NOTES TO SCHEUDLE OF INVESTMENTS:

- * *Floating or variable rate note. Rate is listed as of 12/31/2009. Security fair valued as determined in good faith in accordance with procedures established by the Board of Directors. These securities had a market value of \$5,075, or 3.75% of the fund's net assets. All or a portion of this security is on loan. The value of all securities on loan is \$1,920. The security has a perpetual maturity. The date shown is the next call date. Coupon rate is fixed for a predetermined period of time and then converts to a floating rate until maturity/call date. Rate is listed as of 12/31/2009. Step bond. Interest rate may increase or decrease as the credit rating changes. Rate shown reflects the yield at 12/31/2009.*
- # *Aggregate cost for federal income tax purposes is \$127,117. Aggregate gross unrealized appreciation/depreciation for all securities in which there is an excess of value over tax cost were \$9,555 and \$401, respectively. Net unrealized appreciation for tax purposes is \$9,154.*

DEFINITIONS:

- 144A *144A Securities are registered pursuant to Rule 144A of the Securities Act of 1933. These securities are deemed to be liquid for purposes of compliance limitations on holdings of illiquid securities and may be resold as transactions exempt from registration, normally to qualified institutional buyers. At 12/31/2009, these securities aggregated \$52,693, or 38.95%, of the fund's net assets.*
- AUD *Australian Dollar*
- CMBS *Commercial Mortgage-Backed Security*
- MXN *Mexican Peso*
- REMIC *Real Estate Mortgage Investment Conduits (consist of a fixed pool of mortgages broken apart and marketed to investors as individual securities)*

NOTE 1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

Transamerica Income Shares, Inc. (the Fund) is registered under the Investment Company Act of 1940, as amended (the 1940 Act), as a diversified, closed-end management investment company. The Fund's investment objective is to seek as high a level of current income as is consistent with prudent investment, with capital appreciation as only a secondary objective.

In the normal course of business, the Fund enters into contracts that contain a variety of representations that provide general indemnifications. The Fund's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Fund and/or its affiliates that have not yet occurred. However, based on experience, the Fund expects the risk of loss to be remote.

In preparing the Fund's financial statements in accordance with accounting principles generally accepted in the United States of America (GAAP), estimates or assumptions (which could differ from actual results) may be used that affect reported amounts and disclosures. The following is a summary of significant accounting policies followed by the Fund.

Repurchase agreements: Securities purchased subject to a repurchase agreement are held at the Fund's custodian and pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Fund will bear the risk of value fluctuations until the security can be sold and may encounter delays and incur costs in liquidating the security. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Foreign currency denominated investments: The accounting records of the Fund are maintained in U.S. dollars. Securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars at the closing exchange rate each day. Income, expenses, purchases and sales of investment securities denominated in foreign currencies are translated at prevailing exchange rates when accrued or incurred. The Fund combines fluctuations from currency exchange rates and fluctuations in value when computing net realized and unrealized gains or losses from investments.

Net foreign currency gains and losses resulting from changes in exchange rates include: 1) foreign currency fluctuations between trade date and settlement date of investment security transactions; 2) gains and losses on forward foreign currency contracts; and 3) the difference between the receivable amounts of interest and dividends recorded in the accounting records in U.S. dollars and the amounts actually received.

Foreign currency denominated assets may involve risks not typically associated with domestic transactions. These risks include revaluation of currencies, adverse fluctuations in foreign currency values and possible adverse political, social and economic developments, including those particular to a specific industry, country or region.

Forward foreign currency contracts: The Fund is subject to foreign currency exchange rate risk exposure in the normal course of pursuing its investment objectives. The Fund may enter into forward foreign currency contracts to hedge against exchange rate risk arising from investments in securities denominated in foreign currencies. Forward foreign currency contracts are marked to market daily, with the change in value recorded as an unrealized gain or loss. When the contracts are settled, a realized gain or loss is incurred. Risks may arise from changes in market value of the underlying currencies and from the possible inability of counterparties to meet the terms of their contracts.

Open forward foreign currency contracts at December 31, 2009 are listed in the Schedule of Investments.

Securities lending: Securities are lent to qualified financial institutions and brokers. The lending of Fund securities exposes the Fund to risks such as the following: (i) the borrowers may fail to return the loaned securities; (ii) the borrowers may not be able to provide additional collateral; (iii) the Fund may experience delays in recovery of the loaned securities or delays in access to collateral; or (iv) the Fund may experience losses related to the investment collateral. To minimize certain of these risks, loan counterparties pledge cash collateral equal to at least the market value of the securities loaned. Cash collateral received is invested in the State Street Navigator Securities Lending Trust-Prime Portfolio, a money market mutual fund registered under the 1940 Act. By lending such securities, the Fund attempts to increase its net investment income through the receipt of interest (after rebates and fees).

NOTE 2. SECURITY VALUATIONS

All investments in securities are recorded at their estimated fair value. The Fund values its investments at the close of the New York Stock Exchange (NYSE), normally 4 p.m. ET, each day the NYSE is open for business. The Fund utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The three Levels of inputs are:

Level 1 Unadjusted quoted prices in active markets for identical securities.

