PART I

ITEM 1 – BUSINESS

General Development of the Business

In this 10-K, “we”, “us”, “our”, “MREIC” or “the Company”, refers to Monmouth Real Estate Investment Corporation, together with its predecessors and subsidiaries, unless the context requires otherwise.

The Company is a corporation operating as a qualified real estate investment trust (REIT) under Sections 856-860 of the Internal Revenue Code (the Code). The Company has been a REIT since 1969 and intends to maintain its qualification as a REIT in the future. As a qualified REIT, with limited exceptions, the Company will not be taxed under Federal and certain state income tax laws at the corporate level on taxable income that it distributes to its shareholders. For special tax provisions applicable to REITs, refer to Sections 856-860 of the Code.

The Company was established in 1968 as a New Jersey Business Trust (NJBT). In 1990, the NJBT merged into a newly formed Delaware corporation. On May 15, 2003, the Company changed its state of incorporation from Delaware to Maryland by merging with and into a Maryland corporation (the Reincorporation).

Narrative Description of Business

The Company’s primary business is the ownership of real estate. Its investment focus is to own well-located, net leased industrial properties which are leased primarily to investment-grade tenants on long-term leases. In addition, the Company holds a portfolio of REIT securities which the Company generally limits to no more than approximately 10% of its undepreciated assets.

At September 30, 2014, the Company held investments in eighty-two properties totaling approximately 11,207,000 square feet with an occupancy rate of 95.9% (See Item 2 for a detailed description of the properties). These properties are located in twenty-eight states: Alabama, Arizona, Colorado, Connecticut, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Maryland, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Jersey, New York, North Carolina, Ohio, Oklahoma, Pennsylvania, South Carolina, Tennessee, Texas, Virginia, and Wisconsin. All of these properties are wholly-owned with the exception of the two properties in New Jersey in which the Company owns a majority interest. All properties in which the Company has investments are leased on a net basis except an industrial park in Monaca, Pennsylvania and the shopping center located in Somerset, New Jersey.

During fiscal 2014, the Company purchased six industrial properties totaling approximately 1,450,000 square feet with net leased terms ranging from ten to twenty years resulting in a weighted average lease maturity of 13.9 years. Approximately 565,000 square feet, or 39%, is leased to subsidiaries of FedEx Corporation (FDX), consisting of approximately 237,000 square feet to FedEx Ground Package System, Inc. and 328,000 square feet to FedEx SmartPost, Inc. The purchase price for the six properties was approximately \$97,605,000 and they are located in Indiana, Kansas, Kentucky, Oklahoma, Pennsylvania and Texas. The funds for these six acquisitions were provided by mortgages of \$62,905,000 on the properties, draws on an unsecured line of credit and cash on hand.

In the first quarter of fiscal 2015 to date, the Company purchased four industrial properties totaling approximately 559,000 square feet with net leased terms ranging from seven to fifteen years resulting in a weighted average lease maturity of 11.1 years. Approximately 362,000 square feet, or 65%, is leased to FedEx Ground Package System, Inc. The purchase price for the four properties was approximately \$40,338,000 and they are located in Illinois, Missouri and Texas. The four industrial properties purchased during fiscal 2015 to date brings our current total leasable square feet to approximately 11,766,000 square feet and our occupancy rate to 96.1%. The funds for these acquisitions were provided by mortgages of approximately \$24,887,000 for three of the properties and cash on hand. In addition to the four properties purchased during the first quarter of fiscal 2015 to date, we have entered into agreements to purchase nine new build-to-suit, industrial buildings that are currently being developed in Florida, Indiana, Kansas, Kentucky, Louisiana, North Carolina, Ohio and Texas totaling approximately 3,219,000 square feet and are net leased for terms ranging from ten to fifteen years resulting in a weighted average lease

maturity of 12.2 years. Approximately 1,716,000 square feet, or 53%, is leased to subsidiaries of FDX, consisting of approximately 1,386,000 square feet to FedEx Ground Package System, Inc. and 331,000 square feet to FedEx SmartPost, Inc. The purchase price for the nine properties is approximately \$265,629,000. Subject to satisfactory due diligence, we anticipate closing these nine transactions during fiscal 2015 and fiscal 2016. The Company may make additional acquisitions in fiscal 2015 and the funds for these acquisitions may come from mortgages, draws on our unsecured line of credit, cash on hand, sale of marketable securities, other bank borrowings, proceeds from the Dividend Reinvestment and Stock Purchase Plan (DRIP), private placements and public offerings of additional common or preferred stock or other securities. To the extent that funds or appropriate properties are not available, fewer acquisitions will be made.

Currently, the Company derives its income primarily from real estate rental operations. Rental and reimbursement revenue (excluding lease termination income in fiscal 2014, 2013 and 2012 of \$1,182,890, \$690,730 and \$3,222,283, respectively) was \$64,672,341, \$54,607,086 and \$50,368,931 for the years ended September 30, 2014, 2013 and 2012, respectively. Total assets were \$743,756,700 and \$617,240,866 as of September 30, 2014 and 2013, respectively.

As of September 30, 2014, the Company had approximately 11,207,000 square feet of property, of which approximately 4,951,000 square feet, or 44%, consisting of forty-three separate stand-alone leases, was leased to FedEx Corporation (FDX) and its subsidiaries, (9% to FDX and 35% to FDX subsidiaries). These properties are located in twenty different states. As of September 30, 2014, the only tenants that leased 5% or more of the Company's total square footage were FDX and its subsidiaries, Milwaukee Electric Tool Corporation, which leased approximately 615,000 square feet, comprising approximately 5% of the Company's rental space, and Ralcorp Holdings, Inc., which leased approximately 558,000 square feet, comprising of approximately 5% of the Company's total rental space.

During fiscal 2014, the only tenant that accounted for 5% or more of our rental and reimbursement revenue was FDX (including its subsidiaries). Our rental and reimbursement revenue from FDX and its subsidiaries totaled approximately \$35,007,000, \$29,241,000 and \$27,202,000, or 54% (10% from FDX and 44% from FDX subsidiaries), 53% (12% from FDX and 41% from FDX subsidiaries) and 54% (14% from FDX and 40% from FDX subsidiaries) of total rent and reimbursement revenues for the fiscal years ended September 30, 2014, 2013 and 2012, respectively. No other tenant accounted for 5% or more of the Company's total Rental and Reimbursement revenue for the fiscal years ended September 30, 2014, 2013 and 2012.

The Company's weighted-average lease expiration was approximately 6.7 and 6.1 years as of September 30, 2014 and 2013, respectively, and its average annualized rent per occupied square foot as of September 30, 2014 and 2013 was \$5.51 and \$5.53, respectively. The Company's occupancy rate at each of the years ended September 30, 2014 and 2013 was 95.9% and 96.0%, respectively.

The Company competes with other investors in real estate for attractive investment opportunities. These investors include other equity real estate investment trusts, limited partnerships, syndications and private investors, among others. Competition in the market areas in which the Company operates is significant and affects the Company's ability to acquire or expand properties, occupancy levels, rental rates, and operating expenses of certain properties.

Management has built relationships with merchant builders which have historically provided the Company with investment opportunities that fit the Company's investment policy. The amount of new construction of industrial properties on the national level has recently increased following several years of historically low levels of new supply. For further discussion of potential impact of competitive conditions on our business, see Item 1A: Risk Factors below.

The Company continues to invest in both debt and equity securities of other REITs, which the Company generally limits to no more than approximately 10% of its undepreciated assets. The Company from time to time may purchase these securities on margin when the interest and dividend yields exceed the cost of the funds. As of September 30, 2014 and 2013, there were no draws against the margin. This securities portfolio, to the extent not pledged to secure borrowings, provides the Company with liquidity and additional income. Such securities are subject to risk arising from adverse changes in market rates and prices, primarily interest rate risk relating to debt

Table of Contents

securities and market price risk relating to equity securities. From time to time, the Company may use derivative instruments to mitigate interest rate risk, however, this has not occurred during any periods presented. At September 30, 2014 and 2013, the Company had \$59,311,403 and \$45,451,740, respectively, of securities available for sale. The unrealized net gain on securities available for sale at September 30, 2014 and 2013 was \$121,356 and \$1,989,268, respectively. For the fiscal years ended September 30, 2014, 2013 and 2012, the Company's net realized gains from the sale of securities were \$2,166,766, \$7,133,252 and \$6,044,065, respectively.

Investment and Other Policies

The Company's investment policy is to concentrate its investments in the area of long-term net leased industrial properties, leased primarily to investment-grade tenants. The Company's strategy is to obtain a favorable yield spread between the income from the net leased industrial properties and interest costs. In addition, management believes that investments in well-located industrial properties provide a potential for long-term capital appreciation. There is the risk that, upon expiration of leases, the properties will become vacant or will be re-leased at lower rents. The results obtained by the Company by re-leasing the properties will depend on the market for industrial properties at that time.

The Company seeks to invest in well-located, modern buildings, leased pursuant to long-term leases, primarily to investment-grade tenants. In management's opinion, the newly built facilities meet these criteria. The Company has a concentration of properties leased to FDX and FDX subsidiaries. This is a risk factor that shareholders should consider. FDX is a publicly-owned corporation and information on its financial condition and business operations is readily available to the Company's shareholders.

The Company currently has thirteen full time employees and one part time employee of which the Company currently shares 1 officer (Chairman of the Board) and 2 additional employees (Controller and Director of Investor Relations) with a related entity, UMH Properties, Inc. (UMH). The Controller and the Director of Investor Relations time is allocated 70% to the Company and 30% to UMH. Effective January 1, 2015, the Company will reduce the number of employees it shares with UMH to 1 officer (Chairman of the Board) and 1 additional employee (Director of Investor Relations). Allocations of salaries and benefits are made based on the amount of the employees' time dedicated to each affiliated company. Some general and administrative expenses, including office rent, are allocated between the Company and UMH based on use or services provided. In fiscal 2014 total shared expense, including salaries billed by UMH to the Company, were \$394,927. See Item 13 for an itemized breakdown of these costs. On August 22, 2014, the Company entered into a seven-year lease agreement to occupy 5,680 square feet for the Company's new corporate office space. The lease will become effective once the landlord provides a certificate of occupancy, which is expected to be in January 2015. Once the Company relocates to its new corporate office space, it will no longer share rent expense with UMH.

The Company may issue securities for property; however, this has not occurred to date. The Company may repurchase or reacquire its shares from time to time if, in the opinion of the Board of Directors, such acquisition is advantageous to the Company. No shares were repurchased or reacquired during fiscal 2014 and, as of September 30, 2014, the Company does not own any of its own shares.

Property Management

Through July 31, 2012, sixty-eight of the Company's then wholly-owned industrial properties and the shopping center in Somerset, NJ, in which the Company holds a two-thirds interest, were managed on behalf of the Company by Cronheim Management Services, Inc. (CMS), a division of David Cronheim Company, a company affiliated with one of our directors as discussed in the Consolidated Financial Statements. CMS provided sub-agents as regional managers for the Company's properties. The Company was subject to a management contract with CMS for a fixed annual fee of \$380,000 through January 31, 2012 and a fixed annual fee of \$410,000 through July 31, 2012. During fiscal year 2012, the Company also agreed to reimburse CMS for fees paid to subagents. The Company paid CMS management fees of \$562,452 during fiscal 2012, for the management of the properties subject to the management contract. Effective August 1, 2012, the Company's management contract with CMS terminated, the Company became a fully integrated and self-managed real estate company and these sixty-eight wholly-owned industrial properties and the shopping center in Somerset, NJ became self-managed by the Company. CMS also

received \$15,950 in lease commissions in fiscal 2012. The David Cronheim Mortgage Corporation, an affiliated company of CMS, received \$140,000, \$241,500 and \$161,000 in mortgage brokerage commissions during fiscal 2014, 2013 and 2012, respectively.

Subsequent to the termination of the CMS management contract, the Company paid subagent fees directly to the subagents in the amount of \$264,811 and \$228,476 for fiscal years ended September 30, 2014 and 2013, respectively.

Until October 31, 2014, the Company's two industrial properties in Olive Branch, Mississippi, were managed by Industrial Developments International (IDI). Management fees paid to IDI for the fiscal years ended September 30, 2014, 2013 and 2012 were \$49,476, \$42,550 and \$11,766, respectively. Effective November 1, 2014, the Company began to self-manage these properties.

The Company's industrial property in Streetsboro, Ohio is managed by GEIS Companies (GEIS). Management fees paid to GEIS for the fiscal years ended September 30, 2014, 2013 and 2012 were \$50,138, \$50,385 and \$52,823, respectively.

The Company's industrial property in Carlstadt, New Jersey is owned by Palmer Terrace Realty Associates, LLC. The Company owns 51% of Palmer Terrace Realty Associates, LLC. This property is managed by Marcus Associates, an entity affiliated with the owner of the 49% noncontrolling interest. Management fees paid by Palmer Terrace Realty Associates, LLC to Marcus Associates for each of the fiscal years ended September 30, 2014, 2013 and 2012 totaled \$15,804 each year.

Environmental Matters

Under various federal, state and local environmental laws, statutes, ordinances, rules and regulations, an owner of real property may be liable for the costs of removal or remediation of certain hazardous or toxic substances at, on, in or under such property as well as certain other potential costs relating to hazardous or toxic substances. These liabilities may include government fines and penalties and damages for injuries to persons and adjacent property. Such laws often impose liability without regard to whether the owner knew of, or was responsible for, the presence or disposal of such substances. Although generally our tenants are primarily responsible for any environmental damages and claims related to the leased premises, in the event of the bankruptcy or inability of a tenant of such premises to satisfy any obligations with respect to such environmental liability, the Company may be required to satisfy such obligations. In addition, as the owner of such properties, the Company may be held directly liable for any such damages or claims irrespective of the provisions of any lease.

From time to time, in connection with managing the properties or upon acquisition of a property, the Company authorizes the preparation of Phase I and, when necessary, Phase II environmental reports with respect to its properties. Based upon such environmental reports and the Company's ongoing review of its properties, as of the date of this Annual Report, the Company is not aware of any environmental condition with respect to any of its properties which it believes would be reasonably likely to have a material adverse effect on its financial condition and/or results of operations. There can be no assurance, however, that (1) the discovery of environmental conditions, the existence or severity of which were previously unknown; (2) changes in law; (3) the conduct of tenants; or (4) activities relating to properties in the vicinity of our properties, will not expose the Company to material liability in the future.

ITEM 1A – RISK FACTORS

The following risk factors address the material risks concerning our business. If any of the risks discussed in this report were to occur, our business, prospects, financial condition, results of operation and our ability to service our debt and make distributions to our shareholders could be materially and adversely affected and the market price per share of our stock could decline significantly. Some statements in this report, including statements in the following risk factors, constitute forward-looking statements. Please refer to the section entitled “Cautionary Statement Regarding Forward-Looking Statements.”

Real Estate Industry Risks

Our business and financial results are affected by local real estate conditions in areas where we own properties.

We may be affected adversely by general economic conditions and local real estate conditions. For example, an oversupply of industrial properties in a local area or a decline in the attractiveness of our properties to tenants and potential tenants would have a negative effect on us.

Other factors that may affect general economic conditions or local real estate conditions include:

- population and demographic trends;
- employment and personal income trends;
- zoning, use and other regulatory restrictions;
- income tax laws;

- changes in interest rates and availability and costs of financing;
- competition from other available real estate;

- in instances where our properties are not under a net lease, our ability to provide adequate maintenance and insurance;

- in instances where our properties are not under a net lease and thus we may not be reimbursed by our tenants, increased operating costs, including insurance premiums, utilities and real estate taxes.

