ITEM 8.01 Other Events.

Mineralized Material Report

On October 12, 2011, Silver Bull Resources, Inc. announced the results of a technical report (the “Report”) being prepared for the Company by SRK Consulting (Canada) Inc. (“SRK”) on the silver mineralization in the “Shallow Silver Zone” of the Sierra Mojada Project in Coahuila, Mexico in accordance with the Canadian Securities Administrators’ National Instrument 43-101 — Standards of Disclosure for Mineral Projects (“NI 43-101”). At an economic cutoff grade of 15 grams/tonne of silver for mineralized material possibly accessible by open pit mining and 70 grams/tonne of silver for mineralized material possibly amendable to underground mining, the Report indicates mineralized material of 28.564 million tonnes at an average silver grade of 50.4 grams/tonne for the silver Whittle pit and 0.282 million tonnes at an average silver grade of 110.9 grams/tonne for the underground workings. Mineralized material estimates do not include any amounts categorized as inferred resources.

A copy of SRK’s consent to disclose the results of the Report is filed as Exhibit 99.1 to this report, and is incorporated by reference into the Company’s registration statements on Form S-3 (333-174816), Form S-3 (333-172789), Form S-3 (333-172868), and Form S-8 (333-171723), including any prospectuses or amendments or supplements thereto.

“Mineralized material” as used in this current report, although permissible under SEC’s Guide 7, does not indicate “reserves” by SEC standards. The Company cannot be certain that any part of the Sierra Mojada Project will ever be confirmed or converted into SEC Industry Guide 7 compliant “reserves.” Investors are cautioned not to assume that all or any part of the mineralized material will ever be confirmed or converted into reserves or that mineralized material can be economically or legally extracted.

ITEM 9.01 Financial Statements and Exhibits.

(d) Exhibits

Exhibit No.	Description
99.1	Consent of SRK Consulting (Canada) Inc. dated October 31, 2011.
