Note: File three copies of this Form, one of which must be manually signed. If space is insufficient, *see* Instruction 6 for procedure. Potential persons who are to respond to the collection of information contained in this form are not required to respond unless the form displays a currently valid OMB number. with the second quarter of 2010, the technical margin was up 22.0% as results in that quarter were adversely impacted by a one-time provision increase in the Benelux, adverse life insurance claims experience in the US and lower surrender results in Central and Rest of Europe.

Administrative expenses for Life and ING Investment Management increased 12.6% compared with the third quarter of last year, or 3.9% excluding currency effects. The increase reflects higher staff costs and the roll-out of the Latin America wealth management strategy.

Despite the uptick in expenses, the ratio of administrative expenses to operating income declined slightly to 43.4% from 44.2% in the third quarter of 2009 and 44.7% in the second quarter of 2010. This was attributable to robust revenue generation in the third quarter of 2010.

The life operating result of Insurance Benelux was EUR 117 million compared with EUR 96 million in the third quarter of last year, driven by an improvement in the investment margin. The investment margin was higher mainly due to higher interest on fixed income securities as a result of reinvestments. This more than offset an increase in expenses caused by EUR 27 million of non-recurring beneficial items in the third quarter of 2009. The operating result decreased compared with EUR 163 million in the second quarter, which included the seasonal impact of dividend payments. In the current quarter, sales to retail customers continued to be under pressure given the low interest rate environment and fierce competition in the region. However, corporate sales in the Netherlands maintained momentum.

Insurance Central and Rest of Europe s life operating result rose to EUR 75 million from EUR 74 million in the

previous quarter and EUR 72 million in the third quarter of 2009. The increases were mainly due to a higher technical margin and lower expenses, which were partially offset by lower fees and premiums and the impact of the EUR 8 million financial institutions tax in Hungary levied as of the third quarter of 2010.

The life operating profit of Insurance US increased to EUR 166 million from EUR 137 million in the third quarter of 2009 on higher investment margins driven by swap expenses that have decreased with lower interest rates and the reinvestment into fixed income securities. Operating results were also higher than the EUR 121 million profit in the second quarter of 2010 due to an improvement in both the investment and technical margins.

Latin America s life operating profit increased to EUR 65 million, up 54.8% from the third quarter of last year, or 32.7% excluding currency effects. The increase resulted from higher fee income generated through pension fund growth in Mexico and higher fund deposits in Chile and Peru, which increased due to wage inflation. Latin America s life operating profit was EUR 53 million in the second quarter of 2010.

The life operating profit of Insurance Asia/Pacific increased to EUR 126 million from EUR 90 million in the third quarter of 2009. Profit in the second quarter of this year was EUR 118 million. The improvement in results from the third quarter of last year was due to higher investment and technical margins, higher fees and premium-based revenues, partly offset by an increase in DAC amortisation and trail commissions.

ING Investment Management s operating profit was EUR 43 million in the quarter, almost on par with the profit recorded in the third quarter last year. Fees were up 16.1%, or 8.8% excluding currency effects, driven by higher assets under management and the introduction of a fixed service fee related to the transfer of funds to the Luxembourg platform. Expenses increased, mainly due to higher staff costs, currency effects and the introduction of the fixed service fee. Operating profit in the second quarter was EUR 33 million.

The Non-life operating result declined to EUR 50 million from EUR 141 million in the third quarter of 2009, reflecting provision releases of EUR 59 million in the Benelux in the third quarter of last year. Results in the current quarter were lower than the EUR 69 million profit in the second quarter of 2010 due to higher disability, accident, fire and storm-related claims experience in the third quarter of 2010.

The Corporate Line Insurance operating result was EUR -169 million, an improvement compared with the third-quarter 2009 loss of EUR 229 million and the second-quarter 2010 loss of EUR 212 million. The result in the current quarter was supported by a EUR 32 million provision release related to a reinsurance portfolio that is in run-off.

ING Insurance reported an underlying profit before tax of EUR 18 million. Although operating performance was strong, results were impacted by changes in policyholder behaviour assumptions of EUR -335 million in Japan and EUR -21 million in the US. These charges, recorded under market and other impacts, arose as changes to variable annuity assumptions were made to reflect recent experience relating to policyholder behaviour where guarantees have come into the money.

