II. BUSINESS**1. Business Summary****A. Industry Status****(1) Characteristics of the Industry**

As of December 31, 2006, the number of domestic mobile phone subscribers reached 40.2 million and with a 83.2% penetration rate, and the Korean mobile communication market can be considered to have reached its maturation stage. However, considering the number of European countries with penetration rates exceeding 90%, additional future growth of the domestic market may be possible.

The Korean mobile communications market continues to improve with the help of advances in network-related technology evidenced by the world's first commercialization of CDMA2000 1x, CDMA 1x EV-DO, and the development of highly advanced handsets that enables the provision of convergence services for multimedia contents, mobile commerce, telematics, satellite DMB, digital home services and other related contents.

Table of Contents

(3) Market Characteristics

The Korean mobile communication market includes the entire population of Korea with mobile communication service needs, and almost every Korean is considered a potential user. With the market penetration rate reaching as high as 83.2% (as of the end of December 2006), the customer base is continuing to expand to include elementary school and pre-school children. Although demand to date has primarily been in the domestic market, as the business territory expands to overseas market, the size of overseas sales is expected to grow in the near future. Seasonal and economic fluctuations have much less impact on the Korean mobile communication market compared to other industries.

3. Contingent Liabilities**A. Material Legal Proceedings****(1) Action for Monetary Damages**

- a) Parties to the litigation: G.Mate Inc. (plaintiff) vs. the Company (defendant)
- b) Overview: G.Mate alleged that the Company had engaged G.Mate to develop and deliver certain PDA units, but that the Company subsequently refused to take delivery of such units. G.Mate sought approximately Won 4.5 billion in damages.
- c) Progress: An initial mediation process, which was requested by G.Mate, was terminated in January 2007. G.Mate commenced a lawsuit, which is currently pending at the Seoul Central District Court.
- d) Impact on business: In the event that the case is decided against the Company, there is a risk that the Company will be obligated to pay up to Won 4.5 billion in damages. But as G.Mate, to date, has been unable to produce

detailed evidence in support of its claim and calculation of requested damages, the Company expects that the likelihood of a ruling against the Company to be low and the estimated impact on the Company's operations and finances should not be large; however, the actual results of the litigation and actual impact on the Company's operations and finances may differ depending on future events.

(2) Action Seeking to Vacate Judgment of the Intellectual Property Tribunal Nullifying Patent Registration Related to Caller Ring Service

- a) Parties to the litigation: Park Won Sup (plaintiff) vs. the Company (defendant)

- b) Overview: Mr. Park Won Sup (the representative director of Ad Ring Systems Co., Ltd.) claimed that certain technology the Company uses to provide the caller ring service infringed upon his patent rights, and the Company sought an administrative action to nullify Mr. Park's patent rights in the Intellectual Property Tribunal. The Tribunal upheld the nullification of Mr. Park's patent rights and Mr. Park appealed the decision.

Table of Contents

- c) Progress: The Patent Court dismissed plaintiff's claim (September 2005), after which the plaintiff appealed.
- d) Impact on business: In the event that the case is decided against the Company, there is a risk of material future royalty obligations. However, given the progress of the proceedings, the estimated impact should not be large; however, the actual impact may differ depending on future events.
- (3) Actions for the Cancellation of the International Registration for Satellite Network
 - a) Parties to the litigation: Korea Multinet Co., Ltd. (Korea Multinet) vs. the Ministry of Information and Communication (MIC ; the Company is participating in the action on behalf of MIC)
 - b) Overview: Korea Multinet brought an administrative action against MIC to cancel the Company's international satellite frequency registration related to the satellite DMB business.
 - c) Progress: The trial court found for the defendant and the appellate court affirmed the judgment of the trial court (June 30, 2004). The plaintiff appealed and the case is currently pending at the Supreme Court.
 - d) Impact on business: Given the progress of the proceedings, no significant impact on the Company's business is expected; however, the actual impact may differ depending on future events.
- (4) Actions for the Cancellation of Key Communication Business Licenses and Allotment of Satellite DMB Frequency
 - a) Parties to the litigation: Korea Multinet vs. MIC (the Company is participating in the action on behalf of MIC)
 - b) Overview: Korea Multinet brought an administrative action against MIC to cancel the Company's key communication business licenses and the allotment of the Company's satellite DMB frequency.
 - c) Progress: The Seoul Administrative Court dismissed the claim in July 2006, and Korea Multinet has appealed to the Seoul Appellate Court where the lawsuit is currently pending.
 - d) Impact on business: The Company plans to provide full support to MIC in the action although no significant impact to the Company's business is expected; however, the actual impact may differ depending on future events.

Independent Auditors Report

English Translation of a Report Originally Issued in Korean

To the Stockholders and Board of Directors of

SK Telecom Co., Ltd.

