Media Release

National achieves solid result in pivotal year

FINANCIAL HIGHLIGHTS

Full year net profit of \$3,379 million, up 62% from \$2,088 million (after significant items)

Ongoing banking and wealth management businesses deliver record cash earnings of \$3,940 million - up 10%

Australia up 17%

New Zealand up 34%

Europe up 11%

US & Asia down

Retail banking profit up 23%

Wholesale Financial Services profit up 12%

Wealth Management operating profit down 26%

Significant items after tax of \$406 million

Group cash earnings per share up 4.9% to 248.2 cents

Final dividend of 75 cents (90% franked). Full year dividend of 147 cents (95% franked) - up 9%

Banking cost to income ratio improves to 47.7% from 48.5%

Asset quality improves: gross non-accrual loans to total loans falls to 0.62% - lowest since 1986

*EVA® up 13.7% to \$1,284 million (5% target)

Strong capital position - Total Capital at 10.2% and Tier 1 at 7.8%

MANAGING DIRECTOR S REVIEW

| The Managing Director and Chief Executive Officer, Frank Cicutto, said the National achieved a solid result in a pivotal year. |
|---|
| In the last twelve months, we have: |
| Strengthened and focused our banking businesses; |
| Recapitalised and sold HomeSide in the United States; |
| Restructured the Group into three regional banking operations and two internationally focused operations - Wholesale Financial Services and Wealth Management; |
| Completed the integration of MLC to form an international Wealth Management division operating in six countries; and |
| Launched a Group revitalisation and productivity program, Positioning for Growth. |
| Through this period we maintained our discipline and focus and produced solid earnings momentum, improved our credit quality and continued an active program of capital management. |
| *EVA® is a registered trademark of Stern Stewart & Co. |
| 1 |
| |

| Our full year net profit of \$3,379 million was up 62% on last year. The final dividend will be 75 cents (90% franked), taking the full year dividend to 147 cents (95% franked), which is 9% higher than last year. |
|--|
| The success of our off-shore operations has resulted in the fall in the franking level. Future franking levels are expected to be in the range of 85-100%. |
| The strength and diversity of our operations showed through with our banking units offsetting reduced second-half wealth management profits |
| The National is now a more streamlined and tightly focused financial services group that is well positioned for the future. |
| We are building on our strengths to generate benefits for all stakeholders: shareholders, customers, employees, suppliers and the wider community. |

Strong earnings in ongoing businesses

| Our core banking and wealth management businesses produced record cash earnings of \$3,940 million (before significant items). This is up 10% on last year and achieves our target. |
|---|
| We have achieved a strong result despite lower earnings from Wealth Management in the second half. |
| The National s retail banking businesses demonstrated their earnings strength, collectively delivering 23% growth on last year. |
| Profit contributions from Financial Services Australia and Financial Services New Zealand were exceptionally strong, growing at 29% and 31%, respectively. Financial Services Europe posted a solid increase of 10%. |
| The strong performance by Financial Services Australia was due to growth in lending volumes, resulting in a 7% lift in income, and a fall in the charge to provide for doubtful debts. Over the last year, we improved our share of the home loan market. Today, 17.5% of all home mortgages in Australia are held with the National. |
| The excellent result for Financial Services New Zealand reflects: its success with home lending, where volumes were up 9%; higher retail deposits, up 15%, and; a reduction in expenses and provisions. |
| Our banking operations in Great Britain and Ireland saw a 10% increase in profit with good growth in retail deposits - up 11%. Net interest income was 9.2% higher. The cost to income ratio fell to 49.8% from 50.6%. |
| Wholesale Financial Services posted a satisfactory result in difficult trading conditions with a 12% increase in net profit to \$825 million. The 23% fall in the doubtful debt charge is a pleasing outcome and reflects early action to manage our exposures in expectation of a harsher environment. |
| A one-off investor compensation payment and difficult market conditions led to a decline in Wealth Management s net profit to \$132 million. The volatility in equity markets has adversely affected funds under management, sales volumes and redemptions. |
| Despite the challenging environment, Wealth Management Australia s market share in retail funds under management improved to 14.5%. (Source: ASSIRT Market Share Report as at June 2002). |

Improved credit quality

| Credit discipline and a range of credit initiatives undertaken over the last two years have strengthened our asset quality. |
|---|
| The ratio of gross non-accrual loans to total loans fell to 0.62% from 0.75% last year and is our best result since 1986. Our loan portfolio remains strong in respect of its rating, security coverage and diversification. Investment grade and secured lending represents 84% of the portfolio. |
| Our Agribusiness portfolio is in a satisfactory position. Non-accrual loans relating to agriculture, forestry and fishing in Australia are at a 10-year low of 0.86%. Some deterioration in asset quality as a result of the drought is expected. However, we expect this to be manageable given lower gearing within the sector. |
| As with previous periods of droughts and commodity price downturns, we have made a public commitment to supporting our customers via a range of assistance measures. |
| Our home loan book continues to perform satisfactorily with low rates of delinquency and write-offs relative to historical levels. |
| |

Significant Items and Productivity Initiatives

Our results include significant items after tax totalling \$406 million, which are mostly attributable to Positioning for Growth, including \$230 million related to redundancy costs and \$144 million due to other costs associated with the implementation of Positioning for Growth and related restructuring activities.

In addition, there is a \$38 million (after-tax) writedown on the value of the Group s Integrated Systems Implementation (ISI) - in part to reflect the move from a global business model to a regional model. As at 30 September 2002, ISI has a carrying value of \$294 million. Project management has been brought in-house and a regional roll-out adopted.

Also included was a better than expected outcome on the sale of HomeSide - a \$6 million profit. Previously, a loss of \$104 million was forecast.

Under Positioning for Growth, our productivity initiatives will deliver \$370 million per annum in cost savings by 2004. This will primarily be demonstrated by continuing improvement in key productivity measures.

The cost to income ratio in our banking businesses fell again during the year to 47.7%.

Active capital management

This time last year, the National announced an active approach to capital management with an on market buyback program relating to new shares issued through the Dividend Reinvestment Plan, the Bonus Share Plan, the Share Purchase Plan and other staff and option plans.

This year, an additional \$1.75 billion was added to the buyback program and the program has been extended to September 2003.

A more balanced approach to stakeholders

| The National has almost eight million banking customers and 2.8 million wealth management customers, globally. In Australia, the National i |
|---|
| the leading banker to small and medium enterprises and lends to approximately one in three farmers. |

We operate an extensive face to face network through more than 1,000 outlets across Australia. During the year we strengthened our arrangement with Australia Post to offer customers one of the country's largest over the counter banking networks.

Over half our network is located in rural and regional Australia.

We also commenced another significant investment in 2002. Sixteen new Financial Services Centres are being established to provide financial planning, home loans and relationship banking. Two centres, Toowoomba and Marrickville, are now operational.

Linked to the revitalisation initiatives under the Positioning for Growth program, we invested \$55 million in employee training and development this year. At the heart of these initiatives is our desire to create a high performance culture that empowers people, encourages personal development and outstanding quality.

During the year, the Group underlined its commitment to sustainability by becoming a signatory to the United Nations Environment Program Financial Institutions Initiative and in the United Kingdom, Northern Bank improved its environmental ranking to the second quintile of the top 100 companies in Northern Ireland, in part, due to evidence of energy conservation and reduced greenhouse emissions and water consumption.

Many of us including a number of our employees have been affected by the terrible tragedy in Bali. The National is assisting the Australian Red Cross Bali Appeal through a \$1 million donation and the collection of donations through our branch network. Approximately \$4.2 million has now been collected for this appeal through the National s channels.

3

| Corporate | Governance |
|-----------|------------|
|-----------|------------|

The National was the only Australian bank and one of only nine companies to achieve five stars, the highest ranking, in the Horwath 2002 Corporate Governance Report. This surveyed Australia s top 250 listed businesses.

A five star ranking was only awarded to companies whose corporate governance structures were outstanding and met all best practice standards.

In 2002, the company s external audit services were put out to competitive tender by the Principal Board Audit Committee. This was initiated as a matter of good corporate governance and to ensure we had access to best practice audit services. After a thorough selection process, the Board re-appointed KPMG as external auditor.

During the year, the charter of the Principal Board Audit Committee was enhanced and fully integrated with the activities of the Subsidiary Board Audit Committees. In addition, a revised policy has been introduced which limits the range of non-audit services provided by the external auditor to those permitted under US legislation and caps their cost at two times that of statutory audit and assurance services.

The Board has also decided to continue to issue options to reward executives for long-term performance.

As part of its regular review of remuneration structures, the Board has decided that 50% of the value of the long-term incentive will be in the form of executive options and 50% will be performance share rights, to be introduced in the forthcoming year (2002-2003).