We may be unable to compete with our larger competitors and other alternatives available to tenants or potential tenants of our properties. The real estate business is highly competitive. We compete for properties with other real estate investors and purchasers, including other real estate investment trusts, limited partnerships, syndications and private investors, some of whom may have greater financial resources, revenues and geographical diversity than we have. Furthermore, we compete for tenants with other property owners. All of our industrial properties are subject to significant local competition. We also compete with a wide variety of institutions and other investors for capital funds necessary to support our investment activities and asset growth. To the extent that we are unable to effectively compete in the marketplace, our business may be adversely affected.

We are subject to significant regulation that inhibits our activities and may increase our costs. Local zoning and use laws, environmental statutes and other governmental requirements may restrict expansion, rehabilitation and reconstruction activities. These regulations may prevent us from taking advantage of economic opportunities. Legislation such as the Americans with Disabilities Act may require us to modify our properties at a substantial cost and noncompliance could result in the imposition of fines or an award of damages to private litigants. Future legislation may impose additional requirements. We may incur additional costs to comply with any future requirements.

Table of Contents

Our investments are concentrated in the industrial distribution sector and our business would be adversely affected by an economic downturn in that sector. Our investments in real estate assets are primarily concentrated in the industrial distribution sector. This concentration may expose us to the risk of economic downturns in this sector to a greater extent than if our business activities included a more significant portion of other sectors of the real estate industry.

Risks Associated with Our Properties

We may be unable to renew or extend leases or re-let space as leases expire. While we seek to invest in well-located, modern buildings, leased to investment-grade tenants on long-term leases, a number of our properties are subject to short-term leases. When a lease expires, a tenant may elect not to renew or extend it. We may not be able to re-let the property on similar terms, if we are able to re-let the property at all. The terms of renewal, extension or re-lease (including the cost of required renovations and/or concessions to tenants) may be less favorable to us than the prior lease. If we are unable to re-let all or a substantial portion of our properties, or if the rental rates upon such re-letting are significantly lower than expected rates, our cash generated before debt repayments and capital expenditures and our ability to make expected distributions, may be adversely affected. We have established an annual budget for renovation and re-letting expenses that we believe is reasonable in light of each property's operating history and local market characteristics. However, this budget may not be sufficient to cover these expenses.

Our business is substantially dependent on FedEx Corporation. FDX, together with its subsidiaries, is our largest tenant, consisting of forty-three separate stand-alone leases located in twenty different states as of September 30, 2014. As of September 30, 2014, the Company had approximately 11,207,000 square feet of property, of which approximately 4,951,000 square feet, or 44%, was leased to FDX and its subsidiaries, (9% from FDX and 35% from FDX subsidiaries). Rental and reimbursement revenue from FDX and its subsidiaries are approximately 54% (10% from FDX and 44% from FDX subsidiaries) of total rental and reimbursement revenue for fiscal 2014. No other tenant accounted for 5% or more of the Company's total Rental and Reimbursement revenue for the fiscal 2014. If FDX and its subsidiaries were to become unable to make lease payments because of a downturn in its business or otherwise, our financial condition and ability to make expected distributions would be materially and adversely affected.

We are subject to risks involved in single tenant leases. We focus our acquisition activities on real properties that are net leased to single tenants. Therefore, the financial failure of, or other default by, a single tenant under its lease is likely to cause a significant reduction in the operating cash flow generated by the property leased to that tenant and might decrease the value of that property. In addition, we will be responsible for 100% of the operating costs following a vacancy at a single tenant building.

We may be affected negatively by tenant financial difficulties and leasing delays. At any time, a tenant may experience a downturn in its business that may weaken its financial condition. Similarly, a general decline in the economy may result in a decline in the demand for space at our industrial properties. As a result, our tenants may delay lease commencement, fail to make rental payments when due, or declare bankruptcy. Any such event could result in the termination of that tenant's lease and losses to us.

We receive a substantial portion of our income as rents under long-term leases. If tenants are unable to comply with the terms of their leases because of rising costs or falling revenues, we, in our sole discretion, may deem it advisable to modify lease terms to allow tenants to pay a lower rental rate or a smaller share of operating costs, taxes and insurance. If a tenant becomes insolvent or bankrupt, we cannot be sure that we could recover the premises from the tenant promptly or from a trustee or debtor-in-possession in any bankruptcy proceeding relating to the tenant. We also

cannot be sure that we would receive rent in the proceeding sufficient to cover our expenses with respect to the premises. If a tenant becomes bankrupt, the federal bankruptcy code will apply and, in some instances, may restrict the amount and recoverability of our claims against the tenant. A tenant's default on its obligations to us for any reason could adversely affect our financial condition and the cash we have available for distribution.

Table of Contents

We may be unable to sell properties when appropriate because real estate investments are illiquid. Real estate investments generally cannot be sold quickly and, therefore, will tend to limit our ability to vary our property portfolio promptly in response to changes in economic or other conditions. In addition, the Code limits our ability to sell our properties. The inability to respond promptly to changes in the performance of our property portfolio could adversely affect our financial condition and ability to service debt and make distributions to our shareholders.

Environmental liabilities could affect our profitability. We face possible environmental liabilities. Environmental laws today can impose liability on a previous owner or operator of a property that owned or operated the property at a time when hazardous or toxic substances were disposed on, or released from, the property. A conveyance of the property, therefore, does not relieve the owner or operator from liability. As a current or former owner and operator of real estate, we may be required by law to investigate and clean up hazardous substances released at or from the properties we currently own or operate or have in the past owned or operated. We may also be liable to the government or to third parties for property damage, investigation costs and cleanup costs. In addition, some environmental laws create a lien on the contaminated site in favor of the government for damages and costs the government incurs in connection with the contamination. Contamination may adversely affect our ability to sell or lease real estate or to borrow using the real estate as collateral. We are not aware of any environmental liabilities relating to our investment properties which would have a material adverse effect on our business, assets, or results of operations. However, we cannot assure you that environmental liabilities will not arise in the future and that such liabilities will not have a material adverse effect on our business, assets or results of operation.

Actions by our competitors may decrease or prevent increases in the occupancy and rental rates of our properties. We compete with other owners and operators of real estate, some of which own properties similar to ours in the same submarkets in which our properties are located. If our competitors offer space at rental rates below current market rates or below the rental rates we currently charge our tenants, we may lose potential tenants, and we may be pressured to reduce our rental rates below those we currently charge in order to retain tenants when our tenants' leases expire. As a result, our financial condition, cash flow and cash available for distribution, the market price of our preferred and common stock and our ability to satisfy our debt service obligations could be materially and adversely affected.

Coverage under our existing insurance policies may be inadequate to cover losses. Weather conditions and natural disasters such as hurricanes, tornados, earthquakes, floods, droughts, fires and other environmental conditions can harm our business operations. We generally maintain insurance policies related to our business, including casualty, general liability and other policies, covering our business operations, employees and assets. However, we would be required to bear all losses that are not adequately covered by insurance. In addition, there are certain losses that are not generally insured because it is not economically feasible to insure against them, including losses due to riots or acts of war. If an uninsured loss or a loss in excess of insured limits were to occur with respect to one or more of our properties, then we could lose the capital we invested in the properties, as well as the anticipated future revenue from the properties and, in the case of debt, which is with recourse to us, we would remain obligated for any mortgage debt or other financial obligations related to the properties. Although we believe that our insurance programs are adequate, we cannot assure you that we will not incur losses in excess of our insurance coverage, or that we will be able to obtain insurance in the future at acceptable levels and reasonable costs.

We may be unable to acquire properties on advantageous terms or acquisitions may not perform as we expect. We have acquired individual properties and portfolios of properties, and intend to continue to do so. Our acquisition activities and their success are subject to the following risks:

- when we are able to locate a desired property, competition from other real estate investors may significantly increase the purchase price;
- acquired properties may fail to perform as expected;
- the actual costs of repositioning or redeveloping acquired properties may be higher than our estimates;

acquired properties may be located in new markets where we face risks associated with an incomplete knowledge or understanding of the local market, a limited number of established business relationships in the area and a relative unfamiliarity with local governmental and permitting procedures;

10

Table of Contents

· we may be unable to quickly and efficiently integrate new acquisitions, particularly acquisitions of portfolios of properties, into our existing operations, and as a result, our results of operations and financial condition could be adversely affected; and

· we may acquire properties subject to liabilities and without any recourse, or with only limited recourse, to the seller. As a result, if a claim were asserted against us based upon ownership of those properties, we might have to pay substantial sums to resolve it, which could adversely affect our cash flow and financial condition.

Financing Risks

We face inherent risks associated with our debt incurrence. We finance a portion of our investments in properties and marketable securities through the incurrence of debt. We are subject to the risks normally associated with debt financing, including the risk that our cash flow will be insufficient to meet required payments of principal and interest. In addition, debt creates other risks, including:

- rising interest rates on our variable rate debt;
- inability to repay or refinance existing debt as it matures, which may result in forced disposition of assets on disadvantageous terms;
- refinancing terms that are less favorable than the terms of existing debt; and
- inability to meet required payments of principal and/or interest.

We mortgage our properties, which subjects us to the risk of foreclosure in the event of non-payment. We mortgage many of our properties to secure payment of indebtedness and, if we are unable to meet mortgage payments, the property could be foreclosed upon or transferred to the mortgagee with a consequent loss of income and asset value. A foreclosure of one or more of our properties could adversely affect our financial condition, results of operations, cash flow, and ability to service debt and make distributions and the market price of our preferred and common stock.

We face risks related to “balloon payments” and refinancings. Certain of our mortgages will have significant outstanding principal balances on their maturity dates, commonly known as “balloon payments”. There can be no assurance that we will have the funds available to fund the balloon payment or that we will be able to refinance the debt on favorable terms or at all. To the extent we cannot either pay off or refinance this debt on favorable terms or at all, we may be forced to dispose of properties on disadvantageous terms or pay higher interest rates, either of which could have an adverse impact on our financial performance and ability to service debt and make distributions.

We face risks associated with our dependence on external sources of capital. In order to qualify as a REIT, we are required each year to distribute to our shareholders at least 90% of our REIT taxable income, and we are subject to tax on our income to the extent it is not distributed. Because of this distribution requirement, we may not be able to fund all future capital needs from cash retained from operations. As a result, to fund capital needs, we rely on third-party sources of capital, which we may not be able to obtain on favorable terms, if at all. Our access to third-party sources of capital depends upon a number of factors, including (i) general market conditions; (ii) the market’s perception of our growth potential; (iii) our current and potential future earnings and cash distributions; and (iv) the market price of our capital stock. Additional debt financing may substantially increase our debt-to-total capitalization ratio. Additional equity issuances may dilute the holdings of our current shareholders.

We may become more highly leveraged, resulting in increased risk of default on our obligations and an increase in debt service requirements which could adversely affect our financial condition and results of operations and our ability to pay distributions. We have incurred, and may continue to incur, indebtedness in furtherance of our activities. Our governing documents do not limit the amount of indebtedness we may incur. Accordingly, our Board of Directors may authorize us to incur additional debt and would do so, for example, if it

Table of Contents

were necessary to maintain our status as a REIT. We could therefore become more highly leveraged, resulting in an increased risk of default on our obligations and an increase in debt service requirements which could adversely affect our financial condition and results of operations and our ability to pay distributions to shareholders.

Covenants in our loan documents could limit our flexibility and adversely affect our financial condition. The terms of our various credit agreements and other indebtedness require us to comply with a number of customary financial and other covenants, such as maintaining debt service coverage and leverage ratios and maintaining insurance coverage. These covenants may limit our flexibility in our operations, and breaches of these covenants could result in defaults under the instruments governing the applicable indebtedness even if we had satisfied our payment obligations. If we were to default under credit agreements or other debt instruments, our financial condition could be adversely affected.

Other Risks

We may not be able to access adequate cash to fund our business. Our business requires access to adequate cash to finance our operations, distributions, capital expenditures, debt service obligations, development and redevelopment costs and property acquisition costs, if any. We expect to generate the cash to be used for these purposes primarily with operating cash flow, borrowings under secured and unsecured term loans, proceeds from sales of strategically identified assets and, when market conditions permit, through the issuance of debt and equity securities from time to time. We may not be able to generate sufficient cash to fund our business, particularly if we are unable to renew or extend leases, lease vacant space or re-lease space as leases expire according to expectations.

We are dependent on key personnel. Our executive and other senior officers have a significant role in our success. Our ability to retain our management group or to attract suitable replacements should any members of the management group leave is dependent on the competitive nature of the employment market. The loss of services from key members of the management group or a limitation in their availability could adversely affect our financial condition and cash flow. Further, such a loss could be negatively perceived in the capital markets.

We may amend our business policies without shareholder approval. Our Board of Directors determines our growth, investment, financing, capitalization, borrowing, REIT status, operations and distributions policies. Although our Board of Directors has no present intention to amend or reverse any of these policies, they may be amended or revised without notice to shareholders. Accordingly, shareholders may not have control over changes in our policies. We cannot assure you that changes in our policies will serve fully the interests of all shareholders.

The market value of our preferred and common stock could decrease based on our performance and market perception and conditions. The market value of our preferred and common stock may be based primarily upon the market's perception of our growth potential and current and future cash dividends, and may be secondarily based upon the real estate market value of our underlying assets. The market price of our preferred and common stock is influenced by their respective distributions relative to market interest rates. Rising interest rates may lead potential buyers of our stock to expect a higher distribution rate, which could adversely affect the market price of our stock. In addition, rising interest rates could result in increased expense, thereby adversely affecting cash flow and our ability to service our indebtedness and pay distributions.

There are restrictions on the ownership and transfer of our capital stock. To maintain our qualification as a REIT under the Code, no more than 50% in value of our outstanding capital stock may be owned, actually or by attribution, by five or fewer individuals, as defined in the Code to also include certain entities, during the last half of a taxable

year. Accordingly, our charter contains provisions restricting the ownership and transfer of our capital stock. These restrictions may discourage a tender offer or other transaction, or a change in management or of control of us that might involve a premium price for our common stock or preferred stock or that our shareholders otherwise believe to be in their best interests, and may result in the transfer of shares acquired in excess of the restrictions to a trust for the benefit of a charitable beneficiary and, as a result, the forfeiture by the acquirer of the benefits of owning the additional shares.

Table of Contents

Our earnings are dependent, in part, upon the performance of our investment portfolio. As permitted by the Code, we invest in and own securities of other REITs. To the extent that the value of those investments declines or those investments do not provide an attractive return, our earnings and cash flow could be adversely affected.

We are subject to restrictions that may impede our ability to effect a change in control. Certain provisions contained in our charter and bylaws and certain provisions of Maryland law may have the effect of discouraging a third party from making an acquisition proposal for us and thereby inhibit a change in control. These provisions include the following:

Our charter provides for three classes of directors with the term of office of one class expiring each year, commonly referred to as a "staggered board." By preventing common shareholders from voting on the election of more than one class of directors at any annual meeting of shareholders, this provision may have the effect of keeping the current members of our Board of Directors in control for a longer period of time than shareholders may desire.

Our charter generally limits any holder from acquiring more than 9.8% (in value or in number, whichever is more restrictive) of our outstanding equity stock (defined as all of our classes of capital stock, except our excess stock). While this provision is intended to assist us in qualifying as a REIT for federal income tax purposes, the ownership limit may also limit the opportunity for shareholders to receive a premium for their shares of common stock that might otherwise exist if an investor was attempting to assemble a block of shares in excess of 9.8% of the outstanding shares of equity stock or otherwise effect a change in control.

The request of shareholders entitled to cast a majority of the votes entitled to be cast at such meeting is necessary for shareholders to call a special meeting. We also require advance notice from shareholders for the nomination of directors or proposals of business to be considered at a meeting of shareholders.

