II. Business Summary

1. Business Summary

A. Industry Status

(1) Characteristics of Industry

As of the end of December 2005, the number of domestic mobile phone subscribers reached 38.34 million and with a 79.4% penetration rate, the Korean mobile communication market can be considered to have reached its saturation point. However, considering the number of European countries with penetration

Table of Contents

rates exceeding 90%, additional future growth of the domestic market may be possible.

The Korean mobile communications market continues to improve with the help of advances in the network-related technology evidenced by the first commercialization of CDMA2000 1x, CDMA 1x EV-DO, and the development of highly advanced handsets that enables the provision of convergence services for multimedia contents, mobile commerce, telematics, satellite DMB, digital home services, and other related contents.

(2) Industry Growth

(Unit: 1,000 persons)

Classification	End of 2005	End of 2004	End of 2003	End of 2002	End of 2001
Penetration rate (%)	79.4	75.9	70.1	67.9	60.9

Total	38,342	36,586	33,592	32,342	29,046

(Data: Ministry of Information and Communication website)

(3) Market Characteristics

The Korean mobile communication market includes the entire population of Korea with the mobile communication service needs, and almost every Korean is considered a potential user. With the market penetration rate reaching as high as 79.4% (as of the end of December 2005), the customer base is continuing to expand to include elementary school and pre-school children. Although demand to date has primarily been on the domestic market, as the

Table of Contents

business territory expands to overseas market, the size of overseas sales is expected to grow in the near future. Seasonal and economic fluctuations have much less influence on the Korean mobile communication market compared to other industries.

(2) New Business Contents and Prospects

a) Resolution for capital investment regarding Mobile Virtual Network Operator (MVNO) service in the U.S.

(January 26, 2005)

Table of Contents

Investment amount: US\$220 million (From 2005 to 2007)

Investment method: Establishment of a joint venture with EarthLink which is one of the three major internet service providers in the U.S.

Service provided: MVNO

Subscriber recruitment and service provision based on service facilities and fee plans

Combination of SK Telecom's mobile communications business capabilities and data service technology with the local customer base, marketing infrastructure and brand power of EarthLink

Scheduled to provide additional services related with music, games and messaging for target customers

Recent business status

Launch of a new brand: HELIO

Full scale business scheduled for initiation in early 2006. Targeted at younger customer group relatively more familiar with the usage of wireless internet

b) Commercialization of the High Speed Downlink Packet Access (HSDPA) service in the first half of 2006

To facilitate service vitalization as part of our future growth strategy, more visual oriented products such as video phones will be developed while expanding the scope of global roaming services

We plan to improve customer recognition toward HSDPA through early market dominance and upgrade of market premium services by focusing on the early adopters and frequent users

A. Material Legal Proceedings			
(1) Action Seeking to Revoke against the Intellectual Property Tribunal's Decision Nullifying Patent Registration Related with the Caller Ring Service			
a) Parties to the litigation: Park Won Sup vs. SK Telecom			

Table of Contents

- b) Overview: Mr. Park Won Sup (plaintiff: Representative Director of Ad Ring Systems Co., Ltd.) claimed that the caller ring service of SK Telecom infringed upon his patent, and SK Telecom sought to nullify Mr. Park's patent registration. The Intellectual Property Tribunal rendered the decision nullifying the patent right of the plaintiff, and the plaintiff commenced an action to revoke such decision.
 - c) Progress: The Patent Court dismissed plaintiff's claim (September 2005), after which the plaintiff appealed.
 - d) Impact on business: In the event that the case is decided against SK Telecom, there is a risk of future royalty obligations. (However, this is our expectation only, and the actual effect may change depending on the actual finding)
- (2) Action Seeking to Revoke Decision Nullifying Trademark Registration for SPEED 011
- a) Parties to the litigation: SK Telecom vs. KT Freetel Co., Ltd. (KTF) and LG Telecom Co., Ltd. (LGT)
 - b) Overview: The Intellectual Property Tribunal rendered decision nullifying our trademark registration for 011 and SPEED 011, and SK Telecom sought to revoke such decision at the Patent Court.
 - c) Progress
 - Plaintiff (SK Telecom)'s claim regarding the 011 trademark was dismissed, while a partial recognition (within the context of telephone communication and wireless communication business) has been granted with respect to the Speed 011 and SPEED 011 trademark. (December 24, 2004)
 - The case is pending at the Supreme Court as all parties appealed the decision (January 2005).
 - d) Impact on business: SK Telecom may continue to use the above trademarks (although exclusive right for the use of 011 would be lost) regardless of the outcome of the appeal, and its effect on our business is expected to be minimal. (However, this is our expectation only, and the actual effect may change depending on the actual finding)

Independent Auditors Report

English Translation of a Report Originally Issued in Korean

To the Stockholders and Board of Directors of

SK Telecom Co., Ltd.

