to happen which would cause the partnership to be deemed to be an investment company under the Investment Company Act, requirements imposed by the Investment Company Act, including limitations on our capital structure, ability to transact business with affiliates (including us) and ability to compensate key employees, could make it impractical for us to continue our business as currently conducted, impair the agreements and

Table of Contents

arrangements between and among the partnership, the KKR Group Partnerships and KKR Holdings, or any combination thereof, and materially adversely affect our business, financial condition and results of operations. In addition, we may be required to limit the amount of investments that we make as a principal, potentially divest assets acquired in the Combination Transaction or otherwise conduct our business in a manner that does not subject it to the registration and other requirements of the Investment Company Act.

We are a Delaware limited partnership, and there are certain provisions in our limited partnership agreement regarding exculpation and indemnification of our officers and directors that differ from the Delaware General Corporation Law (DGCL) in a manner that may be less protective of the interests of our common unitholders.

Our limited partnership agreement provides that to the fullest extent permitted by applicable law our directors or officers will not be liable to us. However, under the DGCL, a director or officer would be liable to us for (i) breach of duty of loyalty to us or our shareholders, (ii) intentional misconduct or knowing violations of the law that are not done in good faith, (iii) improper redemption of shares or declaration of dividend, or (iv) a transaction from which the director derived an improper personal benefit. In addition, our limited partnership agreement provides that we indemnify our directors and officers for acts or omissions to the fullest extent provided by law. However, under the DGCL, a corporation can only indemnify directors and officers for acts or omissions if the director or officer acted in good faith, in a manner he reasonably believed to be in the best interests of the corporation, and, in criminal action, if the officer or director had no reasonable cause to believe his conduct was unlawful. Accordingly, our limited partnership agreement may be less protective of the interests of our common unitholders, when compared to the DGCL, insofar as it relates to the exculpation and indemnification of our officers and directors.

Risks Related to U.S. Taxation

If we were treated as a corporation for U.S. federal income tax or state tax purposes, then our distributions to you would be substantially reduced and the value of our common units could be adversely affected.

The value of your investment in us depends in part on our being treated as a partnership for U.S. federal income tax purposes, which requires that 90% or more of our gross income for every taxable year consist of qualifying income, as defined in Section 7704 of the Internal Revenue Code, and that our partnership not be registered under the Investment Company Act. Qualifying income generally includes dividends, interest, capital gains from the sale or other disposition of stocks and securities and certain other forms of investment income. We may not meet these requirements or current law may change so as to cause, in either event, us to be treated as a corporation for U.S. federal income tax purposes or otherwise subject us to U.S. federal income tax. We have not requested, and do not plan to request, a ruling from the IRS, on this or any other matter affecting us.

If we were treated as a corporation for U.S. federal income tax purposes, we would pay U.S. federal, state and local income tax on our taxable income at the applicable tax rates. Distributions to you would generally be taxed again as corporate distributions, and no income, gains, losses, deductions or credits would otherwise flow through to you. Because a tax would be imposed upon us as a corporation, our distributions to you would be substantially reduced which could cause a reduction in the value of our common units.

Current law may change, causing us to be treated as a corporation for U.S. federal or state income tax purposes or otherwise subjecting us to entity level taxation. See "Risks Related to KKR's Business" Legislation has been introduced in the U.S. Congress in various forms that, if enacted, (i) could preclude us from qualifying as a partnership and/or (ii) could tax carried interest as ordinary income for U.S. federal income tax purposes and require us to hold carried interest through taxable

Table of Contents

subsidiary corporations. If this or any similar legislation or regulation were to be enacted and apply to us, we would incur a material increase in our tax liability that could result in a reduction in the market price of our common units." Because of widespread state budget deficits, several states are evaluating ways to subject partnerships to entity level taxation through the imposition of state income, franchise or other forms of taxation. If any state were to impose a tax upon us as an entity, our distributions to you would be reduced.

You will be subject to U.S. federal income tax on your share of our taxable income, regardless of whether you receive any cash distributions, and may recognize income in excess of cash distributions.

As long as 90% of our gross income for each taxable year constitutes qualifying income as defined in Section 7704 of the Internal Revenue Code and we are not required to register as an investment company under the Investment Company Act on a continuing basis, and assuming there is no change in law, we will be treated, for U.S. federal income tax purposes, as a partnership and not as an association or a publicly traded partnership taxable as a corporation. As a result, a U.S. unitholder will be subject to U.S. federal, state, local and possibly, in some cases, foreign income taxation on its allocable share of our items of income, gain, loss, deduction and credit (including its allocable share of those items of any entity in which we invest that is treated as a partnership or is otherwise subject to tax on a flow through basis) for each of our taxable years ending with or within the unitholder's taxable year, regardless of whether or when such unitholder receives cash distributions. See "Risks Related to KKR's Business" Legislation has been introduced in the U.S. Congress in various forms that, if enacted, (i) could preclude us from qualifying as a partnership and/or (ii) could tax carried interest as ordinary income for U.S. federal income tax purposes and require us to hold carried interest through taxable subsidiary corporations. If this or any similar legislation or regulation were to be enacted and apply to us, we would incur a material increase in our tax liability that could result in a reduction in the market price of our common units."

You may not receive cash distributions equal to your allocable share of our net taxable income or even the tax liability that results from that income. In addition, certain of our holdings, including holdings, if any, in a controlled foreign corporation, or a CFC, a passive foreign investment company, or a PFIC, or entities treated as partnerships for U.S. federal income tax purposes, may produce taxable income prior to the receipt of cash relating to such income, and holders of our common units that are U.S. taxpayers may be required to take such income into account in determining their taxable income. In the event of an inadvertent termination of the partnership status for which the IRS has granted limited relief, each holder of our common units may be obligated to make such adjustments as the IRS may require to maintain our status as a partnership. Such adjustments may require the holders of our common units to recognize additional amounts in income during the years in which they hold such units. In addition, because of our methods of allocating income and gain among holders of our common units, you may be taxed on amounts that accrued economically before you became a unitholder. Consequently, you may recognize taxable income without receiving any cash.

Although we expect that distributions we make should be sufficient to cover a holder's tax liability in any given year that is attributable to its investment in us, no assurances can be made that this will be the case. Accordingly, each holder should ensure that it has sufficient cash flow from other sources to pay all tax liabilities.

Our interests in certain of our businesses will be held through an intermediate holding company, which will be treated as a corporation for U.S. federal income tax purposes; such corporation will be liable for significant taxes and may create other adverse tax consequences, which could potentially adversely affect the value of our common units.

In light of the publicly traded partnership rules under U.S. federal income tax laws and other requirements, we will hold our interest in certain of our businesses through an intermediate holding

Table of Contents

company, which will be treated as a corporation for U.S. federal income tax purposes. This intermediate holding company will be liable for U.S. federal income taxes on all of its taxable income and applicable state, local and other taxes. These taxes would reduce the amount of distributions available to be made on our common units. In addition, these taxes could be increased if the IRS were to successfully reallocate deductions or income of the related entities conducting our business.

Complying with certain tax-related requirements may cause us to invest through foreign or domestic corporations subject to corporate income tax or enter into acquisitions, borrowings, financings or arrangements we may not have otherwise entered into.

In order for us to be treated as a partnership for U.S. federal income tax purposes and not as an association or publicly traded partnership taxable as a corporation, we must meet the qualifying income exception discussed above on a continuing basis and we must not be required to register as an investment company under the Investment Company Act. In order to effect such treatment, we or our subsidiaries may be required to invest through foreign or domestic corporations subject to corporate income tax, or enter into acquisitions, borrowings, financings or other transactions we may not have otherwise entered into.

We may hold or acquire certain investments through an entity classified as a PFIC or CFC for U.S. federal income tax purposes.

Certain of our investments may be in foreign corporations or may be acquired through a foreign subsidiary that would be classified as a corporation for U.S. federal income tax purposes. Such an entity may be PFIC for U.S. federal income tax purposes. In addition, we may hold certain investments in foreign corporations that are treated as CFCs. Unitholders may experience adverse U.S. tax consequences as a result of holding an indirect interest in a PFIC or CFC. These investments may produce taxable income prior to the receipt of cash relating to such income, and unitholders that are U.S. taxpayers will be required to take such income into account in determining their taxable income. In addition, gain on the sale of a PFIC or CFC may be taxable at ordinary income rates. See "Material U.S. Federal Income Tax Considerations U.S. Taxes Consequences to U.S. Holders of Common Units Passive Foreign Investment Companies" and "Material U.S. Federal Income Tax Considerations Consequences to U.S. Holders of Common Units Controlled Foreign Corporations."

Tax gain or loss on disposition of our common units could be more or less than expected.

If you sell your common units, you will recognize a gain or loss equal to the difference between the amount realized and your adjusted tax basis allocated to those common units. Prior distributions to you in excess of the total net taxable income allocated to you will have decreased the tax basis in your common units. Therefore, such excess distributions will increase your taxable gain, or decrease your taxable loss, when the common units are sold and may result in a taxable gain even if the sale price is less than the original cost. A portion of the amount realized, whether or not representing gain, may be ordinary income to you.

Unitholders may be allocated taxable gain on the disposition of certain assets, even if they did not share in the economic appreciation inherent in such assets.

We and our intermediate holding company will be allocated taxable gains and losses recognized by the KKR Group Partnerships based upon our percentage ownership in each KKR Group Partnership. Our share of such taxable gains and losses generally will be allocated pro rata to our unitholders. In some circumstances, under the U.S. federal income tax rules affecting partners and partnerships, the taxable gain or loss allocated to a unitholder may not correspond to that unitholder's share of the economic appreciation or depreciation in the particular asset. This is primarily an issue of the timing of

Table of Contents

the payment of tax, rather than a net increase in tax liability, because the gain or loss allocation would generally be expected to be offset as a unitholder sold units.

Non-U.S. persons face unique U.S. tax issues from owning our common units that may result in adverse tax consequences to them.

We may be, or may become, engaged in a U.S. trade or business for U.S. federal income tax purposes, including by reason of investments in U.S. real property holding corporations, in which case some portion of its income would be treated as effectively connected income with respect to non-U.S. holders, or ECI. To the extent our income is treated as ECI, non-U.S. unitholders generally would be subject to withholding tax on their allocable share of such income, would be required to file a U.S. federal income tax return for such year reporting their allocable share of income effectively connected with such trade or business and any other income treated as ECI, and would be subject to U.S. federal income tax at regular U.S. tax rates on any such income (state and local income taxes and filings may also apply in that event). Non-U.S. unitholders that are corporations may also be subject to a 30% branch profits tax on their distributions of such income. In addition, distributions to non-U.S. unitholders that are attributable to the sale of a U.S. real property interest may also be subject to 30% withholding tax. Also, non-U.S. unitholders may be subject to 30% withholding on allocations of our income that are U.S. source fixed or determinable annual or periodic income under the Internal Revenue Code, unless an exemption from or a reduced rate of such withholding applies and certain tax status information is provided.

Tax-exempt entities face unique tax issues from owning common units that may result in adverse tax consequences to them.

Generally, a tax-exempt partner of a partnership would be treated as earning unrelated business taxable income, or UBTI, if the partnership regularly engages in a trade or business that is unrelated to the exempt function of the tax-exempt partner, if the partnership derives income from debt-financed property or if the partner interest itself is debt-financed. As a result of incurring acquisition indebtedness we will derive income that constitutes UBTI. Consequently, a holder of common units that is a tax-exempt organization will likely be subject to unrelated business income tax to the extent that its allocable share of our income consists of UBTI. In addition, a tax-exempt investor may be subject to unrelated business income tax on a sale of their common units.

We cannot match transferors and transferees of common units, and we will therefore adopt certain income tax accounting conventions that may not conform with all aspects of applicable tax requirements. The IRS may challenge this treatment, which could adversely affect the value of our common units.

Because we cannot match transferors and transferees of common units, we will adopt depreciation, amortization and other tax accounting positions that may not conform with all aspects of existing Treasury regulations. A successful IRS challenge to those positions could adversely affect the amount of tax benefits available to our unitholders. It also could affect the timing of these tax benefits or the amount of gain on the sale of common units and could have a negative impact on the value of our common units or result in audits of and adjustments to our unitholders' tax returns.

The sale or exchange of 50% or more of our capital and profit interests will result in the termination of our partnership for U.S. federal income tax purposes.

We will be considered to have been terminated for U.S. federal income tax purposes if there is a sale or exchange of 50% or more of the total interests in our capital and profits within a 12-month period. A termination of our partnership would, among other things, result in the closing of our taxable year for all unitholders. See "Material U.S. Federal Tax Considerations" for a description of the consequences of our termination for U.S. federal income tax purposes.

Table of Contents

Holders of our common units may be subject to state and local taxes and return filing requirements as a result of owning such units.

In addition to U.S. federal income taxes, holders of our common units may be subject to other taxes, including state and local taxes, unincorporated business taxes and estate, inheritance or intangible taxes that are imposed by the various jurisdictions in which we do business or own property now or in the future, even if the holders of our common units do not reside in any of those jurisdictions. Holders of our common units may be required to file state and local income tax returns and pay state and local income taxes in some or all of these jurisdictions. Further, holders of our common units may be subject to penalties for failure to comply with those requirements. It is the responsibility of each unitholder to file all U.S. federal, state and local tax returns that may be required of such unitholder. Our counsel has not rendered an opinion on the state or local tax consequences of owning our units.

We do not expect to be able to furnish to each unitholder specific tax information within 90 days after the close of each calendar year, which means that holders of common units who are U.S. taxpayers should anticipate the need to file annually a request for an extension of the due date of their income tax return.

As a publicly traded partnership, our operating results, including distributions of income, dividends, gains, losses or deductions, and adjustments to carrying basis, will be reported on Schedule K-1 and distributed to each unitholder annually. It may require longer than 90 days after the end of our fiscal year to obtain the requisite information from all lower-tier entities so that K-1s may be prepared for the unitholders. For this reason, holders of common units who are U.S. taxpayers should anticipate the need to file annually with the IRS (and certain states) a request for an extension past April 15 or the otherwise applicable due date of their income tax return for the taxable year. See "Material U.S. Federal Tax Considerations U.S. Taxes Administrative Matters Information Returns."

Table of Contents

DISTRIBUTION POLICY

We intend to make quarterly cash distributions to holders of our common units in amounts that in the aggregate are expected to constitute substantially all of the cash earnings of our asset management business each year in excess of amounts determined by our Managing Partner to be necessary or appropriate to provide for the conduct of our business, to make appropriate investments in our business and our investment funds and to comply with applicable law and any of our debt instruments or other agreements. For the purposes of our distribution policy, our cash earnings from our asset management business is expected to consist of (i) our fee related earnings net of taxes and certain other adjustments and (ii) carry distributions received from our investment funds and vehicles that have not been allocated as part of our carry pool. We do not intend to distribute gains on principal investments, other than, potentially, certain tax distributions as discussed below.

Our distribution policy reflects our belief that distributing substantially all of the cash earnings of our asset management business will provide transparency for holders of our common units and impose on us an investment discipline with respect to the businesses and strategies that we pursue.