Our Board of Directors may authorize and cause us to issue securities without shareholder approval. Under our charter, the board has the power to classify and reclassify any of our unissued shares of capital stock into shares of capital stock with such preferences, rights, powers and restrictions as the Board of Directors may determine. The authorization and issuance of a new class of capital stock could have the effect of delaying or preventing someone from taking control of us, even if a change in control were in our shareholders' best interests.

Maryland business statutes may limit the ability of a third party to acquire control of us. The duties of directors of a Maryland corporation do not require them to, among other things (a) accept, recommend or respond to any proposal by a person seeking to acquire control of the corporation, (b) authorize the corporation to redeem any rights under, or modify or render inapplicable, any shareholders rights plan, (c) make a determination under the Maryland Business Combination Act or the Maryland Control Share Acquisition Act to exempt any person or transaction from the requirements of those provisions, or (d) act or fail to act solely because of the effect of the act or failure to act may have on an acquisition or potential acquisition of control of the corporation or the amount or type of consideration that may be offered or paid to the shareholders in an acquisition. The Maryland Business Combination Act provides that unless exempted, a Maryland corporation may not engage in certain business combinations, including mergers, dispositions of 10 percent or more of its assets, certain issuances of shares of stock and other specified transactions, with an "interested shareholder" or an affiliate of an interested shareholder for five years after the most recent date on which the interested shareholder became an interested shareholder, and thereafter unless specified criteria are met. An interested shareholder is generally a person owning or controlling, directly or indirectly, 10 percent or more of the voting power of the outstanding stock of the Maryland corporation. In our charter, we have expressly elected that the Maryland Business Combination Act not govern or apply to any transaction with our affiliated company UMH, a Maryland corporation.

We cannot assure you that we will be able to pay distributions regularly. Our ability to pay distributions in the future is dependent on our ability to operate profitably and to generate cash from our operations and the operations of our subsidiaries. We cannot guarantee that we will be able to pay distributions on a regular quarterly basis in the future.

Table of Contents

If our leases are not respected as true leases for federal income tax purposes, we would fail to qualify as a REIT. To qualify as a REIT, we must, among other things, satisfy two gross income tests, under which specified percentages of our gross income must be passive income, such as rent. For the rent paid pursuant to our leases to qualify for purposes of the gross income tests, the leases must be respected as true leases for federal income tax purposes and not be treated as service contracts, joint ventures or some other type of arrangement. We believe that our leases will be respected as true leases for federal income tax purposes. However, there can be no assurance that the Internal Revenue Service (IRS) will agree with this view. If the leases are not respected as true leases for federal income tax purposes, we would not be able to satisfy either of the two gross income tests applicable to REITs, and we could lose our REIT status.

Failure to make required distributions would subject us to additional tax. In order to qualify as a REIT, we must, among other requirements, distribute, each year, to our shareholders at least 90 percent of our taxable income, excluding net capital gains. To the extent that we satisfy the 90 percent distribution requirement, but distribute less than 100 percent of our taxable income, we will be subject to federal corporate income tax on our undistributed income. In addition, we will incur a 4 percent nondeductible excise tax on the amount, if any, by which our distributions (or deemed distributions) in any year are less than the sum of:

- 85 percent of our ordinary income for that year;
- 95 percent of our capital gain net earnings for that year; and
- 100 percent of our undistributed taxable income from prior years.

To the extent we pay out in excess of 100 percent of our taxable income for any tax year, we may be able to carry forward such excess to subsequent years to reduce our required distributions for purposes of the 4 percent excise tax in such subsequent years. We intend to pay out our income to our shareholders in a manner intended to satisfy the 90 percent distribution requirement. Differences in timing between the recognition of income and the related cash receipts or the effect of required debt amortization payments could require us to borrow money or sell assets to pay out enough of our taxable income to satisfy the 90 percent distribution requirement and to avoid corporate income tax.

We may not have sufficient cash available from operations to pay distributions, and, therefore, distributions may be made from borrowings. The actual amount and timing of distributions will be determined by our Board of Directors in its discretion and typically will depend on the amount of cash available for distribution, which will depend on items such as current and projected cash requirements, limitations on distributions imposed by law on our financing arrangements and tax considerations. As a result, we may not have sufficient cash available from operations to pay distributions as required to maintain our status as a REIT. Therefore, we may need to borrow funds to make sufficient cash distributions in order to maintain our status as a REIT, which may cause us to incur additional interest expense as a result of an increase in borrowed funds for the purpose of paying distributions.

We may be required to pay a penalty tax upon the sale of a property. The federal income tax provisions applicable to REITs provide that any gain realized by a REIT on the sale of property held as inventory or other property held primarily for sale to customers in the ordinary course of business is treated as income from a "prohibited transaction" that is subject to a 100 percent penalty tax. Under current law, unless a sale of real property qualifies for a safe harbor, the question of whether the sale of real estate or other property constitutes the sale of property held primarily for sale to customers is generally a question of the facts and circumstances regarding a particular transaction. We intend that we and our subsidiaries will hold the interests in the real estate for investment with a view to long-term appreciation, engage in the business of acquiring and owning real estate, and make occasional sales as are consistent with our investment objectives. We do not intend to engage in prohibited transactions. We cannot assure you, however, that we will only make sales that satisfy the requirements of the safe harbors or that the IRS will not successfully assert that

one or more of such sales are prohibited transactions.

We may be adversely affected if we fail to qualify as a REIT. If we fail to qualify as a REIT, we will not be allowed to deduct distributions to shareholders in computing our taxable income and will be subject to Federal income tax, including any applicable alternative minimum tax, at regular corporate rates. In addition, we might be

14

Table of Contents

barred from qualification as a REIT for the four years following disqualification. The additional tax incurred at regular corporate rates would reduce significantly the cash flow available for distribution to shareholders and for debt service. Furthermore, we would no longer be required to make any distributions to our shareholders as a condition to REIT qualification. Any distributions to shareholders would be taxable as ordinary income to the extent of our current and accumulated earnings and profits, although such dividend distributions would be subject to a top federal tax rate of 15% through 2014. Corporate distributees, however, may be eligible for the dividends received deduction on the distributions, subject to limitations under the Code.

To qualify as a REIT, we must comply with certain highly technical and complex requirements. We cannot be certain we have complied, and will always be able to comply, with the requirements to qualify as a REIT because there are few judicial and administrative interpretations of these provisions. In addition, facts and circumstances that may be beyond our control may affect our ability to continue to qualify as a REIT. We cannot assure you that new legislation, regulations, administrative interpretations or court decisions will not change the tax laws significantly with respect to our qualification as a REIT or with respect to the Federal income tax consequences of qualification. We believe that we have qualified as a REIT since our inception and intend to continue to qualify as a REIT. However, we cannot assure you that we are qualified or will remain qualified.

There is a risk of changes in the tax law applicable to real estate investment trusts. Because the IRS, the United States Treasury Department and Congress frequently review federal income tax legislation, we cannot predict whether, when or to what extent new federal tax laws, regulations, interpretations or rulings will be adopted. Any of such legislative action may prospectively or retroactively modify our tax treatment and, therefore, may adversely affect taxation of us and/or our investors.

We may be unable to comply with the strict income distribution requirement applicable to REITs. As noted above, to maintain qualification as a REIT under the Code, a REIT must annually distribute to its shareholders at least 90% of its REIT taxable income, excluding the dividends paid deduction and net capital gains. This requirement limits our ability to accumulate capital. We may not have sufficient cash or other liquid assets to meet the 90% distribution requirements. Difficulties in meeting the 90% distribution requirement might arise due to competing demands for our funds or to timing differences between tax reporting and cash receipts and disbursements, because income may have to be reported before cash is received, because expenses may have to be paid before a deduction is allowed, because deductions may be disallowed or limited or because the IRS may make a determination that adjusts reported income. In those situations, we might be required to borrow funds or sell properties on adverse terms in order to meet the 90% distribution requirement and interest and penalties could apply which could adversely affect our financial condition. If we fail to satisfy the 90% distribution requirement, we would cease to be taxed as a REIT.

If we were considered to actually or constructively pay a “preferential dividend” to certain of our shareholders, our status as a REIT could be adversely affected. In order to qualify as a REIT, we must distribute annually to our shareholders at least 90% of our REIT taxable income, which does not equal net income as calculated in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”), determined without regard to the deduction for dividends paid and excluding net capital gain. In order for distributions to be counted as satisfying the annual distribution requirements for REITs, and to provide us with a REIT-level tax deduction, the distributions must not be “preferential dividends”. A dividend is not a preferential dividend if the distribution is pro rata among all outstanding shares of stock within a particular class, and in accordance with the preferences among different classes of stock as set forth in our organizational documents. Currently, there is uncertainty as to the application of the law in certain circumstances and the IRS’s position regarding whether certain arrangements that REITs have with their shareholders could give rise to the inadvertent payment of a preferential dividend (e.g., the pricing methodology for stock purchased under a distribution reinvestment plan inadvertently causing a greater than 5% discount on the price of such stock purchased). There is no de minimis exception with respect to preferential dividends; therefore, if the IRS were to take the position that we inadvertently paid a preferential dividend, we may be deemed to have failed the 90% distribution test, and our status as a REIT could be terminated for the year in which

such determination is made if we were unable to cure such failure. While we believe that our operations have been structured in such a manner that we will not be treated as

15

Table of Contents

inadvertently paying preferential dividends, we can provide no assurance to this effect.

Notwithstanding our status as a REIT, we are subject to various federal, state and local taxes on our income and property. For example, we will be taxed at regular corporate rates on any undistributed taxable income, including undistributed net capital gains; provided, however, that properly designated undistributed capital gains will effectively avoid taxation at the shareholder level. We may be subject to other Federal income taxes and may also have to pay some state income or franchise taxes because not all states treat REITs in the same manner as they are treated for Federal income tax purposes.

Future terrorist attacks and military conflicts could have a material adverse effect on general economic conditions, consumer confidence and market liquidity. Among other things, it is possible that interest rates may be affected by these events. An increase in interest rates may increase our costs of borrowing, leading to a reduction in our earnings. Terrorist acts could also result in significant damages to, or loss of, our properties.

We and our tenants may be unable to obtain adequate insurance coverage on acceptable economic terms for losses resulting from acts of terrorism. Our lenders may require that we carry terrorism insurance even if we do not believe this insurance is necessary or cost effective. We may also be prohibited under the applicable lease from passing all or a portion of the cost of such insurance through to the tenant. Should an act of terrorism result in an uninsured loss or a loss in excess of insured limits, we could lose capital invested in a property, as well as the anticipated future revenues from a property, while remaining obligated for any mortgage indebtedness or other financial obligations related to the property. Any loss of these types could adversely affect our financial condition.

We are subject to risks arising from litigation. We may become involved in litigation. Litigation can be costly, and the results of litigation are often difficult to predict. We may not have adequate insurance coverage or contractual protection to cover costs and liability in the event we are sued, and to the extent we resort to litigation to enforce our rights, we may incur significant costs and ultimately be unsuccessful or unable to recover amounts we believe are owed to us. We may have little or no control of the timing of litigation, which presents challenges to our strategic planning.

The Company operates as a REIT. Our portfolio is primarily comprised of real estate holdings, some of which have been long-term holdings carried on our financial statements at depreciated cost. We believe that their current market values exceed both the original cost and the depreciated cost.

The lease renewals resulted in a weighted average term of 6.4 years and at a U.S. GAAP straight line and an initial cash weighted average lease rate of \$5.42 per square foot as compared to a former U.S. GAAP straight line and a former cash weighted average lease rate of \$6.02 per square foot, representing a reduction of 9.97%.

During fiscal 2014, the Company completed work on seven property expansions, which resulted in extending the tenant's lease expirations by an additional ten years from the date of completion for each property that was expanded and increasing the tenant's rents. Prior to the lease amendments being executed, these seven leases had a remaining weighted average term of 4.7 years at the time of completion of the expansion work. By obtaining an additional ten years of lease term from the date of completion of the expansion work, an additional 5.6 years of weighted average term was added to these seven leases. Commencing during fiscal 2014, these seven lease amendments have resulted in an annual increase in base rent totaling approximately \$2,323,000 at a weighted average lease rate of \$8.41 per square foot as compared to \$7.97 per square foot formerly, representing an increase in the weighted average lease rate for these properties of 5.52%.

Table of Contents

The four leases that renewed, that were set to expire in fiscal 2014, combined with the seven leases that were amended due to expansions, results in an increase in the weighted average lease rate for these properties of 4.42% and an increase in the weighted average lease term for these properties of 5.7 years.

Two leases, representing 47% of the space scheduled to expire in fiscal 2014, did not renew. One tenant that did not renew its lease was for a 60,400 square foot building at our property located in Carlstadt, NJ. This property was leased for an annualized base rent of \$7.61 per square foot to Macy's Retail Holdings Inc. through March 31, 2014. On June 26, 2014, the Company entered into a ten and a half year lease agreement for this space with SOFIVE, Inc. (SOFIVE). SOFIVE will receive free rent through January 31, 2015 and commencing on February 1, 2015, annual rent will initially be \$422,800 or \$7.00 per square foot with increases each year ranging from 3.7% to 7.1%, resulting in annualized base rent over the life of the lease of \$504,024, or \$8.34 per square foot. The Company owns this property located in Carlstadt, NJ through a 51% controlling equity interest.

The second tenant that did not renew its lease was for a 148,000 square foot building at our property located in Fayetteville, NC. This property was leased to Maidenform Inc. (Maidenform) through December 31, 2013. Maidenform occupied the space on a month-to-month basis from January 1, 2014 through March 31, 2014 and was paying holdover annual rent of \$4.50 per square foot, which was 150% of the stated rent per the expired lease. This space is currently vacant.

(HEP), which leased the Company's 106,507 square foot building located in Winston-Salem, NC through December 31, 2017 at an annualized rent of \$305,000, that they have filed for Chapter 11 bankruptcy. HEP was current on its rental payments through February 2014 and vacated the Company's building on March 15, 2014. HEP subsequently filed for Chapter 7 bankruptcy and, therefore, the Company does not expect to receive any future rental payments through the remaining lease term. The Company holds a security deposit equal to one month's base rent. This space is currently vacant.

In January 2014, the Company entered into a fifteen and a half year lease agreement, which became effective in June 2014, with a franchisee of Pla-Fit Franchise, LLC (Planet Fitness) for 22,682 square feet in the Company's 64,138 square foot shopping center located in Somerset, NJ. The Company owns a two-thirds interest in this shopping center. Initial rent commenced in December 2014 at an annualized rate of \$10.00 per square foot for the first five years, \$11.00 per square foot for years six through ten and \$12.00 per square foot for years eleven through fifteen, resulting in annualized rental revenue of \$241,454 over the fifteen and a half year lease term.

Effective May 1, 2014, the Company entered into a lease termination agreement with DHL Holdings (USA) Inc. for its 83,000 square foot facility in Roanoke, VA whereby the Company received a lump sum termination payment of \$1,182,890, representing 70% of the remaining amount due under the lease, which was set to expire on December 8, 2016. In conjunction with the lease termination agreement, the Company entered into a lease agreement, which was effective August 1, 2014, with CHEP USA, Inc. (CHEP) for 10.5 years. CHEP will receive six months of free rent, and effective on February 1, 2015, annual base rent will initially be \$398,400 or \$4.80 per square foot with 1.5% increases each year, resulting in annualized base rent over the life of the lease of \$406,092 or \$4.89 per square foot.

The Company has made improvements totaling \$649,098 to the property which resulted in an annual improvement rent charge of \$65,386 which will commence on February 1, 2015, resulting in an annualized improvement rent over the life of the lease of \$62,272 or \$0.75 per square foot. This results in a combined annualized improvement rent and base rent of \$468,364 or \$5.64 per square foot over the lease term. The CHEP lease has an early termination option in the seventh year, provided that the Company is given six months of notice and CHEP pays the Company a \$500,000 termination fee.

