Table of Contents

VISTA GOLD CORP. (AN EXPLORATION STAGE ENTERPRISE)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

(All amounts in tables are in thousands of US Dollars, except per share amounts and number of shares, unless noted otherwise)

1. General

The consolidated interim financial statements of Vista Gold Corp. (an Exploration Stage Enterprise) (the “Corporation”), as of September 30, 2009 have been prepared by the Corporation without audit and do not include all of the disclosures required by generally accepted accounting principles in Canada for annual financial statements. As described in Note 15, generally accepted accounting principles in Canada differ in certain material respects from generally accepted accounting principles in the United States. In the opinion of management, all of the adjustments necessary to fairly present the interim financial information set forth herein have been made. These adjustments are of a normal and recurring nature. The results of operations for interim periods are not necessarily indicative of the operating results of a full year or of future years. These interim financial statements should be read in conjunction with the financial statements and related footnotes included in the Corporation’s Annual Report on Form 10-K for the year ended December 31, 2008, as amended.

2. Nature of operations and changes in accounting policies

Nature of operations

The Corporation evaluates, acquires and explores gold exploration and potential development projects. As such, the Corporation is considered an Exploration Stage Enterprise. The Corporation’s approach to acquisitions of gold projects has generally been to seek projects within political jurisdictions with well established mining, land ownership and tax laws, which have adequate drilling and geological data to support the completion of a third-party review of the geological data and to complete an estimate of the gold mineralization. In addition, the Corporation looks for opportunities to improve the value of its gold projects through exploration drilling, and/or re-engineering the operating assumptions underlying previous engineering work.

In 2007, the Board of Directors and management reevaluated the corporate strategy regarding the development of the Corporation’s more advanced projects. As a result of this reevaluation, the Corporation has begun moving its more advanced projects through preliminary and advanced feasibility studies in preparation for mine development so that production decisions can be made on those projects.

Although the Corporation has reviewed and is satisfied with the title for all mineral properties in which it has a material interest, there is no guarantee that title to such concessions will not be challenged or impugned.

Changes in accounting policies

In February 2008, the CICA issued Section 3064, “Goodwill and Intangible Assets”, which replaces Section 3062, “Goodwill and Intangible Assets,” and results in a withdrawal of CICA Section 3450, “Research and Development Costs,” and amendments to Accounting Guideline (AcG) 11, “Enterprises in the Development Stage,” and CICA Section 1000, “Financial Statement Concepts.” The standard intends to reduce the differences with International Financial Reporting Standards (“IFRS”) in the accounting for intangible assets and results in closer alignment with U.S. GAAP. Under former Canadian standards, more items were recognized as assets than under IFRS or U.S. GAAP. The objectives of CICA Section 3064 are to reinforce the principle-based approach to the recognition of assets only in accordance with the definition of an asset and the criteria for asset recognition. This standard is effective for the Corporation

commencing January 1, 2009. The Corporation has determined there is no impact on its current financial statements.

3. Amayapampa disposal consideration

On April 7, 2008, the Corporation entered into an agreement to dispose of its wholly-owned subsidiary Vista Gold (Antigua) Corp. ("Vista Gold Antigua") to Republic Gold Limited ("Republic"). Vista Gold Antigua indirectly held the Corporation's interest in the Amayapampa gold project in Bolivia. Under the terms of the transaction, Republic agreed to pay to the Corporation, \$3.0 million in three payments of \$1.0 million. The first of these payments will be due and payable upon the start of Commercial Production (as defined in the purchase and sale agreement) at Amayapampa followed by \$1.0 million payments on each of the first and second anniversaries of the start of commercial production. In addition, Republic agreed to pay to the Corporation a net smelter return royalty ("NSR") on the gold produced by or on behalf of Republic from the Amayapampa project in varying percentages depending on the price of gold per ounce. When gold is between \$500.01 and \$650.00 per ounce, a 2% NSR is payable, when the price of gold is between \$650.01 and \$750.00 per ounce, a 3% NSR is payable, and when the price of gold is \$750.01 per ounce and above, an NSR of 3.5% is payable. The NSR is capped at 720,000 gold equivalent ounces and no NSR payments are due to the Corporation if the gold price is below \$500 per ounce. The fair value of the consideration received upon the disposal of the Amayapampa project has been calculated as of September 30, 2009 using probability weighted cash flow scenarios and assumptions including future gold prices, estimated gold production and the timing of commencement of commercial production. The majority of these inputs in the "income approach" valuation model used by the Corporation are considered to be level three unobservable inputs as defined by SFAS No. 157, "Fair Value Measurements." These are the Corporation's own assumptions based on management's best estimates and the best information available at the time.

	\$416	\$375	\$791	\$2,740	\$5,413	\$8,153

On April 3, 2009 the Corporation announced that it had sold all of its 1,529,848 shares of Allied Nevada Gold Corp. ("Allied") for \$9,016,088. These shares had an original cost of \$2,194,397 and when sold, resulted in a realized gain of \$6,821,691. In May 2007, the Corporation completed a transaction that resulted in the formation of Allied and the transfer of the Corporation's Nevada properties to Allied. The Allied shares sold by the Corporation were retained in connection with this transaction to facilitate the payment of any taxes payable by the Corporation in respect of the transaction. The Corporation has determined that there are no other taxes payable by it in respect of the transaction and made the decision to sell the Allied shares at the appropriate time and use the cash for project development requirements.

5. Mineral properties

	2008			2009					
	December 31, net balance	Acquisition costs	Disposal of mineral property	Option payments	Exploration & land costs	Capitalized interest	Capitalized stock based compensation	Year to date activity	September 30, ending balance
Long Valley, United States	960	-	-	-	18	-	-	18	978
Yellow Pine, United States	878	-	-	-	3	-	-	3	881

Guadalupe de los Reyes, Mexico	3,136	-	-	-	133	-	5	138	3,274
Awak Mas, Indonesia	3,757	-	-	-	166	-	1	167	3,924
Mt. Todd, Australia	11,967	-	-	-	1,390	-	51	1,441	13,408
Other	472	-	(321)	50	17	-	-	(254)	218
	\$ 30,407	\$ -	\$ (321)	\$ 50	\$ 2,974	\$ 2,330	\$ 127	\$ 5,160	\$ 35,567

The recoverability of the carrying values of the Corporation's mineral properties is dependent upon the successful start-up and commercial production from, or sale or lease of, these properties and upon economic reserves being discovered or developed on the properties. Development and/or start-up of any of these projects will depend, among other things, on management's ability to raise additional capital for these purposes. Although the Corporation has been successful in raising such capital in the past, there can be no assurance that it will be able to do so in the future.

A write-down in the carrying values of one or more of the Corporation's mineral properties may be required in the future as a result of events and circumstances, such as the Corporation's inability to obtain all the necessary permits, resulting in an evaluation of gold resources and the application of an impairment test which is based on estimates of gold resources and gold prices. The Corporation has determined that no impairment provision is currently required.

Table of Contents

VISTA GOLD CORP. (AN EXPLORATION STAGE ENTERPRISE)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

(All amounts in tables are in thousands of US Dollars, except per share amounts and number of shares, unless noted otherwise)

As of September 30, 2009, the Corporation had not yet received the necessary permits needed to begin development and construction of the Paredones Amarillos gold project. The Corporation has subsequently received the Temporary Occupation Permits ("TOPs"), which are a necessary prerequisite for the Change of Forest Land Use Permit ("CFLUP"). The Corporation has the necessary environmental permit and has completed the other prerequisite studies for the submittal of the CFLUP permit application and expects to file the permit application in the upcoming days. See Note - 17.

On June 2, 2009, the Corporation sold most of its remaining patented mining claims in Colorado for cash proceeds of \$188,000. These claims had a book value of \$321,000 and upon disposition the Corporation recognized a loss of \$133,000.

6. Property, plant and equipment

	September 30, 2009			December 31, 2008		
	Cost	Accumulated Depreciation	Net	Cost	Accumulated Depreciation	Net
Paredones Amarillos, Mexico	18,168	26	18,142	18,006	12	17,994
Awak Mas, Indonesia	119	84	35	116	70	46
Mt. Todd, Australia	791	272	519	584	170	414
Corporate, United States	300	224	76	252	173	79
	\$19,378	\$ 606	\$18,772	\$18,958	\$ 425	\$18,533

7. Brokered private placement of convertible notes

On March 4, 2008, the Corporation completed a private placement in which the Corporation issued and sold \$30 million in aggregate principal amount of senior secured convertible notes (the "Notes"). The Notes are secured only by the assets at the Paredones Amarillos gold project. The Notes mature at face value on March 4, 2011 (the "Maturity Date"). The Notes pay interest of 10% per annum. Interest is payable each year in two installments on June 15 and December 15, and the principal is payable on the Maturity Date.

The Notes are convertible at the holder's or issuer's discretion in accordance with the terms of the Notes. The holder can convert all or part of the debt at any time prior to the Maturity Date or the business day immediately preceding the Redemption Date at a price of \$6.00 per common share (subsequently adjusted to \$4.80, as discussed below), subject to adjustment in certain circumstances. The "Redemption Date" represents the date that the Notes will be redeemed in the event that the Corporation redeems the Notes.

The Corporation can convert all, but not part, of the Notes after March 4, 2009 if the weighted-average price of the Corporation's common shares as quoted on the NYSE — AMEX ("AMEX") has been equal to or greater than \$9.00 per share for 15 consecutive trading days. The notice of conversion must occur within 10 days of any such 15-day period and the share price must be equal to or greater than \$9.00 on the date the notice is delivered. The conversion price was originally \$6.00 per common share and is subject to adjustments in certain circumstances.

Pursuant to the terms of the Notes, on March 4, 2009, the conversion price of the Notes was automatically adjusted from \$6.00 per share to \$4.80 per share. As a result of the adjustment, 6.25 million Common shares are issuable upon conversion of the Notes. Prior to the adjustment, 5 million Common shares were issuable upon the conversion of the Notes.

The Notes have been accounted for in accordance with EIC 164, "Convertible and other Debt Instruments with Embedded

Derivatives". Under EIC 164, the fair value of the conversion feature is recorded as equity. The issuance date fair value of the conversion feature was estimated to be \$6.8 million and was classified as the equity component of convertible notes with the residual balance of \$23.2 million being recorded as the fair value of the Corporation's obligation to make principal and interest payments and has been classified as long-term debt. The fees totaling \$1,988,000 related to the issuance of the Notes have been allocated pro-rata between debt issuance costs of \$1,531,000 and equity issuance costs of \$457,000.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

(All amounts in tables are in thousands of US Dollars, except per share amounts and number of shares, unless noted otherwise)

On July 14, 2009, the Corporation entered into Note Repurchase Agreements (the “Whitebox Repurchase Agreements”) with Whitebox Combined Partners, LP (“Whitebox Combined Partners”), Whitebox Convertible Arbitrage Partners, LP (“Whitebox Convertible Arbitrage”) and Whitebox Special Opportunities Fund Series B Partners, LP (“Whitebox Special Opportunities”) whereby the Corporation agreed to repurchase their respective Notes.