The performance hurdle that has been in place for share options will continue to apply for both share options and performance share rights.

The Group has disclosed the fair value of options in its Annual Report for the past three years. In July 2001, the International Accounting Standards Board (IASB) announced that it would review accounting for share-based payments (including employee share options). We intend to adopt the new accounting standard once it has been issued by the IASB and the Australian Accounting Standards Board.

Earnings Outlook

Earnings Outlook 19

We had a pivotal year and the Group is well placed for the future. Our asset quality is sound and we will continue to deliver on efficiency improvements which are under our control.

Our plans show cash earnings per share growth of more than 10% in 2003. Given the uncertainty in markets today, guidance in the range 8-11% is considered prudent.

We will always strive to achieve the top end of our forecast range, however, in the current environment the level of certainty that can be attached to all forecasts is reduced.

7 November 2002

- (1) Net life insurance income is the profit before tax excluding net interest income of the statutory funds of the life insurance controlled entities of the Group. The contribution of net revenue after tax is \$238 million for the year and compares with \$340 million for the prior year.
- (2) Other operating income excludes net interest income and net life insurance income.
- Other operating expenses excludes life insurance expenses incorporated within net life insurance income.
- (4) March 2002 net profit has been restated to reclassify restructuring expenses incurred in the March 2002 half as a significant item. The restructuring costs were not material to the March 2002 half net profit but have been restated for September 2002 full year result.

SECTION 3

RESULTS FOR THE YEAR ENDED 30 SEPTEMBER 2002

MANAGEMENT DISCUSSION AND ANALYSIS

13

Management Discussion & Analysis Overview

OVERVIEW

The year to 30 September 2002 marked the end of a two year period in which the National Australia Bank Group has been reshaped. During this time the Group has:

Integrated the MLC acquisition to form an international Wealth Management division operating in six countries;

Exited retail banking in the United States through the sale of Michigan National Corporation;

Recapitalised and sold the United States mortgage banking operation HomeSide after suffering a \$3.8 billion writedown in this business;

Restructured the Group into three regional retail banking operations and two internationally focused operations - Wholesale Financial Services and Wealth Management.

Implemented a Group-wide productivity improvement program (Positioning for Growth) that will deliver annual expense reductions of \$370 million by September 2004.

This has produced a much more streamlined and tightly focused Group that is well positioned for the future.

The reshaping of the Group has seen the profit impacted by a number of major items, including the funding cost of acquiring MLC for cash, the profit on sale of Michigan National, the writedown and subsequent cost of recapitalising HomeSide and the restructuring expense associated with Positioning for Growth.

Throughout this period the Group has remained focused on core operations. The Group produced a record net profit after significant items for the year ended 30 September 2002 of \$3,379 million, which is 61.8% higher than the previous year impacted by the writedowns related to the United States mortgage servicing operation. The net profit is 4.3% higher than the previous record of \$3,241 million reported in the year ending 30 September 2000.

Final dividend has been increased 3 cents to 75 cents per share compared with the interim dividend and will be 90% franked. This brings the full year dividend to 147 cents 95% franked which represents an increase of 8.9% compared with the 2001 fully franked full year dividend of 135 cents. The success of our offshore operations has resulted in this fall in the level of franking. The Group expects to be able to frank dividends to the extent of 85-100% during the course of 2003 financial year.

| Prior to significant items, net profit of \$3,785 million is down 5.9% on last year primarily due to results in the Wealth Management operation which were unavoidably impacted by global equity markets. This result was also impacted by several non-cash items including a goodwill charge of \$101 million and a revaluation loss of \$152 million in relation to subsidiaries of the life insurance operation. Cash earnings before these items of \$3,845 million was 5.6% higher than last year. Cash earnings per share before significant items increased 11.6 cents (4.9%) to 248.2 cents. |

| 1.4 |

Cash earnings (before significant items) from ongoing operations of Banking and Wealth Management produced 10.1% growth on last year. This is the figure that management has focused most closely on since these are the businesses that will continue to drive the Group s profit into the future.

Banking

Banking operations generated \$3,650 million of total Group cash earnings, an increase of 14.6% on last year. The retail banking operations the heart of the business produced \$2,934 million, a growth rate of 23.4%. Australia and New Zealand retail banking operations had outstanding results with growth rates of 28.5% and 31.3% respectively. Europe contributed a solid 10.4% increase.

Wholesale Financial Services had a good result with an 11.5% increase in net profit in tough market conditions.

Wealth Management

Operating profit from Wealth Management fell by 25.8%. Whilst funds inflows remained strong the value of funds under management increased only 1% over the year as a result of the decline in global equity values. This had a significant impact on the level of fees earned which are an important component of the overall profitability of the business.

The fall in global equity markets adversely impacted investment earnings on capital which also contributed to the decline in operating profit.

The Wealth Management operation continues to garner an increasing share (22.5%) of retail funds inflows in Australia. A substantial investment program in both Australia and United Kingdom will underpin future growth in this business.

Regional Performance

The National is unique amongst Australian banks in operating successful businesses structured as international operations. The Group s reporting is organised to reflect the way the businesses are managed and this does not highlight the total performance across all of the businesses in a geographic region. Peer comparisons are more readily made by viewing results across geographic regions.

Results by geographic regions are set out on page 10. This demonstrates the strong performance in the Australian and New Zealand operations. The Australian operation produced a cash profit growth of 16.8% and New Zealand 34.0%. European operations also had a solid year growing at 10.5%.

The overall result was adversely affected by two significant factors associated with the United States operations: the recapitalisation of the Group s former US subsidiary HomeSide and provisioning required for one major corporate customer in our New York Branch.

Significant items

The Group's September 2002 results contained two significant items totalling \$406 million after tax - restructuring expenses of \$412 million and the gain on sale of SR Investment, Inc. (HomeSide) of \$6 million. Refer to note 13 on page 68 for further details.

Restucturing expenses

During 2002, the Group recognised restructuring costs of \$412 million after tax resulting from its Positioning for Growth (PfG) program and related restructuring activities. The initiative comprises a fundamental reorganisation of the structure of the Group as well as a series of revenue and cost enhancement initiatives. Restructuring expenses primarily relate to redundancies of \$230 million, technology write-downs of \$88 million, surplus leased space of \$54 million, and other restructuring costs of \$40 million. During 2002, payments of \$101 million (before tax) were incurred in relation to 859 redundancies.

Staff reductions resulted from changes to head office, back office, IT, operations and front office areas and the re-engineering of the lending, distribution and transaction processing functions. Fixed asset write-offs related to assets which are no longer considered to have future economic benefits as a result of PfG initiatives including the global component of assets that will not provide benefits in our regionally focused business model.

Technology write-downs included \$38 million (after tax) in relation to the Group s ISI Program. This follows a full project review taking into account the move from a global to a regional business model as a result of PfG.

The restructuring expenses were necessarily incurred to deliver a significant portion of the announced PfG cost reductions of \$370 million per annum by September 2004. Of these savings, 80% relate to personnel costs. Redundancy payments will have a payback period of approximately one year.

Sale of HomeSide

On 27 August 2002, the National agreed to sell all of its shares in SR Investment, Inc., the parent company of HomeSide Lending, Inc., to Washington Mutual Bank, FA. Total proceeds are approximately US\$1.5 billion (A\$2.7 billion), comprised of the interim settlement amount of approximately US\$1.3 billion based on an agreed estimated value of the net assets sold as at closing, plus approximately US\$0.2 billion representing amounts receivable in relation to the sale of bulk MSR. The majority of these receivables have now been collected and paid. The share sale was completed on 1 October 2002. The total proceeds received are subject to final adjustments, which will occur during the first half of the 2003 financial year.

