

Edgar Filing: CONVERIUM HOLDING AG - Form 6-K

- o Based on an internal review Converium plans to restate its financial accounts and delays third quarter results release
- o Restatement will not reduce shareholders' equity
- o Announcement of restated financial results anticipated by mid-December
- o Converium records positive developments in the third quarter

Background and reasons for the restatement

As widely reported, investigations of the insurance and reinsurance industry and non-traditional insurance and reinsurance products are being conducted by regulators and governmental authorities in both the United States and Europe. Against this backdrop, Converium has launched an extensive internal review of certain reinsurance transactions and engaged outside counsel to assist the Company. Converium now reports substantial progress in this internal review.

The Company's decision to restate its accounts is based on the information and findings identified during the internal review. The primary driver of the restatement is to correct the accounting treatment of certain transactions, primarily ceded reinsurance, replacing reinsurance accounting by deposit accounting.

Expected impact of the restatement

Based on the findings of the review to date, the Company estimates that the cumulative impact of the restatement should not reduce unaudited shareholders' equity of US\$ 1.65 billion reported for June 30, 2005. This estimate represents Converium's current assessment of the cumulative impact of the restatement.

New disclosure timeline

Because the internal review is not yet finalized Converium has decided to delay the release of its financial results for the third quarter of 2005, originally scheduled for November 8, 2005. Converium currently anticipates that it will release its results for the third quarter together with the full set of restated results by mid-December. The effects of the proposed adjustments on Converium's operations for particular prior periods will be reflected in the restated results. Until the restated accounts are released, previously published financial statements should no longer be relied on.

Factors affecting third quarter results

Converium has recorded the following positive and encouraging developments in the third quarter:

- o For the fourth consecutive quarter, Converium's aggregate prior year loss reserve levels have remained stable.
- o Based on information received to date, Converium incurred estimated net losses from hurricanes Katrina, Rita, Dennis and Emily of approximately US\$ 50 million. This is modest compared to industry losses and reflects the Company's reduced exposure in North America, following the decision taken in September 2004 to place Converium Reinsurance (North America) Inc. (CRNA) into run-off. The net impact from the August floods in Continental Europe was approximately US\$ 24 million.
- o Converium commuted net liabilities of CRNA of close to US\$ 250 million,

with a positive contribution to net income of approximately US\$ 39 million.

- o Converium made significant progress in reducing administrative expenses which came down to around US\$ 40 million, as compared with US\$ 50 million in the second quarter of 2005.
- o Total investment results amounted to approximately US\$ 70 million.

Converium reiterates its two major financial targets for the year 2005: first, to achieve total gross premiums written of about US\$ 2 billion and, second, to commute or otherwise settle CRNA net liabilities of approximately US\$ 500 million.
