PURE CYCLE CORPORATION  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
NOVEMBER 30, 2014

NOTE 1 – PRESENTATION OF INTERIM INFORMATION

The November 30, 2014 consolidated balance sheet and the consolidated statements of comprehensive income (loss) and the consolidated statements of cash flows for the three months ended November 30, 2014 and 2013 have been prepared by Pure Cycle Corporation (the “Company”) and have not been audited. The unaudited consolidated financial statements include all adjustments that are, in the opinion of management, necessary to present fairly the financial position, results of operations and cash flows at November 30, 2014, and for all periods presented.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”) have been condensed or omitted. It is suggested that these consolidated financial statements be read in conjunction with the financial statements and notes thereto included in the Company's 2014 Annual Report on Form 10-K (the “2014 Annual Report”) filed with the Securities and Exchange Commission (the “SEC”) on November 14, 2014. The results of operations for interim periods presented are not necessarily indicative of the operating results for the full fiscal year. The August 31, 2014 balance sheet was taken from the Company’s audited financial statements.

Use of Estimates

The preparation of consolidated financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and Cash Equivalents

Cash and cash equivalents include all highly liquid debt instruments with original maturities of three months or less. The Company’s cash equivalents are comprised entirely of money market funds maintained at a high quality financial institution in an account which as of November 30, 2014 exceeded federally insured limits. At various times during the three months ended November 30, 2014, the Company’s main operating account exceeded federally insured limits.

Financial Instruments – Concentration of Credit Risk and Fair Value

Financial instruments that potentially subject the Company to concentrations of credit risk consist primarily of cash and cash equivalents. The Company places its cash equivalents with high quality financial institutions. The Company has historically invested its idle cash primarily in certificates of deposit, money market instruments, commercial paper obligations, corporate bonds and US government treasury obligations. To date, the Company has not experienced significant losses on any of these investments.

The following methods and assumptions were used to estimate the fair value of each class of financial instruments for which it is practicable to estimate that value.

Cash and Cash Equivalents – The Company’s cash and cash equivalents are reported using the values as reported by the financial institution where the funds are held. These securities primarily include balances in the Company’s operating and savings accounts. The carrying amount of cash and cash equivalents approximate fair value.

Trade Accounts Receivable – The Company records accounts receivable net of allowances for uncollectible accounts.

Accounts Payable – The carrying amounts of accounts payable approximate fair value due to the relatively short period to maturity for these instruments.

4

---

PURE CYCLE CORPORATION  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
NOVEMBER 30, 2014

Long-Term Financial Liabilities – The Comprehensive Amendment Agreement No. 1 the “CAA” is comprised of a recorded balance and an off-balance sheet or “contingent” obligation associated with the Company’s acquisition of its “Rangeview Water Supply” (defined in Note 4 below). The amount payable is a fixed amount but is repayable only upon the sale of “Export Water” (defined in Note 4 below). Because of the uncertainty of the sale of Export Water, the Company has determined that the contingent portion of the CAA does not have a determinable fair value. The CAA is described further in Note 4 – Long-Term Obligations and Operating Lease – Participating Interests in Export Water Supply.

The recorded balance of the “Tap Participation Fee” liability (as described below) is its estimated fair value determined by projecting new home development in the Company’s targeted service area over an estimated development period.

Notes Receivable – Related Party – The fair value of the note receivable – related party: Rangeview Metropolitan District (the “District”) is not practical to estimate due to the related party nature of the underlying transaction.

Receivable from HP A&M – In conjunction with HP A&M defaulting on certain promissory notes in fiscal year 2012, the Company has the right to collect from HP A&M any amounts the Company spends to cure the defaulted notes. Accordingly the Company has recorded the entire amount of the HP A&M notes at default as well as expenses incurred to cure the defaults as a receivable from HP A&M less proceeds received from the sale of shares pledged by High Plains A&M as security. Due to the fact that HP A&M was a related party the fair value of the accounts receivable is not practical to determine.

Promissory Notes Payable – During fiscal 2013, the Company began acquiring the defaulted and non-defaulted promissory notes that are payable by HP A&M. The majority of the notes issued by the Company have a five-year term, bear interest at an annual rate of five percent and require semi-annual payments with a straight-line amortization schedule. The carrying value of the notes payable approximate the fair value as the rates are comparable to market rates.

During the three months ended November 30, 2014, the Company borrowed \$4,450,000 from the First National Bank of Las Animas. The note has a 20-year term, requires semi-annual payments, and carries a 5.27% per annum rate for the first five years. After the first five years the interest rate on the note is subject to change (no more often than annually) based on the changes in the First National Bank of Las Animas Ag/ Commercial Real Estate Rate. The Company may pay the note in full at any time without penalty. The carrying value of this note approximates the fair value as the rate is comparable to market rates.

Off-Balance Sheet Instruments – The Company’s off-balance sheet instruments consist entirely of the contingent portion of the CAA. Because repayment of this portion of the CAA is contingent on the sale of Export Water, which is not reasonably estimable, the Company has determined that the contingent portion of the CAA does not have a determinable fair value. See further discussion in Note 4 – Long-Term Obligations and Operating Lease – Participating Interests in Export Water Supply.

#### Tap Participation Fee

This note should be read in conjunction with Note 4 – Long-Term Obligations and Operating Lease below.

Pursuant to the Asset Purchase Agreement dated May 10, 2006 (the “Arkansas River Agreement”), the Company is obligated to pay HP A&M a defined percentage of a defined number of water tap fees the Company receives after the

date of the Arkansas River Agreement. A Tap Participation Fee (“TPF”) is due and payable once the Company has sold a water tap and received the consideration due for such water tap. The Company did not sell any water taps during the three months ended November 30, 2014 or 2013.

The Company imputes interest expense on the unpaid TPF using the effective interest method over an estimated period which is utilized in the valuation of the liability. The Company imputed interest of \$23,800 and \$657,200 during the three months ended November 30, 2014 and 2013, respectively.

Due to HP A&M’s default and the Company’s remedies under the Arkansas River Agreement, the Company has retired certain water taps subject to the TPF and at November 30, 2014, there remain 383 water taps subject to the TPF, compared to the 2,184 water taps subject to the TPF at August 31, 2014.

PURE CYCLE CORPORATION  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
NOVEMBER 30, 2014

### Revenue Recognition

Wholesale Water and Wastewater Fees – Monthly wholesale water usage charges are assessed to the Company’s customers based on actual metered usage each month plus a base monthly service fee. The Company recognizes wholesale water usage revenues upon delivering the water to its customers or its governmental customer’s end-use customers, as applicable. The water revenues recognized by the Company are shown net of royalties to the State of Colorado Board of Land Commissioners (the “Land Board”) and, when applicable, amounts retained by the District. The Company recognized \$491,823 and \$321,573 of metered water usage revenues during the three months ended November 30, 2014 and 2013, respectively

The Company recognizes wastewater treatment fees monthly based on usage. The monthly wastewater treatment fees are shown net of amounts retained by the District. The Company recognized \$11,705 and \$9,835 of wastewater treatment fees during the three months ended November 30, 2014 and 2013, respectively. Costs of delivering water and providing wastewater services to customers are recognized as incurred.

Tap and Construction Fees – In August 2005, the Company entered into the Water Service Agreement (the “County Agreement”) with Arapahoe County (the “County”). In fiscal 2006, the Company began recognizing water tap fees as revenue ratably over the estimated service period upon completion of the “Wholesale Facilities” (defined in Part I, Item 1 of the 2014 Annual Report) constructed to provide service to the County. The Company recognized \$3,600 of water tap fee revenues during each of the three months ended November 30, 2014 and 2013, respectively. The water tap fees to be recognized over this period are net of the royalty payments to the Land Board and amounts paid to third parties pursuant to the CAA as further described in Note 4 – Long-Term Obligations and Operating Lease below.

The Company recognized \$10,400 of “Special Facilities” (defined in Part I, Item 1 of the 2014 Annual Report) funding as revenue during each of the three months ended November 30, 2014 and 2013, respectively. This is the ratable portion of the Special Facilities funding proceeds received from the County pursuant to the County Agreement as more fully described in Note 2 – Summary of Significant Accounting Policies to the 2014 Annual Report.

As of November 30, 2014, and August 31, 2014, the Company has deferred recognition of approximately \$1,215,900 and \$1,232,200, respectively, of water tap and construction fee revenue from the County, which will be recognized as revenue ratably over the estimated useful accounting life of the assets constructed with the construction proceeds as described above.

Agriculture Farming Operations – The Company leases its Arkansas River water and land to area farmers who actively farm the properties. The Company records farm lease income ratably each month based on estimated annual lease income the Company anticipates collecting from its land and water leases. The Company recorded these amounts as receivables, less an estimated allowance for uncollectible accounts. The allowance as of November 30, 2014 and August 31, 2014, was determined by the Company’s specific review of all past due accounts. The Company has recorded allowances for doubtful accounts totaling \$26,300 as of November 30, 2014 and August 31, 2014. As of November 30, 2014 the Company has recorded deferred revenue of \$84,500 on its farm income related to billings for future periods. As of August 31, 2014 the Company has accrued a receivable of \$256,500 of farm income related to future billings. The Company manages the farm lease business as a separate line of business from the wholesale water and wastewater business.

### Royalty and Other Obligations

Revenues from the sale of Export Water are shown net of royalties payable to the Land Board. Revenues from the sale of water on the “Lowry Range” (described in Note 4 – Water and Land Assets in Part II, Item 8 of the 2014 Annual Report) are shown net of the royalties to the Land Board and the amounts retained by the District.

#### Oil and Gas Lease Payments

As further described in Note 2 – Summary of Significant Accounting Policies in Part II, Item 8 of the 2014 Annual Report, on March 10, 2011, the Company entered into a Paid-Up Oil and Gas Lease (the “O&G Lease”) and a Surface Use and Damage Agreement (the “Surface Use Agreement”) with Anadarko E&P Company, L.P. (“Anadarko”), a wholly owned subsidiary of Anadarko Petroleum Company. In December of 2012 the O&G Lease was purchased by a wholly owned subsidiary of ConocoPhillips Company. Pursuant to the O&G Lease, during the year ended August 31, 2011, the Company received a up-front payment of \$1,243,400 for the purpose of exploring for, developing, producing and marketing oil and gas on approximately 634 acres of mineral estate owned by the Company at its “Sky Ranch” property (described in Note 4 – Water Assets to the 2014 Annual Report). The Company began recognizing the up-front payments as income on a straight-line basis over three years (the initial term of the O&G Lease) on March 10, 2011. The Company received an additional payment of \$1,243,400 during February 2014 to extend the O&G Lease an additional two years through February 2016, which will be recognized as income on a straight-line basis over two years (the extension term of the O&G Lease). During the fiscal year ended August 31, 2014, the Company received an up-front payment of \$72,000 for the purpose of exploring for, developing, producing, and marketing oil and gas on 40 acres of mineral estate the Company owns adjacent to the Lowry Range (the “Rangeview Lease”). During the three months ended November 30, 2014 and 2013, the Company recognized \$161,400 and \$106,800, respectively, of income and royalty related to the up-front payments received pursuant to the O&G Lease and the Rangeview Lease.

PURE CYCLE CORPORATION  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
NOVEMBER 30, 2014

As of November 30, 2014 and August 31, 2014, the Company has deferred recognition of \$864,100 and \$1,025,500, respectively of income related to the O&G Lease and the Rangeview Lease, which will be recognized into income ratably through July 2017.