Because we make our investment in our business through a holding company structure and the applicable holding companies do not own any material cash-generating assets other than their direct and indirect holdings in KKR Group Partnership Units, distributions are expected to be funded in the following manner:

First, the KKR Group Partnerships will make distributions to holders of KKR Group Partnership Units, including the holding companies through which we invest, in proportion to their percentage interests in the KKR Group Partnerships;

Second, the holding companies through which we invest will distribute to us the amount of any distributions that they receive from the KKR Group Partnerships, after deducting any applicable taxes, and

Third, we will distribute to holders of our units the amount of any distributions that we receive from our holding companies through which we invest.

The partnership agreements of the KKR Group Partnerships provide for cash distributions, which are referred to as tax distributions, to the partners of such partnerships if our Managing Partner determines that the taxable income of the relevant partnership will give rise to taxable income for its partners. We expect that the KKR Group Partnerships will make tax distributions only to the extent distributions from such partnerships for the relevant year were otherwise insufficient to cover such tax liabilities. Generally, these tax distributions are expected to be computed based on an estimate of the net taxable income of the relevant partnership allocable to a partner multiplied by an assumed tax rate equal to the highest effective marginal combined U.S. federal, state and local income tax rate prescribed for an individual or corporate resident in New York, New York (taking into account the non-deductibility of certain expenses and the character of our income). A portion of any such tax distributions received by us, net of amounts used by our subsidiaries to pay their tax liability, is expected to be distributed by us. Such amounts are generally expected to be sufficient to permit U.S. holders of KKR Group Partnership Units to fund their estimated U.S. tax obligations (including any federal, state and local income taxes) with respect to their distributive shares of net income or gain, after taking into account any withholding tax imposed on us. There can be no assurance that, for any particular unitholder, such distributions will be sufficient to pay the unitholder's actual U.S. or non-U.S. tax liability.

Table of Contents

The actual amount and timing of distributions are subject to the discretion of the board of directors of our Managing Partner, and there can be no assurance that distributions will be made as intended or at all. In particular, the amount and timing of distributions will depend upon a number of factors, including, among others, our available cash and current and anticipated cash needs, including funding of investment commitments and debt service and repayment obligations; general economic and business conditions; our strategic plans and prospects; our results of operations and financial condition; our capital requirements; legal, contractual and regulatory restrictions on the payment of distributions by us or our subsidiaries, including restrictions contained in our debt agreements, and such other factors as the board of directors of our Managing Partner considers relevant.

Table of Contents**CAPITALIZATION**

The following table presents our consolidated cash and cash equivalents and capitalization as of December 31, 2009. You should read this information together with the information included elsewhere in this prospectus, including the information set forth under "Organizational Structure," "Unaudited Pro Forma Financial Information," and "Management's Discussion and Analysis of Financial Condition and Results of Operations" and the accompanying financial statements and related notes thereto.

	December 31, 2009	
	(\$ in thousands)	
Cash and Cash Equivalents	\$	546,739
Cash and Cash Equivalents Held at Consolidated Entities		282,091
Restricted Cash and Cash Equivalents		72,298
Total Cash, Cash Equivalents and Restricted Cash	\$	901,128
Debt Obligations	\$	2,060,185
Noncontrolling Interests in Consolidated Entities	\$	23,275,272
Noncontrolling Interests Attributable to KKR Holdings		3,072,360
Group Holdings Partners' Capital		1,012,656
Accumulated Other Comprehensive Income		1,193
Total Group Holdings Partners' Capital(1)	\$	1,013,849
Total Capitalization	\$	29,421,666

- (1) Total Group Holdings partners' capital reflects only the portion of equity attributable to Group Holdings (reflecting KKR Guernsey's 30% interest in our Combined Business) and differs from partners' capital reported on a segment basis primarily as a result of the exclusion of the following items from our segment presentation: (i) the impact of income taxes; (ii) charges relating to the amortization of intangible assets; (iii) non-cash equity based charges; and (iv) allocations of equity to KKR Holdings. For a reconciliation to the \$4,152.9 million of partners' capital reported on a segment basis, please see "Management's Discussion and Analysis of Financial Condition and Results of Operations Segment Partners' Capital." KKR Holdings' 70% interest in our Combined Business is reflected as noncontrolling interests held by KKR Holdings and is not included in total Group Holdings partners' capital.

Table of Contents

THE U.S. LISTING

On August 4, 2009, we announced that the conditions precedent to the Combination Transaction had been deemed satisfied and entered an investment agreement among us and certain of our affiliates, on the one hand, and KKR Guernsey and certain of its affiliates, on the other hand. Pursuant to the investment agreement, we delivered a notice to KKR Guernsey on February 24, 2010 electing to seek a U.S. Listing and subsequently prepared and filed a registration statement with the SEC relating to the proposed U.S. Listing and concurrent In-Kind Distribution of our common units to holders of KKR Guernsey units. The investment agreement requires us and KKR Guernsey to use our reasonable best efforts to have the registration statement declared effective and complete the U.S. Listing and matters ancillary thereto in the manner contemplated by the investment agreement, provided that neither of us will be required to take any action that would reasonably be expected to have a material adverse effect on our business.

The investment agreement contemplates, among other things, that KKR Guernsey will contribute its interests in our Combined Business to us in exchange for our common units and distribute those common units to holders of KKR Guernsey units pursuant to the In-Kind Distribution. The interests in our Combined Business that are currently held by KKR Guernsey consist of partner interests in Group Holdings, which owns 30% of the KKR Group Partnership Units that are currently outstanding. Upon the contribution of those partner interests to us, we will hold KKR Group Partnership Units representing a 30% interest in the Combined Business. The remaining KKR Group Partnership Units will continue to be held by our principals through KKR Holdings. KKR Group Partnership Units that are held by KKR Holdings are exchangeable for our common units on a one-for-one basis, subject to customary conversion rate adjustments for splits, unit distributions and reclassifications and compliance with applicable lock-up, vesting and transfer restrictions.

In-Kind Distribution

Following the date on which the registration statement of which this prospectus forms a part is declared effective and our common units have been approved for listing and trading on the New York Stock Exchange, subject in each case to applicable laws, rules and regulations, holders of KKR Guernsey units will receive one of our common units for each KKR Guernsey unit they hold. Upon completion of the In-Kind Distribution, KKR Guernsey will be dissolved and delisted from Euronext Amsterdam.

You should note that holders of KKR Guernsey units will receive our common units in the In-Kind Distribution only if they hold KKR Guernsey units when the U.S. Listing becomes effective. Accordingly, if you have sold your KKR Guernsey units on or prior to the distribution date but your transaction has not been settled at or prior to such time, you will be entitled to receive our common units. If, however, you sell your KKR Guernsey units at or prior to the distribution and your transaction has settled before such time, the purchaser of the KKR Guernsey units, and not you, will be entitled to receive our common units distributable with respect to the KKR Guernsey units you sold. Because the assets of KKR Guernsey consist solely of its interests in our Combined Business, the In-Kind Distribution will result in the dissolution of KKR Guernsey and a delisting of its units from Euronext Amsterdam. To preserve a trading market for interests in our Combined Business, the In-Kind Distribution is conditioned upon our common units being approved for listing on the New York Stock Exchange subject to official notice of issuance.

Material U.S. Federal Income Tax Consequences of the Distribution

See "Material U.S. Federal Tax Considerations" in this prospectus.

Table of Contents

Listing and Trading of our Common Units

We are seeking to list our common units on the New York Stock Exchange under the symbol "KKR." Our common units are not currently listed or traded on a national securities exchange in the United States and we cannot provide any assurance to you as to the trading price they will have after the U.S. Listing. The trading price of our common units may fluctuate significantly following the U.S. Listing. See "Risk Factors Risks Related to the U.S. Listing and to Our Common Units." Common units distributed to holders of KKR Guernsey units will be freely transferable.

Conditions to the U.S. Listing and In-Kind Distribution

Under the investment agreement, each party's obligation to consummate the U.S. Listing is subject to the satisfaction or waiver of each of the following conditions:

the common units to be issued to KKR Guernsey and distributed in the In-Kind Distribution shall have been approved for listing on the New York Stock Exchange subject to official notice of issuance;

the registration statement relating to the common units to be issued to KKR Guernsey and distributed in the In-Kind Distribution shall have become effective under the Securities Act and/or Exchange Act, provided (i) there is not any requirement that we or any of our affiliates become subject to regulation under the Investment Company Act and (ii) no stop order suspending the effectiveness of the registration statement has been issued and no proceedings for a similar purpose shall have been initiated or threatened by the SEC;

no order, injunction, judgment, award or decree issued by any governmental entity or other legal restraint or prohibition preventing the consummation of the U.S. Listing and/or the In-Kind Distribution to the KKR Guernsey unitholders shall be in effect;

KKR Guernsey shall have contributed its interests in the Combined Business to us in exchange for our common units; and

KKR Guernsey shall have received a customary comfort letter and negative assurance letter relating to information contained in the registration statement relating to the common units to be issued to KKR Guernsey and distributed in the In-Kind Distribution.

KKR Guernsey Units

Pursuant to the In-Kind Distribution, KKR Guernsey unitholders will receive one of our common units for each KKR Guernsey unit they own. Upon completion of the In-Kind Distribution, KKR Guernsey will be dissolved and delisted from Euronext Amsterdam and all KKR Guernsey units will be cancelled.

Trading Price

The table below shows the closing prices of KKR Guernsey units on Euronext Amsterdam at the close of the regular trading session on (i) July 17, 2009, the last trading day before our public announcement of the Combination Transaction, (ii) October 1, 2009, the date of the completion of the Combination Transaction, and (iii) March 11, 2010, the most recent trading day for which closing prices were available.

Date	KKR Guernsey Closing Price
July 17, 2009	\$ 5.38
October 1, 2009	\$ 9.43
March 11, 2010	\$ 11.12

2010		
First Quarter (through March 11, 2010)	11.25	8.48

Distribution History

On February 24, 2010, it was announced that a distribution of \$0.08 per KKR Guernsey unit, subject to applicable withholding taxes, will be payable on or about March 25, 2010 to KKR Guernsey unitholders of record as of the close of business on March 11, 2010. On August 10, 2007, KPE's general partner declared a distribution of \$0.24 per unit, or \$49.1 million, to KPE unitholders of record as of the close of business on August 31, 2007. The \$0.24 per unit distribution was paid to unitholders on or about September 17, 2007. On November 15, 2006, KPE's general partner declared a distribution of \$0.19 per unit, or \$38.9 million, to KPE unitholders of record immediately prior to the opening of business in Amsterdam on December 1, 2006. The \$0.19 per unit distribution was paid to unitholders on or about December 15, 2006.

Holdings

We estimate that as of December 31, 2009, there were approximately 2,000 holders of KKR Guernsey units. Because the laws and regulations applicable to KKR Guernsey do not require KKR Guernsey holders to file regulatory disclosure reports regarding their beneficial ownership of KKR Guernsey units, we are unable to determine with reasonable certainty which holders currently beneficially own more than five percent of its units.

As of March 10, 2010, our principals held approximately 1.4% of KKR Guernsey's outstanding units through two affiliated holding vehicles. In addition, as of such date an investment fund managed by us held approximately 2.3% of KKR Guernsey's outstanding units. No other director of KKR Guernsey beneficially owns any KKR Guernsey units. Upon completion of the U.S. Listing, these vehicles and funds will receive our common units in exchange for the KKR Guernsey units they hold on the same terms as the other KKR Guernsey unitholders.

Table of Contents

ORGANIZATIONAL STRUCTURE

The following diagram illustrates the ownership and organizational structure that we will have upon the completion of the U.S. Listing and In-Kind Distribution.

Notes:

- (1) KKR Management LLC serves as our general partner and, as a result, controls our business and affairs. KKR Management LLC does not hold any economic interests in our partnership.
- (2) Upon completion of the U.S. Listing and In-Kind Distribution, public unitholders will hold 204,902,226 of our fully diluted common units, representing a 30% interest in our Combined Business.

(3)

Upon completion of the U.S. Listing and In-Kind Distribution, KKR Holdings will hold special voting units in our partnership that will entitle it to cast, with respect to those limited matters that may be submitted to a vote of our unitholders, a number of votes equal to the number of KKR Group Partnership Units that it holds from time to time.

Table of Contents

- (4) We will hold our KKR Group Partnership Units in KKR Management Holdings L.P. through KKR Management Holdings Corp., which is subject to taxation as a corporation for U.S. federal income tax purposes. Accordingly, our allocable share of the taxable income of KKR Management Holdings L.P. will be subject to taxation at a corporate rate. Except for KKR Management Holdings Corp. and certain of our foreign subsidiaries that are taxable as corporations for U.S. federal income tax purposes, all of our subsidiaries are treated as partnerships or disregarded entities for U.S. federal income tax purposes.
- (5) KKR Holdings holds 478,105,194 KKR Group Partnership Units, representing a 70% interest in our Combined Business. KKR Group Partnership Units that are held by KKR Holdings are exchangeable for our common units on a one-for-one basis, subject to customary conversion rate adjustments for splits, unit distributions and reclassifications and compliance with applicable lock-up, vesting and transfer restrictions. As limited partner interests, these KKR Group Partnership Units are non-voting and do not entitle to KKR Holdings to participate in the management of our business and affairs.
- (6) Carry pool allocations represent allocations of carried interest received from our investment funds and carry paying co-investment vehicles. No carried interest has been allocated with respect to co-investments and privately negotiated investments acquired from KPE in the Combination Transaction.
- (7) Our Combined Business includes (i) all of our fee-generating management companies and capital markets companies, (ii) all of the entities that are entitled to receive carried interest from investment funds and co-investment vehicles formed subsequent to the 1996 Fund and (iii) the net assets acquired from KPE in the Combination Transaction. For additional information concerning the interests in KKR that are owned by the KKR Group Partnerships or held by minority investors, see "Components of our Business Owned by the KKR Group Partnerships."

Our Combined Business

On October 1, 2009, we completed the Transactions pursuant to which we reorganized our asset management business into a holding company structure and acquired all of the assets and liabilities of KKR Guernsey. We refer to our business that resulted from the Transactions as our Combined Business.

Reorganization Transactions

The reorganization of our asset management business into a holding company structure involved a contribution of equity interests in our business that were held by our principals to the KKR Group Partnerships in exchange for newly issued KKR Group Partnership Units that are held by KKR Holdings. The KKR Group Partnership Units received by KKR Holdings represent a 70% interest in our Combined Business. Our principals did not receive any cash in connection with their contribution of equity interests to the KKR Group Partnerships.

Combination Transaction

Concurrently with the Reorganization Transactions, we completed our acquisition of the assets and liabilities of KKR Guernsey in the Combination Transaction. Pursuant to the Combination Transaction, KKR Guernsey contributed all of its assets and liabilities to the KKR Group Partnerships in exchange for newly issued KKR Group Partnership Units that are held by KKR Guernsey through Group Holdings. These KKR Group Partnership Units represent a 30% interest in our Combined Business. Upon completion of the Combination Transaction, KKR Guernsey changed its name from KKR Private Equity Investors, L.P. to KKR & Co. (Guernsey) L.P. and, effective on October 2, 2009, changed the ticker symbol for its units on Euronext Amsterdam from "KPE" to "KKR."

