Note 1 Summary of Significant Accounting Policies:

Nature of Operations: Consumers Bancorp, Inc. (the Corporation) is a bank holding company headquartered in Minerva, Ohio that provides, through its banking subsidiary, Consumers National Bank (the Bank), a broad array of products and services throughout its primary market area of Stark, Columbiana, Carroll and contiguous counties in Ohio. The Bank's business involves attracting deposits from businesses and individual customers and using such deposits to originate commercial, mortgage and consumer loans in its primary market area.

Basis of Presentation: The consolidated financial statements for interim periods are unaudited and reflect all adjustments (consisting of only normal recurring adjustments), which, in the opinion of management, are necessary to present fairly the financial position and results of operations and cash flows for the periods presented. The unaudited financial statements are presented in accordance with the requirements of Form 10-Q and do not include all disclosures normally required by accounting principles generally accepted in the United States of America. The financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Corporation's Form 10-K for the year ended June 30, 2013. The results of operations for the interim period disclosed herein are not necessarily indicative of the results that may be expected for a full year.

The consolidated financial statements include the accounts of the Corporation and the Bank. All significant inter-company transactions and accounts have been eliminated in consolidation.

Segment Information: The Corporation is a bank holding company engaged in the business of commercial and retail banking, which accounts for substantially all of the revenues, operating income, and assets. Accordingly, all of its operations are recorded in one segment, banking.

Reclassifications: Certain items in prior financial statements have been reclassified to conform to the current presentation. Any reclassifications had no impact on prior year net income or shareholders' equity.

Management evaluates securities for other-than-temporary impairment (OTTI) on a quarterly basis, and more frequently when economic or market conditions warrant such an evaluation. The securities portfolio is evaluated for OTTI by segregating the portfolio into two general segments and applying the appropriate OTTI model. Investment securities are generally evaluated for OTTI under FASB ASC Topic 320, *Accounting for Certain Investments in Debt and Equity Securities*. However, the trust preferred security is evaluated using the model outlined in FASB ASC Topic 325, *Recognition of Interest Income and Impairment on Purchased Beneficial Interests and Beneficial Interests that Continue to be Held by a Transfer in Securitized Financial Assets.*

In determining OTTI under the ASC Topic 320 model, management considers many factors, including: (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer, (3) whether the market decline was affected by macroeconomic conditions, and (4) whether the entity has the intent to sell the debt security or more likely than not will be required to sell the debt security before its anticipated recovery. The assessment of whether an other-than-temporary decline exists involves a high degree of subjectivity and judgment and is based on the information available to management at a point in time.

The unrealized and unrecognized losses within the securities portfolio as of December 31, 2013 have not been recognized into income because the decline in fair value is not attributed to credit quality, management does not intend to sell and it is likely that management will not be required to sell the securities prior to their anticipated recovery. The decline in fair value of the residential mortgage-backed securities, obligations of state and political subdivisions and obligations of U.S. government-sponsored agencies is largely due to changes in interest rates. The fair value is expected to recover as the securities approach maturity.

(Dollars in thousands, except per share amounts)

Under the ASC Topic 325 model, the present value of the remaining cash flows as estimated at the preceding evaluation date are compared to the current expected remaining cash flows. An OTTI is deemed to have occurred if there has been an adverse change in the remaining expected future cash flows. The analysis of the trust preferred security falls within the scope of ASC Topic 325.

The Corporation owns a trust preferred security, which represents collateralized debt obligations (CDOs) issued by other banks, bank holding companies and insurance companies. It was unclear whether the Corporation would be able to continue to hold this trust preferred security under the Volcker Rule that was issued on December 10, 2013. On January 14, 2014, an interim rule amending the treatment of certain CDOs under the Volcker Rule, allows the Corporation to continue to hold this trust preferred security since it is primarily invested in qualifying collateral. Management has the intent to hold this security for the foreseeable future. The security is part of a pool of issuers that support a more senior tranche of securities. The cash interest payments for the trust preferred security are being deferred as a result of an increase in principal and/or interest deferrals by the issuers of the underlying securities during the period of 2008 through 2011. The accumulated other-than-temporary impairment loss recognized in earnings in periods prior to 2012 was \$780. According to the December 31, 2013 cash flow analysis, the expected cash flows were above the recorded amortized cost of the trust preferred security and the Corporation has received pricing indications that are above the securities adjusted amortized cost of \$202. Therefore, management does not believe there is any additional other-than-temporary impairment related to this security at December 31, 2013.

Total	\$	1,475	\$	8	\$	384	\$	1,894	\$	215,692	\$	217,586

The above table of past due loans includes the recorded investment in non-accrual loans of \$7 in the 30 59 days past due category, \$382 in the 90 days or greater and \$708 in the loans not past due category.

Troubled Debt Restructurings:

As of December 31, 2013, the recorded investment of loans classified as troubled debt restructurings was \$1,559 with \$174 of specific reserves allocated to these loans. As of June 30, 2013, the recorded investment of loans classified as troubled debt restructurings was \$1,946 with \$245 of specific reserves allocated to these loans. As of December 31,

2013 and June 30, 2013, the Corporation had not committed to lend any additional amounts to customers with outstanding loans that are classified as troubled debt restructurings.

