NOTES TO UNAUDITED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1. Organization

Selective Insurance Group, Inc., through its subsidiaries, (collectively referred to as "we," "us," or "our") offers property and casualty insurance products. Selective Insurance Group, Inc. (referred to as the "Parent") was incorporated in New Jersey in 1977 and its main offices are located in Branchville, New Jersey. The Parent's common stock is publicly traded on the NASDAQ Global Select Market under the symbol "SIGI."

We classify our business into two operating segments:

• Insurance Operations, which sells property and casualty insurance products and services primarily in 22 states in the Eastern and Midwestern U.S.; and

Investments.

NOTE 2. Basis of Presentation

These interim unaudited consolidated financial statements ("Financial Statements") include the accounts of the Parent and its subsidiaries, and have been prepared in conformity with: (i) U.S. generally accepted accounting principles ("GAAP"); and (ii) the rules and regulations of the U.S. Securities and Exchange Commission ("SEC") regarding interim financial reporting. The preparation of the Financial Statements in conformity with GAAP requires us to make estimates and assumptions that affect the reported financial statement balances, as well as the disclosure of contingent assets and liabilities. Actual results could differ from those estimates. All significant intercompany accounts and transactions between the Parent and its subsidiaries are eliminated in consolidation.

These Financial Statements reflect all adjustments that, in our opinion, are normal, recurring, and necessary for a fair presentation of our results of operations and financial condition. The Financial Statements cover the second quarters ended June 30, 2011 ("Second Quarter 2011") and June 30, 2010 ("Second Quarter 2010") and the six-month periods ended June 30, 2011 ("Six Months 2011") and June 30, 2010 ("Six Months 2010"). The Financial Statements do not include all of the information and disclosures required by GAAP and the SEC for audited financial statements. Results of operations for any interim period are not necessarily indicative of results for a full year. Consequently, the Financial Statements should be read in conjunction with the consolidated financial statements contained in our Annual Report on Form 10-K for the year ended December 31, 2010 ("2010 Annual Report").

NOTE 3. Reclassification

Certain prior year amounts in these Financial Statements and related footnotes have been reclassified to conform to the current year presentation. Such reclassifications had no effect on our net income, stockholders' equity, or cash flows.

NOTE 4. Adoption of Accounting Pronouncements

In January 2010, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2010-06, Fair Value Measurements and Disclosures (Topic 820): Improving Disclosures about Fair Value Measurements. This guidance requires: (i) separate disclosure of significant transfers between Level 1 and Level 2 of the fair value hierarchy and reasons for the transfers; (ii) disclosure, on a gross basis, of purchases, sales, issuances, and net settlements within Level 3 of the fair value hierarchy; (iii) disclosures by class of assets and liabilities; and (iv) a description of the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements. This guidance is effective for reporting periods beginning after December 15, 2009, except for the Level 3 disclosure requirements, which are effective for fiscal years beginning after December 15, 2010 and interim periods within those fiscal years. We have included the disclosures required by this guidance in our notes to the consolidated financial statements, where appropriate.

In December 2010, the FASB issued ASU 2010-28 Intangibles – Goodwill and Other (Topic 350): When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts. This guidance modifies Step 1 of the goodwill impairment test, which assesses whether the carrying amount of a reporting unit exceeds its fair value, for reporting units with zero or negative carrying amounts. It requires that an entity perform Step 2 of the goodwill impairment test, which determines if goodwill has been impaired and measures the amount of impairment, if it is more likely than not that a goodwill impairment exists. In determining whether it is more likely than not that a goodwill impairment exists, an entity should consider the qualitative factors within existing guidance that would require goodwill of a reporting unit to be tested for impairment between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. This guidance is effective for interim and annual periods beginning after December 15, 2010. The adoption of this guidance did not impact our financial condition or results of operations.

In December 2010, the FASB issued ASU 2010-29 Business Combinations (Topic 805): Disclosure of Supplementary Pro Forma Information for Business Combinations. This guidance relates to disclosure of pro forma information for business combinations that have occurred in the current reporting period. It requires that an entity presenting comparative financial statements include revenue and earnings of the combined entity as though the combination had occurred as of the beginning of the comparable prior annual period only. This guidance is effective prospectively for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2010. The adoption of this guidance did not impact our financial condition or results of operations.

Pronouncements to be effective in the future

In October 2010, the FASB issued ASU 2010-26, Financial Services-Insurance (Topic 944): Accounting for Costs Associated with Acquiring or Renewing Insurance Contracts ("ASU 2010-26"). This guidance requires that only costs that are incremental or directly related to the successful acquisition of new or renewal insurance contracts are to be capitalized as a deferred acquisition cost. This would include, among other items, sales commissions paid to agents, premium taxes, and the portion of employee salaries and benefits directly related to time spent on acquired contracts. This guidance is effective, either with a prospective or retrospective application, for interim and annual periods beginning after December 15, 2011, with early adoption permitted. Although we continue to evaluate the impact of this guidance, we anticipate that ASU 2010-26 would have an after-tax impact on our stockholders' equity of approximately \$55 million, or about \$1 of book value per share. The adoption of this guidance is not expected to have a material impact on our results of operations on either a historical or prospective basis.

