EARNINGS RELEASE

Table of Contents

Cemig's CEO, Mr. Djalma Bastos de Moraes, makes these comments on Cemig's results for first quarter 2010:

The exceptional results achieved in the first quarter of 2010 reflect the success of our Long-term Strategic Plan, and the strategy arising from it, which, by focusing on the long term, enable Cemig to present growing results, with a balanced portfolio of businesses of low risk. After successfully making several acquisitions, Cemig now holds an excellent position, in a context of strong economic growth. This is shown by the exceptional growth in the consumer market, which is now back to pre-crisis levels.

We continue to do our homework, growing in all sectors in a balanced fashion, and with focus on operational excellence.

Finally, the results presented show that we are on the right path for the future, and that the decisions that we have taken in recent years are constantly adding value to our businesses making Cemig every day a stronger and more solid company, with efficient business management.

Table of Contents

Cemig's Chief Officer for Finance, Investor Relations and Control of Holdings, Luiz Fernando Rolla, comments as follows:

In the first quarter our company continued to provide consistent and robust cash flow, as a result of our operations, which aim to add value for our stockholders. Our EBITDA in the first quarter of 2010 was R\$ 950 million, 22% more than in the first quarter of last year, benefiting from our policy of keeping high levels of operational efficiency. This excellence is evidenced by our net income, over R\$ 419 million in the first 3 months of this year, 22% more than in the first quarter of 2009.

This new level of results reflects the correctness of our strategy of growth via acquisitions and new projects, within the process of consolidation of the sector.

With a universe now of 59 companies and 10 consortia, the Cemig Group presents operational synergies that are increasingly profitable, in a position of lower risk, with greater stability, and growth of its results in the long term.

Our solid cash position, of R\$ 4.5 billion, makes execution of our Long Term Strategic plan possible, guaranteeing our dividend policy and debt management, and the execution of the planned investments, including those associated with acquisition opportunities.

The excellent results that we are presenting today show that we continue to add value, in a continuous and sustainable manner, for all our shareholders and other stakeholders.

The rest of this release gives the highlights of our first quarter figures.

This chart shows electricity sales by consumer category:

Table of Contents

In general, sales to industrial consumers were constant at around 52%, followed by the residential category with 22%, and commercial consumers with 14%. With the increase in Cemig's interest in Light announced at the end of 2009, the volume of consumption by the residential category tends to increase slightly, since residential consumers are a substantial percentage of Light's sales.

Table of Contents

Consolidated operational revenue

Revenue from supply of electricity

Gross revenue from supply of electricity in the first quarter of 2010 was R\$ 3,643,311, 16.16% more than the revenue of R\$ 3,136,503 in the first quarter of 2009.

Final consumers

Revenue from electricity sold to final consumers in 1Q10, excluding the group's own consumption, was R\$ 3,096,757, compared to R\$ 2,936,957 in the first quarter of 2009.

The main items affecting this result are:

- Increase in the average price per MWh charged to Free Consumers of **Cemig GT** (Cemig Geração e Transmissão) following adjustments in contracts.
- Tariff adjustment in **Cemig D**, with average impact on captive consumer tariffs of 6.21%, from April 8, 2009 (full effect in the first quarter of 2010).
- Net revenue of R\$ 93,089, recognized in the first quarter of 2010, for the low-rental consumers subsidy under a

Table of Contents

Technical Note issued by ANEEL, arising from the tariff adjustment of **Cemig D** in 2010.

- Recognition of regulatory liabilities arising from the adjustment in the Tariff Review of **Cemig D**, which had a negative impact of R\$ 213,803 on gross revenue in 1Q09.

Volume of energy invoiced to final consumers 2.0% lower (this excludes Cemig's own internal consumption). This reduction was mainly due to the effect of the change in the consolidation percentage for **Light**: the reduction was from 25% to 13.0325%, as a consequence of the partial split of RME in 2009. If the percentage of 13.0325% is applied to the consolidation calculation at March 2009, the year-on-year comparison gives an increase of 3.18% in the volume of electricity invoiced.

Supply to other concession holders

Revenues from energy sold to other concession holders totaled R\$ 376,568 in the first quarter of 2010, compared to R\$ 359,504 in the first quarter of 2009 – an increase of 4.75%.

Table of Contents

This is principally due to the volume of electricity sold to other concession holders, and under bilateral contracts, being 17.80% higher year-on-year, at 3,237,078 MWh in 1Q10, compared to 2,748,037 MWh in 3Q08.

Revenue from use of the network - Free Consumers

Revenue from use of the grid was 30.27%, or R\$ 136,855, higher year-on-year in 1Q10 (at R\$ 588,947 in the first quarter of 2010 compared to R\$ 452,092 in the first quarter of 2009).

The revenue from the TUSD (Tariff for Use of the Distribution System) received by **Cemig D** and **Light** was 9.84% higher in the first quarter of 2010, at R\$ 301,031, compared to R\$ 274,055 in the first quarter of 2009. This mainly reflects: a higher volume of electricity transported, as a result of the recovery in economic activity; and also migration of captive consumers to the free market.

Also included in this line are revenues from use of the basic grid and the connection system, which were R\$ 287,916 in 1Q10, compared to R\$ 178,037 in 1Q09.

Table of Contents

This change basically reflects the adjustment to the tariff of **Cemig GT** (Generation and Transmission) arising from the Tariff Review in June 2009, and also the acquisition of the electricity transmission company **Taesá** in the fourth quarter of 2009.

EBITDA

Cemig's EBITDA in the first quarter of 2010 was 21.63% higher year on year, at R\$ 949,528, compared to R\$780,684 in the first quarter of 2009. Adjusted for non-recurring items, it was 4.29% higher.

The higher EBITDA in 1Q10 than in 1Q09 mainly reflects Net operational revenue 22.99% higher, partially offset by Operational costs and expenses (excluding effects of depreciation and amortization) 24.04% higher.

EBITDA margin, at 32.65%, was not significantly different from 1Q09 when it was 33.01%.

Table of Contents

The main non-recurring effects are:

- Recognition of a net expense of R\$ 54,613 from the effects of the Tariff Adjustment of **Cemig D** in 2010, with the assets that were not included in the basis of the calculation for that adjustment being written off.
- Expenses of R\$ 11,133 posted for the PDV Voluntary Retirement Program, as a result of adjustment in the provision.

Table of Contents

This table shows these non-recurring adjustments:

Table of Contents

If we consider the **EBITDA** of March 31, 2009, adjusted for the new percentage for consolidation applicable to **Light** after the partial split of **RME** which reduced that percentage from 25% to 13.0325%, EBITDA for 1Q10 would be R\$ 739,297 an increase of 28.44% from 1Q09 to 1Q10.

Net income

Cemig reported 1Q10 consolidated net income of R\$ 419,223, compared to consolidated net income of R\$ 336,242 in 1Q09, an increase of 24.68%. The higher figure primarily reflects extraordinary adjustments in the first quarter of 2009 as a result of the final value decided by ANEEL for the Company's Tariff Review, which had a negative impact of R\$ 127,000 on the 1Q09 result.

Table of Contents

Deductions from operational revenues

Deductions from operational revenues in the first quarter of 2010 totaled R\$ 1,473,397, 7,92% more than in the first quarter of 2009 (R\$ 1,365,329). The main variations between the two years are as follows:

The Fuel Consumption Account CCC

The deduction from revenue for the CCC was R\$ 129,740 in 1Q10, compared to R\$ 122,620 in 1Q09, or 5.81% higher year-on-year. This is a contribution for the costs of operation of the thermal plants in the national grid and in the isolated systems. It is shared between electricity concession holders, on a basis set by an ANEEL Resolution. It is a non-controllable cost. The amount passed through to the tariff is the part related to electricity distribution services. For the amount calculated as relating to transmission services, the company merely passes through the charge, since the CCC is charged to Free Consumers on the invoice for the use of the basic grid, and passed on to Eletrobrás.

Table of Contents

Energy Development Account CDE

The deduction from revenue for the CDE in the first quarter of 2010 was R\$ **110,222**, 17.93% higher than in the first quarter of 2009 (R\$ **93,462**). These payments are specified by a Resolution issued by the regulator, ANEEL. This is a non-controllable cost. The amount for electricity distribution is passed through in full to the distribution tariff, and for the amount related to transmission the Company acts as a collection agent: it is charged to Free Consumers on the invoice for the use of the grid, and paid on by the Company to Eletrobrás.

Global Reversion Reserve RGR

The deduction from revenue for the RGR was R\$ 44,907 in 1Q10 compared to R\$ 43,730 in 1Q09. This is a non-controllable cost: the expense recognized in the income statement is the amount passed on to the tariff.

The other deductions from revenue are taxes calculated as a percentage of invoiced revenue hence their variations

Table of Contents

are substantially the same in percentage terms as the changes in revenue.