During the six months ended December 31, 2013 there were no loan modifications completed that were classified as troubled debt restructurings. There was no increase to the allowance for loan losses or any charge offs from troubled debt restructurings during the three or six month periods ended December 31, 2013.

(Dollars in thousands, except per share amounts)

The following table presents loans by class modified as troubled debt restructurings that occurred during the six months ended December 31, 2012:

		Pre-N	Modification	Post-Modification			
	Number of	Outst	tanding Recorded	Outstanding Recorded Investment			
	Loans	Inves	stment				
1 4 Family residential:							
Owner occupied	1	\$	21	\$	21		
Total	1	\$	21	\$	21		

Troubled debt restructurings increased the allowance for loan losses by \$2 for the three and six month periods ending December 31, 2012. There were no charge offs from troubled debt restructurings during the three or six month periods ending December 31, 2012.

There were no loans classified as troubled debt restructurings for which there was a payment default during the three or six month periods ending December 31, 2013 or 2012. A loan is considered to be in payment default once it is 90 days contractually past due under the modified terms.

Credit Quality Indicators:

The Corporation categorizes loans into risk categories based on relevant information about the ability of borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information, current economic trends and other relevant information. The Corporation analyzes loans individually by classifying the loans as to credit risk. This analysis includes loans with a total outstanding loan relationship greater than \$100 and non-homogeneous loans, such as commercial and commercial real estate loans. Management monitors the loans on an ongoing basis for any changes in the borrower's ability to service their debt and affirm the risk ratings for the loans and leases in their respective portfolio on an annual basis. The Corporation uses the following definitions for risk ratings:

Special Mention. Loans classified as special mention have a potential weakness that deserves management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or of the institution's credit position at some future date.

Substandard. Loans classified as substandard are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

Doubtful. Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

(Dollars in thousands, except per share amounts)

Loans not meeting the criteria above that are analyzed individually as part of the above described process are considered to be pass rated loans. Loans listed as not rated are either less than \$100 or are included in groups of homogeneous loans. These loans are evaluated based on delinquency status, which are disclosed in the previous table within this footnote. Based on the most recent analysis performed, the recorded investment by risk category of loans by class of loans was as follows:

	As of December 31, 2013

(Dollars in thousands, except per share amounts)

Note 4 - Fair Value

Fair value is the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. There are three levels of inputs that may be used to measure fair values:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a company's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

Financial assets and financial liabilities measured at fair value on a recurring basis include the following:

Securities available-for-sale: When available, the fair values of available-for-sale securities are determined by obtaining quoted prices on nationally recognized securities exchanges (Level 1 inputs). For securities where quoted market prices are not available, fair values are calculated based on market prices of similar securities (Level 2 inputs). For securities where quoted prices or market prices of similar securities are not available, fair values are calculated using discounted cash flows or other market indicators (Level 3 inputs). The fair value of the Level 3 security is calculated using the spread to the swap and LIBOR curves. During times when trading is more liquid, broker quotes are used (if available) to validate the model. Rating agency and industry research reports as well as defaults and deferrals on the individual security is reviewed and incorporated into the calculation.

(Dollars in thousands, except per share amounts)

Assets and liabilities measured at fair value on a recurring basis are summarized below, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value:

	Balance at December 31,		Fair Value Measurements at December 31, 2013 Using			
	201	,	Level 1		vel 2	Level 3
Assets:						
Obligations of U.S. government-sponsored entities and agencies	\$	12,193	\$	\$	12,193	\$
Obligations of states and political subdivisions		41,588			41,588	
Mortgage-backed securities residential		59,506			59,506	
Collateralized mortgage obligations		2,977			2,977	
Trust preferred security		270				270
	Balance at		Fair Value Measurements at June 30, 2013 Using			
	Bal	ance at			nents at	
		ance at e 30, 2013		Using	nents at	Level 3
Assets:			June 30, 2013	Using		Level 3
Assets: Obligations of U.S. government-sponsored entities and agencies			June 30, 2013	Using		Level 3
Obligations of U.S. government-sponsored	Jun	e 30, 2013	June 30, 2013 Level 1	Using Lev	vel 2	
Obligations of U.S. government-sponsored entities and agencies Obligations of states and political	Jun	e 30, 2013 4,658	June 30, 2013 Level 1	Using Lev	vel 2 4,658	
Obligations of U.S. government-sponsored entities and agencies Obligations of states and political subdivisions	Jun	4,658 39,812	June 30, 2013 Level 1	Using Lev	vel 2 4,658 39,812	

There were no transfers between Level 1 and Level 2 during the three or six month periods of the 2014 fiscal year or the during the 2013 fiscal year.

The following table presents a reconciliation of the trust preferred security measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the three and six months ended December 31, 2013 and 2012:

	Three Months Ended Dec. 31, 2013		End	Months led 2. 31, 2013	End	ee Months ed . 31, 2012	Six Months Ended Dec. 31, 2012	
Beginning balance	\$	162	\$	162	\$	74	\$	64
Change in fair value included in other comprehensive income		108		108		64		74
Ending balance, December 31	\$	270	\$	270	\$	138	\$	138

The significant unobservable inputs used in the fair value measurement of the Corporation's trust preferred security are probabilities of specific-issuer defaults and deferrals and specific-issuer recovery assumptions. Significant increases in specific-issuer default assumptions or decreases in specific-issuer recovery assumptions would result in a significantly

lower fair value measurement. Conversely, decreases in specific-issuer default assumptions or increases in specific-issuer recovery assumptions would result in a higher fair value measurement.