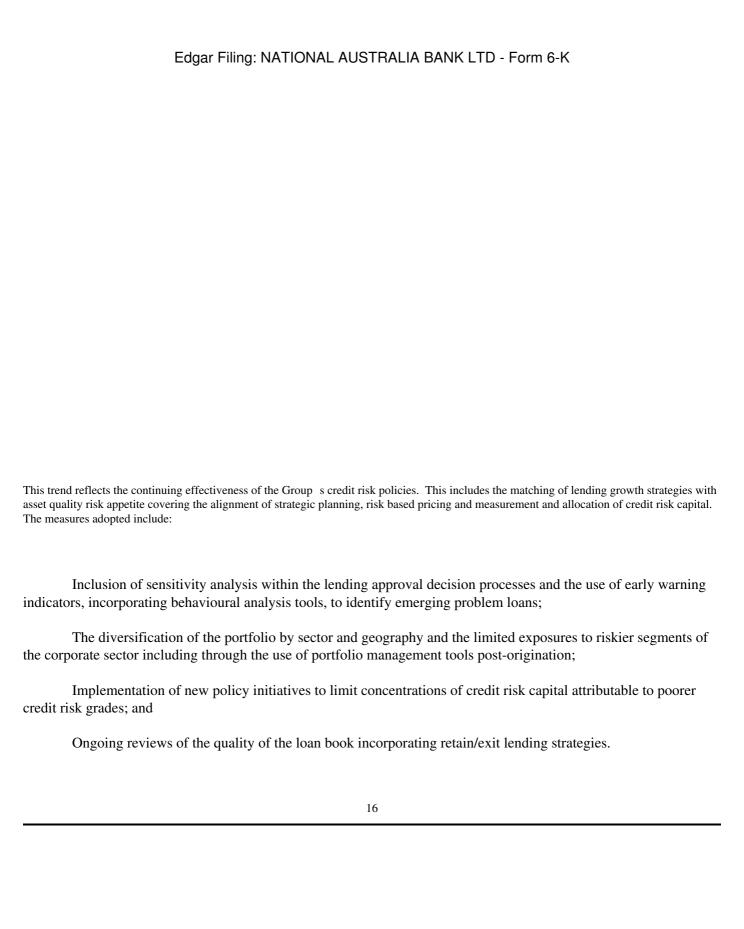

This resulted in a profit on sale of US\$3 million (A\$6 million), which has been recognised in the Group s accounts as a significant item for the year ending 30 September 2002.

As a result of the sale the National has exited all mortgage servicing rights and associated hedges, and consequently reduced the Group s balance sheet and earnings risk exposure.

Asset Quality

The Group s asset quality improved over the course of the financial year. Gross non-accrual loans declined from \$1,732 million at September 2001 to \$1,590 million at September 2002.

Gross non-accrual loans to gross loans and acceptances fell to 0.62%, the lowest percentage for the Group since 1986.

| The longer term influences of matching of strategy with risk appetite is reflected in the National s internal estimates of its credit risk capital requirements that shows a reduction over the past year despite the continuing expansion of the loan book. This reflects not simply the relatively stronger growth of housing lending within the portfolio but also the substitution of better quality corporate credits in place of weaker ones. |
|---|
| Asset quality remains strong from the perspective of its rating, security coverage and diversification. Investment grade and secured lending represents 84% of the portfolio. Wholesale Financial Service s loan portfolio across all regions has a similar percentage of investment grade or above exposures. Investment grade is equivalent to Standard & Poor s BBB- and better. |
| |
| |
| |
| The National s lending exposures are diversified across a range of industry sectors. |
| |
| |

Exposures by selected industry sectors

| | Exposures \$bn | % of total Group Exposures | Investment Grade % | Non- Accrual \$bn |
|------------------------|-------------------|----------------------------------|--------------------------|-------------------------|
| Energy | 10.9 | 2.7 | 87 | 0.1 |
| Australia/ New Zealand | 6.6 | | 90 | 0.0 |
| Europe | 1.6 | | 68 | 0.0 |
| United States | 2.2 | | 95 | 0.1 |
| Asia | 0.5 | | 100 | 0.0 |
| Media | 1.6 | 0.4 | 85 | 0.0 |
| Australia/ New Zealand | 0.9 | | 100 | 0.0 |
| Europe | 0.5 | | 85 | 0.0 |
| United States | 0.1 | | 58 | 0.0 |
| Asia | 0.1 | | 0 | 0.0 |
| Technology | 1.1 | 0.3 | 51 | 0.0 |
| Australia/ New Zealand | 0.4 | | 69 | 0.0 |
| Europe | 0.2 | | 27 | 0.0 |
| United States | 0.1 | | 26 | 0.0 |
| Asia | 0.4 | | 58 | 0.0 |
| Telecommunications | 2.7 | 0.7 | 78 | 0.0 |
| Australia/ New Zealand | 1.1 | | 76 | 0.0 |
| Europe | 1.2 | | 100 | 0.0 |
| United States | 0.3 | | 72 | 0.0 |
| Asia | 0.1 | | 96 | 0.0 |

Exposures to the energy, telecommunications, technology and media sectors remain low as a proportion of total exposures. These exposures are predominantly to investment grade counterparties.

Edgar Filing: NATIONAL AUSTRALIA BANK LTD - Form 6-K The Group continually monitors its housing loan and other consumer portfolios through reviews to ensure that changes to historical standards are investigated with corrective action instituted as needed. The book continues to perform satisfactorily with delinquency levels below long-term trends. Stress testing of the Australian home loan portfolio has shown that a 30% reduction in property prices in combination with a fivefold increase in default rates would be likely to result in losses of less than \$100 million. The Australian agriculture portfolio retains a high level of security coverage at approximately 95%. Total non accrual loans to the Australian agriculture sector account for only 0.86% of total agricultural outstandings as at 30 September 2002. The Group will continue to closely monitor our exposure to this sector as well as businesses that service the agricultural sector. The recognition of impaired exposures and associated provisioning continues to be treated conservatively. Management is satisfied that the level of current provisions is adequate for known problem loans and trends. The total provisioning coverage of impaired assets increased over the past six months to 161%. The latest full-year charge to provide for doubtful debts of \$697 million compares with \$989 million for 2001.

Management Discussion & Analysis Profitability

PROFITABILITY

The following analysis covers major movements set out in the Group Statement of Financial Performance on page 9.

Net Interest Income

Group net interest income increased 3.8% from the prior year which included Michigan National Corporation. Net interest income from ongoing operations increased 7.9%, with Retail Banking increasing 8.1% and Wholesale Financial Services increasing 20.3%. This result has been driven primarily by strong volume growth across all divisions.

Volumes by Division

Interest earning assets grew by 10% year on year with very strong performances from the Australian and New Zealand retail operations.

Retail Banking volume growth across all regions has been largely driven by strong housing growth and subdued business lending. Wholesale Financial Services increased volumes in the Markets Division which offset the decline in Corporate Lending.

| | | Change on | |
|------------------------------------|--------|-----------|--------|
| | Sep 02 | Sep 01 | Sep 01 |
| Average interest earning assets(1) | \$bn | \$bn | % |
| Retail Banking | 165 | 150 | 10 |
| Financial Services Australia | 96 | 85 | 13 |
| Financial Services Europe | 52 | 49 | 6 |
| Financial Services New Zealand | 18 | 16 | 13 |
| Wholesale Financial Services | 99 | 90 | 10 |
| Other | 7 | 7 | |
| Group interest-earning assets | 271 | 247 | 10 |

⁽¹⁾ Interest-earning assets exclude intercompany balances and Michigan National.

Net interest margin

The Group s average net interest margin decreased by 4 basis points to 2.67% from the September 2001 year. The margin decline has come from lower deposit margins arising from interest rate declines and a higher mix of home lending in the retail loan portfolio.

Net interest margin September 2001 year v. September 2002 year

Wholesale Financial Services contributed positively to margin growth as a result of funding and liquidity management activities in the Markets Division in the first half of the year. Retail Banking margins showed a small decline in contribution due to a 19 basis point decline in Financial Services Australia s margin partly offset by an 8 and 4 basis point improvement in the margin in Financial Services Europe and New Zealand respectively. The 19 basis point reduction in Financial Services Australia s margin was primarily due to a higher mix of home lending in the loan portfolio and the impact of low interest rates on retail deposit margins. Financial Services Europe s margin increased 8 basis points driven by an increase in its lending margin across fixed rate personal, business and home loans. Financial Services New Zealand s margin improved 4 basis points resulting from 15% growth in the level of retail deposits and a higher level of retained capital. The steeper yield curve in the US enabled HomeSide to earn a positive spread on its loan warehouse in the first half of the year. This was offset by the need to recapitalise this subsidiary. The sale of Michigan National on 1 April 2001 reduced the Group margin by 4 basis points. The impact through Group Funding of the recapitalisation of HomeSide net of the benefit of the proceeds from the sale of Michigan National on

Net life insurance income

the Group margin, was a reduction of 3 basis points.

The Group reports its results in accordance with Australian Accounting Standard AASB 1038 Life Insurance Business (AASB 1038). AASB 1038 requires that the interests of policyholders in the statutory funds of the life insurance business be reported in the consolidated results.

Net life insurance income is the profit before tax excluding net interest income of the statutory funds of the life insurance controlled entities of the Group. As the policyholders receive the tax benefits, the movement in net life insurance income should be reviewed on an after tax basis. The statutory funds of the life insurance controlled entities conduct superannuation, investment and insurance-related businesses (ie. Protection business including Term & Accident, Critical Illness and Disability insurance and Traditional Whole of Life and Endowment).

| | Half year | ·to | Fav/ (unfav) change | Ye | ar to | Fav/ (unfav) change |
|-------------------------------------|-----------|--------|---------------------------|--------|--------|---------------------------|
| | Sep 02 | Mar 02 | on Mar 02 | Sep 02 | Sep 01 | on Sep 01 |
| | \$m | \$m | % | \$m | \$m | % |
| Net life insurance income/(loss) | (250) | 240 | large | (10) | 128 | large |
| Income tax expense/(benefit) | (354) | 106 | large | (248) | (212) | 17.0 |
| Net life insurance income after tax | 104 | 134 | (22.4) | 238 | 340 | (30.0) |

Net life insurance loss of \$10 million has moved adversely by \$138 million from the prior year. This deterioration was primarily due to reduced investment revenue of \$111 million in 2002 reflecting the decline in global equity values.

