**Item 8.01. Other Events**

On November 5 the California Water Service Company, the Registrant's California regulated utility subsidiary ( Company ), received a letter from a lawyer for the City of Visalia stating that the City had decided to appraise the Visalia District Water System as an initial step that could lead to an offer to purchase that system by the City of Visalia. The letter also stated that the City had not made a decision to seek to acquire the Visalia District Water System.

The Company's Visalia District Water System is not for sale and the Company will strongly oppose any eminent domain action by the City of Visalia.

The Company's total utility plant assets associated with the Visalia District Water system was 7% or \$117 million of Company total utility plant assets of \$1.7 billion as of September 30, 2015. The number of connections associated with the Visalia District Water system was 42,400 of Company's 506,100 connections. The recorded balance of total utility plant assets on the Company's balance sheet does not reflect the current fair market value of the company's water system assets since it reflects historical acquisition and construction costs less accumulated depreciation.