The Company entered into a three year lease agreement, which became effective August 1, 2014, with Charlotte Pipe and Foundry Company for a 160,000 square foot building located in Monroe, NC which was previously vacant. Rent commenced August 1, 2014 at an annual rate of \$560,000 or \$3.50 per square foot with 2% increases each year, resulting in an annualized base rent over the life of the lease of \$571,275 or \$3.57 per square foot.

* We assess and measure our overall operating results based upon an industry performance measure referred to as Funds From Operations (FFO), which management believes is a useful indicator of our operating performance. FFO is used by industry analysts and investors as a supplemental operating performance measure of a REIT. FFO, as defined by The National Association of Real Estate Investment Trusts (NAREIT), represents net income (loss) attributable to common shareholders, as defined by accounting principles generally accepted in the United States of America (U.S. GAAP), excluding extraordinary items, as defined under U.S. GAAP, gains or losses from sales of previously depreciated real estate assets, impairment charges related to depreciable real estate assets, plus certain non-cash items such as real estate asset depreciation and amortization. NAREIT created FFO as a non-U.S. GAAP supplemental measure of REIT operating performance. We define Core Funds From Operations (Core FFO) as FFO plus acquisitions costs. FFO and Core FFO should be considered as a supplemental measure of operating performance used by REITs. FFO and Core FFO excludes historical cost depreciation as an expense and may facilitate the comparison of REITs which have different cost basis. The items excluded from FFO and Core FFO are significant components in understanding the Company's financial performance.

FFO and Core FFO (i) do not represent Cash Flow from Operations as defined by U.S. GAAP; (ii) should not be considered as an alternative to Net Income as a measure of operating performance or to Cash Flows from Operating, Investing and Financing Activities; and (iii) are not an alternative to cash flow as a measure of liquidity. FFO and Core FFO, as calculated by the Company, may not be comparable to similarly titled measures reported by other REITs.

The Company's FFO and Core FFO Attributable to Common Shareholders for the fiscal years ended September 30th is calculated as follows:

	<u>2014</u>	<u>2013</u>	<u>2012</u>	<u>2011</u>	<u>2010</u>

Rental and reimbursement revenue increased \$10,065,255, or 18%, for the year ended September 30, 2014 as compared to the year ended September 30, 2013. Total expenses (excluding other income and expense) increased \$5,619,641, or 19%, for the year ended September 30, 2014 as compared to the year ended September 30, 2013. The increases were due mainly to the revenue and expenses relating to the property acquisitions made during fiscal 2014.

Net Operating Income from property operations (NOI) is defined as recurring Rental and Reimbursement Revenue, less Real Estate Taxes and Operating Expenses, such as insurance, utilities and repairs and maintenance. NOI increased \$7,976,386, or 18%, for the fiscal year ended September 30, 2014 as compared to the fiscal year ended September 30, 2013 and increased \$3,841,572, or 9%, for the fiscal year ended September 30, 2013 as compared to the fiscal year ended September 30, 2012. The increase from fiscal year 2013 to 2014 was due to the additional income related to six industrial properties purchased during fiscal 2014 and the increase from fiscal year 2012 to 2013 was due to the additional income related to five industrial properties purchased during fiscal 2013.

During the first quarter of fiscal 2015 to date, the Company purchased four industrial properties totaling approximately 559,000 square feet for approximately \$40,338,000. The properties are located in Illinois, Missouri and Texas and are net leased for terms ranging from seven to fifteen years resulting in a weighted average lease maturity of 11.1 years. In addition to the four properties purchased during the first quarter of fiscal 2015 to date, we have entered into agreements to purchase nine new build-to-suit, industrial buildings that are currently being developed in Florida, Indiana, Kansas, Kentucky, Louisiana, North Carolina, Ohio and Texas totaling approximately 3,219,000 square feet and are net leased for terms ranging from ten to fifteen years resulting in a weighted average lease maturity of 12.2 years. The purchase price for the nine properties is approximately \$265,629,000. Subject to satisfactory due diligence, the Company anticipates closing these nine transactions during fiscal 2015 and fiscal 2016.

During the fiscal years ended September 30, 2013 and 2014, the Company completed expansions at seven of its locations, consisting of six building expansions and four parking lot expansions. Two of the parking lot expansions included the purchase of additional land. The six building expansions resulted in approximately 341,000 additional square feet. Total costs for all seven property expansions were approximately \$31,237,000. Each completed expansion resulted in a new ten year lease extension for each property that was expanded. These seven property expansions resulted in total increased annual rent of approximately \$3,124,000. In addition, the Company currently has four property expansions in progress consisting of three building expansions and one parking lot expansion. These expansions are expected to cost approximately \$14,432,000 and are expected to be completed during the remainder of fiscal 2015. Upon completion of the remaining four expansions, annual rent will be increased by approximately \$1,500,000. The three remaining building expansions will provide additional rentable square feet of approximately 149,000 and provide for a new ten year lease extension from the date of completion for each building being expanded.

The Company intends to continue to increase its real estate investments in fiscal 2015 through acquisitions and expansions of properties. The growth of the real estate portfolio depends on the availability of suitable properties which meet the Company's investment criteria and appropriate financing. Competition in the market areas in which the Company operates is significant and affects acquisitions, occupancy levels, rental rates and operating expenses of certain properties. Transaction costs, such as broker fees, transfer taxes, legal, valuation, and other professional fees related to acquisitions are expensed as incurred.

Revenues also include interest and dividend income and net gain on securities transactions. The Company holds a portfolio of securities of other REITs with a fair value of \$59,311,403 as of September 30, 2014. The Company generally limits its marketable securities investments to no more than approximately 10% of its undepreciated assets. The Company invests in REIT securities on margin from time to time when the Company can achieve an adequate yield spread. As of September 30, 2014 and 2013, there were no draws against the margin. The REIT securities portfolio provides the Company with liquidity and additional income and serves as a proxy for real estate when more favorable risk adjusted returns are not available. As of September 30, 2014, the Company's portfolio consisted primarily of 53% REIT preferred stocks and 47% REIT common stocks. The Company's weighted-average yield on the securities portfolio for 2014 was approximately 7.4%. Interest and dividend income for fiscal 2014 was \$3,882,597 which is in line with interest and dividend income of \$3,885,920 for fiscal 2013. During fiscal 2014, the Company recognized \$2,166,766 in gains on sales of securities transactions. The Company

The Company had \$20,474,661 in cash and cash equivalents and \$59,311,403 in REIT securities as of September 30, 2014. The Company believes that funds generated from operations, the Dividend Reinvestment and Stock Purchase Plan (the DRIP), the unsecured line of credit, together with the ability to finance and refinance its properties, will provide sufficient funds to adequately meet its obligations over the next several years.

On May 28, 2014, the Company completed a public offering of 8,050,000 shares of the Company's Common Stock (including the underwriters' option to purchase 1,050,000 additional shares) at a price of \$8.50 per share, before underwriting discounts. The Company received net proceeds from the offering, after deducting underwriting discounts and all other transaction costs, of approximately \$65,113,000. Amounts received in connection with the DRIP, (including dividend reinvestments of \$7,624,528, \$6,781,345 and \$2,425,032 for fiscal years ended 2014, 2013 and 2012, respectively), were \$38,090,334, \$31,119,351 and \$13,094,616 for fiscal years ended 2014, 2013 and 2012, respectively. Significant Accounting Policies and Estimates

The discussion and analysis of the Company's financial condition and results of operation are based upon the Company's consolidated financial statements, which have been prepared in accordance with U.S. GAAP. The preparation of these consolidated financial statements requires management to make estimates and judgments that affect the reported amounts of assets and liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities at the date of the Company's consolidated financial statements. Actual results may differ from these estimates under different assumptions or conditions.

Significant accounting policies are defined as those that involve significant judgment and potentially could result in materially different results under different assumptions and conditions. Management believes the following significant accounting policies are affected by our more significant judgments and estimates used in the preparation of the Company's consolidated financial statements. For a detailed description of these and other accounting policies, see Note 1 in the Notes to the Company's Consolidated Financial Statements included in this Form 10-K.

Real Estate Investments

The Company applies Financial Accounting Standards Board Accounting Standards Codification (ASC) 360-10, Property, Plant & Equipment (ASC 360-10) to measure impairment in real estate investments. Rental properties are individually evaluated for impairment when conditions exist which may indicate that it is probable that the sum of expected future cash flows (on an undiscounted basis without interest) from a rental property is less than its historical net cost basis. These expected future cash flows consider factors such as future operating income, trends and prospects as well as the effects of leasing demand, competition and other factors. Upon determination that a permanent impairment has occurred, rental properties are reduced to their fair value. For properties to be disposed of, an impairment loss is recognized when the fair value of the property, less the estimated cost to sell, is less than the carrying amount of the property measured at the time there is a commitment to sell the property and/or it is actively being marketed for sale. A property to be disposed of is reported at the lower of its carrying amount or its estimated fair value, less its cost to sell. Subsequent to the date that a property is held for disposition, depreciation expense is not recorded.

Upon acquisition of a property, the Company allocates the purchase price of the property based upon the fair value of the assets acquired, which generally consist of land, buildings and intangible assets, including above and below market leases and in-place leases. The Company allocates the purchase price to the fair value of the tangible assets of an acquired property generally determined by third party appraisal of the property obtained in conjunction with the purchase. Transaction costs, such as broker fees, transfer taxes, legal, accounting, valuation, and other professional and consulting fees, related to acquisitions are expensed as incurred.

The purchase price is further allocated to acquired above and below market leases based on the present value of the difference between prevailing market rates and the in-place rates over the remaining lease term. In addition, any remaining amounts of the purchase price are applied to in-place lease values based on management's evaluation of the specific characteristics of each tenant's lease. Acquired above and below market leases are amortized to rental revenue over the remaining non-cancelable terms of the respective leases. The value of in-place lease intangibles is amortized to amortization expense over the remaining lease term. If a tenant terminates its lease early, the unamortized portion of the tenant improvements, leasing commissions, deferred rent, above and below market leases and the in-place lease value is charged to expense when there is a signed termination agreement, all of the conditions of the termination agreement are met, the tenant is no longer occupying the property and the termination consideration, if any, is probable of collection.

The Company conducted a comprehensive review of all real estate asset classes in accordance with ASC Topic 360, which indicates that asset values should be analyzed whenever events or changes in circumstances indicate that the carrying value of a property may not be fully recoverable.

The following are examples of such events or changes in circumstances that would indicate to management that there may be an impairment of a property:

- ◆ A non-renewal of a lease and subsequent move out by the tenant;
- ◆ A renewal of a lease at a significantly lower rent than a previous lease;
- ◆ A significant decrease in the market value of a property;
- ◆ A significant adverse change in the extent or manner in which a property is being used or in its physical condition;
- ◆ A significant adverse change in legal factors or in the business climate that could affect the value of a property, including an adverse action or assessment by a regulator;
- ◆ An accumulation of costs significantly in excess of the amount originally expected for the acquisition or construction of a property;
- ◆ A current-period operating or cash flow loss combined with a history of operating or cash flow losses or a projection or forecast that demonstrates continuing losses associated with the use of a property; or
- ◆ A current expectation that, more likely than not, a property will be sold or otherwise disposed of significantly before the end of its previously estimated useful life.

Table of Contents

The process entails the analysis of property for instances where the net book value exceeds the estimated fair value. In accordance with ASC Topic 360, an impairment loss shall be recognized if the carrying amount of a long-lived asset is not recoverable and exceeds its fair value. The Company utilizes the experience and knowledge of its internal valuation team to derive certain assumptions used to determine an operating property's cash flow. Such assumptions include re-leasing and renewal probabilities upon future lease expirations, vacancy factors, rental growth rates, and capital expenditures.

As part of our review of our property portfolio, we have evaluated our properties in Somerset, NJ and St. Joseph, MO which had occupancy rates of 84% and 66%, respectively, as of September 30, 2014, and noted that the sum of the discounted cash flows exceeded its historical net cost basis. We have also evaluated the three vacant properties in our portfolio and noted that the sum of the discounted cash flows expected for potential leases of these properties exceeded their historical net cost basis. Management considers on a quarterly basis whether the marketing rent (advertised) or the market rent has decreased or if any additional indicators are present which would indicate a significant decrease in net cash flows. Management typically will obtain an independent appraisal to assist in evaluating a potential impairment for a property that has been vacant for several years. We have also considered the properties which had lease renewals at rental rates lower than the previous rental rates and noted that the sum of the new discounted cash flows expected for the renewed leases exceeded these properties' historical net cost basis.

The Company reviewed its operating properties in light of the requirements of ASC Topic 360-10 and determined that, as of September 30, 2014, the undiscounted cash flows over the holding period for these properties were in excess of their carrying values and, therefore, no impairment charges were required.

Securities Available for Sale

Investments in non-real estate assets consist primarily of marketable securities, which the Company generally limits to no more than approximately 10% of its undepreciated assets. Management individually reviews and evaluates our marketable securities for impairment on a quarterly basis, or when events or circumstances occur. Management considers, among other things, credit aspects of the issuer, amount of decline in fair value over cost and length of time in a continuous loss position. If a decline in fair value is determined to be other than temporary, a non-cash impairment charge is recognized in earnings and the cost basis of the individual security is written down to fair value as the new cost basis.

The Company classifies its securities among three categories: Held-to-maturity, trading, and available-for-sale. The Company's securities at September 30, 2014 and 2013 are all classified as available-for-sale and are carried at fair value based on quoted market prices. Gains or losses on the sale of securities are calculated based on the average cost method and are accounted for on a trade date basis. Unrealized holding gains and losses are excluded from earnings and reported as a separate component of Shareholders' Equity until realized. The change in net unrealized holding gains are reflected as comprehensive income.

Revenue Recognition and Estimates

Rental revenue from tenants with leases having scheduled rental increases or periods of free rent are recognized on a straight-line basis over the term of the lease. Leases typically provide for reimbursement of real estate taxes, insurance, and other operating costs. These occupancy charges are recognized as earned. Estimates are used to establish amounts receivable and revenue from tenants for such things as annualized rents, real estate taxes and other cost recoveries. In addition, an estimate is made with respect to whether a provision for allowance for doubtful accounts receivable and loans receivable is necessary. The allowance for doubtful accounts reflects management's estimate of the amounts of the recorded accounts receivable and loans receivable at the balance sheet date that will not be realized from cash receipts in subsequent periods. If cash receipts in subsequent periods vary from our estimates, or if the Company's tenants' financial condition deteriorates as a result of operating difficulties, additional changes to the allowance may be required.

Lease Termination Income

Lease Termination Income is recognized in operating revenues when there is a signed termination agreement, all of the conditions of the agreement have been met, the tenant is no longer occupying the property and the termination consideration is probable of collection. Lease termination amounts are paid by tenants who want to terminate their lease obligations before the end of the contractual term of the lease by agreement with the Company.

Lease Termination Income for the fiscal year ended September 30, 2014 consisted of \$1,182,890 from the Company's former tenant at its 83,000 square foot building located in Roanoke, VA. Lease Termination Income for the fiscal year ended September 30, 2013 consisted of \$113,784 from the Company's former tenant at its 388,671 square foot building located in St. Joseph, MO and \$576,946 from the Company's former tenant at its 160,000 square foot building located in Monroe, NC. The Company is currently leasing its 160,000 square foot building in Monroe, NC to a single tenant through July 31, 2017 and as further described below, the Company is currently leasing its 83,000 square foot building in Roanoke, VA to a single tenant through January 31, 2025.