We have audited the accompanying non-consolidated balance sheets of SK Telecom Co., Ltd. (the Company) as of December 31, 2006 and 2005, and the related non-consolidated statements of income, appropriations of retained earnings, and cash flows for the years then ended (all expressed in Korean won). These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the Republic of Korea. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such financial statements referred to above presents fairly, in all material respects, the financial position of the Company as of December 31, 2006 and 2005, and the results of its operations, the appropriations of its retained earnings and its cash flows for the years then ended, in conformity with accounting principles generally accepted in the Republic of Korea.

Our audits also comprehended the translation of the Korean won amounts into U.S. dollar amounts and, in our opinion, such translation has been made in conformity with the basis stated in Note 2(a). Such U.S. dollar amounts are presented solely for the convenience of readers outside of the Republic of Korea.

Accounting principles and auditing standards and their application in practice vary among countries. The accompanying financial statements are not intended to present the financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in countries other than the Republic of Korea. In addition, the procedures and practices utilized in the Republic of Korea to audit such financial statements may differ from those generally accepted and applied in other countries. Accordingly, this report and the accompanying financial statements are for use by those knowledgeable about Korean accounting procedures and auditing standards and their application in practice.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying non-consolidated financial statements of the Company have been prepared in accordance with Korean Financial Accounting Standards and Statements of Korean Accounting Standards (SKAS) No. 1 through No. 20 (except for No. 11 and No. 14). The accompanying non-consolidated financial statements were approved by the Company's board of directors on February 13, 2007. Significant accounting policies followed in preparing the accompanying non-consolidated financial statements are summarized as follows.

a. Basis of Presentation

The accompanying non-consolidated statutory financial statements have been prepared in the Korean language (Hangul) in conformity with the accounting principles generally accepted in the Republic of Korea (Korean GAAP). Certain accounting principles applied by the Company that conform with financial accounting standards and accounting principles in the Republic of Korea may not conform with accounting principles generally accepted in other countries. Accordingly, these financial statements are intended for use by those who are informed about Korean accounting principles and practices. The accompanying non-consolidated financial statements have been condensed, restructured and translated into English with certain expanded descriptions from the Korean language financial statements. Certain information included in the Korean language financial statements, but not required for a fair presentation of the Company's financial position, results of operations or cash flows, is not presented in the accompanying non-consolidated financial statements.

The official accounting records of the Company are maintained and expressed in Korean won, the currency of the country in which the Company is incorporated and operates. The translation of Korean won amounts into U.S. dollar amounts are included solely for the convenience of readers outside of the Republic of Korea and have been made at the rate of ₩930.0 to US\$1, the Noon Buying Rate in the City of New York for cable transfers in Korean won as certified for customs purposes by the Federal Reserve Bank of New York on the last business day of the year ended December 31, 2006. Such translations into U.S. dollars should not be construed as representations that the Korean won amounts could be converted into U.S. dollars at the above or any other

rate.

b. Adoptions of New Statements of Korea Accounting Standards (SKAS)

On January 1, 2006, the Company adopted SKAS No. 18 through No. 20, which are effective from the fiscal year beginning after December 31, 2005. Such adoption of SKASs did not have an effect on the non-consolidated financial position of the Company as of December 31, 2006 and 2005 or the non-consolidated ordinary income and net income of the Company for the years then ended.

c. Cash Equivalents

Cash equivalents are highly liquid investments and short term financial instruments, which are readily convertible without significant transaction cost, do not have significant risk of changes in interest rates, and with original maturities of three months or less.

d. Allowance for Doubtful Accounts

Allowance for doubtful accounts is provided based on the estimated collectibility of individual accounts and historical bad debt experience.

e. Inventories

Inventories, which consist mainly of replacement units for wireless telecommunication facilities and supplies for sales promotion, are stated at the lower of cost or market value, with cost determined using the moving average method. The Company maintains perpetual inventory systems, which are adjusted to physical inventory counts performed at fiscal year end. When the market value of inventories is less than the acquisition cost, the carrying amount is reduced to the market value and any difference is charged to current operations as operating expenses. There was no such loss for the years ended December 31, 2006 and 2005.

f. Securities (excluding securities accounted for using the equity method of accounting)

Debt and equity securities are initially recorded at their acquisition costs (fair value of considerations paid) including incidental cost incurred in connection with acquisition of the related securities and classified into trading, available-for-sale and held-to-maturity securities depending on the acquisition purpose and nature.

Trading securities are stated at fair value with gains or losses on valuation reflected in current operations.