Tax benefit in relation to net life insurance income has increased from \$212 million to \$248 million for the year ended 30 September 2002 resulting in a 30.0% decline in net life insurance income after tax to \$238 million.

Net life insurance income after tax reduced 22.4% to \$104 million for the September 2002 half compared to March 2002.

For detailed discussion on the results of Wealth Management refer pages 34 38.

Other Operating Income

Other operating income from ongoing operations increased by 2.5% from the prior year to \$4,648 million.

Retail Banking contributed solidly to the result, with other operating income increasing 7.6%. This included higher lending fees from housing loan volumes, and volume driven increases in Cards income due to strong retail sales. Other operating income in Financial Services Australia and New Zealand grew strongly in the second half due to strong home loan lending and growth in deposit products. Growth in Financial Services Europe was subdued (up 1.5%).

A 19.5% fall in other operating income within Wholesale Financial Services resulted from low volatility in financial markets. This lowered the demand for risk management products and reduced fee income from Corporate Finance activity. The second half of the year saw a turnaround in the trend with other operating income up 7.3% on the first half.

Operating Expenses

Operating expenses for ongoing operations increased 4.8% from the prior year to \$5,949 million (excluding investor compensation in Wealth Management). The increase was driven by three primary factors:

Higher depreciation and amortisation as a result of the significant investments in Australia and Europe in particular. This involved the building of the Wealth Management platform, an internet banking platform and a second call centre in the UK, preparations for EMU and significant investment in the National s CRM capability in Australia.

Volume related expenses in credit card operations and outsourced call centre in Financial Services Europe; and

Expenses associated with internet enabling the Australian operations.

Personnel expenses increased by 2.9%. The impact of salary increases was significantly offset by restructuring which resulted in a net reduction of 1,069 of full time equivalent staff (excluding the impact of the HomeSide sale).

Income Tax Expense

Income tax expense on cash earnings from ongoing operations excluding life insurance has increased 6.2% to \$1,488 million, primarily reflecting profit growth. The net effective taxation rate for the ongoing operations excluding life insurance has fallen from the prior year largely due to the reduction in the Australian corporate taxation rate from 34% to 30%. A reconciliation of the total Group income tax expense is incorporated in note 12.

| Management Discussion & Analysis Capital and Performance Measures |
|---|
| CAPITAL AND PERFORMANCE MEASURES |
| Performance Measures |
| Economic Value Added (EVA) |
| EVA is a profitability measure designed to recognise the requirement to generate a satisfactory return on the economic capital invested in the business. If the business produces profit in excess of its cost of capital then value is created for shareholders. Senior management are required to place a significant percentage of total remuneration at risk depending upon the outcome of Group EVA for the year. This aligns management interests with those of shareholders. The Group s target is for 5% growth per annum in EVA. |
| Strong profit growth in the ongoing businesses and restrained capital growth have contributed to the creation of \$1,284 million of EVA during the 2002 year. This represents growth of 13.7% compared with the prior year. |
| Earnings per share |
| Earnings per share increased 84.2 cents to 205.7 cents (69.3%). The large increase reflecting the impact of the significant items in the 2001 year in relation to the HomeSide writedown. |
| On 27 August 2002 the Group confirmed its commitment to the 10% cash earnings growth to ongoing operations before significant items, and announced a reduction in the cash earnings per share outlook to 3% 5%. Reported results are in line with the revised projections with a 10.1% increase in cash earnings from ongoing operations and 4.9% increase in cash earnings per share. |
| Return on equity |
| Return on equity before significant items is 17.0% which is 1.0% below target. This reflects Wealth Management s lower earnings and revaluation loss resulting from the fall in the global investment markets. |

Balance Sheet

Capital Position

The Group s capital ratios remained strong through the year with all key measures above their target ranges.

The Group s Tier 1 capital represents 7.76% of risk-weighted assets (6.68% excluding hybrid equity) and total capital represents 10.21% of risk-weighted assets. This is an improvement on the Total Regulatory Capital ratio of 10.16% at September 2001. The Group s targets for the regulatory ratios are 6.25% - 6.75% for Tier 1 capital and 9.00 9.50% for Total Regulatory Capital.

The National uses the ratio of adjusted common equity to tangible assets (tangible common ratio) as another measure of the Group s capital position. In contrast to the regulatory capital adequacy ratios, which focus solely on the capital available to support the banking operations, the tangible common ratio reflects the common equity available to support all the Group s operations. Adjusted common equity is calculated by subtracting from total shareholders equity, goodwill (including Wealth Management intangible assets), Tier 1 hybrid securities, asset revaluation reserve and adding back the accrued benefit of expected new equity to be issued under the National s dividend re-investment plan (as included in Tier 1 capital). Tangible assets are calculated by subtracting goodwill and investment-linked life insurance assets from total assets.

The Group s ratio of adjusted common equity to tangible assets was 5.02% compared to 5.19% at September 2001. The reduction is primarily due to the growth in the loan and investment securities coupled with the ongoing share buy-back program. The Group s target range for this ratio is 4.25% 4.75%.

The National adopts a conservative approach to its capital levels consistent with maintaining a AA long term rating with Standard and Poor s (Moody s Aa3). The National s strong capital position supports the continuation of our strategy of active capital management. This strategy incorporates the use of on-market buy-backs to reduce surplus capital and our ongoing policy to buy-back all new shares issued under the National s dividend re-investment plan and other share plans.

Share Buy-back

In November 2001, the Group adopted a policy of buying back shares equal to new shares issued under the Group s various dividend plans and staff share and option plans. In May 2002, the Group announced further capital management initiatives, the buy-back program was increased by \$1.0 billion and extended until September 2003. A cap of 15,000 was placed on the number of shares per shareholder eligible to participate in the Dividend Reinvestment Plan, effective from the July 2002 interim dividend.

Following the announcement of the sale of HomeSide in August 2002, the Group further increased the value of the shares subject to its buy-back program by \$750 million. All buy-backs are subject to appropriate pricing parameters and an assessment of the circumstances facing the Group at the relevant time.

During the year ending September 2002, the Group has bought back 36.2 million shares at an average price of \$34.52 thereby reducing ordinary equity by \$1.2 billion. The highest price paid was \$36.06 and the lowest price paid was \$31.00. The volume weighted average price of shares purchased on the days in which National was purchaser was \$34.61. The National s purchases represented 8.9% of market turnover on the days in which the National was purchaser.

Share buy-back activity

| · · · · · · · · · · · · · · · · · · · | | | |
|--|---------|-------|---|
| Number of days traded | 88 days | | |
| National s buy-back average price | \$ | 34.52 | |
| Percentage of market turnover on days traded | 8.9 | | % |
| Percentage of market turnover since buy-back commenced | 3.9 | | % |
| Volume weighted average share price on days traded | | | |
| all shares traded | \$ | 34.61 | |
| shares traded excluding buy-back | \$ | 34.62 | |

A comparison of the Group s buy-back activities relative to total market in National Australia Bank shares, highlights that the Group continues to execute the buy-back program in modest volumes, avoiding any market disruptions.

Software Capitalisation

The Group has capitalised the development and purchase of software in accordance with international accounting standards for classification as an asset. Total capitalised software as at 30 September 2002 was \$884 million (\$840 million at 30 September 2001).

The level of software capitalisation at 30 September 2002 equates to 0.2% of total assets or 2.7% of total equity.

Software is amortised over a period of 3-10 years commencing from date of implementation. The only assets amortised over a period of 10 years are the ISI program and the Global Data Warehouse. The amortisation period aligns to the expected useful life. The software amortisation charge for the year to 30 September 2002 was \$106 million (\$65 million for year to 30 September 2001).

The largest investments, which are included within the software capitalised balance at 30 September 2002, include:

23

Integrated Systems Implementation (ISI)

The ISI program is a multi-stage project designed to provide the Group with a common global enterprise resource planning system across all our lines of operations. The program was conceived under the former global operating model of the Group and originally contemplated a sequential roll-out of globally integrated modules covering human resources, e-procurement and finance.