We have audited the accompanying non-consolidated balance sheets of SK Telecom Co., Ltd. (the Company) as of December 31, 2005 and 2004, and the related non-consolidated statements of income, appropriations of retained earnings, and cash flows for the years then ended (all expressed in Korean won). These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the Republic of Korea. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such financial statements referred to above presents fairly, in all material respects, the financial position of the Company as of December 31, 2005 and 2004, and the results of its operations, the appropriations of its retained earnings and its cash flows for the years then ended, in conformity with accounting principles generally accepted in the Republic of Korea.

Our audits also comprehended the translation of the Korean won amounts into U.S. dollar amounts and, in our opinion, such translation has been made in conformity with the basis stated in Note 2(a). Such U.S. dollar amounts are presented solely for the convenience of readers outside of the Republic of Korea.

Accounting principles and auditing standards and their application in practice vary among countries. The accompanying financial statements are not intended to present the financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in countries other than the Republic of Korea. In addition, the procedures and practices utilized in the Republic of Korea to audit such financial statements may differ from those generally accepted and applied in other countries. Accordingly, this report and the accompanying financial statements are for use by those knowledgeable about Korean accounting procedures and auditing standards and their application in practice.

February 3, 2006

Notice to Readers

This report is effective as of February 3, 2006, the auditors' report date. Certain subsequent events or circumstances may have occurred between the auditors' report date and the time the auditors' report is read. Such events or circumstances could significantly affect the accompanying financial statements and may result in modification to the auditors' report.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying non-consolidated financial statements of the Company have been prepared in accordance with Korean Financial Accounting Standards and Statements of Korean Accounting Standards (SKAS) No. 1 through No. 17 (except for No. 11 and No. 14). The accompanying non-consolidated financial statements will be approved by the Company's board of directors on February 14, 2006. Significant accounting policies followed in preparing the accompanying non-consolidated financial statements are summarized as follows.

a. Basis of Presentation

The accompanying non-consolidated statutory financial statements have been prepared in the Korean language (Hangul) in conformity with the accounting principles generally accepted in the Republic of Korea (Korean GAAP). Certain accounting principles applied by the Company that conform with financial accounting standards and accounting principles in the Republic of Korea may not conform with accounting principles generally accepted in other countries. Accordingly, these financial statements are intended for use by those who are informed about Korean accounting principles and practices. The accompanying non-consolidated financial statements have been condensed, restructured and translated into English with certain expanded descriptions from the Korean language financial statements. Certain information included in the Korean language financial statements, but not required for a fair presentation of the Company's financial position, results of operations or cash flows, is not presented in the accompanying non-consolidated financial statements.

The official accounting records of the Company are maintained and expressed in Korean won, the currency of the country in which the Company is incorporated and operates. The translation of Korean won amounts into U.S. dollar amounts are included solely for the convenience of readers outside of the Republic of Korea and have been made at the rate of ₩1,010.0 to US\$1, the Noon Buying Rate in the City of New York for cable transfers in Korean won as certified for customs purposes by the Federal Reserve Bank of New York

on the last business day of the year ended December 31, 2005. Such translations into U.S. dollars should not be construed as representations that the Korean won amounts could be converted into U.S. dollars at the above or any other rate.

b. Adoptions of New Statements of Korea Accounting Standards (SKAS)

On January 1, 2005, the Company adopted SKAS No.15 through No.17, which are effective from the fiscal year beginning after December 31, 2004. The adoption of such accounting standards did not materially affect the

Table of Contents

Company's financial statements except as follows :

Through 2004, the Company discontinued applying the equity method of accounting for an investment when the investment is reduced to zero and did not provide for additional losses. Effective January 1, 2005, additional losses are provided for to the extent that the Company has other investment assets related to the equity method investee, including preferred stock and long-term receivables, pursuant to adoption of SKAS No.15, Investments : Equity Method . As a result of this accounting change, total assets as of December 31, 2005 decreased by ₩ 4,706 million and ordinary income and net income for the year ended December 31, 2005 decreased by ₩ 4,706 million (See Note 4).