#### Long-Lived Assets

The Company reviews its long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future undiscounted net cash flows expected to be generated by the eventual use of the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets. Assets to be disposed of are reported at the lower of the carrying amount or fair value less costs to sell. Based on the Company's procedures, the Company determined that land and water shares held for sale related to the Arkansas River Assets were impaired as of August 31, 2014. See further discussion in Note 3 below under "Land and Water Shares Held for Sale."

#### Capitalized Costs of Water and Wastewater Systems and Depletion and Depreciation of Water Assets

Costs to construct water and wastewater systems that meet the Company's capitalization criteria are capitalized as incurred, including interest, and depreciated on a straight-line basis over their estimated useful lives of up to thirty years. The Company capitalizes design and construction costs related to construction activities, and it capitalizes certain legal, engineering and permitting costs relating to the adjudication and improvement of its water assets. The Company depletes its groundwater assets that are being utilized on the basis of units produced (i.e. thousands of gallons sold) divided by the total volume of water adjudicated in the water decrees.

#### Share-Based Compensation

The Company maintains a stock option plan for the benefit of its employees and non-employee directors. The Company records share-based compensation costs as expense over the applicable vesting period of the stock award using the straight-line method. The compensation costs to be expensed are measured at the grant date based on the fair value of the award. The Company has adopted the alternative transition method for calculating the tax effects of share-based compensation, which allows for a simplified method of calculating the tax effects of employee share-based compensation. Because the Company has a full valuation allowance on its deferred tax assets, the granting and exercise of stock options has no impact on the income tax provisions. The Company recognized \$68,800 and \$54,800 of share-based compensation expense during the three months ended November 30, 2014 and 2013, respectively.

#### Income Taxes

The Company uses a "more-likely-than-not" threshold for the recognition and de-recognition of tax positions, including any potential interest and penalties relating to tax positions taken by the Company. The Company did not have any significant unrecognized tax benefits as of November 30, 2014.

The Company files income tax returns with the Internal Revenue Service and the State of Colorado. The tax years that remain subject to examination are fiscal 2012 through fiscal 2014. The Company does not believe there will be any material changes in its unrecognized tax positions over the next twelve months.

The Company's policy is to recognize interest and penalties accrued on any unrecognized tax benefits as a component of income tax expense. At November 30, 2014, the Company did not have any accrued interest or penalties associated with any unrecognized tax benefits, nor was any interest expense recognized during the three months ended November 30, 2014 or 2013.

7

---

PURE CYCLE CORPORATION  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
NOVEMBER 30, 2014

Income (Loss) per Common Share

Income (loss) per common share is computed by dividing net income (loss) by the weighted average number of shares outstanding during each period. Common stock options and warrants aggregating 315,100 and 347,600 common share equivalents were outstanding as of November 30, 2014 and 2013, respectively, and have been included in the calculation of net income per common share but excluded from the calculation of loss per common share as their effect is anti-dilutive.

Recently Issued Accounting Pronouncements

The Company continually assesses any new accounting pronouncements to determine their applicability. When it is determined that a new accounting pronouncement affects the Company's financial reporting, the Company undertakes a study to determine the consequence of the change to its consolidated financial statements and assures that there are proper controls in place to ascertain that the Company's consolidated financial statements properly reflect the change. During the current period, there were no new accounting pronouncements issued that will significantly impact the Company's financial reporting.

NOTE 2 – FAIR VALUE MEASUREMENTS

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or most advantageous market. The Company uses a fair value hierarchy that has three levels of inputs, both observable and unobservable, with use of the lowest possible level of input to determine fair value.

Level 1 — Valuations for assets and liabilities traded in active exchange markets, such as the New York Stock Exchange. The Company had one of these instruments as of November 30, 2014 and none of these instruments as of August 31, 2014.

Level 2 — Valuations for assets and liabilities obtained from readily available pricing sources via independent providers for market transactions involving similar assets or liabilities. The Company had no Level 2 assets or liabilities as of November 30, 2014 or August 31, 2014.

Level 3 — Valuations for assets and liabilities that are derived from other valuation methodologies, including discounted cash flow models and similar techniques, and not based on market exchange, dealer, or broker traded transactions. Level 3 valuations incorporate certain assumptions and projections in determining the fair value assigned to such assets or liabilities. The Company had one Level 3 liability as of November 30, 2014 and August 31, 2014, the TPF liability, which is described in greater detail in Note 4 – Long-Term Obligations and Operating Lease below.

The Company maintains policies and procedures to value instruments using the best and most relevant data available.

The Company's non-financial assets measured at fair value on a non-recurring basis consist entirely of its investments in water and water systems and other long-lived assets. See Note 3 – Investment in Water, Water Systems, Land and Improvements below.

Level 3 Liability – Tap Participation Fee. The Company's TPF liability is the Company's only financial liability measured on a non-recurring basis. As further described in Note 4 – Long-Term Obligations and Operating Lease, the

TPF liability is valued by projecting new home development in the Company's targeted service area over an estimated development period.

The following table provides information on the assets and liabilities measured at fair value on a recurring basis as of November 30, 2014:

8

## PURE CYCLE CORPORATION

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOVEMBER 30, 2014

	Fair Value	Cost / Other Value	Fair Value Measurement Using:			Total Unrealized Gain
			Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
Tap Participation Fee liability	\$1,731,800	\$ 1,731,800	\$-	\$-	\$ 1,731,800	\$-

Although not required, the Company deems the following table, which presents the changes in the TPF for the three months ended November 30, 2014, to be helpful to the users of its consolidated financial statements:

	Fair Value Measurement using Significant Unobservable Inputs (Level 3)		
	Gross Estimated Tap Participation Fee Liability	Tap Participation Fee Reported Liability	Discount - to be imputed as interest expense in future periods
Balance at August 31, 2014	\$12,038,300	\$ 7,935,300	\$ 4,103,000
Total gains and losses (realized and unrealized):	-	-	-
Imputed interest recorded as "Other Expense"	-	23,800	(23,800 )
Purchases, sales, issuances, payments, and reductions resulting from foreclosures	(10,013,900)	(6,227,300 )	(3,786,600 )
Transfers in and/or out of Level 3	-	-	-
Balance at November 30, 2014	\$2,024,400	\$ 1,731,800	\$ 292,600

## NOTE 3 – INVESTMENTS IN WATER, WATER SYSTEMS, LAND AND IMPROVEMENTS

The Company's water rights and current water and wastewater service agreements are more fully described in Note 4 – Water and Land Assets in Part II, Item 8 of the 2014 Annual Report. There have been no significant changes to the Company's water rights or water and wastewater service agreements during the three months ended November 30, 2014.

The Company's water, water systems, land and improvements consist of the following costs and accumulated depreciation and depletion at November 30, 2014 and August 31, 2014:

	November 30, 2014		August 31, 2014	
	Costs	Accumulated Depreciation and Depletion	Costs	Accumulated Depreciation and Depletion
Arkansas River Valley assets	\$67,746,400	\$ (1,488,600 )	\$67,746,400	\$ (1,488,600 )
Rangeview water supply	14,444,600	(8,500 )	14,444,600	(8,400 )

Edgar Filing: PURE CYCLE CORP - Form 10-Q

Sky Ranch water rights and other costs	6,548,000	(117,800 )	6,004,000	(93,000 )

Rangeview water system	1,148,200	(79,300 )	1,148,200	(77,900 )
Water supply – other	1,657,600	(116,800 )	1,050,200	(90,900 )
Totals	94,444,700	(2,543,700 )	93,293,300	(2,469,400 )
Net investments in water and water systems	\$91,901,000		\$90,823,900	

Capitalized terms in this section not defined herein are defined in Note 4 – Water and Land Assets to the 2014 Annual Report.

PURE CYCLE CORPORATION  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
NOVEMBER 30, 2014

Depletion and Depreciation. The Company recorded depletion charges of \$2,500 and \$100 during the three month periods ended November 30, 2014 and 2013, respectively. During the three months ended November 30, 2014 this related to the Rangeview and Sky Ranch Water supplies (defined below) and during the three months ended November 30, 2013 this related entirely to the Rangeview Water Supply. No depletion is taken against the Arkansas River (defined below) because the water located at this location is not yet being utilized for municipal purpose as of November 30, 2014.

The Company recorded \$76,400 and \$48,400 of depreciation expense during the three months ended November 30, 2014 and 2013, respectively.

Land and Water Shares Held for Sale. During fiscal year end 2012, management decided to sell certain farms in order to have the cash flow sufficient to acquire the notes defaulted upon by HP A&M and to meet the future obligations on the promissory notes the Company intended to issue as consideration to purchase the notes owed by HP A&M. Management planned to sell approximately 1,603 acres of land along with 3,397 FLCC shares associated with this land.

Through August 31, 2014, the Company completed sales of approximately 1,886 acres of land and 2,982 FLCC shares associated with the land; and, in November 2014, completed sales of approximately 299 acres of land along with 239 FLCC shares associated with the land. Management believes that the November 2014 sale completed the sales cycle related to the land held for sale.

In addition, management identified an additional 640 acres of land and 512 FLCC shares associated with the land as held for sale in order to have sufficient cash available to continue to meet future obligations on the promissory notes the Company issued to purchase the defaulted notes owed by HP A&M and to continue to fund water system expansions. The net book value of the assets identified as held for sale was \$1.9 million prior to designation as held for sale. The anticipated sales price for these assets is \$1.5 million based on recent sales transactions, which required the Company to record an impairment of approximately \$400,000 in fiscal 2014.

#### NOTE 4 – LONG-TERM OBLIGATIONS AND OPERATING LEASE

The Participating Interests in Export Water Supply and the TPF payable to HP A&M are obligations of the Company that have no scheduled maturity dates. Therefore, these liabilities are not disclosed in tabular format, but they are described below.

##### Participating Interests in Export Water Supply

The Company acquired its Rangeview Water Supply through various amended agreements entered into in the early 1990's. The acquisition was consummated with the signing of the CAA in 1996. Upon entering into the CAA, the Company recorded an initial liability of \$11.1 million, which represented the cash the Company received from the participating interest holders that was used to purchase the Company's Export Water (described in greater detail in Note 4 – Water and Land Assets to the 2014 Annual Report). The Company agreed to remit a total of \$31.8 million of proceeds received from the sale of Export Water to the participating interest holders in return for their initial \$11.1 million investments. The obligation for the \$11.1 million was recorded as debt, and the remaining \$20.7 million contingent liability was not reflected on the Company's balance sheet because the obligation to pay this is contingent on the sale of Export Water, the amounts and timing of which are not reasonably determinable.

The CAA obligation is non-interest bearing, and if the Export Water is not sold, the parties to the CAA have no recourse against the Company. If the Company does not sell the Export Water, the holders of the Series B Preferred Stock are also not entitled to payment of any dividend and have no contractual recourse against the Company.

As the proceeds from the sale of Export Water are received and the amounts are remitted to the external CAA holders, the Company allocates a ratable percentage of this payment to the principal portion (the Participating Interests in Export Water Supply liability account) with the balance of the payment being charged to the contingent obligation portion. Because the original recorded liability, which was \$11.1 million, was 35% of the original total liability of \$31.8 million, approximately 35% of each payment remitted to the CAA holders is allocated to the recorded liability account. The remaining portion of each payment, or approximately 65%, is allocated to the contingent obligation, which is recorded on a net revenue basis.

