Consumers 2014 Securitization Funding LLC
(Issuing Entity)

\$378,000,000
Senior Secured Securitization Bonds, Series 2014A

Transaction Summary

Consumers 2014 Securitization Funding LLC (the Issuing Entity) is issuing \$378,000,000 of Senior Secured Securitization Bonds, Series 2014A (the Bonds) in three tranches. The Bonds are senior secured obligations of the Issuing Entity supported by the Securitization Property (as defined herein), which includes the right to a special, irrevocable nonbypassable charge (the Securitization Charge) paid by Michigan retail electric distribution customers of Consumers Energy Company (Consumers Energy) based on their electricity usage as discussed below. Act 142 (as defined herein) mandates that Securitization Charges be adjusted at least annually, and the Michigan Public Service Commission (the MPSC) further permits true-up adjustments to occur semi-annually (and in certain circumstances quarterly or more frequently) if necessary, in each case to ensure the expected recovery during the succeeding annual period of amounts required for the timely payment of debt service and other required amounts and charges in connection with the Bonds (the True-Up Mechanism).

Michigan legislation found at 2000 PA 142, as amended (as amended, Act 142) authorizes the MPSC to approve the recovery of qualified costs by certain electric utilities through the issuance of securitization bonds. On December 6, 2013, the MPSC issued a financing order (the Financing Order) relating to the Bonds. Consumers Energy unconditionally accepted all conditions and limitations requested by the Financing Order in a letter dated January 24, 2014 from Consumers Energy to the MPSC. As of January 24, 2014, the Financing Order was final and not subject to appeal. Pursuant to the Financing Order, Consumers Energy established the Issuing Entity as a special purpose subsidiary to acquire the Securitization Property and to issue the Bonds.

In the Financing Order, the MPSC authorized a Securitization Charge to be imposed on Covered Electric Customers (approximately 1.8 million Covered Electric Customers as of December 31, 2013) in an amount sufficient to pay on a timely basis scheduled principal of and interest on the Bonds and all ongoing other qualified costs in connection with the Bonds. Covered Electric Customers means all existing and future retail electric distribution customers of Consumers Energy or its successors, except for (i) customers taking retail open access (ROA) service from Consumers Energy as of December 6, 2013 to the extent that those ROA customers remain, without transition to bundled service, on Consumers Energy's retail choice program (Current Choice Customers), (ii) customers to the extent they obtain or use self-service power or (iii) customers to the extent engaged in affiliate wheeling. Consumers Energy, as servicer, will collect the applicable Securitization Charges from Covered Electric

Edgar Filing: CONSUMERS ENERGY CO - Form FWP

Customers and will remit the Securitization Charges to the trustee under the indenture pursuant to which the Bonds will be issued (the Trustee). In the Financing Order, the MPSC affirms that it will act pursuant to the Financing Order to ensure that the expected Securitization Charges are sufficient to pay on a timely basis scheduled principal of and interest on the Bonds and the ongoing other qualified costs. The Financing Order, together with the Securitization Charges authorized by the Financing Order, are irrevocable and not subject to reduction, impairment, postponement, termination or adjustment by further action of the MPSC, except by use of the true-up adjustment procedures approved in the Financing Order.

The Bonds represent obligations only of the Issuing Entity and do not represent obligations of Consumers Energy or any of its affiliates other than the Issuing Entity. The Bonds are not a debt or obligation of the State of Michigan and are not a charge on its full faith and credit or taxing power.

This Preliminary Term Sheet has been prepared solely for informational purposes and is not an offer to buy or sell or a solicitation of an offer to buy or sell any Bonds in any jurisdiction where such offer or sale is prohibited. Issuing Entity and Capital Structure:

Consumers 2014 Securitization Funding LLC is a special purpose Delaware limited liability company. Consumers Energy is the sole member of the Issuing Entity and owns all of the Issuing Entity's equity interests. The Issuing Entity has no commercial operations. The Issuing Entity was formed solely to purchase and own Securitization Property, to issue the Bonds and to perform activities incidental thereto.

