- If the stock price is between two stock prices in the table or the effective date is between two dates in the table, the number of additional shares will be determined by a straight-line interpolation between the number of additional shares set forth for the higher and lower stock prices and the earlier and later effective dates, as applicable, based on a 365-day year.
- If the stock price is greater than \$50.00 per share, subject to adjustment as of any date on which the conversion rate of the notes is otherwise adjusted, no additional shares will be added to the conversion rate.
- If the stock price is less than \$8.89 per share, subject to adjustment as of any date on which the conversion rate of the notes is otherwise adjusted, no additional shares will be added to the conversion rate.

Notwithstanding the foregoing, in no event will the conversion rate exceed 112.4859 shares of common stock per \$1,000 in principal amount of Notes, subject to adjustment from time to time as set forth in the Preliminary Prospectus Supplement.