Through 2004, tax effects of temporary differences related to capital adjustments were excluded in determining the deferred tax assets or liabilities. Effective January 1, 2005, such tax effects of temporary differences are included in determining the deferred tax assets or liabilities, pursuant to adoption of SKAS No. 16 Income Taxes . Accordingly, adjustments made directly to capital surplus or capital adjustments, which result in temporary differences, are recorded net of related tax effects. In addition, effective January 1, 2005, deferred income tax assets and liabilities which were presented on the balance sheet as a single non-current net number through 2004, are separated into current and non-current portions. As a result of adopting SKAS No. 16, total assets and total liabilities as of December 31, 2005 increased by ₩ 61,152 million and ₩ 90,645 million, respectively, and total stockholders' equity as of December 31, 2005 decreased by ₩ 29,493 million, which was directly reflected in capital surplus or capital adjustments (See Note 16).

Through 2004, provisions were recorded at nominal value. Effective January 1, 2005, provisions are recorded at the present value when the effect of the time value of money is material, pursuant to adoption of SKAS No. 17 Provisions, Contingent Liabilities and Contingent Assets . SKAS No. 16 is prospectively applied and as a result of adopting such accounting standard, total liabilities as of December 31, 2005 decreased by ₩ 7,415 million and ordinary income and net income for the year ended December 31, 2005 increased by ₩ 5,376 million (See Note 22).

Such newly adopted accounting standards are prospectively applied as allowed by SKAS No. 15 through No. 17. As a result, the non-consolidated balance sheet as of December 31, 2004 and the non-consolidated statement of income and cash flows for the year ended December 31, 2004, which are comparatively presented herein, were not adjusted to reflect the effect of adoption of SKAS No. 15 through No. 17.

c. Allowance for Doubtful Accounts

Allowance for doubtful accounts is provided based on the estimated collectibility of individual accounts and historical bad debt experience.

d. Inventories

Inventories, which consist mainly of replacement units for wireless telecommunication facilities and supplies for sales promotion, are stated at the lower of cost or market value, with cost determined using the moving average method. During the year, perpetual inventory systems are used to value inventories, which are adjusted to physical inventory counts performed at fiscal year end. When the market value of inventories is less than the acquisition cost, the carrying amount is reduced to the market value and any difference is charged to current operations as operating expenses. There was no such loss for the years ended December 31, 2005 and 2004.

Table of Contents

e. Securities (excluding securities accounted for using the equity method of accounting)

Debt and equity securities are initially recorded at their acquisition costs (fair value of considerations paid) including incidental cost incurred in connection with acquisition of the related securities and classified into trading, available-for-sale and held-to-maturity securities depending on the acquisition purpose and nature.

Trading securities are stated at fair value with gains or losses on valuation reflected in current operations.

Securities classified as available-for-sale are reported at fair value. Unrealized gains or losses on valuation of available-for-sale securities are included in capital adjustments and the unrealized gains or losses are reflected in net income when the securities are sold or if an impairment is other than temporary. Equity securities are stated at acquisition cost if fair value cannot be reliably measured. If the declines in the fair value of individual available-for-sale securities below their acquisition or amortized cost are other than temporary and there is objective evidence of impairment, write-downs of the individual securities are recorded to reduce the carrying value to their fair value. The related write-downs are recorded in current operations as a loss on impairment of investment securities.

Held-to-maturity securities are presented at acquisition cost after premiums or discounts are amortized or accreted, respectively. The Company recognizes write-downs resulting from other-than-temporary declines in the fair value below its book value on the balance sheet date if there is objective evidence of impairment. The related write-downs are recorded in current operations as a loss on impairment of investment securities.