Non-controllable costs

Differences between the sums of non-controllable costs (known as the CVA Account), used as a reference in calculating the tariff adjustment, and disbursements actually made, are offset in subsequent tariff adjustments. They are recorded in Assets or Liabilities. Complying with the ANEEL Chart of Accounts, some items are allocated as Deductions from operational revenue. Further information is in Explanatory note 9 to the Quarterly Information.

As from March 2008 the Company began to receive, in the tariff, the amounts posted in assets under Portion A . The portion of non-controllable costs actually received in the tariff is transferred to Operational expenses.

Table of Contents

Operational costs and expenses (excluding Financial revenue/expenses)

Operational costs and expenses (excluding financial revenue/expenses) totaled R\$ **2,151,146** in 1Q10, 22.79% more than in 1Q09 (R\$ **1,751,892**). This is mainly due to the increases in the costs of electricity bought for resale, and outsourced services, partially offset by the reduction in the amount of operational provisions. Further information is given in Explanatory Note 29 to the Consolidated Quarterly Information.

The main variations in operational expenses were:

Electricity bought for resale

The expense on electricity bought for resale in the first quarter of 2010 was R\$ **1,028,336**, 53.06% more than in the first quarter of 2009, when it was R\$ **671,842**. This is a non-controllable cost: the expense recognized in the income statement is the amount passed on to the tariff. Further

Table of Contents

information is given in Explanatory Note 29 to the Consolidated Quarterly Information.

Charges for use of the transmission grid

The expense on charges for use of the transmission network was R\$ 202,919 in 1Q10, 0.62% lower than in 1Q09 (R\$ 204,191).

These expenses, set by an ANEEL Resolution, are payable by electricity distribution and generation agents for use of the facilities that are components of the basic national grid. This is a non-controllable cost: the deduction from revenue recognized in the Income statement corresponds to the value actually passed through to the tariff.

Depreciation and amortization

The expense on depreciation and amortization in the first quarter of 2010 was **11.22%** higher, at R\$ 190,227, than in the first quarter of 2009 (R\$ 171.042 million). This result

Table of Contents

arises substantially from the increase in fixed assets due to the ongoing investment in Distribution business, through the *Clarear*, *CresceMinas* and *Light For Everyone (Luz Para Todos)* programs; and also from the amortization of intangible assets represented by the Company's new client invoicing software.

Operational provisions

Operational provisions in the first quarter of 2010 totaled R\$ **23,148**, 56.72% less than in the first quarter of 2009 (R\$ **53,487**). The lower provision mainly reflects the exclusion, in 2010, of a provision of R\$ **11,042** for a civil court claim relating to a tariff increase, due to finalization of the court proceedings; as well as lower expense on contingencies for litigation in civil actions in 2010 than 2009. For more information please see Explanatory Notes 23 and 29 to the Consolidated Quarterly Information.

Table of Contents

Gas purchased for resale

The cost of gas purchased for resale in 1Q10 was R\$ **49,734**, 26.50% more than in 1Q09 (R\$ **39,314**). This reflects the larger quantity of gas bought in the first quarter of 2010 than in the first quarter of 2009, due to higher volume of operation, of the gas-fired thermal power generation plants, which are Gasmig's clients.

Outsourced services

The expense on outsourced services in 1Q10 was R\$ **183,985**, compared to R\$ **160,659** in 1Q09, an increase of **14.52%** the highest variations being in expenditure on: communication; maintenance and conservation of facilities and **electrical equipment; and outsourced contract workers**, as follows:

- Expenses on communication were **110.89%** higher in the first quarter of 2010, at R\$ **17,227**, than in the first quarter of 2009 (R\$ **8,169**). **This reflects the seasonal effects of renegotiation of contracts which had not been concluded by the end of March.**

Table of Contents

- The expense on maintenance and conservation of electrical facilities and equipment in 1Q10 was R\$ **42,071**, an increase of 35.66% from 1Q09 (R\$ **31,013**). This variation arises principally from the Company's higher volume of activity regarding the Company's Reajustments of contracts as well as the consolidation of the companies acquired by Cemig in the second half of 2009.

- **The expenses on contracted workers** totaled R\$ **12,851** in 1Q10, 52.59 % more than in the first quarter of 2009 (R\$ 8,422). The difference arises mainly from seasonal effects of renegotiations and of contractual adjustments made with service providing companies in the first quarter of 2010.

Table of Contents

Financial revenues (expenses)

In the first quarter of 2010 the company reported net financial *expenses* of R\$ 90.642 million, compared to net financial *expenses* of R\$ 37.757 million in the first quarter of 2009. The main factors in this difference are:

- Higher revenue from financial investments, at R\$ **94,323** in 1Q10, 42.27% more than the revenue of R\$ 66,383 in 1Q09, due to a higher volume of cash being invested in this semester.
- Revenue from net monetary adjustment on regulatory assets (CVA, the Deferred Tariff Adjustment, and the General Agreement for the Electricity Sector) 96.68% lower in 2010 than 2009: this revenue was R\$ 893 in 1Q10, compared to R\$ 26,895 in 1Q09. The change is mainly because the value of the regulatory assets had been reduced in 2010 as they were partially paid off by receipt of amounts in the tariff through clients' electricity bills.

Table of Contents

- Expenses on charges for loans and financings totaled R\$ 234,691 in 1Q10, compared to R\$ 199,809 in 1Q09. **This reflects entry of new funding, principally the issue of R\$ 2.70 billion in commercial papers by Cemig GT in October 2009.**
- Higher monetary updating on loans and financings in Brazilian currency, at R\$ 31,975, in 1Q10 the comparison is with R\$ 3,816 in 1Q09. The increase is mainly due to the different behavior of the IGP-M inflation index in the two quarters: the variation in the IGP-M was 0.9153% *negative* over the first quarter of 2009, and 2.7798% *positive* over first quarter 2010.

For a breakdown of financial revenues and expenses, see Explanatory Note 30 to the Consolidated Quarterly Information.

Table of Contents

Income tax and Social Contribution

Cemig's expenses on income tax and the Social Contribution tax in the first quarter of 2010 totaled R\$ **213,370**, on profit of R\$ **668,659**, before tax effects, a percentage of 31.91%. Explanations in response to

BM&FBovespa Official Letter GAE/CREM-514/10 of 04/01/2010

Question by BM&FBovespa

BM&FBovespa requests us to inform whether the inclusion in Cemig's scope of the activity of developing and commercially operating telecommunications and information systems, as a result of Minas Gerais State Law 18695 of 01/05/2010, to be decided in the General meeting of Stockholders to be held on 04/29/2010, will give stockholders the right to withdraw from the Company, through reimbursement of their shares, under Article 137 of Law 6404/76, and, if so, to specify:

- Which stockholders will have the right to state a position, that is to say, the stockholders of record on which date will have the right to dissent from the decisions of the said meeting.
- The amount of the reimbursement, in R\$/share.
- What procedures stockholders should adopt to state their position to the Company.

They also request information on the amount in R\$/share to be distributed as dividends, as per Proposal by the Board of Directors, total and per installment, and also the date foreseen for credit of the shares arising from the stock dividend.

Reply by CEMIG

Dear Sirs,

In response to your request, through BM&FBovespa Official Letter GAE/CREM-514/10, of 04/01/2010, we advise you that Cemig, in compliance with Article 237 of Law 6404/76, published the convocation to the General Meeting of Stockholders to be held on 04/29/2010, for the purpose of adapting its Bylaws to the terms of Minas Gerais State Law 18695, of 01/05/2010, which explicitly stated, among its corporate objects, the activities of developing and commercially operating telecoms and information services.

On this question, we point out that that are reasonable justifications for Article 137 of Law 6404/76 not applying that Article specifies the right of stockholders to withdraw from the Company, via reimbursement of their shares, as a result of a change in the company's objects, described in sub-item VI of Article 136, having in mind that:

Av. Barbacena 1200 Santo Agostinho 30190-131 Belo Horizonte, MG Brazil Tel.: +55 31 3506-5024 Fax +55 31 3506-5025

Table of Contents

1 The purpose of inclusion in the scope of the company's objects of the activities mentioned in State Law 18695/2010 is only to make explicit activities that are indirectly related to the Company's objects, such as telecommunications, which the Company already was operating, through intermediation of the use of the networks and facilities for the transport and distribution of electricity, through its subsidiary Empresa de Infovias S.A.

2 Cemig will continue to operate in the various fields of energy, from any of its sources, for economic and commercial operation, constructing and operating systems including electricity generation, transmission, distribution and sales systems, and also to carry out activities directly or indirectly related to this Object;

In the present case it is perceived that the activities mentioned may be clearly comprehended as complementary to or an integral part of those of Cemig's Bylaws, and it should be pointed out that the use of the facilities of the electricity distribution facilities as a means of transport for communication of digital or analog signals, through the system known as Power Line Communications - PLC, was recently regulated by Aneel through its Normative Resolution 375, of August 25, 2009.

This being so, we believe that the possibility of withdrawal referred to by Law 6414/76 does not apply to the changes in the Bylaws to be decided by the AGM of 04/29/2010.