Certain financial assets and financial liabilities are measured at fair value on a non-recurring basis; that is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances. Financial assets and financial liabilities measured at fair value on a non-recurring basis include the following:

CONSUMERS BANCORP, INC. Notes to the Consolidated Financial Statements (Unaudited) (continued)

(Dollars in thousands, except per share amounts)

Impaired Loans: At the time a loan is considered impaired, it is valued at the lower of cost or fair value. Impaired loans carried at fair value generally receive specific allocations of the allowance for loan losses. For collateral dependent loans, fair value is commonly based on recent real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value.

Financial assets and financial liabilities measured at fair value on a non-recurring basis are summarized below:

	Balance at December 31,			Measurements at 1, 2013 Using			
	201	3		Level 1	Level 2	Lev	vel 3
Impaired loans:

Non-owner occupied			475				475

CONSUMERS BANCORP, INC. Notes to the Consolidated Financial Statements (Unaudited) (continued)

(Dollars in thousands, except per share amounts)

Impaired loans included in the table above are measured for impairment using the fair value of the collateral and had a carrying amount of \$690, with a specific allocation of the allowance for loan losses of \$157 at December 31, 2013. The resulting impact to the provision for loan losses was an increase of \$25 being recorded for the three month period ended December 31, 2013 and a reduction of \$63 being recorded for the six month period ended December 31, 2013.

Impaired loans included in the table above are measured for impairment using the fair value of the collateral and had a carrying amount of \$839, with a specific allocation of the allowance for loan losses of \$220 at June 30, 2013. The resulting impact to the provision for loan losses was a reduction of \$23 and \$50 being recorded for the three and six month periods ended December 31, 2012, respectively.

The following table presents quantitative information about Level 3 fair value measurements for financial instruments measured at fair value on a non-recurring basis at December 31, 2013:

	Fair		Valuation			Weighted
	Valu	e	Technique	Unobservable Inputs	Range	Average
Impaired loans: 1-4 Family						
Owner occupied	\$	89	Sales comparison approach	Adjustment for differences between comparable sales	-17.61% to 23.60%	4.77%
Non-owner occupied		445	Income approach	Capitalization rate	9.58%	9.58%

The following table shows the estimated fair values of financial instruments that are reported at amortized cost in the Corporation's consolidated balance sheets, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value:

	De	cember 31, 20		imated	Jur	ne 30, 2013	Est	imated

(Dollars in thousands, except per share amounts)

	December 31, 2	013 Estimated	June 30, 2013	Estimated
	Carrying	Fair	Carrying	Fair
Financial Liabilities:	Amount	Value	Amount	Value
Level 2 inputs:				
Demand and savings deposits	226,554	226,554	214,898	214,898
Time deposits	73,038	73,302	79,209	79,575
Short-term borrowings	15,457	15,457	12,490	12,490
Federal Home Loan Bank advances	8,830	9,307	6,366	7,049
Accrued interest payable	50	50	48	48

The assumptions used to estimate fair value are described as follows:

Estimated fair value for cash and cash equivalents, certificates of deposits in other financial institutions, accrued interest receivable and payable, demand and savings deposits and short-term borrowings were considered to approximate carrying value. The methodologies for other financial assets and financial liabilities are discussed below:

Loans held for sale: The fair value of loans held for sale is estimated based upon binding contracts and quotes from third party investors resulting in a Level 3 classification.

Loans: Fair value for loans was estimated for portfolios of loans with similar financial characteristics. For adjustable rate loans that reprice at least annually and for fixed rate commercial loans with maturities of six months or less which possess normal risk characteristics, carrying value was determined to be fair value. Fair value of other types of loans (including adjustable rate loans which reprice less frequently than annually and fixed rate term loans or loans which possess higher risk characteristics) was estimated by discounting future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for similar anticipated maturities resulting in a Level 3 classification. The methods utilized to estimate the fair value of loans do not necessarily represent an exit price.

Securities held-to-maturity: The held-to-maturity security is a revenue bond made to a local municipality. The fair value of this security is calculated using a spread to the Bloomberg municipal fair market health care curve resulting in a Level 3 classification.

Time deposits: Fair value of fixed-maturity certificates of deposit was estimated using the rates offered at December 31, 2013 and June 30, 2013, for deposits of similar remaining maturities. Estimated fair value does not include the benefit that results from low-cost funding provided by the deposit liabilities compared to the cost of borrowing funds in the market resulting in a Level 2 classification.

Federal Home Loan Bank advances: Fair value of Federal Home Loan Bank advances was estimated using current rates at December 31, 2013 and June 30, 2013 for similar financing resulting in a Level 2 classification.

Federal bank and other restricted stocks, at cost: Federal bank and other restricted stocks include stock acquired for regulatory purposes, such as Federal Home Loan Bank stock and Federal Reserve Bank stock that are accounted

for at cost due to restrictions placed on their transferability; and therefore, are not subject to the fair value disclosure requirements.