In May 2011, the FASB issued ASU 2011-04, Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs ("ASU 2011-04"), which changes the wording used to describe the requirements in U.S. GAAP for measuring fair value and disclosing information about fair value measurements to improve consistency in the application and description of fair value between GAAP and International Financial Reporting Standards. ASU 2011-04 clarifies how the concepts of highest and best use and valuation premise in a fair value measurement are relevant only when measuring the fair value of nonfinancial assets, and are not relevant when measuring the fair value of financial assets or liabilities. In addition, ASU 2011-04 expands the disclosures for unobservable inputs for Level 3 fair value measurements, requiring quantitative information to be disclosed related to: (i) the valuation processes used; (ii) the sensitivity of the fair value measurement to changes in unobservable inputs and the interrelationships between those unobservable inputs; and (iii) use of a nonfinancial asset in a way that differs from the asset's highest and best use. ASU 2011-04 is effective prospectively for interim and annual periods beginning after December 15, 2011. The adoption of this guidance is not expected to have a material impact on our financial condition, results of operations, or current disclosures.

In June 2011, the FASB issued ASU 2011-05, Comprehensive Income (Topic 220): Presentation of Comprehensive Income ("ASU 2011-05"). ASU 2011-05 requires that all nonowner changes in stockholders' equity be presented either

in a single continuous statement of comprehensive income or in two separate but consecutive statements. ASU 2011-05 also requires financial statement presentation of reclassification adjustments for items that are reclassified from other comprehensive income to net income. This guidance, which only changes financial statement presentation, is effective, on a retrospective basis, for interim and annual periods beginning after December 15, 2011.

NOTE 5. Statements of Cash Flow Cash paid during the period for interest and federal income taxes was as follows:

	Six Months en	ded June 30,
(\$ in thousands)	2011	2010
Cash paid during the period for:

¹ CMBS includes government guaranteed agency securities with a carrying value of \$5.0 million at June 30, 2011 and \$8.9 million at December 31, 2010.

2 RMBS includes government guaranteed agency securities with a carrying value of \$6.9 million at June 30, 2011 and \$4.0 million at December 31, 2010.

Unrecognized holding gains/losses of HTM securities are not reflected in the consolidated Financial Statements, as they represent fair value fluctuations from the later of: (i) the date a security is designated as HTM; or (ii) the date that an other-than-temporary impairment ("OTTI") charge is recognized on an HTM security, through the date of the balance sheet. Our HTM securities had an average duration of 3.2 years as of June 30, 2011 and 3.4 years as of December 31, 2010.

(b) The following table provides information related to our available-for-sale ("AFS") securities:

Unrealized gains/losses of AFS securities represent fair value fluctuations from the later of: (i) the date a security is designated as AFS; or (ii) the date that an OTTI charge is recognized on an AFS security, through the date of the balance sheet. These unrealized gains and losses are recorded in accumulated other comprehensive income ("AOCI") on the Consolidated Balance Sheets.

69,636

(15,435)

2,412,378

¹ U.S. government includes corporate securities fully guaranteed by the Federal Deposit Insurance Corporation ("FDIC") with a fair value of \$98.9 million at June 30, 2011 and \$121.0 million at December 31, 2010.

² CMBS includes government guaranteed agency securities with a fair value of \$72.3 million at June 30, 2011 and \$71.9 million at December 31, 2010.

³ RMBS includes government guaranteed agency securities with a fair value of \$94.7 million at June 30, 2011 and \$91.1 million at December 31, 2010.

During Six Months 2011, 18 securities, with a carrying value of \$46.6 million in a net unrecognized gain position of \$1.2 million, were reclassified from the HTM category to AFS due to recent credit rating downgrades by either Moody's Investors Service, Standard and Poor's Financial Services, or Fitch Ratings. These unexpected rating downgrades raised significant concerns about the issuers' credit worthiness, which changed our intention to hold these securities to maturity.

(c) The following tables summarize, for all securities in a net unrealized/unrecognized loss position at June 30, 2011 and December 31, 2010, the fair value and gross pre-tax net unrealized/unrecognized loss by asset class and by length of time those securities have been in a net loss position:

¹ Gross unrealized losses include non-OTTI unrealized amounts and OTTI losses recognized in AOCI. In addition, this column includes remaining unrealized gain or loss amounts on securities that were transferred to an HTM designation in the first quarter of 2009 for those securities that are in a net unrealized/unrecognized loss position.

2U.S. government includes corporate securities fully guaranteed by the FDIC.