Table of Contents

The Combination Transaction did not involve the payment of any cash consideration or involve an offering of any newly issued securities to the public, and KKR Guernsey unitholders' continued to hold KKR Guernsey units. Until the U.S. Listing and In-Kind Distribution, KKR Guernsey units will remain subject to the same restrictions on ownership and transfers that applied prior to the completion of the Combination Transaction.

U.S. Listing and In-Kind Distribution

On February 24, 2010, we delivered to KKR Guernsey a notice of our intention to exercise a right to seek to have our common units listed and traded on the New York Stock Exchange and to have KKR Guernsey make an In-Kind Distribution of our common units to holders of KKR Guernsey units upon completion of the U.S. Listing. Our election to seek a U.S. Listing was made pursuant to an investment agreement among us and certain of our affiliates, on the one hand, and KKR Guernsey and certain of its affiliates, on the other hand. The investment agreement contemplates, among other things, that KKR Guernsey will contribute its interests in our Combined Business to us in exchange for our common units and distribute those common units to holders of KKR Guernsey units pursuant to the In-Kind Distribution.

If the U.S. Listing and In-Kind Distribution occur, holders of KKR Guernsey units will receive one of our common units for each KKR Guernsey unit. Because the assets of KKR Guernsey consist solely of its interests in our business, the In-Kind Distribution will result in the dissolution of KKR Guernsey and a delisting of its units from Euronext Amsterdam. To preserve a trading market for interests in our business, the In-Kind Distribution will be conditioned upon our common units being approved for listing on the New York Stock Exchange subject to official notice of issuance.

Our Managing Partner

As is commonly the case with limited partnerships, our limited partnership agreement provides for the management of our business and affairs by a general partner rather than a board of directors. Our Managing Partner serves as the ultimate general partner of us and the KKR Group Partnerships. Our Managing Partner has a board of directors that is co-chaired by our founders Henry Kravis and George Roberts, who also serve as our Co-Chief Executive Officers and, in such positions, are authorized to appoint other officers of our Managing Partner.

You will not hold securities of our Managing Partner and will not be entitled to vote in the election of its directors or other matters affecting its governance. Only those persons holding Class A shares in our Managing Partner will be entitled to vote in the election or removal of its directors, on proposed amendments to its charter documents or on other matters that require approval of its equity holders. Our senior principals hold all such interests. See "Management Our Managing Partner."

Group Holdings

Group Holdings is the entity through which KKR Guernsey owns KKR Group Partnership Units representing a 30% economic interest in our Combined Business. KKR Guernsey's interest in Group Holdings consists of a limited partner interest that is non-voting. We hold a non-economic general partner interest in Group Holdings and, through such interest, exercise control over the KKR Group Partnerships and the Combined Business. Our Managing Partner controls us and exercises this control. In connection with the U.S. Listing and In-Kind Distribution, we will acquire all of KKR Guernsey's interests in Group Holdings and, as result of such acquisition, both control the KKR Group Partnerships and hold KKR Group Partnership Units representing a 30% economic interest in the Combined Business.

Table of Contents

KKR Group Partnerships

Each KKR Group Partnership has an identical number of partner interests and, when held together, one Class A partner interest in each of the KKR Group Partnerships together represents one KKR Group Partnership Unit. Upon completion of the U.S. Listing and In-Kind Distribution, we will hold KKR Group Partnership Units representing a 30% economic interest in the Combined Business and our principals will hold KKR Group Partnership Units representing a 70% economic interest in the Combined Business. KKR Group Partnership Units that are held by KKR Holdings are exchangeable for our common units on a one-for-one basis, subject to customary conversion rate adjustments for splits, unit distributions and reclassifications and compliance with applicable lock-up, vesting and transfer restrictions.

Components of Our Business Owned by the KKR Group Partnerships

Following the completion of the Transactions, except for interests described below, the KKR Group Partnerships own:

all of the controlling and economic interests in our fee-generating management companies and capital markets companies, which allows our unitholders to share ratably in the management, monitoring, transaction and other fees earned from all of our funds, managed accounts, portfolio companies, capital markets transactions, specialty finance company, structured finance vehicles and other investment products;

controlling and economic interests in the general partners of our funds and the entities that are entitled to receive carry from our co-investment vehicles, which allows our unitholders to share in our carried interest, as well as any returns on investments made by or on behalf of the general partners of our funds on or after October 1, 2009, the date of the completion of the Combination Transaction; and

all of the controlling and economic interests in our principal assets, including the assets formerly owned by KPE, which allows us to share ratably in the returns that our principal assets generate.

With respect to our active and future funds and vehicles that provide for carried interest, we intend to continue to allocate to our principals, other professionals and selected other individuals who work in these operations a portion of the carried interest earned in relation to these funds as part of our carry pool. We expect to allocate approximately 40% of the carry we receive from these funds and vehicles to our carry pool, although this percentage may fluctuate over time. Allocations to the carry pool may not exceed 40% without the approval of a majority of the independent directors of our Managing Partner.

Certain minority investors retain additional interests in our business and such interests were not acquired by the KKR Group Partnerships in the Transactions:

controlling and economic interests in the general partners of the 1996 Fund, which interests were not contributed to the KKR Group Partnerships due to the fact that the general partners are not expected to receive meaningful carried interest proceeds from further realizations;

noncontrolling economic interests that allocate to a former principal and such person's designees an aggregate of 1% of the carried interest received by general partners of our funds and 1% of our other profits until a future date;

noncontrolling economic interests that allocate to certain of our former principals and their designees a portion of the carried interest received by the general partners of our private equity funds that was allocated to them with respect to private equity investments made during such former principals' previous tenure with our firm;

Table of Contents

noncontrolling economic interests that allocate to certain of our current and former principals all of the capital invested by or on behalf of the general partners of our private equity funds before the completion of the Transactions on October 1, 2009 and any returns thereon as well as any realized carried interest distributions that had actually been received but not distributed by the general partners prior to the Transactions; and

a noncontrolling economic interest that allocates to a third party an aggregate of 2% of the equity in our capital markets business.

The interests described in the immediately preceding bullets (other than interests in the general partners of the 1996 Fund) are referred to as the Retained Interests. The Retained Interests are reflected in our financial statements as noncontrolling interests even though these interests are not part of the Combined Business. Except for the Retained Interest in our capital markets business, these interests generally are expected to run-off over time, thereby increasing the interests of the KKR Group Partnerships in the entities that comprise our business.

KKR Holdings

Our principals hold interests in our business through KKR Holdings, which owns all of the outstanding KKR Group Partnership Units that are not allocable to KKR Guernsey. These individuals receive financial benefits from our business in the form of distributions and other amounts funded by KKR Holdings and through their direct and indirect participation in the value of KKR Group Partnership Units held by KKR Holdings.

Amounts funded by KKR Holdings include annual cash bonuses that are paid to certain of our most senior employees as well as equity and equity based grants that were made to our principals and other employees in connection with the Transactions. Because these amounts are funded by KKR Holdings, we do not bear the economic costs associated with them, although we are required to record certain non-cash charges in our financial statements relating to these items.

The interests that these individuals hold in KKR Holdings will be subject to transfer restrictions and, except for interests held by its founders and certain interests that were vested when granted, time and/or performance based vesting requirements. The transfer restriction period will last for a minimum of (i) one year with respect to one-half of the interests vesting on a vesting date and (ii) two years with respect to the other one-half of the interests vesting on such vesting date. While employed by our firm, our personnel are also subject to minimum retained ownership rules that require them to continuously hold at least 25% of their cumulatively vested interests.

Interests that time vest will vest in installments over a 5 year period from the grant date. Interests that are subject to performance based criteria may be subject to additional time based vesting requirements that begin when performance criteria have been met. Vesting of certain transfer restricted interests will be subject to the holder not being terminated for cause and complying with the terms of his or her confidentiality and restrictive covenant agreement during the transfer restrictions period. See "Certain Related Party Transactions Confidentiality and Restrictive Covenant Agreements." The transfer and vesting restrictions applicable to these interests may not be enforceable in all cases and can be waived, modified or amended by KKR Holdings at any time without the consent of KKR.

Equity Incentive Plan

In connection with the U.S. Listing, we intend to adopt our Equity Incentive Plan for our employees, directors, officers, consultants and senior advisors. The plan will contain customary terms for equity incentive plans for U.S. publicly traded asset managers and will allow for the issuance of various forms of awards, including restricted equity awards, unit appreciation rights, options and other

Table of Contents

equity based awards. The plan will be administered by the board of directors of our Managing Partner. See "Management KKR & Co. L.P. Equity Incentive Plan."

Exchange Agreement

We are a party to an exchange agreement with KKR Holdings pursuant to which KKR Holdings and certain of the transferees of its KKR Group Partnership Units may, up to four times each year, exchange KKR Group Partnership Units held by them (together with corresponding special voting units in our partnership) for our common units on a one-for-one basis, subject to customary conversion rate adjustments for splits, unit distributions and reclassifications. At our election, we may settle exchanges of KKR Group Partnership Units with cash in an amount equal to the fair market value of the common units that would otherwise be deliverable in such exchanges. If we elect to settle an exchange of KKR Group Partnership Units with cash, the net assets of the KKR Group Partnerships will decrease and we will cancel the KKR Group Partnership Units that are acquired in the exchange, which will result in a corresponding reduction in the number of fully diluted common units and special voting units that we have outstanding following the exchange. As a result of the cancellation of the KKR Group Partnership Units that are acquired in the exchange, our percentage ownership of the KKR Group Partnerships will increase and KKR Holdings' percentage ownership will decrease.

Tax Receivable Agreement

The acquisition by our intermediate holding company, KKR Management Holdings Corp., of KKR Group Partnership Units from KKR Holdings or transferees pursuant to the exchange agreement is expected to result in an increase in our intermediate holding company's share of the tax basis of the tangible and intangible assets of KKR Management Holdings L.P., primarily attributable to a portion of the goodwill inherent in our business, that would not otherwise have been available. This increase in tax basis may increase depreciation and amortization deductions for U.S. federal tax purposes and therefore reduce the amount of tax that we would otherwise be required to pay in the future. This increase in tax basis may also decrease gain (or increase loss) on future dispositions of certain capital assets to the extent tax basis is allocated to those capital assets.

We are a party to a tax receivable agreement with KKR Holdings requiring our intermediate holding company to pay to KKR Holdings or transferees of its KKR Group Partnership Units 85% of the amount of cash savings, if any, in U.S. federal, state and local income tax that the intermediate holding company actually realizes as a result of this increase in tax basis as well as 85% of the amount of any such savings the intermediate holding company actually realizes as a result of increases in tax basis that arise due to future payments under the agreement. A termination of the agreement or a change of control could give rise to similar payments based on tax savings that we would be deemed to realize in connection with such events. Although we are not aware of any issue that would cause the IRS to challenge a tax basis increase, neither KKR Holdings nor its transferees will reimburse us for any payments previously made under the tax receivable agreement if such tax basis increase, or the benefits of such increases, were successfully challenged by the IRS. See "Certain Relationships and Related Party Transactions Tax Receivable Agreement." In the event that other of our current or future subsidiaries become taxable as corporations and acquire KKR Group Partnership Units in the future, or if we become taxable as a corporation for U.S. federal income tax purposes, each will become subject to a tax receivable agreement with substantially similar terms.

Table of Contents

UNAUDITED PRO FORMA FINANCIAL INFORMATION

The following unaudited pro forma statement of operations for the year ended December 31, 2009 gives effect to the Transactions and certain other arrangements entered into in connection with the Transactions as if the Transactions and such arrangements had been completed as of January 1, 2009. Because the Transactions and related arrangements were completed on October 1, 2009, their impact is fully reflected in our statement of financial condition as of December 31, 2009. Accordingly, we have not included a pro forma statement of financial condition.

The unaudited pro forma statement of operations is based on the historical consolidated and combined financial statements included elsewhere in this prospectus. The pro forma adjustments are described in the accompanying notes and are based on available information and assumptions that management believes are reasonable in order to reflect, on a pro forma basis, the impact of the Transactions and related arrangements described above on our historical financial information.

This unaudited pro forma financial information is included for informational purposes only and does not purport to reflect the results of operations that would have occurred had the Transactions and the related arrangements described above occurred on the dates indicated or had we operated as a public company during the periods presented or for any future period or at any future date. You are cautioned not to place undue reliance on this information. You should read this information in conjunction with "Organizational Structure," "Management's Discussion and Analysis of Financial Condition and Results of Operations" and the financial statements and related notes included elsewhere in this prospectus.

Consolidation

Our consolidated and combined financial statements include the accounts of our management and capital markets companies, the general partners of our investment funds and carry-yielding co-investment vehicles and a number of investment funds that we are required to consolidate in our financial statements in accordance with GAAP. We refer to these consolidated funds as "the KKR Funds." Prior to the Transactions, the KKR Funds include the 1996 Fund, the European Fund, the Millennium Fund, the European Fund II, the 2006 Fund, the Asian Fund, the European Fund III, E2 Investors and the KPE Investment Partnership. Following the completion of the Transactions, we continue to consolidate most of the KKR Funds and reflect interests in those entities that are held by third party investors as noncontrolling interests in consolidated entities. Interests in the KPE Investment Partnership that were previously owned by KKR Guernsey and reflected as noncontrolling interests in consolidated entities are now included in partners' capital as a result of our acquisition of those assets.

Reorganization Transactions

On October 1, 2009, we completed the Reorganization Transactions pursuant to which we reorganized our asset management business into a holding company structure as part of our acquisition of all of the assets and liabilities of KKR Guernsey. The reorganization of our asset management business into a holding company structure involved a contribution to the KKR Group Partnerships of equity interests in our business that were held by our principals in exchange for newly issued KKR Group Partnership Units that are held by KKR Holdings. The KKR Group Partnership Units received by KKR Holdings represent a 70% interest in our Combined Business. Our principals did not receive any cash in connection with their contribution of equity interests to the KKR Group Partnerships.

Table of Contents

Other Adjustments

In connection with the Reorganization Transactions, we also recorded certain other adjustments relating to:

the compensation and equity ownership of our principals, and certain operating consultants and other personnel, who hold interests in KKR Holdings that are subject to vesting and may receive distributions or payments that are borne by KKR Holdings;

the allocation of carried interest to our principals, other professionals and selected other individuals as part of our carry pool; and

the retention by our principals of responsibility for clawback obligations relating to carry distributions received prior to the Transactions up to a maximum of \$223.6 million.

We have made adjustments relating to these arrangements in the following unaudited pro forma financial information to the extent that information relating to such matters is currently available and objectively determinable as if such arrangements had been completed as of January 1, 2009.

Combination Transaction

Concurrently with the Reorganization Transactions, we completed our acquisition of the assets and liabilities of KKR Guernsey in the Combination Transaction. Pursuant to the Combination Transaction, KKR Guernsey contributed all of its assets and liabilities to the KKR Group Partnerships in exchange for newly issued KKR Group Partnership Units that are held by KKR Guernsey through KKR Group Holdings. These KKR Group Partnership Units represent a 30% interest in our Combined Business.