Pursuant to the Whitebox Repurchase Agreements, the Corporation agreed to repurchase Notes (i) in the principal amount of \$504,000 from Whitebox Combined Partners for an aggregate purchase price, including interest, of \$331,800; (ii) in the principal amount of \$510,000 from Whitebox Convertible Arbitrage for an aggregate purchase price, including interest, of \$335,750; and (iii) in the principal amount of \$319,000 from Whitebox Special Opportunities for an aggregate purchase price, including interest, of \$210,008, based on a settlement date of July 14, 2009. The Corporation allocated the consideration paid on the repurchase of the convertible notes to the liability and equity elements of the security based on their relative fair values at the date of the transaction as is required under EIC 196. A gain of \$537,000 was recorded in the Corporation’s Consolidated Statement of Earnings and (Loss) as a result of the Notes repurchase.

The Whitebox Repurchase Agreements were initiated by Whitebox Advisors LLC and were not the result of any solicitation by or on behalf of the Corporation. The Corporation has not initiated any broader effort to repurchase or restructure any of its remaining Notes and did not act upon the basis of material non-public information in determining to enter into the Whitebox Repurchase Agreements.

The Corporation capitalizes interest and accretion based on expenditures on qualifying assets. As of September 30, 2009, the Corporation had qualifying expenditures of approximately \$17.8 million related to the equipment purchase for the Paredones Amarillos project. The Corporation has expended approximately \$27.3 million for ongoing operations at the Paredones Amarillos project. This includes approximately \$17.8 million towards the purchase of gold processing equipment to be used at the Paredones Amarillos project. The remaining \$2.7 million raised from the private placement, is restricted for, and will be used for ongoing development at the Paredones Amarillos project.

A reconciliation of the carrying value of the long-term liability portion of the Notes is as follows:

Principal amount of the Notes	\$ 30,000
Issuance costs allocated to long-term liabilities	(1,531)
Conversion feature allocated to equity before issuance costs	(6,755)
Carrying value of the Notes upon issuance	21,714
Repurchase of \$1.3 million of convertible notes	(1,103)
Accretion expense	3,626
Carrying value of the Notes at September 30, 2009	\$ 24,237

8. Capital stock

Number of shares	Capital stock
---------------------	------------------

	issued	
As of December 31, 2008	34,475,829	\$225,098
Public offering	8,800,000	17,809
Over-allotment	1,320,000	2,739
As of September 30, 2009	44,595,829	\$245,646

On September 21, 2009, the Corporation completed a public offering of common shares pursuant to a shelf registration statement previously filed with the U.S. Securities and Exchange Commission (the "SEC") and a shelf prospectus previously filed with certain Canadian securities regulatory authorities. The Corporation offered and sold 8.8 million common shares at a price of \$2.25 per common share. The Corporation granted the underwriters a 30-day option to purchase up to 1.32 million additional common shares to cover over-allotments, if any. Proceeds to the Corporation from the public offering, net of commissions, fees and expenses, were approximately \$17.8 million.

On September 25, 2009, the Corporation completed the closing of the sale of 1.32 million common shares, pursuant to the underwriters' exercise of the over-allotment option, which the Corporation granted in connection with its public offering of common shares. Consistent with the public offering of common shares that closed on September 21, 2009, the 1.32 million common shares were sold to Dahlman Rose & Company and Wellington West Capital Markets, as underwriters, at the public offering price of \$2.25 per common share. The over-allotment was made pursuant to the Corporation's shelf registration statement filed with the SEC and a shelf prospectus filed with certain Canadian securities regulatory authorities. With the sale of the additional 1.32 million common shares to the underwriters, 10.12 million common shares in total were sold in connection with the offering. Proceeds to the Corporation from the over-allotment, net of commissions, were approximately \$2.7 million.

9. Options to purchase common shares

Under the Corporation's Stock Option Plan (the "Plan"), the Corporation may grant options to directors, officers, employees and consultants of the Corporation or its subsidiaries. The maximum number of common shares of the Corporation that may be reserved for issuance under the Plan is a variable number equal to 10% of the issued and outstanding common shares on a non-diluted basis. Under the Plan, the exercise price of each option shall not be less than the market price of the Corporation's common shares on the date preceding the date of grant, and an option's maximum term is 10 years or such other shorter term as stipulated in a stock option agreement between the Corporation and the optionee. Options under the Plan are granted from time to time at the discretion of the Board of Directors, with vesting periods and other terms as determined by the Board.

The fair value of stock options granted to employees and directors was estimated at the grant date using the Hull-White trinomial lattice option pricing model, using the following weighted average assumptions:

	September 2009	September 2008
Expected volatility	77.69 - 78.80%	55.07 - 55.19%
Risk-free interest rate	2.45 - 2.58%	3.09 - 3.15%
Expected lives (years)	5	5
Dividend yield	N/A	N/A

Option pricing models require the input of highly subjective assumptions including the expected price volatility. Expected price volatility is based on the historical volatility of the Corporation's common shares. Changes in the subjective input assumptions can materially affect the fair value estimate, and therefore, the existing models do not necessarily provide a reliable measure of the fair value of the Corporation's stock options. The expected term of the options granted is derived from the output of the option pricing model and represents the period of time that the options granted are expected to be outstanding. The risk-free rate for the periods within the contractual term of the option is based on the U.S. Treasury yield curve in effect at the date of grant.

A summary of option activity under the Corporation's Stock Option Plan as of September 30, 2009, and changes during the nine-month period then ended is set forth in the following table:

	Number of Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term
Outstanding - December 31, 2008	2,184,747	\$ 4.39	3.55

Edgar Filing: VISTA GOLD CORP - Form 10-Q

Table of Contents

VISTA GOLD CORP. (AN EXPLORATION STAGE ENTERPRISE)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

(All amounts in tables are in thousands of US Dollars, except per share amounts and number of shares, unless noted otherwise)

The total number of options outstanding at the end of the quarter is 2,949,386 with exercise prices ranging from approximately \$1.77 to \$7.45 and remaining lives of 0.11 to 4.98 years. The total number of options outstanding represents 6.6% of issued capital.

A summary of the status of the Corporation's unvested stock options as of September 30, 2009, is set forth below:

	Number of Shares	Weighted-Average Grant Date Fair Value
Unvested - December 31, 2009	415,000	\$ 1.49
Granted	25,000	1.06
Forfeited	(2,500)	1.30
Unvested - March 31, 2009	437,500	\$ 1.30
Vested	(5,000)	1.35
Unvested - June 30, 2009	432,500	\$ 1.30
Granted	405,000	0.91
Vested	(407,500)	1.32
Unvested - September 30, 2009	430,000	\$ 0.92

As of September 30, 2009, there was \$3,864,198 of unrecognized compensation expense related to the unvested portion of options outstanding. This expense is expected to be recognized over a weighted-average period of 0.87 years.

10. Contributed surplus

	September 30, 2009	December 31, 2008
Balance, beginning of year	\$1,387	\$253
Cancelled options—Note 8	14	341
Expired options—Note 8	219	262
Expired warrants	-	531
Balance, end of year	\$1,620	\$1,387

11. Accumulated other comprehensive income

A reconciliation of the amounts contained in accumulated other comprehensive income is as follows:

	Accumulated other comprehensive income, before tax	Accumulated other comprehensive income, net of tax
As of December 31, 2008	\$ 5,413	\$ 4,602
Increases to fair market value during period	1,383	1,175
Increases due to realization of loss	7	6
As of March 31, 2009	\$ 6,803	\$ 5,783
Increases to fair market value during period	233	198
Decreases due to realization of gain	(6,822)	(5,798)
As of June 30, 2009	\$ 214	\$ 183
Increases to fair market value during period	176	149
Decreases due to realization of a gain	(14)	(13)
As of September 30, 2009	\$ 376	\$ 319

(All amounts in tables are in thousands of US Dollars, except per share amounts and number of shares, unless noted otherwise)

12. Financial instruments

Financial assets and financial liabilities are classified into one of five categories: held-to-maturity, available-for-sale, held-for-trading, loans and receivables and other financial liabilities.

All financial instruments classified as available-for-sale or held-for-trading are subsequently measured at fair value. Changes in the fair value of financial instruments designated as held-for-trading are charged or credited to the statement of loss for the relevant period, while changes in the fair value of financial instruments designated as available-for-sale, excluding impairments, are charged or credited to other comprehensive income until the instrument is realized. All other financial assets and liabilities are accounted for at cost or at amortized cost depending upon the nature of the instrument. After their initial fair value measurement, they are measured at amortized cost using the effective interest rate method.

Financial Assets

The carrying amounts and fair values of financial assets are as follows:

		September 30, 2009		December 31, 2008	
Category		Estimated Fair Value	Carrying Value	Estimated Fair Value	Carrying Value
Cash and cash equivalents	Held-for-trading	\$33,723	\$33,723	\$13,266	\$13,266
Accounts receivable (1)	Loans and receivables	55	55	127	127
Amayapampa disposal consideration	Held-for-trading	4,813	4,813	4,813	4,813
Marketable securities (2)	Available-for-sale	791	791	8,153	8,153
Total financial assets		\$39,382	\$39,382	\$26,359	\$26,359

(1) Carrying amount is a reasonable approximation of fair value.

(2) The fair value represents quoted market prices in an active market.

Financial liabilities

The carrying amounts and fair values of financial liabilities are as follows:

		September 30, 2009		December 31, 2008	
Category		Estimated Fair Value	Carrying Value	Estimated Fair Value	Carrying Value
Accounts payable and accrued liabilities (1)	Other financial liabilities	\$1,518	\$1,518	\$803	\$803
Other long-term liabilities (1)	Other financial liabilities	228	228	225	228
Convertible notes (2)	Other financial liabilities	26,973	24,237	25,896	23,496
Total financial assets		\$28,719	\$25,983	\$26,924	\$24,527

- (1) Carrying amount is a reasonable approximation of fair value.
- (2) The carrying value of the convertible notes is being accreted to their maturity value over their expected life using the effective interest rate method. The fair value of the convertible notes has been estimated using the net present value method for the full amount of the remaining \$28.6 million debt.

Financial instrument risk exposure and risk management

The Corporation is exposed in varying degrees to a variety of financial instrument related risks. Management approves and monitors the risk management processes. The types of risk exposure and the way in which such exposure is managed is provided as follows:

Credit risk

The Corporation's credit risk is primarily attributable to its cash and cash equivalents. The Corporation monitors its cash and cash equivalents in order to limit its exposure to credit risk. The Corporation has invested in certificates of deposits in some of its savings accounts. However, these investments are backed by the Federal Deposit Insurance Corporation.

Liquidity risk

The Corporation's objective is to maintain sufficient capital to meet short term business requirements, after taking into account the Corporation's holdings of cash and cash equivalents and cash flows from financing activities. The Corporation's cash and cash equivalents are held in interest bearing liquid savings accounts.