The number of securities in an unrealized/unrecognized loss position increased from 199 at December 31, 2010 to 225 at June 30, 2011, with an associated fair value of \$621.0 million and \$492.1 million, respectively. Despite the increase in the number of securities, the corresponding unrealized/unrecognized position in total declined by \$8.6 million, reflecting smaller loss positions. This is further illustrated in the following table wherein the number of issues in the 80% - 99% market/book category increased since December 31, 2010 while the overall loss position decreased during the same period:

(\$ in thousa	ands)

We have reviewed the securities in the tables above in accordance with our OTTI policy, as described in Note 2. "Summary of Significant Accounting Policies" in Item 8. "Financial Statements and Supplementary Data." of our 2010 Annual Report. At June 30, 2011, unrealized/unrecognized losses on securities that were in a loss position for 12 months or longer amounted to \$5.9 million. Each of these securities are current with their interest and principal

³ Unrecognized holding gains/(losses) represent fair value fluctuations from the later of: (i) the date a security is designated as HTM; or (ii) the date that an OTTI charge is recognized on an HTM security.

payments in 2011 other than one security discussed below. The unrealized/unrecognized losses were primarily driven by \$3.6 million in our CMBS portfolio, including \$3.1 million of unrealized/unrecognized losses on three securities that had been previously impaired, one of which has experienced a shortfall in interest payments in 2011. The unrealized/unrecognized balance on this security was \$0.5 million at June 30, 2011. The current discounted cash flow analyses on these three securities did not indicate further impairment for Second Quarter 2011. For further discussion regarding the credit quality of our investment portfolio, see the "Investments" section of Item 2. "Management's Discussion and Analysis of Financial Condition and Results of Operations." of this Form 10-Q.

We do not have the intent to sell any securities in an unrealized/unrecognized loss position nor do we believe we will be required to sell these securities, and therefore we have concluded that they are temporarily impaired as of June 30, 2011. This conclusion reflects our current judgment as to the financial position and future prospects of the entity that issued the investment security and underlying collateral. If our judgment about an individual security changes in the future, we may ultimately record a credit loss after having originally concluded that one did not exist, which could have a material impact on our net income and financial position in future periods.

(d) Fixed maturity securities at June 30, 2011, by contractual maturity, are shown below. Mortgage-backed securities are included in the maturity tables using the estimated average life of each security. Expected maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations with or without call or prepayment penalties.

Listed below are HTM fixed maturity securities at June 30, 2011:

	Carrying	
(\$ in thousands)	Value	Fair Value
Due in one year or less	\$ 115,247	117,326
Due after one year through five years	648,116	676,796
Due after five years through 10 years	294,010	312,695
Due after 10 years	13,205	14,160
Total HTM fixed maturity securities	\$ 1,070,578	1,120,977

Listed below are AFS fixed maturity securities at June 30, 2011:

(\$ in thousands)	F	Fair Value
Due in one year or less	\$	191,624
Due after one year through five years		1,646,663
Due after five years through 10 years		681,048
Due after 10 years		5,902

Other securities		2,586	2,	,755	-
Total other investments	\$	132,137	13	37,865	61,620

The carrying value of our other investments decreased \$5.7 million compared to year end 2010. The carrying value was primarily impacted by distributions of \$32.8 million, partially offset by income of \$19.6 million and additional contributions of \$7.7 million under our existing commitments.

For a description of our seven alternative investment strategies outlined above, as well as redemption, restrictions, and fund liquidations, refer to Note 5. "Investments" in Item 8. "Financial Statements and Supplementary Data." of our 2010 Annual Report.

The following table sets forth aggregated summarized financial information for the partnerships in our alternative investment portfolio. The last line of the table below reflects our share of the aggregate income, which is the portion included in our consolidated Financial Statements. As the majority of these investments report results to us on a quarter lag, the summarized financial statement information for the three and six-month periods ended March 31 is as follows:

Income Statement Information	Quarter ende	d,	Six Months en	ded
	March 31,		March 31,	
(\$ in millions)	2011	2010	2011	2010
Net investment income	\$ 132.6	125.6	286.8	274.4
Realized gains (losses)	355.3	(396.9)	163.0	(486.7)
Net change in unrealized appreciation	608.3	810.3	2,072.5	1,248.8
Net income	\$ 1,096.2	539.0	2,522.3	1,036.5
Selective's insurance subsidiaries' net				
income	\$ 7.9	4.9	19.5	8.8

(f) At June 30, 2011, we had one fixed maturity security, with a carrying value of \$15.7 million, pledged as collateral for our outstanding borrowing with the Federal Home Loan Bank of Indianapolis ("FHLBI"). This borrowing, which has an outstanding principal balance of \$13.0 million, is included in "Notes payable" on our Consolidated Balance Sheets. In accordance with the terms of our agreement with the FHLBI, we retain all rights regarding this security, which is included in the "U.S. government and government agencies" classification of our AFS fixed maturity securities portfolio.