Public Company Expenses

Following the U.S. Listing, we will incur costs associated with being a U.S. publicly traded company. Such costs will include new or increased expenses for such items as insurance, directors' fees, accounting work, legal advice and compliance with applicable U.S. regulatory and stock exchange requirements, including costs associated with compliance with the Sarbanes-Oxley Act and periodic or current reporting obligations under the Exchange Act. No pro forma adjustments have been made to reflect such costs due to the fact that they currently are not objectively determinable.

Table of Contents**NOTES TO UNAUDITED PRO FORMA FINANCIAL INFORMATION****(All Dollars in Thousands)****Reorganization Adjustments**

The Reorganization Adjustments give effect to the elimination of the controlling and economic interest in the general partners of the 1996 Fund and the elimination of the financial results of the following "Retained Interests:"

- (i) economic interests that allocate to a former principal and such person's designees an aggregate of 1% of the carried interest received by the general partners of our private equity funds and 1% of our other profits (losses);
- (ii) economic interests that allocate to certain of our former principals and their designees a portion of the carried interest received by the general partners of our private equity funds that was allocated to them with respect to private equity investments made during such former principals' previous tenure with us; and
- (iii) economic interests that allocate to certain of our current and former principals all of the capital invested by or on behalf of the general partners of our private equity funds before the completion of the Transactions and any returns thereon.

- (a) Reflects the elimination of the financial results of the general partners of the 1996 Fund, because the KKR Group Partnerships did not acquire an interest in those general partners in connection with the Reorganization Transactions. Those general partners are entitled to carried interests that allocate to them a percentage of the net profits generated on the fund's investments, subject to certain requirements. The funds also pay management fees to us in exchange for management and other services.

The elimination of the financial results of the general partners of the 1996 Fund resulted in (i) the recognition of \$3,106 of fees from management fees paid by the 1996 Fund that had been eliminated in consolidation as an inter-company transaction, (ii) elimination of \$222 of expenses, (iii) elimination of \$251,701 of net gains (losses) from investment activities (iv) elimination of \$17,851 of dividend income, (v) elimination of \$3,043 of interest income and (vi) elimination of \$202,105 of net income attributable to noncontrolling interests in consolidated entities, because those items are no longer reflected in our consolidated financial statements.

The following table illustrates the line items in the statement of operations affected by the exclusion of the 1996 Fund:

	For the Year ended December 31, 2009
Fees	\$ 3,106
General, Administrative and Other	(222)
Net Gains (Losses) from Investment Activities	(251,701)
Dividend Income	(17,851)
Interest Income	(3,043)
Net Income (Loss) Attributable to noncontrolling interests in consolidated entities	(202,105)
Net Income (Loss) Attributable to Group Holdings	\$ (67,162)

Table of Contents

NOTES TO UNAUDITED PRO FORMA FINANCIAL INFORMATION (Continued)

(All Dollars in Thousands)

Reorganization Adjustments (Continued)

- (b) Because capital investments made by or on behalf of the general partners of our private equity funds following the completion of the Reorganization Transactions are held by the KKR Group Partnerships, no pro forma adjustments have been made to the pro forma statements of operations to exclude the financial results of any capital investments made on or after January 1, 2009. The exclusion of such results related to investments made prior to January 1, 2009 and other adjustments for Retained Interests resulted in an increase to net income (loss) attributable to noncontrolling interests in consolidated entities of \$159,947.

Other Adjustments

Equity-based Payments

In connection with the Transactions, our principals and certain operating consultants received interests in KKR Holdings, which owns KKR Group Partnership Units representing a 70% interest in our Combined Business. These interests are subject to minimum retained ownership requirements and transfer restrictions, and allow for the ability to exchange into units of KKR & Co. L.P. on a one-for-one basis.

Except for any interests in KKR Holdings that vested on the date of grant, interests in KKR Holdings that time vest will vest in installments over a five-year period from the grant date. Interests that are subject to performance based vesting criteria may be subject to additional time based vesting requirements that begin when performance criteria have been met. The transfer restriction period will last for a minimum of (i) one year with respect to one-half of the interests vesting on any vesting date and (ii) two years with respect to the other one-half of the interests vesting on such vesting date.

- (c) **KKR Holdings Principal Units** Interests in KKR Holdings received by principals give rise to periodic employee compensation charges in our statement of operations based on the grant-date fair value of \$9.35 per unit. For interests that vested on the grant date, compensation expense is recognized on the date of grant based on the fair value of a unit (determined using the closing price of KKR Guernsey units) on the grant date multiplied by the number of vested interests.

Compensation expense recognized on unvested interests in KKR Holdings is calculated based on the fair value of a unit (determined using the closing price of KKR Guernsey units) on the grant date, discounted for the lack of participation rights in the expected distributions on unvested interests, which ranges from 1% to 32%, multiplied by the number of unvested interests on the grant date. Additionally, the calculation of compensation expense on unvested interests assumes a forfeiture rate of up to 3% annually based upon expected turnover by employee class.

The net pro forma adjustment to employee compensation and benefits relating to KKR Holdings principal units was \$190,411, comprised of the inclusion of \$465,206 of recurring periodic vesting charges and the exclusion of \$274,795 of non-recurring grant date vesting charges.

- (d) **KKR Holdings Operating Consultant Units** Interests in KKR Holdings granted to operating consultants give rise to periodic general, administrative and other charges in our statement of operations. For interests that vested on the grant date, expense is recognized on the date of grant based on the fair value of a unit (determined using the closing price of KKR Guernsey units) on the grant date multiplied by the number of vested interests.

Table of Contents**NOTES TO UNAUDITED PRO FORMA FINANCIAL INFORMATION (Continued)****(All Dollars in Thousands)****Other Adjustments (Continued)**

General, administrative and other expense recognized on unvested units is calculated based on the fair value of an interest in KKR Holdings (determined using the closing price of KKR Guernsey's units) on each reporting date and subsequently adjusted for the actual fair value of the award at each vesting date. Accordingly, the measured value of these interests will not be finalized until each vesting date. Additionally, the calculation of the compensation expense assumes a forfeiture rate of up to 3% annually based upon expected turnover by class of operating consultant.

The net pro forma adjustment to general, administrative and other expense relating to KKR Holdings Operating Consultant Units was \$(2,994) comprised of the inclusion of \$56,477 of recurring periodic vesting charges and the exclusion of \$59,471 of non-recurring grant date vesting charges.

(e)

Profit Sharing Charges We have implemented profit sharing arrangements for our principals and certain operating consultants working in our businesses and across our different operations that are designed to appropriately align performance and compensation. Subsequent to the Transactions, with respect to our active and future funds and vehicles that provide for carried interest, we will allocate to our principals, and certain operating consultants a portion of the carried interest earned in relation to these funds as part of our carry pool. As it relates to the profit sharing arrangement with our employees, these amounts are accounted for as compensatory in conjunction with the related carried interest income and recorded as compensation expense. As it relates to the profit sharing arrangement with certain operating consultants, these amounts are accounted for in the same manner, but classified as general administrative and other expense.

The net pro forma adjustment related to the allocations to our carry pool was (i) \$(25,088) to employee compensation and benefits expense comprised of the inclusion of \$101,983 of recurring carry pool allocations and the exclusion of \$127,071 of non-recurring charges associated with establishing the carry pool allocation on October 1, 2009; and (ii) \$(627) to general, administrative and other expense comprised of the inclusion of \$2,549 of recurring carry pool allocations and the exclusion of \$3,176 of non-recurring charges associated with establishing the carry pool allocation on October 1, 2009.

In addition, we have historically allocated a percentage of carry to a profit sharing plan for our other employees and advisors. These charges have historically been borne by us and have been recorded in employee compensation and benefits for amounts due to employees and general administrative and other expense or fund expenses for amounts due to advisors. Subsequent to the Transactions, the costs associated with this plan will be borne pro-rata by the respective parties receiving the carried interest. As such, a non-recurring benefit related to the pro rata share of the liability not borne by us was recorded in the corresponding line items in the statement of financial condition and statement of operations.

The net pro forma adjustment related to this profit sharing plan was (i) a charge of \$4,269 to employee compensation and benefits expense; (ii) a charge of \$608 to general, administrative and other expense; and (iii) a charge of \$1,154 to fund expense.

(f)

Discretionary compensation and discretionary allocations Certain principals who hold interests in KKR Holdings are expected to be allocated, on a discretionary basis, distributions received by KKR Holdings on KKR Group Partnership Units. These discretionary amounts are expected to be made annually and result in principals receiving amounts in excess of their vested equity interests.

Table of Contents

NOTES TO UNAUDITED PRO FORMA FINANCIAL INFORMATION (Continued)

(All Dollars in Thousands)

Other Adjustments (Continued)

Even though these amounts are borne only by KKR Holdings, any amounts in excess of a principal's vested equity interests are reflected as employee compensation and benefits expense due to the fact that unvested interests do not carry distribution participation rights.

These compensation charges amounted to \$56,480 for the year ended December 31, 2009.

(g)

Other compensation adjustments Historically, our employee compensation and benefits expense consisted of base salaries and bonuses paid to employees who were not our senior principals. Payments made to our senior principals included partner distributions which were accounted for as capital distributions. Following the completion of the Transactions, all of our senior principals and other employees receive a base salary that is paid by us and accounted for as employee compensation and benefits expense. Our employees are also eligible to receive discretionary cash bonuses based on performance criteria, our overall profitability and other matters.

The pro forma adjustment to reflect the exclusion of certain employee bonuses and the inclusion of senior principals' salaries amounted to \$(12,750).

(h)

KKR Holdings Equity Plan In connection with the Transactions, 10,245,057 restricted equity units were granted by KKR Holdings to our employees and advisors. The vesting of these equity units is contingent on our common units becoming listed and traded on the New York Stock Exchange or another U.S. exchange. As of December 31, 2009, this contingency had not occurred and accordingly, no compensation expense was recorded in our historical financial statements. On a pro forma basis, these awards were accounted for as equity awards assuming a share price equal to that of KKR Guernsey units on the grant date of \$9.35.

The expense related to the vesting of equity awards granted to employees is reflected as employee compensation and benefits expense on a graded basis assuming a forfeiture rate of 3% per year and amounted to \$45,427.

(i)

Reflects the inclusion of general, administrative and other expenses incurred by KKR Guernsey in the amount of \$3,888.

Table of Contents**NOTES TO UNAUDITED PRO FORMA FINANCIAL INFORMATION (Continued)****(All Dollars in Thousands)****Other Adjustments (Continued)**

The following table summarizes the effects of the other pro forma adjustments described in notes (c) (i) above on employee compensation and benefits expense, general, administrative and other expense, and fund expense in the statement of operations:

Employee Compensation and Benefits Adjustments	
(c) Net impact of vesting of employee units in KKR Holdings	\$ 190,411
(e) Net impact of allocation to carry pool	(25,088)
(e) Net impact of profit sharing adjustments	4,269
(f) Discretionary compensation and discretionary allocation of distributions on Group Partnership Units received by KKR Holdings	56,480
(g) Net impact of exclusion of certain employee bonuses and the inclusion of senior principals' salaries	(12,750)
(h) Non-cash charges related to vesting of restricted equity units	45,427
 Total pro forma adjustment to employee compensation and benefits expense	 \$ 258,749
General Administrative and Other Adjustments	
(d) Net impact of vesting of operating consultant units in KKR Holdings	\$ (2,994)
(e) Net impact of allocation to carry pool	(627)
(e) Net impact of profit sharing adjustments	608
(i) Addition of KKR Guernsey expenses	3,888
 Total pro forma adjustment to general administrative and other expense	 \$ 875
Fund Expenses Adjustments	
(e) Net impact of profit sharing adjustments	\$ 1,154

(j)

Contingent Repayment Guarantees The instruments governing our private equity funds generally include a "clawback" provision that, if triggered, may give rise to a contingent obligation of the general partners to return or contribute amounts to the fund for distribution to the limited partners at the end of the life of the fund. Under a "clawback" provision, upon the liquidation of a fund, the general partner is required to return, on an after-tax basis, previously distributed carry to the extent that, due to the diminished performance of later investments, the aggregate amount of carry distributions received by the general partner during the term of the fund exceeds the amount to which the general partner was ultimately entitled. Changes in the underlying value of the KKR Funds impact the clawback amounts due.

Based on the terms of the Transaction, our principals remain responsible for a portion of the clawback obligation relating to carry distributions received prior to the Transactions up to a maximum of \$223.6 million. As a result of this arrangement, we have recorded an adjustment of \$(100,260) to offset the income associated with the decrease in the clawback liability as this liability is an obligation of our principals and not us.

(k)

We have historically operated as a group of partnerships for U.S. federal income tax purposes and, in the case of certain entities located outside the United States, corporate entities for foreign income tax purposes. Because most of the entities in our consolidated group are taxed as

Table of Contents

NOTES TO UNAUDITED PRO FORMA FINANCIAL INFORMATION (Continued)

(All Dollars in Thousands)

Other Adjustments (Continued)

partnerships, our income is generally allocated to, and the resulting tax liability is generally borne by, our partners and we generally are not taxed at the entity level.

Following the Transactions, the KKR Group Partnerships and their subsidiaries continue to operate as partnerships for U.S. federal income tax purposes and, in the case of certain entities located outside the United States, corporate entities for foreign income tax purposes. Accordingly, those entities will continue to be subject to New York City unincorporated business taxes ("UBT") or foreign income taxes. Certain of the KKR Group Partnership Units owned by us, however, are held through an intermediate holding company that is taxable as a corporation for U.S. federal income tax purposes and subject to additional entity level taxes. As a result of this holding structure, we will record an additional provision for corporate income taxes that will reflect our current and deferred tax liability relating to the taxable earnings allocated to such entity.

The amount of the adjustment reflects the difference between the actual tax provision for the historical organizational structure and the estimated tax provision that would have resulted had the Transactions been effected on January 1, 2009. This amounted to \$(2,783) of foreign and unincorporated business taxes and \$49,249 of state and federal taxes.

For a discussion of pending legislation that may preclude us from qualifying for treatment as a partnership for U.S. federal income tax purposes, see "Risk Factors Risks Related to Our Business Legislation has been introduced in the U.S. Congress in various forms that, if enacted, (i) could preclude us from qualifying as a partnership and/or (ii) could tax carried interest as ordinary income for U.S. federal income tax purposes and require us to hold carried interest through taxable subsidiary corporations. If this or any similar legislation or regulation were to be enacted and apply to us, we would incur a material increase in our tax liability that could result in a reduction in the market price of our common units."

Adjustments for the Combination Transaction

- (l) Reflects the exclusion of noncontrolling interests in consolidated entities representing interests in the KPE Investment Partnership, which became wholly owned by the KKR Group Partnerships beginning on October 1, 2009. For the year ended December 31, 2009, on a pro forma basis, the exclusion of these non-controlling interests resulted in net benefits accounted for as noncontrolling interests in income (loss) of consolidated entities of \$882,138.