In relation to the dividends to be distributed, as per the Proposal of the Board of Directors, in the amount of R\$ 930,720,000, we inform you as follows:

- Total amount in R\$/share (ON/PN) to be distributed: R\$ 1.500859536
- Amount in R\$/share (ON/PN) of the 1st installment: R\$ 0.750429768
- Amount in R\$/share (ON/PN) of the 2nd installment: R\$ 0.750429768
- Date scheduled for credit of the shares arising from the stock dividend (available for trading): **May 5, 2010.**

APPENDIX 6

Comments by chief officers on the Company's financial situation, as required by Item 10 of the Reference Form, in compliance with Article 9, III of CVM Instruction 481 of December 17, 2009.

*Art. 9...III Comment by the managers on the company's financial situation,
in the terms of item 10 of the reference form;*

10.1 Chief officers should comment on the following:

a) General conditions of finances, assets and liabilities

In 2009 Cemig lived through an extraordinary phase of achievements. We can say, with certainty, that 2009 will enter the company's rich history as a milestone, where our organization reached a new level with significant expansion of our position in the transmission sector, with acquisitions of holdings in **Taesa** Transmissora Alterosa de Energia Elétrica, and expansion of our holding in **TBE** Transmissora Brasileira de Energia, and in distribution, increase of our position in the capital of **Light** S.A. These three transactions alone represent investments of more than R\$ 2 billion. These investments establish Cemig as one of the largest and most important groups in the electricity sector in Brazil and Latin America. By the close of 2009, Cemig was Brazil's largest distributor by number of consumers and kilometers of lines, the country's third-largest transmission company and its third largest generator.

And it has to be pointed out, first of all, that this expansion was carefully planned, is included in our Long-term Strategic Plan, and focused as ever on the orientation to grow with sustainability – that is to say, to expand with profitability, maintaining the solidity of our balance sheet and expanding our position in Brazil's electricity industry, while maintaining the firm stance of adding value for our stockholders.

Secondly, we were able to succeed in these major achievements in spite of the chaotic scenario that disturbed the world economy – and Brazil's – in the first half of 2009. Knowing that it was a moment of opportunity, Cemig acted boldly, but without at any moment losing touch with its responsibility to do business with prospects for secure returns for the company and its stockholders.

At the end of 2009 we were, also, Brazil's largest trader in electricity. And, further, we closed the year with a balanced portfolio of businesses. To overcome the crisis, we cut costs, we adopted innovative financial solutions, and we found our own innovative and successful way of overcoming the effects of the retraction in the market.

Edgar Filing: ENERGY CO OF MINAS GERAIS - Form 6-K

We began the year under the effects of the international crisis, with deterioration of macroeconomic conditions, the consequent restriction on credit for companies, weaker domestic demand, fall in GDP and retraction of investments. In this context of insecurity our operations were affected. We noticed, for example, a reduction in our market of industrial consumers, and we also suffered a significant impact from the final tariff reviews of our distribution subsidiary, **Cemig D**.

These challenges, however, were overcome so that, for **Cemig**, 2009 was transformed into a year of opportunities.

As an integrated company, with businesses in generation, transmission and distribution of electricity, we succeeded in offsetting the effect of the reduction in operations of our industrial consumers, through increases in sales to distributors in the regulated market, in short-term contracts and at more advantageous prices. We increased our sales to this segment of the market by more than 25% and our consolidated sales in the year by 1.4%.

Table of Contents

All the contracts of our generating company have take-or-pay clauses that ensure stability of their revenue, but we took commercial initiatives that enabled us to place this contracted energy that had not been used by our free clients, resulting in greater profits for the company and underlining our vocation and reputation for supplying energy solutions.

These results demonstrate the success of our trading activity, and make Cemig Brazil's largest supplier of electricity to the market of Free Consumers.

We should also draw attention to our efforts to reduce operational costs. We continue with our Operational Efficiency Program, and implementation of initiatives that will help improve our margins of profitability in the coming years, increasing the value that we generate for stockholders.

Among the principal measures we have taken are our motivated retirement programs, implemented in 2008 and 2009, which more than 1,700 employees have now joined. This reduction in the number of employees will have a positive and permanent effect on the Company's expenses and on its results, starting in 2010.

As a result of all these actions taken, we were able to overcome the effects of the international crisis, and closed 2009 with a profit of R\$ 1.861 billion which when adjusted for non-recurring items is R\$ 2.02 billion, or 7.14% more than our net profit of 2008 when adjusted for non-recurring items. Similarly, our cash flow (as measured by Ebitda), was close to R\$ 4 billion, which when adjusted for non-recurring items is 4.7% higher than in 2008 (after the same adjustment).

These results show that, in a macroeconomic environment with fewer uncertainties, Cemig is ready and prepared to grow in a sustainable manner, maintaining the commitment, stated in its planning, to be one of the companies consolidating the Brazilian electricity sector.

b) Capital structure

Cemig has a balanced capital structure. On December 31, 2009 it had debt of approximately R\$ 11.3 billion, of which 37.90% was short-term and 62.10% long-term; and since that date, on January 15, 2010, 63.09% of the short-term debt was transferred to the long term by a debenture issue of **Cemig GT**, which was totally subscribed on March 10, 2010. The resulting tenors of Cemig's debt are compatible with its expectation of cash flow generation, and this gives the Company liquidity and operational flexibility.

The profile of Cemig's debt maturity timetable at December 31, 2009 was satisfactory, with average total of 3 years and payment of up to R\$ 1.60 billion, approximately, starting as from 2011, as shown in this chart:

R\$ million

b) Capital structure

Source: Company.

The average cost of Cemig's debt has been reduced over the years (to 5.3% p.a. on December 31, 2009 – calculating at constant prices), a result of the concentration of the debt (72% of the total) in contracts indexed to the CDI rate. Analysis of the indicators in the table below indicates

Table of Contents

the Company's satisfactory credit quality, highlighted by the very comfortable position in relation to the parameters usually practiced in the financial markets for the indicators shown.

Ebitda / Interest	5.05
Net debt / Ebitda	1.70
Net debt / (Stockholders' equity + Net debt)	40%

Source: Company.

There are no specific possibilities for redemption of the shares issued by the company, beyond those normally specified by law.

c) Payment capacity in relation to the financial commitments assumed

We should indeed emphasize the company's capacity for generation of cash. In 2009, operational activities generated the substantial sum in cash of R\$ 3.505 billion.

The Company's Net cash position on December 31, 2009 was R\$ 4.425 billion.

On the other hand, the Company's net debt on December 31, 2009 was R\$ 6.868 billion. This means that the cash generation in a period of 2 years is greater than the balance payable, an index which provides comfort for both Management and investors as regards the Company's capacity to honor its financial commitments.

The proportions of the debt repayment timetable profile have been perfected. Although the short-term portion stated in the Financial Statements is R\$ 4.280 billion, the Company issued non-convertible debentures in 2010 which will be used for the amortization of this short-term debt. The conditions of the resulting debt payment timetable are appropriate, and perfectly adjusted to the Company's cash flow generation.

Current liabilities on December 31, 2009 were R\$ 8.721 billion, mainly comprising the loans and financings mentioned in the previous paragraph, dividends, taxes and regulatory charges. This amount is less than the Company's current assets, which principally comprise cash, accounts receivable and regulatory assets.

Thus, we consider that the Company has high payment capacity in relation to its financial commitments, maintaining its track record of fully complying with its financial commitments assumed with suppliers, government, stockholders and employees and also guaranteeing its capital expenditure, and future acquisitions.

d) Sources of financing used for Working capital and investment in Non-current assets

In 2009 **Cemig D** raised R\$ 119 million, of which R\$ 91 million was through transactions to roll over bank debt, under Central Bank Resolution 2827, and R\$ 28 million was in financings from Eletrobrás, for the *Reluz* Program. Also, maturity dates of debt were extended, for a total of R\$ 56 million, through amendments to existing contracts.

In **Cemig GT**, R\$ 3.494 billion was raised, of which R\$ 663 million was through transactions to roll over bank debt; R\$ 130 million was through contracts with the BNDES and Finep, for investment in the Baguari hydroelectric plant and plant inventory studies, respectively; and R\$ 2.700 billion was raised through issuance of Promise to Notes, the proceeds of which were to

Table of Contents

be used in acquisition of the shares of **Terna** Participações S.A. and other investments. Also, maturity dates of debt were extended, for a total of R\$ 63 million, through amendments to existing contracts.

e) Sources of financing for Working capital and investment in Non-current assets that it is intended to be used for coverage of shortfalls in liquidity

It should be borne in mind that **Cemig** is a mixed private- and public-sector company, with a majority stockholding held by the State of Minas Gerais, and as such is subject to the rules for containment of lending to the public sector. The same restriction applies also to its subsidiaries which, indirectly, are also state-controlled.

Since 1989, in the attempt to contain the indebtedness of the public sector, the Brazilian federal government has legislated to prevent financial institutions from granting credit to public companies beyond a certain limit. In practice, the alternatives for raising funds in the banking market are few.