In conjunction with the lease termination agreement, the Company entered into a lease agreement, which was effective August 1, 2014, with CHEP USA, Inc. (CHEP) for 10.5 years. CHEP will receive six months of free rent, and effective on February 1, 2015, annual base rent will initially be \$398,400 or \$4.80 per square foot with 1.5% increases each year, resulting in annualized base rent over the life of the lease of \$406,092 or \$4.89 per square foot. The Company has made improvements totaling \$649,098 to the property which resulted in an annual improvement rent charge of \$65,386 which will commence on February 1, 2015, resulting in an annualized improvement rent over the life of the lease of \$62,272 or \$0.75 per square foot. This results in a combined annualized improvement rent and base rent of \$468,364 or \$5.64 per square foot over the lease term. The CHEP lease has an early termination option in the seventh year, provided that the Company is given six months of notice and CHEP pays the Company a \$500,000 termination fee.

The Company's lease with its tenant, Graybar Electric Company (Graybar), at its 26,340 square foot building located in Ridgeland (Jackson), MS has an early termination option which may be exercised at any time provided the Company is given six months of notice. (1) Amount calculated based on the total cost divided by the square feet, divided by the renewal term

Of the total 437,727 square feet of gross leasable area that was set to expire during fiscal 2014, 230,327 square feet, or 53%, was renewed. The lease renewals resulted in a weighted average term of 6.4 years and at a U.S. GAAP straight line and an initial cash weighted average lease rate of \$5.42 per square foot as compared to a former U.S. GAAP straight line and a former cash weighted average lease rate of \$6.02 per square foot, representing a reduction of 9.97%.

During fiscal 2014, the Company completed work on seven property expansions, which resulted in extending the tenant's lease expirations by an additional ten years from the date of completion for each property that was expanded and increasing the tenant's rents. Prior to the lease amendments being executed, these seven leases had a remaining weighted average term of 4.7 years at the time of completion of the expansion work. By obtaining an additional ten years of lease term from the date of completion of the expansion work, an additional 5.6 years of weighted average term was added to these seven leases. Commencing during fiscal 2014, these seven lease amendments have resulted in an annual increase in base rent totaling approximately \$2,323,000 at a weighted average lease rate of \$8.41 per square foot as compared to \$7.97 per square foot formerly, representing an increase in the weighted average lease rate for these properties of 5.52%.

The four leases that renewed, that were set to expire in fiscal 2014, combined with the seven leases that were amended due to expansions, results in an increase in the weighted average lease rate for these properties of 4.42% and an increase in the weighted average lease term for these properties of 5.7 years.

Two leases, representing 47% of the space scheduled to expire in fiscal 2014, did not renew. One tenant that did not renew its lease was for a 60,400 square foot building at our property located in Carlstadt, NJ. This property was leased for an annualized base rent of \$7.61 per square foot to Macy's Retail Holdings Inc. through March 31, 2014. On June 26, 2014, the Company entered into a ten and a half year lease agreement for this space

The Company owns this property located in Carlstadt, NJ through a 51% controlling equity interest.

The second tenant that did not renew its lease was for a 148,000 square foot building at our property located in Fayetteville, NC. This property was leased to Maidenform Inc. (HEP), which leased the Company's 106,507 square foot building located in Winston-Salem, NC through December 31, 2017 at an annualized rent of \$305,000, that they have filed for Chapter 11 bankruptcy. HEP was current on its rental payments through February 2014 and vacated the Company's building on March 15, 2014. HEP subsequently filed for Chapter 7 bankruptcy and, therefore, the Company does not expect to receive any future rental payments through the remaining lease term. The Company holds a security deposit equal to one month's base rent. This space is currently vacant.

In January 2014, the Company entered into a fifteen and a half year lease agreement, which became effective in June 2014, with a franchisee of Pla-Fit Franchise, LLC (Planet Fitness) for 22,682 square feet in the Company's 64,138 square foot shopping center located in Somerset, NJ. Initial rent commenced in December 2014 at an annualized rate of \$10.00 per square foot for the first five years, \$11.00 per square foot for years six through ten and \$12.00 per square foot for years eleven through fifteen, resulting in annualized rental revenue of \$241,454 over the fifteen and a half year lease term.

Effective May 1, 2014, the Company entered into a lease termination agreement with DHL Holdings (USA) Inc. for its 83,000 square foot facility in Roanoke, VA whereby the Company received a lump sum termination payment of \$1,182,890, representing 70% of the remaining amount due under the lease, which was set to expire on December 8, 2016. In conjunction with the lease termination agreement, the Company entered into a lease agreement, which was effective August 1, 2014, with CHEP USA, Inc. (CHEP) for 10.5 years. CHEP will receive six months of free rent, and effective on February 1, 2015, annual base rent will initially be \$398,400 or \$4.80 per square foot with 1.5% increases each year, resulting in annualized base rent over the life of the lease of \$406,092 or \$4.89 per square foot. The Company has made improvements totaling \$649,098 to the property which resulted in an annual improvement rent charge of \$65,386 which will commence on February 1, 2015, resulting in an annualized improvement rent over the life of the lease of \$62,272 or \$0.75 per square foot. This results in a combined annualized improvement rent and base rent of \$468,364 or \$5.64 per square foot over the lease term. The CHEP lease has an early termination option in the seventh year, provided that the Company is given six months of notice and CHEP pays the Company a \$500,000 termination fee.

The Company entered into a three year lease agreement, which became effective August 1, 2014, with Charlotte Pipe and Foundry Company for a 160,000 square foot building located in Monroe, NC which was previously vacant. Rent commenced August 1, 2014 at an annual rate of \$560,000 or \$3.50 per square foot with 2% increases each year, resulting in an annualized base rent over the life of the lease of \$571,275 or \$3.57 per square foot.

Approximately 7% of the Company's gross leasable area, consisting of six leases totaling 778,702 square feet, were set to expire during fiscal 2015. The Company has renewed three of these six leases, consisting of 309,100 square feet or 40% of the gross leasable area set to expire during fiscal 2015. The following table summarizes the components of discontinued operations for the fiscal years ended September 30th:

The Company has accrued these benefits on a present value basis over the terms of the employment agreements.

Liquidity and Capital Resources

The Company operates as a real estate investment trust deriving its income primarily from real estate rental operations. The Company's shareholders' equity increased from \$335,914,971 as of September 30, 2013 to \$420,631,082 as of September 30, 2014, principally due to the issuance of 8,050,000 shares of common stock in a common stock offering with net proceeds of \$65,112,686, the issuance of 4,296,075 shares of common stock in the amount of \$38,090,334 through the DRIP, and net income attributable to common shareholders of \$11,238,262. The increases were partially offset by payments of cash distributions paid to common shareholders of \$29,531,430. See further discussion below.

The Company's ability to generate cash adequate to meet its needs is dependent primarily on income from its real estate investments and its securities portfolio, the sale of real estate investments and securities, refinancing of mortgage debt, leveraging of real estate investments, availability of bank borrowings, proceeds from the DRIP, proceeds from public offerings and private placements, and access to the capital markets. Purchases of new properties, payments of expenses related to real estate operations, capital improvement programs, debt service, general and administrative expenses, and distribution requirements place demands on the Company's liquidity.

The Company intends to operate its properties from the cash flows generated by the properties. However, the Company's expenses are affected by various factors, including inflation. Increases in operating expenses raise the breakeven point for a property and, to the extent that they cannot be passed on through higher rent and rent reimbursements, reduce the amount of available cash flow which can adversely affect the market value of the property.

Industrial space demand is very closely correlated to Gross Domestic Product (GDP) growth. Despite five years of unprecedented monetary stimulus, real annual GDP growth has averaged under 2% over this period. However, national occupancy rates for the industrial property type have been steadily increasing. One major catalyst driving increased demand for the industrial property type has been the ongoing shift from traditional brick and mortar retail shopping, to shopping on-line or "e-Commerce". This favorable trend for the industrial real estate sector has been increasing for several years now and is expected to continue for the foreseeable future. Additionally, new construction has been limited and low energy costs have resulted in increased domestic manufacturing. The financial position of our tenants, together with the long duration of our leases, should enable the Company to perform well despite the slow growth economic environment. As of September 30, 2014, the Company had \$20,474,661 in cash and cash equivalents and \$59,311,403 in marketable securities subject to term loans of \$5,200,000. In addition, as of September 30, 2014, the Company also had \$40,000,000 available on its \$60,000,000 unsecured line of credit. The unsecured line of credit has an accordion feature which may increase the unsecured line of credit by an additional \$20,000,000

bringing the total potential availability under the unsecured line of credit up to \$80,000,000.

On May 28, 2014, the Company completed a public offering of 8,050,000 shares of the Company's Common Stock (including the underwriters' option to purchase 1,050,000 additional shares) at a price of \$8.50 per share, before underwriting discounts. The Company received net proceeds from the offering, after deducting underwriting discounts and all other transaction costs, of approximately \$65,113,000. The Company has used and will continue to use such net proceeds to purchase additional properties in the ordinary course of business and for general corporate purposes, including repayment of indebtedness.

On June 7, 2012 and June 21, 2012, the Company issued 2,000,000 and 300,000 shares, respectively, of Series B Preferred Stock at an offering price of \$25.00 per share in an underwritten public offering. The Company received net proceeds of approximately \$55,033,000 from the Series B Preferred Stock offering and used such net

proceeds to purchase additional properties in the ordinary course of business and for general corporate purposes.

On December 5, 2011, the Company issued 2,000,000 shares of common stock in a registered direct placement at a price of \$8.39 per share. The Company received net proceeds from the common stock offering of approximately \$16,190,000. The Company used such net proceeds to purchase additional properties in the ordinary course of business and for general corporate purposes, including repayment of indebtedness.

The Company has been raising equity capital through its DRIP, registered direct placements and the public sale of common and preferred stock and investing in net leased industrial properties. The Company believes that funds generated from operations, the DRIP, and bank borrowings, together with the ability to finance and refinance its properties, will provide sufficient funds to adequately meet its obligations over the next few years.

As of September 30, 2014, the Company owned eighty-two properties of which fifty-seven are subject to mortgages. On June 25, 2013, the Company entered into an agreement that renewed and expanded its unsecured line of credit from \$20,000,000 to \$40,000,000, with an accordion feature up to \$60,000,000, subject to various conditions, as defined in the agreement. The renewed unsecured line of credit is syndicated with two banks led by Capital One, National Association, as joint lead arranger, administrative agent and sole book runner, and includes Bank of Montreal, as joint lead arranger and documentation agent. The renewed unsecured line of credit matures June 30, 2016, has a one-year extension option, and borrowings under the unsecured line of credit bear interest at LIBOR plus 175 basis points to 250 basis points, depending on the company's leverage ratio. Based on the Company's current leverage ratio, borrowings under the unsecured line of credit bears interest at LIBOR plus 185 basis points, which was 2.00% as of September 30, 2014. The previous \$20,000,000 unsecured line of credit did not have an extension option and borrowings bore interest at LIBOR plus 200 basis points to 250 basis points, depending on the amount drawn down on the unsecured line of credit. On April 25, 2014, the Company exercised its \$20,000,000 accordion feature on its unsecured line of credit bringing the total amount available under the unsecured line of credit up to \$60,000,000. In addition, the Company obtained an additional \$20,000,000 accordion feature bringing the total potential availability under the unsecured line of credit (subject to various conditions as defined in the agreement) up to \$80,000,000. As of September 30, 2014, the unsecured line of credit has \$20,000,000 outstanding. In addition, as of September 30, 2014, the Company had loans payable of \$5,200,000 which consisted of a \$2,700,000 loan secured by 500,000 shares of UMH common stock with The Bank of Princeton and a \$2,500,000 loan secured by 200,000 shares UMH 8.25% Series A preferred stock with Two River Community Bank.

The Company also uses margin loans for purchasing securities, for temporarily funding of acquisitions, and for working capital purposes. The interest rate charged on the margin loans is the bank's margin rate and was 2.00% as of September 30, 2014 and 2013. The margin loans are due on demand and are collateralized by the Company's securities portfolio. The Company must maintain a coverage ratio of approximately 50%. At September 30, 2014 and 2013, there were no amounts outstanding under the margin loans.

The Company's focus is on real estate investments. The Company has historically financed purchases of real estate primarily through mortgages.

During fiscal 2014, the Company purchased six industrial properties totaling approximately 1,450,000 square feet with net leased terms ranging from ten to twenty years resulting in a weighted average lease maturity of 13.9 years. These six acquisitions totaled approximately \$97,605,000, which were funded through the origination of five mortgages totaling \$57,905,000 and an increase of a pre-existing mortgage of approximately \$5,000,000 at fixed rates ranging between 3.45% to 4.58%, with the remainder from available cash on hand and funds available on its unsecured line of credit. During the first quarter of fiscal 2015 to date, the Company made four acquisitions of industrial properties totaling approximately \$40,338,000 which were funded through the origination of three mortgages of approximately \$24,887,000 at fixed interest rates ranging between 4.40% to 5.18% and from available cash on hand. In addition to the four properties purchased during the first quarter of fiscal 2015 to date, the Company has entered into agreements to purchase nine new build-to-suit, industrial buildings that are currently being developed totaling approximately 3,219,000 square feet and are net leased for terms ranging from ten to fifteen years resulting in a weighted average lease maturity of 12.2 years. The purchase price for the nine properties is approximately \$265,629,000. Subject to satisfactory due diligence, we anticipate closing these nine transactions

during fiscal 2015 and fiscal 2016. In connection with four of the commitments to purchase industrial properties totaling \$110,425,385, the Company has entered into commitments to obtain four loans totaling \$73,300,000 at fixed rates ranging from 3.77% to 4.84%. The Company plans to continue to acquire additional net leased industrial properties. The Company also intends to expand its properties when requested by the tenants. The funds for these acquisitions and expansions may come from cash on hand, bank borrowings, draws on the unsecured line of credit, proceeds from the DRIP, private placements and additional public offerings of preferred and common stock. To the extent that funds or appropriate properties are not available, fewer acquisitions or expansions will be made.

The Company also invests in marketable debt and equity securities of other REITs as a proxy for real estate when more favorable risk adjusted returns are not available, for liquidity, and for additional income. The Company generally limits its marketable securities investments to no more than approximately 10% of its undepreciated assets. The Company from time to time may purchase these securities on margin when there is an adequate yield spread. During fiscal 2014, the Company's securities portfolio increased \$13,859,663, primarily due to the sale of securities with a cost of \$12,112,624 and a decrease in the net unrealized gain of \$1,867,912 offset by purchases of \$27,840,200. The Company recognized gains on sales of securities of \$2,166,766 in addition to earning interest and dividend income of \$3,882,597 during fiscal 2014. The increase in cash flows provided from operating activities from fiscal 2013 to fiscal 2014 and from fiscal 2012 to fiscal 2013 is due to the increased income from acquisitions of properties and expanded operations.

Cash flows used by investing activities were \$131,794,368, \$60,351,043 and \$80,640,038 for fiscal years 2014, 2013 and 2012, respectively. Cash flows used in investing activities in fiscal 2013 decreased as compared to fiscal 2012 due mainly to a decrease in purchase of securities in fiscal 2013 as compared to fiscal 2012.

Cash flows provided by financing activities were \$105,089,520, \$20,589,387 and \$72,105,267 for fiscal years 2014, 2013 and 2012, respectively. Cash flows from financing activities increased in fiscal 2014 as compared to 2013 due mainly to the 8,050,000 shares of common stock issued for an underwritten public offering with net proceeds of approximately \$65,113,000 in 2014. In addition, Cash flows from financing activities increased in fiscal 2014 as compared to 2013 due to a \$13,905,000 increase in proceeds from Mortgages, a decrease of \$11,648,153 in principal payments on mortgages and a \$6,127,800 increase in net proceeds received from the issuance of Common Stock in the DRIP. New Accounting Pronouncements

In April 2014, the Financial Accounting Standards Board ("FASB") issued ASU No. 2014-08, "Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity". ASU No. 2014-08 changes the definition of a discontinued operation to include only those disposals of components of an entity that represent a strategic shift that has (or will have) a major effect on an entity's operations and financial results. ASU No. 2014-08 is effective prospectively for fiscal years beginning after December 15, 2014, with earlier adoption permitted. The Company has decided to early adopt this standard effective with the interim period beginning January 1, 2014 and will continue to apply the guidance to future applicable disposals or discontinued operations, if any. Prior to January 1, 2014, properties identified as held for sale and/or disposed of were presented in discontinued operations for all periods presented.