Allocation to KKR Holdings

- (m) Reflects the inclusion of new noncontrolling interests in consolidated entities representing the KKR Group Partnership Units that are held by KKR Holdings subsequent to the completion of the Transactions on October 1, 2009. For the year ended December 31, 2009, on a pro forma basis, the inclusion of these noncontrolling interests resulted in net charges accounted for as noncontrolling interests held by KKR Holdings of \$857,276.

Table of Contents**NOTES TO UNAUDITED PRO FORMA FINANCIAL INFORMATION (Continued)**

(All Dollars in Thousands)

Determination of Earnings Per Common Unit

- (n) Pro forma basic and diluted net income per common unit were computed in the following manner.

	Year Ended December 31, 2009	
	Basic and Diluted	
Net income available to holders of common units	\$	239,934
Total common units outstanding		204,902,226
Net income per common unit	\$	1.17

We are party to an exchange agreement with KKR Holdings in connection with the Reorganization Transactions pursuant to which KKR Holdings or certain transferees of its KKR Group Partnership Units may, up to four times each year, exchange KKR Group Partnership Units held by them (together with corresponding special voting units) for our common units on a one-for-one basis, subject to customary conversion rate adjustments for splits, unit distributions and reclassifications and compliance with applicable lock-up, vesting and transfer restrictions. If the Group Partnership Units held by KKR Holdings were to be exchanged for common units, fully diluted common units outstanding would be 683,007,420. In computing the dilutive effect, if any, that the exchange of KKR Group Partnership Units would have on earnings per unit, we consider that net income available to holders of common units would increase due to the elimination of the noncontrolling interests in consolidated entities associated with the KKR Group Partnership Units (including any tax impact).

For the year ended December 31, 2009, we have presented identical basic and fully diluted earnings per unit as the assumed exchange was anti-dilutive.

Pro Forma Segment Results

We operate through three reportable business segments. These segments are differentiated primarily by their investment focuses and strategies and consist of Private Markets, Public Markets, and

Table of Contents**NOTES TO UNAUDITED PRO FORMA FINANCIAL INFORMATION (Continued)**

(All Dollars in Thousands)

Pro Forma Segment Results (Continued)

Capital Markets and Principal Activities. The following table presents the financial data for our reportable segments on a pro forma basis for the year ended December 31, 2009:

	Private Markets Segment	Public Markets Segment	Capital Markets and Principal Activities Segment	Total Reportable Segments
Fees				
Management and incentive fees:				
Management fees	\$ 387,112	\$ 50,604	\$	\$ 437,716
Incentive fees		4,472		4,472
Management and incentive fees	387,112	55,076		442,188
Monitoring and transaction fees:				
Monitoring fees	158,243			158,243
Transaction fees	57,699		34,129	91,828
Fee credits(1)	(73,901)			(73,901)
Net monitoring and transaction fees	142,041		34,129	176,170
Total fees	529,153	55,076	34,129	618,358
Expenses				
Employee compensation and benefits	136,465	22,677	9,455	168,597
Other operating expenses	175,736	20,587	6,021	202,344
Total expenses	312,201	43,264	15,476	370,941
Fee Related Earnings	216,952	11,812	18,653	247,417
Investment income (loss)				
Gross carried interest	602,427			602,427
Less: allocation to our carry pool(2)	(153,827)			(153,827)
Less: management fee refunds(3)	(22,720)			(22,720)
Net carried interest	425,880			425,880
Other investment income (loss)	20,621	(5,259)	1,267,976	1,283,338
Total investment income	446,501	(5,259)	1,267,976	1,709,218
Income (Loss) before noncontrolling interests in Income of consolidated entities	663,453	6,553	1,286,629	1,956,635
Income (Loss) attributable to noncontrolling interests(4)	1,973	109	609	2,691

Economic Net Income (Loss) \$ 661,480 \$ 6,444 \$ 1,286,020 \$ 1,953,944

- (1) Our agreements with the limited partners of certain investment funds require us to share with such limited partners a portion of any monitoring and transaction fees received from portfolio companies and allocable to their funds ("Fee Credits"). Fee Credits exclude fees that are not attributable to a fund's interest in a portfolio company and generally amount to 80% of monitoring and transaction fees allocable to the fund after related expenses are recovered.
- (2) With respect to our active and future investment funds and vehicles that provide for carried interest, we will allocate to our principals, other professionals and selected other individuals who

Table of Contents**NOTES TO UNAUDITED PRO FORMA FINANCIAL INFORMATION (Continued)****(All Dollars in Thousands)****Pro Forma Segment Results (Continued)**

work in these operations a portion of the carried interest earned in relation to these funds as part of our carry pool.

- (3) Certain of our investment funds require that we refund up to 20% of any cash management fees earned from limited partners in the event that the funds recognize a carried interest. At such time as the fund recognizes a carried interest in an amount sufficient to cover 20% of the management fees earned or a portion thereof, carried interest is reduced, not to exceed 20% of management fees earned.
- (4) Represents economic interests that will (i) allocate to a former principal an aggregate of 1% of profits and losses of our management companies until a future date and (ii) allocate to a third party investor an aggregate of 2% of the equity in our capital markets business.

The reconciliation of pro forma economic net income (loss) to net income (loss) attributable to Group Holdings as reported in the unaudited pro forma statement of operations consists of the following:

	Year Ended December 31, 2009
Pro forma economic net income (loss)	\$ 1,953,944
Income taxes	(83,464)
Amortization of intangibles	(3,788)
Costs relating to the Transactions(a)	(34,846)
Non-cash share based charges	(851,697)
Allocations to former principals	365
Allocation to noncontrolling interests held by KKR Holdings	(740,580)
Pro forma net income (loss) attributable to Group Holdings	\$ 239,934

-
- (a) During the year ended December 31, 2009, other operating expenses in our Private Markets segment excluded \$34.8 million incurred in connection with the Transactions. We have excluded this charge from our segment financial information as such amount will be not be considered when assessing the performance of, or allocating resources to, each of its business segments and is non-recurring in nature. In the statement of operations, this charge is included in general, administrative and other expenses.

Table of Contents**SELECTED HISTORICAL FINANCIAL AND OTHER DATA**

The following tables set forth our selected historical consolidated and combined financial data as of and for the years ended December 31, 2005, 2006, 2007, 2008 and 2009. We derived the selected historical consolidated and combined data as of December 31, 2008 and 2009 and for the years ended December 31, 2007, 2008 and 2009 from the audited combined financial statements included elsewhere in this prospectus. We derived the selected historical combined data as of December 31, 2005, 2006 and 2007 and for the years ended December 31, 2005 and 2006 from our audited combined financial statements which are not included in this prospectus. You should read the following data together with the "Organizational Structure," "Unaudited Pro Forma Financial Information," "Management's Discussion and Analysis of Financial Condition and Results of Operations" and our consolidated and combined financial statements and related notes included elsewhere in this prospectus.

	Year Ended December 31,				
	2005	2006	2007	2008	2009
Statement of Operations Data:

Net Income (Loss) Attributable to Group Holdings(1)	\$ 932,618	\$ 1,099,945	\$ 802,764	\$ (1,204,471)	\$ 849,685
Statement of Financial Condition Data (period end):					
Total assets	\$ 13,369,412	\$ 23,292,783	\$ 32,842,796	\$ 22,441,030	\$ 30,221,111
Total liabilities	\$ 418,778	\$ 1,281,923	\$ 2,575,636	\$ 2,590,673	\$ 2,859,630
Noncontrolling interests in consolidated entities	\$ 11,518,013	\$ 20,318,440	\$ 28,749,814	\$ 19,698,478	\$ 23,275,272
Noncontrolling interests held by KKR Holdings	\$	\$	\$	\$	\$ 3,072,360
Total Group Holdings partners' capital(2)	\$ 1,432,621	\$ 1,692,420	\$ 1,517,346	\$ 151,879	\$ 1,013,849

- (1) Subsequent to the Transactions, net income (loss) attributable to Group Holdings reflects only those amounts that are allocable to KKR Guernsey's 30% interest in our Combined Business. Net income (loss) that is allocable to our principals' 70% interest in our Combined Business is reflected in net income (loss) attributable to noncontrolling interests held by KKR Holdings.
- (2) Total Group Holdings partners' capital reflects only the portion of equity attributable to Group Holdings (reflecting KKR Guernsey's 30% interest in our Combined Business) and differs from partners' capital reported on a segment basis primarily as a result of the exclusion of the following items from our segment presentation: (i) the impact of income taxes; (ii) charges relating to the amortization of intangible assets; (iii) non-cash equity based charges; and (iv) allocations of equity to KKR Holdings. For a reconciliation to the \$4,152.9 million of partners' capital reported on a segment basis, please see "Management's Discussion and Analysis of Financial Condition and Results of Operations Segment Partners' Capital." KKR Holdings' 70% interest in our Combined Business is reflected as noncontrolling interests held by KKR Holdings and is not included in total Group Holdings partners' capital.

Table of Contents

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS**

The following discussion and analysis should be read in conjunction with the consolidated and combined financial statements of Group Holdings and the related notes included elsewhere in this prospectus. The historical combined financial data discussed below reflects the historical results and financial position of KKR. While the historical combined financial statements of KKR are the historical financial statements of the Combined Business following the completion of the Transactions, the data does not give effect to the Transactions and is not necessarily representative of our results and financial condition. See "Organizational Structure" and "Unaudited Pro Forma Financial Information." In addition, this discussion and analysis contains forward-looking statements and involves numerous risks and uncertainties, including those described under "Cautionary Note Regarding Forward-Looking Statements" and "Risk Factors." Actual results may differ materially from those contained in any forward-looking statements.

Overview

Led by Henry Kravis and George Roberts, we are a global alternative asset manager with \$52.2 billion in AUM as of December 31, 2009 and a 34-year history of leadership, innovation and investment excellence. When our founders started our firm in 1976, they established the principles that guide our business approach today, including a patient and disciplined investment process; the alignment of our interests with those of our investors, portfolio companies and other stakeholders; and a focus on attracting world-class talent.

Our business offers a broad range of asset management services to our investors and provides capital markets services to our firm, our portfolio companies and our clients. Throughout our history, we have consistently been a leader in the private equity industry, having completed more than 170 private equity investments with a total transaction value in excess of \$425 billion. In recent years, we have grown our firm by expanding our geographical presence and building businesses in new areas, such as fixed income and capital markets. Our new efforts build on our core principles, leverage synergies in our business, and allow us to capitalize on a broader range of opportunities that we source. Additionally, we have increased our focus on servicing our existing investors and have invested meaningfully in developing relationships with new investors.

With over 600 people, we conduct our business through 14 offices on four continents, providing us with a pre-eminent global platform for sourcing transactions, raising capital and carrying out capital markets activities. We have grown our AUM significantly, from \$15.1 billion as of December 31, 2004 to \$52.2 billion as of December 31, 2009, representing a compounded annual growth rate of 28.1%. Our growth has been driven by value that we have created through our operationally focused investment approach, the expansion of our existing businesses, our entry into new lines of business, innovation in the products that we offer investors, an increased focus on providing tailored solutions to our clients and the integration of capital markets distribution activities.

As a global alternative asset manager, we earn management, monitoring, transaction and incentive fees for providing investment management, monitoring and other services to our funds, vehicles, managed accounts, specialty finance company and portfolio companies, and we generate transaction-specific income from capital markets transactions. We earn additional investment income from investing our own capital alongside our investors and from the carried interest we receive from funds and vehicles. A carried interest entitles the sponsor of a fund to a specified percentage of investment gains that are generated on third-party capital that is invested.

Table of Contents

Business Segments

Private Markets

Our Private Markets segment is comprised of our global private equity business, which manages and sponsors a group of investment funds and vehicles that invest capital for long-term appreciation, either through controlling ownership of a company or strategic minority positions. These funds and vehicles build on our sourcing advantage and the strong industry knowledge, operating expertise and regulatory and stakeholder management skills of our professionals, operating consultants and senior advisors to identify attractive investment opportunities and create and realize value for investors.

From our inception through December 31, 2009, we have raised 15 investment funds with approximately \$59.7 billion of capital commitments and have sponsored a number of fee and carry paying co-investment structures that allow us to commit additional capital to transactions. As of December 31, 2009, the segment had \$38.8 billion of AUM and its actively investing funds included geographically differentiated investment funds and vehicles with over \$13.7 billion of uncalled commitments, providing a significant source of capital that may be deployed globally.

Public Markets

Our Public Markets segment is comprised primarily of our fixed income businesses which manage capital in liquid credit strategies, such as leveraged loans and high yield bonds, and less liquid credit products, such as mezzanine debt and capital solutions investments. Our capital solutions effort focuses on special situations investing, including rescue financing, distressed investing, debtor-in-possession financing and exit financing.

As of December 31, 2009, the segment had \$13.4 billion of AUM, including \$0.9 billion of assets managed in a publicly traded specialty finance company, \$8.1 billion of assets managed in structured finance vehicles and \$4.4 billion of assets managed in other types of investment vehicles and separately managed accounts. This AUM includes \$0.8 billion of uncalled commitments to this segment.

Capital Markets and Principal Activities

Our Capital Markets and Principal Activities segment combines the assets we acquired in the Combination Transaction with our global capital markets business. Our capital markets business supports our firm, our portfolio companies and our clients by providing tailored capital markets advice and developing and implementing both traditional and non-traditional capital solutions for investments and companies seeking financing. Our capital markets services include arranging debt and equity financing for transactions, placing and underwriting securities offerings, structuring new investment products and providing capital markets services.

The assets that we acquired in the Combination Transaction have provided us with a significant source of capital to further grow and expand our business, increase our participation in our existing portfolio of businesses and further align our interests with those of our investors and other stakeholders. We believe that the market experience and skills of our capital markets professionals and the investment expertise of professionals in our Private Markets and Public Markets segments will allow us to continue to grow and diversify this asset base over time.

Business Environment

As a global alternative asset manager, we are affected by financial and economic conditions in the United States, Europe, Asia and elsewhere in the world. Although the diversity of our operations and product lines has allowed us to generate attractive returns in different business climates, business conditions characterized by low or declining interest rates and strong equity markets generally provide a more positive environment for us to generate attractive returns on existing investments. We may

Table of Contents

benefit, however, from periods of market volatility and disruption which allow us to use our large capital base and experience with troubled companies to make investments at attractive prices and on favorable terms.

Beginning in the second half of 2007 and throughout 2008 and the first half of 2009, global financial markets experienced significant disruptions and the United States and many other economies experienced a prolonged economic downturn, resulting in heightened credit risk, reduced valuation of investments and decreased economic activity. Concerns over the availability and cost of credit, the mortgage market, a declining real estate market, inflation, energy costs and geopolitical issues contributed to increased volatility and diminished expectations for the economy and the financial markets.

Market conditions began to show initial signs of recovery in the last several months of 2009. Most global equity and debt markets moved higher in the second half of 2009 in anticipation of sustained economic recovery. Emerging markets experienced the greatest increase consistent with their generally more favorable economic growth prospects as compared with the United States and Europe. Credit markets experienced similar significant improvement, fueled by improving economic data and a significant increase in demand and liquidity, as credit spreads tightened and implied default rates declined. Recent U.S. economic data have been improving and stabilizing in part, as unemployment rates began to stabilize since October 2009 and the gross domestic product has returned to growth in the latter part of 2009.