Securities classified as available-for-sale are reported at fair value. Unrealized gains or losses on valuation of available-for-sale securities are included in capital adjustments and the unrealized gains or losses are reflected in net income when the securities are sold or if impairment is other than temporary. Equity securities are stated at acquisition cost if fair value cannot be reliably measured. If the declines in the fair value of individual available-for-sale securities below their acquisition or amortized cost are other than temporary and there is objective evidence of impairment, write-downs of the individual securities are recorded to reduce the carrying value to their fair value. The related write-downs are recorded in current operations as a loss on impairment of investment securities.

Held-to-maturity securities are presented at acquisition cost after premiums or discounts are amortized or accreted, respectively. The Company recognizes write-downs resulting from other-than-temporary declines in the fair value below its book value on the balance sheet date if there is objective evidence of impairment. The related write-downs are recorded in current operations as a loss on impairment of investment securities.

Table of Contents

Trading securities are presented in the current asset section of the balance sheet, and available-for-sales and held-to-maturity securities are presented in the current asset section of the balance sheet if their maturities are within one year; otherwise such securities are recorded in the non-current section of the balance sheet.

g. Equity Securities Accounted for Using the Equity Method

Investment securities of affiliated companies, in which the Company has the ability to exercise significant influence, are carried using the equity method of accounting, whereby the Company's initial investment is recorded at cost and the carrying value is subsequently increased or decreased to reflect the Company's portion of stockholders' equity of the investee. Differences between the purchase cost and the acquisition date net asset fair value of the investee are amortized over 5 to 20 years using the straight-line method. When applying the equity method of accounting, unrealized inter-company gains and losses are eliminated (See Note 4). In addition, the Company provides for additional losses for those investments accounted for using the equity method that are reduced to zero to the extent that the Company has other investment assets related to the equity method investees.

When the Company's share of equity interest in the equity method investees increases as a result of capital transactions of the investees with (or without) consideration, the increase in the Company's proportionate shares in the investees are treated as goodwill or negative goodwill and when the Company's share of equity interest in the equity method investees decreases as a result of capital transactions of the investees with (or without) consideration, the decrease in the Company's proportionate shares in the investees are accounted for as gain or loss on disposal. However, if equity method investees are subsidiaries, such differences in the Company's proportionate shares in the investees are accounted for as capital adjustments of affiliates in the Company's shareholders' equity.

In translating the foreign currency statements of the Company's investees operating overseas, the Company applies (a) the foreign exchange rate at the balance sheet date to the investee's balance sheet items (except historical rates applied for shareholders' equity), and (b) the average foreign exchange rate for the current period for income statements items. After translating the balance sheet and income statements items as noted above, the Company's portion of the amount after deducting the translated total liabilities from translated total assets and equity is recorded as capital adjustment of affiliates in the Company's shareholders' equity.

h. Property and Equipment

Property and equipment are stated at cost. Major renewals and betterments, which prolong the useful life or enhance the value of assets, are capitalized. Expenditures for maintenance and repairs are charged to expense as incurred.

Depreciation is computed using the declining balance method (except for buildings and structures acquired on or after January 1, 1995 which are depreciated using the straight-line method) over the estimated useful lives (4 ~ 30 years) of the related assets (See Note 6).

Interest expense and other financing charges for borrowings related to the manufacture or construction of property and equipment are charged to current operations as incurred.

Table of Contents

i. Intangible Assets

Intangible assets are recorded at cost, less amortization computed using the straight-line method over 5 to 20 years. The amortization for the years ended December 31, 2006 and 2005 were ₩366,516 million and ₩329,360 million, respectively.

With its application for a license to provide IMT 2000 service, the Company has a commitment to pay ₩1,300,000 million to the Ministry of Information Communication (MIC) → ₩650,000 million was paid in March 2001 by SK IMT Co., Ltd. (a former subsidiary of the Company), which was merged into the Company on May 1, 2003, and the remainder is required to be paid over 10 years with an annual interest rate equal to the 3-year-maturity government bond rate minus 0.75% (4.04% as of December 31, 2006). The future payment obligations are ₩90,000 million (related present value discount: ₩557 million) in 2007, ₩110,000 million in 2008, ₩130,000 million in 2009, ₩150,000 million in 2010 and ₩170,000 million in 2011. On December 4, 2001, SK IMT Co., Ltd. received the IMT 2000 license from MIC, and recorded the total license cost as an intangible asset. As a result of the merger with SK IMT Co., Ltd., the Company acquired such IMT license of ₩1,259,253 million and assumed the related long-term payable with a principal amount of ₩650,000 million on May 1, 2003 (the date of merger). Amortization of the IMT license commenced when the Company started its commercial IMT 2000 service in December 2003, using the straight-line method over the estimated useful life of the IMT license which expires in December 2016. As of December 31, 2006, the present value discount related to the current portion and long-term portion of payments to be made to MIC totaled ₩557 million and ₩42,461 million, respectively.