PURE CYCLE CORPORATION  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
NOVEMBER 30, 2014

From time to time the Company repurchased various portions of the CAA obligations in priority. In July 2014, the Land Board relinquished its approximately \$2.4 million of CAA interests to the Company as part of the settlement of the 2011 lawsuit filed by the Company and the District against the Land Board. As a result, during the fourth quarter of the fiscal year ended August 31, 2014, the Company recorded a gain on the extinguishment of participating interests of the CAA of approximately \$832,100. The Company now has the right to retain an additional \$2.4 million of the initial \$31.8 million of proceeds from the sale of Export Water. The Company did not make any CAA acquisitions during the three months ended November 30, 2014 or 2013.

As a result of the acquisitions, the relinquishment, and due to the sale of Export Water, as detailed in the table below, the remaining potential third party obligation at November 30, 2014, is approximately \$1 million:

	Export Water Proceeds Received	Initial Export Water Proceeds to Pure Cycle	Total Potential Third Party Obligation	Participating Interests Liability	Contingency
Original balances	\$ –	\$ 218,500	\$ 31,807,700	\$ 11,090,600	\$ 20,717,100
Activity from inception until August 31, 2014:					
Acquisitions	–	28,077,500	(28,077,500 )	(9,790,000 )	(18,287,500 )
Relinquishment		2,386,400	(2,386,400 )	(832,100 )	(1,554,300 )
Option payments - Sky Ranch and The Hills at Sky Ranch	110,400	(42,300 )	(68,100 )	(23,800 )	(44,300 )
Arapahoe County tap fees *	533,000	(373,100 )	(159,900 )	(55,800 )	(104,100 )
Export Water sale payments	360,900	(262,200 )	(98,700 )	(34,300 )	(64,400 )
Balance at August 31, 2014	1,004,300	30,004,800	1,017,100	354,600	662,500
Fiscal 2015 activity:					
Export Water sale payments	154,500	(136,100 )	(18,400 )	(6,400 )	(12,000 )
Balance at November 30, 2014	\$ 1,158,800	\$ 29,868,700	\$ 998,700	\$ 348,200	\$ 650,500

\* The Arapahoe County tap fees are less \$34,522 in royalties paid to the Land Board.

The CAA includes contractually established priorities which call for payments to CAA holders in order of their priority. This means the first payees receive their full payment before the next priority level receives any payment and so on until full repayment. The Company will receive approximately \$6 million of the first priority payout (the remaining entire first priority payout totals approximately \$6.8 million as of November 30, 2014).

#### Arkansas River Agreement Obligations

The \$1.7 million TPF liability at November 30, 2014, represents the estimated discounted fair value of the Company's obligation to pay HP A&M 20% of the Company's gross proceeds, or the equivalent thereof, from the sale of the next 383 water taps sold by the Company.

Initially the obligation was to pay 10% of the Company's gross proceeds, or the equivalent thereof, from the sale of 40,000 water taps sold after the date of the Arkansas River Agreement. The 40,000 water taps were reduced to 383 water taps as a result of (i) sales of Arkansas River Valley land in 2006 and 2009, (ii) the sale of unutilized water rights owned by the Company in the Arkansas River Valley in 2007, (iii) the election made by HP A&M, effective September 1, 2011, pursuant to the Arkansas River Agreement, to increase the TPF percentage from 10% to 20%, and

to take a corresponding 50% reduction in the number of taps subject to the TPF, (iv) the allocation of 26.9% of the Net Revenues (defined as all lease and related income received from the farms less employee expenses, direct expenses for managing the leases and a reasonable overhead allocation) received by HP A&M from management of the farm leasing operations from September 1, 2011 to August 3, 2012 prior to termination of the Property Management Agreement, and (v) the reduction of 19,044 taps as the result of foreclosures on certain farms pursuant to the remedies outlined in the Arkansas River Agreement (2,233 in fiscal 2013, 15,010 in fiscal 2014, and 1,801 to date in fiscal 2015).

PURE CYCLE CORPORATION  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
NOVEMBER 30, 2014

The fair value of the TPF liability is an estimate prepared by management of the Company. The fair value of the liability is based on discounted estimated cash flows subject to the TPF calculated by projecting future annual water tap sales for the number of taps subject to the TPF at the date of valuation. Future cash flows from water tap sales are estimated by utilizing the following historical information, where available:

- New homes constructed in the area known as the 11-county “Front Range” of Colorado from the 1980’s through the valuation date. The Company utilized data for this length of time to provide development information over many economic cycles because the Company anticipates development in its targeted service area to encompass many economic cycles over the development period.
- New home construction patterns for large master planned housing developments along the Front Range. The Company utilized this information because these developments are deemed comparable to projects anticipated to be constructed in the Company’s targeted service area (i.e. these master planned communities were located in predominately undeveloped areas on the outskirts of the Front Range).
- Population growth rates for Colorado and the Front Range. Population growth rates were utilized to predict anticipated growth along the Front Range, which was used to predict an estimated number of new homes necessary to house the increased population.
- The Consumer Price Index since the 1980’s, which was utilized to project estimated future water tap fees.

Utilizing this historical information, the Company projected an estimated new home development pattern in its targeted service area sufficient to cover the sale of the water taps subject to the TPF at the date of the revaluation, November 30, 2014. The Company revalued the TPF payable as of November 30, 2014 and August 31, 2014 due to the reduction of taps subject to the TPF as a result of the exercise of remedies under the Arkansas River Agreement. The estimated proceeds generated from the sale of those water taps resulted in estimated payments to HP A&M over the life of the projected development period of \$2 million, which is a decrease of \$100.7 million from the previous valuation completed at August 31, 2013 (\$102.7 million). The estimated payments to HP A&M are then discounted to the current valuation date and the difference between the amount reflected on the Company’s balance sheet at the valuation date and the total estimated payments is imputed as interest expense over the estimated development time using the effective interest method. The implied interest rate for the most recent valuation was 3.4%.

Actual new home development in the Company’s service area and actual future tap fees inevitably will vary significantly from the Company’s estimates, which could have a material impact on the Company’s consolidated financial statements. An important component in the Company’s estimate of the value of the TPF, which is based on historical trends, is that the Company reasonably expects water tap fees to continue to increase in the coming years. Tap fees are market based and the continued increase in tap fees reflects, among other things, the increasing costs to acquire and develop new water supplies. Tap fees thus are partially indicative of the increasing value of the Company’s water assets. The Company continues to assess the value of the TPF liability and updates its valuation analysis whenever events or circumstances indicate the assumptions used to estimate the value of the liability have changed materially. The difference between the net present value and the estimated realizable value will be imputed as interest expense using the effective interest method over the estimated development period utilized in the valuation of the TPF. Through November 30, 2014, \$27.5 million of interest has been imputed since the acquisition date, recorded using the effective interest method.

The Company's agreement with HP A&M provides for a reduction of the number of water taps subject to the TPF payable to HP A&M in the event the farms or water rights are subject to foreclosure proceedings or other risks of loss. During fiscal year 2013, four of the farms and one FLCC certificate representing water rights only, collectively including 1,216 FLCC shares, were foreclosed resulting in a reduction of the number of taps subject to the TPF by 2,233 taps (approximately \$11.7 million of TPF). During fiscal year 2014, an additional 31 farms and two FLCC certificate representing water rights only, collectively including 8,174 FLCC shares, were foreclosed resulting in a reduction of the number of taps subject to the TPF by an additional 15,010 taps (approximately \$53.3 million of the TPF), leaving 2,184 taps (approximately \$7.9 million of TPF), subject to the TPF. During the fiscal quarter ended November 30, 2014, an additional two farms and 981 FLCC shares were foreclosed resulting in a reduction of the number of taps subject to the TPF by an additional 1,801 taps (approximately \$6.2 million of the TPF), leaving 383 taps (approximately \$1.7 million of TPF), subject to the TPF. The Company recorded the decreases in the TPF payable as an equity transaction due to the related party nature of the original transaction.

PURE CYCLE CORPORATION  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
NOVEMBER 30, 2014

Promissory Notes Payable – Approximately 60 of the 80 properties the Company originally acquired from HP A&M were subject to outstanding promissory notes payable to third parties that were secured by deeds of trust on the Company’s properties and water rights, as well as mineral interests. HP A&M has now defaulted on all of the promissory notes and informed the Company that it does not intend to pay any of the amounts owed. HP A&M owed approximately \$9.6 million of principal and accrued interest as of September 1, 2012. These promissory notes were secured by approximately 14,000 acres of land and 16,882 FLCC shares representing water rights owned by the Company.

On July 2, 2012, the Company formally notified HP A&M that its failure to pay the promissory notes constituted an Event of Default under the Seller Pledge Agreement (as defined below) and a default of a material covenant under the Arkansas River Agreement. The Company informed HP A&M that unless such defaults were cured within thirty days, the Property Management Agreement would be terminated and the Company would proceed to exercise certain rights and remedies under the Arkansas River Agreement, the Seller Pledge Agreement, and the Property Management Agreement to protect its assets. The Company’s remedies at law and under the Arkansas River Agreement and related agreements include, but are not limited to, the right to (i) foreclose on 1,500,000 shares of Pure Cycle common stock issued to HP A&M and the proceeds therefrom (the “Pledged Shares”) which were pledged by HP A&M pursuant to a pledge agreement (the “Seller Pledge Agreement”) to secure the payment and performance by HP A&M of the promissory notes described above; (ii) reduce the Tap Participation Fee; (iii) terminate the Property Management Agreement; and (iv) recover damages caused by the defaults, including certain costs and expenses, including attorneys’ fees.

On August 3, 2012, the Company formally terminated the Property Management Agreement. On September 27, 2012, the Pledged Shares were sold at public auction in a foreclosure sale for \$2.35 per share, yielding approximately \$3.42 million of proceeds to the Company (net of fees of \$110,000). Pursuant to the Arkansas River Agreement, the Company is reducing the Tap Participation Fee and is entitled to recover damages caused by the defaults, including certain costs and expenses, including attorney fees. The Company is currently pursuing its remedies and will continue to pursue such remedies over the next 12 months.

To protect its land and water interests, during the fiscal years ended August 31, 2014 and 2013, the Company purchased approximately \$9.4 million of the \$9.6 million notes payable by HP A&M. The remaining note was purchased by an entity controlled by the majority owner of HP A&M. HP A&M continues to be liable for making the required payments on the notes, and the Company is pursuing remedies to recover the costs and expenses, including attorneys’ fees, incurred by the Company in protecting the rights and title to the land and water rights securing the notes payable by HP A&M, including the costs incurred in purchasing the notes defaulted on by HP A&M.

During the three months ended November 30, 2014, the Company borrowed \$4,450,000 from the First National Bank of Las Animas. Proceeds from the loan were used to consolidate mortgage debt and for working capital. The note has a 20-year term commencing October 27, 2014, requires semi-annual payments, and carries a 5.27% per annum rate for the first five years. The note is secured by a total of 3,596.8 acres, 3,282 FLCC shares, and an assignment of two HP A&M notes and deeds of trust with balances due of approximately \$843,400, which are secured by 1,087.4 FLCC shares. After the first five years the interest rate on the note is subject to change (no more often than annually) based on the changes in the First National Bank of Las Animas Ag/Real Estate Rate. The Company may pay the note in full at any time without penalty.

