Item 1.01 Entry into a Material Definitive Agreement

On August 24, 2005, the Board of Directors of IEC Electronics Corp. ("IEC" or the "Company") approved the acceleration of vesting of most out-of-the-money, unvested stock options held by executive officers, directors and employees. The accelerated options were issued under the Company's 2001 Stock Option and Incentive Plan. An option was considered out-of-the-money if the stated option exercise price was \$0.90 or higher. As a result, options to purchase 184,000 shares of IEC common stock became exercisable immediately. None of these options

had economic value as of August 24, 2005, based on the closing price of \$0.65 on that date.

An out-of-the-money option held by an officer with vesting based on performance was not accelerated by the Board as it believed that the existing stated performance criteria should be met before any of such options were accelerated. Shares received upon the exercise of accelerated options held by directors, officers and certain other senior managers may not be sold prior to the earlier of the original vesting date set forth in the option or their termination of employment or service.

The table below summarizes the outstanding options subject to accelerated vesting.

### Summary of Options Subject to Acceleration

	Aggregate Number of Shares Issuable Upon Accelerated Stock Options -----	Weighted Average Exercise Price Per Share -----
Executive Officers	135,000	\$1.10
All Other Employees	24,000	\$1.12
Directors	25,000	\$1.29
	-----	-----
Total (1)	184,000	\$1.13

(1) The accelerated options represent 12% of the Company's currently outstanding stock options.

Under the recently revised Financial Accounting Standards Board Statement No. 123, "Share-based Payment" ("FAS 123(R)"), IEC will be required to recognize the expense associated with its outstanding unvested stock options beginning in the first quarter of fiscal year 2006. As a result of the acceleration, the Company expects to reduce the stock option expense it otherwise would have been required to record in connection with the accelerated options by approximately \$46,000 in fiscal 2006, 2007 and 2008.

In making the decision to accelerate these options, thereby avoiding recognizing compensation expense in future financial statements, the Board of Directors considered the interest of the stockholders in not having earnings materially affected. In addition, because these options have exercise prices in excess of current market values, they are not fully achieving their original objectives of incentive compensation and employee retention. It is possible the acceleration may have a beneficial effect on employee morale and retention. The Board of Directors believes that the acceleration of the out-of-the-money options is in the best interest of the Company and its stockholders.

This current report on Form 8-K contains certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, and such statements are made in reliance upon the protections provided by such Acts for forward-looking statements. These forward-looking statements, including statements regarding reduction in stock option expense as a result of the option acceleration, involve risks and uncertainties. Actual results could differ materially from the results projected, expressed or implied by these forward-looking statements. Factors that could cause or contribute to such differences include, but are not