The Corporation's lending commitments have variable interest rates and "escape" clauses if the customer's credit quality deteriorates. Therefore, the fair values of these items are not significant and are not included in the above table.

Note 5 Earnings Per Share

Basic earnings per share is the amount of earnings available to each share of common stock outstanding during the reporting period and is equal to net income divided by the weighted average number of shares outstanding during the period. Diluted earnings per share is the amount of earnings available to each share of common stock outstanding during the reporting period adjusted to include the effect of potentially dilutive common shares that may be issued upon the vesting of restricted stock awards. The following table details the calculation of basic and diluted earnings per share:

		the Three Mo ded December			For the Six Months Ended December 31,				
	201		201	12	201	*	2012		
Basic:									
Net income available to common shareholders	\$	755	\$	747	\$	1,376	\$	1,362	
Weighted average common shares outstanding		2,726,687		2,062,658		2,674,816		2,060,034	
Basic income per share	\$	0.28	\$	0.36	\$	0.51	\$	0.66	
Diluted:									
Net income available to common shareholders	\$	755	\$	747	\$	1,376	\$	1,362	
Weighted average common shares outstanding		2,726,687		2,062,658		2,674,816		2,060,034	
Dilutive effect of restricted stock		364		530		296		496	
Total common shares and dilutive potential common shares		2,727,051		2,063,188		2,675,112		2,060,530	
Dilutive income per share	\$	0.28	\$	0.36	\$	0.51	\$	0.66	

Note 6 Accumulated Other Comprehensive Income

The components of other comprehensive income related to unrealized gains and losses on available-for-sale securities for the three and six month periods ended December 31, 2013, were as follows:

	Mon	the Three ths Ended mber 31, 2013	Ende	ne Six Months d mber 31, 2013
Beginning balance	\$	183	\$	(16)
Amounts reclassified from accumulated other comprehensive income, net of taxes of \$111		(21)		(21)
Net current period other comprehensive loss, net of taxes of \$203 and \$100 for the three and six months periods of December 31, 2013, respectively		(392)		(193)

Ending balance \$ (230) \$ (230)

¹ Within the consolidated statement of income, security gains, net in non-interest income was impacted by \$32 and income tax expense was impacted by \$11 due to reclassifications from accumulated other comprehensive income.

Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations

(Dollars in thousands, except per share data)

General

The following is management's analysis of the Corporation's results of operations for the three and six month periods ended December 31, 2013, compared to the same period in 2012, and the consolidated balance sheet at December 31, 2013 compared to June 30, 2013. This discussion is designed to provide a more comprehensive review of the operating results and financial condition than could be obtained from an examination of the financial statements alone. This analysis should be read in conjunction with the consolidated financial statements and related footnotes and the selected financial data included elsewhere in this report.

Overview

Consumers Bancorp, Inc., a bank holding company incorporated under the laws of the State of Ohio (the Corporation), owns all of the issued and outstanding common shares of Consumers National Bank, a bank chartered under the laws of the United States of America (the Bank). The Corporation's activities have been limited primarily to holding the common shares of the Bank. The Bank's business involves attracting deposits from businesses and individual customers and using such deposits to originate commercial, mortgage and consumer loans in its market area, consisting primarily of Stark, Columbiana, Carroll and contiguous counties in Ohio. The Bank also invests in securities consisting primarily of U.S. government sponsored entities, municipal obligations, mortgage-backed and collateralized mortgage obligations issued by Fannie Mae, Freddie Mac and Ginnie Mae.

Results of Operations

Three and Six Months Ended December 31, 2013 and December 31, 2012

In the second quarter of fiscal year 2014, net income was \$755, or \$0.28 per common share, compared with \$747, or \$0.36 per common share, in the prior year period. The following are key highlights of our results of operations for the three months ending December 31, 2013:

earnings per share declined for the second quarter of fiscal year 2014 as a result of an additional 655,668 outstanding shares issued for the rights and public offering that were completed in July 2013;

net interest income increased to \$3,165, or by 3.7%, in the second quarter of fiscal year 2014 from the same prior year period;

loan loss provision expense in the second quarter of fiscal year 2014 totaled \$35 compared to \$56 from the same period last year;

(Dollars in thousands, except per share data)

noninterest income increased by \$59, or 8.7%, in the second quarter of fiscal year 2014 from the same prior year period; and

noninterest expenses increased by \$196, or 7.2%, in the second quarter of fiscal year 2014 principally as a result of higher salary and employee benefits due to staff hired in the loan department and an increase in professional fees.

In the first six months of fiscal year 2014, net income was \$1,376, or \$0.51 per common share, compared with \$1,362, or \$0.66 per common share, in the prior year period. The following are key highlights of our results of operations for the six months ending December 31, 2013:

net interest income increased by \$164, or 2.7%, in fiscal year 2014 from the same prior year period; loan loss provision expense in fiscal year 2014 totaled \$168 compared to \$81 from the same prior year period; noninterest income increased by \$90, or 6.7%, in fiscal year 2014 from the same prior year period mainly as a result of an increase in debit card interchange income and service charges on deposit accounts due to the implementation of a new business deposit account structure.

noninterest expenses increased by \$178, or 3.2%, in fiscal year 2014 principally as a result of higher salary and employee benefits due to staff hired in the lending area and an increase in professional fees.