The amount owed on the outstanding notes was approximately \$5.8 million, including accrued interest of \$60,800 and approximately \$5 million, including accrued interest of \$80,800 at November 30, 2014 and August 31, 2014,

respectively.

13

---

PURE CYCLE CORPORATION  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
NOVEMBER 30, 2014

## Future Maturities

Mortgage notes payable, mainly bear interest at 5%, 5 year term; one note in amount of \$4.45 million had 20 year term	5,854,800
Less: current portion	(848,300 )
Total long-term mortgage payable	\$5,006,500

## Future Maturities

2016	511,200
2017	624,500
2018	188,300
2019	157,100
2020	169,800
Post 2020	3,355,600
Total	\$5,006,500

## Operating Lease

Effective January 2015, the Company entered into an operating lease for approximately 2,500 square feet of office space. The lease has a one-year term with payments of \$3,000 per month.

## NOTE 5 – SHAREHOLDERS’ EQUITY

The Company maintains the 2014 Incentive Plan (the “2014 Incentive Plan”), which was approved by shareholders in January 2014 and became effective April 12, 2014. Executives, eligible employees, consultants and non-employee directors are eligible to receive options and stock grants pursuant to the 2014 Incentive Plan. Pursuant to the 2014 Incentive Plan, options to purchase shares of stock and restricted stock awards can be granted with exercise prices, vesting conditions and other performance criteria determined by the Compensation Committee of the Board. The Company has reserved 1.6 million shares of common stock for issuance under the 2014 Incentive Plan. No awards have been made under the 2014 Incentive Plan. Prior to the effective date of the 2014 Incentive Plan, the Company granted stock awards to eligible participants under its 2004 Incentive Plan (the “2004 Equity Plan”), which expired April 11, 2014. No additional awards may be granted pursuant to the 2004 Equity Plan; however, awards outstanding as of April 11, 2014, will continue to vest and expire and may be exercised in accordance with the terms of the 2004 Equity Plan.

The following table summarizes the stock option activity for the 2004 Equity Plan for the three months ended November 30, 2014:

	Number of Options	Weighted- Average Exercise Price	Weighted- Average Remaining Contractual Term	Approximate Aggregate Intrinsic Value
Oustanding at beginning of period	315,000	\$ 5.76		
Granted	-	-		

Exercised	-	-		
Forfeited or expired	-	-		
Outstanding at November 30, 2014	315,000	\$ 5.14	6.49	\$ 42,575
Options exercisable at November 30, 2014	215,833	\$ 4.94	5.40	\$ 74,315

The following table summarizes the activity and value of non-vested options under the 2004 Equity Plan as of and for the three months ended November 30, 2014:

	Number of Options	Weighted- Average Grant Date Fair Value
Non-vested options outstanding at beginning of period	99,167	\$ 4.85
Granted	-	-
Vested	-	-
Forfeited	-	-
Non-vested options outstanding at November 30, 2014	99,167	\$ 4.85

All non-vested options are expected to vest. The total fair value of options vested was nil for each of the three months ended November 30, 2014 and November 30, 2013.

Stock-based compensation expense was \$68,800 and \$54,800 for the three months ended November 30, 2014 and 2013, respectively.

At November 30, 2014, the Company had unrecognized expenses relating to non-vested options that are expected to vest totaling \$348,900 which have a weighted average life of less than three years. The Company has not recorded any excess tax benefits to additional paid-in capital.

PURE CYCLE CORPORATION  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
NOVEMBER 30, 2014

NOTE 6 – RELATED PARTY TRANSACTIONS

On December 16, 2009, the Company entered into a Participation Agreement with the District, whereby the Company agreed to provide funding to the District in connection with the District's membership in the South Metro Water Supply Authority ("SMWSA"). The Company provided \$600 and \$55,000 of funding to the District pursuant to the Participation Agreement during the three months ended November 30, 2014 and 2013, respectively. These amounts were expensed as general and administrative expenses at the time of funding. On November 10, 2014, the Company entered into a WISE Financing Agreement with the District, whereby the Company agreed to fund the District's cost of participating in a regional water supply project known as the WISE partnership ("WISE"). Pursuant to the WISE Financing Agreement, the Company made payments of \$535,200 during the three months ended November 30, 2014, to purchase certain rights to use existing water transmission and related infrastructure acquired by the WISE. The Company estimates that it will be required to invest approximately \$1.2 million per year over the next five years for additional payments for the water transmission line and additional facilities, water and related assets for WISE.

In 1995, the Company extended a loan to the District, a related party. The loan provided for borrowings of up to \$250,000, is unsecured, bears interest based on the prevailing prime rate plus 2% (5.25% at November 30, 2014) and matured on December 31, 2013. The Company extended the maturity date of the loan to December 31, 2015. The \$596,000 balance of the note receivable at November 30, 2014, includes borrowings of \$254,300 and accrued interest of \$341,700. Beginning January 2014 the District and the Company entered into a funding agreement which allows the Company to continue to provide funding to the District for day-to-day operations and accrue the funding into a note which bears interest at a rate of 8% and shall remain in full force and effect for so long as the 2014 Amended and Restated Lease Agreement remains in effect.

NOTE 7 – SIGNIFICANT CUSTOMERS

The Company sells wholesale water and wastewater services to the District pursuant to the Rangeview Water Agreements (defined in Note 4 – Water and Land Assets to the 2014 Annual Report). Sales to the District accounted for 9% and 11% of the Company's total water and wastewater revenues for the three months ended November 30, 2014 and 2013, respectively. The District has one significant customer. Pursuant to the Rangeview Water Agreements the Company is providing water and wastewater services to this customer on behalf of the District. The District's significant customer accounted for 7% and 9% of the Company's total water and wastewater revenues for the three months ended November 30, 2014 and 2013, respectively.

Revenues related to the provision of water for the oil and gas industry to one customer accounted for 88% and 87% of the Company's water and wastewater revenues for the three months ended November 30, 2014 and 2013, respectively.

The Company had accounts receivable from the District which accounted for 6% and 5% of the Company's trade receivables balances at November 30, 2014 and August 31, 2014, respectively. Accounts receivable from the District's largest customer accounted for 6% and 4% of the Company's trade receivables as of November 30, 2014 and August 31, 2014, respectively. Accounts receivable from industrial water sales accounted for 28% and 75% of the Company's trade receivable balances at November 30, 2014 and August 31, 2014.

NOTE 8 – ACCRUED LIABILITIES

At November 30, 2014, the Company had accrued liabilities of \$197,300, of which \$139,800 was for estimated property taxes, \$2,000 was for farm lease prepayments, and \$55,500 related to operating payables.

At August 31, 2014, the Company had accrued liabilities of \$257,900, of which \$99,700 was for estimated property taxes, \$59,500 was for professional fees, \$22,400 was for farm lease prepayments, and the remaining \$76,300 related to operating payables.

**NOTE 9 – LITIGATION LOSS CONTINGENCIES**

The Company is involved in various claims, litigation and other legal proceedings that arise in the ordinary course of its business. The Company records an accrual for a loss contingency when its occurrence is probable and damages can be reasonably estimated based on the anticipated most likely outcome or the minimum amount within a range of possible outcomes. The Company makes such estimates based on information known about the claims and experience in contesting, litigating and settling similar claims. Disclosures are also provided for reasonably possible losses that could have a material effect on the Company's financial position, results of operations or cash flows.

PURE CYCLE CORPORATION  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
NOVEMBER 30, 2014

On September 29, 2014, the Company entered into a Settlement Agreement and Release with HP A&M (“Settlement Agreement”). The Settlement Agreement settles the lawsuit filed by HP A&M against the Company in the District Court, City and County of Denver, Colorado on February 27, 2012, alleging breaches of representations and warranties made in connection with the Arkansas River Agreement. Pursuant to the Settlement Agreement and a joint stipulated motion to dismiss filed with the court following execution of the Settlement Agreement, HP A&M released all claims asserted against the Company in its 2012 lawsuit, and the lawsuit was dismissed with prejudice.

The Company filed a lawsuit against HP A&M in the District Court, City and County of Denver, State of Colorado on April 4, 2014, alleging HP A&M breached the Arkansas River Agreement, Seller Pledge Agreement and Property Management Agreement, among other ways, by failing to (i) pay, perform and discharge its obligations when due or otherwise pursuant to the Excluded Indebtedness, (ii) cure defaults under the Notes and Deeds of Trust applicable to the Excluded Indebtedness, and (iii) use Net Revenue, pursuant to the Property Management Agreement, to pay Excluded Indebtedness. As a result of these breaches, the Company is claiming damages to be proven at trial, which are estimated as of the date of the lawsuit to be not less than \$8 million. HP A&M filed its answer on May 30, 2014, asserting affirmative defenses and counterclaims, including, among others, breach of contract and breach of an implied covenant of good faith and fair dealing and requesting damages in an amount to be proven at trial. This lawsuit involves complex legal issues and uncertainties, and the Company has not recorded accruals for losses related to the lawsuit because losses are not probable or reasonably estimable and reasonably possible losses could not be estimated as of November 30, 2014.

During the three months ended November 30, 2014 and the fiscal years ended August 31, 2014 and 2013, foreclosure proceedings were commenced against 40 of the properties acquired by the Company from HP A&M that are subject to promissory notes defaulted upon by HP A&M and secured by deeds of trust on the Company’s land and water rights. The proceedings were filed on various dates from January 9, 2013 through March 12, 2014, with the Public Trustees of Bent, Otero and Prowers Counties in Colorado and involve claims against HP A&M for its failure to pay the notes. In addition one proceeding was commenced in 2013 and a second proceeding was commenced on May 5, 2014, pursuant to the Colorado Uniform Commercial Code, in each case to foreclose on one FLCC certificate representing water rights only. As of the date of this filing, PCY Holdings, LLC (“PCY Holdings”), the Company’s wholly owned subsidiary has been the successful bidder in foreclosure sales of 38 of the properties and water rights acquired by the Company from HP A&M. The Company terminated one foreclosure proceeding by curing HP A&M’s default. One of the Company’s properties remains subject to foreclosure proceedings. This property represents less than 3% of the Company’s FLLC shares and approximately 2% of the Company’s Arkansas River land acquired from HP A&M.

Foreclosure sales that were conducted on three of the Company’s farm properties on August 28, 2013, and on a fourth property on September 4, 2013 are currently the subject of litigation. PCY Holdings, was the successful bidder in the foreclosure sales. On September 16, 2013, HP A&M filed a complaint against PCY Holdings and the Public Trustee for the County of Bent, Colorado, in the District Court, County of Bent, Colorado seeking (i) a declaratory judgment that it is entitled to redeem the four properties from the foreclosure sales by paying the amount of the outstanding debt, plus fees, which is the amount PCY Holdings bid in the sales, and (ii) preliminary and permanent injunctions against the Public Trustee preventing the Public Trustee from issuing confirmation deeds for the foreclosure sales to PCY Holdings or anyone other than HP A&M. On November 20, 2013 the complaint was dismissed with prejudice, and judgment was entered in favor of the Public Trustee and PCY Holdings. Responses to motions filed by both PCY Holdings and HP A&M regarding attorney’s fees awards have been stayed pending the outcome of the appeal discussed below.