Trading securities are presented in the current asset section of the balance sheet, and available-for-sales and held-to-maturity securities are presented in the current asset section of the balance sheet if their maturities are within one year; otherwise such securities are recorded in the non-current section of the balance sheet.

f. Investment Securities Accounted for Using the Equity Method of Accounting

Investment securities of affiliated companies, in which the Company has the ability to exercise significant influence, are carried using the equity method of accounting, whereby the Company's initial investment is recorded at cost and the carrying value is subsequently increased or decreased to reflect the Company's portion of shareholders' equity of the investee. Differences between the purchase cost and net asset value of the investee are amortized over 5 to 20 years using the straight-line method. When applying the equity method of accounting, unrealized intercompany gains and losses are eliminated and the effect of eliminations is reflected in the investment securities account (See Note 4). In addition, effective January 1, 2005, the Company provides for additional losses for those investments accounted for using the equity method that are reduced to zero to the extent that the Company has other investment assets related to the equity method investees.

g. Property and Equipment

Property and equipment are stated at cost. Major renewals and betterments, which prolong the useful life or enhance the value of assets, are capitalized; expenditures for maintenance and repairs are charged to expense as incurred.

Depreciation is computed using the declining balance method (except for buildings and structures acquired on or after January 1, 1995 which are depreciated using the straight-line method) over the estimated useful lives (4~30 years) of the related assets (See Note 6).

Interest expense and other financing charges for borrowings related to the manufacture or construction of property and equipment are charged to current operations as incurred.

Table of Contents

h. Intangible Assets

Intangible assets are recorded at cost, less amortization computed using the straight-line method over 5 to 20 years. The amortization for the years ended December 31, 2005 and 2004 were ₩329,360 million and ₩317,394 million, respectively.

With its application for a license to provide IMT 2000 service, the Company has a commitment to pay ₩1,300,000 million to the Ministry of Information Communication (MIC →) ₩650,000 million was paid in March 2001 by SK IMT Co., Ltd. (a former subsidiary of the Company), which was merged into the Company on May 1, 2003, and the remainder is required to be paid over 10 years with an annual interest rate equal to the 3-year-maturity government bond rate minus 0.75% (3.58% as of December 31, 2005). The future payment obligations are ₩90,000 million in 2007, ₩110,000 million in 2008, ₩130,000 million in 2009, ₩150,000 million in 2010, and ₩170,000 million in 2011. On December 4, 2001, SK IMT Co., Ltd. received the IMT 2000 license from MIC, and recorded the total license cost as an intangible asset. As a result of the merger with SK IMT Co., Ltd., the Company acquired such IMT license of ₩1,259,253 million and assumed the related long-term payable with a principal amount of ₩650,000 million on May 1, 2003 (the date of merger). Amortization of the IMT license commenced when the Company started its commercial IMT 2000 service in December 2003, using the straight-line method over the estimated useful life of the IMT license which expires in December 2016.

i. Convertible Bonds

The proceeds from issuance of convertible bonds are allocated between the conversion rights and the debt issued; the portion allocable to the conversion rights is accounted for as capital surplus with a corresponding conversion right adjustment which is deducted from the related bonds. Such conversion right adjustment is amortized to interest expense using the effective interest rate method over the redemption period of the convertible bonds. The portion allocable to the conversion rights is measured by deducting the present value of the debt at time of issuance from the gross proceeds from issuance of convertible bonds, with the present value of the debt being computed by discounting the expected future cash flows (including call premium, if any) using the effective interest rate applied to ordinary or straight debt of the Company at the issue date.

j. Discounts on Bonds

Discounts on bonds are amortized to interest expense using the effective interest rate method over the redemption period of the bonds.

k. Valuation of Long-term Payables

Long-term payables resulting from long-term installment transactions are stated at the present value of the expected future cash flows. Imputed interest amounts are recorded in present value discount accounts which are deducted directly from the related nominal payable balances. Such imputed interest is included in operations using the effective interest rate method over the redemption period.

l. Provisions, Contingent Liabilities and Contingent Assets

The Company recognizes a provision when i) it has a present obligation as a result of a past event, ii) it is probable that a disbursement of economic resources will be required to settle the obligation, and iii) a reliable estimate can be made of the amount of the obligation (See Note 22).

Table of Contents

The Company does not recognize the following contingent obligations as liabilities ;

- Possible obligations related to past events, for which the existence of a liability can only be confirmed upon occurrence of uncertain future event or events outside the control of the Company.

- Present obligations arising out of past events or transactions, for which i) a disbursement of economic resources to fulfill such obligations is not probable or ii) a disbursement of economic resources is probable, but the related amount cannot be reasonably estimated.

In addition, the Company does not recognize potential assets related to past events or transactions, for which the existence of an asset or future benefit can only be confirmed upon occurrence of uncertain future event or events outside the control of the Company.

m. Accrued Severance Indemnities

In accordance with the Company's policy, all employees with more than one year of service are entitled to receive severance indemnities, based on length of service and rate of pay, upon termination of their employment. Accruals for severance indemnities are recorded to approximate the amount required to be paid if all employees were to terminate at the balance sheet date.

