Item 1.01 Entry Into a Material Definitive Agreement.

On September 7, 2017, Adaptimmune Therapeutics plc (the Company or Adaptimmune) announced that GlaxoSmithKline (GSK) has exercised its option under a collaboration and license agreement signed in May 2014 to exclusively license the right to research, develop, and commercialize Adaptimmune s NY-ESO SPEAR T-cell therapy program.

Under the terms of an amended agreement dated as of September 6, 2017 (the Amended Agreement), GSK will pay Adaptimmune up to £48 million (approximately \$61 million) over the course of the transition period. This includes development milestones of up to £18 million (approximately \$23 million) and the option payment of £30 million (approximately \$38 million), which also allows GSK to nominate two additional targets following completion of the transition. Successful continuation of development and subsequent commercialization of NY-ESO would trigger additional payments for development milestones, tiered sales milestones, and mid-single to low double-digit royalties on worldwide net sales.

The foregoing summary of the material terms of the Amended Agreement does not purport to be complete and is qualified in its entirety by reference to the Amended Agreement, a copy of which will be filed with the Securities and Exchange Commission by the Company on its Quarterly Report on Form 10-Q, and the original agreements between the Company and GSK referred to therein.

Item 8.01 Other Events.