On January 3, 2014 HP A&M filed a notice of appeal of the judgment with the Colorado Court of Appeals. If HP A&M wins on appeal, the Company could lose these four properties, subject to its remedies under the Arkansas River Agreement. The Company intends to vigorously defend any appeal of this ruling and to pursue the remedies against HP A&M for the defaults. The timing and outcome of the appeal is uncertain, and the Company has not recorded accruals for losses related to the appeal because losses are not probable or reasonably estimable and reasonably possible losses could not be estimated at this time.

NOTE 10 – SEGMENT INFORMATION

The Company operates primarily in two lines of business: (i) the wholesale water and wastewater business; and (ii) the agricultural farming business. The Company provides wholesale water and wastewater services to customers using water rights owned by the Company and develops infrastructure to divert, treat and distribute that water and collect, treat and reuse wastewater. The Company's agricultural business consists of the Company leasing its Arkansas River Valley land and water to area farmers under cash leases or in certain cases crop share leases. The following tables show information by operating segment for the three months ended November 30, 2014 and 2013:

PURE CYCLE CORPORATION

NOTE 11 – SUBSEQUENT EVENT

Subsequent to the Company's quarter year-end, the Company consented to the waiver of all contingencies set forth in the Amended and Restated WISE Partnership – Water Delivery Agreement, dated December 31, 2013 (the "WISE Partnership Agreement"), among the City and County of Denver acting through its Board of Water Commissioners ("Denver Water"), the City of Aurora acting by and through its Utility Enterprise ("Aurora Water"), and the South Metro WISE Authority ("SMWA"). The SMWA was formed by the District and nine other governmental or quasi-governmental water providers pursuant to the South Metro WISE Authority Formation and Organizational Intergovernmental Agreement, dated December 31, 2013 (the "SM IGA"), to enable the members of SMWA to participate in the regional water supply project known as the WISE created by the WISE Partnership Agreement. The SM IGA specifies each member's pro rata share of WISE and the members' rights and obligations with respect to WISE. The WISE Partnership Agreement provides for the purchase of certain infrastructure (pipelines, water storage facilities, water treatment facilities, and other appurtenant facilities) to deliver water to and among the ten members of

the SMWA, Denver Water and Aurora Water. Certain infrastructure has been constructed and other infrastructure will be constructed over the next several years.

By consenting to the waiver of the contingencies set forth in the WISE Partnership Agreement, pursuant to the terms of the Rangeview/Pure Cycle WISE Project Financing Agreement (the "WISE Financing Agreement") between the Company and the District, the Company has an agreement to fund the District's participation in WISE effective as of December 22, 2014. The Company's cost of funding the District's purchase of its share of existing infrastructure and future infrastructure for WISE is projected to be approximately \$7 million over the next 5 years, which includes funding of approximately \$1.2 million annually over the next 5 years and funding of the District's obligations to repay approximately \$1.4 million borrowed by the District from certain SMWA members to finance the purchase of infrastructure for WISE pursuant to an agreement dated November 19, 2014 (the "Rangeview Funding Agreement"). The \$1.4 million is repayable in equal annual installments over the next three years and accrues interest at the rate of 3%.

See the Company's Current Report on Form 8-K filed with the SEC on December 30, 2014 for additional information.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

OVERVIEW

The discussion and analysis below includes certain forward-looking statements that are subject to risks, uncertainties and other factors, as described in "Risk Factors" in our Annual Report on Form 10-K, that could cause our actual growth, results of operations, performance, financial position and business prospects and opportunities for this fiscal year and periods that follow to differ materially from those expressed in, or implied by those forward-looking statements. Readers are cautioned that forward-looking statements contained in this Form 10-Q should be read in conjunction with our disclosure under the heading "Disclosure Regarding Forward-Looking Statements" below.

The following Management's Discussion and Analysis ("MD&A") is intended to help the reader understand our results of operations and financial condition and should be read in conjunction with the accompanying consolidated financial statements and the notes thereto and the financial statements and the notes thereto contained in our 2014 Annual Report on Form 10-K (the "2014 Annual Report").

The following section focuses on the key indicators reviewed by management in evaluating our financial condition and operating performance, including the following:

- Revenue generated from our water and wastewater services and farming operations;
- Expenses associated with developing our water and land assets; and
- Cash available to continue development of our water rights and service agreements.

Our MD&A section includes the following items:

Our Business – a general description of our business, our services and our business strategy.

Results of Operations – an analysis of our results of operations for the periods presented in our consolidated financial statements.

Liquidity, Capital Resources and Financial Position – an analysis of our cash position and cash flows, as well as a discussion of our financing arrangements.

Critical Accounting Policies and Estimates – a discussion of our critical accounting policies that require critical judgments, assumptions and estimates.

Forward Looking Statements – an identification of forward looking statements and a description of risks that could cause actual results to differ materially from those discussed in forward looking statements.

Our Business

Pure Cycle Corporation ("we", "us" or "our") is an investor-owned Colorado corporation that (i) provides wholesale water and wastewater services to end-use customers of governmental entities and to commercial and industrial customers and (ii) manages land and water assets for farming.

Wholesale Water and Wastewater

These services include water production, storage, treatment, bulk transmission to retail distribution systems, wastewater collection and treatment, irrigation water treatment and transmission, construction management, billing and collection and emergency response.

We are a vertically integrated wholesale water and wastewater provider, which means we own or control substantially all assets necessary to provide wholesale water and wastewater services to our customers. This includes owning (i) water rights which we use to provide domestic, irrigation, and industrial water to our wholesale customers (we own surface water, groundwater, reclaimed water rights and storage rights), (ii) infrastructure (such as wells, diversion structures, pipelines, reservoirs and treatment facilities) required to withdraw, treat, store and deliver water, (iii) infrastructure required to collect, treat, store and reuse wastewater, and (iv) infrastructure required to treat and deliver reclaimed water for irrigation use.

We currently provide wholesale water and wastewater service predominately to two local governmental entity customers. Our largest wholesale domestic customer is the Rangeview Metropolitan District (the "District"). We provide service to the District and its end-use customers pursuant to the Rangeview Water Agreements between us and the District for the provision of wholesale water service to the District for use in the District's service area. Through the District, we serve 258 Single Family Equivalent ("SFE") (as defined below) water connections and 157 SFE wastewater connections located in southeastern metropolitan Denver. One SFE is a customer – whether residential, commercial or industrial – that imparts a demand on our water or wastewater systems similar to the demand of a family of four persons living in a single family house on a standard sized lot. One SFE is assumed to have a water demand of approximately 0.4 acre feet per year and to contribute wastewater flows of approximately 300 gallons per day. In the past two years, we have been providing an increasing amount of water to industrial customers in our service area and adjacent to our service areas to the oil and gas industry for the purpose of hydraulic fracturing. Oil and gas operators have leased more than 135,000 acres within and adjacent to our service areas for the purpose of exploring oil and gas interests in the Niobrara and other formations and this activity has led to increased water demands.

We plan to utilize our significant water assets along with our adjudicated reservoir sites to provide wholesale water and wastewater services to local governmental entities which in turn will provide residential/commercial water and wastewater services to communities along the eastern slope of Colorado in the area generally referred to as the Front Range. Principally we target the I-70 corridor, which is located east of downtown Denver and south of the Denver International Airport. This area is predominately undeveloped and is expected to experience substantial growth over the next 30 years. We also plan to continue to provide water service to commercial and industrial customers.

#### Agricultural Operations and Leasing

Based on total acreage, approximately 85% of our farm operations are managed through cash lease arrangements with local area farmers whereby we charge a fixed fee to lease our land and the water for agricultural purposes to tenant farmers. Based on total acreage, approximately 15% of our farm operations are managed through crop share leases, pursuant to which we and the tenant farmer jointly share in the gross revenues generated from the crops grown under a 75% farmer, 25% landlord participation. The majority of crops grown on our farms are alfalfa, with a number of acres also planted in corn, sorghum, and wheat. We will continue to review and evaluate ways to enhance the performance of our approximately 14,600 acres of farm land through relationships with area farmers.

We also own 931 acres of land along the I-70 corridor east of Denver, Colorado. We are currently leasing this land to an area farmer until such time as the property can be developed.

These land interests are described in the Arkansas River Water and Land and Sky Ranch sections of Note 4 - Water and Land Assets in Part II, Item 8 of the 2014 Annual Report.

#### Results of Operations

##### Executive Summary

The results of our operations for the three months ended November 30, 2014 and 2013 are as follows:

Edgar Filing: PURE CYCLE CORP - Form 10-Q

	November 30, 2014	November 30, 2013	\$ Change	% Change	
Millions of gallons of water delivered	46.5	34.6	11.9	34	%
Metered water usage revenues	\$ 491,800	\$ 321,600	\$170,200	53	%
Operating costs to deliver water (excluding depreciation and depletion)	\$ 136,800	\$ 102,500	\$34,300	33	%
Water delivery gross margin %	72	%	68	%	
Wastewater treatment revenues	\$ 11,700	\$ 9,800	\$1,900	19	%
Operating costs to treat wastewater	\$ 6,400	\$ 10,450	\$(4,050)	-39	%
Wastewater treatment gross margin %	45	%	-7	%	
Tap and specialty facility revenues	\$ 14,000	\$ 14,000	\$-	0	%
Farm operations revenues	\$ 263,800	\$ 220,300	\$43,500	20	%
Farm operating costs	\$ 26,500	\$ 20,700	\$5,800	28	%
Farm operations gross margin %	90	%	91	%	
General and administrative expenses	\$ 647,500	\$ 619,900	\$27,600	4	%
Net income (loss)	\$ 10,300	\$ (846,500)	\$856,800	101	%

Changes in Revenues

Metered Water Usage Revenues – Our water service charges include a fixed monthly fee and a fee based on actual amounts of water used, which is based on a tiered pricing structure that provides for higher prices as customers use greater amounts of water. Our rates and charges are established based on the average rates and charges of three surrounding water providers.

Water deliveries increased 34% and water revenues increased 53% during the three months ended November 30, 2014, compared to the three months ended November 30, 2013. Both deliveries and sales increased primarily as a result of the addition of water sales to the oil and gas industry, which was used primarily to frack wells drilled in the Niobrara formation. Our revenue increased by a greater margin than our deliveries due to meter rates for fracking water compared to rates received from customers that have acquired taps. The following table details the sources of our sales, the number of kgal (1,000 gallons) sold, and the average price per kgal for the three months ended November 30, 2014 and November 30, 2013.

Table 2 - Water Revenue Summary

	Three months ending November 30,					
	2014			2013		
Customer Type	Sales	kgal	Average per kgal	Sales	kgal	Average per kgal
On Site - Commercial	\$31,600	3,620.6	\$ 8.73	\$26,900	4,977.4	\$ 5.40
Export-Commercial	8,600	574.1	14.98	4,400	401.8	10.95
Fracking	451,600	42,286.5	10.68	290,300	29,218.6	9.94
	\$491,800	46,481.2	\$ 10.58	\$321,600	34,597.8	\$ 9.30

The gross margins on delivering water increased to 72% during the three months ended November 30, 2014 from 68% during the three months ended November 30, 2013. The increases were primarily due to the increased volume of water sold and selling water at higher tiered rates.

Wastewater Treatment Revenues – Our wastewater customer is charged based on the amount of wastewater treated.

