Sela Division of Camtek was chosen as one of the top-10
Nanotechnology Companies in Israel

MIGDAL HAEMEK, Israel – November 24, 2010 – Camtek Ltd. (NASDAQ and TASE: CAMT), announced that SELA - Semiconductor Engineering Laboratories Ltd. ("SELA"), whose share capital was fully acquired by Camtek in November 2009, was chosen as one of the top 10 nanotechnology companies in Israel by the NanoIsrael 2010 Committee.

SELA is engaged in the development, manufacturing and marketing of automated SEM (Scanning Electron Microscope) and TEM (Transmission Electron Microscope) sample preparation equipment, primarily for the semiconductor industry.

SELA's Xact system is the first TEM/STEM sample preparation system using Adaptive Ion Milling (AIM) technology. The AIM technology brings numerous advantages to traditional FIB (Focused Ion Beam) technology by reducing the sample thickness to below 20nm over a large area with high precision and throughput, as well as superior image quality. SELA has the ability to enable material analysis on the atomic scale and image structures and material interfaces in a controlled and unique manner otherwise unattainable.

Roy Porat, Camtek's Chief Executive Officer, commented: "The recognition of Sela as a leading participant in the nano-material and nanotechnology market is due to Sela's technological leadership in this space. We are proud of our newly acquired company. This recognition of Sela together with its proven commercial viability is an additional vindication of our acquisition."

ABOUT CAMTEK LTD.

Camtek Ltd provides automated solutions dedicated for enhancing production processes and yield, enabling our customers new technologies in two industries: Semiconductors, Printed Circuit Board (PCB) & IC Substrates.

Camtek addresses the specific needs of these industries with dedicated solutions based on a wide and advanced platform of technologies including intelligent imaging, image processing, ion milling and digital material deposition. Camtek's solutions range from micro-to-nano by applying its technologies to the industry-specific requirements.
