China Telecom Corporation Limited

(A joint stock company incorporated in the People's Republic of China with limited liability)

Disclosure of Earnings Before Interest, Tax, Depreciation and Amortization (EBITDA) and Reconciliation to Cash Flows from Operating Activities

On March 17, 2004, China Telecom Corporation Limited (the Company) presented EBITDA in its annual result press announcement for the financial year ended December 31, 2003 in Hong Kong.

The Company's EBITDA represents profit before net finance costs, investment income, share of profit from associates, taxation, depreciation and amortisation and minority interests. As the telecommunications business is a capital-intensive industry, capital expenditures, the level of gearing and finance costs may have a significant impact on the net profit of companies with similar operating results. Therefore, the Company believes EBITDA may be helpful in analysing the operating results of a telecommunications service provider like itself. Although EBITDA is widely used in the global telecommunications industry as a benchmark to reflect operating performance, financing capability and liquidity, it is not regarded as a measure of operating performance and liquidity under generally accepted accounting principles (GAAP). It also does not represent cash flows from operating activities. In addition, the Company's EBITDA may not be comparable to similar indicators provided by other companies.

The following table sets forth a reconciliation of the EBITDA for the year ended December 31, 2003 to cash flows from operating activities, being the most comparable GAAP measure under International Financial Reporting Standards:

	RMB millions

EBITDA	65,369
Adjustments:	
Non-cash items included in EBITDA	2,208
Net change in working capital	(4,282)
Decrease in deferred revenue	(7,347)
Net interest paid	(2,620)
Income tax paid	(6,461)
Investment income received	17

Cash flows from operating activities	46,884