Wastewater fees increased 19% during the three months ended November 30, 2014, compared to the three months ended November 30, 2013. This increase was primarily the result of increased demand from our only wastewater customer. Our operating costs decreased due to the reclassification of expenses related to the District during 2014, which we had historically recorded under general and administrative expenses. Beginning in 2014 we have a new funding agreement with the District, under which we accrue all funding provided to the District into a note.

Tap and Special Facility Revenues – In August 2005, we entered into the Water Service Agreement (the “County Agreement”) with Arapahoe County (the “County”). In fiscal 2006, we began recognizing water tap fees as revenue ratably over the estimated service period upon completion of the “Wholesale Facilities” (defined in the 2014 Annual Report) constructed to provide service to the County. We recognized \$3,600 of water tap fee revenues during each of the three months ended November 30, 2014 and 2013, respectively. The water tap fees to be recognized over this period are net of the royalty payments to the State of Colorado Board of Land Commissioners (the “Land Board”) and amounts paid to third parties pursuant to the “CAA” which is described in Note 4 – Long-Term Obligations and Operating Lease to the accompanying consolidated financial statements.

We recognized \$10,400 of “Special Facilities” (defined in the 2014 Annual Report) funding as revenue during each of the three months ended November 30, 2014 and November 30, 2013, respectively. This is the ratable portion of the Special Facilities funding proceeds received from the County pursuant to the County Agreement as more fully described in Note 2 – Summary of Significant Accounting Policies to Part II, Item 8 of the 2014 Annual Report.

At November 30, 2014, we have deferred recognition of \$1.2 million of water tap and construction fee revenue from the County, which will be recognized as revenue ratably over the estimated useful accounting life of the assets constructed with the construction proceeds as described above.

On December 31, 2013, the District increased its water tap fees from \$22,500 per SFE to \$24,620 per SFE. Wastewater tap fees increased from \$4,883 per SFE to \$4,988 per SFE. We did not sell any water or wastewater taps during the three months ended November 30, 2014 or 2013.

Farm Operations Revenues – Our farming operations include revenues from leases on the farms we own in the Arkansas River Valley.

Lease income from our farming operations increased by 20% during the three months ended November 30, 2014 compared to the three months ended November 30, 2013, respectively. The increase in lease income during the three months ended November 30, 2014 compared to the three months ended November 30, 2013 resulted from a discount provided under the leases for three months ended November 30, 2013, due to a drought, which we did not have to provide during the three months ended November 30, 2014.

The following chart details our farm revenue by lease type, acres, and the average revenue per acre for the three months ended November 30, 2014 and 2013.

Lease Type	Three Months Ended November 30, 2014			Three Months Ended November 30, 2013		
	Sales	Acres	Average per Acre	Sales	Acres	Average per Acre
Arkansas Cash	\$ 231,500	9,589	\$ 24.14	\$ 193,200	10,637	\$ 18.16
Arkansas Pasture	2,500	1,131	2.21	3,400	1,320	2.58
Arkansas Water shares	19,400	N/A	N/A	24,500	N/A	N/A
Arkansas Crop Share	10,400	1,896	5.49	(800 )	1,370	(0.58 )
Arkansas Held for Sale	N/A	*	N/A	-	1,331	-
Arkansas Not Farmed	-	1,988	-	-	2,095	-
Sky Ranch	-	931	-	-	931	-
	\$ 263,800	15,535	\$ 16.98	\$ 220,300	17,684	\$ 12.46

(\*) We anticipate selling approximately 640 acres.

#### General and Administrative Expenses

Significant balances classified as general and administrative (“G&A”) expenses for the three months ended November 30, 2014 and 2013, respectively were:

21

---

Table 4 - Significant Balances in G&amp;A

	Three months ended:			
	11/30/2014	11/30/2013	\$ Change	% Change
Salary and salary related expenses:				
Including share-based compensation	\$201,600	\$ 175,900	\$25,700	15 %
Excluding share-based compensation	\$132,800	\$ 121,100	\$11,700	10 %
FLCC water assessment fees	\$74,600	\$ 72,500	\$2,100	3 %
Professional fees	\$224,300	\$ 205,100	\$19,200	9 %
Fees paid to directors (including insurance)	\$16,200	\$ 16,300	\$(100 )	-1 %
Public entity related expenses	\$23,300	\$ 16,800	\$6,500	39 %
Property taxes	\$40,200	\$ 35,000	\$5,200	15 %

Salary and salary related expenses – Salary and salary related expenses including share-based compensation increased 15% for the three months ended November 30, 2014 as compared to the three months ended November 30, 2013. The increase was mostly the result of compensation paid to two additional employees during the three months ended November 30, 2014. The increase was also due to the recognition of option expense on the grant of stock options to our non-employee directors, which was higher in 2014 due to the increase in stock price on the date of the option grants compared to 2013. The salary and salary related expenses noted above include \$68,800 and \$54,800 of share-based compensation expenses during the three months ended November 30, 2014 and 2013, respectively.

FLCC water assessment fees – Water assessment fees, which are mainly paid to the Fort Lyon Canal Company (“FLCC”), are the fees we pay for our share of the maintenance of the Fort Lyon Canal. The fees are approved by the shareholders of the FLCC. As of November 30, 2014, we hold approximately 18,418 (20%) of the voting shares of the FLCC. Assessments per share from the FLCC were \$15, and \$16 for the calendar years 2013 and 2014, respectively. Fees increased 3% during the three months ended November 30, 2014, as compared to the three months ended November 30, 2013, due to the increased assessment rate charged by the FLCC. This increase was offset by the fact that we owned less FLCC shares in 2014.

Professional fees (mainly accounting and legal) – Legal and accounting fees increased 9% during the three months ended November 30, 2014 as compared to the three months ended November 30, 2013. The increase was due to increased legal fees related to litigation of approximately \$15,000 for the three months ended November 30, 2014 compared to the three months ended November 30, 2013.

Fees paid to directors (including insurance) – Director’s fees, including D&O insurance, decreased 1% for the three months ended November 30, 2014, as compared to the three months ended November 30, 2013. These fees vary due to timing of expenditures, but generally are expected to remain consistent year over year. Effective January 2014, the Company began expensing director’s fees on a monthly basis rather than in an annual lump sum as had been done in the past, which should reduce quarter to quarter variations.

Public entity expenses – Costs associated with corporate governance and costs associated with being a publicly traded entity increased 39% for the three months ended November 30, 2014 as compared to the three months ended November 30, 2013. The fluctuations are due to the timing of filings, billings for services, and the changes in filing fees and compliance costs for filing with the Securities and Exchange Commission (the “SEC”).

Property taxes – We accrue property taxes associated with our farm land and our Sky Ranch property. The expected annual property taxes for calendar year 2014 (payable in 2015) are approximately \$153,700. As a result of higher assessment valuations and increased tax rates on our farm properties, property tax expense increased 15% during the three months ended November 30, 2014, as compared to the three months ended November 30, 2013.

## Other Income and Expense Items

Table 5 - Other Items

	Three Months Ended:		\$ Change	% Change	
	30-Nov-14	30-Nov-13			
Other income items:					
Oil and gas lease income	\$ 161,400	\$ 106,800	\$ 54,600	51	%
Interest income	\$ 3,200	\$ 3,000	\$ 200	7	%
Other expense items:					
Imputed interest	\$ 23,800	\$ 657,200	\$ (633,400 )	-96	%
Interest expense	\$ 64,500	\$ 64,100	\$ 400	1	%

The oil and gas lease income amounts represent a portion of the up-front payments we received on March 10, 2011, upon the signing of the Paid-Up Oil and Gas Lease (the "O&G Lease") and Surface Use and Damage Agreement (the "Surface Use Agreement"). During fiscal 2011, we received payments of \$1,243,400 for the purpose of exploring for, developing, producing and marketing oil and gas on 634 acres of mineral estate we own at our Sky Ranch property. The income received was recognized in income ratably over the initial three year term of the O&G Lease, which began on March 10, 2011. During February 2014 we received an additional payment of \$1,243,400 to extend the initial term of the O&G Lease by an additional two years through February 2016. The income received for the extension is being recognized in income over the two year extension term of the O&G Lease.

Interest income represents interest earned on the temporary investment of capital in available-for-sale securities, finance charges, and interest accrued on the note receivable from the District. The increase was primarily related to the receipt of interest on a certificate of deposit account that was opened during the three months ended August 31, 2014.

Imputed interest expense is related to the Tap Participation Fee ("TPF") payable to HP A&M. This represents the expensed portion of the difference between the estimated fair value of the payments to be made to HP A&M and the discounted present value of those payments imputed using the effective interest method. The decrease in the imputed interest expense is a result of the reduction in the TPF as a result of us exercising our remedies under the Arkansas River Agreement during fiscal 2014, which is explained in greater detail in Note 4 – Long-Term Obligations and Operating Lease to the accompanying consolidated financial statements.

Interest expense is related to the interest accrued on the \$5.9 million in promissory notes issued and outstanding to acquire the HP A&M debt. We began acquiring these notes during the three months ended November 30, 2012 and continued acquiring promissory notes through May 2014.

## Liquidity, Capital Resources and Financial Position

At November 30, 2014, our working capital, defined as current assets less current liabilities, was \$932,100, which included \$1.9 million in cash and cash equivalents. As of the date of the filing of this Quarterly Report on Form 10-Q, we have an effective shelf registration statement pursuant to which we may elect to sell up to another \$15 million of stock at any time and from time to time. We believe that as of the date of the filing of this Quarterly Report on Form 10-Q and as of November 30, 2014, we have sufficient working capital to fund our operations for the next fiscal year.

Promissory Note Payable – During the three months ended November 30, 2014, we borrowed \$4,450,000 from First National Bank of Las Animas. Proceeds from the loan were used to consolidate a number of the notes we had issued to purchase the defaulted notes payable by High Plains A&M and for working capital. The note has a 20-year term commencing October 27, 2014, requires semi-annual payments, and carries a 5.27% per annum rate for the first five years. The note is secured by a total of 3,596.8 acres, 3,282 FLCC shares, and an assignment of two HP A&M notes

and deeds of trust with balances due of approximately \$843,400, which are secured by 1,087.4 FLCC shares. After the first five years the interest rate is subject to change (no more than annually) based on the changes in the First National Bank of Las Animas Ag/Real Estate Rate. We may pay the note in full at any time without penalty.

System Expansion – During the three months ended November 30, 2014, we spent approximately \$540,000 to install pumping equipment, piping, and other infrastructure at our Sky Ranch water system. Additionally we invested approximately \$535,000 in the Water Infrastructure Supply Efficiency partnership (“WISE”), as further discussed below, for the acquisition of an existing pipeline.

Arkansas River Valley Water Assets – The FLCC water assessments are the charges assessed to the FLCC shareholders for the upkeep and maintenance of the Fort Lyon Canal. The water assessment payments are payable to the FLCC each calendar year. For the calendar year 2014, FLCC water assessments increased from \$15 to \$16 per share, which will increase our expenses by approximately \$22,900 to \$312,900, which will be expensed ratably during calendar 2014. Our calendar year 2013 property taxes were approximately \$150,500. Based on these taxes we are accruing monthly property taxes of approximately \$11,700 for calendar year 2014. Our calendar year assessments for 2013 were approximately \$290,000 and were expensed ratably during the year. Our calendar year 2012 property taxes (paid in April 2013) for our Arkansas River farm properties were approximately \$142,000.