In addition to the Securitization Property, the Issuing Entity will be capitalized with an upfront cash deposit equity contribution from Consumers Energy equal to 0.5% of the Bonds' initial principal amount issued held in the capital subaccount and will have an excess funds subaccount to retain any amounts collected and remaining on a payment date after all payments on the Bonds and all ongoing other qualified costs have been made.

(1) Each tranche pays sequentially.

(2) The weighted average lives assume a closing date of July 22, 2014.

(3) Tranche sizes are preliminary and subject to change.

(4) The final maturity date is the date by which the principal must be repaid to prevent a default.

Depositor, Seller, Sponsor and Initial Servicer of the Securitization Property:	Consumers Energy, a Michigan corporation and wholly-owned subsidiary of CMS Energy Corporation, is an electric and gas utility company serving Michigan's lower peninsula. Consumers Energy owns and operates electric distribution and generation facilities and gas transmission, storage and distribution facilities. Consumers Energy serves individuals and businesses operating in the alternative energy, automotive, chemical, metal and food products industries, as well as a diversified group of other industries. Consumers Energy provides electricity and/or natural gas to approximately 6.5 million of Michigan's 10 million residents. Consumers Energy's rates and certain other aspects of its business are subject to the jurisdiction of the MPSC and the Federal Energy Regulatory Commission. The Bonds do not constitute a debt, liability or other legal obligation of Consumers Energy or CMS Energy Corporation. Consumers Energy, acting as the initial servicer, and any successor or assignee servicer, will service the Securitization Property securing the Bonds under a servicing agreement with the Issuing Entity.
Securities Offered:	Senior Secured Securitization Bonds, Series 2014A, listed above, scheduled to pay principal semi-annually and sequentially in accordance with the expected sinking fund schedule. See Expected Sinking Fund Schedule .
Expected Ratings:	Aaa(sf) / AAA(sf) by Moody's and S&P, respectively.*
Payment Dates and Interest Accrual:	Interest payable semi-annually, May 1 and November 1. Interest will be calculated at a fixed rate on a 30/360 basis. The first scheduled payment date is May 1, 2015.
No Optional Redemption:	No optional redemption. Non-callable for the life of the Bonds.
Minimum Denomination:	\$100,000, or integral multiples of \$1,000 in excess thereof, except that one Bond of each tranche may be of a smaller denomination.
Average Life Profile:	Prepayment is not permitted. Extension risk is possible but is expected to be statistically remote.
Credit/Security:	The Bonds will be secured primarily by the Securitization Property, which includes the Issuing Entity's irrevocable right to impose, collect and receive a nonbypassable consumption-based Securitization Charge from Covered Electric Customers (approximately 1.8 million Covered Electric Customers as of December 31, 2013). Securitization Charges are set and periodically adjusted, as discussed below, to collect amounts sufficient to ensure the expected recovery during the succeeding annual period of amounts required for the timely payment of debt service and other required amounts and charges in connection with the Bonds. See also Issuing Entity and Capital Structure and True-up Mechanism for Payment of Scheduled Principal and Interest .

* A securities rating is not a recommendation to buy, sell or hold securities and may be subject to revision or withdrawal at any time.

Securitization Property:

Neither the Securitization Property nor the other collateral securing the Bonds is or will be a static pool of assets. The Securitization Property consists of all of Consumers Energy's rights and interests established pursuant to the Financing Order transferred to the Issuing Entity in connection with the issuance of the Bonds, including the irrevocable right to impose, collect and receive nonbypassable Securitization Charges and the right to implement the True-Up Mechanism. Upon the sale of the Securitization Property to the Issuing Entity and the pledge to the Trustee under the indenture, the Securitization Property will constitute a present property right created by Act 142 and the Financing Order and is protected by the state pledge in Act 142 described below.