The ISI program is a key enabler for the following:

Provision of a strategic infrastructure platform for the future;

Transformation of the finance and HR functions which will result in staff savings, improved processes and more timely decision making based on more accurate, comprehensive and consistent information;

Significant procurement savings;

Improved risk and balance sheet management, and;

Replacement of legacy systems.

As a result of the Group restructure away from the global business units, the program has been reshaped to provide three regional roll-outs with the key modules ie: HR, Finance etc, staggered within each region. Project management, which was outsourced, has now been brought back in-house. The regional roll-out represents a lower risk implementation strategy. The program is stage-gated with the release of funds for each stage approved depending upon the achievement of milestones in respect to previous stages.

The program costs have been capitalised and amortisation will begin during the 2003 financial year. Carrying costs of the project (software and hardware) at 30 September 2002 was \$294 million. As a result of the reshaping of the project, the roll out of some modules have been deferred and certain aspects of the global design have become redundant. It has been decided to write-off the carrying cost of these items and accordingly a charge of \$38 million (after tax) has been taken to restructuring expense.

Management Discussion & Analysis Retail Banking

RETAIL BANKING

RETAIL BANKING 66

Principal Activities

The Regional Financial Services Divisions include the business, agribusiness and consumer financial services retailers as well as cards, payments and leasing units together with supporting shared services. These operate in Australia, Europe and New Zealand. They exclude Wealth Management and Wholesale Financial Services. The regional financial services businesses aim to develop long-term relationships with their customers by providing products and services that consistently meet the full financial needs of customers.

Full-time and part-time staff and core full time equivalent employees excluding the effect of unpaid absences (eg maternity leave) and contractors.

Financial performance

Financial Services Australia (FSA) produced a strong performance gaining market share in both housing and business segments. The result reflects FSA s focus on efficient capital use and asset quality. It also demonstrates its strong market position in Australia.

Net profit increased 28.5% or \$393 million over the prior year. Underlying profit increased 9.3% over the same period, with the September half increasing 6.3% over the March 2002 half year.

The cost to income ratio for the year was 48.5% compared to the previous year ratio of 49.7%. Good progress has been made towards achieving the 46.0% cost to income target in 2004.

Total income

Net interest income increased 6.2% reflecting 11.0% growth in lending volumes partially offset by a 19 basis point reduction in net interest margin. Key factors were:

Strong volume growth from housing lending of 18.4% or \$9.2 billion;

Improved business lending volume growth in the second half of the year;

Retail deposit growth of 7.9%; and

Lower net interest margin of 19 basis points caused by the increased proportion of housing in the loan portfolio and impact of lower market rates on deposit margins.

Other operating income increased 7.2% due to stronger housing volume growth and higher transaction levels.

Expenses

Operating expenses were 3.9% higher due to:

Personnel expense increased 5.0%. The impact of lower staff numbers of 493 has been offset by Enterprise Bargaining Agreement increases over the past year and the impact in the second half of the year of superannuation contribution increase from 8% to 9%;

Outside service expenses increased 10.1% associated with upgrade of the credit card transaction processing system, increased credit card reward point costs and software expense due to continued enhancement of the network; and

Occupancy expense increased 7.4%. Higher security costs following September 11, lease back expense on property sold in 2002 and GST charged on renewed lease agreements contributed to this increase.

Expenses in the September 2002 half-year are slightly higher when compared to the March 2002 half resulting from the full impact of the Enterprise Bargaining Agreement and increase in superannuation contribution.

Asset quality

The charge to provide for doubtful debts for the period was 54.9% lower than prior year. The 2002 year has seen improvement in both the specific and statistical provision charges driven by improving economic conditions and active credit risk management.

The low first half charge to provide for doubtful debts included favourable impact from extensive review of the business loan portfolio. FSA has undertaken a comprehensive program to improve capital efficiency and reduce credit risk over the past 18 months.

| Full-time equivalent employees (FTE)(1) | 11,848 | 12,077 | 12,122 | |
| Core full-time equivalent employees(2) | 11,597 | 11,876 | 12,007 | |

⁽¹⁾ Full-time equivalent staff include part-time staff (pro-rated) and non-payroll FTE s (ie contractors). Comparative information has been restated to include non-payroll staff.

Financial performance

⁽²⁾ Full-time and part-time staff and core full time equivalent employees excluding the effect of unpaid absences (eg maternity leave) and contractors.

Net profit increased 9.9% in local currency terms compared with the prior year. The cost to income ratio has improved over the year from 50.6% to 49.8%.

Total income

Total income 86

Net interest income grew 9.1% from the prior year reflecting the success of core retail strategies including:

Growth in retail deposit volumes of 11%;

Lending increased 6.0% driven by mortgage lending growth of 8.5% and growth in business lending of 4.0%; and

An 8 basis point improvement in net interest margin as a result of lower deposit margins offset by higher lending margins on fixed rate loans.

In the half year to September 2002 net interest income was flat with improvement in net interest margins being offset by lower income from interest rate risk management. Average assets fell in the second half due to the repayment of intercompany loans. Excluding this impact, loans increased 1% in the second half.

Other operating income increased 1.3% with growth in lending fees offset by lower Wealth Management income and transition of customers to lower cost channels.

Expenses

Operating expenses grew 4.8%, due to:

Flat personnel costs as a result of annual salary reviews, which have been offset by reductions in overall staff numbers. Increased customer-facing staff has been offset by reductions in back-office and support functions;

Increased occupancy costs resulting from the opening of a number of new business banking centres, as well as higher costs resulting from rental and rate reviews; and

Opening of a second European call centre in October 2001.

Asset quality

Asset quality 90

The charge to provide for doubtful debts has increased 8.8%. Asset quality across financial services europe has improved with gross non-accrual loans to gross loans and acceptances falling to 0.96% from 1.23%.

Financial performance

Net profit for the year ended 30 September 2002 was NZ\$353 million, an increase of 26.1% from the previous year.

Total income

Total income 98

Net interest income grew 9.6%, reflecting the success in the core retail strategies with new product launches and focused targeting of key customer groupings.

8.6% increase in core lending assets, particularly in fixed rate housing mortgages and term lending. Housing volumes up 9.2% to NZ\$10.6 billion;

14.8% increase in retail deposit volumes;

Net interest income also benefited from a higher level of retained capital; and

Increase in net interest margin from 2.81% to 2.85%.

Other operating income remained flat with increased lending fees offset by lower income from the transition to lower costs channels.

Expenses

Operating expenses decreased 5.4% and the cost to income ratio improved from 56.2% to 49.9% in 2002. Key factors contributing to this result include:

Improved efficiencies and continued focus on cost management disciplines; and

Lower non-lending losses and branch refurbishment costs incurred in the prior year.

Second half-operating expenses grew 4.3% compared to the March 2002 half due to an increase in credit card related expenses, and timing of project expenditure.

Asset Quality

Asset Quality 102

The charge to provide for doubtful debts decreased on the previous year. Gross non-accrual loans to gross loans and acceptances improved from 0.25% to 0.14%.

Management Discussion & Analysis Wholesale Financial Services

WHOLESALE FINANCIAL SERVICES

Principal Activities

Wholesale Financial Services (Wholesale) is responsible for managing the Group's relationships with large corporate clients and financial institutions worldwide. Wholesale operates through an international network of offices in Australia, Europe, New Zealand, North America and Asia.

Wholesale comprises Corporate Banking, Markets, Specialised Finance, Financial Institutions Group, and a Support Services unit. The business also incorporates Custodian Services, which provides custody and related services to institutions within the Australian, NZ and UK markets.

Financial performance

Wholesale produced a net profit of \$825 million for the year, an increase of 11.5% on the prior year result driven by improved performance for bad and doubtful debts which was partly offset by marginally lower income.

Total income

Total income 117

Total income of \$1,929 million was marginally lower as a result of a more challenging market environment and a more concentrated focus on long term relationships.

The split of income between net interest income and other operating income can vary considerably in the wholesale market, depending on activity and environmental conditions. This was particularly evident in this year s results.

Net interest income of \$1,077 million grew 20.3% from the previous year mainly due to the continuing reduction in interest rates, enabling strong growth in Markets net interest income from funding and liquidity management activities in the US, Europe and Australia. Reduced volatility in interest rates and lower lending volumes resulted in net interest income for the September 2002 half-reducing by 7.3% from the March 2002 half year. Net interest margin for the full year increased by 6 basis points to 0.79%.

Other operating income of \$852 million decreased 19.5% from the prior year result. Key factors contributing to this result were subdued volatility in foreign exchange and interest rate markets lowered demand for sales of risk management products and also constrained risk management income and lower Corporate Finance fees.

Expenses

Expenses 119

Total operating expenses increased by 2.1% to \$741 million primarily due to increased technology expenses. Other expenses were held flat or reduced compared with the previous year.

The cost to income ratio increased slightly to 38.4% for the year.