(g) The components of net investment income earned were as follows:

	Quarter endo June 30,	ed	Six Months er June 30,	nded
(\$ in thousands)	2011	2010	2011	2010
Fixed maturity securities	\$ 32,752	32,977	65,875	66,173
Equity securities	785	480	1,102	932
Short-term investments	33	133	95	233
Other investments	7,922	4,884	19,588	8,816
Investment expenses	(2,147)	(1,929)	(3,842)	(4,903)
Net investment income earned	\$ 39,345	36,545	82,818	71,251

Net investment income, before tax, increased by \$2.8 million for Second Quarter 2011 compared to Second Quarter 2010, and increased by \$11.6 million for Six Months 2011 compared to Six Months 2010. These increases were primarily driven by income from our alternative investments. Our alternative investments, which are accounted for under the equity method, primarily consist of investments in limited partnerships, the majority of which report results to us on a one quarter lag. The following table illustrates income by strategy for these partnerships:

	Quarter ende	ed June 30,	Six Months en	nded June 30,
(\$ in thousands)	2011	2010	2011	2010

(\$ in thousands) Fixed maturity securities Obligations of states and political subdivisions Corporate securities CMBS RMBS OTTI losses Six Months 2010 (\$ in thousands) Fixed maturity securities ABS CMBS RMBS	\$17 244 (186 294 \$369 Gross \$158 3,445 7,960 11,563	-) (658 228 (430 Included in O))	Earnings 17 244 472 66 799 Recognized in Earnings 31 5,497 8,224 13,752

OTTI charges recognized in earnings were immaterial at \$0.2 million in Second Quarter 2011 and \$0.8 million in Six Months 2011.

The following is a discussion surrounding the credit-related OTTI charges taken in Second Quarter and Six Months 2010 as outlined in the table above:

•\$2.7 million and \$8.2 million of RMBS credit OTTI charges in Second Quarter and Six Months 2010, respectively. The Second Quarter 2010 charges related to declines in the related cash flows of the collateral support. Based on our analysis, we did not believe it is probable that we would receive all contractual cash flows for these securities. In addition to the Second Quarter 2010 charges, losses in Six Months 2010 were largely driven by impairments on two securities in the first quarter of 2010 that we intended to sell. We sold these securities in Second Quarter 2010.

•\$2.8 million and \$5.5 million of CMBS credit OTTI charges in Second Quarter and Six Months 2010, respectively. These charges were related to reductions in the related cash flows of the underlying collateral of these securities. These charges were associated with securities that had been previously impaired but, over time, have shown little, if any, improvement in valuations, poor net operating income performance of the underlying properties, and, in some cases, an increase in over 60-day delinquency rates. For Second Quarter 2010, these securities had, on average, unrealized/unrecognized loss positions of approximately 87% of their amortized cost. Based on our analysis, we did not believe it is probable that we would receive all contractual cash flows for these securities.

•\$0.7 million of equity OTTI charges in both Second Quarter and Six Months 2010. These charges were driven primarily by one health care company which, due to a recent recall of one of its products, had experienced a significant decline in its share price. This coupled with the length of time this security had been in an unrealized loss position made a recovery to our cost basis unlikely in the near term.

The following tables set forth, for the periods indicated, gross credit loss impairments on fixed maturity securities for which a portion of the OTTI charge was recognized in OCI, and the corresponding changes in such amounts:

earnings	(169)	(6,184)	(799)	(14,424)
Total net realized gains (losses)	\$ 2,146		(3,264)	7,906		(3,328)

Realized gains and losses on the sale of investments are determined on the basis of the cost of the specific investments sold. Proceeds from the sale of AFS securities were \$52.1 million in Second Quarter 2011 and \$123.8 million in Six Months 2011. In addition to calls and maturities and certain bond sales, Six Months 2011 net realized gains, excluding OTTI charges, were driven by the sale of AFS equity securities for proceeds of \$59.7 million and realized gains of \$6.7 million due to a reallocation of the equity portfolio to a high dividend yield strategy.

Proceeds from the sale of AFS securities were \$128.3 million in Second Quarter 2010 and \$184.4 million in Six Months 2010. In addition to calls and maturities, the net realized gain, excluding OTTI charges, in Second Quarter and Six Months 2010 were driven by the Second Quarter 2010 sale of energy-focused AFS equity securities to mitigate portfolio risk and sector exposure. In addition to the Second Quarter 2010 realized gains, Six Months 2010 realized gains on AFS securities included sales in the first quarter of 2010 that were predominantly associated with tax planning strategies. These gains were largely offset by realized losses on certain AFS fixed maturity securities in Second Quarter 2010 that our new investment managers, during their initial review of the portfolio, had recommended that we sell. This recommendation was due to ongoing credit concerns of the underlying investments coupled with strategically positioning the portfolio to generate maximum yield while balancing risk objectives.