In May 2014, the FASB issued ASU No. 2014-09, "Revenue from Contracts with Customers" as a new Topic, Accounting Standards Codification ("ASC") Topic 606. The objective of ASU 2014-09 is to establish a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and will supersede most of the existing revenue recognition guidance, including industry-specific guidance. The core principle is that a company should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or

services. In applying the new standard, companies will perform a five-step analysis of transactions to determine when and how revenue is recognized. ASU 2014-09 applies to all contracts with customers except those that are within the scope of other topics in the FASB ASC. This ASU is effective for annual reporting periods (including interim periods within those periods) beginning after December 15, 2016 and shall be applied using either a full retrospective or modified retrospective approach. Early adoption is not permitted. The Company is currently evaluating the impact this standard may have on the consolidated financial statements and the method of adoption.

Management does not believe that any other recently issued, but not yet effective accounting pronouncements, if adopted, would have a material effect on the accompanying Consolidated Financial Statements.

Table of ContentsITEM 7A – QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company is exposed to interest rate changes primarily as a result of its unsecured line of credit, margin loans and long-term debt used to maintain liquidity and fund capital expenditures and acquisitions of the Company's real estate investment portfolio. The Company's interest rate risk management objectives are to limit the impact of interest rate changes on earnings and cash flows and to lower its overall borrowing costs. To achieve its objectives, the Company matches its assets, which are properties secured by long-term leases, with its liabilities, which are long term fixed rate loans.

Approximately \$292,996,000 of the Company's long-term debt as of September 30, 2014 bears interest at fixed rates and therefore the fair value of these instruments is affected by changes in market interest rates. The interest rates on the Company's variable borrowings under its unsecured line of credit bear interest at LIBOR plus 175 basis points to 250 basis points, depending on the company's leverage ratio. Based on the Company's current leverage ratio, borrowings under the unsecured line of credit bears interest at LIBOR plus 185 basis points, which was 2.00% as of September 30, 2014. Based on the \$20,000,000 currently drawn down on the Company's unsecured line of credit, if market rates of interest on the Company's variable rate debt increased or decreased by 1%, then the annual increase or decrease in interest costs on the Company's variable rate debt would be approximately \$200,000 and the increase or decrease in the fair value of the Company's fixed rate debt as of September 30, 2014 would be approximately \$8,600,000.

The following table sets forth information as of September 30, 2014, concerning the Company's long-term debt obligations, including principal payments by scheduled maturity, weighted average interest rates and estimated fair value:

Fiscal Year ending September 30,	Mortgage Notes Payable			Loans Payable		
	Carrying Value	Weighted Average Interest Rate	Fair Value	Carrying Value	Weighted Average Interest Rate	Fair Value
2015	\$2,250,952	5.71%		\$ -		
2016	11,352,637	5.95%		20,000,000	2.00%	
2017	45,500,414	6.48%		5,200,000	4.69%	
2018	19,395,050	6.03%		-		
2019	23,571,119	6.61%		-		
Thereafter	185,725,833	4.63%		-		
Total	\$287,796,006	5.24%	\$296,231,000	\$25,200,000	2.56%	\$25,249,000

On June 25, 2013, the Company entered into an agreement that renewed and expanded its unsecured line of credit from \$20,000,000 to \$40,000,000, with an accordion feature up to \$60,000,000, subject to various conditions, as defined in the agreement. The renewed unsecured line of credit is syndicated with two banks led by Capital One, National Association, as joint lead arranger, administrative agent and sole book runner, and includes Bank of Montreal, as joint lead arranger and documentation agent. The renewed unsecured line of credit matures June 30, 2016, has a one-year extension option, and borrowings under the unsecured line of credit bear interest at LIBOR plus

175 basis points to 250 basis points, depending on the company's leverage ratio. Based on the Company's current leverage ratio, borrowings under the unsecured line of credit bears interest at LIBOR plus 185 basis points, which was 2.00% as of September 30, 2014. The previous \$20,000,000 unsecured line of credit did not have an extension option and borrowings bore interest at LIBOR plus 200 basis points to 250 basis points, depending on the amount drawn down on the unsecured line of credit. On April 25, 2014, the Company exercised its \$20,000,000 accordion feature on its unsecured line of credit bringing the total amount available under the unsecured line of credit up to \$60,000,000. In addition, the Company obtained an additional \$20,000,000 accordion feature bringing the total potential availability under the unsecured line of credit (subject to various conditions as defined in the agreement) up to \$80,000,000. As of September 30, 2014, there was a \$20,000,000 outstanding balance under the unsecured line of credit.

Monmouth Real Estate Investment Corporation

We have audited Monmouth Real Estate Investment Corporation's internal control over financial reporting as of September 30, 2014, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO") (2013 framework). Monmouth Real Estate Investment Corporation's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based upon the assessed risk and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Table of Contents

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, (3) receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (4) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the consolidated financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Monmouth Real Estate Investment Corporation maintained in all material respects, effective internal control over financial reporting as of September 30, 2014 based on criteria established in Internal Control-Integrated Framework issued by COSO (2013 framework).

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Monmouth Real Estate Investment Corporation as of September 30, 2014 and 2013, and the related consolidated statements of income, comprehensive income, shareholders' equity and cash flows for each of the three years in the period ended September 30, 2014 and our report dated December 9, 2014 expressed an unqualified opinion thereon.

ITEM 11 - EXECUTIVE COMPENSATION

Compensation Discussion and Analysis

Overview of Compensation Program

The Compensation Committee (for purposes of this analysis, the Committee) of the Board has been appointed to discharge the Board's responsibilities relating to the compensation of the Company's executive officers. The Committee has the overall responsibility for approving and evaluating the executive officer compensation plan, policies and programs of the Company. The Committee's primary objectives include serving as an independent and objective party to review such compensation plan, policies and programs. The Compensation Committee has not retained or obtained the advice of a compensation committee consultant for determining or recommending the amount of executive or director compensation.

Throughout this report, the individuals who served as the Company's Chairman of the Board and the President and Chief Executive Officer and other Officers during fiscal 2014 included in the Summary Compensation Table presented below in Item 11 of this report, are sometimes referred to in this report as the named executive officers.

Table of Contents

Compensation Philosophy and Objectives

The Committee believes that a well-designed compensation program should align the goals of the President and Chief Executive Officer with the goals of the shareholders, and that a significant part of the executives' compensation, over the long term, should be dependent upon the value created for shareholders. In addition, all executives should be held accountable through their compensation for the performance of the Company, and compensation levels should also reflect the executives' individual performance in an effort to encourage increased individual contributions to the Company's performance. The compensation philosophy, as reflected in the Company's employment agreements with its executives, is designed to motivate executives to focus on operating results and create long-term shareholder value by:

- establishing a plan that attracts, retains and motivates executives through compensation that is competitive with a peer group of other publicly-traded real estate investment trusts, or REITs;
- linking a portion of executives' compensation to the achievement of the Company's business plan by using measurements of the Company's operating results and shareholder return; and
- building a pay-for-performance system that encourages and rewards successful initiatives within a team environment.

The Committee believes that each of the above factors is important when determining compensation levels for named executive officers. The Committee reviews and approves the employment contracts for the Chairman of the Board and the President and Chief Executive Officer, and other named executive officers, including performance goals and objectives. The Committee annually evaluates performance of the executive officers in light of those goals and objectives. The Committee considers the Company's performance, relative shareholder return, the total compensation provided to comparable officers at similarly-situated companies, and compensation given to the named executive officers in prior years. The Company uses the annual Compensation Survey published by NAREIT as a guide to setting compensation levels. Participant company data is not presented in a manner that specifically identifies any named individual or company. This survey details compensation by position type and company size with statistical salary and bonus information for each position. The Compensation Committee compares the Company's salary and bonus amounts to the ranges presented for reasonableness. The Committee believes executive compensation packages provided by the Company to its executive officers should include both base salaries and annual bonus awards that reward corporate and individual performance, as well as give incentives to executives to meet or exceed established goals.

Role of Executive Officers in Compensation Decisions

The Committee makes all final compensation decisions for the Company's named executive officers. The Chairman of the Board and the President and Chief Executive Officer review the performance of the other named executive officers and then present their conclusions and recommendations to the Committee with respect to base salary adjustments and annual cash bonus and stock option awards. The Committee exercises its own discretion in modifying any

recommended adjustments or awards, but does consider the recommendations from management who work closely with the other named executive officers.

Role of Grants of Stock Options and Restricted Stock in Compensation Analysis

The Committee views the grant of stock options and restricted stock awards as a form of long-term compensation. The Committee believes that such grants promote the Company's goal of retaining key employees, and align the key employees' interests with those of the Company's shareholders from a long-term perspective. The number of options or shares of restricted stock granted to each employee is determined by consideration of various factors including but not limited to the employees' contribution, title, responsibilities, and years of service.

Role of Employment Agreements in Determining Executive Compensation

Each of the Company's currently employed named executive officers is a party to an employment agreement. These agreements provide for base salaries, bonuses and customary fringe benefits. The key elements of

Table of Contents

the Company's compensation program for the named executive officers are base salary, bonuses, stock options and perquisites and other benefits. Each of these is addressed separately below. In determining initial compensation, the Committee considers all elements of a named executive officer's total compensation package in comparison to current market practices and other benefits.

Shareholder Advisory Vote

One way to determine if the Company's compensation program reflects the interests of shareholders is through their non-binding vote. At the Annual Meeting of Shareholders held on May 13, 2014, the Company's shareholders approved by their advisory vote the compensation of the named executive officers.

Base Salaries

Base salaries are paid for ongoing performance throughout the year. In order to compete for and retain talented executives who are critical to the Company's long-term success, the Committee has determined that the base salaries of named executive officers should approximate those of executives of other equity REITs that compete with the Company for employees, investors and business, while also taking into account the named executive officers' performance and tenure, and the Company's performance relative to its peer companies within the REIT industry using the NAREIT Compensation Survey described above.

Bonuses

In addition to the provisions for base salaries under the terms of their employment agreements, the Chairman of the Board, and the President and Chief Executive Officer, are entitled to receive annual cash bonuses for each year during the terms of each respective agreement. These bonuses are based on the achievement of certain performance goals set by the Committee as described below.

For the Chairman of the Board:

Growth in market cap	7.5%	12.5%	20%
Bonus	\$20,000	\$45,000	\$90,000

Growth in dividend/share	5%	10%	15%

Total Bonus Potential	\$70,000	\$145,000	\$270,000

(1) Provided that FFO is in excess of the dividend

In addition to its determination of the executives' individual performance levels for 2014, the Committee also compared the executives' total compensation for 2014 to that of similarly-situated personnel in the REIT industry using the NAREIT Compensation Survey described above.

Bonuses awarded to the other named executive officers are recommended by the Chairman of the Board and the President and Chief Executive Officer and are approved by the Committee. The Committee believes that short-term rewards in the form of cash bonuses to senior executives generally should reflect short-term results and should take into consideration both the profitability and performance of the Company and the performance of the individual, which may include comparing such individual's performance to the preceding year, reviewing the breadth and nature of the senior executives' responsibilities and valuing special contributions by each such individual. In evaluating the performance of the Company annually, the Committee considers a variety of factors, including, among others, Funds From Operations (FFO), Adjusted Funds From Operations (AFFO), net income, growth in asset size, amount of space under lease and total return to shareholders. The Company considers FFO to be an important measure of an equity REIT's operating performance and has adopted the definition suggested by the National Association of Real Estate Investment Trusts (NAREIT), which defines FFO to mean net income computed in accordance with U.S. GAAP, excluding gains or losses from sales of property, plus real estate related depreciation and amortization. The Company defines AFFO as FFO plus acquisition costs less recurring capital expenditures and excluding the following: lease termination income, gains or losses on securities transactions, stock compensation expense, amortization of financing and leasing costs, and straight line rent adjustments. The Company considers FFO and AFFO to be meaningful additional measures of operating performance, primarily because they exclude the assumption that the value of its real estate assets diminishes predictably over time and because industry analysts have accepted these as performance measures.

Other factors considered include the employee's title and years of service. The employee's title generally reflects the employee's responsibilities and the employee's years of service may be considered in determining the level of bonus in

comparison to base salary. The Committee has declined to use specific performance formulas with respect to the other named executive officers, believing that with respect to Company performance, such formulas do not adequately account for many factors, including, among others, the relative performance of the Company compared to its competitors during variations in the economic cycle, and that with respect to individual performance, such formulas are not a substitute for the subjective evaluation by the Committee of a wide range of management and leadership skills of each of the senior executives.

Stock Options and Restricted Stock

The employment agreement for the Chairman of the Board states that he will receive stock options to purchase 65,000 shares annually. For the other senior executives, the Chairman of the Board and the President and Chief Executive Officer make a recommendation to the Committee of specific stock option or restricted stock grants. In making its decisions, the Committee does not use an established formula or focus on a specific performance

Table of Contents

target. The Committee recognizes that often outside forces beyond the control of management, such as economic conditions, changing leasing and real estate markets and other factors, may contribute to less favorable near term results even when sound strategic decisions have been made by the senior executives to position the Company for longer term profitability. Thus, the Committee also attempts to identify whether the senior executives are exercising the kind of judgment and making the types of decisions that will lead to future growth and enhanced asset value, even if the same are difficult to measure on a current basis. For example, in determining appropriate stock option and restricted stock awards, the Committee considers, among other matters, whether the senior executives have executed strategies that will provide adequate funding or appropriate borrowing capacity for future growth, whether acquisition and leasing strategies have been developed to ensure a future stream of reliable and increasing revenues for the Company, whether the selection of properties, tenants and tenant mix evidence appropriate risk management, including risks associated with real estate markets and tenant credit, and whether the administration of staff size and compensation appropriately balances the current and projected operating requirements of the Company with the need to effectively control overhead costs.

In fiscal 2014, the Committee received the recommendations from the Chairman of the Board and the President and Chief Executive Officer for the amount of restricted stock and cash bonuses to be awarded. The factors that were considered in awarding the restricted stock and cash bonuses included the following progress that was made by the Company due to the efforts of management:

- Achieved over \$1 billion in total market capitalization resulting in year over year growth of 27% in fiscal 2014
 - Achieved over 11 million total rentable square feet resulting in year over year growth of 17% in fiscal 2014
 - Generated 13% year over year AFFO per share growth in fiscal 2014
 - Raised approximately \$65.1 million (net of underwriting discounts and all other transaction costs) through a public offering of 8,050,000 shares of the Company's Common Stock
 - Located and acquired six industrial properties as per its investment strategy without placing undue burden on liquidity
 - Entered into commitments to acquire thirteen industrial properties in fiscal 2015 and fiscal 2016 of which four were acquired during the first quarter of fiscal 2015 to date
 - Completed seven property expansions totaling \$31.2 million during the fiscal years ended September 30, 2013 and 2014 and are in the process of completing four additional property expansions totaling \$14.4 million which are expected to be completed during the remainder of fiscal 2015
 - Raised approximately \$38.1 million through the DRIP during fiscal 2014
 - Renewed four out of six leases that expired in fiscal 2014 on favorable terms and re-leased one of the remaining two leases that expired in fiscal 2014 to a new tenant on favorable terms
 - Continued its conservative approach to management of the properties and maintained its cash distributions to shareholders
 - Managed general and administrative costs to an appropriate level
- The individual awards were allocated based on the named executive officers' individual contributions to these accomplishments. Other factors included the named executive officers' responsibilities and years of service.