Asset quality

Asset quality 121

The quality of the Wholesale loan portfolio across all regions remains satisfactory, with approximately 84% of credit exposures equivalent to investment grade or above. The charge to provide for doubtful debts decreased 22.7% to \$167 million. The ratio of gross non-accrual loans to gross loans and acceptances improved from 0.97% at March 2002 to 0.69% at September 2002.

| Revaluation profit/(loss) after tax | (389) | 237 | large | (152) | 333 | large |
| Net profit after outside equity interest | (313) | 445 | large | 132 | 719 | (81.6) |

⁽¹⁾ Life Company operating margins are net of outside equity interest.

Wealth Management net profit (after outside equity interests) for the year to 30 September 2002 was \$132 million, comprising \$284 million of profit generated through operations and \$152 million of revaluation losses. The operating result includes the impact of \$45 million (after tax) in compensation provided to National Australia Financial Management (NAFM) investors and associated costs; and the impact of unfavourable equity investment markets in the half year to September 2002. Despite the difficult investment climate the business continues to position itself for future growth, with \$23 million of investment expenditure included within the above result to fund strategic investment programs in both Australia and the UK.

Life company operating margins

⁽²⁾ Operating profits from non-life businesses includes Private Bank and the shareholders funds of life insurance companies and other businesses.

Life company operating margins were down 8.1% to \$226 million.

The impact of strong net funds inflows and growth of inforce annual premiums, contributed to a planned profit growth of \$23 million this was offset by experience losses.

Wealth Management encountered increased disability claims incidence, duration and reserving and this accounted for \$27 million of the \$33 million of experience losses. The disability business remains profitable and underwriting standards remain a priority. Fee income was \$22 million lower as a result of lower than planned funds under management and fees forgone on member protected superannuation guarantee business (a legislative requirement). This was offset by expense containment and a beneficial tax outcome.

Capitalised losses of \$4 million were incurred resulting primarily from increased annuitant life expectancy experience.

34

Operating profits from non-life businesses

Operating profit from non-life businesses decreased \$3 million. A number of factors influenced this result. Strong growth in the Private Bank and the UK General Insurance business was offset by the impact of unfavourable investment market conditions in the UK Investments business. The market value of the Thai Life Insurance joint venture interest was written-down by \$9 million.

In August 2002 Wealth Management announced that investors in certain NAFM funds would be compensated for the reduction in unit prices which occurred in October 2001. The investor compensation and associated costs reduces operating profit by \$45 million after tax in the September 2002 year.

As part of the Positioning for Growth program it was announced that \$200 million will be invested in the Australian business over the next four years. The high level design of the strategic investment program has been completed. The program will enable the business to deliver enhanced advice and service to advisers and their customers. The after tax impact of this investment expenditure (including operational and amortised capitalised expenditure) in the current result is \$10 million.

In the UK, more than \$90 million was invested to build an investment service offering under the development name of Endeavour. The after tax impact of this investment expenditure in the current result is \$13 million (including operational and amortised capitalised expenditure). Further, as part of the Positioning for Growth program \$90 million is being invested to build bank and IFA distribution.

Investment earnings on shareholders retained profit and capital

Global investment market conditions have deteriorated significantly since March 2002. This has impacted earnings (after tax) generated on shareholders invested capital, declining from a profit of \$32 million in the March 2002 half year, to a loss of \$37 million for the second half of the year.

From March 2002 to September 2002 the MSCI world index fell 26%. Unfavourable investment conditions and associated reduced returns on shareholder invested capital adversely impacted Australia and Asia where the invested capital profile is more weighted to global equity markets. However, returns in the UK have been favourable as a higher proportion of capital is invested in cash.

| Declining returns in global equities markets and the impact of investor uncertainty has seen funds under management decline by 7.1% since March 2002: |
|--|
| Fee revenue has contracted and new business sales for the Investments businesses grew marginally at 4.2% for the year. Retail sales declined 9% on the prior year. Competitively the business continues to capture market share in a difficult environment - net retail inflows captured for the year to June 2002 were 22.5% (up from 21.5% at March 2002), this compares to a market share of 14.5%. |
| Corporate sales continue to perform strongly with sales growth of 50% for the year. |
| In the UK, Investment sales have increased 29% since launch of the Wealth Management investment services offering in November 2001 at a time when market sales dropped 4%. Average investment size has increased to \$33,400 at September 2002 from \$20,400 in October 2001; |
| The Australian Insurance business performed strongly with sales growth of 19.9% for the year. The business continues to capture market share annual new business sales captured for the 12 months to March 2002 were 14.9%, which compares to a market share of inforce annual premiums at March 2002 of 13.7%; and |

Efficiency Measures

Cost to premiums income for the year achieved 22%, compared with 23% for the prior year and against a 2004 target of 21%.

returns generated on capital reflecting unfavourable investment market conditions.

Cost to funds under management for the investment business achieved 67 basis points (excluding NAFM compensation), compared with 70 basis points for the prior year and against a 2004 target of 65 basis points. The cost to funds under management ratio was impacted by investment market volatility and the subsequent erosion of funds under management levels during the year.

Operating performance of the Insurance business in Asia was flat, with growth constrained by distribution capacity combined with negative

The Australian integration program was completed in December 2001, and pre-tax integration synergies of \$118 million per annum were achieved to September 2002. The business is on track to deliver the targeted \$140 million per annum in pre-tax synergies by 30 September 2003.

Valuation and Revaluation Profit/(Loss)

Valuation of businesses held in the mark to market environment increased by \$484 million from \$5,991 million at 30 September 2001 to \$6,475 million at 30 September 2002. Values shown are directors market valuations. The valuations are based on Discounted Cash Flow (DCF) valuations prepared by Tillinghast Towers Perrin (Tillinghast), using, for the Australian and New Zealand entities, risk discount rates specified by the directors. The components comprising the increase in value are summarised below:

36

NAFM subsidiaries Market value summary (\$m)

| | Net assets(1) | Value of inforce business | Embedde | Value of ed future new business(7 | ~, 8, | Market value |

| Acquisition of Europe & NZ businesses | | 345 | 345 | 57 | | 402 |
| Transfers of business | | 153 | 153 | | | 153 |
| Revaluation profit/(loss) before tax(5) | | 66 | 66 | 246 | (467 |) (155) |
| Excess of internal restructure(6) | (48 |) 48 | | | | |
| Market value at 30 September 2002 | 1,301 | 2,252 | 3,553 | 2,922 | | 6,475 |

⁽¹⁾ Net assets represent the shareholder capital reserves and retained profits. A portion of these net assets is non-distributable as it is required to support regulatory capital requirements. The cost of this capital support is reflected in the value of inforce business.

- (4) The roll forward represents the growth over the period at the valuation discount rate over and above operating profit.
- (5) The revaluation profit before tax does not include revaluation uplift in respect of NAFM s own business. AASB 1038 requires assets of a life company to be valued at net market value; since NAFM is the parent life entity, the change in market value of its own life business is not brought to account.

⁽²⁾ Operating profit after income tax is before revaluations and excludes operating profits of entities outside the market value accounting environment; ie. the operating profits after tax from NAFM s own business, and other entities not owned by NAFM.

⁽³⁾ Net capital transfers represent movements in value that do not impact on the revaluation and operating profit, such as the payment of dividends, capital injections, net assets of entities acquired, FX movement on market value due to intra group funding and debt funding on internal restructure.

- (6) Excess of internal restructure represents foreign exchange movement on market value due to intra group funding and surplus debt funding on internal restructure.
- (7) For some smaller entities the projection of future new business and inforce business is combined for the purposes of valuation. For these entities the value of future new business is reflected in the embedded value.

Entities held within the mark to market environment include operations in Australia, Europe, New Zealand and Asia. Distribution of value by both region and business segment are summarised below:

NAFM subsidiaries Market value summary (\$m)

| | Net assets | Value of inforce business | Embedded value | Value of future new business | Market value |
|--|---------------|---------------------------|-------------------|------------------------------------|-----------------|
| Market value summary by region | | | | | |
| Australia | 890 | 1,771 | 2,661 | 2,769 | 5,430 |

| Market value at 30 September 2002 | 1,301 | 2,252 | 3,553 | 2,922 | 6,475 |

| Revaluation | Profi | t/(Loss) | ١ |
|-------------|-------|----------|---|
|-------------|-------|----------|---|

The components that contributed to the \$155 million revaluation loss comprised:

Transfer on 1 January 2002, of the life insurance and funds management businesses of Bank of New Zealand and National Australia Group Europe to a controlled entity of NAFM as part of an internal restructure. In accordance with AASB 1038 Life Insurance Business , these controlled entities are required to be carried at their net market value. The difference between the acquired entities net assets and the directors net market value results in an increase in the valuation of \$402 million before tax.