Market risk

The significant market risk exposure to which the Corporation is exposed is interest rate risk. The Corporation's policy is to invest cash at floating rates of interest in short-term highly liquid cash savings accounts in order to maintain liquidity. Fluctuations in interest therefore have little impact on the value of cash equivalents and short term investments. With respect to financial liabilities, the convertible notes are not subject to interest rate risk because they bear interest at a fixed rate and are not subject to fluctuations in interest.

13. Supplemental cash flow information

There were no significant non-cash transactions during the nine-month period ended September 30, 2009.

Significant non-cash transactions during the nine months ended September 30, 2008 included: (a) the Corporation's issuance of 37,318 common shares as a success fee payment to Prime Corporate Finance Pty Limited as compensation for advisory services provided to the Corporation in connection with the Corporation's disposition of the Amayapampa project to Republic Gold Limited (Note 3); (b) the Corporation's issuance of 213,503 common shares as partial compensation for the acquisition of interests in various mineral properties adjacent to the Corporation's Guadalupe de los Reyes project in Mexico; and (c) the Corporation's issuance of 200,000 common share purchase warrants to Casimir Capital LP as partial compensation for serving as agent for the Corporation's private placement of senior secured convertible notes (Note 7).

VISTA GOLD CORP. (AN EXPLORATION STAGE ENTERPRISE)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

(All amounts in tables are in thousands of US Dollars, except per share amounts and number of shares, unless noted otherwise)

14. Geographic and segment information

The Corporation evaluates, acquires and explores gold exploration and potential development projects. These activities are focused principally in Mexico, Australia, North America and Indonesia. The Corporation reported no revenues in the nine-month period ended September 30, 2009, or for the same period in 2008. Geographic segmentation of mineral properties and plant and equipment is provided in Notes 5 and 6.

15. Differences between Canadian and United States generally accepted accounting principles

The Corporation prepares its financial statements in accordance with accounting principles generally accepted in Canada, which differ in some respects from those in the United States. The significant differences between generally accepted accounting principles ("GAAP") in Canada and in the United States, as they relate to these financial statements, are as follows:

- (a) In accordance with U.S. GAAP, exploration, mineral property evaluation and holding costs are expensed as incurred. When proven and probable reserves are determined for a property and a bankable feasibility study is completed, then subsequent development costs on the property would be capitalized. Total capitalized cost of such properties is measured periodically for recoverability of carrying value under SFAS No. 144. Under Canadian GAAP, all such costs are permitted to be capitalized.
- (b) Under Canadian corporate law, the Corporation underwent a capital reduction in connection with the amalgamation of Granges, Inc. ("Granges") and Hycroft Resources & Development, Inc. whereby share capital and contributed surplus were reduced to eliminate the consolidated accumulated deficit of Granges as of December 31, 1994, after giving effect to the estimated costs of amalgamation. Under U.S. corporate law, no such transaction is available and accordingly is not allowed under U.S. GAAP.
- (c) In accordance with U.S. GAAP (SFAS No. 123R), the fair value of all options granted after January 1, 2006 is calculated at the date of grant and expensed over the expected vesting period. On transition to this new standard, the unvested portion of options granted to employees before January 1, 2006 is expensed over the remaining vesting period using the fair value on the date of grant. Prior to January 1, 2006, the Corporation did not record any compensation cost on the granting of stock options to employees and directors as the exercise price was equal to or greater than the market price at the date of grants for U.S. GAAP purposes under APB Opinion No. 25. SFAS No. 123R essentially aligns U.S. GAAP with Canadian GAAP for accounting for stock-based compensation.
- (d) In accordance with U.S. GAAP, the entire amount of convertible debt is classified as a liability and recorded at fair value on the date of issuance. Under Canadian GAAP, the fair value of the conversion feature of the convertible debt is classified as equity and the residual balance is classified as a liability. Under Canadian GAAP a portion of the debt issuance costs were allocated to equity. Under U.S. GAAP all issuance costs were allocated to debt. The liability portion is accreted each period in amounts which will increase the liability to its full face amount of the convertible instrument as of the maturity date.
- (e) In accordance with U.S. GAAP (SFAS No. 109), the reversal of a valuation allowance which is directly related to the gain or loss of available-for-sale securities, when a Corporation has no expectations of taxable income in

Edgar Filing: VISTA GOLD CORP - Form 10-Q

future periods, is recorded in other comprehensive income/(loss). Under Canadian GAAP, the Corporation adopted EIC 172, effective September 30, 2008. This standard requires the recognition of the tax benefit or loss of previously unrecognized tax loss

carryforwards associated with the unrealized holding gains and losses of available-for-sale securities to be recognized in net income or net loss. This abstract required retrospective restatement of all prior periods beginning with January 1, 2007. The adoption of EIC 172 resulted in a future income tax expense being recorded as part of the Corporation's Net Loss, whereas under SFAS 109 the future income tax expense would be recorded as part of the Corporation's Comprehensive Loss.

(f) In 2000, the carrying values of certain long-lived assets exceeded their respective undiscounted cash flows.

Following Canadian GAAP at that time, the carrying values were written down using the undiscounted cash flow method. Under U.S. GAAP, the carrying values were written down to their fair values using the discounted cash flow method, giving rise to a difference in the amounts written down. During 2007, the carrying values of certain long-lived assets exceeded their respective discounted cash flows. Under Canadian GAAP, the carrying values were written down using the discounted cash flow method. Under U.S. GAAP, a write-down was not required as the carrying value of the asset was already written down to the fair-value using the discounted cash flows during 2000. In 2008, the future consideration on the disposal of Amayapampa is designated as a financial asset held for trading and is recorded at fair value.

The significant differences in the consolidated statements of loss and comprehensive loss relative to U.S. GAAP were:

In May 2009, the FASB issued Statement No. 165, "Subsequent Events". The new statement is intended to establish general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. This standard requires the disclosure of the date through which an entity has evaluated subsequent events and the basis for selecting that date, that is, whether that date represents the date the financial statements were issued or were available to be issued. This statement became effective for the Corporation on September 30, 2009. The Corporation reviewed events for inclusion in the financial statements through November 5, 2009, the date that the accompanying financial statements were issued.

In April 2009, the FASB issued FASB Staff Position (“FSP”) FAS 157-4, “Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly”. This FSP provides additional guidance in determining when observable transaction prices or quoted prices in markets that have become less active require significant adjustment to estimate fair value. This FSP became effective for the Corporation on September 30, 2009. The Corporation has determined this FSP had no impact on its consolidated financial statements.

In March 2008, the FASB issued Statement No. 161, “Disclosures about Derivative Instruments and Hedging Activities”. The new standard is intended to improve financial reporting about derivative instruments and hedging activities by requiring enhanced disclosures to enable investors to better understand their effects on an entity’s financial position, financial performance, and cash flows. It is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008, with early application encouraged. The Corporation has determined this standard had no impact on its consolidated financial statements.

In February 2008, the FASB issued FSP FAS 157-2, “Effective Date of FASB Statement No. 157,” which amends SFAS No. 157 by delaying its effective date by one year for non-financial assets and non-financial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis. Therefore, the application of SFAS No. 157 relating to our non-financial assets and non-financial liabilities was adopted prospectively beginning January 1, 2009. See Note 12 — Financial Instruments for additional information. The Corporation has determined this FSP had no impact on its consolidated financial statements.

In December 2007, the FASB issued SFAS No. 160, “Noncontrolling Interests in Consolidated Financial Statements”. SFAS No. 160 establishes new accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. It clarifies that a noncontrolling interest in a subsidiary (minority interest) is an ownership interest in the consolidated entity that should be reported as equity in the Consolidated Financial Statements and separate from the parent company’s equity. Among other requirements, this standard requires consolidated net income to be reported at amounts that include the amounts attributable to both the parent and the noncontrolling interest. It also requires disclosure, on the face of the Consolidated Statement of Loss, of the amounts of consolidated net loss attributable to the parent and to the noncontrolling interest. This statement became effective for the Corporation on January 1, 2009. As of September 30, 2009, the Corporation did not have any minority interests.

In December 2007, the FASB issued SFAS No. 141 (revised 2007), “Business Combinations” (“SFAS No. 141(R)”). SFAS No. 141(r) establishes principles and requirements for how an acquirer recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, any non-controlling interest in the acquiree and the goodwill acquired. SFAS No. 141(r) also establishes disclosure requirements to enable the evaluation of the nature and financial effects of the business combination. SFAS No. 141(r) is effective for fiscal years beginning after December 15, 2008. The Corporation had no business combinations during the quarter ended September 30, 2009; therefore this standard had no impact on our consolidated financial statements.

16. Related party transactions

On April 1, 2009, the Corporation entered into an agreement with Sierra Partners LLC (“Sierra”) to provide investor relations and corporate finance consulting services to the Corporation. The founder and partner of Sierra is also a director of the Corporation. Under the terms of the agreement, Sierra will provide consulting services to the Corporation commencing April 1, 2009 and ending on March 31, 2010. Sierra will assist with the Corporation’s efforts to maintain an Investor Relations program and provide support and analysis of the Corporation’s general corporate finance and strategy efforts. As compensation for these services, the Corporation agreed to pay to Sierra a monthly retainer fee of \$10,000 during the term and issue to Sierra 60,000 of the Corporation’s stock options. As of September 30, 2009, the Corporation had made payments totaling \$60,000 and had issued the 60,000 stock options

with a recorded expense of \$30,363.

17. Subsequent events

Receipt of Temporary Occupation Permits for Paredones Amarillos Gold Project

On October 28, 2009, the Corporation announced that Minera Paredones Amarillos S.A. de C.V. (“MPA”), the Corporation’s wholly-owned Mexican subsidiary, has received the Temporary Occupation Permits for the Paredones Amarillos gold project located in Baja California Sur, Mexico.

The Temporary Occupation Permits (one for each of the seven mining concessions that cover the area of the Paredones Amarillos gold project) formally grant MPA the right to use the surface land in the project area owned by the Mexican federal government. With the Temporary Occupation Permits received, the Corporation has all of the documents necessary to file its application for the Change of Forest Land Use Permit which is required before the Corporation can commence development of the Paredones Amarillos gold project.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Management's Discussion and Analysis ("MD&A") of the consolidated operating results and financial condition of Vista Gold Corp. ("Vista," "Vista Gold" or the "Corporation") for the three- and nine-month periods ended September 30, 2009 have been prepared based on information available to us as of November 9, 2009. This MD&A should be read in conjunction with the consolidated financial statements of Vista Gold for the three years ended December 31, 2008 and the related notes thereto, which have been prepared in accordance with generally accepted accounting principles ("GAAP") in Canada. Reference to Note 19 to the consolidated annual financial statements and Note 15 to the consolidated interim financial statements for the period ended September 30, 2009 (the "Consolidated Financial Statements"), should be made for a discussion of differences between Canadian and United States GAAP and their effect on the financial statements. All amounts stated herein are in U.S. dollars in thousands (000's), except per share, per ounce amounts and number of shares, unless otherwise noted.