Based on the exceptions in Brazilian Central Bank Resolution 2827 of March 30, 2001, the following options for raising of funds remain for Cemig:

- Loans from federal banks for rollover of debt.
- Issuance of securities in the Brazilian and international markets (debentures, medium-term notes, Eurobonds, and units of receivables funds).
- Import financing.
- Financing from multilateral agencies.
- Financings Eletrobrás and development agencies.
- Bank loans guaranteed by commercial sales invoices.

December 2010, and also exempting **Cemig**, as guarantor company, as per correspondence dated March 23, 2010.

Paragraph 5 of Article 11 of the Bylaws on Cemig provides that in conduction of the management of the Company and in the exercise of the right to vote in wholly-owned subsidiaries, jointly-controlled companies, affiliated companies and consortia, the Board of Directors and the Executive Board shall obey and faithfully comply with certain targets, including limitation of the Company's consolidated indebtedness to 2 (two), or less, times the Company's Ebitda (Earnings before interest, tax, depreciation and amortization), and limiting the consolidated ratio of [Net debt / (Net debt plus Stockholders' equity)] to 40% (forty per cent).

At the same time Paragraph 7 of Article 11 of the Bylaws of Cemig states that such targets may be exceeded for reasons related to temporarily prevailing conditions, upon justification by grounds and prior specific approval by the Board of Directors, up to the following limits: The Company's consolidated debt to be limited to 2.5 (two and a half) times its Ebitda (Earnings before interest, tax, depreciation and amortization); and the ratio [Net debt / (Net debt plus Stockholders' equity)] to be limited to 50% (fifty per cent).

The Board of Directors authorized, in 2009, exceeding of the limits specified in Paragraph 5 of Clause 11 of the Bylaws, in obedience to the terms of its Paragraph 7, as a result of the contracting of refinancing of debt by **Cemig GT** and by **Cemig D**, combined with the issuance of the Promissory Notes and Debentures of **Cemig GT**, authorized by the Board of Directors under CRCA-045/2009, of 24-07-2009, re-ratified by CRCA-065/2009, of 28-08-2009, and with the other debts already contracted.

In the financial contracts of Cemig and its subsidiaries and affiliates there are outstanding clauses restricting payment of dividends if the company is in default, restraining any disposal of assets that might compromise the development of its activities, and restraining disposal of stockholding control of the Company.

The issuance of securities by Cemig requires the prior authorization of the Brazilian Development Bank (BNDES), and also of the agents operating as lenders of its financings.

h) Significant alterations in each item of the financial statements

The principal variations that occur in the Company's Financial Statements in 2009 are as follows:

Edgar Filing: ENERGY CO OF MINAS GERAIS - Form 6-K

- Increase of 50.17% in current liabilities, from R\$ 5.808 billion in 2008 to R\$ 8.722 billion in 2009, due to the raising of R\$ 2.700 billion in 2009, of which further details are given in the subsequent topics of this section of the report.
- Increase of 93.74% in the balance of cash, from R\$ 2.284 billion in 2008 to R\$ 4.425 billion in 2009, basically due to the proceeds raised in the funding referred to above.

- Increase of 178.21% in Intangible assets, from R\$ 615 million in 2008 to R\$ 1.712 billion in 2009, basically due to the premium recorded on acquisitions, of which there are greater details in the following topics of this section of the report.

10.2 The chief officers should comment on the following:

a. Results of the Company's operations:

The highlight of Cemig's participation in the regulated market auctions was the sale by Cemig GT in the 9th Adjustment Auction, on February 20, 2009. The objective of this type of auction is to complement the availability of electricity necessary to meet the needs of the consumer market of the distribution concession holders, up to a limit of 1% of this requirement. Exceptionally, for the year 2009, Aneel set the limit of 5% of the total load contracted by the distribution agents.

The strategy adopted, of renegotiation of contracts of its Free Clients, accepting the return of electricity in view of the reduction of consumption caused by the economic recession, enabled **Cemig GT** to have a larger amount of electricity available to operate in the auction, which made it the largest vendor in terms of aggregate revenue and volume sold, boosting the Company's results in 2009.

In 2009 Cemig GT held at over 48 auctions, including purchase and sale of electricity, trading volume of 19,044 GWh, and in participating in a total of 37 purchase and sale auctions promoted by other companies, trading volume of 335,360 GWh. The resulting total traded by the company in the year was 354,404 GWh.

Cemig's consolidated market comprises the sales made by the companies **Cemig Distribuição S.A.**, **Cemig Geração e Transmissão S.A.**, **Light** and other subsidiaries. Through these companies, Cemig operates in all the sectors of the electricity industry and, with a diversified portfolio, serves captive and free final clients, as well as trading energy with other agents that operate in this market.

The volume of electricity sold by **Cemig** in 2009 was in line with the figure for 2008. This result reflects growth in the Residential and Commercial user categories, and an increase in sales in the regulated market, offsetting a reduction in sales to the industrial category of consumers. We emphasize that the impacts of the financial crisis on the market of **Cemig** have been administered through commercial strategies, and through coordination between the needs and opportunities of the various clients and markets that make up the Company's overall portfolio.

Sales represented an increase of 1146 GWh in total consolidated sales based on inclusion of 25% of the electricity sold by **Light**.

Table of Contents

Sales of electricity to final consumers in 2009 were 6.38% lower in 2009 than 2008. This reflects the slowing down of the world economy which had a negative impact on the performance of the industrial consumer category. The main variations in the consumer categories are due to the following factors:

- **Residential:** Electricity invoiced 8.13% higher. The performance of this consumer category can be explained by natural growth, associated with the positive influence of macroeconomic variables related to private consumption (increase in total real wages, transfers of income by the government, a real increase in the minimum wage, low inflation leading to lower loss of workers purchasing power, expansion of the volume of credit to individuals, and growth in sales of household appliances), as well as climatic factors.
- **Industrial:** Electricity invoiced 15.15% lower, on reduction of 12.4% in supply to captive and partially free (hybrid) clients, and a reduction of 16.0% in the volume of electricity sold to Free Clients. This sector was significantly affected by the international financial crisis, especially the mining and metals industries. As well as this impact, the consumer base of free clients in 2008 was increased by some clients having made use of contractual flexibilities, increasing the purchases of electricity in the first months of 2008, due to the increase in the spot (PLD) price in that period. Starting in March 2009, there was a recovery in consumption, though to levels below those of the time before the financial crisis began.
- **Commercial:** Volume of electricity invoiced 5.28% higher. Of the 18 lines of business analyzed, 16 continue to grow, led by: Retailing, Accommodation and Food, Communications Services, General Assistance Services, Health Services, Wholesaling, Financial Institutions and Broadcasting and Entertainment.

OPERATIONAL REVENUE R\$ million

	2009	2008	Var. %
Total sales of electricity	14,581	13,686	6.54
Revenue from use of the network – free consumers	2,244	2,150	4.37
Others	617	652	(5.37)
Total	17,442	16,488	5.79

The main factors affecting revenue in 2009 were:

- Tariff increase for **Cemig D**, with average effect on consumer tariffs of 6.21%, starting from April 8, 2009.
- Reduction in **Cemig D** s tariff, with average impact across all consumer tariffs of a reduction of 12.08%, from April 8, 2008 (full effect in 2009).

Edgar Filing: ENERGY CO OF MINAS GERAIS - Form 6-K

- Posting of regulatory liabilities arising from the adjustment in the Company's Tariff Review, with effect backdated to 2008, representing a reduction in gross revenue of R\$ 214 million, in 2009.
- Volume of energy invoiced to final consumers 6.38% lower (this excludes Cemig's own internal consumption).

Revenue from electricity sold to other concession holders in 2009 was R\$ 1.634 billion, compared to R\$ 1.012 billion in 2008 – an increase of 61.46%.

Table of Contents

This mainly reflects the increase of 25.57% in the volume of electricity sold to other concession holders, and under bilateral contracts, through two new contracts made in auctions of electricity to distributors, for tariffs between R\$ 125.00 and R\$ 145.77. Part of the electricity previously sold to industrial consumers was sold in this market, reflecting the reduction in these consumers' demand as a result of the international recession and its effects on Brazilian industrial output. The volume of electricity sold to other concession holders through bilateral contracts was 13,859,700 MWh in 2009, compared to 11,037,166 MWh in 2008.

This revenue was 4.37%, or R\$ 94 million, higher in 2009, at R\$ 2.244 billion (compared to R\$ 2.150 billion in 2008).

This revenue comes principally from charges to free consumers on the electricity sold by other agents of the electricity sector.

The increase in revenue in 2009 arises basically from the extraordinary revenue of R\$ 158 million arising from **Cemig GT**'s tariff review with backdated effect for the period from July 1, 2005 to June 30, 2009.

Deductions from operational revenues totaled R\$ 5.737 billion in 2009, compared to R\$ 5.598 billion in 2008, an increase of 2.48%, arising from the increase of 16.34% in charges to the consumer from 2008.