Transfer of certain unit linked NAFM businesses to MLC Limited in line with integration initiatives and the inclusion of \$16 million in respect to the New Zealand General Insurance brokerage business in the September half. Future profit margins on these businesses will be earned in the market value environment. These transactions increased the valuation by \$153 million before tax.

The effect of assumption and experience changes primarily comprises the impact of investment earnings being lower than expected over the period, the overall impact of lower Retail sales volumes, change in mix of new business, and changes in assumptions relating to policy lapses and claims. Additionally there have been changes to management fee and investment expense assumptions for investment linked business following a detailed review of experience relating to the application of BTR and GST legislation and subsequent repricing. These changes decreased the valuation \$710 million before tax (net of the roll forward of the DCF).

As synergy benefits are recognised from the integration of the MLC group with the National s wealth management businesses, the associated value transfers to the value of inforce business and future value of new business. As a result the synergy benefits of \$467 million recognised at 30 September 2001 have been absorbed into the overall business valuation.

Actuarial assumptions applied in the determination of market value

Actuarial assumptions applied in the determination of market values for significant Wealth Management businesses held within the mark to market environment are summarised as follows:

| | | September 2002 | | | September 2001 | |
|---|----------------------------------|------------------------------------|---------------------------------|----------------------------------|------------------------------------|---------------------------------|
| Assumptions applied in the determination of market value(1) | New business multiplier(2) | Risk discount rate(3) (%) | Franking credit assumptn (%)(4) | New business multiplier(2) | Risk discount rate(3) (%) | Franking credit assumptn (%)(4) |
| Insurance | 10.1 | 11 | 70 | 10.5 | 11 | 70 |
| Investments | 8.7 | 11-12 | 70 | 8.6 | 11-12.25 | 70 |
| New Zealand | 8.1 | 11.75 - 12.75 | 70 | | | |
| Hong Kong | 9.0 | 12.5 | | 9.4 | 12.5 | |

⁽¹⁾ The bulk of the European valuation was performed on an aggregate basis. Where the European business valuations identified separate values of inforce business and future business, approximate methods were used to derive the value of future business that did not involve new business multipliers. The risk discount rate used in European valuations at 30 September 2002 was 10%.

- (2) New business multipliers represent the multiple of value arising from 2001 & 2002 new business experience respectively that equates to the value of future new business. It reflects the risk discount rate, anticipated new business growth and expected industry growth rates thereafter, together with an allowance for the expected pressure to reduce profit margins in the future. The September 2001 multipliers for the Insurance and Investment businesses have been restated to be consistent with the September 2002 multipliers allowing for the inclusion of realised integration synergies, and the realignment of multipliers for the new disclosure categories of Insurance and Investment from the former categories of Australian life insurance companies and Australian funds management/administration companies.
- (3) Risk discount rates are gross of tax and have been derived using the Capital Asset Pricing Model. The rates applied in the directors market valuations of the Australian and New Zealand businesses for September 2002, as shown in the table above, are 0.5% higher than Tillinghast s standard rates for DCF valuations of such businesses.
- (4) The valuations of Australian and New Zealand entities comprise the present value of estimated future distributable profits after corporate tax, together with the present value of 70% of the attaching imputation credits. The valuations of international entities other than New Zealand comprise the present values of estimated future distributable profits after corporate tax.

EXCESS CAPITAL & GROUP FUNDING

| | Half ye | ar to | Fav/ (unfav) change on | Year | · to | Fav/ (unfav) change on |
|-----------------------------|---------|--------|------------------------------|--------|--------|------------------------------|
| | Sep 02 | Mar 02 | Mar 02 | Sep 02 | Sep 01 | Sep 01 |
| | \$m | \$m | % | \$m | \$m | % |
| Earnings on Excess Capital | 68 | 69 | (1.4) | 137 | 94 | 45.7 |
| Net loss from Group Funding | (103) | (143) | 28.0 | (246) | (25) | large |
| Net profit | (35) | (74) | 52.7 | (109) | 69 | large |

Earnings on Excess Capital

The Group s net interest income and margin are impacted by any excess capital held in the banking operations above the level required to efficiently and prudently run those operations. Variations in capital ratios (and therefore gearing levels) of a bank over time will lead to movements in net interest income and net interest margins. Separating out the earnings on excess capital from the overall operating results of the banking operations removes the distortion caused by varying capital/gearing ratios.

When estimating excess capital, benchmarks are chosen having regard to Australian and international peers and the risk profile and asset base of the Group s banking operations. Excess capital does not represent the total amount of surplus capital held by the Group.

Earnings on excess capital is calculated by applying the average three-year bank bill swap rate of 5.49% (5.68% prior year) to the estimated excess. For balance sheet management purposes, the banking operations use a three-year benchmark for the investment term of capital. Holdings of excess capital reduce the amount of debt required by the banking operations to fund asset growth. Any reduction in excess capital would therefore need to be replaced with debt of the same term in order to maintain the interest rate risk profile of the banking operations.

The Group s earnings on excess capital for the 2002 year is \$137 million compared with \$94 million last year.

Group Funding

| Group Funding acts as the central vehicle for movements of capital and structural funding to support the Group s operations. This minimises the earnings distortion to the operating divisions and enhances the comparability of performance over time. |
|---|
| For the year ended 30 September 2002, Group Funding experienced a loss of \$246 million compared to a loss of \$25 million after tax for the prior year. |
| The main factors contributing to the movement between September 2001 and September 2002 include: |
| the recapitalisation of HomeSide; |
| an adverse impact on intra-group funding (loans held in foreign currency) arising from the increase in the Australian dollar during the year; |
| an unfavourable first half interest rate accrual adjustment on an interest swap between New York branch and Wholesale Financial Services; and |
| the inability to benefit from a tax deduction previously obtained in the United States in respect of preference share capital invested in HomeSide. |

(1) Financial information for HomeSide relates to SR Investment, Inc., formerly known as HomeSide International, Inc. and its controlled entities. HomeSide Lending, Inc. is a wholly owned subsidiary of SR Investment, Inc.

(2) Operating results are converted to Australian dollars by using the average daily year to date exchange rate.

(3) The sale of the HomeSide operating platform and operating assets to Washington Mutual Bank, FA on 1 March 2002 resulted in a loss of US10 (A19) million which was recognised in the March 2002 half. Following completion of additional post sale procedures, the loss on sale was reduced to US4 (A8) million.

Under the terms of the sale of the assets and operating platform HomeSide received cash of US\$1,184 (A\$2,299) million for the operating assets, which consisted primarily of US\$1,072 (A\$2,081) million in warehouse and pipeline mortgage loans. This was subject to final sale adjustments.

(4) Goodwill is translated at the exchange rate at the date of acquisition.

(1) Australia, Europe and Other International include intragroup cross border loans/borrowings and associated interest.

(2) Interest margin is net interest income as a percentage of average interest-earning assets.

44

Detailed Financial Information - Note 4: Average Balance Sheet & Related Interest - Full Year

4. AVERAGE BALANCE SHEET & RELATED INTEREST

The following tables set forth the major categories of interest earning assets and interest bearing liabilities, together with their respective interest rates earned or paid by the Group. Averages are predominantly daily averages. Interest income figures include interest income on non-accruing loans to the extent cash payments have been received. Amounts classified as Other International represent interest-earning assets or interest-bearing liabilities of the controlled entities and overseas branches, excluding Europe, HomeSide and Michigan National. Non-accrual loans are included with interest-earning assets within loans and advances.

⁽¹⁾ Includes non-accrual loans.

- (2) Includes interest on derivatives and escrow deposits.
- (3) The calculations for Australia, Europe, HomeSide, Michigan National and Other International include intragroup cross border loans/borrowings and associated interest.
- (4) Included within investments relating to life insurance business are interest-earning debt securities. The interest earned from these securities is reported in life insurance income, and has therefore been treated as non-interest earning for the purposes of this note. The assets and liabilities held in the statutory funds of the Group s Australian life insurance business are subject to restrictions of the Life Insurance Act 1995.

Detailed Financial Information - Note 16: Capital Adequacy

16. CAPITAL ADEQUACY

Regulatory capital position

Under guidelines issued by APRA, life insurance and funds management activities are excluded from the calculation of risk-weighted assets, and the related controlled entities are deconsolidated for the purposes of calculating capital adequacy. The intangible component of the investment in these controlled entities (the difference between the appraisal value and the embedded value) is deducted from Tier 1 capital, and the embedded value is deducted from the total of eligible Tier 1 and Tier 2 capital. Additionally, any profits from these activities included in the Group s results are excluded from the determination of Tier 1 capital to the extent that they have not been remitted to the Company in the form of dividends. A reconciliation of capital under the different bases is provided.