Results from Operations

Our consolidated net loss for the three-month period ended September 30, 2009, was \$1,717 or \$0.05 per share compared to a consolidated net loss of \$2,823 or \$0.08 per share for the same period in 2008. Our consolidated net earnings for the nine-month period ended September 30, 2009, was \$293 or \$0.01 per share compared to a consolidated net loss of \$6,994 or \$0.20 per share for the same period in 2008. For the three-month period, the decrease in the consolidated net loss of \$1,106 from the prior period is primarily due to a gain of \$537 on the repurchase of convertible notes. On July 14, 2009, we repurchased \$1.333 million of our convertible notes for \$866, which resulted in a gain. Also contributing to the decrease in the consolidated net loss for the three-month period was an increase in the gain on currency translation of \$256 and a decrease in corporate administration and investor relations of \$419; these amounts were partially offset by an increase in exploration, property evaluation and holding costs of \$167. The increase in the consolidated net earnings of \$7,287 for the nine-month period from the prior year period is largely due to a gain on disposal of marketable securities of \$6,829. The gain was the result of the sale of our Allied Nevada Gold Corp. ("Allied") shares which we retained in connection with the transaction that resulted in the formation of Allied and the transfer of Vista's Nevada properties to Allied. Also contributing to this increase was the gain on the repurchase of convertible notes of \$537, a decrease in corporate administration and investor relations of \$974 and an increase in the gain on currency translation of \$295. These increases have been partially offset by an increase in exploration, evaluation and holding costs of \$272, an increase in the future income tax expense of \$550, an increase in the write-down of marketable securities of \$123 and a decrease in interest income of \$352.

Exploration, property evaluation and holding costs

Exploration, property evaluation and holding costs were \$412 for the three-month period ended September 30, 2009 and \$1,014 for the nine-month period ended September 30, 2009, as compared with \$245 and \$742 for the same periods in 2008. For both the three-month and nine-month periods, there were no significant variances as we continue to move our projects towards development decisions.

Corporate administration and investor relations

Corporate administration and investor relations costs decreased to \$1,320 during the three-month period ended September 30, 2009, compared with \$1,739 for the same period in 2008. The decrease of \$419 from the respective prior period is primarily due to the following:

- Stock-based compensation expense decreased by \$359 for the three-month period ended September 30, 2009. This decrease is primarily due to a decrease in the number of options granted during the prior year and vesting over time

as well as an increase in the stock-based compensation amount being capitalized as mineral properties.

- Legal costs decreased by \$64 for the three-month period ended September 30, 2009.

Corporate administration and investor relations costs decreased to \$3,305 for the nine-month period ended September 30, 2009 compared with \$4,279 for the same period in 2008. The decrease of \$974 from the respective prior period is primarily due to the following:

- Stock-based compensation expense decreased by \$723 for the nine-month period ended September 30, 2009. This decrease is primarily due to a decrease in the stock-based compensation expense for new grants, a decrease in the number of options granted during the year and an increase in the stock-based compensation amount being capitalized as mineral properties.
- Securities and compliance fees expense decreased by \$100 for the nine-month period ended September 30, 2009.
- Audit, tax and Sarbanes-Oxley compliance fees decreased by \$132 for the nine-month period ended September 30, 2009 as we work with our auditors and outside consultants to reduce these fees.

Depreciation and amortization

Depreciation and amortization expense increased to \$66 during the three-month period ended September 30, 2009 and \$180 for the nine-month period ended September 30, 2009, compared with \$44 and \$123 for the same periods in 2008. The increases of \$22 and \$57 from the respective prior periods are mostly due to an increase in capital equipment at the Mt. Todd gold project and the Paredones gold project that has begun to be depreciated.

Interest expense

Interest expense of \$560 during the three-month period ended September 30, 2009 was less than \$617 for the same period in 2008. This decrease is due to the repurchase of certain convertible notes during the period (see "Consolidated Financial Statements – Note 7".) Interest expense increased to \$1,723 for the nine-month period ended September 30, 2009, as compared with \$1,386 for the same period in 2008. This increase is because the senior secured convertible notes (the "Notes") were issued on March 4, 2008 and therefore only 118 days of interest were recorded for the 2008 period. For the three-month period ended September 30, 2009, \$252 is attributable to the accretion of the debt discount and \$308 is attributable to interest expense. For the nine-month period ended September 30, 2009, \$775 is attributable to the accretion of the debt discount and \$948 is attributable to interest expense. These amounts are approximately 43% of the full interest expense associated with the issuance of the Notes. We capitalized the remaining 57% as additions to mineral properties in accordance with SFAS No. 34 and our accounting policy.

Table of Contents

Other income and expense

Gain/(loss) on disposal of marketable securities

For the three-month period ended September 30, 2009, we realized a gain of \$14 on the disposal of marketable securities. There were no gains or losses for the same period in 2008. The gain for the three-month period in 2009 resulted from the sale of securities that had a book value of \$6.

For the nine-month period ended September 30, 2009, we realized a gain of \$6,829 on the disposal of marketable securities as compared to a loss on the disposal of marketable securities of \$67 for the same period in 2008. The gain of \$6,829 was mostly the result of our sale on April 3, 2009, of all 1,529,848 common shares of Allied Nevada Gold Corp. for \$9,016. These shares had a book value of \$2,194.

At September 30, 2009, we held marketable securities available for sale with a quoted market value of \$791. We purchased the securities for investing purposes with the intent to hold the securities until such time it would be advantageous to sell the securities at a gain. Although there can be no reasonable assurance that a gain will be realized from the sale of the securities, we monitor the market status of the securities consistently in order to mitigate the risk of loss on the investment.

Gain on repurchase of convertible notes

On July 14, 2009, Vista entered into Note Repurchase Agreements (the “Whitebox Repurchase Agreements”) with Whitebox Combined Partners, LP (“Whitebox Combined Partners”), Whitebox Convertible Arbitrage Partners, LP (“Whitebox Convertible Arbitrage”) and Whitebox Special Opportunities Fund Series B Partners, LP (“Whitebox Special Opportunities”) whereby the Corporation agreed to repurchase their respective Notes.

Pursuant to the Whitebox Repurchase Agreements, the Corporation agreed to repurchase Notes (i) in the principal amount of \$504,000 from Whitebox Combined Partners for an aggregate purchase price, including interest, of \$331,800; (ii) in the principal amount of \$510,000 from Whitebox Convertible Arbitrage for an aggregate purchase price, including interest, of \$335,750; and (iii) in the principal amount of \$319,000 from Whitebox Special Opportunities for an aggregate purchase price, including interest, of \$210,008, based on a settlement date of July 14, 2009. The Corporation allocated the consideration paid on the repurchase of the convertible notes to the liability and equity elements of the security based on their relative fair values at the date of the transaction. A gain of \$537,000 was recorded in the Corporation’s Consolidated Statement of Earnings and (Loss) as a result of the convertible notes repurchase. There were no similar transactions during the 2008 periods.

The Whitebox Repurchase Agreements were initiated by Whitebox Advisors LLC and were not the result of any solicitation by or on behalf of the Corporation. The Corporation has not initiated any broader effort to repurchase or restructure any of its remaining Notes and did not act upon the basis of material non-public information in determining to enter into the Whitebox Repurchase Agreements.

Interest income

Interest income decreased to \$16 for the three-month period ended September 30, 2009 and \$65 for the nine-month period ended September 30, 2009 as compared with \$137 and \$417 for the same periods in 2008. The decreases of \$121 and \$352 from the respective prior periods are due falling interest rates in the market.

Future income tax (benefit)/expense

During the three-month period ended September 30, 2009, the future income tax benefit was \$24 compared to a future income tax expense of \$114 for the 2008 period. During the nine-month period ended September 30, 2009, the future income tax expense was \$757 compared with \$207 for the same period in 2008. The increase in the future tax benefit for the three-month period ended September 30, 2009 as compared to the 2008 period is the result of an increase in the unrealized holding gain on marketable securities which created a future tax benefit for the 2009 period as compared to an unrealized holding loss that created a tax expense for the 2008 period. For the nine-month period ended September 30, 2009, the increase in the future income tax expense as compared to the prior periods is mostly the result of the sale of the Allied Nevada Gold Corp. shares on April 3, 2009. In previous periods a future income tax benefit was recorded in respect of previously unrecognized tax loss carry forwards as these losses were expected to cover any taxable gains that would arise as a result of the increase in value of the marketable securities. When these securities were disposed of, the unrealized gains were transferred from other comprehensive income/(loss) to net earnings. Since no taxable gain arose on this disposal, an income tax expense was recorded in the current period to reverse the benefit recorded in prior periods. The net impact is such that no tax is payable on this disposal and accordingly the cumulative tax expense recorded in the Consolidated Statement of Earnings and (Loss) reflects the tax benefit associated with Vista's remaining marketable securities.

Table of Contents

Financial Position, Liquidity and Capital Resources

Cash used in operations

Net cash used in operating activities was \$964 for the three-month period ended September 30, 2009, compared to \$1,706 for the same period in 2008. The decrease of \$742 is mostly the result of a decrease in cash used for accounts payable, accrued liabilities and other of \$588, a decrease in cash used for prepaids and other of \$178, which was offset by an increase in cash used for accounts receivable of \$37 and an increase in interest paid on our convertible notes of \$11.

Net cash used in operating activities was \$5,189 for the nine-month period ended September 30, 2009, compared to \$4,985 for the same period in 2008. The increase of \$204 is mostly the result of the increase in interest paid of \$669 on the Notes. The Notes were issued on March 4, 2008 and therefore only 72 days of interest had accrued as of June 15, 2008, the date at which interest is paid. Other variances include a decrease in cash received from accounts receivable of \$93, a decrease in cash used for prepaids and other of \$229, a decrease in cash used for accounts payable, accrued liabilities and other of \$240 as well as an overall decrease in non-cash items of \$7,800 which was offset by a decrease in the net loss of \$6,993.

Investing activities

Net cash used in investing activities decreased to \$1,454 for the three-month period ended September 30, 2009, as compared to \$3,342 for the same period in 2008. The decrease in cash used in investing activities of \$1,888 is due to the following:

- A decrease in cash used for additions to mineral properties of \$1,742. During the 2008 period we undertook a drilling program at the Mt. Todd gold mine and were in the process of completing a feasibility study for the Paredones Amarillos gold project. These projects were completed during 2008.
- A decrease in cash received from short-term loans of \$350. In connection with the sale of our Amayapampa gold project in April 2008 (see Consolidation Financial Statements — Note 3) we loaned to Republic \$350 to cover ongoing expenses at the Amayapampa gold project. They repaid this amount during the three-month period ended September 30, 2008.

