Item 9. Regulation FD Disclosure

In the fourth quarter of 2003, management completed a strategic planning process that included reviewing how the Company compiled and reported financial information to the Company's Chief Operating Decision Maker for its four business segments, Activated Carbon, Service, Engineered Solutions, and Consumer.

Management concluded as part of this review that the Activated Carbon and Service segments were more appropriately reflected on a combined basis, certain equipment related service revenue and associated costs previously reported in the Engineered Solutions segment would instead be better aligned in the newly formed Carbon and Service segment and certain service equipment sales and associated costs previously reported in the Service segment would be aligned better in the Engineered Solutions segment which has been re-named the Equipment segment. As a result of the aforementioned review, beginning in the first quarter of 2004, the Company's Chief Operating Decision Maker receives and reviews financial information in the new form.

The Company's Consumer segment was not changed and remains in the same form as it did prior to December 31, 2003.

The following is the segment data for the quarterly periods from January 1, 2003 to December 31, 2003 as reported in the Company's public filings with the Securities and Exchange Commission and restated to reflect the aforementioned change in segment reporting.
