Gilat Partners with Intelsat to Enable Rapid Deployment and
High Quality 2G/3G Cellular Connectivity
to Underserved Regions of the World

Gilat's CellEdge small-cell-over-satellite solution combined with
Intelsat's fully integrated, end-to-end satellite solutions deliver rural
cellular connectivity to mobile network operators worldwide

Petah Tikva, Israel and Luxembourg, March 12, 2015 -- As demand for mobile connectivity increases in regions where there is an absence of terrestrial infrastructure, mobile network operators (MNOs) are looking to satellite communications to expand their subscriber base, comply with universal service obligations and most importantly, provide rural communities with the necessary connectivity to help their populations and economies thrive.

Today, Gilat Satellite Networks Ltd. (NASDAQ: GILT), a worldwide leader in satellite networking technology, solutions and services, and Intelsat SA (NYSE: I), the world's leading provider of satellite services, announced that they have joined forces to provide MNOs with a comprehensive 2G/3G cellular infrastructure solution to better serve rural regions.

Gilat's CellEdge small-cell-over-satellite solution, combined with Intelsat's global satellite coverage and IntelsatOne terrestrial infrastructure, means mobile network operators can now expand 2G/3G services quickly and profitably throughout their desired service territories.

An initial example of the collaboration between Gilat and Intelsat is RuralCom's thousand-mile-long Alaska Highway and British Columbia Coast cellular network. Gilat's CellEdge 3G network is leveraging Intelsat's global satellite fleet through its Intelsat Horizons 1 satellite and its IntelsatOne terrestrial network. Gilat's CellEdge 3G network is optimizing space segment usage through a hub located at an Intelsat teleport. Joining forces, the two companies are enabling RuralCom to quickly expand its network and extend its subscriber base at a significantly reduced capital expenditure base level.

"There are vast stretches of the Alaska Highway and BC Coast which have no existing wireless service. We believe that providing such coverage greatly benefits the public safety and brings significant protection to life and property," claimed Bob Hillman, President and CEO of RuralCom. "We searched for the most advanced technology and equipment and chose the Gilat-Intelsat solution for their innovative cost-effective offering coupled with their vast rural expertise in deploying under harsh environmental conditions."

"At Intelsat, our mission has always been to provide satellite solutions that can deliver broadband connectivity to any location," stated Stephen Spengler, Deputy Chief Executive Officer of Intelsat. "The innovation and collaboration occurring throughout the satellite ecosystem, such as the optimization of Gilat's platforms on the Intelsat EpicNG infrastructure, result in attractive and efficient solutions for MNOs that connect their subscribers and support profitable growth for their businesses. Our collaboration with Gilat provides MNOs with a seamless and cost efficient way to deploy and expand their wireless networks, and the opportunity to transition over time to the higher performance of Intelsat EpicNG as it begins entering service in 2016."

“Teaming up with Intelsat brings tremendous value to our joint customers,” expanded Erez Antebi, Gilat's CEO. “Intelsat’s vast global array of fully integrated, end-to-end satellite solutions, together with our innovative all-inclusive solution, allows operators to extend their cellular coverage to virtually anywhere in the world within two to three months.”

About RuralCom

Founded in 2005, Vancouver-based RuralCom Corporation is an accredited cellular carrier with licenses to operate along the length of the Alaska Highway and the BC North Coast. The company is focused on expanding cellular telephone service to unserved or underserved rural areas across Canada.

About Intelsat

Intelsat SA (NYSE: I) is the world’s leading provider of satellite services, delivering high performance connectivity solutions for media, fixed and mobile broadband infrastructure, enterprise and government and military applications. Intelsat’s satellite, teleport and fiber infrastructure is unmatched in the industry, setting the standard for transmissions of video and broadband services. From the globalization of content and the proliferation of HD, to the expansion of cellular networks and mobile broadband access, Intelsat creates value for its customers through creative space-based solutions. About Gilat

Gilat Satellite Networks Ltd (NASDAQ, TASE: GILT) is a leading provider of products and services for satellite-based broadband communications. Gilat develops and markets a wide range of high-performance satellite ground segment equipment and VSATs, with an increasing focus on the consumer and Ka-band market. In addition, Gilat enables mobile SOTM (Satellite-on-the-Move) solutions providing low-profile antennas, next generation solid-state power amplifiers and modems. Gilat also provides managed network and satellite-based services for rural telephony and Internet access via its subsidiaries in Peru and Colombia.

With over 25 years of experience, and over a million products shipped to more than 90 countries, Gilat has provided enterprises, service providers and operators with efficient and reliable satellite-based connectivity solutions, including cellular backhaul, banking, retail, e-government and rural communication networks. Gilat also enables leading defense, public security and news organizations to implement advanced, on-the-move tactical communications on board their land, air and sea fleets using Gilat's high-performance SOTM solutions.

Gilat is a company under the control of the FIMI Private Equity Funds.