Gains/losses and impairments on investments fell to EUR -126 million from EUR 68 million in the third quarter of 2009. Results in the current quarter include EUR 179 million of impairments on debt securities, primarily on US subprime RMBS. The third quarter of 2009 included EUR 121 million of public equity gains in the Benelux. In the second quarter of 2010, gains/losses and impairments on investments were EUR -143 million and consisted primarily of capital losses and impairments on debt securities in the US, the Benelux and Central and Rest of Europe. Revaluations improved to EUR 275 million from EUR -50 million in the same quarter of last year and EUR 269 million in the previous quarter. Results in the current quarter benefited from revaluations in the US of EUR 186 million from CMOs and EUR 52 million from interest rate hedges.

Market and other impacts were EUR -603 million in the third quarter, and consisted mainly of EUR -356 million of policyholder behaviour assumption changes and EUR 173 million of hedge losses net of guaranteed benefit reserve unlocking. Deferred acquisition cost (DAC) unlocking was EUR -16 million. Consistent with measures taken to improve the reserve sufficiency of Insurance US, the legacy variable annuity DAC balance was not written up in the third quarter despite a 10.7% advance in the S&P 500. Market and other impacts were EUR -660 million in the second quarter of 2010 and EUR 140 million in the same quarter last year.

ING Insurance posted a net loss for the quarter of EUR 656 million, including divestments and special items of EUR -597 million. Included in this figure is the one-time after-tax goodwill write-down of EUR 513 million related to Insurance US. The goodwill impairment results from the estimation that the book value of Insurance US currently exceeds the fair value of Insurance US, following an ongoing increase in the book value of Insurance US while the fair value decreased.

Insurance sales (APE) declined 4.8% from both the second quarter of this year and the third quarter of 2009, excluding currency effects and the closed blocks in the US and Japan. The decrease in sales from the third quarter of last year was mainly attributable to the Benelux, Central and Rest of Europe and the US. Benelux sales were lower due to a change in the recognition of premiums and high group pension sales in the third quarter of 2009. Central and Rest of Europe sales declined due to lower sales in Polish and Hungarian pension funds and lower sales in the Greek bancassurance channel. APE was down in the US on lower Retirement sales. Meanwhile, sales in Asia/Pacific and Latin America improved from both the second quarter of 2010 and the third quarter of 2009. Asia/Pacific sales continued to be fuelled by strong sales of the COLI cancer product in Japan and new products in Hong Kong and Malaysia. In Latin America, sales grew on a volume increase in Mexico, mutual fund sales in Chile and the inclusion of tax-favoured voluntary pension sales in Colombia.

Net profit

ING Group recorded a net profit of EUR 371 million in the third quarter compared with EUR 499 million in the third quarter of 2009 and EUR 1,090 million in the second quarter of 2010.

Net results in the third quarter of this year included special items and divestments totalling EUR -671 million, of which the EUR 513 million goodwill write-down related to Insurance US was the primary component. Other special items and divestments included a EUR 26 million loss on the announced divestment of the Summit portfolio at ING Real Estate (closed on 1 November 2010), EUR 38 million of investments in the ING Bank/Postbank combination, and costs related to various restructuring programmes and separation projects. Separation costs were EUR 17 million in the third quarter, and totalled EUR 40 million for the first nine months of 2010. ING expects separation costs for the full-year 2010 to be around EUR 85 million.

The third-quarter net result per share was EUR 0.10. Excluding the goodwill write-down related to Insurance US, the net result per share was EUR 0.23. The average number of shares used to calculate earnings per share over the quarter was 3,781 million. The net result per share was EUR 0.29 in the second quarter of 2010 and EUR 0.25 in the third quarter of last year.

The underlying effective tax rate increased to 29.8% compared with 18.4% in the second quarter of 2010 and 10.2% in the third quarter of 2009. The underlying effective tax rate for the first nine months of 2010 was 27.2%.

Return on equity

The underlying net return on equity for ING Group was 11.1% for the first nine months of 2010, compared with 4.4% in the same period of 2009 and 11.7% in the first half of 2010. The year-to-date underlying return on equity for the Bank increased to 13.0%, or 17.1% based on a 7.5% core Tier 1 ratio, driven by the strong improvement in results. The underlying return on equity for Insurance was 1.0% in the first nine months of 2010, compared with -0.2% last year.