The Company has deposits with insurance companies to fund the portion of the employees' severance indemnities which is in excess of the tax deductible amount allowed under the Corporate Income Tax Law, in order to take advantage of the additional tax deductibility for such funding. Such deposits with outside insurance companies, where the beneficiaries are the Company's employees, totaling ~~₩~~187,103 million and ~~₩~~155,228 million as of December 31, 2005 and 2004, respectively, are deducted from accrued severance indemnities.

In accordance with the Korean National Pension Fund Law, the Company transferred a portion of its accrued severance indemnities to the National Pension Fund through March 1999. Such transfers, amounting to ~~₩~~5,172 million and ~~₩~~5,612 million as of December 31, 2005 and 2004, respectively, are deducted from accrued severance indemnities.

Actual payment of severance indemnities amounted to ~~₩~~21,985 million and ~~₩~~26,728 million for the years ended December 31, 2005 and 2004, respectively.

n. Accounting for Employee Stock Option Compensation Plan

The Company adopted the fair value based method of accounting for its employee stock option compensation plan (See Note 15). Under the fair value based method, compensation cost is measured at the grant date based on the value of the award and is recognized over the service period. For stock options, fair value is determined using an option-pricing model that takes into account the stock price at the grant date, the exercise price, the expected life of the option, the volatility of the underlying stock, expected dividends and the current risk-free interest rate for the expected life of the option. However, as permitted under Korean GAAP, the Company excludes the volatility factor in estimating the value of its stock options granted before December 31, 2003, which results in measurement at minimum value. The total compensation cost of an option estimated at the grant date is not subsequently adjusted for changes in the price of the underlying stock or its volatility, the actual life of the option, dividends on the stock, or the risk-free interest rate. In addition, recognized compensation costs related to stock options that were expired, due to such stock options not being exercised within the exercisable period, are transferred to other capital surplus from capital adjustments.

o. Accounting for Leases

Lease agreements that include a bargain purchase option, result in the transfer of ownership at the end of the lease term, have a lease term equal to 75% or more of the estimated economic life of the leased property or where the present value of minimum lease payments equals or exceeds 90% of the fair value of the leased property, are accounted for as capital leases. All other leases are accounted for as operating leases.

Assets and liabilities related to capital leases are recorded as property and equipment and obligations under capital leases, respectively, and the related interest is calculated using the effective interest rate method and charged to other expenses. For operating leases, the future minimum lease payments are expensed ratably over the lease term while contingent rentals are expensed as incurred (See Note 10).

p. Research and Development Costs

The Company charges substantially all research and development costs to expense as incurred. The Company incurred internal research and development costs of ₩204,698 million and ₩203,741 million for the years ended December 31, 2005 and 2004, respectively, and external research and development costs of ₩68,526 million and ₩68,549 million for the years ended December 31, 2005 and 2004, respectively.

q. Accounting for Foreign Currency Transactions and Translation

Transactions denominated in foreign currencies are recorded in Korean won based on the prevailing rate of exchange at the dates of transactions. Monetary assets and liabilities denominated in foreign currency are translated into Korean won at the Base Rates announced by Seoul Money Brokerage Services, Ltd. on the balance sheet date, which were, for US dollars, ₩1,013.00=US\$1 and ₩1,043.80=US\$1 at December 31, 2005 and 2004, respectively. The resulting gains or losses arising from the translation or settlement of such assets and liabilities are included in current operations.

r. Derivative Instruments

The Company records rights and obligations arising from derivative instruments as assets and liabilities, which are stated at fair value. The gains and losses that result from the change in the fair value of derivative instruments are reported in current earnings. However, for derivative instruments designated as hedging the exposure of variable cash flows, the effective portions of the gains or losses on the hedging instruments are recorded as a separate component of shareholders' equity and credited/charged to operations at the time the hedged transactions affect earnings, and the ineffective portions of the gains or losses are credited/charged immediately to operations.

s. Revenue Recognitions

Operating revenue is recognized when cellular telephone communication services are provided.

Table of Contents

t. Income Taxes

Income tax expense is determined by adding or deducting the total income tax and surtaxes to be paid for the current period and the changes in deferred income tax assets and liabilities.

