**FOLLOW-ON ORDERS FOR CAMTEK S FALCON FROM A EUROPEAN-BASED,
GLOBAL TOP-10 SEMICONDUCTOR MANUFACTURER**

**The orders, worth over \$1.3 million, are to be delivered during
the current and next quarter**

MIGDAL HA EMEK, Israel, December 12, 2005 Camtek Ltd. (Nasdaq: CAMT) announced today that it has received orders from a global top-10 semiconductor manufacturer based in Europe, with facilities in Europe, USA and Asia Pacific, for Falcon, Camtek s semiconductor inspection system. These follow a previous order that was installed and recognized in the third quarter.

The current orders total over \$1.3 million. Installation and revenue recognition are expected during the current and next quarter.

This customer is a global leader in several of the segments it serves, and produces a broad variety of products used in almost every aspect of our lives, said Roni Flieswasser, President of Camtek Europe (Belgium). As such, we regard these repeat orders, which are based on a global umbrella agreement that we have with this customer, as an indication of significant future potential.

Mr. Flieswasser added, An application of major interest to this customer was a wafer of MEMS (Micro-Electro-Mechanical System) devices. These wafers contain complex three-dimensional structures with surfaces at multiple levels. The Falcon inspected all levels in one cycle, applying optimal inspection parameters at each level. Camtek has again demonstrated both the Falcon s versatility for challenging applications and the ability to cater products to its customer s unique factory automation environments.

ABOUT FALCON

Camtek s line of automated wafer inspection systems, Falcon, helps semiconductor manufacturers, bumping houses and packaging foundries monitor processes and enhance yield. Falcon models deliver superb 2D and 3D inspection and metrology capabilities for wafers before or after test, along the bumping process or after dicing.

ABOUT CAMTEK LTD.

With headquarters in Migdal Ha Emek Israel, Camtek Ltd., designs, develops, manufactures, and markets automatic optical inspection systems and related products. Camtek s automatic inspection systems are used to enhance both production processes and yield for manufacturers in the printed circuit board industry, the high density interconnect substrate industry and the semiconductor manufacturing and packaging industry. This press release is available at www.camtek.co.il.

This press release may contain projections or other forward-looking statements regarding future events or the future performance of the Company. These statements are only predictions and may change as time passes. We do not assume any obligation to update that information. Actual events or results may differ materially from those projected, including as a result of changing industry and market trends, reduced demand for our products, the timely development of our new products and their adoption by the market, increased competition in the industry, price reductions as well as due to risks identified in the documents filed by the Company with the SEC.