NOTE 7. Fair Value Measurements

The following table presents the carrying amounts and estimated fair values of our financial instruments as of June 30, 2011 and December 31, 2010:

There have been no significant changes to the techniques used to value our financial instruments during Six Months 2011. For a discussion regarding these techniques, refer to Note 2. "Summary of Significant Accounting Policies" in Item 8. "Financial Statements and Supplementary Data." in our 2010 Annual Report. For discussion of the sale of Selective HR, refer to Note 14. "Discontinued Operations" of this Form 10-Q.

The following tables provide quantitative disclosures of our financial assets that were measured at fair value at June 30, 2011 and December 31, 2010:

1 U.S. government includes corporate securities fully guaranteed by the FDIC.

The following tables provide a summary of the changes in fair value of securities using Level 3 inputs. The transfers of the CMBS, AFS securities in 2010 between levels in the fair value hierarchy were driven primarily by the availability and nature of the broker quotes used at the valuation dates:

NOTE 9. Segment Information

We have classified our operations into two segments, the disaggregated results of which are reported to and used by senior management to manage our operations:

- Insurance Operations, which is evaluated based on statutory underwriting results (net premiums earned, incurred losses and loss expenses, policyholders dividends, policy acquisition costs, and other underwriting expenses), and statutory combined ratios; and
 - Investments, which is evaluated based on net investment income and net realized gains and losses.

In computing the results of each segment, we do not make adjustments for interest expense, net general corporate expenses, or federal income taxes. We do not maintain separate investment portfolios for the segments and therefore, do not allocate assets to the segments. In addition, we do not aggregate any of our operating segments.

The following summaries present revenue from continuing operations (net investment income and net realized gain (loss) on investments in the case of the Investments segment) and pre-tax income from continuing operations for the individual segments.

NOTE 12. Commitments and Contingencies

At June 30, 2011, we had contractual obligations that expire at various dates through 2022 to invest up to an additional \$61.6 million in alternative investments. There is no certainty that any such additional investment will be required.

NOTE 13. Litigation

In the ordinary course of conducting business, we are named as defendants in various legal proceedings. Most of these proceedings are claims litigation involving our seven insurance subsidiaries (the "Insurance Subsidiaries") as either: (i) liability insurers defending or providing indemnity for third-party claims brought against insureds; or (ii) insurers defending first-party coverage claims brought against them. We account for such activity through the establishment of unpaid loss and loss adjustment expense reserves. We expect that the ultimate liability, if any, with respect to such ordinary-course claims litigation, after consideration of provisions made for potential losses and costs of defense, will not be material to our consolidated financial condition, results of operations, or cash flows.

Our Insurance Subsidiaries also are involved from time-to-time in other legal actions, some of which assert claims for substantial amounts. These actions include, among others, putative state class actions seeking certification of a state or national class. Such putative class actions have alleged, for example, improper reimbursement of medical providers paid under workers compensation and personal and commercial automobile insurance policies. Our Insurance Subsidiaries also are involved from time-to-time in individual actions in which extra-contractual damages, punitive damages, or penalties are sought, such as claims alleging bad faith in the handling of insurance claims. We believe

that we have valid defenses to these cases. We expect that the ultimate liability, if any, with respect to such lawsuits, after consideration of provisions made for estimated losses, will not be material to our consolidated financial condition. Nonetheless, given the large or indeterminate amounts sought in certain of these actions, and the inherent unpredictability of litigation, an adverse outcome in certain matters could, from time-to-time, have a material adverse effect on our consolidated results of operations or cash flows in particular quarterly or annual periods.

NOTE 14. Discontinued Operations

In 2009, we sold 100% of our interest in Selective HR, which had historically comprised the human resource administration outsourcing segment of our operations. We sold our interest for proceeds scheduled to be received over a 10-year period based on the ability of the purchaser to retain and generate new worksite lives though our independent agency distribution channel. Although the proceeds are contingent upon the future operations of the former Selective HR business, we have no continued involvement relevant to the proceeds. We recorded an after-tax charge of \$1.3 million and \$2.1 million in Second Quarter 2010 and Six Months 2010, respectively, primarily due to our revaluation of the contingent proceeds, including assumptions regarding worksite life generation and retention. No such charges have been recorded in 2011. As of June 30, 2011, our estimated sales price was approximately \$6.9 million, of which \$2.4 million has been received to date.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward-Looking Statements

In this Quarterly Report on Form 10-Q, we discuss and make statements regarding our intentions, beliefs, current expectations, and projections regarding our company's future operations and performance. Such statements are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements are often identified by words such as "anticipates," "believes," "expects," "will," "should," and "intends" and their negatives. We caution prospective investors that such forward-looking statements are not guarantees of future performance. Risks and uncertainties are inherent in our future performance. Factors that could cause actual results to differ materially from those indicated by such forward-looking statements include, but are not limited to, those discussed under Item 1A. "Risk Factors" below. These risk factors may not be exhaustive. We operate in a continually changing business environment and new risk factors may emerge from time to time. We can neither predict such new risk factors nor can we assess the impact, if any, of such new risk factors on our businesses or the extent to which any factor or combination of factors may cause actual results to differ materially from those expressed or implied in any forward-looking statements in this report. In light of these risks, uncertainties, and assumptions, the forward-looking events discussed in this report might not occur. We make forward-looking statements based on currently available information and assume no obligation to update these statements due to changes in underlying factors, new information, future developments, or otherwise.