ECCV Capacity Operating System – Pursuant to a 1982 contractual right, the District may purchase water produced from East Cherry Creek Valley Water and Sanitation District’s (“ECCV”) Land Board system. ECCV’s Land Board system is comprised of eight wells and more than ten miles of buried water pipeline located on the Lowry Range. In May 2012, in order to increase the delivery capacity and reliability of these wells, in our capacity as the District’s service provider and the Export Water Contractor (as defined in the 2014 Amended and Restated Lease Agreement among us, the District and the Land Board), we entered into an agreement to operate and maintain the ECCV facilities allowing us to utilize the system to provide water to commercial and industrial customers, including customers providing water for drilling and hydraulic fracturing of oil and gas wells. Our costs associated with the use of the ECCV system are a flat monthly fee of \$8,000 per month from January 1, 2013 through December 31, 2020, and will decrease to \$3,000 per month from January 1, 2021 through April 2032. Additionally, we pay a fee per 1,000 gallons of water produced from ECCV’s system, which is included in the water usage fees charged to customers.

The Tap Participation Fee - The \$1.7 million TPF liability at November 30, 2014, represents the estimated fair value of our obligation to pay HP A&M 20% of our gross proceeds, or the equivalent thereof, from the sale of the next 383 water taps we sell. To date we have imputed \$27.5 million of interest since 2006 when we acquired our farm assets, recorded using the effective interest method. We did not sell any taps during the three months ended November 30, 2014 or 2013.

Payment of the TPF may be accelerated in the event of a merger, reorganization, sale of substantially all assets, or similar transactions and in the event of bankruptcy and insolvency events. Through November 2014 foreclosure sales were completed on 37 of our farms and three FLCC certificates representing water rights only, and we withdrew one farm from foreclosure. Our agreement with HP A&M allows us to reduce the TPF in the event any of our farms or water rights are foreclosed upon. Foreclosures as of November 30, 2014 have resulted in a reduction of 19,044 taps. As of November 30, 2014, there were 383 taps remaining subject to the TPF. As a result of the foreclosures and the reduction in taps remaining subject to the TPF, the TPF was revalued as of November 30, 2014 and August 31, 2014.

South Metropolitan Water Supply Authority / WISE – The South Metropolitan Water Supply Authority (“SMWSA”) is a municipal water authority in the State of Colorado organized to pursue the acquisition and development of new water supplies on behalf of its members. SMWSA members include 14 Denver area water providers in Arapahoe and Douglas Counties. The District became a member of SMWSA in 2009 in an effort to participate with other area water providers in developing regional water supplies along the Front Range. We entered into a Participation Agreement with the District on December 16, 2009, whereby we agreed to provide funding to the District in connection with its membership in the SMWSA. During the three months ended November 30, 2014, and 2013, we provided \$600 and \$55,000, respectively, of funding to the District pursuant to this Participation Agreement. For over three years, the SMWSA members have been working with Denver Water and Aurora Water on a cooperative water project known as the WISE, which seeks to develop regional infrastructure which would interconnect members’ water transmission systems to be able to develop additional water supplies from the South Platte River in conjunction with Denver Water and Aurora Water. In July of 2013, the District together with nine other SMWSA members formed the South Metro WISE Authority (“SMWA”) pursuant to the South Metro WISE Authority Formation and Organizational Intergovernmental Agreement (the “SM IGA”) to enable its members to participate in WISE. The SM IGA specifies each member’s pro rata share of WISE and the members’ rights and obligations with respect to WISE. On

December 31, 2013, SMWA, Denver Water and the Aurora Water entered into the Amended and Restated WISE Partnership – Water Delivery Agreement (the “WISE Partnership Agreement”), which provides for the purchase of certain infrastructure (pipelines, water storage facilities, water treatment facilities, and other appurtenant facilities to deliver water to and among the ten members of the SMWA, Denver Water and Aurora. We have entered into the Rangeview/Cycle WISE Project Financing Agreement with the District (the “WISE Financing Agreement”) which obligates us to fund the District’s cost of participating in WISE. During the three months ended November 30, 2014, we made payments of \$535,200 to purchase certain rights to use existing water transmission and related infrastructure acquired by WISE. We anticipate we will be investing approximately \$1.2 million per year for the next five years to fund the District’s purchase of its share of the water transmission line and additional facilities, water and related assets for WISE. In exchange for funding the District’s obligations in WISE, we will have the sole right to use and reuse the District’s 7% share of the WISE water and infrastructure to provide water service to the District’s customers and to receive the revenue from such service. Upon completion in 2021, we expect to be entitled to approximately 3 million gallons per day of transmission pipeline capacity and 500 acre feet per year of water.

## Summary Cash Flows Table

Table 4 - Summary Cash Flows Table

	Three Months Ended		\$ Change	% Change
	November 30, 2014	November 30, 2013		
Cash (used) provided by:				
Operating activities	\$(277,800)	\$(120,900)	\$(156,900)	130%
Investing activities	\$(454,400)	\$(399,600)	\$(54,800)	14%
Financing activities	\$910,200	\$(447,000)	\$1,357,200	304%

Changes in Operating Activities – Operating activities include revenues we receive from the sale of wholesale water and wastewater services and leases on our farms, costs incurred in the delivery of those services, G&A expenses, and depletion/depreciation expenses.

Cash used in operations in the three months ended November 30, 2014, increased by \$156,900 compared to the three months ended November 30, 2013, which was due mainly to the payment of accounts payable, which was partially offset by receipts from accounts receivable and decreases in operating losses.

We will continue to provide wholesale domestic and industrial water and wastewater services to customers in our service area and leasing our farms to local area farmers.

Changes in Investing Activities – Investing activities in the three months ended November 30, 2014, consisted of the investment in our water system of \$1,154,200 and the receipt of \$699,800 from the sale of 299 acres of land along with 239 FLCC shares. Investing activities in the three months ended November 30, 2013 consisted primarily of the investment in our water system and purchase of assets of \$399,600.

Changes in Financing Activities – Financing activities in the three months ended November 30, 2014 consisted of the receipt of borrowings on promissory notes of \$2,311,600, payments on the promissory notes of \$1,395,000 and payments to contingent liability holders of \$6,400. Financing activities in the three months ended November 30, 2013 consisted of payments on the promissory notes of \$445,300 and payments to contingent liability holders of \$1,700.

## Critical Accounting Policies and Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (“GAAP”) requires management to make estimates and assumptions about future events that affect the amounts reported in the financial statements and accompanying notes. Future events and their effects cannot be determined with absolute certainty. Therefore, the determination of estimates requires the exercise of judgment. Actual results inevitably will differ from those estimates, and such differences may be material to the financial statements.

The most significant accounting estimates inherent in the preparation of our financial statements include estimates associated with the timing of revenue recognition, the impairment of water assets and other long-lived assets, valuation of the TPF, fair value estimates and share-based compensation. Below is a summary of these critical accounting policies.

## Revenue Recognition

Our revenues consist mainly of monthly service fees, tap fees, construction fees, and beginning in fiscal 2013, farm operations. Additionally, we receive other income from oil and gas leases on our properties.

Monthly metered water usage fees and monthly wastewater treatment fees are recognized in income each month as earned.

25

---

As further described in Note 1 – Presentation of Interim Information to the accompanying financial statements, proceeds from tap sales and construction fees are deferred upon receipt and recognized in income based on whether we own or do not own the facilities constructed with the proceeds. We recognize tap fees derived from agreements for which we construct infrastructure owned by others as revenue, along with the associated costs of construction, pursuant to the percentage-of-completion method. The percentage-of-completion method requires management to estimate the percent of work that is completed on a particular project, which could change materially throughout the duration of the construction period and result in significant fluctuations in revenue recognized during the reporting periods throughout the construction process. We did not recognize any revenues pursuant to the percentage-of-completion method during the three months ended November 30, 2014 or 2013.

Tap and construction fees derived from agreements for which we own the infrastructure are recognized as revenue ratably over the estimated service life of the assets constructed with said fees. Although the cash will be received up-front and most construction will be completed within one year of receipt of the proceeds, revenue recognition may occur over 30 years or more. Management is required to estimate the service life, and currently the service life is based on the estimated useful accounting life of the assets constructed with the tap fees. The useful accounting life of the asset is based on management's estimation of an accounting based useful life and may not have any correlation to the actual life of the asset or the actual service life of the tap. This is deemed a reasonable recognition life of the revenues because the depreciation of the assets constructed generating those revenues will therefore be matched with the revenues.

Pursuant to the O&G Lease, during each of the years ended August 31, 2011 and 2014, we received up-front payments of \$1,243,400 from for the purpose of exploring for, developing, producing and marketing oil and gas on approximately 634 acres of mineral estate we own at our Sky Ranch property. We are recognizing the up-front payments from the O&G Lease as income on a straight-line basis over three years (the initial term of the O&G Lease) and over two years (the extended term of the O&G Lease). During the fiscal year ended August 31, 2014, we received an up-front payment of \$72,000 for the purpose of exploring for, developing, producing and marketing oil and gas on 40 acres of mineral estate we own adjacent to the Lowry Range (the "Rangeview Lease"). We recognized \$161,400 and \$106,800 during the three months ended November 30, 2014 and 2013, respectively, of lease income related to the up-front payments related to the O&G Lease and the Rangeview Lease.

Currently we lease our farms to local area farmers on both cash and crop share lease basis. Our cash lease farmers are charged a fixed fee, which is billed semi-annually in March and November. During the November billing cycle our cash lease billings include either a discount or a premium adjustment based on actual water deliveries by the FLCC. Our crop share lease fees are based on actual crop yields and are received upon the sale of the crops. All fees are estimated and recognized ratably on a monthly basis.

#### Impairment of Water Assets and Other Long-Lived Assets

We review our long-lived assets for impairment whenever management believes events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. We measure recoverability of assets to be held and used by a comparison of the carrying amount of an asset to estimated future undiscounted net cash flows we expect to be generated by the eventual use of the asset. If such assets are considered to be impaired and therefore the costs of the assets deemed to be unrecoverable, the impairment to be recognized would be the amount by which the carrying amount of the assets exceeds the estimated fair value of the assets.

Our water assets will be utilized in the provision of water services which inevitably will encompass many housing and economic cycles. Our service capacities are quantitatively estimated based on an average single family home utilizing .2 acre feet of water per year. Average water deliveries are approximately .4 acre feet; however, approximately 50% or .2 acre feet are returned and available for reuse. Our water supplies are legally decreed to us through the water court. The water court decree allocates a specific amount of water (subject to continued beneficial use) which historically

has not changed. Thus, individual housing and economic cycles typically do not have an impact on the number of connections we can serve with our supplies or the amount of water legally decreed to us relating to these supplies.

We report assets to be disposed of at the lower of the carrying amount or fair value less costs to sell. See further discussion regarding our land and water rights assets held for sale in Note 4 – Water and Land Assets to Part II, Item 8 of our 2014 Annual Report.