BALANCE SHEET

ING Group s balance sheet decreased by EUR 12 billion in the third quarter to EUR 1,261 billion at the end of September 2010. The strengthening of the euro versus other currencies had a substantial impact on the balance sheet, reducing total assets by EUR 38 billion. Excluding currencies, total assets rose by EUR 27 billion. Shareholders equity rose by EUR 0.9 billion to EUR 42.5 billion, or EUR 11.23 per share. The increase in shareholders equity was primarily driven by the quarterly result and positive unrealised revaluations on debt securities, which more than compensated for currency effects.

Loans and advances to customers were EUR 606 billion at the end of September, EUR 7 billion lower than at the end of June 2010 including the impact of currencies, but EUR 5 billion higher at comparable exchange rates. Residential mortgages increased by EUR 6 billion excluding currency impacts, mainly at ING Direct and Retail Benelux, while loans to governments were EUR 1 billion higher. Lending to (mid)-corporates, SMEs and other remained unchanged. Securities at amortised cost and the Illiquid Assets Back-up Facility decreased at comparable currency rates by EUR 2 billion.

Investments were EUR 233 billion at the end of the third quarter, down EUR 4 billion from the end of the second quarter, due to negative currency effects. Excluding currency effects, investments at ING Bank were EUR 1 billion lower because of net redemptions of debt securities at ING Direct. Investments at ING Insurance rose by EUR 6 billion excluding currency impacts, mainly due to EUR 4.3 billion of positive revaluations and EUR 1.6 billion in additions across all business lines.

Intangible assets decreased by EUR 1.0 billion to EUR 5.2 billion due to currency changes and the impact of the EUR 0.5 billion goodwill write-down related to the US Insurance business.

ING remained a net receiver of deposits on the interbank markets, although the net amount continued to decline. Amounts due to banks decreased by EUR 7 billion to EUR 79 billion, and amounts due from banks increased by EUR 3 billion to EUR 59 billion. Both of these balance sheet items included EUR 4 billion of higher unsettled balances from securities transactions.

Currency impacts reduced financial assets at fair value through the P&L by EUR 12 billion. However, excluding currencies, financial assets at fair value through the P&L increased by EUR 15 billion. ING Bank s financial assets at fair value through the P&L increased by EUR 10 billion, excluding currencies, to EUR 156 billion, mainly due to EUR 11 billion in higher trading assets, which were partially influenced by a decline in long-term interest rates. These developments on the asset side of the Bank balance sheet were largely mirrored in financial liabilities at fair value through the P&L. At Insurance, financial assets at fair value through the P&L increased by EUR 6 billion excluding currencies, driven by a EUR 5 billion increase in investments for risk of policyholders.

Customer deposits and other funds on deposit increased by EUR 1 billion at comparable exchange rates. Excluding currency changes, individual savings accounts grew by EUR 3 billion and credit balances on customer accounts decreased by EUR 1 billion.

Insurance and investment contracts were impacted by EUR 15 billion of negative currency movements. Excluding currency effects, life insurance provisions rose by EUR 8 billion, of which EUR 5 billion was attributable to higher provisions for risk of life policyholders.

CAPITAL MANAGEMENT

ING s capital ratios remained strong during the third quarter. ING Bank s core Tier 1 ratio rose from 8.6% at the end of June to 9.0% at the end of September, driven by the quarterly profit. Risk-weighted assets fell 3.3% to EUR 332.5 billion, mainly due to the impact of foreign exchange rate changes.

ING Group s debt/equity ratio increased to 11.7%. The adjusted equity of ING Group declined by EUR 1.7 billion, as the quarterly net profit was more than offset by currency changes in both Group IFRS equity and hybrid capital.

Group core debt was stable as there were no capital flows between ING Group, ING Insurance and ING Bank. The Financial Conglomerates Directive (FiCo) ratio for ING Group decreased slightly to 165% from 167% at the end of the second quarter.

At Insurance, the Insurance Groups Directive (IGD) ratio decreased from 267% at the end of the second quarter to 261% at the end of September.

CHANGES 4Q2010 AND 1Q2011

In preparation for a potential US-focused IPO, ING is working to implement a number of changes to increase transparency, improve reserve adequacy on the US Legacy Variable Annuity book, reduce earnings volatility going forward, and bring accounting and hedging for the US businesses more into line with US peers.