Return on average equity (ROE) and return on average assets (ROA) were 7.87% and 0.82%, respectively, for the second quarter of fiscal year 2014 compared to 10.21% and 0.86%, respectively, for the second quarter of fiscal year 2013. ROE and ROA were 7.36% and 0.76%, respectively, for the first six months of fiscal year 2014 compared to 9.46% and 0.79%, respectively, for the same prior year period.

Net Interest Income

Net interest income, the difference between interest income earned on interest-earning assets and interest expense incurred on interest-bearing liabilities, is the largest component of the Corporation's earnings. Net interest income is affected by changes in the volumes, rates and composition of interest-earning assets and interest-bearing liabilities. Net interest margin is calculated by dividing net interest income on a fully tax equivalent basis (FTE) by total average interest-earning assets. FTE income includes tax-exempt income, restated to a pre-tax equivalent, based on the statutory federal income tax rate. All average balances are daily average balances. Non-accruing loans are included in average loan balances.

The Corporation's net interest margin for the three months ended December 31, 2013 was 3.85%, compared to 3.94% for the same year ago period. Net interest income for the three months ended December 31, 2013 increased by \$112, or 3.7%, to \$3,165 from \$3,053 for the same year ago period. The increase in net interest income was primarily the result of a decline in the Corporation's cost of funds and an increase in average interest-earning assets.

(Dollars in thousands, except per share data)

Interest income for the three months ended December 31, 2013 increased by \$41, or 1.2%, from the same year ago period. An increase of \$17,833 or 5.5%, in average interest-earning assets partially offset the impact the low interest rate environment has had on the yield of average interest-earning assets. Interest expense for the three months ended December 31, 2013 decreased by \$71, or 22.4%, from the same year ago period. The Corporation's cost of funds decreased to 0.39% for the three month period ended December 31, 2013 from 0.52% for the same year ago period mainly due to lower market rates affecting the rates paid on time deposit accounts.

The Corporation's net interest margin for the six months ended December 31, 2013 was 3.82%, compared to 3.94% for the same year ago period. Net interest income for the six months ended December 31, 2013 increased by \$164, or 2.7%, to \$6,198 from \$6,034 for the same year ago period. The increase in net interest income was primarily the result of a decline in the Corporation's cost of funds and an increase in average interest-earning assets.

Interest income for the six months ended December 31, 2013 increased by \$22, or 0.3%, from the same year ago period. An increase of \$17,197, or 5.3%, in average interest-earning assets more than offset the impact the low interest rate environment has had on the yield of average interest-earning assets. Interest expense for the six months ended December 31, 2013 decreased by \$142, or 22.1%, from the same year ago period. The Corporation's cost of funds decreased to 0.40% for the six month period ended December 31, 2013 from 0.53% for the same year ago period mainly due to lower market rates affecting the rates paid on all interest-bearing deposit accounts.

Provision for Loan Losses

The provision for loan losses represents the charge to income necessary to adjust the allowance for loan losses to an amount that represents management's assessment of the estimated probable incurred credit losses in the Bank's loan portfolio that have been incurred at each balance sheet date. For the three month period ended December 31, 2013, the provision for loan losses was \$35, a decrease of \$21 from the same prior year period. For the six month period ended December 31, 2013, the provision for loan losses was \$168, an increase of \$87 from the same period last year.

The provision for loan losses increased to \$168 for the first six months of fiscal year 2014 primarily as a result of net charge-offs recognized in the consumer and 1-4 family residential real estate loan portfolios. For the six months ended December 31, 2013, net charge-offs totaled \$177, or an annualized net charge-offs to total loan ratio of 0.16%, compared with \$49, or 0.05% of total loans, for the same period last year.

A negative provision for loan losses was recognized within the 1-4 family residential real estate portfolio segment for the three and six month periods ended December 31, 2013. This negative provision for loan losses was recognized primarily as a result of the following: from June 30, 2013 to December 31, 2013 there was a reduction in the recorded investment of 1-4 family residential real estate loans classified as substandard; and from June 30, 2013 there was a reduction in the reserve required for 1-4 family residential real estate loans individually evaluated for impairment. The allowance for loan losses as a percentage of loans was 1.13% at December 31, 2013 and 1.15% at June 30, 2013.

Non-performing loans were \$2,401 as of December 31, 2013 and represented 1.09% of total loans. This compared with \$1,099, or 0.51%, at June 30, 2013 and \$1,733, or 0.84%, at December 31, 2013. Non-performing loans, impaired loans and loans past due 90 days or greater all increased as a result of a \$1,423 commercial real estate credit that was placed on non-accrual during the first quarter of fiscal year 2014. This loan is well secured by two farms and multiple homes. The allowance for loan losses to total non-performing loans at December 31, 2013 was 103.58% compared with 227.12% at June 30, 2013 and 136.58% at December 31, 2012.

The provision for loan losses for the period ending December 31, 2013 was considered sufficient by management for maintaining an appropriate allowance for loan losses for probable incurred credit losses.