While economic conditions have recently improved, that trend may not continue and the extent of the current economic improvement is unknown. Equity values still remain below the values achieved in 2007 and there currently is less debt and equity capital available in the market relative to the levels available in the past. Even if growth continues, it may be at a slow rate for an extended period of time and other economic conditions, such as the residential and commercial real estate environment and employment rates, may continue to be weak. In addition, some economists believe that steps taken by national governments to stabilize financial markets and improve economic conditions could lead to an inflationary environment. Furthermore, financial markets, while somewhat less volatile than in early 2009, may again experience significant disruption.

Market Conditions

Our ability to grow our revenue and net income depends on our ability to continue to attract capital and investors, secure investment opportunities, obtain financing for transactions, consummate investments and deliver attractive investment returns. These factors are impacted by a number of market conditions, including:

The strength and competitive dynamics of the alternative asset management industry, including the amount of capital invested in, and withdrawn from, alternative investments. Our share of the capital that is allocated to alternative assets depends on the strength of our investment performance relative to the investment performance of our competitors. The amount of capital that we attract and our investment returns directly affect the level of our AUM, which in turn affects the fees, carried interest and other amounts that we earn in connection with our asset management activities.

The strength and liquidity of debt markets. Our private equity funds use debt financing to fund portfolio company acquisitions, while our fixed income funds make significant investments in debt instruments and, in some cases, use varying degrees of leverage to enhance returns and fund working capital. As a result, our business generally benefits from strong and liquid debt markets that support our funds' investment activities, although periods of market volatility and disruption may create attractive investment opportunities, particularly for fixed income funds.

Table of Contents

As discussed above, significant deterioration in the debt markets that began in the third quarter of 2007 and continued through 2009 has had a negative impact on our business. Among other effects, these developments increased the cost and difficulty of financing leveraged buyout transactions thereby significantly reducing private equity activity and impacted valuations and returns of fixed income funds. Increases in rates and spreads along with restrictive covenants, could further impact returns by making debt financing less readily available and more expensive for private equity investments. However, during this period, our portfolio companies have also had opportunities to refinance and in several cases have refinanced certain tranches of their debt. We have also had opportunities to make attractive investments for our fixed income business.

The strength and liquidity of equity markets. Strong equity market conditions enable our private equity funds to increase the value and effect realizations of their portfolio company investments. Equity market conditions also affect the carried interest that we receive. After a prolonged period of positive performance and liquidity, equity markets experienced considerable declines and volatility in the United States and in other markets in the second half of 2007 and throughout 2008. The U.S., European and Asian economies experienced significant declines in employment, household wealth, and lending, which has further negatively impacted equity markets until recently. Negative market conditions make it more difficult for us to exit private equity investments profitably through offerings in the public markets. Equity markets, however, stabilized and showed signs of recovery in the latter half of 2009, allowing us to partially exit certain investments through the public markets, though it is uncertain whether such markets will remain accessible.

Market volatility within the debt and equity markets increases both the opportunities and risks within our segments and directly affects the performance of our funds. Similarly, fluctuations in interest rates and foreign currency exchange rates, if not suitably hedged, may affect the performance of our funds. Historical trends in these markets are not necessarily indicative of our future performance. While conditions in the United States and global economies have begun to improve recently, continued volatility in the equity markets and uncertainty in the debt markets have made it more challenging to profit from investments. If these conditions continue, their negative impact on our business may become more pronounced.

For a more detailed description of the manner in which economic and financial market conditions may materially affect the results of operations and financial condition of the Combined Business, see "Risk Factors Risks Related to Our Business."

The Combination Transaction and Reorganization Transactions

On October 1, 2009, we completed the acquisition of all of the assets and liabilities of KKR Guernsey and, in connection with such acquisition, completed a series of transactions pursuant to which the business of KKR was reorganized into a holding company structure. We refer to these transactions as the "Transactions." Following the Transactions, KKR Guernsey holds a 30% economic interest in our Combined Business through Group Holdings and our principals hold a 70% economic interest in our Combined Business through KKR Holdings. Our senior principals also control us through their control of our Managing Partner. The Combination Transaction did not involve the payment of any cash consideration or involve an offering of any newly issued securities to the public, and it did not change KKR Guernsey unitholders' holdings of KKR Guernsey units.

Table of Contents

Pro Forma Information

Due to the differences described above, our consolidated and combined financial statements and related historical data included in this prospectus are not necessarily representative of our future results of operations and financial condition. To provide additional information illustrating the impact that the changes described above have on our results of operations, we have presented elsewhere in this prospectus unaudited pro forma financial information for the year ended December 31, 2009. This data gives pro forma effect to the Transactions and certain other arrangements entered into in connection therewith as if such transactions and arrangements had been completed as of January 1, 2009. Such information has been included for informational purposes only and does not purport to reflect the results of operations that would have occurred had the transactions referred to above occurred on the dates indicated. See "Unaudited Pro Forma Financial Information."

Basis of Financial Presentation

In accordance with GAAP, a substantial number of our funds are consolidated notwithstanding the fact that we hold only a minority economic interest in those funds. Consolidated funds consist of those funds in which we hold a general partner or managing member interest that gives us substantive controlling rights over such funds. With respect to our consolidated funds, we generally have operational discretion and control over the funds and investors do not hold any substantive rights that would enable them to impact the funds' ongoing governance and operating activities.

When a fund is consolidated, we reflect the assets, liabilities, fees, expenses, investment income and cash flows of the consolidated fund on a gross basis. The majority of the economic interests in the consolidated fund, which are held by third party investors, are reflected as noncontrolling interests. While the consolidation of a consolidated fund does not have an effect on the amounts of net income attributable to Group Holdings' or Group Holdings' partners' capital that Group Holdings reports, the consolidation does significantly impact the financial statement presentation. This is due to the fact that the assets, liabilities, fees, expenses and investment income of the consolidated funds are reflected on a gross basis while the allocable share of those amounts that are attributable to noncontrolling interests are reflected as single line items. The single line items in which the assets, liabilities, fees, expenses and investment income attributable to noncontrolling interests are recorded are presented as noncontrolling interests in consolidated entities on the statements of financial condition and net income attributable to noncontrolling interests in consolidated entities on the statements of operations.

Historically, the noncontrolling interests attributable to the ownership of the KPE Investment Partnership by KPE were included in our financial statements. These noncontrolling interests were removed from the financial statements on October 1, 2009, because these interests were contributed to the KKR Group Partnerships in the Transactions. Subsequent to the Transactions, the KKR Group Partnerships hold 100% of the economic and controlling interests in the KPE Investment Partnership. Therefore, we continue to consolidate the KPE Investment Partnership and its economic interests are no longer reflected as noncontrolling interests as of the date of the Transactions.

Key Financial Measures

Fees

Fees consist primarily of (i) monitoring and transaction fees from providing advisory and other services to our portfolio companies, (ii) management and incentive fees from providing investment management services to unconsolidated funds, a specialty finance company, structured finance vehicles, and separately managed accounts, and (iii) fees from capital markets activities. These fees are based on the contractual terms of the governing agreements. A substantial portion of monitoring and transaction fees earned in connection with managing portfolio companies are shared with fund investors.

Table of Contents

Reported fees do not include the management fees that we earn from consolidated funds, because those fees are eliminated in consolidation. However, because those management fees are earned from, and funded by, third-party investors who hold noncontrolling interests in the consolidated funds, net income attributable to Group Holdings is increased by the amount of the management fees that are eliminated in consolidation. Accordingly, while the consolidation of funds impacts the amount of fees that are recognized in our financial statements, it does not affect the ultimate amount of net income attributable to Group Holdings or Group Holdings' partners' capital.

Expenses

Employee Compensation and Benefits Expense

Employee compensation and benefits expense includes salaries, bonuses, equity-based compensation and profit sharing plans as described below.

Historically, our employee compensation and benefits expense has consisted of base salaries and bonuses paid to employees who were not our senior principals. Payments made to our senior principals included partner distributions that were paid to our senior principals and accounted for as capital distributions rather than employee compensation and benefits expense. Accordingly, we did not record any employee compensation and benefits charges for payments made to our senior principals for periods prior to the completion of the Transactions.

Following the completion of the Transactions, all of our senior principals and other employees receive a base salary that is paid by us and accounted for as employee compensation and benefits expense. Our employees are also eligible to receive discretionary cash bonuses based on performance criteria, our overall profitability and other matters. While cash bonuses paid to most employees are funded by us and result in customary employee compensation and benefits charges, cash bonuses that are paid to certain of our most senior employees are funded by KKR Holdings with distributions that it receives on its KKR Group Partnership Units. To the extent that distributions received by these individuals exceed the amounts that they are otherwise entitled to through their vested interests in KKR Holdings, this excess will be funded by KKR Holdings and reflected in compensation expense in the statement of operations. KKR Holdings has also funded all of the equity and equity-based awards that have been granted to our employees to date.

While we do not bear the economic costs associated with the equity and equity-based grants that KKR Holdings has made to our employees or the cash bonuses that it pays to any of our executives with distributions received on its KKR Group Partnership Units, we are required to recognize employee compensation and benefits expense with respect to a significant portion of these items. Because these amounts are funded by KKR Holdings and not by us, these expenses represent non-cash charges for us and do not impact our distributable earnings.

We recognize non-cash charges relating to equity and equity-based grants that are funded by KKR Holdings based on the grant-date fair value of the award. Awards that do not require the satisfaction of future service or performance criteria (vested awards) are expensed immediately. Awards that require the satisfaction of future service or performance criteria are expensed over the relevant service period, adjusted for the lack of distribution participation and estimated forfeitures of awards not expected to vest. Because a portion of the awards that were granted by KKR Holdings were vested upon issuance, we incurred a significant one-time, non-cash employee compensation and benefits charge in our financial statements during the fourth quarter of 2009 relating to initial equity grants. We expect to record additional non-cash charges in future periods as and when interests in KKR Holdings vest.

In addition, we are permitted to allocate to our principals, other professionals and selected other individuals a portion of the carried interest that we earn from our current and future funds that provide for carried interest payments. As and when investment income is recognized with respect to this carried interest, we record a corresponding amount of employee compensation and benefits

Table of Contents

expense. See "Organizational Structure Components of Our Business Owned by the KKR Group Partnerships."

General, Administrative and Other Expense

General, administrative and other expense consists primarily of professional fees paid to legal advisors, accountants, advisors and consultants, insurance costs, travel and related expenses, communications and information services, depreciation and amortization charges and other general and operating expenses.

In addition, interests in KKR Holdings were granted to our operating consultants in connection with the Transactions. The vesting of these interests gives rise to periodic general, administrative and other expense in the statements of operations. General, administrative and other expense recognized on unvested units is calculated based on the fair value of an interest in KKR Holdings (determined using the closing price of KKR Guernsey's units) on each reporting date and subsequently adjusted for the actual fair value of the award at each vesting date. Accordingly, the measured value of these interests will not be finalized until each vesting date. Additionally, the calculation of the compensation expense assumes a forfeiture rate of up to 3% annually based upon expected turnover. Because a portion of the awards that were granted by KKR Holdings were vested upon issuance, we incurred a one-time, non-cash charge in our financial statements during the fourth quarter of 2009. General, administrative and other expense is not borne by fund investors and is not offset by credits attributable to fund investors' noncontrolling interests in consolidated funds.

Fund Expenses

Fund expenses consist primarily of costs incurred in connection with pursuing potential investments that do not result in completed transactions (such as travel expenses, professional fees and research costs) and other costs associated with administering our private equity funds. A substantial portion of fund expenses are borne by fund investors.

Investment Income (Loss)

Net Gains (Losses) from Investment Activities

Net gains (losses) from investment activities consist primarily of the unrealized and realized gains and losses on investments. Unrealized gains or losses result from changes in the fair value of these investments during a period. Upon disposition of an investment, previously recognized unrealized gains or losses are reversed and an offsetting realized gain or loss is recognized in the current period.

Dividend Income

Dividend income consists primarily of distributions that private equity funds receive from portfolio companies in which they invest. Private equity funds recognize dividend income primarily in connection with (i) dispositions of operations by portfolio companies, (ii) distributions of excess cash generated from operations from portfolio companies and (iii) other significant refinancings undertaken by portfolio companies.

Interest Income

Interest income consists primarily of interest that is paid on our cash balances, principal assets and fixed income instruments in which consolidated funds invest.

Interest Expense

Interest expense is incurred from three primary sources: (i) credit facilities outstanding at the KPE Investment Partnership, (ii) credit facilities outstanding at the firm's management companies and

Table of Contents

capital markets companies for working capital purposes, and (iii) debt outstanding at our consolidated funds entered into with the objective of enhancing returns, which are not direct obligations of the general partners of our private equity funds or management companies. In addition to these interest costs, we capitalize debt financing costs incurred in connection with new debt arrangements. Such costs are amortized into interest expense using either the interest method or the straight-line method, as appropriate.

Income Taxes

Prior to the completion of the Transactions, we operated as a partnership for U.S. federal income tax purposes and mainly as a corporate entity in non-U.S. jurisdictions. As a result, income was not subject to U.S. federal and state income taxes. Historically, the tax liability related to income earned by us represented obligations of our principals and has not been reflected in the historical financial statements. Income taxes shown on the statements of operations prior to the Transactions are attributable to the New York City unincorporated business tax and other income taxes on certain entities located in non-U.S. jurisdictions.

Following the Transactions, the KKR Group Partnerships and certain of their subsidiaries will continue to operate in the United States as partnerships for U.S. federal income tax purposes and as corporate entities in non-U.S. jurisdictions. Accordingly, these entities, in some cases, will continue to be subject to New York City unincorporated business taxes, or non-U.S. income taxes. However, we hold our interest in one of the KKR Group Partnerships through KKR Management Holdings Corp., which is treated as a corporation for U.S. federal income tax purposes, and certain other wholly owned subsidiaries of the KKR Group Partnerships are treated as corporations for U.S. federal income tax purposes. Accordingly, such wholly owned subsidiaries of Group Holdings, including KKR Management Holdings Corp., and the KKR Group Partnerships, are subject to federal, state and local corporate income taxes at the entity level and the related tax provision attributable to Group Holdings' share of this income is reflected in the financial statements.

Subsequent to the Transactions, we use the liability method to account for income taxes in accordance with GAAP. Under this method, deferred tax assets and liabilities are recognized for the expected future tax consequences of differences between the carrying amounts of assets and liabilities and their respective tax basis using currently enacted tax rates. The effect on deferred assets and liabilities of a change in tax rates is recognized in income in the period when the change is enacted. Deferred tax assets are reduced by a valuation allowance when it is more likely than not that some portion or all the deferred tax assets will not be realized.

Tax laws are complex and subject to different interpretations by the taxpayer and respective governmental taxing authorities. Significant judgment is required in determining tax expense and in evaluating tax positions including evaluating uncertainties. We review our tax positions quarterly and adjust our tax balances as new information becomes available.