Net cash provided by investing activities increased to \$5,805 for the nine-month period ended September 30, 2009, as compared to net cash used in investing activities of \$24,650 for the same period in 2008. The increase in cash provided by investing activities of \$30,455 is mostly the result of the following:

- A decrease in the additions to plant and equipment of \$16,746. During 2008, we completed a brokered private placement of \$30,000 principal amount of Notes (see Consolidated Financial Statements — Note 7) and used \$16,000 of the proceeds towards the purchase of gold processing equipment to be used at our Paredones Amarillos project, which included the costs of relocating the equipment to Edmonton, Alberta, Canada. There was no similar purchase during the nine-month period ended September 30, 2009.
- A decrease in the acquisition of mineral property of \$452. On January 24, 2008, we completed the acquisition of interests in various mineral properties adjacent to our Guadalupe de los Reyes project in Mexico. The consideration paid by Vista for the acquisition of these interests included cash payments totaling \$452. There was no similar purchase during the nine-month period ended September 30, 2009.
- An increase in the proceeds from the sale of marketable securities of \$8,966. On April 3, 2009, we sold all 1,529,848 common shares of Allied Nevada Gold Corp. we held \$9,016.
- An increase in the proceeds received upon the disposal of mineral property. In June 2009, we sold most of the remaining patented mining claims in Colorado for \$188. There were no similar transactions during the 2008 period.

- A decrease in cash used for additions to mineral properties of \$3,986. During the 2008 period, we undertook a drilling program at the Mt. Todd gold mine and were in the process of completing a feasibility study for the Paredones Amarillos gold project. These projects were completed during 2008.

Financing activities

Net cash provided by financing activities was \$19,841 for the three-month period ended September 30, 2009, as compared to net cash provided by financing activities of \$70 for the same period in 2008. This increase is the result of the completion of a public offering on September 21, 2009 and the completion of the over-allotment on September 25, 2009 in which we offered and sold an aggregate 10.12 million common shares (see Consolidated Financial Statements – Note 8). Proceeds to Vista after commission and other fees were \$20.7 million. There were no similar transactions during the three-month period in 2008.

Net cash provided by financing activities was \$19,841 for the nine-month period ended September 30, 2009, as compared to \$31,470 for the same period in 2008. This decrease is primarily the result of the completion of the public offering and over-allotment as discussed during the three-month period as compared to the completion of a brokered private placement on March 4, 2008 in which we offered and sold \$30,000 in aggregate principal amount of senior secured convertible notes (the “Notes”) (see Consolidated Financial Statements – Note 7). Proceeds to Vista after legal and other fees were \$28,390.

There were no warrant exercises or exercises of stock options during the three-month period ended September 30, 2009 as compared to stock option exercises of \$70 during the 2008 period. There were no warrant exercises during the three-month period in 2008.

There were no warrant exercises or exercises of stock options during the nine-month period ended September 30, 2009 as compared to stock option exercises of \$139 and warrant exercises of \$2,941 during the 2008 period.

Liquidity and Capital Resources

At September 30, 2009, our total assets were \$94,266 compared to \$75,765 at December 31, 2008, representing an increase of \$18,501. At September 30, 2009, we had working capital of \$33,596 compared to \$21,209 at December 31, 2008, representing an increase of \$12,387. This increase relates primarily to an increase in our cash balance from year end as a result of our public offering and the over-allotment during September 2009 (see Consolidated Financial Statements – Note 8).

The principal component of working capital at both September 30, 2009 and December 31, 2008, is cash and cash equivalents of \$33,723 and \$13,266, respectively. Other components include marketable securities (September 30, 2009 — \$791; December 31, 2008 — \$8,153) and other liquid assets (September 30, 2009 - \$600; December 31, 2008 - \$593).

As a result of the delay in the issuance of the Change of Forest Land Use Permit at the Paredones Amarillos project and the current uncertainty in the resource and financial markets, management has adopted a revised plan and budget for the year 2009. The plan continues those programs necessary to expedite the development of the Paredones Amarillos project, while minimizing expenditures in other areas. We expect that in the event that financing for the Paredones Amarillos project is not available on acceptable terms in 2009, Vista has sufficient working capital to fund its planned operations at least through the end of 2010, without additional financing. We will continue to examine potential funding alternatives for the project, which may include project financing, debt financing or equity financing.

On September 21, 2009, we announced the closing of our previously announced public offering of common shares. The Corporation sold to Dahlman Rose & Company and Wellington West Capital Markets, as underwriters, 8.8

million common shares at a price of \$2.25 per common share. The Corporation granted the underwriters a 30-day option to purchase up to 1.32 million additional common shares to cover over-allotments, if any.

On September 25, 2009, we announced the closing of the sale of 1.32 million common shares, pursuant to the underwriters' exercise of the over-allotment option, which Vista granted in connection with its public offering of common shares. Consistent with the public offering of common shares that closed on September 21, 2009, the 1.32 million common shares were sold to Dahlman Rose & Company LLC and Wellington West Capital Markets, as underwriters, at the public offering price of \$2.25 per common share. The over-allotment and the public offering were made pursuant to Vista's shelf registration statement filed with the U.S. Securities and Exchange Commission (the "SEC") and a shelf prospectus filed with certain Canadian securities regulatory authorities. With the sale of the additional 1.32 million common shares to the underwriters, 10.12 million common shares in total were sold in connection with the offering.

Proceeds to the Corporation from the offering, net of commissions and expenses, were approximately \$20.5 million, which includes net proceeds of approximately \$2.7 million from the sale of the 1.32 million common shares pursuant to the underwriters' exercise of the over-allotment option.

Vista intends to use the net proceeds from the offering (i) to fund drilling, exploration, and engineering/technical activities (including the preparation of a feasibility study) on its Mt. Todd gold project, (ii) to fund the engineering, design and other technical activities to advance its Paredones Amarillos gold project, (iii) to fund exploration activities and if warranted, drilling programs at its Guadalupe de los Reyes gold project and (iv) to fund acquisitions, and further development of acquired mineral properties, working capital requirements and/or for other general corporate purposes.

There has been a severe deterioration in global credit and equity markets. This has resulted in the need for government intervention in major banks, financial institutions and insurers and has also resulted in greater volatility, increased credit losses and tighter credit conditions. These disruptions in the current credit and financial markets have had a significant material adverse impact on a number of financial institutions and have limited access to capital and credit for many companies. These disruptions could, among other things, make it more difficult for us to obtain, or increase our cost of obtaining, capital and financing for our operations. In September, we completed a financing for net proceeds of \$20.5 million. Management expects that the proceeds from this offering will be sufficient to meet our expenditures for corporate administration and day to day operations for the next 16 months and does not expect that we will require additional financing for such purposes during that time. However, we do expect to seek project financing for our Paredones Amarillos gold project in the next three to six months. Further, if our capital costs exceed management's expectations or new project opportunities become available and desirable to us, we may need to access additional capital. Further, our access to additional capital may not be available on terms acceptable to us or at all.

Table of Contents

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements required to be disclosed in this Quarterly Report on Form 10-Q.

Contractual Obligations

Contractual Obligations	Total	Payments due by period (in thousands)			
		Less than 1 year	1 to 3 years	3 to 5 years	More than 5 years
Long-term debt obligations(1)	\$33,580	\$2,867	\$30,713	\$—	\$—
Purchase obligations(2)	\$300	\$100	\$200	\$—	\$—
Operating lease obligations	\$42	\$42	\$—	\$—	\$—
Total	\$34,022	\$3,109	\$30,913	\$—	\$—

(1) Long-term debt obligations including interest payments related to the Corporation's issuance of the Notes, are discussed in the Consolidated Financial Statements — Note 7.

(2) Purchase obligations include option payments totaling \$300 Long Valley project. We still have outstanding \$300, of which \$100 is to be paid in less than a year and \$200 is to be paid in 1 to 3 years.

Transactions with Related Parties

On April 1, 2009, the Corporation entered into an agreement with Sierra Partners LLC ("Sierra") to provide investor relations and corporate finance consulting services to the Corporation. The founder and partner of Sierra is also a director of the Corporation. Under the terms of the agreement, Sierra will provide consulting services to the Corporation commencing April 1, 2009 and ending on March 31, 2010. Sierra will assist with the Corporation's efforts to maintain an Investor Relations program and provide support and analysis of the Corporation's general corporate finance and strategy efforts. As compensation for these services, the Corporation agreed to pay to Sierra a monthly retainer fee of \$10,000 during the term and issue to Sierra 60,000 of the Corporation's stock options. As of September 30, 2009, the Corporation had made payments totaling \$60,000 and had issued the 60,000 stock options with a recorded expense of \$30,363.

Project updates

Mt. Todd Gold Project Metallurgical Test Results

On August 26, 2009, we announced the updated results of metallurgical tests completed for the Mt. Todd gold project. As part of the on-going engineering studies on the development of the Mt. Todd gold project, Resource Development, Inc. ("RDi") of Wheat Ridge, Colorado, JKTech Pty Ltd ("JKTech") of Queensland, Australia, and Ausenco Services Pty Ltd ("Ausenco") of Perth, Australia, recently completed additional successful metallurgical test programs and simulations. The metallurgical tests were conducted on core from the 2008 Mt. Todd drilling program that is believed to be representative of approximately 80% of the ore contained in the pit shape identified in Vista's May 2009 preliminary economic assessment (please refer to Vista's press release dated June 4, 2009).

The RDi test work confirms a gold recovery of 82% in a whole ore leach circuit with ore that has been ground to a relatively coarse size of 80% passing 100 mesh. JKTech completed testing to determine ore grinding characteristics for both conventional crushing/grinding as well as crushing with high pressure grinding rolls ("HPGR") followed by

grinding. The results of the JKTech testing together with other information were used by Ausenco in a comminution circuit simulation. The work by Ausenco confirmed earlier test work completed by Vista, and indicated energy and operating cost savings may be realized by utilizing HPGR technology for processing the Mt. Todd ore. The results of these studies and simulations will be incorporated into a preliminary feasibility study which Vista expects to complete by the end of the fourth quarter of this year.

Deepak Malhotra, PhD, an independent "qualified person" with in the meaning of National Instrument 43-101 - Standards of Disclosure for Mineral Projects ("NI 43-101") who supervised the preparations of the scientific and technical information regarding the Mt. Todd metallurgical results included in this Form 10-Q.

Paredones Amarillos Gold Project Feasibility Study Update Results and Project Update

On September 2, 2009, we announced the results of a feasibility study update (the "Updated Study") completed by SRK Consulting (U.S.), Inc. ("SRK") of Lakewood, Colorado, on our Paredones Amarillos gold project.

During the past four months prior to this announcement, Vista undertook a detailed review of its Paredones Amarillos gold project. The Roberts & Schaefer Company, a large engineering firm based in Salt Lake City, Utah, reviewed the process facility design to optimize the process area layout, confirmed the proposed production parameters and constructability, and re-estimated the capital and operating costs for the process area. The re-estimated capital and operating costs were incorporated in the Updated Study of the project, which supersedes the economic evaluation reported in the Vista's September 8, 2008 press release, in connection with the feasibility study of the Paredones Amarillos gold project (the "Feasibility Study") and the related technical report entitled "Feasibility Study NI 43-101 Technical Report Vista Gold Corp. Paredones Amarillos Gold Project Baja California Sur, Mexico" dated October 20, 2008. For more information on the Updated Study, please refer to the technical report entitled "Feasibility Study Update, NI 43-101 Technical Report, Vista Gold Corp., Paredones Amarillos Gold Project, Baja California Sur, Mexico" dated September 1, 2009 prepared by SRK that is available on SEDAR at www.sedar.com.