Non-Interest Income

Non-interest income increased to \$737, or 8.7%, for the second quarter of fiscal year 2014 compared with \$678 for the same period last year. The increase was primarily the result of a \$30 increase in gains on sale of securities and a \$19 increase in debit card interchange income.

CONSUMERS BANCORP, INC. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

(Dollars in thousands, except per share data)

Non-interest income increased by \$90, or 6.7%, to \$1,432 for the first six months of fiscal year 2014, compared to \$1,342 for the same period last year. Non-interest income for the first six months of fiscal year 2014 included a net gain from the sale of securities of \$32 compared with a net gain of \$23 recognized during the same prior year period.

Service charges on deposit accounts increased by \$21, or 3.1%, for the six month period ended December 31, 2013 compared to the same period last year primarily as a result of the implementation of a new business deposit account structure. Debit card interchange income increased by \$40, or 10.0%, from the same period last year primarily due to an increase in debit card usage by our customers.

Non-Interest Expenses

Total non-interest expenses increased to \$2,924, or by 7.2%, during the second quarter of fiscal year 2014, compared with \$2,728 during the same year ago period.

Salaries and employee benefits increased by \$91, or 6.2%, during the second quarter of fiscal year 2014 due to additional staff hired in the lending area.

Professional and director fees increased by \$47 or 56.6%, during the second quarter of fiscal year 2014 from the same period last year primarily as a result of an increase in legal and consulting fees. Legal fees increased primarily as a result of the completion of the review of certain bank and customer contracts and consulting fees increased as a result of the organization implementing an enterprise risk management program.

Total non-interest expenses increased to \$5,773, or by 3.2%, during the first six months of fiscal year 2014, compared with \$5,595 during the same year ago period.

Salaries and employee benefits increased by \$86, or 2.8%, during the first six months of fiscal year 2014 due to additional staff hired in the lending area.

Professional and director fees increased by \$66 or 37.7%, during the first six months of fiscal year 2014 from the same period last year primarily as a result of an increase in consulting fees, audit fees and the addition of a director to the Board of Directors. Consulting and audit fees increased primarily as a result of the organization implementing an enterprise risk management program and the outsourcing the completion of certain internal audits.

Marketing and advertising expenses declined by \$30, or 18.5%, during the first six months of fiscal year 2014 from the same period last year. The decline was primarily the result of lower marketing expenses since these expenses were higher in the same prior year period due to the opening of the Jackson-Belden office on July 31, 2012.

Income Taxes

Income tax expense for the three month period ended December 31, 2013 decreased by \$12, to \$188 from \$200, compared to a year ago. The effective tax rate was 19.9% for the current quarter as compared to 21.1% for the same period last year.

(Dollars in thousands, except per share data)

Income tax expense for the six month period ended December 31, 2013 decreased by \$25, to \$313 from \$338, compared to a year ago. The effective tax rate was 18.5% for the current period as compared to 19.9% for the same period last year. The decline in the effective tax rate was primarily the result of an increase in tax-exempt municipal income.

The effective tax rate differed from the federal statutory rate principally as a result of tax-exempt income from obligations of states and political subdivisions, loans and earnings on bank owned life insurance.

Financial Condition

Total assets at December 31, 2013 were \$364,179 compared to \$343,489 at June 30, 2013, an increase of \$20,690, or an annualized 11.9%.

Available-for-sale securities increased by \$19,305 from \$97,229 at June 30, 2013 to \$116,534 at December 31, 2013. Within the available-for-sale securities portfolio, residential mortgage-backed securities increased by \$12,617 and obligations of U.S. government-sponsored agencies increased by \$7,535. This growth was primarily funded by a \$5,485 increase in deposits and by a \$9,743 increase in shareholders' equity. The increase in shareholders' equity was primarily the result of the funds received from the rights and public offering that were completed in July 2013. The Corporation intends to use the net proceeds to enhance the Bank's overall capital position, for general corporate purposes and future organic and other growth opportunities.

Non-Performing Assets

The following table presents the aggregate amounts of non-performing assets and respective ratios as of the dates indicated.

	December 31, 2013			June 30, 2013			December 3 2012		
Non-accrual loans	\$	2,401		\$	1,097		\$	1,624	
Loans past due over 90 days and still accruing					2			109	
Total non-performing loans		2,401			1,099			1,733	
Other real estate owned		709							
Total non-performing assets	\$	3,110		\$	1,099		\$	1,733	
Non-performing loans to total loans		1.09	%		0.51	%		0.84	%
Allowance for loan losses to total non-performing loans		103.58	%		227.12	%		136.58	%

Other real estate owned of \$709 as of December 31, 2013 was comprised of one multi-family residential property that was acquired through a deed in lieu of foreclosure. As of December 31, 2013, impaired loans totaled \$3,291, of which \$2,291 are included in non-accrual loans. Commercial and commercial real estate loans are classified as impaired if management determines that full collection of principal and interest, in accordance with the terms of the loan documents, is not probable. Impaired loans and non-performing loans have been considered in management's analysis of the appropriateness of the allowance for loan losses. Management and the Board of Directors are closely monitoring these loans and believe that the prospects for recovery of principal and interest, less identified specific reserves, are favorable.

