Note 1. Valuation and Investment Practices

Securities Valuation: Securities for which market quotations are readily available (including securities listed on national securities exchanges and those traded over-the-counter) are valued at the last quoted sales price on the valuation date on which the security is traded. If such securities were not traded on the valuation date, but market quotations are readily available, they are valued at the most recently quoted bid price provided by an independent pricing service or by principal market makers. Securities traded on NASDAQ are valued at the NASDAQ Official Closing Price (NOCP). Where market quotations are not readily available or where the pricing agent or market maker does not provide a valuation or methodology, or provides a valuation or methodology that, in the judgment of the adviser, does not represent fair value (Fair Value), securities are valued at fair value by a Pricing Committee appointed by the Board of Directors, in consultation with the adviser. The Fund uses various valuation techniques that utilize both observable and unobservable inputs including multidimensional relational pricing model, option adjusted spread pricing, book value, last available trade, discounted future cash flow models, cost, and comparable company approach. In such circumstances, the adviser makes an initial written recommendation to the Pricing Committee regarding valuation methodology for each Fair Value Security. Thereafter, the adviser conducts periodic reviews of each Fair Value Security to consider whether the respective methodology and its application is appropriate and recommends methodology changes when appropriate. The Pricing Committee reviews and makes a determination regarding each initial methodology recommendation and any subsequent methodology changes. All methodology recommendations and any changes are reviewed by the entire Board of Directors on a quarterly basis. The Portfolio of Investments include investments valued at \$26,220,859 (13.7% of total net assets), whose fair values have been estimated by management in the absence of readily determinable fair values.

Short-term securities which mature in more than 60 days are valued at current market quotations. Short-term securities which mature in 60 days or less are valued at amortized cost, which approximates fair value.

The Fund follows Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157). In accordance with FAS 157, fair value is defined as the price that the Fund would receive upon selling an investment in a timely transaction to an independent buyer in the principal or most advantageous market of the investment. FAS 157 established a three-tier hierarchy to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk, for example, the risk inherent in a particular valuation technique used to measure fair value including such a pricing model and/or the risk inherent in the inputs to the valuation technique. Inputs may be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad Levels listed below.

Edgar Filing: FIRST OPPORTUNITY FUND INC - Form N-Q

- Level 1 quoted prices in active markets for identical investments
- Level 2 significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The valuation techniques used by the Fund to measure fair value during the three months ended June 30, 2009 maximized the use of observable inputs and minimized the use of unobservable inputs.

The following is a summary of the inputs used as of June 30, 2009 in valuing the Fund's investments carried at value:

| Investments in Securities at Value | Level 1 | Level 2 | Level 3 | Total |
|------------------------------------|-----------------------|---------------------|----------------------|-----------------------|

Securities Transactions and Net Investment Income: Securities transactions are recorded on the trade date. Realized gains or losses on sales of securities are calculated on the identified cost basis. Dividend income is recorded on the ex-dividend date, or for certain foreign securities, when the information becomes available to the Fund. Interest income including amortization of premium and accretion of discount on debt securities, as required, is recorded on the accrual basis, using the effective interest method.

Dividend income from investments in real estate investment trusts (REITs) is recorded at management 's estimate of income included in distributions received. Distributions received in excess of this amount are recorded as a reduction of the cost of investments. The actual amount of income and return of capital are determined by each REIT only after its fiscal year-end, and may

differ from the estimated amounts. Such differences, if any, are recorded in Fund's following year.

Foreign Currency Translation: The Fund may invest a portion of its assets in foreign securities. In the event that the Fund executes a foreign security transaction, the Fund will generally enter into a forward foreign currency contract to settle the foreign security transaction. Foreign securities may carry more risk than U.S. securities, such as political, market and currency risks.

The books and records of the Fund are maintained in US dollars. Foreign currencies, investments and other assets and liabilities denominated in foreign currencies are translated into US dollars at the exchange rate prevailing at the end of the period, and purchases and sales of investment securities, income and expenses transacted in foreign currencies are translated at the exchange rate on the dates of such transactions. Foreign currency gains and losses result from fluctuations in exchange rates between trade date and settlement date on securities transactions, foreign currency transactions and the difference between the amounts of interest and dividends recorded on the books of the Fund and the amounts actually received. The portion of foreign currency gains and losses related to fluctuation in the exchange rates between the initial purchase trade date and subsequent sale trade date is included in gains and losses as stated in the Statement of Operations under Foreign currency related transactions.