Nonbypassable Securitization Charges:

Act 142 provides that the Securitization Charges are nonbypassable, and the Financing Order requires the imposition and the collection of Securitization Charges from all existing and future Covered Electric Customers. Covered Electric Customers do not include (i) Current Choice Customers, (ii) customers to the extent they obtain or use self-service power or (iii) customers to the extent engaged in affiliate wheeling. Any successor to Consumers Energy under Act 142, whether pursuant to any bankruptcy, reorganization or other insolvency proceeding or pursuant to any merger, acquisition, sale or transfer, by operation of law, as a result of electric utility restructuring or otherwise, must perform and satisfy all obligations of Consumers Energy under Act 142. The Securitization Charges are applied to Covered Electric Customers individually and are adjusted and reallocated among all such Covered Electric Customers as necessary under the True-Up Mechanism.

Under the terms of the Financing Order, responsibility for the payment of the Securitization Charges associated with the Bonds is allocated among Covered Electric Customer classes (Securitization Rate Classes) based upon the most recent MPSC-approved production cost allocation methodology (4CP 50/25/25). This methodology allocates 50% of charges to each rate class' average contribution to summer system peak demands, 25% of charges to each rate class' average contribution to on-peak energy consumption and 25% of charges to each rate class' contribution to total energy consumption. Average rate class contribution levels reflect the most recent available three year historical load profiles, applied to the most recent sales forecast. Under the Financing Order, each Securitization Rate Class is allocated a percentage responsibility for the payment of the Bonds and related costs. The Securitization Charge shall be a uniform per kilowatt-hour (kWh) surcharge within each class.

True-Up Mechanism for Payment of Scheduled Principal and Interest:

Act 142 and the Financing Order mandate that Securitization Charges on Covered Electric Customers be reviewed and adjusted by the MPSC at least annually to correct any overcollections or undercollections of the preceding 12 months and to ensure the expected recovery during the succeeding annual period of amounts required for the timely payment of debt service and other required amounts and charges in connection with the Bonds. In addition, the Financing Order provides that true-up adjustments are required on a semi-annual basis (or, one year prior to the last scheduled final payment date for the latest maturing tranche, on a quarterly basis) if the servicer determines that a true-up adjustment is necessary to ensure the expected recovery during the succeeding annual period of amounts required for the timely payment of debt service and other required amounts and charges in connection with the Bonds. True-up adjustments may also be made by the servicer more frequently at any time, without limits as to frequency, if the servicer determines that a true-up adjustment is necessary to ensure the expected recovery during the succeeding annual period of amounts required for the timely payment of debt service and other required amounts and charges in connection with the Bonds. The Financing Order permits mid-year true-up adjustments to be implemented immediately without additional MPSC approval if the proposed true-up adjustment is not opposed. In the Financing Order, the MPSC affirms that it will act pursuant to the Financing Order to ensure that expected Securitization Charges are sufficient to pay on a timely basis all scheduled principal of and interest on the Bonds and ongoing other qualified costs in connection with the Bonds.

There is no cap on the level of Securitization Charges that may be imposed on Covered Electric Customers to pay on a timely basis scheduled principal of and interest on the Bonds and ongoing other qualified costs. Such Securitization Charges may continue to be imposed, charged and collected until the Bonds are paid in full, except that Securitization Charges may not be billed more than 15 years after the beginning of the first complete billing cycle during which Securitization Charges were initially placed on any Covered Electric Customer's bill. Through the True-Up Mechanism, which adjusts for undercollections of Securitization Charges due to any reason, and during that 15-year period, Covered Electric Customers share in the liabilities of all other Covered Electric Customers for the payment of Securitization Charges.

State Pledge:

The State of Michigan has pledged in Act 142, for the benefit and protection of the holders of Bonds, including trustees, collateral agents and other persons acting for the benefit of the holders of Bonds (the Financing Parties), under the Financing Order and Consumers Energy, that it will not take or permit any action that would impair the value of the Securitization Property, reduce or alter, except as allowed in connection with a true-up adjustment, or impair the Securitization Charges to be imposed, collected and remitted to the Financing Parties, until the principal, interest and premium, and any other charges incurred and contracts to be performed, in connection with the Bonds have been paid and performed in full.