Contractual Obligations, Commitments, Contingent Liabilities and Off-Balance Sheet Arrangements

Liquidity

The objective of liquidity management is to ensure adequate cash flows to accommodate the demands of our customers and provide adequate flexibility for the Corporation to take advantage of market opportunities under both normal operating conditions and under unpredictable circumstances of industry or market stress. Cash is used to fund loans, purchase investments, fund the maturity of liabilities, and at times to fund deposit outflows and operating activities. The Corporation's principal sources of funds are deposits; amortization and prepayments of loans; maturities, sales and principal receipts from securities; borrowings; and operations. Management considers the asset position of the Corporation to be sufficiently liquid to meet normal operating needs and conditions. The Corporation's earning assets are mainly comprised of loans and investment securities. Management continually strives to obtain the best mix of loans and investments to both maximize yield and insure the soundness of the portfolio, as well as to provide funding for loan demand as needed.

Net cash inflow from operating activities for the six month period ended December 31, 2013 was \$2,495, net cash outflows from investing activities was \$22,241 and net cash inflows from financing activities was \$19,497. A major source of cash was \$9,237 net proceeds from the rights and public offering, \$8,993 from maturities, calls or principal pay downs on available-for-sale securities and a \$5,485 increase in deposits. A major use of cash included the \$31,918 purchase of securities and a \$3,660 net increase in loans. Total cash and cash equivalents was \$9,107 as of December 31, 2013 compared to \$9,356 at June 30, 2013 and \$10,314 at December 31, 2012.

The Bank offers several types of deposit products to its customers. The rates offered by the Bank and the fees charged for them are competitive with others currently available in the market area. Deposits totaled \$299,592 at December 31, 2013 compared with \$294,107 at June 30, 2013.

To provide an additional source of liquidity, the Corporation has entered into an agreement with the Federal Home Loan Bank (FHLB) of Cincinnati. At December 31, 2013, FHLB advances totaled \$8,830 as compared with \$6,366 at June 30, 2013. As of December 31, 2013, the Bank had the ability to borrow an additional \$16,919 from the FHLB based on a blanket pledge of qualifying first mortgage loans. The Corporation considers the FHLB to be a reliable source of liquidity funding, secondary to its deposit base.

(Dollars in thousands, except per share data)

Short-term borrowings consisted of repurchase agreements which is a financing arrangement that matures daily and federal funds purchased from correspondent banks. The Bank pledges securities as collateral for the repurchase agreements. Short-term borrowings increased to \$15,457 at December 31, 2013 from \$12,490 at June 30, 2013.

Jumbo time deposits (those with balances of \$100 thousand and over) totaled \$29,563 at December 31, 2013 and \$33,693 at June 30, 2013. These deposits are monitored closely by the Corporation and are mainly priced on an individual basis. When these deposits are from a municipality, certain bank-owned securities are pledged to guarantee the safety of these public fund deposits as required by Ohio law. The Corporation has the option to use a fee-paid broker to obtain deposits from outside its normal service area as an additional source of funding. The Corporation, however, does not rely upon these deposits as a primary source of funding. Although management monitors interest rates on an ongoing basis, a quarterly rate sensitivity report is used to determine the effect of interest rate changes on the financial statements. In the opinion of management, enough assets or liabilities could be repriced over the near term (up to three years) to compensate for such changes. The spread on interest rates, or the difference between the average earning assets and the average interest-bearing liabilities, is monitored quarterly.

Capital Resources

Total shareholders' equity increased by \$9,743 to \$37,886 as of December 31, 2013 from \$28,143 as of June 30, 2013. The increase was primarily the result of \$9,237 in net proceeds from the completion of the rights and public offering.

On February 26, 2013, the Corporation filed a registration statement with the Securities and Exchange Commission (SEC) related to a \$10,000 shareholder rights offering. Under the rights offering, the Corporation distributed to its shareholders of record as of March 26, 2013, proportional rights to purchase additional shares and the opportunity to purchase shares in excess of their basic subscription rights. The Corporation also offered any shares not subscribed for in the rights offering through a subsequent public offering. In July 2013, the Corporation completed its rights and public offering with the sale of 655,668 shares of common stock for net proceeds of \$9,237, consisting of gross proceeds of \$9,999, net of \$762 of issuance costs. The Corporation intends to use the net proceeds to enhance the Bank's overall capital position, for general corporate purposes and future organic and other growth opportunities.

The Bank is subject to various regulatory capital requirements administered by federal regulatory agencies. Capital adequacy guidelines and prompt corrective-action regulations involve quantitative measures of assets, liabilities, and certain off-balance-sheet items calculated under regulatory accounting practices. Failure to meet various capital requirements can initiate regulatory action that could have a direct material effect on the Corporation's financial statements.

(Dollars in thousands, except per share data)

The Bank's leverage and risk-based capital ratios as of December 31, 2013 were 9.9% and 15.6%, respectively. This compares to leverage and risk-based capital ratios of 8.1% and 13.0%, respectively, as of June 30, 2013. The Bank exceeded minimum regulatory capital requirements to be considered well-capitalized for both periods. Management is not aware of any matters occurring subsequent to December 31, 2013 that would cause the Bank's capital category to change.