Table of Contents

In addition, the awards were compared to each named executive officers' total compensation and compared with comparable Real Estate Investment Trusts (REITS) using the annual Compensation Survey published by NAREIT as a guide for setting total compensation.

Perquisites and Other Personal Benefits

The Company's employment agreements provide the named executive officers with perquisites and other personal benefits that the Company and the Committee believe are reasonable and consistent with its overall compensation program to better enable the Company to attract and retain superior employees for key positions. The Committee periodically reviews the levels of perquisites and other personal benefits provided to the named executive officers.

The named executive officers are provided the following benefits under the terms of their employment agreements: an allotted number of paid vacation weeks; eligibility for the executive, spouse and dependents in all Company sponsored employee benefits plans, including 401(k) plan, group health, accident, and life insurance, on terms no less favorable than applicable to any other executive; and supplemental disability insurance, at the Company's cost, as agreed to by the Company and the named executive officer. Attributed costs of the personal benefits described above for the named executive officers for the fiscal year ended September 30, 2014, are included in "All Other Compensation" of the Summary Compensation Table provided below under Item 11 of this report.

Payments upon Termination or Change in Control

In addition, the named executive officers' employment agreements each contain provisions relating to change in control events and severance upon termination for events other than for cause or good reason (as defined under the terms of the employment agreements). These change in control and severance terms are designed to promote stability and continuity of senior management. Information regarding these provisions is included in "Employment Agreements" provided below in Item 11 of this report. There are no other agreements or arrangements governing change in control payments.

Evaluation

Mr. Eugene Landy is employed under an Amended Employment Agreement with the Company. In January 2014, based on the Committee's evaluation of his performance, his base compensation under his amended contract was increased from \$275,000 to \$385,000 per year.

In evaluating Mr. Eugene Landy's leadership performance, during 2010, the Committee awarded Mr. Eugene Landy an Outstanding Leadership Achievement Award (the Award) in the amount of \$300,000 per year for the three fiscal years ended September 30, 2010, 2011 and 2012. This Award was to recognize Mr. Eugene Landy's exceptional leadership as President and Chief Executive Officer for over 40 years.

In evaluating Mr. Eugene Landy's eligibility for an annual bonus, the Committee used the bonus schedule included in Mr. Eugene Landy's Amended Employment Agreement as a guide.

Mr. Michael Landy was appointed the Company's President and Chief Executive Officer on April 9th, 2013. In September 2013, based on his promotion, as well as the Committee's evaluation of his performance, his base compensation under his new employment agreement (dated September 23, 2013) was increased from \$330,750 to \$500,000 per year, effective October 1, 2013.

In evaluating Mr. Michael Landy's eligibility for an annual bonus, the Committee used the bonus schedule included in Mr. Michael Landy's employment agreement as a guide.

The Committee has also approved the recommendations of the Chairman of the Board and the President and Chief Executive Officer concerning the other named executive officers' annual salaries, bonuses, restricted stock grants and fringe benefits.

Stock Compensation Plan

On July 26, 2007, the 2007 Stock Option and Stock Award Plan (the 2007 Plan) was approved by the shareholders authorizing the grant to officers, directors and key employees, of options to purchase up to 1,500,000 shares of common stock. On May 6, 2010, the shareholders approved an amendment and restatement of the 2007 Plan. The amendment and restatement made two significant changes: (1) the inclusion of directors as participants in the 2007 Plan, and (2) the ability to grant restricted stock to Directors, officers and key employees. The amendment and restatement also made other conforming, technical and other minor changes. The amendment also makes certain modifications and clarifications, including concerning administration and compliance with applicable tax rules, such as Section 162(m) of the Internal Revenue Code.

Grants of Plan-Based Awards

Options to purchase 65,000 shares were granted in 2014 and options to purchase 164,170 shares were exercised during fiscal 2014. During fiscal 2014, 10,000 shares of restricted common stock were granted at a grant date fair value of \$10.19 per share. As of September 30, 2014, the number of shares remaining for future grant of stock options or restricted stock under the 2007 Plan is 669,646.

Options may be granted under the 2007 Plan any time up through March 26, 2017. No option granted under the 2007 Plan shall be available for exercise beyond ten years. Generally, options are exercisable after one year from the date of grant. The option price under the 2007 Plan may not be below the fair market value at date of grant. Canceled or expired options are added back to the "pool" of shares available under the 2007 Plan.

Under the 2007 Plan, the Compensation Committee determines the recipients of restricted stock awards; the number of restricted shares to be awarded; the length of the restricted period of the award; the restrictions applicable to the award including, without limitation, the employment or retirement status of the participant; rules governing forfeiture and restrictions applicable to any sale, assignment, transfer, pledge or other encumbrance of the restricted stock during the restricted period; and the eligibility to share in dividends and other distributions paid to the Company's shareholders during the restricted period. The maximum number of shares underlying restricted stock awards that may

be granted in any one fiscal year to a participant is 100,000.

All restricted stock awards granted during fiscal year 2014 vest over five years. The following table sets forth, for the executive officers named in the Summary Compensation Table, information regarding individual grants of restricted stock and individual grants of stock options made under the 2007 Plan during the fiscal year ended September 30, 2014:

(1) These options expire 8 years from grant date.

This value was established using the Black-Scholes stock option valuation model. The following weighted-average assumptions were used in the model: expected volatility of 19.07%; risk-free interest rate of 2.45%; dividend yield (2) of 6.71%; expected life of options of 8 years; and -0- estimated forfeitures. The fair value per share granted was \$0.53. The actual value of the options will depend upon the performance of the Company during the period of time the options are outstanding and the price of the Company's common stock on the date of exercise.

(1) Office Rent includes the Company's proportionate share of real estate taxes and common area maintenance.

On August 22, 2014, the Company entered into a seven year lease agreement to occupy 5,680 square feet for the Company's new corporate office space. The lease will become effective once the landlord provides a certificate of occupancy which is expected to be in January 2015. Once the Company relocates to its new corporate office space, it will no longer share rent expense with UMH. Rent will be at an annual rate of \$99,400 or \$17.50 per square foot for years one through five and an annual rate of \$100,820 or \$17.75 per square foot for years six and seven. The Company will also be responsible for its proportionate share of real estate taxes and common area maintenance. Mr. Eugene W. Landy, the Founder and Chairman of the Board of the Company, owns a 24% interest in the entity that is the landlord of the Company's future new corporate office space.

No director, executive officer, or any immediate family member of such director or executive officer may enter into any transaction or arrangement with the Company without the prior approval of the Board of Directors. If any such transaction or arrangement is proposed, the Board of Directors will appoint a Business Judgment Committee consisting of independent directors who are also independent of the transaction or arrangement. This Committee will recommend to the Board of Directors approval or disapproval of the transaction or arrangement. In determining whether to approve such a transaction or arrangement, the Business Judgment Committee will take into account, among other factors, whether the transaction was on terms no less favorable to the Company than terms generally available to third parties and the extent of the executive officer's or director's involvement in such transaction or

arrangement. While the Company does not have specific written standards for approving such related party transactions, such transactions are only approved if it is in the best interest of the Company and its shareholders. Additionally, the Company's Code of Business Conduct and Ethics requires all directors, officers and employees who may have a potential or apparent conflict of interest to immediately notify the Company's General Counsel. Further, to identify related party transactions, the Company submits and requires our directors and executive officers to complete director and officer questionnaires identifying any transactions with the Company in which the director, executive officer or their immediate family members have an interest.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders

Monmouth Real Estate Investment Corporation

We have audited the accompanying consolidated balance sheets of Monmouth Real Estate Investment Corporation (the “Company”) as of September 30, 2014 and 2013 and the related consolidated statements of income, comprehensive income, shareholders’ equity, and cash flows for each of the three years in the period ended September 30, 2014. Our audit also included the financial statement schedule listed in the Index at Item 15(a)(2)(i). These financial statements and schedule are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and schedule are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Monmouth Real Estate Investment Corporation at September 30, 2014 and 2013, and the consolidated results of its operations and its cash flows for each of the three years in the period ended September 30, 2014, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company’s internal control over financial reporting as of September 30, 2014 based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework), and our report dated December 9, 2014 expressed an unqualified opinion thereon.

MONMOUTH REAL ESTATE INVESTMENT CORPORATION AND SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

SEPTEMBER 30, 2014

NOTE 1 – ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Description of the Business

Monmouth Real Estate Investment Corporation (a Maryland corporation) and its subsidiaries (the Company) operate as a real estate investment trust (REIT), deriving its income primarily from real estate rental operations. As of September 30, 2014 and 2013, rental properties consisted of eighty-two and seventy-six property holdings, respectively. These properties are located in twenty-eight states: Alabama, Arizona, Colorado, Connecticut, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Maryland, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Jersey, New York, North Carolina, Ohio, Oklahoma, Pennsylvania, South Carolina, Tennessee, Texas, Virginia, and Wisconsin. In addition, the Company holds a portfolio of REIT securities which the Company generally limits to no more than approximately 10% of its undepreciated assets.

Management views the Company as a single segment based on its method of internal reporting in addition to its allocation of capital and resources.

Use of Estimates

In preparing the financial statements in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”), management is required to make certain estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from these estimates.

Principles of Consolidation and Noncontrolling Interest

The consolidated financial statements include the Company and its wholly-owned subsidiaries. In 2005, the Company formed MREIC Financial, Inc., a taxable REIT subsidiary which has had no activity since inception. In 2007, the Company merged with Monmouth Capital Corporation (Monmouth Capital), with Monmouth Capital surviving as a

wholly-owned subsidiary of the Company. All intercompany transactions and balances have been eliminated in consolidation.

At September 30, 2014, Monmouth Capital owns a 51% majority interest in Palmer Terrace Realty Associates, LLC (a New Jersey limited liability company) (Palmer Terrace). The Company consolidates the results of operations of Palmer Terrace. Noncontrolling interest represents 49% of the members' equity in Palmer Terrace and is included in Other Liabilities in the accompanying Consolidated Balance Sheet.

Buildings and Improvements

Buildings and improvements are stated at the lower of depreciated cost or net realizable value. Depreciation is computed based on the straight-line method over the estimated useful lives of the assets. These lives are 39 years for buildings and range from 5 to 39 years for improvements.

The Company applies Financial Accounting Standards Board Accounting Standards Codification (ASC) 360-10, Property, Plant & Equipment (ASC 360-10) to measure impairment in real estate investments. Rental properties are individually evaluated for impairment when conditions exist which may indicate that it is probable that the sum of expected future cash flows (on an undiscounted basis without interest) from a rental property is less than its historical net cost basis. These expected future cash flows consider factors such as future operating income, trends and prospects as well as the effects of leasing demand, competition and other factors. Upon determination that an other-than-temporary impairment has occurred, rental properties are reduced to their fair value. For properties to be

Table of Contents

disposed of, an impairment loss is recognized when the fair value of the property, less the estimated cost to sell, is less than the carrying amount of the property measured at the time there is a commitment to sell the property and/or it is actively being marketed for sale. A property to be disposed of is reported at the lower of its carrying amount or its estimated fair value, less its cost to sell. Subsequent to the date that a property is held for disposition, depreciation expense is not recorded.

Gains on Sale of Real Estate

Gains on the sale of real estate investments are recognized when the profit on a given sale is determinable, and the seller is not obliged to perform significant activities after the sale to earn such profit.

Acquisitions

The Company accounts for acquisitions in accordance with the provisions of ASC 805, Business Combinations (ASC 805) which requires transaction costs, such as broker fees, transfer taxes, legal, accounting, valuation, and other professional and consulting fees, related to acquisitions are expensed as incurred.

Upon acquisition of a property, the Company allocates the purchase price of the property based upon the fair value of the assets acquired, which generally consist of land, buildings and intangible assets, including above and below market leases and in-place leases. The Company allocates the purchase price to the fair value of the tangible assets of an acquired property generally determined by third party appraisal of the property obtained in conjunction with the purchase.

The purchase price is further allocated to acquired above and below market leases based on the present value of the difference between prevailing market rates and the in-place rates over the remaining lease term. In addition, any remaining amounts of the purchase price are applied to in-place lease values based on management's evaluation of the specific characteristics of each tenant's lease. Acquired above and below market leases are amortized to rental revenue over the remaining non-cancelable terms of the respective leases. The value of in-place lease intangibles is amortized to amortization expense over the remaining lease term. If a tenant terminates its lease early, the unamortized portion of the tenant improvements, leasing commissions, deferred rent, above and below market leases and the in-place lease value is charged to expense.

Securities Available for Sale

Investments in non-real estate assets consist primarily of marketable securities, which the Company generally limits to no more than approximately 10% of its undepreciated assets. The Company's securities consist of common and preferred stock and debt securities of other REITs. These securities are all publicly-traded and purchased on the open market, through private transactions or through dividend reinvestment plans. These securities may be classified among three categories: held-to-maturity, trading, and available-for-sale. As of September 30, 2014 and 2013, the Company's securities are all classified as available-for-sale and are carried at fair value based upon quoted market prices in active markets. Gains or losses on the sale of securities are based on average cost and are accounted for on a trade date basis. Unrealized holding gains and losses are excluded from earnings and reported as a separate component of Shareholders' Equity until realized. The change in the unrealized net holding gains is reflected as Comprehensive Income.

The Company individually reviews and evaluates its marketable securities for impairment on a quarterly basis or when events or circumstances occur. The Company considers, among other things, credit aspects of the issuer, amount of decline in fair value over cost and length of time in a continuous loss position. The Company has developed a general policy of evaluating whether an unrealized loss is other than temporary. On a quarterly basis, the Company makes an initial review of every individual security in its portfolio. If the security is impaired, the Company first determines its intent and ability to hold this investment for a period of time sufficient to allow for any anticipated recovery in market value. Next, the Company determines the length of time and the extent of the impairment. Barring other factors, including the downgrading of the security or the cessation of dividends, if the fair value of the security is below cost by less than 20% for less than 6 months and the Company has the intent and

Table of Contents

ability to hold the security, the security is deemed to be temporarily impaired. Otherwise, the Company reviews additional information to determine whether the impairment is other than temporary. The Company discusses and analyzes any relevant information known about the security, such as:

- a. Whether the decline is attributable to adverse conditions related to the security or to specific conditions in an industry or in a geographic area.
- b. Any downgrading of the security by a rating agency.
- c. Whether the financial condition of the issuer has deteriorated.
- d. Status of dividends – Whether dividends have been reduced or eliminated, or scheduled interest payments have not been made.
- e. Analysis of the underlying assets (including NAV analysis) using independent analysis or recent transactions.

The Company normally holds REIT securities on a long term basis and has the ability and intent to hold securities to recovery. The Company generally limits its marketable securities investments to no more than approximately 10% of its undepreciated assets. If a decline in fair value is determined to be other than temporary, an impairment charge is recognized in earnings and the cost basis of the individual security is written down to fair value as the new cost basis.

Cash and Cash Equivalents

Cash and cash equivalents include all cash and investments with an original maturity of three months or less. The Company maintains its cash in bank accounts in amounts that may exceed federally insured limits. The Company has not experienced any losses in these accounts in the past. The fair value of cash and cash equivalents approximates their current carrying amounts since all such items are short-term in nature.

Intangible Assets, Lease Costs and Financing Costs

Intangible assets, consisting primarily of the value of in-place leases, are amortized to expense over the remaining terms of the respective leases. Upon termination of a lease, the unamortized portion is charged to expense. The weighted-average amortization period upon acquisition for intangible assets recorded during 2014, 2013 and 2012 was 14 years, 10 years and 9 years, respectively.