Operational costs and expenses (excluding Financial revenue (expenses)) totaled R\$ 8.402 billion in 2009, compared to R\$ 7.506 billion in 2008, an increase of 11.94%. This result mainly reflects the increases in: personnel costs, electricity bought for resale, charges for use of the basic transmission grid, and outsourced services; partially offset by a lower cost of post-employment obligations, and lower operational provisions.

The main variations in operational expenses were:

Electricity bought for resale

The expense on electricity bought for resale in 2009 was R\$ 3.706 billion, 25.20% higher than the figure of R\$ 2.960 billion for 2008. The difference is due to higher purchases of electricity in 2009, related to sales activity. This is a non-controllable cost: the expense recognized in the income statement is the amount passed on to the tariff.

Charges for use of the transmission grid

The expense on charges for use of the transmission network in 2009 was R\$ 831 million, vs. R\$ 724 million in 2008, an increase of 14.78%. These expenses, set by an Aneel Resolution, are payable by electricity distribution and generation agents for use of the facilities that are

Edgar Filing: ENERGY CO OF MINAS GERAIS - Form 6-K

components of the national grid. This is a non-controllable cost: the deduction from revenue recognized in the Income statement corresponds to the value actually passed through to the tariff.

Personnel expenses

Personnel expenses in 2009 totaled R\$ 1.297 billion, vs. R\$ 1.105 billion in 2008, an increase of 17.38%. This result is mainly due to the salary increases of 4.88% and 7.26% given to employees in November 2008 and 2009, respectively; and also the provision, of R\$ 206 million, made in 2009 for the PDV Voluntary Retirement Program partially offset by the effect of the number of employees being 6.49% lower in 2009.

Depreciation and amortization

The expense on depreciation and amortization was 2.94% higher, at R\$ 736 million, in 2009, than in 2008 (R\$ 715 million). This result arises from new assets coming into operation, principally distribution networks and lines.

Table of Contents

Post-employment obligations

Expenses on post-employment obligations in 2009 were R\$ 149 million, compared to R\$ 264 million in 2008, a reduction of 43.56%. These expenses basically represent the interest applicable to Cemig's actuarial obligations, net of the investment yield expected from the pension plans assets, estimated by an external actuary. The reduction in this expense reflects the reduction in the present value of the obligations recorded, as a result of the increase in the interest rates used to discount these obligations to present value.

b. Variations in the revenues attributable to changes in prices, exchange rates, inflation, changes in volumes and introduction of new products and services

The main factors affecting revenue in 2009 were:

- Tariff increase for **Cemig D**, with average effect on consumer tariffs of 6.21%, starting from April 8, 2009.
- Reduction in **Cemig D**'s tariff, with average impact across all consumer tariffs of a reduction of 12.08%, from April 8, 2008 (full effect in 2009).
- Posting of regulatory liabilities arising from the adjustment in the Company's Tariff Review, with effect backdated to 2008, representing a reduction in gross revenue of R\$ 214 million, in 2009.
- Volume of energy invoiced to final consumers 6.38% lower (this excludes Cemig's own internal consumption).

c. Impact of inflation, of the variation in prices of principal inputs and products, of the exchange rate and of interest rates on the Company's operational result and financial result

We believe the principal impacts on the Company are those described below:

- The amounts for Free Energy are updated by the variation in the Selic rate plus 1.00% interest per year.
- In Financial revenue (expenses), the principal impacts arise from variations in exchange rates and in the IGP-M and IPCA inflation indices. The FX impact in 2009 was a gain of R\$ 8 million, compared to a net loss of R\$ 91 million in 2008, net of the compensatory effects relating to financial instruments, arising basically from loans and financings in foreign currency indexed to the US dollar and the yen. This result arises principally from the appreciation of the Real against the dollar and the yen in 2009, while in 2008 those two currencies appreciated against the Real: in 2009 the dollar and the yen depreciated by 25.49% and 27.13%, respectively, compared to appreciation of 31.94% and 62.89%,

respectively, in 2008. For part of its debt in foreign currency the company made swap transactions substituting the CDI rate for the variation in foreign currency exchange rates as the index of contracts. The expense caused by monetary updating of loans and financings in 2009 was 89.80% lower than in 2008, due to the lower figures for the IGP-M and IPCA inflation indices in 2009.

10.3 The chief officers should comment on any material effects that the events below caused or are expected to cause to the Company's financial statements and its results:

a. Introduction or disposal of an operational segment

No such event occurred in the 2009 business year.

b. Constitution, acquisition or disposal of an equity interest

Cemig today is the largest integrated company in the electricity sector, being the third largest generating group, with a total of 65 hydroelectric, thermal and wind power plants, with total installed capacity of 6716 GW. It is the third largest transmission group, with 7,506km of lines, a presence in 13 states of Brazil, and in Chile; and it is the largest distribution group, being responsible for

Table of Contents

approximately 12% of the Brazilian market, in the states of the Minas Gerais and Rio de Janeiro, through its wholly-owned subsidiary **Cemig D**, and its jointly-controlled subsidiary **Light**.

Cemig is in a phase of significant expansion inside and outside Brazil. Its stockholding structure has changed significantly in 2009. As well as the increase of the holding in **Light** and in the transmission companies of the **TBE** group, the company has directly added a further 5 companies to its structure, 3 of them wind generators and two transmission companies.

Acquisition of stake in wind generation companies

In 2009 **Cemig** acquired equity holdings of 49% in 3 wind farms owned by **Energimp S.A.**, in Brazil's northern state of Ceará, with total power of nearly 100 MW, for investment of R\$ 223 million.

Completion of the transaction gives Cemig a 49% holding in the following companies: **Praias de Parajuru** (*Parajuru Beaches*) Wind Farm (28.8 MW), in the municipality of Beberibe (110km from Fortaleza); and the **Praia do Morgado** Wind Farm (28.8 MW) and the **Volta do Rio** Wind Farm (42.0 MW) in the municipality of Acaraú (approximately 250 km from Fortaleza) a total installed generation capacity of 99.6 MW.

Acquisition of an interest in Taesa

On April 23, 2009 **Cemig GT** acquired, from **Terna S.p.A.**, an interest of 65.86% in **Terna Participações S.A.**, a holding company operating in electricity transmission, with a presence in 11 of Brazil's States, for R\$ 2.15 billion. The holding company controls a total of six companies which, in aggregate, operate a total of 3,710km of transmission lines (information not audited by external auditors). The transaction was subject to suspensive conditions including approval by the Brazilian electricity regulator, Aneel (National Electricity Agency).

On August 5, 2009 Cemig's Board of Directors approved, as an alternative to acquisition of all of the shares of **Terna** held by Terna Rete Elettrica Nazionale S.p.A (**Terna S.p.A**), as specified as optional under the Share Purchase Agreement signed between Cemig GT and Terna S.p.A., the possibility of reduction of the final stockholding interest to be held by Cemig GT in that acquisition, to a minimum level of 50% less 1 (one) of the common shares, and, as to the preferred shares, to the percentage realized in the Public Offer to purchase the shares of the minority stockholders of that Company, through a partnership to be constituted with Fundo de Investimentos em Participação Coliseu (**FIP Coliseu**).

The board of Directors authorized assignment of the Purchase Agreement for the Shares in Terna to Transmissora Atlântico de Energia Elétrica (**Atlântico**) The board established that **Cemig GT** shall maintain a stockholding of 49% of Taesa's common shares, in association with FIP Coliseu, holder of the remaining 51%.

Edgar Filing: ENERGY CO OF MINAS GERAIS - Form 6-K

On October 19, 2009 **Cemig GT** announced Completion of the Public Distribution of Units of the First Issue by Fundo de Investimento em Participações Coliseu - FIP Coliseu, structured by Banco Modal S.A., in the total amount of R\$ 1.33 billion. The amount was sufficient for that fund to acquire 51% of the common shares of **Terna**.

On October 30, 2009, **Cemig GT** and **FIP Coliseu** injected capital into **Atlântico**.

On November 3, 2009 financial settlement of the said Share Purchase Agreement signed with Terna S.p.A. was settled, with payment and transfer of the shares owned by Terna to Atlântico, in which **Cemig GT** holds 49% of the registered capital. The transaction involved the purchase of 173,527,113 common shares, representing approximately 65.85% of the total capital of Terna.

Acquisition of an initial interest in Light

Cemig signed two share purchase agreement with **AGC** (Andrade Gutierrez Concessões) and **PCP** (controlling stockholder of Equatorial), for stockholding restructuring of the controlling block of **Light S.A.**

For the acquisition of this holding in Light, a special-purpose company will be constituted, jointly with an equity investment fund (FIP), in which Cemig has a minority holding. On completion of the restructuring, this SPC will hold up to 26.06% of **Light S.A.**, and **Cemig** will retain its original interests in **Light**, each of 13.03%, directly.