Michigan has both a voter initiative and a referendum process. The time for challenging Act 142 through a referendum has expired, but the right of voters in Michigan to enact laws by initiative can be exercised at any time, provided a prescribed process is followed and successfully concluded. Constitutional protections against actions that violate the pledge of the State of Michigan should apply whether legislation is passed by the Michigan legislature or is brought about by a voter initiative.

Type of Offering:

SEC registered.

Tax Treatment:	Fully taxable; treated as debt of Consumers Energy for U.S. federal income tax purposes.
ERISA Eligible:	Yes, as described in the prospectus.
Initial Securitization Charge as a Percentage of Covered Electric Customer's Total Electricity Bill:	The initial Securitization Charge for the Bonds is expected to represent approximately 1% of the total monthly electric bill received by an average 656 kWh Michigan residential Covered Electric Customer served by Consumers Energy as of March 31, 2014. When combined with the securitization charges for the Securitization Bonds, Series 2001-1 (the <u>2001-1 Securitization Bonds</u>) issued by Consumers Funding LLC (the <u>2001-1 Securitization Bond Issuer</u>), a wholly-owned subsidiary of Consumers Energy, the cumulative securitization charges would be expected to represent approximately 2.6% of the total monthly electric bill by an average 656 kWh Michigan residential Covered Electric Customer served by Consumers Energy as of March 31, 2014.
Relationship to the 2001-1 Securitization Bonds:	In November 2001, the 2001-1 Securitization Bond Issuer issued and sold \$468,592,000 of 2001-1 Securitization Bonds in accordance with a financing order and order on rehearing issued by the MPSC on October 24, 2000 and January 4, 2001, respectively. After giving effect to payments on the 2001-1 Securitization Bonds on the April 20, 2014 quarterly payment date, the 2001-1 Securitization Bonds had \$70,614,670 in aggregate principal amount outstanding, which was equal to the amount set forth in the expected amortization schedule for the 2001-1 Securitization Bonds. The final legal maturity date of the 2001-1 Securitization Bonds is October 20, 2016, and the expected final payment date of the 2001-1 Securitization Bonds is October 20, 2015. Consumers Energy currently acts as servicer with respect to the 2001-1 Securitization Bonds. The 2001-1 Securitization Bond Issuer will have no obligations under the Bonds, and the Issuing Entity has no obligations under the 2001-1 Securitization Bonds. The security pledged to secure the Bonds will be separate from the security that is securing the 2001-1 Securitization Bonds. The outstanding 2001-1 Securitization Bonds are currently rated Aaa(sf)/AAA(sf)/AAA by Moody's, S&P and Fitch, respectively.*

For the purposes of preparing the above chart, the following assumptions, among others, have been made: (i) the forecast error stays constant over the life of the Bonds and is equal to an overestimate of electricity usage of -5% (1.82 standard deviations from mean) or -15% (6.69 standard deviations from mean); (ii) the servicer makes timely and accurate filings to make a true-up adjustment to the Securitization Charges semi-annually; (iii) customer charge-off rates are held constant at approximately 3.37% for the residential Securitization Rate Class (comprised of approximately 1,574,000 customers as of December 31, 2013), approximately 0.93% for the secondary Securitization Rate Class (comprised of approximately 207,000 customers as of December 31, 2013), approximately 0.93% for the primary Securitization Rate Class (comprised of approximately 4,000 customers as of December 31, 2013) and approximately 0.93% for the streetlighting Securitization Rate Class (comprised of approximately 5,000 customers as of December 31, 2013); (iv) days sales outstanding are based upon historical averages; (v) operating expenses are equal to projections; (vi) there is no acceleration of the final maturity date of the Bonds; (vii) a permanent loss of all Covered Electric Customers has not occurred; and (viii) the issuance date is July 22, 2014. There can be no assurance that the weighted average lives of the Bonds will be as shown.

A contract of sale will come into being no sooner than the date on which the relevant tranche of the Bonds has been priced and the underwriters have confirmed the allocation of securities to be made to you; any indications of interest expressed by you, and any soft circles generated by the underwriters, will not create binding contractual obligations for you or the underwriters (or any other person or entity). You may withdraw your offer to purchase securities at any time prior to the underwriters' acceptance of your offer.