Repurchase Agreements: The Fund may enter into repurchase agreement transactions with United States financial institutions. It is the Fund's policy that its custodian take possession of the underlying collateral securities, the value of which exceed the principal amount of the repurchase transaction, including accrued interest. To the extent that any repurchase transaction exceeds one business day, the value of the collateral is marked-to-market on a daily basis to maintain the adequacy of the collateral. The value of the collateral at the time of the execution must be at least equal to 102% of the total amount of the repurchase obligations, including interest. If the seller defaults, and the value of the collateral declines or if bankruptcy proceedings are commenced with respect to the seller of the security, realization of the collateral by the Fund may be delayed or limited.

Note 2. Unrealized Appreciation/(Depreciation)

On June 30, 2009, based on cost of \$274,717,879 for federal income tax purposes, aggregate gross unrealized appreciation for all securities in which there is an excess of value over tax cost was \$25,854,991 and aggregate gross unrealized depreciation for all securities in which there is an excess of tax cost over value was \$112,298,966, resulting in net unrealized depreciation of \$86,443,975.

Note 3. Transactions With Affiliated Companies

Transactions during the period with companies in which the Fund owned at least 5% of the voting securities were as follows:

| Name of Affiliate | Beginning Share Balance as of 4/1/09 | Purchases | Sales | Ending Share Balance as of 6/30/09 | Dividend Income | Realized Gains (Losses) | Market Value |
|--------------------------------|---|-----------|-------|---|--------------------|-------------------------------|-----------------|

Note 4. Credit Default Swaps

The Fund may enter into credit default swap contracts for hedging purposes, to gain market exposure or to add leverage to its portfolio. When used for hedging purposes, the Fund would be the buyer of a credit default swap contract. In that case, the Fund would be entitled to receive the par (or other agreed-upon) value of a referenced debt obligation, index or other investment from the counterparty to the contract in the event of a default by a third party, such as a U.S. or foreign issuer, on the referenced debt obligation. In return, the Fund would pay to the counterparty a periodic stream of payments over the term of the contract provided that no event of default has occurred. If no default occurs, the Fund would have spent the stream of payments and received no benefit from the contract. When the Fund is the seller of a credit default swap contract, it receives the stream of payments but is obligated to pay upon default of the referenced debt obligation. As the seller, the Fund would effectively add leverage to its portfolio because, in addition to its total assets, the Fund would be subject to investment exposure on the notional amount of the swap.

In addition to the risks applicable to derivatives generally, credit default swaps involve special risks because they are difficult to value, are highly susceptible to liquidity and credit risk, and generally pay a return to the party that has paid the premium only in the event of an actual default by the issuer of the underlying obligation, as opposed to a credit downgrade or other indication of financial difficulty. Credit default swaps are marked to market periodically using quotations from pricing services. Unrealized gains, including the accrual of interest are recorded as an asset and unrealized losses are reported as a liability on the Statement of Assets and Liabilities. The change in value of the credit default swap, including the accrual of interest to be paid or received is reported as a change in unrealized appreciation/depreciation on the Statement of Operations. A realized gain or loss is recorded upon payment or receipt of a periodic payment or termination of the swap agreement.

Credit default swap contracts entered into by the Fund as of June 30, 2009, were as follows:

| Swap Counterparty | Referenced Obligation | Notional Amount | | Rates paid by Fund | Termination Date | Unrealized Gain/(Loss) |
|-------------------|-----------------------|-----------------|-----|--------------------|------------------|------------------------|
| Morgan Stanley | Barclays Bank | 4,500,000 | EUR | 1.42% | 9/20/13 | \$ (19,542) |

Note 5. Recently Issued Accounting Pronouncements

The Fund follows FASB Statement of Financial Accounting Standards No. 161 (SFAS 161) Disclosures about Derivative Instruments and Hedging Activities an amendment of FASB Statement No. 133 (SFAS 133), which expands the disclosure requirements in SFAS 133 about entity s derivative instruments and hedging activities. Management has concluded that the adoption of SFAS 161, as adopted by the Fund April 1, 2009, has no impact on the Fund s Quarterly Portfolio of Investments (filed as part of the Form NQ) for the three months ended June 30, 2009.