Level 2 Inputs, other than quoted prices included in Level 1, that are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates and similar data.

Level 3 Unobservable inputs, to the extent that relevant observable inputs are not available, representing the Fund's own assumptions about the assumptions a market participant would use in valuing the investment, based on the best information available.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety.

Fair value measurements: A description of the valuation techniques applied to the Fund's major categories of assets and liabilities measured at fair value on a recurring basis is as follows:

Equity securities (common and preferred stock): Securities are stated at the last reported sales price or closing price on the day of valuation taken from the primary exchange where the security is principally traded. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy.

Foreign securities generally are valued based on quotations from the primary market in which they are traded and are categorized in Level 1. Because many foreign securities markets and exchanges close prior to the close of the NYSE, closing prices for foreign securities in those markets or on those exchanges do not reflect the events that occur after that close. Certain foreign securities may be fair valued using a pricing service that considers the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments such as American Depositary Receipts (ADR), financial futures, Exchange Traded Funds (ETF), and the movement of the certain indices of securities based on a statistical analysis of their historical relationship such valuations generally are categorized in Level 2.

Preferred stock, repurchase agreement, and other equities traded on inactive markets or valued by reference to similar instruments are also generally categorized in Level 2.

Corporate bonds: The fair value of corporate bonds is estimated using various techniques, which consider recently executed transactions in securities of the issuer or comparable issuers, market price quotations (where observable), bond spreads, fundamental data relating to the issuer, and credit default swap spreads adjusted for any basis difference between cash and derivative instruments. While most corporate bonds are categorized in Level 2 of the fair value hierarchy, in instances where lower relative weight is placed on transaction prices, quotations, or similar observable inputs, they are categorized in Level 3.

Asset backed securities: The fair value of asset backed securities is estimated based on models that consider the estimated cash flows of each tranche of the entity, establish a benchmark yield, and develop an estimated tranche specific spread to the benchmark yield based on the unique attributes of the tranche. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized as Level 3.

Short-term notes: Short-term notes are valued using amortized cost, which approximates fair value. To the extent the inputs are observable and timely, the values would be generally categorized in Level 2 of the fair value hierarchy.

NOTE 2. (continued)

Government securities: Government securities are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued by principally using dealer quotations. Government securities generally are categorized in Level 2 of the fair value hierarchy.

U.S. government agency securities: U.S. government agency securities are comprised of two main categories consisting of agency issued debt and mortgage pass-throughs. Generally, agency issued debt securities are valued in a manner similar to U. S. government securities. Mortgage pass-throughs include to-be-announced (TBA) securities and mortgage pass-through certificates. Generally, TBA securities and mortgage pass-throughs are valued using dealer quotations. Depending on market activity levels and whether quotations or other observable data are used, these securities are typically categorized in Level 2 of the fair value hierarchy.

Derivative instruments: Option Contracts and derivative instruments are carried at unrealized appreciation/ depreciation, including forward contracts, swap contracts, and future contracts. These are generally categorized as a level 2 in the fair value hierarchy. Over the counter (OTC) derivative contracts include forward, swap, and option contracts related to interest rates, foreign currencies, credit standing of reference entities, equity prices, or commodity prices. Depending on the product and the terms of the transaction, the fair value of the OTC derivative products are modeled by taking into account the counterparties' creditworthiness and using a series of techniques, including simulation models. Many pricing models do not entail material subjectivity because the methodologies employed do not necessitate significant judgments and the pricing inputs are observed from actively quoted markets, as is the case for interest rate swap and option contracts. A substantial majority of OTC derivative products valued by the Fund using pricing models fall into this category and generally are categorized in Level 2 of the fair value hierarchy.

Other: Securities for which quotations are not readily available or whose values have been determined to be unreliable are valued at fair market value as determined in good faith by Transamerica Asset Management, Inc. s (TAM) Valuation Committee under the supervision of the Board of Directors.

Edgar Filing: TRANSAMERICA INCOME SHARES, INC. - Form N-Q

The hierarchy classification of inputs used to value the Fund's investments, at December 31, 2009, as well as a reconciliation of assets for which significant unobservable inputs (Level 3) were used in determining value, are included at the end of the Fund's Schedule of Investments.

Item 2. Controls and Procedures.

(a) The Registrant's principal executive officer and principal financial officer evaluated the Registrant's controls and procedures within 90 days of this filing and have concluded that the Registrant's disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940), are appropriately designed to ensure that information required to be disclosed by the Registrant in the reports that it files on Form N-Q(a) is accumulated and communicated to Registrant's management, including its principal executive officer and principal financial officer, to allow timely decisions regarding required disclosure, and (b) is recorded, processed, summarized and reported, within the time periods specified in the rules and forms adopted by the U.S. Securities and Exchange Commission.

(b) The Registrant's principal executive officer and principal financial officer are aware of no change in the Registrant's internal control over financial reporting that occurred during the Registrant's most recent fiscal quarter that has materially affected, or is reasonable likely to materially affect, the Registrant's internal control over financial reporting.

Item 3. Exhibits.

Separate certifications by the Registrant's principal executive officer and principal financial officer, as required by Rule 30a-2(a) under the Investment Company Act of 1940, are attached.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the Registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