Other cost estimates for the proposed project were reviewed and updated by SRK and incorporated into the Updated Study to reflect current estimated capital and operating cost inputs and commodity prices. The Updated Study estimates a decrease in capital and operating costs and improved project economics. The mineral resources, mineral reserves, mine life and stripping ratios reported in the Feasibility Study remain unchanged. The highlights from the Updated Study compared to the Feasibility Study results are shown in the following table:

Selected Operating, Cost and Return Estimates

Life-of-Mine Gold Production	1,203,000 ounces		
Average Annual Gold Production	127,400 ounces per year		
	(142,900 ounces per year for the first five years)		
	Feasibility Study	Updated Study	
Pre-Production Capital Costs			
Total	\$197.2 million	\$189.8 million	
\$ per ounce gold produced	\$165	\$155	
Cash Operating Costs			
(\$ per ounce gold produced)			
Life-of-Mine Average	\$419	\$406	
Average for First Five Years	\$380	\$372	
Financial Analysis			
Average Gold Price	\$771 per oz.1	\$771 per oz.1	\$950 per oz.2
Payback Period	3.4 years	2.9 years	2.3 years
NPV at 5% Discount Rate	\$128.9 million	\$150.0 million	\$303.9 million
(pre-tax)			
Internal Rate of Return	21.0 % pre-tax	24.7 % pre-tax	37.8 % pre-tax

Edgar Filing: VISTA GOLD CORP - Form 10-Q

16.6 % after-tax

19.6 % after-tax

31.0 % after-tax

1) Feasibility Study Base Case Gold Price Profile (\$850 for 1st 3 years, \$725 thereafter) 2) \$950 gold price demonstrates upside at current gold prices

Terry Braun, P.E. of SRK, an independent "qualified person" as defined by NI 43-101 supervised the preparation of the scientific and technical information regarding the Updated Study included in this Form 10-Q.

Table of Contents

Updated Mineral Resources for the Guadalupe de los Reyes Gold Project

On September 3, 2009, we announced updated mineral resources for the Guadalupe de los Reyes gold project.

In January 2008, Vista consolidated the Guadalupe de los Reyes District by acquiring the interests of Grandcru Resources Corporation in the district. In July 2009, Vista retained Pincock, Allen & Holt (“PAH”) of Lakewood, Colorado, to complete a mineral resource estimation for the district. The mineral resource estimate found in the following table has been adjusted to reflect material removed from old underground workings.

Guadalupe de los Reyes Project Mineral Resource Estimates
(0.50 g/t Cutoff)

	Metric Tonnes	Gold Grade (g/t)	Contained Gold Ounces	Silver Grade (g/t)	Contained Silver Ounces
Indicated	10,048,000	1.50	484,000	25.74	8,313,900
Inferred	4,888,000	2.02	316,800	59.98	9,425,500

The updated gold resource estimate was completed on August 12, 2009, by PAH, pursuant to Canadian National Instrument 43-101 (“NI 43-101”). This updated gold resource estimate was completed utilizing standard industry software and resource estimation methodology. Mr. López is the independent “qualified person”, as defined by NI 43-101, who supervised the preparation of the scientific and technical information regarding the updated mineral resource estimate for the Guadalupe de los Reyes gold project included in this Form 10-Q.

For more information, please refer to the technical report entitled “Technical Report for the Guadalupe de los Reyes Gold-Silver Project, Sinaloa, Mexico” dated August 12, 2009 that is available on SEDAR at www.sedar.com.

Cautionary Note to U.S. Investors Regarding Reserve and Resource Estimates

The terms “mineral reserve”, “proven mineral reserve” and “probable mineral reserve” are Canadian mining terms as defined in accordance with NI 43-101 and the Canadian Institute of Mining, Metallurgy and Petroleum (the “CIM”)—CIM Definition Standards on Mineral Resources and Mineral Reserves, adopted by the CIM Council, as amended. These definitions differ from the definitions in the United States Securities and Exchange Commission (“SEC”) Industry Guide 7 (“SEC Industry Guide 7”) under the Securities Act. Under SEC Industry Guide 7 standards, a “final” or “bankable” feasibility study is required to report reserves, the three-year historical average price is used in any reserve or cash flow analysis to designate reserves and the primary environmental analysis or report must be filed with the appropriate governmental authority.

In addition, the terms “mineral resource”, “measured mineral resource”, “indicated mineral resource” and “inferred mineral resource” are defined in and required to be disclosed by NI 43-101; however, these terms are not defined terms under SEC Industry Guide 7 and are normally not permitted to be used in reports and registration statements filed with the SEC. Investors are cautioned not to assume that any part or all of mineral deposits in these categories will ever be converted into reserves. “Inferred mineral resources” have a great amount of uncertainty as to their existence, and great uncertainty as to their economic and legal feasibility. It cannot be assumed that all, or any part, of an inferred mineral resource will ever be upgraded to a higher category. Under Canadian rules, estimates of inferred mineral resources may not form the basis of feasibility or pre-feasibility studies, except in rare cases. Investors are cautioned not to assume that all or any part of an inferred mineral resource exists or is economically or legally mineable. Disclosure of “contained ounces” in a resource is permitted disclosure under Canadian regulations; however, the SEC normally only permits issuers to report mineralization that does not constitute “reserves” by SEC standards as in place tonnage and grade without reference to unit measures.

Accordingly, information contained in this report and the documents incorporated by reference herein contain descriptions of our mineral deposits that may not be comparable to similar information made public by U.S. companies subject to the reporting and disclosure requirements under the United States federal securities laws and the rules and regulations thereunder.

Cautionary Note to All Investors Concerning Economic Assessments That Include Inferred Resources

Mineral resources that are not mineral reserves have no demonstrated economic viability. The preliminary assessment on the Mt. Todd gold project is preliminary in nature and includes “inferred mineral resources” that are considered too speculative geologically to have economic considerations applied to them that would enable them to be categorized as mineral reserves. There is no certainty that the preliminary assessment at the Mt. Todd gold project will ever be realized.

Confirmatory Drilling Program at Paredones Amarillos Gold Project and Update on Permitting Progress

On August 4, 2009, Vista announced that it would be initiating a diamond drilling program at the Paredones Amarillos gold project, located in Baja California Sur, Mexico. The program of diamond drill holes is designed to obtain samples to confirm process plant design criteria and provide additional validation of the mineral reserve model used for the feasibility study completed in September 2008 and announced in a press release dated September 8, 2008. Vista received the final authorization to proceed with the drilling program on Friday, July 31, 2009, and mobilized the drilling contractor. Vista completed the drilling program as anticipated. Vista expects to drill one more hole for hydro-geological testwork. Vista expects to complete the evaluation of the results later in the fourth quarter.

Vista’s advisors and management have been working with Mexican authorities to expedite the permitting process at the Paredones Amarillos gold project. Vista was informed on October 28, 2009 that it had received the TOP (see “– Subsequent events – Receipt of Temporary Occupation Permits for Paredones Amarillos Gold Project” below). Vista has already prepared the Change of Forest Land Use Permit application and obtained the environmental permit necessary to submit the application. Vista intends to submit the Change of Forest Land Use Permit application in the upcoming days.

Subsequent events

Receipt of Temporary Occupation Permits for Paredones Amarillos Gold Project

On October 28, 2009, we announced that Minera Paredones Amarillos S.A. de C.V. (“MPA”), our wholly-owned Mexican subsidiary, has received the Temporary Occupation Permits for the Paredones Amarillos gold project located in Baja California Sur, Mexico.

The Temporary Occupation Permits (one for each of the seven mining concessions that cover the area of the Paredones Amarillos gold project) formally grant MPA the right to use the surface land in the project area owned by the Mexican federal government. With the Temporary Occupation Permits received, we have all of the documents necessary to file its application for the Change of Forest Land Use Permit (“CFLUP”) which is required before we can commence development of the Paredones Amarillos gold project. We intend to file the CFLUP application in the upcoming days.

Table of Contents

Changes in Accounting Policies and Recent Accounting Pronouncements

Changes in accounting policies

Effective January 1, 2009, we adopted the following standards updates by the Canadian Institute of Chartered Accountants (“CICA”). These new standards have been adopted on a prospective basis with no restatement to prior period financial statements.

In February 2008, the CICA issued Section 3064, “Goodwill and Intangible Assets”, which replaces Section 3062, “Goodwill and Intangible Assets,” and results in a withdrawal of CICA Section 3450, “Research and Development Costs,” and amendments to Accounting Guideline (AcG) 11, “Enterprises in the Development Stage,” and CICA Section 1000, “Financial Statement Concepts.” The standard intends to reduce the differences with International Financial Reporting Standards (“IFRS”) in the accounting for intangible assets and results in closer alignment with U.S. GAAP. Under current Canadian standards, more items are recognized as assets than under IFRS or U.S. GAAP. The objectives of CICA Section 3064 are to reinforce the principle-based approach to the recognition of assets only in accordance with the definition of an asset and the criteria for asset recognition. The standard will also provide guidance for the recognition of internally developed intangible assets (including research and development activities), ensuring consistent treatment of all intangible assets, whether separately acquired or internally developed. This standard will be effective for fiscal years beginning on or after October 1, 2008. The Corporation has determined there is no impact on its current financial statements.

Certain U.S. Federal Income Tax Considerations

NOTICE PURSUANT TO IRS CIRCULAR 230: NOTHING CONTAINED IN THIS SUMMARY CONCERNING ANY U.S. FEDERAL TAX ISSUE IS INTENDED OR WRITTEN TO BE USED, AND IT CANNOT BE USED, BY A U.S. HOLDER (AS DEFINED IN MATERIAL REFERENCED BELOW), FOR THE PURPOSE OF AVOIDING U.S. FEDERAL TAX PENALTIES UNDER THE CODE (AS DEFINED BELOW). THIS SUMMARY WAS WRITTEN TO SUPPORT THE PROMOTION OR MARKETING OF THE TRANSACTIONS OR MATTERS ADDRESSED BY THIS DOCUMENT. EACH U.S. HOLDER SHOULD SEEK U.S. FEDERAL TAX ADVICE, BASED ON SUCH U.S. HOLDER’S PARTICULAR CIRCUMSTANCES, FROM AN INDEPENDENT TAX ADVISOR.

Vista has been a “passive foreign investment company” (“PFIC”) as defined under Section 1297 of the U.S. Internal Revenue Code of 1986, as amended (the “Code”), in recent years and expects to continue to be a PFIC in the future. Current and prospective United States shareholders should consult their tax advisors as to the tax consequences of PFIC classification and the U.S. federal tax treatment of PFICs. Additional information on this matter is included in Vista’s Annual Report on Form 10-K for the year ended December 31, 2008, as amended, under “Part II. Item 5. Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities — U.S. Federal Income Tax Consequences”.

