Shanghai Petrochemical Announces 2004 Third Quarterly Results

Net Profit Increases 186.87% to RMB2,614 Million

Hong Kong, 24 October 2004 Sinopec Shanghai Petrochemical Company Limited (Shanghai Petrochemical or the Company) (HKEx: 338; SSE: 600688; NYSE: SHI) today announced its unaudited third quarterly results for the nine months ended 30 September 2004 (the Period) of the Company and its subsidiaries (the Group). During the Period, income from principal operations amounted to RMB28,127 million, an increase of 29.93% as compared to the same period of the previous year. Net profit amounted to RMB2,614 million, an increase of 186.87% as compared to the same period of the previous year.

Mr. Lu Yiping, Chairman of Shanghai Petrochemical, said, During the first to third quarters of 2004, driven by the increasing crude oil prices and the growth of demand for petrochemical products in the PRC, the prices of the Group s major products have increased significantly to various extents, which has offset the negative impact of the increased crude oil prices and has contributed greatly to the increase in operating results of the Group during the Period.

During the Period, the Group s sales of synthetic fibres, resins and plastics, intermediate petrochemicals and petroleum products amounted to RMB3,664 million, RMB8,622 million, RMB3,908 million and RMB9,836 million, respectively. The consolidated average selling prices for the above products increased 19.52%, 30.60%, 36.19% and 17.68%, respectively.

During the Period, the Group processed 6.8091 million tons of crude oil, an increase of 7.89% as compared to the same period of the previous year (including 495,100 tons of subcontracted crude oil). With the effect of increasing crude oil prices, the Group s unit cost of crude oil processed increased by 19.14% to RMB 2,197 per ton.

Shanghai Petrochemical Announces 2004 Third Quarterly Results p.2

Looking ahead, Mr. Lu is confident about the development of the Company. We anticipate that given the high crude oil prices, a booming petrochemical cycle and stable growth of the global economy, the petrochemical industry is expected to continue its booming trend. The Group is committed to enhancing the competitiveness of the Group, striving for better operating results and better returns for shareholders.

Shanghai Petrochemical is one of the largest petrochemical companies in the PRC and was one of the first Chinese companies to make a global securities offering. Located in Jinshan District in the southwest of Shanghai, it is a highly integrated petrochemical complex which processes crude oil into a broad range of products in synthetic fibres, resins and plastics, intermediate petrochemicals and petroleum categories.

§3 Management Discussion and Analysis

3.1 Overview and brief analysis of the Group's operations during the reporting period

Edgar Filing: SINOPEC SHANGHAI PETROCHEMICAL CO LTD - Form 6-K

In the past 9 months, recovery of the global economy significantly increased the demand for crude oil. During the same period, oil reserve in the major oil producing countries has been on the decline which resulted in a greater demand for crude oil and upsurge of prices. Unstable political situations and speculative investment activities have together added pressure to international oil prices, which has directly increased the refining costs of the Group. However, driven by the increasing crude oil prices and the growth of demand for petrochemical products in the PRC, the prices of the Group's major products have increased significantly to various extents, which has more than offset the negative impact of the increased crude oil prices and has contributed greatly to the increase in operating results of the Group during the reporting period.

From 1 January 2004 to 30 September 2004, income from principal operations of the Group amounted to RMB 28.127 billion, an increase of 29.93% when compared to the same period of the previous year. Among such income increase, sales of synthetic fibres, resins and plastics, intermediate petrochemical products and petroleum products amounted to RMB 3.664 billion, RMB 8.622 billion, RMB 3.908 billion and RMB 9.836 billion, respectively. Net profit amounted to RMB 2.614 billion, an increase of 186.87% when compared to the same period of the previous year.

Table of Contents

During the same period, the Group processed a total of 6.8091 million tons of crude oil, an increase of 7.89% as compared to the same period of the previous year (including 495,100 tons of subcontracted crude oil). The Group's unit cost of crude oil processed amounted to RMB 2,197 per ton, an increase of 19.14% as compared to the same period of the previous year. The consolidated average selling price of synthetic fibres, resins and plastics, intermediate petrochemical products and petroleum products of the Group increased by 19.52%, 30.60%, 36.19% and 17.68%, respectively.

3.1.1 Principal operations and products accounting for 10% or more of income from principal operations or profit from principal operations

Unit: 000 Currency: RMB Unaudited

Segment	Income from principal operations	Cost of sales	Gross profit margin (%)
Synthetic fibres	3,663,792	3,132,802	14.49
Resins and plastics	8,621,531	6,413,600	25.61
Intermediate petrochemical products	3,908,412	2,584,376	33.88
Petroleum products	9,835,949	8,942,415	9.08
Others	2,096,938	1,926,368	8.13
Including: related party transactions	10,915,920	9,819,463	10.04

3.2 Profit Indication & Discussion

In view of the present business development situation of the Group, it is expected that the operating results of 2004 will improve substantially as compared to the same period of the previous year.