Our Front Range and Arkansas River Water Rights – We determine the undiscounted cash flows for our Denver based assets and the Arkansas River assets by estimating tap sales to potential new developments in our service area and along the Front Range, using estimated future tap fees less estimated costs to provide water services, over an estimated development period. Actual new home development in our service area and the Front Range, actual future tap fees, and actual future operating costs, inevitably will vary significantly from our estimates, which could have a material impact on our financial statements as well as our results of operations. We performed an impairment analysis as of August 31, 2014, and determined there were no material changes and that our Denver based assets and our Arkansas River assets are not impaired and their costs are deemed recoverable. Our impairment analysis is based on development occurring within areas in which we have service agreements (e.g. Sky Ranch and the Lowry Range) as well as in surrounding areas, including the Front Range and the I-70 corridor. Our combined Rangeview Water Supply, Sky Ranch water and Arkansas River water assets which have a carrying value of \$91.9 million as of August 31, 2014. Based on the carrying value of our water rights, the long term and uncertain nature of any development plans, current tap fees of \$24,620 and estimated gross margins, we estimate that we would need to add 7,600 new water connections (requiring 5.7% of our portfolio) to generate net revenues sufficient to recover the costs of our Rangeview Water Supply and Arkansas River water assets. If tap fees increase 5%, we would need to add 7,200 new water taps (requiring 5.4% of our portfolio) to recover the costs of our Rangeview Water Supply and Arkansas River water assets. If tap fees decrease 5%, we would need to add 8,000 new water taps (requiring 5.9% of our portfolio) to recover the costs of our Rangeview Water Supply and Arkansas River water assets.

Although changes in the housing market throughout the Front Range have delayed our estimated tap sale projections, these changes do not alter our water ownership, nor our service obligations to existing properties or the number of SFE's we can service.

Management has identified approximately 640 acres of land and 572 FLCC shares associated with the land as held for sale. We have impaired these assets and recorded them as land and water held for sale.

#### Tap Participation Fee

We own approximately 14,600 acres of irrigated land together with approximately 50,500 acre-feet of Arkansas River water rights from HP A&M. In addition to common stock issued to HP A&M to purchase these assets, we agreed to pay HP A&M a defined percentage of a defined number of water taps we sell from and after the date of the agreement with HP A&M. The TPF is payable when we sell water taps and receive funds from such water tap sales or other dispositions of property purchased in the HP A&M acquisition. The TPF liability is valued by estimating new home development in our service area over an estimated development period. This was done by utilizing third party historical and projected housing and population growth data for the Denver metropolitan area applied to an estimated development pattern supported by historical development patterns of certain master planned communities in the Denver metropolitan area. This development pattern was then applied to projected future water tap fees determined by using historical water tap fee trends. Actual new home development in our service area and actual future tap fees inevitably will vary significantly from our estimates which could have a material impact on our consolidated financial statements as well as our results of operations. An important component in our estimate of the value of the TPF, which is based on historical trends, is that we reasonably expect water tap fees to continue to increase in the coming years. Tap fees are market based and the continued increase in tap fees reflects, among other things, the increasing costs to acquire and develop new water supplies. Tap fees are thus partially indicative of the increasing value of our water assets. We continue to assess the value of the TPF liability and update its valuation analysis whenever events or circumstances indicate the assumptions used to estimate the value of the liability have changed materially. The difference between the net present value and the estimated realizable value will be imputed as interest expense using the effective interest method over the estimated development period utilized in the valuation of the TPF.

During the three months ended November 30, 2014, an additional two farms and 981 FLCC shares were foreclosed resulting in a reduction in the number of taps subject to the TPF by an additional 1801 taps, leaving 383 taps subject to

the TPF. As a result, we updated the estimated discounted cash flow analysis as of November 30, 2014. The \$1.7 million TPF liability at November 30, 2014, represents the estimated discounted fair value of our obligation to pay HP A&M 20% of our gross proceeds, or the equivalent thereof, from the sale of the next 383 water taps sold by us, which is a reduction of the estimated discounted fair value of the TPF liability by approximately \$6.2 million compared to August 31, 2014.

#### Share-Based Compensation

We estimate the fair value of share-based payment awards made to key employees and directors on the date of grant using the Black-Scholes option-pricing model. We then expense the fair value over the vesting period of the grant using a straight-line expense model. The fair value of share-based payments requires management to estimate/calculate various inputs such as the volatility of the underlying stock, the expected dividend rate, the estimated forfeiture rate and an estimated life of each option. We do not expect any forfeiture of option grants; therefore the compensation expense has not been reduced for estimated forfeitures. These assumptions are based on historical trends and estimated future actions of option holders and may not be indicative of actual events which may have a material impact on our financial statements. For further details on share based compensation expense, see Note 5 – Shareholders' Equity to the accompanying financial statements.

Recently Adopted and Issued Accounting Pronouncements

See Note 1 – Presentation of Interim Information to the accompanying financial statements for recently adopted and issued accounting pronouncements.

Disclosure Regarding Forward-Looking Statements

Statements that are not historical facts contained or incorporated by reference into this Quarterly Report on Form 10-Q are “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933 as amended, and Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). Forward-looking statements involve risks and uncertainties that could cause actual results to differ from projected results. The words “anticipate,” “goal,” “seek,” “project,” “strategy,” “future,” “likely,” “may,” “should,” “believe,” “estimate,” “expect,” “plan,” “intend” and similar expressions and references to future periods, as they relate to us, are intended to identify forward-looking statements. Forward-looking statements reflect our current views with respect to future events and are subject to certain risks, uncertainties and assumptions. We cannot assure you that any of our expectations will be realized. Forward-looking statements include, among others, statements we make regarding:

- material changes to unrecognized tax positions;
- impact of new accounting pronouncements;
- receipt of the first priority payout under the CAA;
- plans to sell land and water rights;
- the timing and impact on our financial statements of new home construction and other development in the areas where we may sell our water, which in turn may be impacted by credit availability;
- expected increase in water tap fees;
- utilization of our water assets;
- growth in our targeted service area;
- plans to continue to provide water and wastewater services to commercial and industrial customers, including oil and gas exploration and production companies;
- plans to lease our farms;
- sufficiency of our working capital to fund our operations for the next fiscal year;
- expected property taxes for 2014;
- consistency of director compensation;
- pursuit of remedies against HP A&M;
- plans to review and evaluate ways to enhance the performance of our approximately 14,600 acres of farm land through relationships with area farmers;
- deferred recognition of \$1.2 million of water tap and construction fee revenue from the County;
- impact of the increase in FLCC water assessments on our expenses and the timing of the recognition of such expenses;
- anticipated sales price of assets held for sale;
- costs associated with the use of the ECCV system;
- investments over the next five years for the WISE project;
- estimates associated with revenue recognition, asset impairments, and cash flows from our water assets;
- completion of construction following receipt of construction fees;
- variance in our estimates of future tap fees and future operating costs;
- number of new water connections necessary to recover costs;
- our entitlement to reduce the TPF due to the defaults by HP A&M;
- expected forfeitures of stock options;
- objectives of our investment activities;
- lack of fluctuation in interest rates on investments; and
- timing of the recognition of income related to the O&G Lease.

Factors that may cause actual results to differ materially from those contemplated by such forward-looking statements include, without limitation:

- the timing of new home construction and other development in the areas where we may sell our water, which in turn may be impacted by credit availability;
  - population growth;
  - employment rates;
- timing of oil and natural gas development in the areas where we sell our water;
  - general economic conditions;
  - the market price of water;
  - the market price of oil and natural gas;
- the market price of alfalfa and other crops grown on our farms subject to crop share leases;
  - changes in customer consumption patterns;
  - changes in applicable statutory and regulatory requirements;
  - changes in governmental policies and procedures;
- uncertainties in the estimation of water available under decrees;
- uncertainties in the estimation of costs of delivery of water and treatment of wastewater;
- uncertainties in the estimation of the service life of our systems;
- uncertainties in the estimation of costs of construction projects;
- the strength and financial resources of our competitors;
- our ability to find and retain skilled personnel;
- climatic and weather conditions, including floods, droughts and freezing conditions;
  - labor relations;
- turnover of elected and appointed officials and delays caused by political concerns and government procedures;
  - availability and cost of labor, material and equipment;
  - delays in anticipated permit and construction dates;
    - engineering and geological problems;
    - environmental risks and regulations;
    - our ability to raise capital;
  - our ability to negotiate contracts with new customers;
  - outcome of litigation and arbitration proceedings;
  - uncertainties in water court rulings;
  - our ability to collect on any judgments; and
- the factors described under “Risk Factors” in our 2014 Annual Report.

We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. All forward-looking statements are expressly qualified by these cautionary statements.

Item 3.

Quantitative and Qualitative Disclosures About Market Risk

General

We have limited exposure to market risks from instruments that may impact the Consolidated Balance Sheets, Consolidated Statements of Operations, and Consolidated Statements of Cash Flows. Such exposure is due primarily to changing interest rates.

Interest Rates

The primary objective for our investment activities is to preserve principal while maximizing yields without significantly increasing risk. This is accomplished by investing in diversified short-term interest bearing investments. As of November 30, 2014, we own one certificate of deposit with a stated maturity date and locked interest rate. Therefore, we are not subject to interest rate fluctuations. We have no investments denominated in foreign country currencies and, therefore, our investments are not subject to foreign currency exchange risk.

Item Controls and Procedures

4.

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures as defined in Rules 13a-15(e) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), that are designed to ensure that information required to be disclosed in our reports filed or submitted to the SEC under the Exchange Act is recorded, processed, summarized and reported within the time periods specified by the Commission's rules and forms, and that information is accumulated and communicated to management, including the principal executive and financial officer as appropriate, to allow timely decisions regarding required disclosures. The President and Chief Financial Officer evaluated the effectiveness of disclosure controls and procedures as of November 30, 2014, pursuant to Rule 13a-15(b) under the Exchange Act. Based on that evaluation, the President and Chief Financial Officer concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures were effective. A system of controls, no matter how well designed and operated, cannot provide absolute assurance that the objectives of the system of controls are met, and no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected.

Changes in Internal Control Over Financial Reporting

No changes were made to our internal control over financial reporting during our most recently completed fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Part II

Item 1. Legal Proceedings

As previously reported on a Current Report on Form 8-K filed on September 30, 2014, we entered into a Settlement Agreement and Release with HP A&M, dated September 29, 2014 (“Settlement Agreement”). The Settlement Agreement settles the lawsuit filed by HP A&M against us in the District Court, City and County of Denver, Colorado on February 27, 2012, alleging breaches of representations and warranties made in connection with the Arkansas River Agreement. Pursuant to the Settlement Agreement and a joint stipulated motion to dismiss filed with the court following execution of the Settlement Agreement, HP A&M released all claims asserted against us in its 2012 lawsuit, and the lawsuit was dismissed with prejudice.

Item 6. Exhibits

Exhibits

10.1 Rangeview/ Pure Cycle WISE Project Financing Agreement, effective as of December 22, 2014. Incorporated by reference to Exhibit 10.1 to the Current Report on Form 8-K filed on December 30, 2014.

10.2 South Metro WISE Authority Formation and Organizational Intergovernmental Agreement, dated December 31, 2013.\*

10.3 Amended and Restated WISE Partnership – Water Delivery Agreement, dated December 31, 2013, among the City and County of Denver acting through its Board of Water Commissioners, the City of Aurora acting by and through its Utility Enterprise, and South Metro WISE Authority.\*

10.4 Rangeview Funding Agreement, dated November 19, 2014, among the Rangeview Metropolitan District and certain members of the South Metro WISE Authority.\*

31.1 Certification pursuant to section 302 of the Sarbanes-Oxley Act of 2002.\*

32.1 Certification pursuant to section 906 of the Sarbanes-Oxley Act of 2002.\*