Contract with AGC:

Share Purchase Agreement for the acquisition of approximately 13.03% of the total and voting stock of **Light**. The total price of the acquisition is R\$ 785 million, equivalent to R\$ 29.54 per common share, comprising R\$ 753.051 million, corresponding to 12.50% of the total capital of Light, to be paid on the closing date, and R\$ 31.949 million, corresponding to 0.53% of the total capital of Light, to be paid by June 27, 2010. These amounts will be updated by the CDI (Interbank CD) rate, and any dividends or Interest on Equity paid or declared by light in this period will be deducted from them.

Contract with PCP:

Share Purchase Agreement for the acquisition of 7.22% of the total and voting stock of **Light**. For this transaction to be completed, Equatorial will undergo a process of split to separate out the indirect holding in Light to a new company (**Newco**) to be constituted, and to be listed on the BM&F Bovespa at the highest level of corporate governance compliance in that exchange's *Novo Mercado*. Thus, **Newco** will be the holder of the shares in **Light** previously held by **Equatorial**. Subsequently to this split, and to the listing of the shares of **Newco** on the *Novo Mercado* of the BM&F Bovespa, the controlling stockholder of **Equatorial** (FIP PCP) will sell the totality of its direct and/or indirect interest in **Newco** to a company in the capital of which **Cemig** will hold an interest of not less than 20%. The price of this acquisition is the same as that negotiated with AGC, namely R\$ 29.54 per share in **Light**, corresponding to R\$ 434.968 million, for the indirect interest in **Light** currently held by **FIP PCP**.

c. Non-usual events or operations: None took place in 2009.

10.4 The chief officers should comment on:

a. Significant changes in accounting practices:

Law 11638/07 altered, repealed and created new provisions in the Brazilian Corporate Law, in the chapter relating to disclosure and preparation of financial statements. Among other aspects, this changed the criteria for recognition and valuation of assets and liabilities.

These changes in accounting practices, in effect from January 1, 2008, aim to increase the transparency of the accounting statements of Brazilian companies, and eliminate some regulatory barriers that were an obstacle to convergence with International Financial Reporting Standards (IFRS).

The changes introduced by this legislation characterize a change in accounting practices, and all the adjustments with impact on the results for years prior to the years presented were made in the account line Retained earnings in 2008.

Technical Statements and Interpretations issued by the CPC, and CVM Decisions, in 2009

For the purpose of creating new accounting rules, which are part of the joint agenda of the CVM and the CPC, in continuation of the process of harmonizing Brazilian accounting rules with IFRS, begun in 2008, the CPC issued several statements during 2009, with obligatory application for

Table of Contents

the business years starting January 1, 2010, and backdating to 2009 for the purposes of comparability. These have been approved by the CVM, and alter certain accounting practices at present adopted by the Company.

b. Significant effects of the changes in accounting practices

Considering the scale of the complexity of the alterations required by the new pronouncements, the Company is assessing their effects on the financial statements, while taking part in discussions and debates in the market, especially in the bodies and associations of the accounting profession, and with the regulators, any of whom may possibly make a statement of position on specific aspects for application in the electricity sector.

At present, until there is better understanding on the practical application of the pronouncements, it is not possible to quantify the possible effects on the financial statements with reasonable certainty.

The consolidated financial statements for the next business year will be prepared in accordance with CPC 37 *Adoption of International Accounting Standards*, in accordance with CVM Instruction 457 of July 15, 2007.

c. Qualifications or emphases in the Auditor's Opinion:

The Opinion of the external auditors contains no qualifications. Only the following emphases:

1. As described in Explanatory Notes 9, 20 and 25, Companhia Energética de Minas Gerais - Cemig and its subsidiaries have assets and liabilities registered in relation to transactions for sale and purchase of electricity, and other transactions, made in the Electricity Trading Chamber - CCEE (previously, MAE). These amounts were recorded on the basis of calculations prepared and published by the CCEE for transactions carried out up to December 31, 2009, and these calculations may be changed as a result of decisions in current legal actions in progress, brought by companies in the sector, in relation to interpretation of the rules of the wholesale energy market that were in force at the time of the said transactions.

2. The financial statements of Fundação de Seguridade Social **Braslight**, a pension fund sponsored by the joint-controlled subsidiary **Light S.A.**, for the business year ended December 31, 2009, were audited by other independent auditors who issued an Opinion on them dated January 21, 2010 with a paragraph of emphasis on the existence of a balance of R\$ 137.3 million for tax credits originating from the Entity's tax immunity case, arising from final judgment against which there is no further appeal, which, in accordance with the projections of its Management, will be able to be offset, in approximately 9 years, against taxes to be paid in subsequent years. Future realization of the asset is conditional upon continuation of the process of offsetting in relationship with the Federal Revenue Service, which was suspended in September 2005. If the said suspension is maintained, this could cause the Entity, at some point, to provision the asset. This asset guaranteeing actuarial reserves of the Entity was deducted in the calculation of the actuarial deficit of the sponsored subsidiaries, as required by CDM Decision 371/00. Consequently, if the provision is made for this amount, the proportional effect on the Company's result will be R\$ 17.9 million.

3. On December 31, 2009, the indirectly jointly-controlled subsidiary **Brasnorte** Transmissora de Energia S.A. began its operations through obtaining of a term of provisional release for operation from November 27, 2009. Additionally, the indirectly jointly-controlled subsidiary **Taesa Serviços** Ltda. presents accumulated losses. Recovery of the amounts recorded in investments of the Company and in the consolidated property, plant and equipment, relating to the said subsidiaries, in the amounts of R\$ 103.1 million and R\$ 91.1 million, respectively, depend upon the success of their future operations, and these subsidiaries are dependent upon financial

Table of Contents

support from the stockholders and/or third parties until the operations become profitable. The consequent proportional effects on the company are R\$ 33.3 million and R\$ 29.4 million, respectively.

4. The indirectly jointly-controlled subsidiary Madeira Energia S.A. Mesa and its subsidiary have incurred expenses related to development of the project and construction of the Santo Antonio hydroelectric power plant which, in accordance with the financial projections prepared by its Management, should be absorbed by the revenues from the operations. The realization of the asset of consolidated PP&E constituted by the said expenditure, which on December 31, 2009 totaled R\$ 2.918 billion, and the reversal of the uncovered liabilities in the amount of R\$ 100.2 million, will take place as from the start of operations, scheduled for the second half of 2011. The consequent proportional effects on the Company are R\$ 291.8 million and R\$ 10.0 million, respectively.

10.5 The chief officer should indicate and comment on critical accounting policies adopted by the Company, exploring especially accounting estimates made by management on uncertain questions that are material for description of the financial situation and of the results, which require subjective or complex judgments, such as: provisions, contingencies, recognition of revenue, tax credits, long-duration assets, useful life of non-current assets, pension plans, adjustments for foreign currency conversion, costs of environmental recovery, criteria for tests of recovery of assets and financial instruments

The preparation of financial statements requires Management to use estimates for the posting of certain of transactions, which affect the Company's assets and liabilities, revenues and expenses, and also the disclosure of information on data of their financial statements. The final results of those transactions and information, when they are actually carried out in subsequent periods, may be different from those estimates. The Company reviews the estimates and assumptions at least quarterly, except in relation to the Post-employment obligations, which are revised annually. The main estimates related to the financial statements refer to the recording of the effects arising from the Rationing Program, the General Agreement for the Electricity Sector, transactions in the Electricity Trading Chamber (CCEE), the Provision for doubtful credits, Non-controllable costs (CVA), Tax credits, Post-employment obligations, Depreciation, Provisions for contingencies, and Unbilled supply of electricity.

The costs, contributions and actuarial liabilities related to the supplementation of pensions and the other post-employment benefits are determined annually and recognized as obligations, and recorded on the basis of a valuation carried out by independent actuaries, using the Projected Unit Credit Method, for determination of the present value of the obligations, in accordance with CVM Decision 371/00. When the benefits of a plan are expanded the portion of the increase in the benefit relating to employees' past service is recognized in the income statement in a linear manner during the average period up to when the benefits become acquired rights. If the criteria for paying these benefits are met immediately, the expense is recognized immediately in the income statement.

10.6 In relation to the internal controls adopted to ensure the preparation of reliable financial statements, the chief officers should comment on:

a) **the degree of efficiency of such controls, indicating any imperfections and measures taken to correct them**

The Executive Board, including the CEO and the Chief Officer for Finance, Investor Relations and Control of Holdings, is responsible for establishing and maintaining a system of internal controls adopted to ensure the preparation of reliable financial statements.

Table of Contents

The internal controls to ensure the preparation of reliable financial statements include procedures that were implemented to prove, with reasonable certainty:

- (i) the reliability of the records of the accounting and financial information;
- (ii) preparation of the accounting statements in accordance with accounting practices adopted in Brazil;
- (iii) processing of payments and receipts in accordance with authorizations by the management; and
- (iv) timely detection of inappropriate acquisitions and of disposal allocation of material assets.