j. Impairment Losses

When the recoverable amount of assets (that are not recorded at fair value) including investment assets (except for trading and available for sale investments in listed companies), property and equipment, and intangible assets is significantly less than the carrying value due to obsolescence, physical damage, decline in market value or other causes, the carrying value is reduced to the recoverable amount and any difference is charged to current operation as an impairment loss. The Company recorded such impairment loss of ₩ 6,866 million and nil during the years ended December 31, 2006 and 2005, respectively.

k. Convertible Bonds

The proceeds from issuance of convertible bonds are allocated between the conversion rights and the debt issued; and the portion allocable to the conversion rights is accounted for as capital surplus with a corresponding conversion right adjustment deducted from the related bonds. Such conversion right adjustment is amortized to interest expense using the effective interest rate method over the redemption period of the convertible bonds. The portion allocable to the conversion rights is measured by deducting the present value of the debt at time of issuance from the gross proceeds from issuance of convertible bonds, with the present value of the debt being computed by discounting the expected future cash flows (including call premium, if any) using the effective interest rate applied to ordinary or straight debt of the Company at the issue date.

l. Discounts on Bonds

Discounts on bonds are amortized to interest expense using the effective interest rate method over the redemption period of the bonds.

Table of Contents

m. Valuation of Long-term Payables

Long-term payables resulting from long-term installment transactions are stated at the present value of the expected future cash flows. Imputed interest amounts are recorded in present value discount accounts which are deducted directly from the related nominal payable balances. Such imputed interest is included in operations using the effective interest rate method over the redemption period.

n. Provisions, Contingent Liabilities and Contingent Assets

The Company recognizes a provision when i) it has a present obligation as a result of a past event, ii) it is probable that a disbursement of economic resources will be required to settle the obligation, and iii) a reliable estimate can be made of the amount of the obligation (See Note 23).

The Company does not recognize the following contingent obligations as liabilities:

Possible obligations related to past events, for which the existence of a liability can only be confirmed upon occurrence of uncertain future event or events outside the control of the Company.

Present obligations arising out of past events or transactions, for which i) a disbursement of economic resources to fulfill such obligations is not probable or ii) a disbursement of economic resources is probable, but the related amount cannot be reasonably estimated.

In addition, the Company does not recognize potential assets related to past events or transactions, for which the existence of an asset or future benefit can only be confirmed upon occurrence of uncertain future event or events outside the control of the Company.

o. Accrued Severance Indemnities

In accordance with the Company's policy, all employees with more than one year of service are entitled to receive severance indemnities upon termination of their employment based on length of service and rate of pay. Accruals for severance indemnities are recorded to approximate the amount required to be paid if all employees were to terminate at the balance sheet date.

The Company has deposits with insurance companies to fund the portion of the employees' severance indemnities which is in excess of the tax deductible amount allowed under the Corporate Income Tax Law, in order to take advantage of the additional tax deductibility for such funding. Such deposits with outside insurance companies, where the beneficiaries are the Company's employees, totaling ₩ 23,895 million and ₩ 187,103 million as of December 31, 2006 and 2005, respectively, are deducted from accrued severance indemnities.

In accordance with the Korean National Pension Fund Law, the Company transferred a portion of its accrued severance indemnities to the National Pension Fund through March 1999. Such transfers, amounting to ₩ 50 million and ₩ 5,172 million as of December 31, 2006 and 2005, respectively, are deducted from accrued severance indemnities.

Actual payment of severance indemnities amounted to ₩ 259,870 million and ₩ 21,985 million for the years ended December 31, 2006 and 2005, respectively.

Effective March 31, 2006, the Company changed its policy for the severance indemnities applicable to those employees who joined the Company before or on December 31, 2002 from cumulative method,

Table of Contents

where employees are entitled to get paid more than one month of salary each year depending on the length of service, to simple multiplier method, where employees are paid one month of salary each year regardless of their service period in accordance with the resolution of the Company's joint labor-management conference held on March 16, 2006. As a result of such policy change, the Company has decided to distribute early settlements to those eligible employees on their accumulated severance indemnities as of March 31, 2006 on a mandatory basis. In addition, the Company paid the additional bonuses of ₩ 125,890 million for those employees who received the mandatory distribution for their early settlement as compensation for those employees. The Company recorded such compensation costs as special severance indemnities in other expenses for the year ended December 31, 2006. In addition, the Company executed the early retirement program and the related special bonus of ₩ 18,131 million were paid to eligible employees and accounted for as special severance indemnities in other expenses for the year ended December 31, 2006.