Deferred tax is recognized on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profits. Deferred tax liabilities are generally recognized for all taxable temporary differences with some exceptions and deferred tax assets are recognized to the extent that it is probable that taxable profits will be available against which the deductible temporary differences can be utilized. The carrying amount of deferred tax assets is reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the assets to be recovered. Effective January 1, 2005 deferred income tax assets and liabilities, which were presented on the balance sheet as a single non-current net amount through 2004, are classified into current and non-current based on the classification of related assets or liabilities for financial reporting purposes

Table of Contents

(note b) The Company recorded its investments in common stock of Powercomm Co., Ltd. at its fair value, which was estimated by an outside professional valuation company using the present value of expected future cash flows and the unrealized loss on valuation of investments amounting to ₩163,113 and ₩168,678 as of December 31, 2005 and 2004, respectively, were recorded as a capital adjustment.

(note c) Due to the impairment of the Company's investments in common stock of Real Telecom Co., Ltd., the Company recorded impairment loss of ₩5,981 million for the year ended December 31, 2004.

(note d) The Company recorded impairment loss of ₩14,438 million

for the year ended December 31, 2004 for its investments in common stock of Enterprise Networks Co., Ltd. as the investee filed for reorganization proceedings.

(note e) As a reasonable estimate of fair value could not be made, the investment is stated at acquisition cost. The investment in common stock of Eonex Technologies Inc. was reclassified to available-for-sale securities from equity securities accounted for using the equity method during 2003, as the Company's ownership in such investees decreased to less than 20% and the Company lost significant influence. Such securities were transferred to available-for-sale securities at the carrying amount valued using the equity method of accounting prior to the reclassification.

(note f) The investment in common stock of WiderThan Co., Ltd. was reclassified to equity securities accounted for using the equity method during 2005. Although the Company's ownership in WiderThan Co., Ltd. is less than 20%, the Company exercises significant influence on the selection of directors and the investee has significant transactions with the Company.

(note g) Due to the impairment of the Company's investments in common stock of TeleMerc.com and Mobilewelcom Co., Ltd., the Company recorded impairment losses on such investments of ₩1,793 million and ₩1,000 million for the years ended December 31, 2005 and 2004, respectively.

(note a) 4,542,000 shares of SKY Teletech Co., Ltd. (formerly SK Teletech Co., Ltd.) were sold to Curitel Communications, Inc. and the Company recorded a gain of ~~₩~~175,488 million during the 3rd quarter of 2005. SKY Teletech Co., Ltd was merged into Pantech Co., Ltd. during the 4th quarter of 2005 and the Company's ownership interest decreased from 29.1% to 22.7%. In addition, the difference between the Company's portion of the merged company's equity and the carrying amount at the date of merger of ~~₩~~269 million was recorded as a loss on disposal of investment assets.

(note b) The investment in common stock of WiderThan Co., Ltd. was reclassified to equity securities accounted for using the equity method during 2005. Although the Company's ownership in WiderThan Co., Ltd. is less than

20%, the Company exercises significant influences on the selection of directors and the investee has significant transactions with the Company.

(note c) In the first quarter of 2005, the Company incorporated SK Telecom USA Holdings, Inc. with an initial investment of US\$83 million in order to invest in and manage Helio, Inc., a joint venture company in the United States of America, which was established in order to provide wireless telecommunication services in the United States of America. In addition, the Company invested an additional US\$40 million in SK USA Holdings, Inc. during the 3rd quarter of 2005 (See Note 23 (b)).

(note d) In February 2005, the Company acquired 8,000,000 shares of IHQ, Inc., an entertainment management company, for ₩1,805 per share with an option to

purchase an additional 5,000,000 shares at the previously agreed upon price during the period from March 15, 2006 to April 30, 2006, in order to secure high-quality content for the Company's wireless internet services.

(note e) As allowed under Korean GAAP, investments in equity securities of SK Telecom Europe Limited and certain others were not accounted for using the equity method of accounting, as changes in the Company's portion of shareholders equity of such investees were not expected to be material.

All of the above bonds will be paid in full at maturity.