We emphasize that, due to the limitations inherent to the internal controls, there is the possibility that such controls may not prevent nor detect all deficiencies. Additionally, forecasts in relation to assessment of the effectiveness of the internal controls are subject to the risk that the controls might cease to function due to changes in the conditions in which they operate or cease to be in accordance with policies and procedures.

Management has assessed the effectiveness of the internal controls adopted to ensure preparation of reliable financial statements at December 31, 2009, based on the criteria established in the document Integrated Internal Control Framework, issued by the Committee of Sponsoring Organizations of the Treadway Commission, or COSO, and concluded that, on December 31, 2009, the system of internal controls adopted to ensure the preparation of reliable financial statements is effective.

b) Deficiencies and recommendations on the internal controls present in the external auditor's report

No material deficiencies in internal controls were reported such as might compromise the reliability of the financial statements.

10.7 If the Company has made a public offer for distribution of securities, the chief officers should comment on:

a) How the proceeds of the offering were used

b) **Whether there were material differences between the actual application of the proceeds and the proposals for application published in the prospectuses of the respective distribution**

c) **If there were any differences, the reasons for them**

Securities issued by Cemig

Debentures

In December 2001, Cemig made its first issue of non-convertible debentures, for public distribution, through which 62,500 unsecured debentures, without preference, were issued, with nominal unit value of R\$ 10,000, in two series, each series being for a total amount of 31,250 debentures, the total amount of the issue being R\$ 625 million. Those debentures had issue date of November 1, 2001, and the maturity of the debentures of the first series was initially scheduled for November 1, 2009, and that of the second series for November 1, 2011. The funds raised through their distribution were used for financing of generation, transmission and distribution undertakings, including projects involving partnerships with companies of the private sector, in accordance with

Table of Contents

Cemig's program of generation and transmission works for the years of 2001 and 2002 and the first quarter of 2003; there was no discrepancy between the actual use of the proceeds and the proposal for their use published in the offering documents. The debentures of the first series were renegotiated on November 1, 2005, when the remuneratory interest was altered from IGP M + 12.7% p.a. to CDI + 1.2% p.a. After the renegotiation, 71.5% of the debentures (equivalent to R\$ 349.6 million) remained in circulation and the remaining 28.5% (equivalent to R\$ 139.2 million) were redeemed by Cemig with funds from a bank loan. The debentures of the 2nd series were renegotiated on November 1, 2006, when the remuneratory interest was altered from IGP M + 12.7% p.a. to 104% of the CDI rate. After the renegotiation 47.4% of the debentures (equivalent to R\$ 238.8 million) remained in circulation and the remaining 52.6% (equivalent to R\$ 265.3 million) were redeemed by Cemig with funds arising from a bank loan. Thus, after the respective renegotiations, 22,348 debentures of the first series and 14,804 debentures of the second series remained in circulation and the remaining 8,902 debentures of the first series and 16,446 debentures of the second series returned to Cemig's treasury.

As part of the process of unbundling of Cemig, these debentures were exchanged for debentures of the first issue of Cemig GT, and as a result the first issue of debentures by Cemig was canceled.

In July 2002, Cemig carried out its second issue of debentures, for private distribution, destined for subscription by the State of Minas Gerais, as authorized by State Law 13954/01. In this issue 9,000 non-convertible, subordinated debentures were issued in an undetermined quantity up to the limit of R\$ 90 million. The period of maturity of this issue is 25 years after the date of issuance of each series and the monetary updating is calculated by the IGP M inflation index. These debentures do not carry interest. On September 30, 2002 the first series of 2,250 debentures was issued and on December 22, 2003, Cemig issued the second series, also of 2,250 debentures, each series being in the amount of R\$ 22.5 million, resulting in a total of 4,500 debentures and R\$ 45 million. The funds received by Cemig were applied in the construction and implementation of the Irapé hydroelectric power plant, as specified in the private instrument of commitment for subscription of debentures signed between the State and Cemig on September 10, 2001.

In March 2004 Cemig canceled the series of this issue that had not yet been placed, to carry out its third public issue of debentures and, on December 27, 2004 **Cemig** and **Cemig GT** signed the Private Instrument of Assignment of Rights and Obligations arising from the Deed of Issue of Subordinated Debentures by Cemig, through which Cemig assigned to Cemig GT the rights and obligations arising from the second issue of debentures, the debt of which was entirely assumed by Cemig GT, and which shall be paid to the state of Minas Gerais in the form specified in the said Private Deed of Subordinated Debentures.

In July 2004 Cemig filed with the CVM a program of public issuance of unsecured, non-subordinated, non-convertible, nominal book-entry debentures with a period of up to 2 years, in the total amount of R\$ 1.5 billion (the Program).

Under this Program, on July 19, 2004, Cemig made its third issue of debentures, for public distribution, in which 23,042 unsecured non-convertible debentures were issued, in a single series, with nominal unit value of R\$ 10,000, totaling R\$ 230.4 million, with issue date of June 1, 2004, and maturity on June 1, 2014. Proceeds from this distribution were used to advertise the debts of the Company contracted for realization of investments in distribution of electricity which became due in 2004; there was no difference between the actual use of the funds have a proposal for use published in the offering documents. As part of the process of unbundling of Cemig, the debentures of Cemig's

Table of Contents

3rd Issue were exchanged for debentures of the first issue of Cemig D, and as a result the 3rd issue of debentures by Cemig was canceled. The debentures were updated by the IGP-M and while they were in force entitled holders to annual interest at a fixed rate of 10.5% per year.

On December 28, 2004, Cemig made its fourth issue of debentures, for private distribution, in which 2,250 subordinated debentures not convertible into shares were issued in a single series, with nominal unit value of R\$ 10,000, totaling R\$ 22.5 million, with maturity of 25 years and monetary updating by the IGP-M index. The debentures of this issue did not carry interest and were subscribed solely by the State of Minas Gerais, as authorized by State Law 13954/01. The funds received by Cemig were applied in the construction and implementation of the Irapé hydroelectric power plant, as specified in the private instrument of commitment for subscription of debentures signed between the State and Cemig on September 10, 2001. On December 27, 2004, **Cemig** and **Cemig GT** signed the Private Instrument of Assignment of Rights and Obligations arising from the Deed of Cemig's Fourth Private Issue of Non-convertible Debentures Cemig, through which Cemig assigns to Cemig GT the rights and obligations arising from this issue, the debt of which was assumed in full by Cemig GT and will be settled, with the State of Minas Gerais, in the manner specified in the said Deed.

Also for the purposes of construction and operation of the Irapé hydroelectric power plant, on December 29, 2005 Cemig made its fifth debenture issue, for private distribution, through which 2,250 subordinated, non-convertible debentures were issued in a single series, with nominal unit value of R\$ 10,000, totaling R\$ 22.5 million, with maturity of 25 years and monetary updating by the IGP-M index. The debentures of this issue do not carry interest and were subscribed solely by the State of Minas Gerais, as authorized by State Law 13954/01. On December 29, 2005, Cemig and Cemig GT signed the Private Instrument of Assignment of Rights and Obligations arising from the Deed of the Fifth Private Issue of Non-convertible Debentures by Cemig, through which Cemig assigned to Cemig GT the rights and obligations arising from that issue, the debt of which was fully assumed by Cemig GT and shall be settled with the State of Minas Gerais in the form specified in that deed.

Also for the purposes of construction and operation of the Irapé hydroelectric power plant, on December 28, 2006 Cemig made its sixth debenture issue, for private distribution, through which 3,000 subordinated, non-convertible debentures were issued in a single series, with nominal unit value of R\$ 10,000, totaling R\$ 30 million, with maturity of 25 years and monetary updating by the IGP-M index. The debentures of this issue do not carry interest and were subscribed wholly by the State of Minas Gerais, as authorized by State Law 16512/06. Since the proceeds were to be applied in the Irapé power plant, on February 28, 2007 Cemig signed with Cemig GT the Private Instrument of Assignment of Rights and Obligations arising from the Deed of the Sixth Debenture Issue, for transfer of the proceeds and of the obligation for payment of the debt to Cemig GT.

The CRC Fund

On January 26, 2006, Cemig constituted the CRC Fund, made up of receivable rights under the CRC contract. The CRC Fund was constituted in the form of a closed condominium fund, through which 900 million senior units were offered, in a single series, with unit issue value of R\$ 1.00, in the total amount of R\$ 900 million, and redemption date scheduled for December 31, 2015. The totality of the senior units were subscribed and paid up by Banco Itaú S.A. and by Banco Bradesco S.A. The parameter for return on the senior units corresponds to 100% of the CDI rate, plus

Table of Contents

prefixed coupon interest of 1.7% per annum based on a year of 252 business days. These units will be amortized in 20 6-monthly payments over a period of 10 years. Further, since (i) the dates for 6-monthly payments of the senior units coincide with the dates on which Cemig pays its 6-monthly dividends; and (ii) the fourth Amendment to the CRC contract provides that 65% of the dividends payable by Cemig to the Government of the State, in each payment of dividends, shall be retained by Cemig and transferred automatically to the CRC fund, the units are automatically reimbursed on the said dates. If these dividends are not sufficient to provide a system of fixed payment on the senior units, Cemig, as co-guarantor, will contribute the amount necessary to make such payment.

