99.0 Press release dated February 3, 2004

**Item 9. Regulation FD Disclosure and**

**Item 12. Disclosure of Results of Operations and Financial Condition.**

On February 3, 2004, Mattel issued a press release regarding its 2003 fourth quarter and full year results of operations, a copy of which is furnished as Exhibit 99.0 hereto. This exhibit is incorporated herein by reference.

In its 2003 fourth quarter and full year press release, Mattel includes the following non-GAAP financial measures, which it uses to analyze its continuing operations and to monitor, assess and identify meaningful trends in its operating and financial performance:

- Gross sales
- Operating income before charges
- After-tax income before charges
- Earnings per share ( EPS ) before charges

Gross sales represent sales to customers, excluding the impact of sales adjustments such as trade discounts and other allowances. Management believes that changes in gross sales highlight significant trends in Mattel's business. Changes in gross sales are discussed because most sales adjustments are not allocated to individual brands, making net sales less meaningful. A reconciliation of gross sales to the most directly comparable GAAP financial measure, net sales, is provided in Exhibits V and VI to the press release furnished as Exhibit 99.0 in this Form 8-K.

Operating income before charges, after-tax income before charges, and EPS before charges include adjustments to GAAP income and EPS to exclude income related to the reversal of a 1999 reserve and remove the impact of charges that are part of a three-year financial realignment plan

## Edgar Filing: MATTEL INC /DE/ - Form 8-K

that was completed in 2003 (all of which are described in Mattel's quarterly press releases). Management believes these non-GAAP financial measures assist management and investors in evaluating, and comparing from period-to-period, Mattel's results from ongoing operations in a more meaningful and consistent manner while also highlighting significant trends in the results of operations. In addition, management uses operating income before charges for a variety of purposes, including devising operating targets, evaluating actual performance against such targets at the company, business unit and individual level, evaluating trends in Mattel's results of operations, and forecasting. A reconciliation of operating income before charges, after-tax income before charges, and EPS before charges to the most directly comparable GAAP financial measure, income from continuing operations, is provided in Exhibits V and VI to the press release furnished as Exhibit 99.0 in this Form 8-K.