p. Accounting for Employee Stock Option Compensation Plan

The Company adopted the fair value based method of accounting for its employee stock option compensation plan (See Note 16). Under the fair value based method, compensation cost is measured at the grant date based on the value of the award and is recognized over the service period. For stock options, fair value is determined using an option-pricing model that takes into account the stock price at the grant date, the exercise price, the expected life of the option, the volatility of the underlying stock, expected dividends and the current risk-free interest rate for the expected life of the option. However, as permitted under Korean GAAP, the Company excludes the volatility factor in estimating the value of its stock options granted before December 31, 2003, which results in measurement at minimum value. The total compensation cost of an option estimated at the grant date is not subsequently adjusted for changes in the price of the underlying stock or its volatility, the actual life of the option, dividends on the stock, or the risk-free interest rate. In addition, recognized compensation costs related to stock options expired due to such stock options not being exercised within the exercisable period are transferred to other capital surplus from capital adjustments (See Note 13).

q. Accounting for Leases

Lease agreements that include a bargain purchase option, result in the transfer of ownership at the end of the lease term, have a lease term equal to 75% or more of the estimated economic life of the leased property or where the present value of minimum lease payments equals or exceeds 90% of the fair value of the leased property, are accounted for as capital leases. All other leases are accounted for as operating leases.

Assets and liabilities related to capital leases are recorded as property and equipment and obligations under capital leases, respectively, and the related interest is calculated using the effective interest rate method and charged to other expenses. For operating leases, the future minimum lease payments are expensed ratably over the lease term while contingent rentals are expensed as incurred (See Note 11).

r. Research and Development Costs

The Company charges substantially all research and development costs to expense as incurred. The Company incurred internal research and development costs of ₩211,752 million and ₩204,698 million for the years ended December 31, 2006 and 2005, respectively. In addition, external research and development costs were ₩66,055 million and ₩68,526 million for the years ended December 31, 2006 and 2005, respectively.

Table of Contents

s. Accounting for Foreign Currency Transactions and Translation

Transactions denominated in foreign currencies are recorded in Korean won based on the prevailing rate of exchange at the dates of transactions. Monetary assets and liabilities denominated in foreign currency are translated into Korean won at the Base Rates announced by Seoul Money Brokerage Services, Ltd. on the balance sheet date, which were ₩929.60 and ₩1,013.00 to US\$1.00 at December 31, 2006 and 2005, respectively. The resulting gains or losses arising from the translation or settlement of such assets and liabilities are included in current operations.

t. Derivative Instruments

The Company records rights and obligations arising from derivative instruments as assets and liabilities, which are stated at fair value. The gains and losses that result from the change in the fair value of derivative instruments are reported in current earnings. However, for derivative instruments designated as hedging the exposure of variable cash flows, the effective portions of the gains or losses on the hedging instruments are recorded as a separate component of stockholders' equity and credited/charged to operations at the time the hedged transactions affect earnings, and the ineffective portions of the gains or losses are credited/charged immediately to operations.

u. Revenue Recognitions

Operating revenue is recognized when cellular telephone communication services are provided.

v. Income Taxes

Income tax expense is determined by adding or deducting the total income tax and surtaxes to be paid for the current period and the changes in deferred income tax assets and liabilities.

Deferred tax is recognized on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profits. Deferred tax liabilities are generally recognized for all taxable temporary differences with some exceptions and deferred tax assets are recognized to the extent that it is probable that taxable profits will be available against which the deductible temporary differences can be utilized. The carrying amount of deferred tax assets is reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the assets to be recovered. Deferred income tax assets and liabilities are classified into current and non-current based on the classification of related assets or liabilities for financial reporting purposes (See Note 17).

w. Handset Subsidiaries to Long-term Mobile Subscribers

Effective March 27, 2006, the Telecommunication Law of Korea was revised to allow wireless carriers to provide handset subsidiaries to customers who have maintained their wireless account with the same carrier for 18 months or longer. The Company commenced its handset subsidy program on the effective date of the revised Telecommunications Law and included a clause in the service contract which allows the Company to change the terms of its subsidy program, including the Company's ability to terminate the program at any time after a thirty day notice to its customers. The Company charges such handset subsidiaries to commissions paid as the related payments are made.

(note c) The convertible bonds of Real Telecom Corp. with a principal amount of ₩10,656 million can be converted into 371,018 shares of common stock of Real Telecom Corp. at ₩28,721 per share during the period from September 29, 2004 to March 28, 2007. Due to the impairment of such bonds, the Company recorded an impairment loss of ₩10,656 million prior to December 31, 2004.

(note d) The return on investments in such beneficiary certificates was recorded as interest income.

(note e) On July 5, 2006, the Company purchased zero coupon convertible bonds of China Unicom Ltd. with maturity of three years and principal amount of US\$1,000,000,000 for US\$1,000,000,000. Such convertible bonds have initial conversion price of US\$1.111426 per share of common stock of China Unicom Ltd. The bond holders may redeem their notes at 102.82% of the principal amount on July 5, 2008 (2 years from the issuance date). The conversion right may be exercised during the period from July 5, 2007 to June 29, 2009 and the number of common shares to be converted as of December 31, 2006 is 899,745,075 shares. Unless either previously redeemed or converted, the notes are redeemable at 104.26% of the principal amount at maturity. The Company recorded the convertible bonds of China Unicom Ltd. at its fair value, which was estimated by an outside professional valuation company using Cox, Ross & Rubinstein Model (1979) and discount rate of 5.9138%. If all such bonds are converted, the Company's equity interest in China Unicom Ltd. will be 6.67%.