In addition to the senior units, the CRC Fund issued 760,125,012 non-transferable subordinated units, each with unit issue value of R\$ 1.00, with total value of approximately R\$ 760.1 million and redemption date specified for June 30, 2035. These units were subscribed and paid up exclusively by Cemig. The subordinated units will be amortized using any excess of cash available in the CRC Fund or through its liquidation.

The CRC Fund was structured and distributed by Banco Itaú BBA S.A., lead manager, and Banco Bradesco S.A., and is administered by Intrag Distribuidora de Títulos e Valores Mobiliários Ltda., an affiliated company of Banco Itaú S.A.

On December 30, 2009 the value of the senior units, which have co-obligation by Cemig, was de R\$ 951.0 million.

10.8. Chief officers should describe the material items not evidenced in the financial statements of the Company, indicating:

a. Assets and liabilities held by the Company, directly or indirectly, that do not appear in its balance sheet (off-balance sheet items), such as:

- i. Operational leasings, in the form of both assets and liabilities.
- ii. Portfolios of receivables written off on which the entity maintains risks and responsibilities, including respective liabilities.
- iii. Contracts for future purchase and sale of products or services.
- iv. Contract for construction that has not been terminated.
- v. Contracts for future receipts of financings.

Cemig and its subsidiaries have contractual obligations and commitments that include amortization of loans and financings, contracts with contractors for the construction of new projects, purchase of electricity from Itaipu and other sources, as shown in this table:

Barbacena, 19th floor, B1 Wing, Belo Horizonte, Minas Gerais, or showing them at the time of the meeting.

Belo Horizonte, March 23, 2010.

Sergio Alair Barroso Chairman of the Board of Directors .

Before the items on the agenda of this meeting were put to debate and to the vote, the representative of the stockholder **Southern Electric Brasil Participações Ltda.** stated that the changes in the Bylaws made by the Extraordinary General Meeting of Stockholders of October 25, 1999, and also the subsequent alterations, were approved only by virtue of the suspension of the Stockholders' Agreement, by decision of the Courts, and were thus provisional and precarious. He stated that hence the acts and operations practiced or submitted to approval by the management bodies of Cemig, supported by the said changes in the Bylaws made under the protection of the Court decision in force today, may, at any moment, be reviewed and withdrawn from the world of legal existence. On this question, the representative of the stockholder **The State of Minas Gerais** reminded the meeting that the decision which annulled the Stockholders' Agreement signed between the State of Minas Gerais and Southern Electric Brasil Participações Ltda. no longer has an interim or provisional character. It is, he said, a decision on the merit and it is thus a case not of suspension but of annulment. He added that there is already in existence a decision on the merit that annuls the Stockholders' Agreement, confirmed by the Appeal Court of the State of Minas Gerais. He further explained that the decisions of this Meeting can only take into account what exists at the present moment, and that it would be irresponsible not to vote on matters, in expectation of Court decisions, since, in reality, the said Stockholders' Agreement, by force of Court judgment, cannot produce any effect and the decisions taken are being taken within strict compliance with the Court decision. Continuing, he noted that the Extraordinary and Special Appeals brought by Southern have not been admitted by the Vice-chairman of the Minas Gerais Appeal Court, and that the Higher Appeal Court refused the interlocutory and special appeals brought by Southern, thus underlining and reinforcing the legal situation already stated by the Minas Gerais Appeal Court, that is to say, inefficacy of the Stockholders' Agreement subject of the action. Finally he observed that the Federal Supreme Court, in a judgment given by Justice Joaquim Barbosa on December 16, 2009, refused Interlocutory Appeal 54743, brought by Southern Electric Brasil Participações Ltda.

On this information the representative of the stockholder Southern Electric Brasil Participações Ltda. stated that, notwithstanding the news brought by the representative of the Stockholder The State of Minas Gerais, Southern Electric has lodged a Special Appeal against the judgment given by Mr. Justice Joaquim Barbosa, to put the issue before the other members of the Federal Supreme Court; and that up to the present moment the Appeal is still awaiting judgment.

In accordance with Item 1 of the agenda the Chairman then placed in debate the Report of Management and the Financial Statements for the year ended December 31, 2009, and the respective complementary documents, explaining that they have been widely disclosed in the press, since they were placed at the disposal of stockholders by a notice published in the newspapers *Minas Gerais*, the official journal of the Powers of the State, on March 26, 27 and 30; *O Tempo* on March 26, 27 and 29; and *Valor Econômico*, on March 26, 29 and 30 of this year, and published in the same newspapers on April 20 of this year.

Finally the Chairman put to the vote the Report of Management and the Financial Statements for the year ended December 31, 2009, and the respective complementary documents, and they were approved, with the persons legally impeded abstaining.

Edgar Filing: ENERGY CO OF MINAS GERAIS - Form 6-K

Continuing the proceedings, the Chairman requested the Secretary to read the Proposal by the Board of Directors, which deals with items 2 to 7, 11 and 12 of the convocation, and also the Opinion of the Audit Board thereon, the contents of which documents are as follows:

The above-mentioned proposal of the representatives of the stockholder Companhia Energética de Minas Gerais - Cemig was put to the vote, and approved.

The Board Members elected declared in advance that they are not subject to any prohibition on exercise of commercial activity, that they do not occupy any post in a company which may be considered a competitor of the Company, and that they do not have nor represent any interest conflicting with that of Cemig GT, and assumed a solemn undertaking to become aware of, obey and comply with the principles, ethical values and rules established by the Code of Ethical Conduct of Government Workers and Senior Administration of the State of Minas Gerais.

The Chairman then explained that Cemig has assigned, to each new member of the Board of Directors, as its fiduciary agent, one single share owned by itself, for the period for which such members remain as members of the Board of this company, solely and exclusively to comply with the requirement that the members of the Board of Directors must be shareholders of the company; and that, once the Board Members had completed their period of office or if they were dismissed from their positions, the shares granted to them shall be automatically transferred back to Cemig, without there being any need whatsoever for signature by the Board Members in question. The fiduciary nature of the assignment of the shares is based on the legal principle that determines that a person who receives an asset, in this case, the share, has the commitment to restitute it in a certain event, in this case, the end of the term of office, or leaving office, or being exonerated from it.

The Chairman then stated that the publications by Cemig GT specified in Law 6404 of December 15, 1976, as amended, and in CVM Instruction 232 of February 10, 1995, will be made not only in the newspaper *Minas Gerais*, the official publication of the Powers of the State, but also in *O Tempo* and *Valor Econômico*, without prejudice to possible publication in other newspapers.

The meeting being opened to the floor, and since no-one else wished to make any statement, the Chairman ordered the session adjourned for the time necessary for the writing of these minutes.

The session being reopened, the Chairman, after putting the said minutes to debate and to the vote and verifying that they had been approved and signed, closed the meeting.

The above-mentioned proposal of the representatives of the stockholder Companhia Energética de Minas Gerais - Cemig was put to the vote, and approved.

The Board Members elected declared in advance that they are not subject to any prohibition on exercise of commercial activity, that they do not occupy any post in a company which may be considered a competitor of the Company, and that they do not have nor represent any interest conflicting with that of Cemig D, and assumed a solemn undertaking to become aware of, obey and comply with the principles, ethical values and rules established by the Code of Ethical Conduct of Government Workers and Senior Administration of the State of Minas Gerais.

The Chairman then explained that Cemig has assigned, to each new member of the Board of Directors, as its fiduciary agent, one single share owned by itself, for the period for which such members remain as members of the Board of this company, solely and exclusively to comply with the requirement that the members of the Board of Directors must be shareholders of the company; and that, once the Board Members had completed their period of office or if they were dismissed from their positions, the shares granted to them shall be automatically transferred back to Cemig, without there being any need whatsoever for signature by the Board Members in question. The fiduciary nature of the assignment of the shares is based on the legal principle that determines that a person who receives an asset, in this case, the share, has the commitment to restitute it in a certain event, in this case, the end of the term of office, or leaving office, or being exonerated from it.

The Chairman then stated that the publications by Cemig specified in Law 6404 of December 15, 1976, as amended, and in CVM Instruction 232 of February 10, 1995, will be made not only in the newspaper *Minas Gerais*, the official publication of the Powers of the State, but also in *O Tempo* and *Valor Econômico*, without prejudice to possible publication in other newspapers.

The meeting being opened to the floor, and since no-one else wished to make any statement, the Chairman ordered the session adjourned for the time necessary for the writing of the minutes.

The session being reopened, the Chairman, after putting the said minutes to debate and to the vote and verifying that they had been approved and signed, closed the meeting.

For the record, I, Anamaria Pugedo Frade Barros, Secretary, wrote these minutes and sign them together with all those present.