Costs incurred in connection with the execution of leases are deferred and are amortized over the term of the respective leases. Unamortized lease costs are charged to expense upon cancellation of leases prior to the expiration of lease terms. Costs incurred in connection with obtaining mortgages and other financings and refinancing are deferred and are amortized over the term of the related obligations. Unamortized costs are charged to expense upon prepayment of the obligation. Amortization expense related to these deferred leasing and financing costs were \$1,231,222, \$1,164,852 and \$995,503 for the years ended September 30, 2014, 2013 and 2012, respectively. The Company

estimates that aggregate amortization expense for existing assets will be approximately \$1,299,418, \$1,245,567, \$1,056,580, \$692,319 and \$573,833 for the fiscal years 2015, 2016, 2017, 2018 and 2019, respectively.

Revenue Recognition

Rental revenue from tenants with leases having scheduled rental increases are recognized on a straight-line basis over the term of the lease. Tenant recoveries related to the reimbursement of real estate taxes, insurance, repairs and maintenance, and other operating expenses are recognized as revenue in the period the expenses are incurred. The reimbursements are recognized and presented gross, as the Company is generally the primary obligor and, with respect to purchasing goods and services from third-party suppliers, has discretion in selecting the supplier and bears the associated credit risk. These occupancy charges are recognized as earned.

The Company provides an allowance for doubtful accounts against the portion of tenant and other receivables, loans receivable and deferred rent receivable which are estimated to be uncollectible. For accounts

Table of Contents

receivable the Company deems uncollectible, the Company uses the direct write-off method.

Lease Termination Income

Lease Termination Income is recognized in operating revenues when there is a signed termination agreement, all of the conditions of the agreement have been met, the tenant is no longer occupying the property and the termination consideration is probable of collection. Lease termination amounts are paid by tenants who want to terminate their lease obligations before the end of the contractual term of the lease by agreement with the Company.

Lease Termination Income for the year ended September 30, 2014 consisted of \$1,182,890 from the Company's former tenant at its 83,000 square foot building located in Roanoke, VA. Lease Termination Income for the twelve months ended September 30, 2013 consisted of \$113,784 from the Company's former tenant at its 388,671 square foot building located in St. Joseph, MO and \$576,946 from the Company's former tenant at its 160,000 square foot building located in Monroe, NC. The Company is currently leasing 256,000 square feet (representing 66% of the space) at its property located in St. Joseph, MO to a single tenant through September 30, 2017. The Company is currently leasing its 160,000 square foot building in Monroe, NC to a single tenant through July 31, 2017 and, as further described below, the Company is currently leasing its 83,000 square foot building in Roanoke, VA to a single tenant through January 31, 2025.

Effective May 1, 2014, the Company entered into a lease termination agreement with DHL Holdings (USA) Inc. for its 83,000 square foot facility in Roanoke, VA whereby the Company received a lump sum termination payment of \$1,182,890, representing 70% of the remaining amount due under the lease, which was set to expire on December 8, 2016. In conjunction with the lease termination agreement, the Company entered into a lease agreement, which was effective August 1, 2014, with CHEP USA, Inc. (CHEP) for 10.5 years. CHEP will receive six months of free rent, and effective on February 1, 2015, annual base rent will initially be \$398,400 or \$4.80 per square foot with 1.5% increases each year, resulting in annualized base rent over the life of the lease of \$406,092 or \$4.89 per square foot. The Company has made improvements totaling \$649,098 to the property which resulted in an annual improvement rent charge of \$65,386 which will commence on February 1, 2015, resulting in an annualized improvement rent over the life of the lease of \$62,272 or \$0.75 per square foot. This results in a combined annualized improvement rent and base rent of \$468,364 or \$5.64 per square foot over the lease term. The CHEP lease has an early termination option in the seventh year, provided that the Company is given six months of notice and CHEP pays the Company a \$500,000 termination fee.

The Company's lease with its tenant, Graybar Electric Company (Graybar), at its 26,340 square foot building located in Ridgeland (Jackson), MS has an early termination option which may be exercised at any time provided the Company is given six months of notice. The Company has not received notice nor does the Company anticipate that this tenant will exercise its early termination option. The rent per annum for this location is \$109,275 or \$4.15 per square foot and the lease expires in July 2019.

Other than the Company's leases with Graybar and CHEP, the Company does not have any leases that contain an early termination option.

Discontinued Operations

The Company follows the provisions of ASC 360-10, Property Plant & Equipment (ASC 360-10). ASC 360-10 addresses financial accounting and reporting for the disposal of long-lived assets that are considered a component. A component is comprised of operations and cash flows that can clearly be distinguished, operationally and for financial reporting purposes, from the rest of the Company. ASC 360-10 requires that the results of operations and gains or losses on the sale of a component of an entity be presented in discontinued operations if both of the following criteria are met: (a) the operations and cash flows of the property have been (or will be) eliminated from the ongoing operations of the Company as a result of the disposal transaction and (b) the Company will not have any significant continuing involvement in the operations of the property after the disposal transaction. ASC 360-10 also requires prior period results of operations for these properties to be restated and presented in discontinued operations in prior consolidated statements of income.

Table of Contents

In April 2014, the Financial Accounting Standards Board (“FASB”) issued ASU No. 2014-08, “Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity”. ASU No. 2014-08 changes the definition of a discontinued operation to include only those disposals of components of an entity that represent a strategic shift that has (or will have) a major effect on an entity's operations and financial results. ASU No. 2014-08 is effective prospectively for fiscal years beginning after December 15, 2014, with earlier adoption permitted. The Company has decided to early adopt this standard effective with the interim period beginning January 1, 2014 and will continue to apply the guidance to future applicable disposals or discontinued operations, if any. Prior to January 1, 2014, properties identified as held for sale and/or disposed of were presented in discontinued operations for all periods presented (see Note 6).

Net Income Per Share

Basic Net Income per Share is calculated by dividing Net Income Attributable to Common Shareholders by the weighted-average number of common shares outstanding during the period. Diluted Net Income per Common Share is calculated by dividing Net Income attributable to Common Shareholders plus Interest Expense related to the Company's Convertible Subordinated Debentures (Debentures) by the weighted-average number of common shares outstanding plus the weighted-average number of net shares that would be issued upon exercise of stock options pursuant to the treasury stock method, plus the number of shares resulting from the possible conversion of the Debentures during the period. As further described in Note 8, during the three months ended December 31, 2012, the Company redeemed all of its outstanding Debentures. Interest expense of \$689,200 for fiscal year 2012 and common shares totaling 831,441 for fiscal year 2012 related to potential conversion of the Debentures are excluded from the calculation due to their antidilutive effect.

In addition, common stock equivalents of 95,112, 156,799 and 158,929 shares are included in the diluted weighted average shares outstanding for fiscal years 2014, 2013 and 2012, respectively. As of September 30, 2014, 2013 and 2012, options to purchase 65,000, 65,000 and -0- shares, respectively, were antidilutive.

Stock Compensation Plan

The Company accounts for awards of stock options and restricted stock in accordance with ASC 718-10, Compensation-Stock Compensation. ASC 718-10 requires that compensation cost for all stock awards be calculated and amortized over the service period (generally equal to the vesting period). The compensation cost for stock option grants is determined using option pricing models, intended to estimate the fair value of the awards at the grant date less estimated forfeitures. The compensation expense for restricted stock is recognized based on the fair value of the restricted stock awards less estimated forfeitures. The fair value of restricted stock awards is equal to the fair value of the Company's stock on the grant date. Compensation costs of \$347,002, \$329,148 and \$593,811 have been recognized in 2014, 2013 and 2012, respectively. Fiscal 2012 compensation costs includes a one-time charge of \$210,510 for restricted stock grants awarded to a participant who is of retirement age and therefore their entire amount of measured compensation cost has been recognized at grant date and a one-time charge of \$107,937 related to the portion of restricted stock allocated to severance expense related to Ms. Vecere as further described in Note 12. Included in Note

10 to these consolidated financial statements are the assumptions and methodology used to calculate the fair value of stock options and restricted shares.

Income Tax

The Company has elected to be taxed as a REIT under Sections 856-860 of the Internal Revenue Code. The Company will not be taxed on the portion of its income which is distributed to shareholders, provided it distributes at least 90% of its taxable income, has at least 75% of its assets in real estate investments and meets certain other requirements for qualification as a REIT. The Company is subject to franchise taxes in several of the states in which the Company owns property.

Table of Contents

The Company follows the provisions of ASC Topic 740, Income Taxes, that, among other things, defines a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. ASC Topic 740 also provides guidance on de-recognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. Based on its evaluation, the Company determined that it has no uncertain tax positions and no unrecognized tax benefits as of September 30, 2014. The Company records interest and penalties relating to unrecognized tax benefits, if any, as interest expense. As of September 30, 2014, the fiscal tax years 2011 through and including 2014 remain open to examination by the Internal Revenue Service. There are currently no federal tax examinations in progress.

Comprehensive Income

Comprehensive income is comprised of net income and other comprehensive income. Other comprehensive income consists of unrealized gains or losses on securities available for sale.

Reclassifications

Certain amounts in the consolidated financial statements for the prior years have been reclassified to conform to the financial statement presentation for the current year.

New Accounting Pronouncements

In April 2014, the Financial Accounting Standards Board ("FASB") issued ASU No. 2014-08, "Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity". For further detail, refer to the "Discontinued Operations" section shown previously in Note 1.

In May 2014, the FASB issued ASU No. 2014-09, "Revenue from Contracts with Customers" as a new Topic, Accounting Standards Codification ("ASC") Topic 606. The objective of ASU 2014-09 is to establish a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and will supersede most of the existing revenue recognition guidance, including industry-specific guidance. The core principle is that a company should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In applying the new standard, companies will perform a five-step analysis of transactions to determine when and how revenue is recognized. ASU 2014-09 applies to all contracts with customers except those that are within the scope of other topics in the FASB ASC. This ASU is effective for annual reporting periods (including interim periods within those periods) beginning after December 15, 2016 and shall be applied using either a full retrospective or modified retrospective approach. Early adoption is not permitted. The Company is currently evaluating the impact this

standard may have on the consolidated financial statements and the method of adoption.

Management does not believe that any other recently issued, but not yet effective accounting pronouncements, if adopted, would have a material effect on the accompanying Consolidated Financial Statements.

NOTE 10 - STOCK COMPENSATION PLAN

On July 26, 2007, the 2007 Stock Option and Stock Award Plan (the 2007 Plan) was approved by the shareholders authorizing the grant to officers and key employees, of options to purchase up to 1,500,000 shares of common stock. On May 6, 2010, the shareholders approved an amendment and restatement of the 2007 Plan. The amendment and restatement made two significant changes: (1) the inclusion of directors as participants in the 2007 Plan, and (2) the ability to grant restricted stock to directors, officers and key employees. The amendment and restatement also made other conforming, technical and other minor changes. The amendment also makes certain modifications and clarifications, including concerning administration and compliance with applicable tax rules, such as Section 162(m) of the Internal Revenue Code.

Options or restricted stock may be granted any time as determined by the Company's Compensation Committee up through March 26, 2017. No option shall be available for exercise beyond ten years. All options are exercisable after one year from the date of grant. The option price shall not be below the fair market value at date of grant. Canceled or expired options are added back to the "pool" of shares available under the Plan.

The Compensation Committee determines the recipients of each restricted stock award; the number of restricted shares to be awarded; the length of the restricted period of the award; the restrictions applicable to the award including, without limitation, the employment or retirement status of the participant; rules governing forfeiture and restrictions applicable to any sale, assignment, transfer, pledge or other encumbrance of the restricted stock

Table of Contents

during the restricted period; and the eligibility to share in dividends and other distributions paid to the Company’s shareholders during the restricted period. The maximum number of shares underlying restricted stock awards that may be granted in any one fiscal year to a participant shall be 100,000.

Unless otherwise provided for in an underlying restricted stock award agreement, if a participant’s status as an employee or director of the Company is terminated by reason of death or disability, the restrictions will lapse on such date. Unless otherwise provided for in an underlying restricted stock award agreement, the Plan provides that if an individual’s status as an employee or director is terminated by reason of retirement following an involuntary termination (other than for “cause” as defined in the Plan), the restrictions will generally lapse, unless the restricted

stock award is intended to constitute “performance based” compensation for purposes of Section 162(m) of the Internal Revenue Code. If a participant’s status as an employee or director terminates for any other reason, the Plan provides that a participant will generally forfeit any outstanding restricted stock awards, unless otherwise indicated in the applicable award agreement. Shares of restricted stock that are forfeited become available again for issuance under the Plan. The Compensation Committee has the authority to accelerate the time at which the restrictions may lapse whenever it considers that such action is in the best interests of the Company and of its shareholders, whether by reason of changes in tax laws, or a “change in control” as defined in the 2007 Plan or otherwise.

The Company accounts for stock options and restricted stock in accordance with ASC 718-10, Compensation-Stock Compensation. ASC 718-10 requires that compensation cost for all stock awards be calculated and amortized over the service period (generally equal to the vesting period).

Stock Options

During fiscal 2014, 2013 and 2012, one employee was granted options to purchase 65,000 shares each fiscal year. The fair value of these options was \$34,549, \$39,991, and \$31,850 in fiscal 2014, 2013, and 2012, respectively based on the assumptions below and is being amortized over a one-year vesting period. On January 15, 2014, the Board of Directors reaffirmed its Share Repurchase Program (the repurchase program) that authorizes the Company to purchase up to \$10,000,000 in the aggregate of the Company's common stock. NOTE 15 - FAIR VALUE MEASUREMENTS

The Company follows ASC 825, Financial Instruments, for financial assets and liabilities recognized at fair value on a recurring basis. We measure certain financial assets and liabilities at fair value on a recurring basis, including securities available for sale. The fair value of these certain financial assets was determined using the following inputs at September 30, 2014 and 2013:

	Fair Value Measurements at Reporting Date Using			
	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
September 30, 2014:				
Securities available for sale	\$59,311,403	\$59,311,403	\$-0-	\$-0-
September 30, 2013:				
Securities available for sale	\$45,451,740	\$45,451,740	\$-0-	\$-0-

In addition to the Company's investments in Securities Available for Sale at Fair Value, the Company is required to disclose certain information about fair values of its other financial instruments. Estimates of fair value are made at a

specific point in time based upon, where available, relevant market prices and information about the financial instrument. Such estimates do not include any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. For a portion of the Company's other financial instruments, no quoted market value exists. Therefore, estimates of fair value are necessarily based on a number of significant assumptions (many of which involve events outside the control of management). Such assumptions include assessments of current economic conditions, perceived risks associated with these financial instruments and their counterparties; future expected loss experience and other factors. Given the uncertainties surrounding these assumptions, the reported fair values represent estimates only, and therefore cannot be compared to the historical accounting model. Use of different assumptions or methodologies is likely to result in significantly different fair value estimates.

Table of Contents

The fair value of Cash and Cash Equivalents approximates their current carrying amounts since all such items are short-term in nature. The fair value of variable rate Loans Payable approximates their current carrying amounts since such amounts payable are at approximately a weighted-average current market rate of interest. The estimated fair value of fixed rate mortgage notes payable is based on discounting the future cash flows at a year-end risk adjusted borrowing rate currently available to the Company for issuance of debt with similar terms and remaining maturities. These fair value measurements fall within level 2 of the fair value hierarchy. At September 30, 2014 the fixed rate Mortgage Notes Payable fair value (estimated based upon expected cash outflows discounted at current market rates) amounted to \$296,231,000 and the carrying value amounted to \$287,796,006. At September 30, 2014 the fixed rate Loans Payable fair value (estimated based upon expected cash outflows discounted at current market rates) amounted to \$5,249,000 and the carrying value amounted to \$5,200,000. When the Company acquires a property, it is required to fair value all of the assets and liabilities, including intangible assets and liabilities, relating to the properties acquired lease (See Note 3). Those fair value measurements fall within level 3 of the fair value hierarchy.