(note f) On October 11, 2006, the Company purchased convertible bonds of Eonex Technologies, Inc at face value of ₩1,000 million. Such convertible bonds can be converted into 7,142 shares of common stock of Eonex Technologies, Inc. at ₩140,000 per share during the period from April 1, 2007 to October 11, 2008. - (note a) Investments were recorded using the equity method of accounting based on unaudited and unreviewed financial statements as of and for the year ended December 31, 2006. In order to verify the reliability of such unaudited and unreviewed financial statements, the Company has performed the following procedures and found no significant errors:
- i) obtained the signature from the chief executive officer of the equity method investee asserting that the unaudited and unreviewed financial statements are accurate
 - ii) checked whether the major transactions identified by the Company, including public disclosures, were appropriately reflected in the unaudited and unreviewed financial statements
 - iii) performed an analytical review on the unaudited and unreviewed financial statements
- (note b) Investment was fully liquidated due to dissolution of SK Capital Co., Ltd. for the year ended December 31, 2006.
- (note c) The Company received dividends from SK C&C Co., Ltd. and Skytel Co., Ltd. and the corresponding amount was deducted from the carrying amount of equity method securities.
- (note d) The Company sold out all of investments in equity securities of WiderThan Co., Ltd. for the year ended December 31, 2006 and recognized gains on disposal of investment in equity securities of ₩20,456 million.
- (note e) Other increase in investments in equity securities of IHQ, Inc. represent gains on disposal of investments in equity securities, which have resulted from the dilution of the Company's ownership as a result of investees sale of their unissued shares to third parties.
- (note f) Other increase in investments in Korea IT Fund is the carrying amount transferred from available-for-sale equity securities.
- (note g) Investment was fully liquidated due to dissolution of SKT-HP Ventures, LLC for the year ended December 31, 2006.
- (note h) Investment in equity securities of Pantech Co., Ltd. was recorded using the only estimated net loss provided by Pantech Co., Ltd. because the investee's financial statements were not determined as of December 31, 2006 as due diligence procedures of credit banks for debt restructuring were in progress.

All of the above bonds will be paid in full at maturity.

On May 27, 2004, the Company issued zero coupon convertible bonds with a maturity of five years in the principal amount of US\$329,450,000 for US\$324,923,469, with an initial conversion price of ₩235,625 per share of the Company's common stock, which was greater than market value at the date of issuance. Subsequently, the initial conversion price was changed to ₩217,062 per share in accordance with anti-dilution protection. The Company may redeem their principal amount after 3 years from the issuance date if the market price exceeds 130% of the conversion price during a predetermined period. On the other hand, the bond holders may redeem their notes at 103.81% of the principal amount on May 27, 2007 (3 years from the issuance date). The conversion right may be exercised during the period from July 7, 2004 to May 13, 2009 and the number of common shares to be converted as of December 31, 2006 is 1,649,014 shares. During the year ended December 31, 2006, the conversion price was changed from ₩218,098 to ₩217,062 and the number of shares to be converted was changed from 1,677,812 shares to 1,685,816 shares due to the payment of interim dividends in accordance with the resolution of the Company's board of directors dated July 28, 2006. The number of common shares to be converted decreased to 1,649,014 shares as the convertible bonds with a principal amount of US\$6,790,000 were converted into 36,802 shares of treasury stock after such interim dividends were made.

Conversion of notes to common shares may be prohibited under the Telecommunications Law or other legal restrictions which restrains foreign governments, individuals and entities from owning more than 49% of the Company's voting stock, if this 49% ownership limitation is violated due to the exercise of conversion rights. In this case, the Company will pay a bond holder a cash settlement determined at the average price of one day after a holder exercises its conversion right or the weighted average price for the following five business days. The Company intends to sell treasury shares held in trust by the Company that corresponds to the number of shares of common stock that would have been delivered in the absence of the 49% foreign shareholding restrictions. The Company entered into an agreement with Credit Suisse First Boston International to reduce the effect of fluctuation with respect to cash settlement payments that may be more or less than the proceeds from sales of treasury shares held in trust. Unless either previously redeemed or converted, the notes are redeemable at 106.43% of the principal amount at maturity. During the year ended December 31, 2006, the convertible bonds with a principal amount of US\$25,210,000 were converted into 136,613 shares of treasury stock (See note 15), and the principal amount of the convertible bonds decreased from US\$329,450,000 to US\$304,240,000. In addition, the consideration for conversion right (capital surplus) decreased by ₩3,733 million (net of tax effect of ₩1,416 million) as a result of this conversion.