Introduction

We offer property and casualty insurance products through our various subsidiaries. We classify our business into two operating segments: (i) Insurance Operations, which consists of commercial lines ("Commercial Lines") and personal lines ("Personal Lines"), including our flood lines of business; and (ii) Investments.

The purpose of the Management's Discussion and Analysis ("MD&A") is to provide an understanding of the consolidated results of operations and financial condition and known trends and uncertainties that may have a material impact in future periods. Consequently, investors should read the MD&A in conjunction with the consolidated financial statements in our annual report on Form 10-K for the year ended December 31, 2010 ("2010 Annual Report").

In the MD&A, we will discuss and analyze the following:

- Critical Accounting Policies and Estimates;
- Financial Highlights of Results for Second Quarter 2011 and Six Months 2011;
- Results of Operations and Related Information by Segment;
- Federal Income Taxes;
- Financial Condition, Liquidity, Short-term Borrowings, and Capital Resources;
- Ratings;
- Pending Accounting Pronouncements;
- Off-Balance Sheet Arrangements; and
- Contractual Obligations, Contingent Liabilities, and Commitments.

Critical Accounting Policies and Estimates

These unaudited interim consolidated financial statements include amounts based on our informed estimates and judgments for those transactions that are not yet complete. Such estimates and judgments affect the reported amounts in the consolidated financial statements. Those estimates and judgments most critical to the preparation of the consolidated financial statements involved the following: (i) reserves for losses and loss expenses; (ii) deferred policy acquisition costs; (iii) premium audit; (iv) pension and post-retirement benefit plan actuarial assumptions; (v) other-than-temporary investment impairments; and (vi) reinsurance. These estimates and judgments require the use of assumptions about matters that are highly uncertain and, therefore, are subject to change as facts and circumstances

develop. If different estimates and judgments had been applied, materially different amounts might have been reported in the financial statements. For additional information regarding our critical accounting policies, refer to our 2010 Annual Report, pages 44 through 54.

- 1 Refer to the Glossary of Terms attached to our 2010 Annual Report as Exhibit 99.1 for definitions of terms used in this Form 10-Q.
- 2 Operating income is used as an important financial measure by us, analysts, and investors, because the realization of investment gains and losses on sales in any given period is largely discretionary as to timing. In addition, these realized investment gains and losses, as well as other-than-temporary impairments ("OTTI") that are charged to earnings, and the results of discontinued operations, could distort the analysis of trends. See below for a reconciliation of operating income to net income in accordance with U.S. generally accepted accounting principles ("GAAP"). Operating return on average equity is calculated by dividing annualized operating income by average stockholders' equity.

Second Quarter 2011 revenues increased 3% compared to Second Quarter 2011, including a 1% improvement in net premiums earned. On a written basis, premiums increased 6% for the same period due to economic conditions that have improved our audit and endorsement premiums, coupled with a successful balance between retention and renewal rate. However, despite these premium improvements, pre-tax net income decreased by \$19.6 million in Second Quarter 2011 compared to the same period last year. The decrease was driven by:

- Pre-tax underwriting losses, which increased by \$29.5 million, to \$32.7 million, reflecting:
- · Catastrophe losses which increased by \$22.1 million, to \$38.1 million, compared to Second Quarter 2010; and
- Favorable prior year casualty development of \$5 million, compared to approximately \$12 million of favorable prior year casualty development in Second Quarter 2010.

Partially offsetting these items are:

- •Pre-tax net realized gains, which increased by \$5.4 million, from a realized loss of \$3.3 million to a realized gain of \$2.1 million. This improvement was primarily due to pre-tax non-cash OTTI charges that were \$6.0 million lower than last year at \$0.2 million.
- •Pre-tax net investment income earned, which increased \$2.8 million, to \$39.3 million, due to higher alternative investment income of \$3.0 million, to \$7.9 million. Our alternative investments, which are accounted for under the

equity method, primarily consist of investments in limited partnerships, the majority of which report results to us on a one quarter lag. See Note 6. "Investments" in Item 1. "Financial Statements" of this Form 10-Q for additional information regarding our alternative investment portfolio.

Tax expense from continuing operations decreased primarily due to the pre-tax results discussed above, partially offset by taxes being recorded at a lower full-year expected tax rate as required under Accounting Standards Codification 270, Interim Reporting ("ASC 270"). The effect of this accounting rule is to record every quarter at the expected annual marginal rate regardless of the relative magnitude of the individual components within any one quarter.