Detailed Financial Information - Note 17: Risk Management

17. RISK MANAGEMENT

Market risk

The management of market risk is discussed in detail in the Group's annual financial report 2002, at Risk Management and Note 46 Derivative Financial Instruments. Please refer to that report for detailed information regarding the management of risk.

Trading risk

The following table shows the Group's Value at Risk (VaR) for all member banks' trading portfolios, including both physical and derivative positions. The figures reflect the potential losses across products and regions in which the Group operates.

Value at risk at 99% confidence level

| | Average value | Year to Sep 02 Minimum value | Maximum value |
|-------------------------|------------------|------------------------------------|------------------|
| | \$m | \$m | \$m |
| Foreign exchange risk | 7 | 2 | 26 |
| Interest rate risk | 15 | 9 | 23 |
| Volatility risk | 4 | 2 | 5 |
| Commodities risk | | | 1 |
| Diversification benefit | (7) | n/a | n/a |
| Total | 19 | 11 | 34 |

VaR measures the adverse changes in the trading portfolio value brought about by daily changes in market rates at a 99% confidence level for the year to 30 September 2002. The confidence level has changed since 2001, when VaR was measured at a 95% confidence level. Production of 95% VaR was discontinued in April 2002. The change to a 99% interval was made to align internal reporting to regulatory reporting. The change also has the advantage of including large market shifts previously excluded from the VaR results.

The following table shows the Group's VaR for all member banks—trading portfolios, including both physical and derivative positions. The figures reflect the potential losses across products and regions in which the Group operates.

Value at risk at 99% confidence level

| | Average value half year to | | Minimum value half year to | | Maximum value half year to | |
|-------------------------|----------------------------|--------|----------------------------|--------|----------------------------|--------|
| | Sep 02 | Mar 02 | Sep 02 | Mar 02 | Sep 02 | Mar 02 |
| | \$m | \$m | \$m | \$m | \$m | \$m |
| Foreign exchange risk | 7 | 7 | 3 | 2 | 19 | 26 |
| Interest rate risk | 16 | 14 | 10 | 9 | 23 | 23 |
| Volatility risk | 4 | 3 | 2 | 3 | 5 | 5 |
| Commodities risk | | | | | 1 | 1 |
| Diversification benefit | (7) | (7) | n/a | n/a | n/a | n/a |
| Total | 20 | 18 | 13 | 11 | 33 | 34 |

VaR is measured individually according to interest rate risk, foreign exchange risk and volatility risk. The individual risk categories do not sum to the total risk number due to portfolio effect. Risk limits are applied in these categories separately, and against the total risk position.

Balance sheet risk

a) Structural interest rate risk

This table presents a summary of the aggregated structural earnings at risk relating to non-trading assets and liabilities that are sensitive to changes in interest rates. Based on the structural interest rate risk position at balance date, the table shows the possible impact on net income for the 12 months ending September 30, 2003, under a rising or declining interest rate environment.

| | Forecast e | | Forecast effect on net income 2002 | | |
|------------------------|--------------|-----------------|------------------------------------|-----------------|--|
| | Rising rates | Declining rates | Rising rates | Declining rates | |
| | \$m | \$m | \$m | \$m | |
| Australian dollars | 67 | (44) | 21 | (19) | |
| Non-Australian dollars | 21 | (8) | (7) | (30) | |

⁽¹⁾ Represents the forecast effect on net interest income for the year ending 30 September 2002 and the prior year comparative.

68

b) Structural foreign exchange rate risk

Refer table below.

c) Liquidity risk

Refer to the Group s annual financial report 2002 at Risk Management for a detailed discussion of the management of these risks.

Operational, credit & country risk

Refer to the Group s annual financial report 2002 at Risk Management for a detailed discussion of the management of these risks.

Derivatives fair values

This table shows the fair value of all derivative instruments held or issued by the Group. It includes trading and other than trading contracts.

| | | As at Sep 02 | | | As at Sep 01 | |

Detailed Financial Information - Note 18: Financial Information for US Investors

18. FINANCIAL INFORMATION FOR US INVESTORS

Generally accepted accounting principles applicable in the United States (US GAAP) differ in some respects from those applying in Australia (Australian GAAP). Figures adjusted to a US GAAP basis are set out below.

Consolidated Statement of Financial Performance

| | Year to | Sep 02 | Year to Sep 01 | |
|---|---------|----------|----------------|----------|
| | A\$m | US\$m(1) | A\$m | US\$m(1) |
| Net profit reported using Australian GAAP | 3,373 | 1,831 | 2,083 | 1,024 |
| Life insurance accounting adjustments: | | | | |
| Movement in excess of net market value over net assets of life insurance controlled | | | | |
| entities | 101 | 55 | (551) | (271) |
| Amortisation of goodwill | (166) | (90) | (161) | (79) |
| Amortisation of present value of future profits (PVFP) asset | (157) | (85) | (56) | (27) |
| Difference in revenue recognition, change in life insurance policy liabilities and | 1.40 | 00 | 70 | 25 |
| deferred acquisition cost asset Difference in investments relating to life insurance business asset values and | 148 | 80 | 70 | 35 |
| unrealised profits on available for sale securities | 62 | 34 | 1 | |
| Movement in and elimination of deferred tax liabilities | 21 | 11 | 161 | 79 |
| Difference in minority interest share of profit | 26 | 14 | 32 | 16 |
| Other life insurance accounting adjustments | 44 | 24 | (10) | (5) |
| Other adjustments: | | | (- / | (-) |
| Difference in depreciation charge for buildings and profit/(loss) on sale of land and | | | | |
| buildings | 20 | 11 | 8 | 3 |
| Amortisation of goodwill, core deposit intangible and associated deferred tax liability | | | (9) | (5) |
| Pension expense | 21 | 11 | 44 | 22 |
| Difference in recognition of profit on sale and leaseback transactions | 13 | 7 | 2 | 1 |
| Employee share compensation | (18) | (10) | (26) | (13) |
| Difference in lease revenue recognition | (14) | (7) | (89) | (44) |
| Transitional adjustment on adoption of SFAS 133 | | | (232) | (114) |
| Movement in fair value of derivative financial instruments and associated impact on | | | | |
| provision for mortgage servicing rights | 323 | 175 | 586 | 288 |
| Difference in profit on sale of foreign controlled entity | (280) | (152) | | |
| Other | (18) | (10) | 13 | 6 |
| Net income according to US GAAP | 3,499 | 1,899 | 1,866 | 916 |
| Earnings per share according to US GAAP (cents) | | | | |
| Basic | 213.9 | 116.1 | 107.4 | 52.8 |
| Diluted | 208.3 | 113.1 | 108.7 | 53.5 |

70

Comprehensive Income Under US GAAP

| | Year to Sep 02 | | Year to Sep 01 | |
|--|----------------|----------|----------------|----------|
| | A\$m | US\$m(1) | A\$m | US\$m(1) |
| Net income according to US GAAP | 3,499 | 1,899 | 1,866 | 916 |
| | | | | |
| Other comprehensive income | | | | |
| Foreign Currency Translation Reserve | (520) | (282) | 192 | 94 |
| Asset Revaluation Reserve | (9) | (5) | 2 | 1 |
| Available for sale securities | (47) | (26) | (29) | (14) |
| Shadow policy liabilities adjustment | (25) | (14) | (6) | (3) |
| Revaluation surplus | (55) | (30) | 18 | 9 |
| Transitional adjustment on adoption of SFAS 133 | | | (17) | (8) |
| Movement in fair value of derivative financial instruments | 15 | 8 | (18) | (9) |
| Total other comprehensive income | (641) | (349) | 142 | 70 |
| Total comprehensive income according to US GAAP | 2,858 | 1,550 | 2,008 | 986 |

71

Discontinuing operations

12.1 Discontinuing operations

Whilst not meeting the technical definition of a discontinuing operation in AASB 1042 Discontinuing Operations , the following information is relevant to understand the financial performance of the Group.

On August 27, 2002, the Group entered into a contract for the sale of SR Investment, Inc. (which was the direct holding company of HomeSide Lending, Inc. at the time of the sale) to Washington Mutual Bank, FA. This transaction settled on October 1, 2002. At September 30, 2002, the assets and liabilities of SR Investment, Inc. and its controlled entities have been consolidated in the Group s statement of financial position. Following settlement and change in ownership and control of these entities, these assets and liabilities no longer form part of the Group.

At September 30, 2002, the Group controlled these entities. As such, the loss of control of entities having a material effect section below is not applicable to this transaction. Loss of control occurred on October 1, 2002.

Control gained over entities having material effect

The National Australia Bank Limited did not gain control over any entities which had a material effect on the Group during the financial year.

| 13.1 | Name of entity (or group of entities) | n/a | | |
|--|---|-----|--|--|
| | | | | |