Note Regarding Forward-Looking Statements

This document and any document (or portion thereof) incorporated by reference into this document, contain “forward-looking statements” within the meaning of Section 27A of the U.S. Securities Act of 1933, as amended, and 21E of the U.S. Securities Exchange Act of 1934, as amended, and forward-looking information under Canadian securities laws, that are intended to be covered by the safe harbor created by such legislation. All statements, other than statements of historical facts, included in this document, our other filings with the SEC and Canadian securities regulatory authorities and in press releases and public statements by our officers or representatives, that address activities, events or developments that we expect or anticipate will or may occur in the future are forward-looking statements and forward-looking information, including, but not limited to, such things as those listed below:

- estimates of future operating and financial performance;
- potential funding requirements and sources of capital;
- the timing, performance and results of feasibility studies;
- timing and receipt of required land use, environmental and other permits for the Paredones Amarillos gold project and timing for completion of drilling and testing programs at the Paredones Amarillos gold project;
 - results of the drilling program and other test results at the Paredones Amarillos gold project
 - timing and outcome for the CFLUP for the Paredones Amarillos gold project;
- plans to purchase remaining surface land or obtain rights-of-way required by the Paredones Amarillos gold project;
- capital and operating cost estimates for the Paredones Amarillos gold project, and anticipated timing of commencement of construction at the Paredones Amarillos gold project;
 - plans for evaluation of the Mt. Todd gold project;
- preliminary assessment results and plans for a preliminary feasibility study at the Mt. Todd gold project;
- production estimates and timing for gold production at the Paredones Amarillos gold project and the Mt. Todd gold project;
 - potential for gold production at the Amayapampa gold project, timing and receipt of future payments in connection with the disposal of the Amayapampa gold project and status of legal proceedings in Bolivia;
 - ongoing debt service requirements for the Notes and potential redemption or conversion of the Notes;
 - future gold prices;
 - future business strategy, competitive strengths, goals and expansion and growth of our business;
 - Vista’s potential status as a producer;
- plans and estimates concerning potential project development, including matters such as schedules, estimated completion dates and estimated capital and operating costs;

Edgar Filing: VISTA GOLD CORP - Form 10-Q

- plans and proposed timetables for exploration programs and estimates of exploration expenditures;
 - estimates of mineral reserves and mineral resources;
- potential joint venture and partnership strategies in relation to our properties; and
- future share price and valuation for Vista and for marketable securities held by Vista.

- 21 -

Table of Contents

The words “estimate”, “plan”, “anticipate”, “expect”, “intend”, “believe”, “will”, “may” and similar expressions are intended to represent forward-looking statements and forward-looking information. These statements involve known and unknown risks, uncertainties, assumptions and other factors which may cause our actual results, performance or achievements to be materially different from any results, performance or achievements expressed or implied by such forward-looking statements and information. These factors include risks such as:

- our likely status as a “passive foreign investment company” for U.S. federal tax purposes;
- feasibility study results and preliminary assessment results and the estimates on which they are based;
 - economic viability of a deposit;
 - delays in commencement of construction on the Paredones Amarillos gold project;
 - status of our required governmental permits for the Paredones Amarillos gold project;
 - increased costs that affect our financial condition;
 - a shortage of equipment and supplies;
- whether our acquisition, exploration and development activities will be commercially successful;
 - fluctuations in the price of gold;
 - inherent hazards of mining exploration, development and operating activities;
- calculation of mineral reserves, mineral resources and mineralized material and the fluctuations thereto based on metal prices, inherent vulnerability of the ore and recoverability of metal in the mining process;
 - environmental regulations to which our exploration and development operations are subject;
 - our receipt of future payments in connection with our disposal of the Amayapampa gold project;
 - leverage as a result of our outstanding Notes;
 - intense competition in the mining industry;
 - our potential inability to raise additional capital on favorable terms, if at all;
- conflicts of interest of some of our directors as a result of their involvement with other natural resource companies;
 - potential challenges to our title to our mineral properties;
 - political and economic instability in Mexico, Bolivia and Indonesia;
 - fluctuation in foreign currency values;
- trading price of our Common shares and our ability to raise funds in new shares offerings due to future sales of our Common shares in the public or private market;

- difficulty in bringing actions or enforcing judgments against us and certain of our directors or officers outside of the United States;
- acquisitions and integration issues;
- potential negative impact of the issuance of additional common shares on the trading price of Vista's common shares;
- fluctuation in the price of Vista's common shares;
- the lack of dividend payments by Vista;
- future joint venture and partnerships relating to Vista's properties;
- Vista's lack of recent production and limited experience in producing;
- reclamation liabilities, including reclamation requirements at the Mt. Todd gold project;
 - Vista's historical losses from operations;
- historical production not being indicative of potential future production;
 - water supply issues;
 - governmental authorizations and permits;
 - environmental lawsuits;
- lack of adequate insurance to cover potential liabilities;
- Vista's ability to retain and hire key personnel;
- recent market events and conditions; and
- general economic conditions.

For a more detailed discussion of such risks and other important factors that could cause actual results to differ materially from those in such forward-looking statements and forward-looking information please see the risk factors contained in our Annual Report on Form 10-K (as amended) for the year ended December 31, 2008, under "Part I—Item 1A. Risk Factors." The foregoing section of our 2008 Form 10-K (as amended) is incorporated in this filing and investors should refer to it. Although we have attempted to identify important factors that could cause actual results to differ materially from those described in forward-looking statements and forward-looking information, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that these statements will prove to be accurate as actual results and future events could differ materially from those anticipated in the statements. Except as required by law, we assume no obligation to publicly update any forward-looking statements and forward-looking information, whether as a result of new information, future events or otherwise.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are engaged in the acquisition of gold projects and related activities including exploration engineering, permitting and the preparation of feasibility studies. The value of our properties is related to the price of gold and changes in the price of gold could affect our ability to generate revenue from our portfolio of gold projects.

Gold prices may fluctuate widely from time to time and are affected by numerous factors, including the following: expectations with respect to the rate of inflation, exchange rates, interest rates, global and regional political and economic circumstances and governmental policies, including those with respect to gold holdings by central banks. The price of gold fell to a 20-year low of \$253 in July 1999 and has risen significantly since that time to reach a level of \$865 by December 31, 2008 and was \$996 on September 30, 2009 and \$1,051 on October 20. The demand for, and supply of, gold affect gold prices, but not necessarily in the same manner as demand and supply affect the prices of other commodities. The supply of gold consists of a combination of new mine production and existing stocks of bullion and fabricated gold held by governments, public and private financial institutions, industrial organizations and private individuals. The demand for gold primarily consists of jewelry and investments. Additionally, hedging activities by producers, consumers, financial institutions and individuals can affect gold supply and demand. While gold can be readily sold on numerous markets throughout the world, its market value cannot be predicted for any particular time.

Because we have exploration operations in North America, Indonesia and Australia, we are subject to foreign currency fluctuations. We do not engage in currency hedging to offset any risk of currency fluctuations as insignificant monetary amounts are held in foreign currencies for land holding costs related to the properties owned.

On March 7, 2008, we announced the closing of a private placement in which we offered and sold \$30 million in aggregate principal amount of the Notes (see Consolidated Financial Statements — Note 7). The Notes bear interest at a rate of 10% per annum (calculated and payable semi-annually in arrears) and will mature on March 4, 2011. We do not consider our interest rate risk exposure to be significant at this time.

ITEM 4. CONTROLS AND PROCEDURES

DISCLOSURE CONTROLS AND PROCEDURES

The principal executive officer and principal financial officer have evaluated the effectiveness of the Corporation's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the U.S. Securities Exchange Act of 1934, as amended (the "Exchange Act") as of September 30, 2009. Based on the evaluation, the principal executive officer and principal financial officer concluded that the disclosure controls and procedures in place are effective to ensure that information required to be disclosed by the Corporation, including consolidated subsidiaries, in reports that the Corporation files or submits under the Exchange Act, is recorded, processed, summarized and reported on a timely basis in accordance with applicable time periods specified by the U.S. Securities and Exchange Commission rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by the Corporation in the reports that it files or submits under the Exchange Act is accumulated and communicated to the Corporation's management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

CHANGES IN INTERNAL CONTROLS OVER FINANCIAL REPORTING

There has been no change in the Corporation's internal control over financial reporting during the quarter ended September 30, 2009, that has materially affected, or is reasonably likely to materially affect, the Corporation's internal control over financial reporting.

- 23 -

Table of Contents

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We are not aware of any material pending or threatened litigation or of any proceedings known to be contemplated by governmental authorities which are, or would be, likely to have a material adverse effect upon us or our operations, taken as a whole.

ITEM 1A. RISK FACTORS

Except for the risk factors as provided below, there have been no material changes from the risk factors as previously disclosed in our Form 10-K, which was filed on with the SEC on March 13, 2009 and amended on April 15, 2009.

Acquisitions and integration issues may expose the Corporation to risks.

The Corporation's business strategy includes making targeted acquisitions. Any acquisition that the Corporation makes may be of a significant size, may change the scale of the Corporation's business and operations, and may expose the Corporation to new geographic, political, operating, financial and geological risks. The Corporation's success in its acquisition activities depends on its ability to identify suitable acquisition candidates, negotiate acceptable terms for any such acquisition and integrate the acquired operations successfully with those of the Corporation. Any acquisitions would be accompanied by risks. For example, there may be significant decreases in commodity prices after the Corporation has committed to complete the transaction and has established the purchase price or exchange ratio; a material ore body may prove to be below expectations; the Corporation may have difficulty integrating and assimilating the operations and personnel of any acquired companies, realizing anticipated synergies and maximizing the financial and strategic position of the combined enterprise and maintaining uniform standards, policies and controls across the organization; the integration of the acquired business or assets may disrupt the Corporation's ongoing business and its relationships with employees, customers, suppliers and contractors; and the acquired business or assets may have unknown liabilities which may be significant. If the Corporation chooses to use equity securities as consideration for such an acquisition, existing shareholders may suffer dilution. Alternatively, the Corporation may choose to finance any such acquisition with its existing resources. There can be no assurance that the Corporation would be successful in overcoming these risks or any other problems encountered in connection with such acquisitions.

The issuance of additional common shares may negatively impact the trading price of the Corporation's common shares.

The Corporation has issued equity securities in the past and may continue to issue equity securities to finance its activities in the future, including to finance future acquisitions, or as consideration for acquisitions of businesses or assets. In addition, outstanding options and broker warrants to purchase common shares may be exercised, resulting in the issuance of additional common shares. The issuance by the Corporation of additional common shares would result in dilution to the Corporation's shareholders, and even the perception that such an issuance may occur could have a negative impact on the trading price of the common shares.

The price of the Corporation's common shares may fluctuate and may result in losses to investors.