Pre-tax net income increased by \$1.8 million in Six Months 2011 compared to the same period last year. The increase was driven by:

- •Pre-tax net investment income earned, which increased \$11.6 million, to \$82.8 million, due to higher alternative investment income of \$10.8 million, to \$19.5 million.
- •Pre-tax net realized gains, which increased \$11.2 million from a realized loss of \$3.3 million to a realized gain of \$7.9 million. This improvement was primarily due to pre-tax non-cash OTTI charges that were \$13.6 million lower than last year at \$0.8 million.
- •Pre-tax losses on the disposal of discontinued operations of \$3.3 million as of Six Months 2010. No losses have been recorded in 2011.

Partially offsetting these items are:

- Pre-tax underwriting losses, which increased by \$26.0 million, to \$43.8 million, reflecting:
- Non-catastrophe property losses of \$115.2 million compared to \$98.5 million in Six Months 2010;
- · Catastrophe losses of \$44.9 million compared to \$40.2 million in Six Months 2010; and
- ·Favorable prior year casualty development of \$9 million, compared to \$21 million of favorable prior year casualty development in Six Months 2010.

Tax expense from continuing operations increased driven by the pre-tax results discussed above coupled with the impact of taxes recorded at a full-year expected tax rate as required under ASC 270.

The following table reconciles operating income and net income for the periods presented above:

	_	er ended ne 30,		Six Months ended June 30,		
(\$ in thousands, except per share amounts)	2011	2010		2011	2010	
Operating income	\$930	22,212		18,735	28,847	
Net realized gains (losses), after tax	1,395	(2,121)	5,139	(2,163)
Loss on disposal of discontinued operations, net of tax	-	(1,325)	-	(2,115)
Net income	\$2,325	18,766		23,874	24,569	
Diluted operating income per share	\$0.01	0.41		0.34	0.53	
Diluted net realized gains (losses) per share	0.03	(0.04)	0.09	(0.04)
Diluted net loss from disposal of discontinued operations pe	er					
share	-	(0.02)	-	(0.04)
Diluted net income per share	\$0.04	0.35		0.43	0.45	

Operating income decreased in Second Quarter 2011 and Six Months 2011 compared to the same periods last year reflecting increased property losses partially offset by improvements in net investment income as mentioned above.

Results of Operations and Related Information by Segment

Insurance Operations

Our Insurance Operations segment writes property and casualty insurance business through seven insurance subsidiaries (the "Insurance Subsidiaries"). Our Insurance Operations segment sells property and casualty insurance products and services primarily in 22 states in the Eastern and Midwestern U.S. through approximately 990 independent insurance agencies. Our Insurance Operations segment consists of two components: (i) Commercial Lines, which markets primarily to businesses and represents approximately 81% of net premium written ("NPW"); and (ii) Personal Lines, which markets primarily to individuals and represents approximately 19% of NPW. The underwriting performance of these lines is generally measured by four different statutory ratios: (i) loss and loss expense ratio; (ii) underwriting expense ratio; (iii) dividend ratio; and (iv) combined ratio. For further details regarding these ratios, see the discussion in the "Insurance Operations" section of Item 1. "Business." of our 2010 Annual Report.

- NPW increased in both Second Quarter and Six Months 2011 compared to the same periods last year. This is the first quarter since the fourth quarter of 2007 that NPW increased compared to the prior year. This increase is due to economic improvements evidenced in our audit and endorsement premium, coupled with the successful balance between retention and renewal rate. The following details the fluctuations in NPW for the comparable periods: o Audit additional premium of \$1.5 million in Second Quarter 2011 and audit return premium of \$2.1 million in Six Months 2011 compared to audit return premium of \$13.1 million in Second Quarter 2010 and \$24.3 million in Six
- o Endorsement additional premium of \$1.9 million and \$1.5 million in Second Quarter and Six Months 2011, respectively, compared to endorsement return premium of \$2.3 million and \$7.0 million in Second Quarter and Six Months 2010, respectively; and
- o Increase in net renewals of \$6.9 million, to \$320.2 million, in Second Quarter 2011 and \$3.4 million, to \$637.5 million, in Six Months 2011.

These items were partially offset by reductions in new business premiums of \$3.3 million, to \$68.4 million, in Second Quarter 2011 and \$19.7 million, to \$128.5 million, in Six Months 2011.

• NPE changes in Second Quarter and Six Months 2011 compared to the same periods last year are consistent with the fluctuation in NPW for the twelve-month period ended June 30, 2011 as compared to the twelve-month period ended June 30, 2010.

