#### **PIMCO High Income Fund Letter to Shareholders**

November 16, 2009

Dear Shareholder:

Please find enclosed the semi-annual report for PIMCO High Income Fund (the Fund ) for the fiscal six-month period ended September 30, 2009.

U.S. corporate bond indexes rallied during the fiscal six-month period as central banks and monetary authorities worldwide infused financial markets with unprecedented levels of liquidity in an effort to repair a global credit crisis. In response, investors moved capital away from government bonds and into riskier asset classes, including equities and corporate credit. In this environment, high yield U.S. corporate bonds outperformed the broad bond market and Treasuries as the unmanaged Merrill Lynch U.S. High Yield Index returned 46.27% during the six-month reporting period, compared with the unmanaged Barclays Capital U.S. Aggregate Index which returned 5.59% and the unmanaged Barclays Capital U.S. Treasury Index which declined 0.98% for the fiscal six-month period ended September 30, 2009.

During the six-month period, the Fund's Board of Trustees (the Trustees) approved two changes to the Fund's investment policies. As noted in the press release dated September 10, 2009, the Fund replaced its 80% minimum investment policy with respect to High Yield Securities with a less restrictive 50% policy, effective November 13, 2009. On April 6, 2009, Fund issued a press release to make explicit the Fund's investment policies allow it to hold common stock received upon conversion of other portfolio securities, such that common stocks may represent up to 20% of the Fund's total assets. The Fund may invest in preferred stock and convertible securities, which may allow for conversion into common stock. Press releases containing more detailed descriptions of these actions are available at www.allianzinvestors.com/closedendfunds.

#### PIMCO High Income Fund Fund Insights/Performance & Statistics

September 30, 2009 (unaudited)

• For the fiscal six-month period ended September 30, 2009, PIMCO High Income Fund (the Fund ) returned 141.14% on net asset value ( NAV ) and 102.21% on market value.

• An emphasis on financials sector, which benefited from recapitalization efforts during the fiscal six-month period, was a significant contributor to relative performance.

• Strong security selection in the consumer cyclical sector, where auto-related credits materially outperformed the broader industry category, contributed positively to Fund performance during the reporting period.

• An underweight position in the energy sector, which lagged the overall market during the fiscal six-month period, contributed positively to relative performance.

• A below-index weighting to consumer non-cyclicals, where beverage and tobacco companies led the underperformance for the broader sector, was a strong contributor to Fund performance.

• As real estate bonds posted very robust returns, led by real estate developers and managers, the Fund s underweighting in this sector detracted from performance.

• An underweighting in gaming companies, which significantly outperformed the broader high-yield market, detracted from relative performance.

• Exposure to investment-grade bonds detracted from performance as the high-grade market was significantly outpaced by high-yield bonds.

Total Return(1):	Market Price	Net Asset Value ( NAV )

(1) **Past performance is no guarantee of future results.** Total return is calculated by determining the percentage change in net asset value or market price (as applicable) in the specified period. The calculation assumes that all income dividends and capital gain distributions, if any, have been reinvested. Total return does not reflect broker commissions or sales charges. Total return for a period of less than one year is not annualized. Total return for a period of more than one year represents the average annual total return.

Performance at market price will differ from its results at NAV. Although market price returns typically reflect investment results over time, during shorter periods returns at market price can also be influenced by factors such as changing views about the Fund, market conditions, supply and demand for the Fund s shares, or changes in Fund distributions.

An investment in the Fund involves risk, including the loss of principal. Total return, market price, market yield and NAV will fluctuate with changes in market conditions. This data is provided for information only and is not intended for trading purposes. Closed-end funds, unlike open-end funds, are not continuously offered. There is a onetime public offering and once issued, shares of closed-end funds are sold in the open market through a stock exchange. NAV is equal to total assets attributable to common shareholders less total liabilities divided by the number of common shares outstanding. Holdings are subject to change daily.

(2) Market Price Yield is determined by dividing the annualized current monthly per share dividend (comprised of net investment income) payable to common shareholders by the market price per common share at September 30, 2009.
