ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES
Transamerica Income Shares, Inc. (the Fund) is registered under the Investment Company Act of 1940, as amended (the 1940 Act), as a diversified, closed-end management investment company. The Fund s investment objective is to seek as high a level of current income as is consistent with prudent investment, with capital appreciation as only a secondary objective.
Securities Valuations: The Fund values it s investments at the close of the New York Stock Exchange (NYSE), normally 4 p.m. ET, each day the NYSE is open for business. The Fund s investments are valued at the last sale price or closing price on the day of valuation taken from the primary exchange where the security is principally traded.
Securities traded in the over-the-counter market and listed securities for which no sale was reported on that date are valued at the last quoted bid price.
Debt securities are valued based on a price quotation or other equivalent indication of value supplied by an exchange, a pricing service or a major market maker; however, those that mature in sixty days or less are valued at amortized cost, which approximates market.
Other securities for which quotations are not readily available or whose values have been determined to be unreliable are valued at fair market value as determined in good faith by Transamerica Asset Management, Inc. s (TAM) Valuation Committee, under the supervision of the Board of Trustees.
The Fund is subject to the provisions of Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157). FAS 157 establishes a hierarchy that prioritizes the inputs to valuation techniques giving the highest priority to readily available unadjusted quoted prices in active markets for identical assets (Level 1) and the lowest priority to unobservable inputs (Level 3) when market prices are not readily available or reliable. Valuation levels are not necessarily an indication of the risk associated with investing in those securities.

The three levels of the hierarchy under FAS 157 are described below:

- Level 1 Quoted prices in active markets for identical securities.
- Level 2 Other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).
- Level 3 Significant unobservable inputs (including the Fund s own assumptions in determining the fair value of investments).

The aggregate value by input level, at June 30, 2009, for the Fund s investments, as well as a reconciliation of assets for which significant unobservable inputs (Level 3) were used in determining value, is included at the end of the Fund s Schedule of Investments.

Repurchase agreements: The Fund may enter into repurchase agreements. The Fund, through it s custodian, receives delivery of the underlying securities, the value of which at the time of purchase is required to be an amount equal to at least 100% of the resale price. The Fund will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Foreign currency denominated investments: The accounting records of the Fund is maintained in U.S. dollars. Securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars at the closing exchange rate each day. Income, expenses, purchases and sales of investment securities denominated in foreign currencies are translated at prevailing exchange rates when accrued or incurred. The Fund combines fluctuations from currency exchange rates and fluctuations in value when computing net realized and unrealized gains or losses from investments.

Net foreign currency gains and losses resulting from changes in exchange rates include: 1) foreign currency fluctuations between trade date and settlement date of investment security transactions; 2) gains and losses on forward foreign currency contracts; and 3) the difference between the receivable amounts of interest and dividends recorded in the accounting records in U.S. dollars and the amounts actually received.

Foreign currency denominated assets may involve risks not typically associated with domestic transactions. These risks include revaluation of currencies, adverse fluctuations in foreign currency values and possible adverse political, social and economic developments, including those particular to a specific industry, country or region.

Forward foreign currency contracts: The Fund is subject to foreign currency exchange rate risk exposure in the normal course of pursuing it investment objectives. The Fund may enter into forward foreign currency contracts to hedge against exchange rate risk arising from investments in securities denominated in foreign currencies. Forward foreign currency contracts are valued at the contractual forward rate and are marked to market daily, with the change in value recorded as an unrealized gain or loss. When the contracts are settled, a realized gain or loss is incurred. Risks may arise from changes in market value of the underlying currencies and from the possible inability of counterparties to meet the terms of their contracts.
Open forward foreign currency contracts at June 30, 2009 are listed in the Schedule of Investments.