The trading price of the Corporation's common shares has been and may continue to be subject to large fluctuations, which may result in losses to investors. The high and low intraday sale prices of its common shares on the Amex were \$13.55 and \$4.34 in 2006; \$9.45 and \$3.80 in 2007; \$5.95 and \$0.77 in 2008; and \$2.92 and \$1.16 for the nine-months ended September 30, 2009 and on the TSX were CDN\$14.95 and CDN\$5.05 in 2006; CDN\$10.68

Edgar Filing: VISTA GOLD CORP - Form 10-Q

and CDN\$4.07 in 2007; CDN\$5.99 and CDN\$0.98 in 2008; and CDN\$3.63 and CDN\$1.40 for the nine-months ended September 30, 2009. The trading price of the Corporation's common shares may increase or decrease in response to a number of events and factors, including:

- trends in the gold mining industry and the markets in which the Corporation operates;
 - changes in the price of gold;
- changes in financial estimates and recommendations by securities analysts;
 - acquisitions and financings;
- global and regional political and economic conditions and other factors;
 - general stock market conditions;
- the operating and share performance of other companies that investors may deem comparable to the Corporation;
and
 - purchase or sales of blocks of the Corporation's common shares.

This volatility may adversely impact the price of the common shares regardless of the Corporation's operating performance.

Table of Contents

The Corporation has never declared dividends.

The Corporation has never declared or paid any dividends on its common shares. Currently, the Corporation intends to retain its earnings, if any, to finance the growth and development of the business and does not expect to pay dividends or to make any other distributions in the future, which may limit the way in which investors may realize any returns on their investment.

Joint ventures and other partnerships in relation to the Corporation's properties may expose the Corporation to risks.

The Corporation may enter into joint ventures or other partnership arrangements with other parties in relation to the exploration, development and production of certain of the properties in which the Corporation has an interest. Joint ventures can often require unanimous approval of the parties to the joint venture or their representatives for certain fundamental decisions such as an increase or reduction of registered capital, merger, division, dissolution, amendments of constating documents, and the pledge of joint venture assets, which means that each joint venture party may have a veto right with respect to such decisions which could lead to a deadlock in the operations of the joint venture or partnership. Further, the Corporation may be unable to exert control over strategic decisions made in respect of such properties. Any failure of such other companies to meet their obligations to the Corporation or to third parties, or any disputes with respect to the parties' respective rights and obligations, could have a material adverse effect on the joint ventures or their properties and therefore could have a material adverse effect on the Corporation's results of operations, financial performance, cash flows and the price of common shares.

The Corporation has no history of producing metals from its current mineral properties and limited experience with producing mines; there can be no assurance that it will successfully establish mining operations or profitably produce precious metals.

The Corporation has no history of producing metals from its current mineral properties. The Corporation does not produce gold and does not currently generate operating earnings. While the Corporation seeks to move the Paredones Amarillos and Mt. Todd gold projects into production, such efforts will be subject to all of the risks associated with establishing new mining operations and business enterprises including:

- the timing and cost, which are considerable, of the construction of mining and processing facilities;
- the ability to find sufficient gold reserves to support a profitable mining operation;
- the availability and costs of skilled labor and mining equipment;
- compliance with environmental and other governmental approval and permit requirements;
- the availability of funds to finance construction and development activities;
- potential opposition from non-governmental organizations, environmental groups, local groups or local inhabitants which may delay or prevent development activities; and
- potential increases in construction and operating costs due to changes in the cost of fuel, power, materials and supplies.

The costs, timing and complexities of mine construction and development may be increased by the remote location of the Corporation's properties. It is common in new mining operations to experience unexpected problems and delays

during construction, development and mine start-up. In addition, the Corporation's management will need to be expanded. This could result in delays in the commencement of mineral production and increased costs of production. Accordingly, the Corporation cannot assure you that its activities will result in profitable mining operations or that it will successfully establish mining operations.

The Corporation's continuing historical reclamation obligations at the Mt. Todd gold project and its reclamation requirements on other properties could require significant additional expenditures.

The Corporation could be responsible for the reclamation obligations related to previous disturbances located on all of its properties, including the Mt. Todd gold project. The Mt. Todd site was not reclaimed when the original mine closed and as a result, the dumps and heap leach pad require ongoing care and maintenance. The Corporation provides that care and maintenance, but will not be responsible for the environmental liability resulting from previous operations until the Corporation makes the decision to re-open the mine and has received the appropriate permits. The satisfaction of any bonding requirements and continuing or future reclamation obligations on the Corporation's properties will require a significant amount of capital. There is a risk that the Corporation will be unable to fund these historical and future reclamation requirements, and further, that the regulatory authorities may increase reclamation and bonding requirements to such a degree that it would not be commercially reasonable to continue exploration or development activities on such properties, including at the Mt. Todd gold project. Such events could have a material adverse effect on the Corporation's results of operations, financial performance, cash flows and the price of the common shares.

Table of Contents

The Corporation has a history of losses and may incur losses in the future.

The Corporation has incurred losses since inception and may incur net losses in the future. The Corporation incurred the following losses from operations during each of the following periods:

- approximately \$10 million for the year ended December 31, 2008; and
- approximately \$13 million for the year ended December 31, 2007.

The Corporation had an accumulated deficit of approximately \$191 million at both September 30, 2009 and December 31, 2008.

The Corporation expects to continue to incur losses unless and until such time as one of its properties enters into commercial production and generates sufficient revenues to fund continuing operations. The Corporation has committed and plans to continue to commit substantial capital and other resources to the ongoing development of the Paredones Amarillos and Mt. Todd gold projects. The amount and timing of future expenditures will depend on a number of factors, including, but not limited to, the progress of ongoing development and operations, permitting matters, the timing of development, the costs of production, the commercial viability of production and other factors, some of which are beyond the Corporation's control. The Corporation cannot assure investors that it will ever achieve profitability.

Historical production of gold at the Corporation's Mt. Todd gold project may not be indicative of the potential for future development or revenue.

The Mt. Todd gold project was an operating mine in the late 1990's. Based on a review of project files, the Corporation's management believes that approximately 27.1 million short tons grading 0.031 gold ounces per ton and containing 826,000 ounces of gold were extracted between 1996 and the termination of mining in 2000. Processing was by a combination of heap-leach production from oxide ore and cyanidation of sulfide ore. The remaining mineralization consists of sulfide mineralization lying below and along strike of the existing open pit. Historical production of gold from the Corporation's Mt. Todd gold project may not be indicative of the potential for future development of the property. Due to the uncertainties associated with exploration and development, including variations in geology and structure, there is no assurance that the Corporation's development efforts will be successful or that prior operating results are reflective of additional or economically developable deposits. Investors in the Corporation's securities should not rely on historical operations as an indication that the Corporation's mining properties will be placed into commercial production again or that such properties will produce revenues or be profitable.

The Corporation cannot assure you that it will have an adequate supply of water to complete desired exploration or development of its mining properties.

The Corporation has obtained permits and water rights that it currently uses to service the activities on its various properties and the Corporation plans to obtain all required permits and water rights to serve other properties it may develop or acquire in the future.

However, the amount of water that the Corporation is entitled to use pursuant to its water rights must be determined by the appropriate regulatory authorities in the jurisdictions in which it operates. Such regulatory authorities may amend the regulations regarding such water rights, increase the cost of maintaining such water rights, or eliminate the Corporation's current water rights and the Corporation may be unable to retain all or a portion of such water rights. In addition, water at the Mt. Todd gold project is expected to be provided from a raw water dam and reservoir. Drought

or drought-like conditions in the area feeding the reservoir could limit or extinguish this water supply. Accordingly, there is no assurance that the Corporation will have access to the amount of water needed to explore or develop its properties or to operate a mine at its properties, which may prevent the Corporation from generating revenue, and which could materially adversely affect the Corporation's financial condition, cash flows and the price of the common shares.

The Corporation requires certain governmental authorizations and permits for its business, including its development plans and operating activities. The Corporation could incur substantial costs or disruptions to its business if it cannot obtain, renew or maintain the necessary authorizations and permits.

A major risk inherent in the Corporation's business is the requirement to obtain authorizations and permits from governmental authorities. Delays in obtaining authorizations or permits, failure to obtain an authorization or permit or receipt of an authorization or permit with unreasonable conditions or costs could have a material adverse effect on the Corporation's ability to develop one or more of its gold projects, including, but not limited to, the Paredones Amarillos and Mt. Todd gold projects. The failure to obtain necessary permits could result in an impairment and write down of the carrying value of its projects.

Vista is awaiting receipt of permits needed before construction can begin on the Paredones Amarillos gold project. The Corporation may experience delays in the commencement of construction on the Paredones Amarillos gold project due to delays in receiving the required permits. There can be no assurance whether or when construction at the Paredones Amarillos gold project will commence. If Vista is unable to acquire the required permits to mine the Paredones Amarillos gold project, then Vista may not have mineral reserves under SEC Industry Guide 7 or NI 43-101, which could result in an impairment and write down of the carrying value of the project.

The Corporation could be subject to environmental lawsuits.

Neighboring landowners and other third parties could file claims based on environmental statutes and common law for personal injury and property damage allegedly caused by the release of hazardous substances or other waste material into the environment on or around our properties. There can be no assurance that the Corporation's defense of such claims will be successful. A successful claim against the Corporation could have a material adverse effect on the Corporation's business prospects, financial condition, results of operation and the price of the common shares.

The Corporation does not insure against all risks to which it may be subject in its planned operations.

The Corporation does not maintain insurance to cover all of the potential risks associated with its operations. The Corporation may also be unable to obtain insurance to cover other risks at economically feasible premiums or at all. Insurance coverage may not continue to be available, or may not be adequate to cover all liabilities. The Corporation might also become subject to liability for environmental, pollution or other hazards associated with mineral exploration and production which it may not be insured against, which may exceed the limits of the Corporation's insurance coverage or which it may elect not to insure against because of premium costs or other reasons. Losses from these events may cause the Corporation to incur significant costs that could materially adversely affect the Corporation's financial condition and the Corporation's ability to fund activities on its properties. A significant loss could force the Corporation to reduce or terminate its operations on a specific project or altogether.

If the Corporation fails to hire and retain its key personnel, it may have an adverse effect on the Corporation's operations.

The Corporation depends on a number of key personnel, including Michael B. Richings, its Executive Chairman and Chief Executive Officer, Frederick H. Earnest, its President and Chief Operating Officer, and Gregory G. Marlier, its Chief Financial Officer. The Corporation relies heavily on these individuals for the conduct of its business. The Corporation's management believes that the Corporation's success depends on the continued service of its key officers

and there can be no assurance that the Corporation will be able to retain any or all of such officers. The loss of any one of these personnel could have an adverse effect on the Corporation's operations. The Corporation has employment contracts with each of these key personnel. The Corporation does not have key man life insurance.

The Corporation's ability to manage growth effectively will require it to continue to implement and improve its management systems and to recruit and train new employees. Although the Corporation has done so in the past and expects to do so in the future, it cannot assure you that it will be successful in attracting and retraining skilled and experienced personnel.