9. LONG-TERM BORROWINGS

Long-term borrowings as of December 31, 2006 and 2005 are as follows (In millions of Korean won and thousands of U.S. dollars):

a. Legal Reserve

The Korean Commercial Code requires the Company to appropriate as a legal reserve at least 10% of cash dividends for each accounting period until the reserve equals 50% of outstanding capital stock. The legal reserve may not be utilized for cash dividends, but may only be used to offset a future deficit, if any, or may be transferred to capital stock.

b. Reserve for Improvement of Financial Structure

The Financial Control Regulation for listed companies in Korea requires that at least 10% of net income (net of accumulated deficit), and an amount equal to net gain (net of related income taxes, if any) on the disposal of property and equipment be appropriated as a reserve for improvement of financial structure until the ratio of stockholders' equity to total assets reaches 30%. The reserve for improvement of financial structure may not be utilized for cash dividends, but may only be used to offset a future deficit, if any, or may be transferred to capital stock.

Table of Contents

c. Reserves for Loss on Disposal of Treasury Stock and Research and Manpower Development

Reserves for loss on disposal of treasury stock and research and manpower development were appropriated in order to recognize certain tax deductible benefits through the early recognition of future expenditures for tax purposes. These reserves will be unappropriated from appropriated retained earnings in accordance with the relevant tax laws. Such unappropriation will be included in taxable income in the year of unappropriation.

Upon issuances of stock dividends and new common stock, and the merger with Shinsegi Telecomm, Inc. and SK IMT Co., Ltd., the Company acquired fractional shares totaling 77,970 shares for ₩6,110 million through 2005. In addition, the Company acquired 8,584,445 shares of treasury stock in the market or through the trust funds for ₩2,040,995 million through 2005 in order to stabilize the market price of its stock. In addition, during the year ended December 31, 2006, the convertible bonds with a principal amount of US\$25,210,000 were converted into 136,163 shares of common stock. Such conversion was settled by the Company by using its treasury stock with carrying value totaling ₩32,178 million, which resulted in loss on disposal of treasury stock of ₩7,887 million.

On August 17, 2006, the Company retired 491,000 shares of treasury stock, which were acquired by the Company during the period from August 1, 2006 through August 14, 2006 for ₩92,518 million in accordance with a resolution of the board of directors dated July 28, 2006.

On September 29, 2006, the Company retired 592,000 shares of treasury stock, which were acquired by the Company during the period from September 4, 2006 through September 27, 2006 for ₩116,559 million in accordance with a resolution of the board of directors dated August 31, 2006.

In connection with the retired treasury stocks discussed above, the Company reduced its retained earnings before appropriations by ₩209,077 million in accordance with Korean Commercial law.

16. STOCK OPTIONS

On March 17, 2000, March 16, 2001 and March 8, 2002, in accordance with the approval of its stockholders or its board of directors, the Company granted stock options to its management, representing 17,800 shares at an exercise price of ₩424,000 per share, 43,820 shares at an exercise price of ₩211,000 per share and 65,730 shares at an exercise price of ₩267,000 per share. The stock options will become exercisable after three years from the date of grant and shall be exercisable for two years from the first exercisable date. Upon exercise of stock options, the Company will issue its common stock. If the employees leave the Company within three years after the grant of stock options, such employees forfeit their unvested stock options awarded. Stock options representing 530 shares for which total compensation cost was ₩3 million were forfeited during the year ended December 31, 2004.

The value of stock options granted is determined using the Black-Scholes option-pricing model, without considering the volatility factor in estimating the value of its stock options, as permitted under Korean GAAP. The following assumptions are used to estimate the fair value of options granted in 2000, 2001 and 2002; risk-free interest rate of 9.1% for 2000, 5.9% for 2001 and 6.2% for 2002; expected life of three years for 2000, 2001 and 2002; expected dividend of ₩500 per share for 2000, 2001 and 2002. Under these assumptions, total compensation cost, the recognized compensation cost (included in labor cost) for the years ended December 31, 2006 and 2005 and the outstanding balance of stock option in capital adjustment as of December 31, 2006 and 2005 are as follows (in millions of Korean won) :

Table of Contents

Grant date	Total Compensation cost	Recognized compensation cost		Stock options in capital adjustment	
		2006	2005	December 31, 2006	December 31, 2005
March 17, 2000 (note a)	₩ 1,533	₩	₩	₩	₩
March 16, 2001 (note b)	234				234

	₩ 5,013	₩	₩ 180	₩ 3,246	₩ 3,480

(note a) During the year ended December 31, 2005, the exercisable period expired for stock options representing 17,800 shares, for which the Company had recognized compensation cost of ₩1,533 million. The related capital adjustment of ₩1,533 million was transferred to capital surplus.