Critical Accounting Policies

The financial condition and results of operations for the Corporation presented in the Consolidated Financial Statements, accompanying notes to the Consolidated Financial Statements and Management's Discussion and Analysis of Financial Condition and Results of Operations are, to a large degree, dependent upon the Corporation's accounting policies. The selection and application of these accounting policies involve judgments, estimates and uncertainties that are susceptible to change.

The Corporation has identified the appropriateness of the allowance for loan losses and the valuation of securities as critical accounting policies and an understanding of these policies are necessary to understand the financial statements. Critical accounting policies are those policies that require management's most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain. Note one (Summary of Significant Accounting Policies - Securities and Allowance for Loan Losses), note two (Securities), note three (Loans) and Management's Discussion and Analysis of Financial Condition and Results of Operation (Critical Accounting Policies) of the 2013 Form 10-K provide detail with regard to the Corporation's accounting for the allowance for loan losses and valuation of securities and other-than-temporary impairment. There have been no significant changes in the application of accounting policies since June 30, 2013.

Forward-Looking Statements

When used in this report (including information incorporated by reference in this report), the words or phrases "will likely result," "are expected to," "will continue," "is anticipated," "estimate," "project," "believe" or similar expression intended to identify "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These forward-looking statements may involve risks and uncertainties that are difficult to predict, may be beyond the Corporation's control, and could cause actual results to differ materially from those described in such statements. Any such forward-looking statements are made only as of the date of this report or the respective dates of the relevant incorporated documents, as the case may be, and, except as required by law, the Corporation undertakes no obligation to update these forward-looking statements to reflect subsequent events or circumstances. Factors that could cause actual results for future periods to differ materially from those anticipated or projected include, but are not limited to:

(Dollars in thousands, except per share data)

- · regional and national economic conditions becoming less favorable than expected, resulting in, among other things, a deterioration in credit quality of assets and the underlying value of collateral could prove to be less valuable than otherwise assumed;
- the economic impact from the oil and gas activity in the region could be less than expected or the timeline for development could be longer than anticipated;
- an extended period in which market levels of interest rates remain at historical low levels which could reduce, or put pressure on our ability to maintain, anticipated or actual margins;
- the nature, extent, and timing of government and regulatory actions;
- · material unforeseen changes in the financial condition or results of Consumers National Bank's customers;
- · competitive pressures on product pricing and services; and
- · a deterioration in market conditions causing debtors to be unable to meet their obligations.

The risks and uncertainties identified above are not the only risks the Corporation faces. Additional risks and uncertainties not presently known to the Corporation or that the Corporation currently believes to be immaterial also may adversely affect the Corporation. Should any known or unknown risks and uncertainties develop into actual events, those developments could have material adverse effects on the Corporation's business, financial condition and results of operations.

CONSUMERS BANCORP, INC.

Item 4 Controls and Procedures

Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by the report, an evaluation was performed under the supervision and with the participation of the Corporation's management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Corporation's disclosure controls and procedures pursuant to Exchange Act Rule 13a- 15e. Based on the evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Corporation's disclosure controls and procedures were effective as of December 31, 2013.

Changes in Internal Controls Over Financial Reporting

There have not been any changes in the Corporation's internal control over financial reporting that occurred during the Corporation's last quarter that have materially affected, or are reasonably likely to materially affect, the Corporation's internal control over financial reporting.

Item 5 Other Information

On February 14, 2014, Consumers National Bank, a wholly-owned subsidiary of the Corporation, entered into a salary continuation agreement with Renee K. Wood, Chief Financial Officer and Treasurer.

The salary continuation agreement (the "Agreement") entered into with Mrs. Wood replaces a noncompetition agreement entered into on February 11, 2011. The Agreement was made under the Corporation's salary continuation program; a plan that exists to encourage the long-term retention of executives and avoid the cost of executive turnover. Under the Agreement, upon a retirement from the Corporation at the age of 65, Mrs. Wood will receive 180 months of salary continuation payments in an amount equal to 50% of her base pay paid during the three years preceding her retirement. Vesting under the Agreement commences at age 50 allowing Mrs. Wood to be eligible to receive a reduced benefit if she retires between the age of 50 and 65. If Mrs. Wood dies during active service, her beneficiary is entitled to receive the accrual balance determined as of the end of the month preceding death. Upon termination of employment following a disability, Mrs. Wood will be fully vested under the plan and eligible to receive a payment equal to the amount accrued by the Corporation at the time of disability. Upon termination of employment within twelve months following a change of control for reasons other than death, disability, or retirement, Mrs. Wood will be eligible to receive a payment equal to the greater of (i) one times Mrs. Wood's base salary in effect immediately preceding termination of employment or (ii) the accrual balance determined as of the end of the month preceding the termination of employment.

Item 6 Exhibits

Exhibit	
Number	Description
Exhibit 10.8	Salary Continuation Agreement by and between Consumers National Bank and Renee Wood dated February 14, 2014.
Exhibit 11	Statement regarding Computation of Per Share Earnings (included in Note 5 to the Consolidated Financial Statements).
Exhibit 31.1	Rule 13a-14(a)/15d-14(a) Certification of Chief Executive Officer
Exhibit 31.2	Rule 13a-14(a)/15d-14(a) Certification of Chief Financial Officer

Exhibit 32.1 Certification of Chief Executive Officer and Chief Financial Officer Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes Oxley Act of 2002.