27

Months 2010;

- •The GAAP loss and loss expense ratio increased 9.1 points in Second Quarter 2011 compared to the prior year reflecting:
- o An increase in catastrophe losses of \$22.1 million, or 6.2 points, to \$38.1 million; oFavorable prior year casualty development of approximately \$5 million, or 1.4 points, compared to approximately \$12 million, or 3.3 points, in Second Quarter 2010; and
 - o An increase in non-catastrophe property losses of \$6.6 million, or 1.7 points.
- •The GAAP loss and loss expense ratio increased 4.3 points in Six Months 2011 compared to the prior year reflecting:
 - o An increase in non-catastrophe property losses of \$16.6 million, or 2.4 points;
- o An increase in catastrophe losses of \$4.7 million, or 0.7 points, to \$44.9 million; and oFavorable prior year casualty development of approximately \$9 million, or 1.3 points, compared to approximately \$21 million, or 2.9 points, in Second Quarter 2010.

The decreases in the GAAP underwriting expense ratio in Second Quarter and Six Months 2011, compared to the same periods last year, were primarily due to an increase in premiums that has outpaced underwriting expenses.

Insurance Operations Outlook

Our Insurance Operations segment reported a statutory combined ratio of 109.5% for Second Quarter 2011 and 106.1% for Six Months 2011. This includes a Commercial Lines statutory combined ratio of 108.2% and 104.4%, respectively, and a Personal Lines statutory combined ratio of 115.3% and 113.3%, respectively. A.M. Best Company ("A.M. Best") notes that industry-wide results for the first quarter of 2011 were significantly worse than the same period in 2010 as a result of elevated levels of catastrophe-related losses, lower reserve releases, and decreased investment gains despite an increase in net premiums written. A.M Best expects the industry's return on equity to remain low for the remainder of 2011 as a result of the catastrophe losses that have continued in the second quarter, ongoing challenging market conditions in the commercial lines sector, a sluggish economic recovery, and relatively low investment yields. A.M. Best believes that the level of reserve deficiencies for the industry will increase. They also anticipate record-setting catastrophe losses in Second Quarter 2011 as a result of unprecedented tornado activity, hail, drought, and wildfires. Industry results are expected to deteriorate further as a result of these factors, coupled with continued competitive market conditions, and the low interest rate environment. Certain analysts believe that results may be unprofitable through 2013, at which time they expect that market conditions may support a broader cyclical turn.

The industry has begun experiencing some improvement in pricing on select lines of business, and there are some indications that pricing may continue to improve, such as: (i) the low interest rate environment that has continued to put pressure on investment yields; (ii) an A.M. Best commercial lines industry statutory combined ratio projection for 2011 of 110.0%; (iii) higher anticipated reinsurance costs (see the "Reinsurance" section below for more detail); and (iv) declining industry profitability as a result of elevated levels of catastrophe-related losses in Six Months 2011 coupled with an Atlantic hurricane season that is expected to have above-average activity. A recent report from the Commercial Lines Insurance Pricing Survey showed that industry pricing increased by 0.4% during the first quarter of 2011, the first quarter of positive rate change since 2009. Despite this slight increase, the commercial lines industry remains very competitive and pricing has continued its downward trend in certain lines of business, such as commercial automobile and commercial property.

While industry pricing has just begun to improve, we are on our ninth consecutive quarter of price increases with 2.6% in Second Quarter 2011. The price increases that we have obtained demonstrate the overall strength of the relationships that we have with our independent agents, even in difficult economic and competitive times. We believe that once the market as a whole becomes more successful at driving price, we will be able to further capitalize on our

relationships with our agents to generate additional renewal price increases. The price increases we have been able to obtain, coupled with strong retention, have led to growth in our Commercial Lines NPW for the first time since the fourth quarter of 2007.

In an effort to write profitable business in the current commercial and personal lines environment, we continue to implement a defined plan of improving risk selection and mitigating higher frequency trends to complement our strong agency relationships and unique field-based model. In addition, as we are committed to executing on our strategy to introduce more high-margin products into our portfolio, we have entered into a renewal rights agreement to write commercial contract binding authority excess and surplus lines business. The agreement, which is expected to close in the third quarter of 2011, allows us a natural expansion of our commercial lines small business and offers a new product to agents and customers. The renewal rights that we purchased relate to a commercial lines book of business that produced gross premiums written of \$77 million in 2010.

The personal lines market has been more receptive to price increases and our Personal Lines operations continue to experience NPW growth driven by ongoing rate increases that went into effect in 2010 and 2011, which are expected to generate an additional \$26.3 million in annual premium. We were able to obtain increased Personal Lines renewal pure pricing of 6.5% in Second Quarter 2011 while retention increased two points, to 86%.

Given the elevated level of property losses incurred partially offset by the rate increases achieved and favorable prior year development we have experienced in Six Months 2011, we are expecting to generate overall full year statutory and GAAP combined ratios of between 104% and 105%, which include a catastrophe loss assumption of four points for the full year. These combined ratios do not include any assumptions for additional reserve development, favorable or unfavorable. Weighted average shares at year-end 2011 are expected to be approximately 55 million.