Net Income (Loss) Attributable to Noncontrolling Interests

Net income (loss) attributable to noncontrolling interests represents the ownership interests that third parties hold in entities that are consolidated in the financial statements. The allocable share of income and expense attributable to those interests is accounted for as net income (loss) attributable to noncontrolling interests. Historically, the amount of net income (loss) attributable to noncontrolling interests has been substantial and has resulted in significant charges and credits in the statements of operations. For periods prior to the Transactions, noncontrolling interests consisted primarily of:

noncontrolling interests that third party investors held in consolidated funds;

noncontrolling interests attributable to the ownership of the KPE Investment Partnership by KPE's unitholders;

Table of Contents

a noncontrolling interest that allocated to a third party an aggregate of 2% of the equity in our capital markets business; and

noncontrolling interests that allocated 35% of the net income (loss) generated by the manager of our Public Markets segment to certain of its principals on an annual basis through May 30, 2008.

On May 30, 2008, we acquired all outstanding noncontrolling interests of the manager of our Public Markets segment and now own 100% of this business. In connection with the Transactions, we acquired all outstanding noncontrolling interests in the KPE Investment Partnership, which is a wholly owned subsidiary of our firm.

For periods subsequent to the completion of the Transactions, noncontrolling interests include:

noncontrolling interests that allocate to a former principal and such person's designees an aggregate of 1% of the carried interest received by general partners of our funds and 1% of our other profits until a future date;

noncontrolling interests that allocate to certain of our former principals and their designees a portion of the carried interest received by the general partners of the private equity funds with respect to private equity investments made during such former principals' tenure with us;

noncontrolling interests that allocate to certain of its current and former principals all of the capital invested by or on behalf of the general partners of the private equity funds before the completion of the Transactions and any returns thereon; and

noncontrolling interests representing the KKR Group Partnership Units that KKR Holdings holds in the KKR Group Partnerships, which interests allocate to KKR Holdings 70% of the equity in the combined business.

Assets Under Management ("AUM")

AUM represents the assets from which we are entitled to receive fees or a carried interest and general partner capital. The AUM reported prior to the Transactions reflected the NAV of KPE and its commitments to our investment funds. Subsequent to the Transactions, the NAV of KPE and its commitments to our investment funds are excluded from our calculation of AUM. We calculate the amount of AUM as of any date as the sum of: (i) the fair value of the investments of our investment funds plus uncalled capital commitments from these funds; (ii) the fair value of investments in our co-investment vehicles; (iii) the net asset value of certain of our fixed income products; and (iv) the value of outstanding structured finance vehicles. You should note that our calculation of AUM may differ from the calculations of other asset managers and, as a result, our measurements of AUM may not be comparable to similar measures presented by other asset managers. Our definition of AUM is not based on any definition of AUM that is set forth in the agreements governing the investment funds, vehicles or accounts that we manage.

Fee Paying Assets Under Management ("FPAUM")

FPAUM represents only those assets under management from which we receive fees. FPAUM is the sum of all of the individual fee bases that are used to calculate our fees and differs from AUM in the following respects: (i) assets from which we do not receive a fee are excluded (i.e., assets with respect to which we receive only carried interest); and (ii) certain assets, primarily in our private equity funds, are reflected based on capital commitments or invested capital as opposed to fair value because fees are not impacted by changes in the fair value of underlying investments.

Segment Results

We present the results of our reportable business segments in accordance with FASB Accounting Standards Codification Section 280, *Segment Reporting*. This guidance is based on a management

Table of Contents

approach, which requires segment presentation based on internal organization and the internal financial reporting used by management to make operating decisions, assess performance and allocate resources. All inter-segment transactions are eliminated in the segment presentation.

Our management makes operating decisions, assesses performance and allocates resources based on financial and operating data and measures that are presented without giving effect to the consolidation of any of the funds that we manage. In addition, there are other components of our reportable segment results that differ from the equivalent GAAP results on a consolidated basis. These differences are described below. We believe such adjustments are meaningful because management makes operating decisions and assesses the performance of our business based on financial and operating metrics and data that are presented without the consolidation of any funds.

Segment Operating and Performance Measures

Fee Related Earnings

Fee related earnings ("FRE") is a profit measure that is reported by our three reportable business segments. FRE is comprised of segment operating revenues, less segment operating expenses. The components of FRE on a segment basis differ from the equivalent U.S. GAAP amounts on a combined basis as a result of: (i) the inclusion of management fees earned from consolidated funds that were eliminated in consolidation; (ii) the exclusion of expenses of consolidated funds; (iii) the exclusion of charges relating to the amortization of intangible assets; (iv) the exclusion of charges relating to carry pool allocations; (v) the exclusion of non-cash equity charges and other non-cash compensation charges; (vi) the exclusion of certain reimbursable expenses and (vii) the exclusion of certain non-recurring items.

Economic Net Income

Economic net income ("ENI") is a key performance measure used by management when making operating decisions, assessing operating performance and allocating resources. ENI is comprised of: (i) FRE; plus (ii) segment investment income, which is reduced for carry pool allocations and management fee refunds; less (iii) certain economic interests in our segments held by third parties. ENI differs from net income on a U.S. GAAP basis as a result of: (i) the exclusion of the items referred to in FRE above; (ii) the exclusion of investment income relating to noncontrolling interests; and (iii) the exclusion of income taxes.

Committed Dollars Invested

Committed dollars invested is the aggregate amount of capital commitments that have been invested by our investment funds and carry-yielding co-investment vehicles during a given period. Such amounts include: (i) capital invested by fund investors and co-investors with respect to which we are entitled to a carried interest and (ii) capital invested by us.

Uncalled Commitments

Uncalled commitments represent unfunded capital commitments by partners of our investment funds and carry-yielding co-investment vehicles to contribute capital to make investments in portfolio companies and other investment alternatives.

Consolidated and Combined Results of Operations

The following is a discussion of our consolidated and combined results of operations for the years ended December 31, 2007, 2008 and 2009. You should read this discussion in conjunction with the consolidated and combined financial statements and related notes included elsewhere in this document.

Edgar Filing: KKR & Co. L.P. - Form S-1

Table of Contents

For a more detailed discussion of the factors that affected the results of operations of our three business segments in these periods, see " Segment Analysis."

The following tables set forth information regarding our results of operations for the years ended December 31, 2007, 2008 and 2009.

	Year Ended December 31,		
	2007	2008	2009
Revenues			
Fees	\$ 862,265	\$ 235,181	\$ 331,271
Expenses			
Employee Compensation and Benefits	212,766	149,182	838,072
Occupancy and Related Charges	20,068	30,430	38,013
General, Administrative and Other	128,036	179,673	264,396
Fund Expenses	80,040	59,103	55,229
Total Expenses	440,910	418,388	1,195,710
Investment Income (Loss)			
Net Gains (Losses) from Investment Activities	1,111,572	(12,944,720)	7,505,005
Dividend Income	747,544	75,441	186,324
Interest Income	218,920	129,601	142,117
Interest Expense	(86,253)	(125,561)	(79,638)
Total Investment Income (Loss)	1,991,783	(12,865,239)	7,753,808
Income (Loss) Before Taxes	2,413,138	(13,048,446)	6,889,369
Income Taxes	12,064	6,786	36,998
Net Income (Loss)	2,401,074	(13,055,232)	6,852,371
Less: Net Income (Loss) Attributable to Noncontrolling Interests in Consolidated Entities	1,598,310	(11,850,761)	6,119,382
Less: Net Income (Loss) Attributable to Noncontrolling Interests held by KKR Holdings			(116,696)
Net Income (Loss) Attributable to KKR Group	\$ 802,764	\$ (1,204,471)	\$ 849,685
Assets under management (period end)	\$ 53,215,700	\$ 48,450,700	\$ 52,204,200
Fee paying assets under management (period end)	\$ 39,862,168	\$ 43,411,800	\$ 42,779,800
Uncalled Commitments (period end)	\$ 11,530,417	\$ 14,930,142	\$ 14,544,427

Year ended December 31, 2009 compared to year ended December 31, 2008

Fees

Fees were \$331.3 million for the year ended December 31, 2009, an increase of \$96.1 million, or 40.9%, from the year ended December 31, 2008. The increase was primarily due to a \$50.5 million increase in transaction fees reflecting an increase in transaction-fee generating private equity investments during the period. During the year ended December 31, 2009, we completed twelve transaction-fee generating transactions compared to four transaction-fee generating transactions in 2008. Monitoring fees increased \$39.2 million reflecting the net impact of (i) an increase of \$72.2 million relating to fees received for the termination of monitoring fee contracts in connection with public equity offerings of two of our portfolio companies, (ii) a decrease relating to the receipt in the prior period of a non-recurring \$15.0 million advisory fee from one of our portfolio companies in connection with equity raised by that company, (iii) a net decrease of \$11.2 million in fees received from certain

portfolio companies, and (iv) a \$6.8 million net decrease in reimbursable expenses. In addition, during 2009 fees were increased by an incentive fee of \$4.5 million earned by KFN as a result of improved performance consistent with the broader credit markets. No such fee was earned in the prior period.

Table of Contents*Expenses*

Expenses were \$1,195.7 million for the year ended December 31, 2009, an increase of \$777.3 million, as compared to expenses of \$418.4 million for the year ended December 31, 2008. The increase was primarily due to non-cash charges associated with the issuance of interests in KKR Holdings to our principals and operating consultants. For the year ended December 31, 2009, non-cash employee compensation and benefits relating to principals amounted to \$644.5 million, and non-cash charges recorded in general and administrative expenses relating to operating consultants amounted to \$85.0 million. In addition, other employee compensation and benefits expenses increased \$44.4 million due to (i) an increase in profit sharing costs in connection with an increase in the value of our private equity portfolio, (ii) an increase in salaries reflecting the hiring of additional personnel in connection with the expansion of our business, and (iii) an increase in incentive compensation in connection with higher bonuses in 2009. The remainder of the net increase in expenses is the result of the net impact of the following: (i) a \$34.8 million non-recurring charge associated with the closing of the Transactions, (ii) an increase in occupancy costs of \$7.6 million primarily reflecting the opening of new offices subsequent to December 31, 2008 as well as an increase in existing office space, (iii) a decrease in transaction related expenses of \$13.3 million attributable to un consummated transactions during the period, and (iv) decreases in other operating expenses of \$25.7 million reflecting expense reductions across the majority of our businesses.

Net Gains (Losses) from Investment Activities

Net gains from investment activities were \$7.5 billion for the year ended December 31, 2009, an increase of \$20.4 billion compared to net losses from investment activities of \$12.9 billion for the year ended December 31, 2008. The increase in net gains (losses) from investment activities from the prior period was primarily attributable to net unrealized gains of \$7.8 billion resulting primarily from increases in the market value of our investment portfolio during 2009 compared to net unrealized losses of \$13.2 billion during 2008. This change in net unrealized gains and losses resulted in a net favorable variance in unrealized investment activity from the prior period of \$21.0 billion. Offsetting the increase in unrealized gains (losses) was realization activity that represented a net loss for 2009 of \$0.3 billion compared with a net gain of \$0.3 billion for 2008, which resulted in a net unfavorable variance in realization activity from the prior period of \$0.6 billion. The majority of our net gains (losses) from investment activities are related to our private equity investments.

Dividend Income

Dividend income was \$186.3 million for the year ended December 31, 2009, an increase of \$110.9 million compared to dividend income of \$75.4 million for the year ended December 31, 2008. Our dividends are generally earned in connection with sales of significant operations, distributions of excess cash, or other refinancings undertaken by our portfolio companies resulting in available cash that is distributed to our private equity funds. During the year ended December 31, 2009, we received \$179.2 million of dividends from two portfolio companies and an aggregate of \$7.1 million of comparatively smaller dividends from other investments.

Interest Income

Interest income was \$142.1 million for the year ended December 31, 2009, an increase of \$12.5 million, or 9.7%, from the year ended December 31, 2008. The increase primarily reflects an increase of \$38.1 million at one of our fixed income vehicles resulting from a higher average level of debt investments during the period. Offsetting this increase was (i) a decrease of \$19.9 million at the KPE Investment Partnership due to a decrease in interest income-yielding investments, (ii) a \$2.0 million decrease as a result of the exclusion of the general partners of the 1996 Fund in the fourth quarter of 2009, which interests were not contributed to the KKR Group Partnerships in connection

Table of Contents

with the Transactions, and (iii) a \$3.7 million decrease at our management companies and private equity funds resulting from lower average cash balances.

Interest Expense

Interest expense was \$79.6 million for the year ended December 31, 2009 a decrease of \$45.9 million, or 36.6%, from the year ended December 31, 2008. Average outstanding borrowings remained unchanged from the year ended December 31, 2008, however the weighted average interest rate was lower during the year ended December 31, 2009 as compared to the prior year period.

Income (Loss) Before Taxes

Due to the factors described above, income before taxes was \$6.9 billion for the year ended December 31, 2009, an increase of \$19.9 billion compared to loss before taxes of \$13.0 billion for the year ended December 31, 2008.

Net Income (Loss) Attributable to Noncontrolling Interests in Consolidated Entities

Net income attributable to noncontrolling interests in consolidated entities was \$6.1 billion for the year ended December 31, 2009, an increase of \$18.0 billion compared to net loss attributable to noncontrolling interests in consolidated entities of \$11.9 billion for the year ended December 31, 2008. The increase primarily reflects higher income attributable to noncontrolling interests, which were driven by the overall changes in the components of net gains (losses) from investment activities described above.

Assets Under Management

The following table reflects the changes in our assets under management from December 31, 2008 to December 31, 2009:

December 31, 2008 AUM	\$ 48,450,700
Exclusion of KPE(a)	(3,577,000)
New Capital Raised	2,099,600
Distributions	(3,443,300)
Change in Value	8,674,200

December 31, 2009 AUM \$ 52,204,200

(a)

The assets under management reported prior to the Transactions reflected the NAV of KPE and its commitments to our investment funds. Subsequent to the Transactions, the NAV of KPE and its commitments to our investment funds are excluded from our calculation of assets under management.

Table of Contents*Fee Paying Assets Under Management*

The following table reflects the changes in our fee paying assets under management from December 31, 2008 to December 31, 2009:

December 31, 2008 FPAUM	\$ 43,411,800
Exclusion of KPE(a)	(3,238,500)
New Capital Raised	2,009,000
European Fund III/E2 Investors	(571,600)
Distributions	(959,758)
Change in Value	2,128,858
December 31, 2009 FPAUM	\$ 42,779,800

- (a) The fee paying assets under management reported prior to the Transactions reflected the NAV of KPE. Subsequent to the Transactions, the NAV of KPE is excluded from our calculation of fee paying assets under management.

Uncalled Commitments

As of December 31, 2009, our investment funds had \$14.5 billion of remaining uncalled commitments that could be called for investment in new transactions.

*Year ended December 31, 2008 Compared to Year ended December 31, 2007**Fees*

Fees were \$235.2 million for the year ended December 31, 2008, a decrease of \$627.1 million, or 72.7%, from the year ended December 31, 2007. The decrease was primarily due to a \$641.8 million decrease in transaction fees reflecting a decrease in transaction-fee generating private equity investments during the period. In addition, management and incentive fees relating to KFN decreased \$27.9 million primarily as a result of adverse credit market conditions. Offsetting these decreases was a \$41.8 million increase in monitoring fees reflecting an increase in the average monitoring fee received as well as the receipt of a non-recurring \$15.0 million advisory fee from one of our portfolio companies.