As of 1 October 2010, ING intends to report the US Legacy VA business as a separate business line to improve transparency for both the legacy and ongoing businesses. Under ING s existing accounting policies, the separation will trigger a charge in the fourth quarter to bring reserve adequacy on the new Legacy VA business line to the 50% level. This charge will be reflected as a DAC write-down of approximately EUR 1 billion before tax (EUR 0.7 billion after tax), based on figures at the end of the third quarter. The final P&L impact, which will be reflected in the fourth quarter, will depend on market developments in the quarter.

From 2011, ING aims to bring its accounting practices for its US insurance businesses more into line with US peers. The company is currently studying an introduction of reversion to mean in its US equity markets assumption for determining DAC, which would reduce earnings volatility going forward.

In addition, ING is studying a move towards fair-value accounting on reserves for Guaranteed Minimum Withdrawal Benefits (GMWB) as of the first quarter of 2011 in order to better reflect the economic value of guarantees. Such a move would enable ING to substantially increase hedging of interest rates on the Legacy VA book without causing significant earnings volatility, because results from hedging derivatives would largely be mirrored in fair-value changes of the guarantees.

As of the end of September, the difference between the current book value of the reserves (under SOP 03-01) and the estimated fair value is approximately EUR -1 to -1.3 billion. Implementation of fair value accounting for GMWB would represent a change in accounting policy under IFRS with a transitional impact being reflected only in shareholders—equity as of 1 January 2011. Comparative periods—results will be restated.

Combined, if implemented, these measures are expected to reduce the DAC balance and improve the reserve adequacy on the Legacy VAs to well above the 50% confidence level. It would substantially reduce earnings volatility and bring reported earnings more into line with the economics of the business, including the potential to report profits from the Legacy VA book going forward as markets recover.

Separately, the US management is implementing a programme to sharpen the strategic focus of the US business on life and retirement services while reducing annual expenses by EUR 100 million per year. The aim is to create a strong and profitable US business, which over time can be IPOed when earnings and market circumstances improve.

Investor conference call, media conference call and webcast

Jan Hommen, Patrick Flynn and Koos Timmermans will discuss the results in an analyst and investor conference call on 10 November 2010 at 9:00 CET. Members of the investment community can join the conference call at +31 20 794 8500 (NL), +44 207 190 1537 (UK) or +1 480 629 9724 (US) and via live audio webcast at www.ing.com. A media conference call will be held on 10 November 2010 at 11:30 CET. Journalists are invited to join the conference in listen-only mode at +31 20 794 8500 (NL) or +44 20 7190 1537 (UK) and via live audio webcast at www.ing.com.

Additional information is available in the following documents published at www.ing.com:

ING Group Quarterly Report

ING Group Statistical Supplement

ING Group Historical Trend Data

Analyst Presentation

ING Group Condensed consolidated interim financial information for the period ended 30 September 2010 DISCLAIMER

ING Group s Annual Accounts are prepared in accordance with International Financial Reporting Standards as adopted by the European Union (IFRS-EU).

In preparing the financial information in this document, the same accounting principles are applied as in the 2009 ING Group Annual Accounts. All figures in this document are unaudited. Small differences are possible in the tables due to rounding.

Certain of the statements contained herein are not historical facts, including, without limitation, certain statements made of future expectations and other forward-looking statements that are based on management s current views and assumptions and involve known and unknown risks and uncertainties that could cause actual results, performance or events to differ materially from those expressed or implied in such statements. Actual results, performance or events may differ materially from those in such statements due to, without limitation: (1) changes in general economic conditions, in particular economic conditions in ING s core markets, (2) changes in performance of financial markets, including developing markets, (3) the implementation of ING s restructuring plan to separate banking and insurance operations, (4) changes in the availability of, and costs associated with, sources of liquidity such as interbank funding, as well as conditions in the credit markets generally, including changes in borrower and counterparty creditworthiness, (5) the frequency and severity of insured loss events, (6) changes affecting mortality and morbidity levels and trends, (7) changes affecting persistency levels, (8) changes affecting interest rate levels, (9) changes affecting currency exchange rates, (10) changes in general competitive factors, (11) changes in laws and regulations, (12) changes in the policies of governments and/or regulatory authorities, (13) conclusions with regard to purchase accounting assumptions and methodologies, (14) changes in ownership that could affect the future availability to us of net operating loss, net capital and built-in loss carry forwards, (15) ING s ability to achieve projected operational synergies, (16) reporting the US Legacy VA business as a separate business line, and (17) implementation of fair value accounting for Guaranteed Minimum Withdrawal Benefits for the US insurance businesses. ING assumes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information or for any other reason.