On May 27, 2004, the Company issued zero coupon convertible bonds with a maturity of five years in the principal amount of US\$329,450,000 for US\$324,923,469, with an initial conversion price of ₩235,625 per share of the Company's common stock which was greater than market value at the date of issuance. Subsequently, the initial conversion price was changed to ₩225,518 per share in accordance with antidilution protection. The Company may redeem their principal amount after 3 years from the issuance date if the market price exceeds 130% of the conversion price during a predetermined period. On the other hand, the bond holders may redeem their notes at 103.81% of the principal amount on May 27, 2007 (3 years from the issuance date). The conversion right may be exercised during the period from July 7, 2004 to May 13, 2009 and the number of common shares to be converted as of December 31, 2005 is 1,718,700 shares. Conversion of notes to common shares may be prohibited under the Telecommunications Law or other legal restrictions which restrains foreign governments, individuals and entities from owning more than 49% of the Company's voting stock, if this 49% ownership limitation is violated due to the exercise of conversion rights. In this case, the Company will pay a bond holder a cash settlement determined at the average price of one day after a holder exercises its conversion right or the weighted average price for the following five business days. The Company intends to sell treasury shares held in trust by the Company that corresponds to the number of shares of common stock that would have been delivered in the absence of the 49% foreign shareholding restrictions. The Company entered into an agreement with Credit Suisse First Boston International to reduce the effect of fluctuation with respect to cash settlement payments that may be more or less than the proceeds from sales of treasury shares held in trust. Unless

either previously redeemed or converted, the notes are redeemable at 106.43% of the principal amount at maturity.

Table of Contents**9. SUBSCRIPTION DEPOSITS**

The Company receives subscription deposits from customers of cellular services at the subscription date. The Company has no obligation to pay interest on subscription deposits but is required to return them to subscribers upon termination of the subscription contract.

a. Legal Reserve

The Korean Commercial Code requires the Company to appropriate as a legal reserve at least 10% of cash dividends for each accounting period until the reserve equals 50% of outstanding capital stock. The legal reserve may not be utilized for cash dividends, but may only be used to offset a future deficit, if any, or may be transferred to capital stock.

b. Reserve for Improvement of Financial Structure

The Financial Control Regulation for listed companies in Korea requires that at least 10% of net income (net of accumulated deficit), and an amount equal to net gain (net of related income taxes, if any) on the disposal of property and equipment be appropriated as a reserve for improvement of financial structure until the ratio of stockholders' equity to total assets reaches 30%. The reserve for improvement of financial structure may not be utilized for cash dividends, but may only be used to offset a future deficit, if any, or may be transferred to capital stock.

c. Reserves for Loss on Disposal of Treasury Stock and Research and Manpower Development

Reserves for loss on disposal of treasury stock and research and manpower development were appropriated in order to recognize certain tax deductible benefits through the early recognition of future expenditures for tax purposes. These reserves will be unappropriated from appropriated retained earnings in accordance with the relevant tax laws. Such unappropriation will be included in taxable income in the year of unappropriation.

15. STOCK OPTIONS

On March 17, 2000, March 16, 2001 and March 8, 2002, in accordance with the approval of its stockholders or its board of directors, the Company granted stock options to its management, representing 17,800 shares at an exercise price of ₩424,000 per share, 43,820 shares at an exercise price of ₩211,000 per share and 65,730 shares at an exercise price of ₩267,000 per share. The stock options will become exercisable after three years from the date of grant and shall be exercisable for two years from the first exercisable date. Upon exercise of stock options, the Company will issue its common stock. If the employees leave the Company within three years after the grant of stock options, such employees forfeit their unvested stock options awarded. During the year ended December 31, 2004, stock options representing 530 shares, of which total compensation cost was ₩3 million, were forfeited.

Table of Contents

The value of stock options granted is determined using the Black-Scholes option-pricing model, without considering the volatility factor in estimating the value of its stock options, as permitted under Korean GAAP. The following assumptions are used to estimate the fair value of options granted in 2000, 2001 and 2002; risk-free interest rate of 9.1% for 2000, 5.9% for 2001 and 6.2% for 2002; expected life of three years for 2000, 2001 and 2002; expected dividend of ₩500 per share for 2000, 2001 and 2002. Under these assumptions, total compensation cost, the recognized compensation cost (included in labor cost) for the years ended December 31, 2005 and 2004 and the outstanding balance of stock option in capital adjustment as of December 31, 2005 and 2004 are as follows (in millions of Korean won) :

Grant date	Total compensation cost	Recognized compensation cost		Stock option in capital adjustment	
		2005	2004	2005	2004
March 17, 2000 (note)	₩ 1,533	₩	₩	₩	₩ 1,533