Expenses

Expenses were \$418.4 million for the year ended December 31, 2008, a decrease of \$22.5 million, or 5.1%, from the year ended December 31, 2007. The decrease was primarily due to a \$63.6 million decrease in employee compensation and benefits resulting from a decrease in incentive compensation in connection with less favorable financial performance when compared to the prior period, offset by increases relating to the hiring of additional personnel after December 31, 2007 in connection with the expansion of our business. Offsetting this decrease is the net impact of the following: (i) an increase in other operating expenses of \$43.2 million primarily as a result of an increase in expenses in connection with the overall growth of our existing businesses; (ii) an increase in occupancy charges of \$10.4 million reflecting the opening of new offices in Beijing, Sydney, Houston and Washington, D.C. subsequent to December 31, 2007 as well as an increase in existing office space, and (iii) a decrease in transaction related expenses of \$12.5 million attributable to unconsummated transactions during the period reflecting a slowdown in the overall level of investment activity during the period.

Table of Contents

Net Gains (Losses) from Investment Activities

Net losses from investment activities were \$12.9 billion for the year ended December 31, 2008, a decrease of \$14.1 billion compared to net gains from investment activities of \$1.1 billion for the year ended December 31, 2007. The overall decrease in net gains (losses) from investment activities from the prior period was primarily attributable to a net decrease in changes in unrealized gains (losses) of \$12.8 billion resulting primarily from decreases in the market value of our investment portfolio and to a lesser extent a decline in net realized gains of \$1.3 billion resulting primarily from a lower level of realization activity during the period. Substantially all of our net gains (losses) from investment activities are related to our private equity investments.

Dividend Income

Dividend income was \$75.4 million for the year ended December 31, 2008, a decrease of \$672.1 million, or 89.9%, from the year ended December 31, 2007. Our dividends are generally earned in connection with sales of significant operations or other refinancings undertaken by our portfolio companies resulting in available cash that is distributed to our private equity funds. During the year ended December 31, 2008, we received \$74.2 million of dividends from two portfolio companies and an aggregate of \$1.2 million of comparatively smaller dividends from other investments. During the year ended December 31, 2007, we received \$717.7 million of dividends from eight portfolio companies and an aggregate of \$29.8 million of comparatively smaller dividends from four portfolio companies.

Interest Income

Interest income was \$129.6 million for the year ended December 31, 2008, a decrease of \$89.3 million, or 40.8%, from the year ended December 31, 2007. The decrease primarily reflects a \$63.7 million decrease in interest income earned in our Public Markets segment that was attributable to the deconsolidation, during the second quarter of 2007, of one of the structured finance vehicles that we manage as well as a decrease of \$66.6 million in interest income earned from cash management activities at the KPE Investment Partnership following the deployment of a greater percentage of its cash to investments. Cash management activities resulting in lower cash balances at our management companies resulted in a decrease in interest income of \$7.3 million. Offsetting these decreases were increases in income earned from cash management activities at our private equity funds of \$48.3 million.

Interest Expense

Interest expense was \$125.6 million for the year ended December 31, 2008, an increase of \$39.3 million, or 45.6%, from the year ended December 31, 2007 and average outstanding borrowings were \$2.2 billion and \$1.5 billion for the years ended December 31, 2008 and 2007, respectively. The increase was primarily attributable to increased borrowings at the KPE Investment Partnership and leveraged structures used by the KPE Investment Partnership and our private equity funds to enhance returns on certain assets which collectively resulted in the recognition of \$61.2 million of additional interest expense. In addition, interest expense increased at our management company and capital markets business by \$9.8 million. This increase was due primarily to an increase in borrowings at the management company resulting in an additional \$5.1 million in interest expense as well as the amortization of deferred financing costs incurred in connection with credit agreements entered into in early 2008 of \$4.7 million. These increases were offset by a decrease of \$31.7 million in our Public Markets segment resulting primarily from the deconsolidation, during the second quarter of 2007, of one of the structured finance vehicles that we manage.

Table of Contents*Income (Loss) before Taxes*

Due to the factors described above, loss before taxes was \$13.0 billion for the year ended December 31, 2008, a decrease of \$15.5 billion compared to income before taxes of \$2.4 billion for the year ended December 31, 2007.

Net (Loss) Income Attributable to Noncontrolling Interests

Net (loss) income attributable to noncontrolling interests was \$11.9 billion for the year ended December 31, 2008, a decrease of \$13.4 billion compared to income attributable to noncontrolling interests of \$1.6 billion for the year ended December 31, 2007. The decrease primarily reflects net loss attributable to noncontrolling interests, which were driven by the overall changes in the components of net gains (losses) from investment activities described above.

Assets Under Management

The following table reflects the changes in our assets under management from December 31, 2007 to December 31, 2008:

Table of Contents

Year ended December 31, 2009 Compared to Year ended December 31, 2008

Fees

Fees in our Private Markets segment were \$571.8 million for the year ended December 31, 2009, an increase of \$49.5 million, or 9.5%, from the year ended December 31, 2008. The increase was primarily due to a \$30.7 million increase in net transaction and monitoring fees. The increase in net transaction and monitoring fees was primarily the result of (i) an increase in gross transaction fees of \$30.9 million reflecting an increase in transaction-fee generating private equity investments during the period (we completed twelve transaction-fee generating transactions in 2009 compared to four transaction-fee generating transactions in 2008); (ii) an increase in gross monitoring fees of \$61.0 million reflecting the net impact of an increase of \$72.2 million relating to fees received for the termination of monitoring fee contracts in connection with public equity offerings of two of our portfolio companies and a net \$11.2 million decrease in fees received from certain portfolio companies; and (iii) an increase in credits earned by limited partners under fee sharing arrangements in our private equity funds of \$61.2 million due to the increase in transaction and monitoring fees. In addition there was an \$18.8 million increase in management fees which was primarily the result of a full year of fees associated with the European III fund which began earning fees in the second quarter of 2008.

Expenses

Expenses were \$328.9 million for the year ended December 31, 2009, a decrease of \$31.9 million, or 8.8%, from the year ended December 31, 2008. The decrease was primarily due to the net impact of the following: (i) a decrease in transaction related expenses of \$13.3 million attributable to un consummated transactions during the period; (ii) decreases in other operating expenses of \$38.7 million (excluding the non-recurring charge described below) reflecting expense reductions; (iii) an increase in occupancy costs of \$6.9 million reflecting the opening of new offices subsequent to December 31, 2008 as well as an increase in existing office space; and (iv) an increase in employee compensation and benefits expense of \$13.2 million resulting from an increase in salaries reflecting the hiring of additional personnel in connection with the expansion of our business as well as an increase in incentive compensation in connection with higher bonuses in 2009 when compared to the prior period. Our Private Markets expenses exclude a \$34.8 million charge incurred in connection with the Transactions. Management has excluded this charge from our segment financial information as such amount will be not be considered when assessing the performance of or allocating resources to, each of our business segments, and is non-recurring in nature. On a consolidated basis, this charge is included in general, administrative and other expenses.

Fee Related Earnings

Due primarily to the increase in fees described above, fee related earnings in our Private Markets segment were \$242.9 million for the year ended December 31, 2009, an increase of \$81.5 million, or 50.5%, from the year ended December 31, 2008.

Investment Income (Loss)

Investment income was \$870.8 million for the year ended December 31, 2009, an increase of \$2.3 billion compared to investment losses of \$1.4 billion for the year ended December 31, 2008. For the year ended December 31, 2009, investment income (loss) was comprised of (i) net carried interest of \$745.5 million, which includes gross carried interest of \$826.2 million, allocations to our carry pool of (\$58.0) million and management fee refunds of (\$22.7) million and (ii) other investment income (loss) of \$125.3 million, which includes net gains from investment activities of \$106.4 million, dividends of \$23.8 million and net interest expense of \$4.9 million. The increase in investment income of \$2.3 billion from the year ended December 31, 2008 is primarily due to an increase in net unrealized

Table of Contents

gains of \$2.4 billion resulting primarily from increases in the market value of our private equity portfolio. Offsetting this increase was realization activity that represented a net loss during the year ended December 31, 2009 of \$39.1 million and a net gain during the year ended December 31, 2008 of \$72.8 million which resulted in a net unfavorable variance in realization activity from the prior period of \$111.9 million.

Economic Net Income (Loss)

Economic net income in our Private Markets segment was \$1.1 billion for the year ended December 31, 2009, an increase of \$2.3 billion compared to economic net loss of \$1.2 billion for the year ended December 31, 2008. The increased investment income described above was the main contributor to the period over period increase in economic net income.

Assets Under Management

The following table reflects the changes in our Private Markets assets under management from December 31, 2008 to December 31, 2009:

December 31, 2008 AUM	\$ 35,283,700
Exclusion of KPE(a)	(3,514,400)
New Capital Raised	683,300
Distributions	(808,600)
Change in Value	7,198,900

December 31, 2009 AUM	\$ 38,842,900
-----------------------	---------------

- (a) The assets under management reported prior to the Transactions reflected the NAV of KPE and its commitments to our investment funds. Subsequent to the Transactions, the NAV of KPE and its commitments to our investment funds are excluded from our calculation of assets under management.

Fee Paying Assets Under Management

The following table reflects the changes in our Private Markets fee paying assets under management from December 31, 2008 to December 31, 2009:

December 31, 2008 FPAUM	\$ 39,244,800
Exclusion of KPE(a)	(3,175,900)
New Capital Raised	609,000
European Fund III/E2 Investors	(571,600)
Distributions	(325,058)
Change in Value	703,158

December 31, 2009 FPAUM	\$ 36,484,400
-------------------------	---------------

- (a) The fee paying assets under management reported prior to the Transactions reflected the NAV of KPE. Subsequent to the Transactions, the NAV of KPE is excluded from our calculation of fee paying assets under management.

Committed Dollars Invested

Committed dollars invested were \$2.1 billion for the year ended December 31, 2009, a decrease of \$1.1 billion, or 33.5%, from the year ended December 31, 2008. The decrease was due primarily to a decrease in both the size and transaction volume of private equity investments

closed during 2009 as compared with 2008.

Table of Contents

Uncalled Commitments

As of December 31, 2009, our private equity funds had \$13.7 billion of remaining uncalled capital commitments that could be called to make investments.

Year ended December 31, 2008 Compared to Year ended December 31, 2007

Fees

Fees in our Private Markets segment were \$522.3 million for the year ended December 31, 2008, a decrease of \$258.9 million, or 33.1%, from the year ended December 31, 2007. The decrease was primarily due to a decrease in gross transaction fees earned in our Private Markets segment of \$641.8 million reflecting a decrease in transaction-fee generating private equity investments during the period. Offsetting this decrease was an increase in management fees relating to our private equity funds of \$138.1 million. The increase was primarily due to an increase of \$100.6 million relating to the formation of the European III fund which began earning fees in the second quarter of 2008 as well as a full year of fees in 2008 relating to the Asian Fund formed in mid-2007. Gross monitoring fees increased \$26.9 million in our Private Markets segment reflecting an increase in the average monitoring fee received. In addition, a \$217.9 increase was related to a decrease in fee credits earned by limited partners under fee sharing arrangements in our private equity funds.

Expenses

Expenses in our Private Markets segment were \$360.8 million for the year ended December 31, 2008, a decrease of \$4.0 million, or 1.1%, from the year ended December 31, 2007. The decrease was primarily due to a \$35.7 million decrease in employee compensation and benefits resulting from a decrease in incentive compensation in connection with less favorable financial performance when compared to the prior period, offset by increases relating to the hiring of additional personnel after December 31, 2007 in connection with the expansion of our business. Offsetting this decrease is the net impact of the following: (i) an increase in other operating expenses of \$34.1 million primarily as a result of an increase in expenses in connection with the overall growth of our existing businesses; (ii) an increase in occupancy charges of \$10.0 million reflecting the opening of new offices in Beijing, Sydney, Houston and Washington, D.C. subsequent to December 31, 2007 as well as an increase in existing office space and (iii) a decrease in transaction related expenses of \$12.5 million attributable to unconsummated transactions during the period reflecting a slowdown in the overall level of investment activity during the period.

Fee Related Earnings

Fee related earnings in our Private Markets segment were \$161.4 million for the year ended December 31, 2008, a decrease of \$254.9 million, or 61.2%, from the year ended December 31, 2007. The significant decrease in fees, as described above, was the main contributor to the year over year decrease in fee related earnings.

Investment Income (Loss)

Investment losses were \$1.4 billion for the year ended December 31, 2008, a decrease of \$1.8 billion compared to investment income of \$358.6 million for the year ended December 31, 2007. Investment income was comprised of net losses from investment activities of \$1.4 billion, dividends of \$18.7 million and net interest expense of \$1.8 million. The overall decrease in net gains from investment activities compared to the prior period was primarily attributable to a net decrease in changes in unrealized gains (losses) of \$1.4 billion resulting primarily from net decreases in the market value of our investment portfolio and to a lesser extent a decline in net realized gains of \$279.1 million resulting primarily from a lower level of sales activity during the period. Dividends decreased \$144.0 million as a result of fewer dividends as well as a lower average dividend received during 2008 while net interest expense increased \$16.3 million primarily as a result of increased borrowings as well

Table of Contents

as the amortization of deferred financing costs incurred in connection with credit agreements entered into in early 2008 at our management company and capital markets business. Carried interest represented \$(1.2) billion of total investment losses for the year ended December 31, 2008 and \$0.3 billion of total investment income for the year ended December 31, 2007.

Economic Net Income (Loss)

Economic net loss in our Private Markets segment was \$1.2 billion for the year ended December 31, 2008, a decrease of \$2.0 billion compared to economic net income of \$0.8 billion for the year ended December 31, 2007. The investment losses described above were the main contributors to the period over period decrease in economic net income.

Assets Under Management

The following table reflects the changes in our Private Markets assets under management from December 31, 2007 to December 31, 2008:

December 31, 2007 AUM	\$	42,234,800
New Capital Raised		6,441,000
Distributions		(605,531)
Change in Value		(12,786,569)
December 31, 2008 AUM	\$	35,283,700

Fee Paying Assets Under Management

The following table reflects the changes in our Private Markets fee paying assets under management from December 31, 2007 to December 31, 2008:

December 31, 2007 FPAUM	\$	35,881,268
New Capital Raised		6,141,000
Distributions		(755,387)
Change in European Fund II Fee Base		(272,659)
Change in Value		(1,749,422)
December 31, 2008 FPAUM	\$	39,244,800

Committed Dollars Invested

Committed dollars invested were \$3.2 billion for the year ended December 31, 2008, a decrease of \$11.7 billion, or 78.7%, from the year ended December 31, 2007. The decrease was due primarily to a decrease in the number of private equity transactions closed during the year ended December 31, 2008.

Uncalled Commitments

As of December 31, 2008, our private equity funds had \$14.9 billion of remaining unused capital commitments that could be called for investment in new private equity transactions.

Table of Contents**Public Markets Segment**