(note b) During the year ended December 31, 2006, the exercisable period expired for stock options representing 43,820 shares, for which the Company had recognized compensation cost of ₩234 million. The related capital adjustment of ₩234 million was transferred to capital surplus.

If the Company had not excluded the volatility factor (expected volatility of 66.8% for options granted in 2000, 67.5% for options granted in 2001, and 63.0% for options granted in 2002), the pro forma total compensation cost would be ₩15,967 million (₩3,738 million for options granted in 2000, ₩3,617 million for options granted in 2001 and ₩8,613 million for options granted in 2002) and the recognized compensation cost for the year ended December 31, 2006 would be nil, and the pro forma net income and net income per common share for the year ended December 31, 2006, 2005, and 2004 are as follows:

	2006	2005	2004

(note a) Through 2004, the tax effects of temporary differences, which are unlikely to be realized, and temporary differences directly adjusted to capital surplus or capital adjustments, such as net unrealized loss on valuation of long-term investment securities, were excluded in determining the net deferred tax assets or liabilities. However, effective January 1, 2005, pursuant to adoption of SKAS No. 16, Income Taxes, temporary differences are presented on a gross basis, including temporary differences which are unlikely to be realized. In addition, tax effects of temporary differences related to adjustments made directly to capital surplus or capital adjustments are included in determining the net deferred tax assets or liabilities.

(note b) These changes include adjustment to reflect the change in accumulated temporary differences based on the prior year tax return.

(note c) Effective January 1, 2005, pursuant to adoption of SAKS No. 16 deferred tax assets and liabilities are separated into current and non-current amounts based on the classification of related assets or liabilities for financial reporting purpose. The tax rate used in measuring deferred tax assets and liabilities is 27.5%.

Independent Accountant's Review Report
on Internal Accounting Control System (IACS)
English Translation of a Report Originally Issued in Korean

To the Representative Director of
SK Telecom Co., Ltd.

We have reviewed the accompanying Report on the Management's Assessment of IACS (the Management's Report) of SK Telecom Co., Ltd. (the Company) as of December 31, 2006. The Management's Report, and the design and operation of IACS are the responsibility of the Company's management. Our responsibility is to review the Management's Report and issue a review report based on our procedures. The Company's management stated in the accompanying Management's Report that based on the assessment of the IACS as of December 31, 2006, the Company's IACS has been appropriately designed and is operating effectively as of December 31, 2006, in all material respects, in accordance with the IACS Framework established by the Korea Listed Companies Association.

We conducted our review in accordance with the IACS Review Standards established by the Korean Institute of Certified Public Accountants. Those standards require that we plan and perform a review, objective of which is to obtain a lower level of assurance than an audit, of the Management's Report in all material respects. A review includes obtaining an understanding of a company's IACS and making inquiries regarding the Management's Report and, when deemed necessary, performing a limited inspection of underlying documents and other limited procedures.

A company's IACS represents internal accounting policies and a system to manage and operate such policies to provide reasonable assurance regarding the reliability of financial statements prepared, in accordance with accounting principles generally accepted in the Republic of Korea, for the purpose of preparing and disclosing reliable accounting information. Because of its inherent limitations, IACS may not prevent or detect a material misstatement of the financial statements. Also, projections of any evaluation of effectiveness of IACS to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Based on our review, nothing has come to our attention that causes us to believe that the Management's Report referred to above is not fairly stated, in all material respects, in accordance with the IACS Framework established by the Korea Listed Companies Association.

Our review is based on the Company's IACS as of December 31, 2006, and we did not review its IACS subsequent to December 31, 2006. This report has been prepared pursuant to the Acts on External Audit for Stock Companies in the Republic of Korea and may not be appropriate for other purposes or for other users.

Report on the Assessment of
Internal Accounting Control System (IACS)
English Translation of a Report Originally Issued in Korean

To the Board of Directors and Auditor (Audit Committee) of
SK Telecom Co., Ltd.

I, as the Internal Accounting Control Officer (IACO) of SK Telecom Co., Ltd. (the Company), assessed the status of the design and operation of the Company s IACS for the year ended December 31, 2006.

The Company s management including IACO is responsible for designing and operating IACS. I, as the IACO, assessed whether the IACS has been appropriately designed and is effectively operating to prevent and detect any error or fraud which may cause any misstatement of the financial statements, for the purpose of preparing and disclosing reliable financial statements. I, as the IACO, applied the IACS Framework established by the Korea Listed Companies Association for the assessment of design and operation of the IACS.

Based on the assessment of the IACS, the Company s IACS has been appropriately designed and is operating effectively as of December 31, 2006, in all material respects, in accordance with the IACS Framework.
