UMC announced its unconsolidated operating results for the first quarter of 2006

1. Date of occurrence of the event: 2006/04/26
2. Name of the company: United Microelectronics Corp.
3. Relationship to the company (listed company or affiliated company): Listed company
4. The shareholding ratios of mutual holding: N/A

5. Cause of occurrence:

United Microelectronics Corporation (NYSE: UMC; TSE: 2303) (UMC or the Company) today announced its unconsolidated operating results for the first quarter of 2006. Year-over-year revenue increased by 20.2% to NT\$24.38 billion from NT\$20.29 billion, and a 11.2% QoQ decrease from NT\$27.47 billion in 4Q05. The net income is NT\$12.29 billion, significantly increase 303.6% from NT\$3.04 billion in 4Q05. The EPS for the first quarter in 2006 was NT\$0.67.

Effectuated by the traditional seasonal factors, revenue and shipments in 1Q06 were decreased compared to last quarter. But the overall performance was close to our original expectations. Wafer shipments in the first quarter were 754 thousand 8-inch equivalent wafers. The utilization rate for the quarter was 79%. The blended average selling price (ASP) decreased by 2% during 1Q06 due to lower demand for leading-edge process technologies.

Demand in Q1 was very close to our original expectations, said UMC Chairman and CEO, Dr. Jackson Hu. In fact, it was even slightly better. Our performance in the quarter was at the upper range of our guidance, with revenue reaching NT\$24.4 billion and profitability beating our earlier projections.

Dr. Hu continued, For Q2, as a whole, we believe that demand will be in line with seasonal norms. Computer sector demand will be relatively weak due to seasonal inventory adjustments. At the same time, we have seen handset demand start to accelerate, which is about one to two months earlier than typical seasonal trends. Our understanding is that demand for entry-level handsets in developing markets such as India, Africa, Indonesia and China will see very high growth this year. Therefore, handset related components should be in strong demand. In particular, our production of 90nm and 0.13um wafers for existing customers as well as new customers that have recently entered volume production will increase significantly. In addition, it is worth noting that we will start volume production for a graphic chip customer during the quarter. Therefore, our visibility looking beyond to the 3rd quarter is good, and we are expecting double-digit revenue growth and a large improvement in profitability.

We are also seeing strong demand for 65nm technologies, and are progressing smoothly in the roll-out of this process. UMC led all foundries with the delivery of its first 65nm customer product back into June 2005. We are currently producing these 65nm chips at Fab 12A in

small volume quantities and expect to receive eleven product tape-outs from eight customers by the end of this summer. We believe UMC's success at 65nm will lead the Company to continued growth in the coming years.

REPORT OF INDEPENDENT AUDITORS

English Translation of a Report Originally Issued in Chinese

To the Board of Directors and Shareholders of

United Microelectronics Corporation

We have audited the accompanying balance sheets of United Microelectronics Corporation as of December 31, 2005 and 2004, and the related statements of income, changes in stockholders' equity and cash flows for the years ended December 31, 2005 and 2004. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. As described in Note 4(7) to the financial statements, certain long-term investments were accounted for under the equity method based on the 2005 and 2004 financial statements of the investees, which were audited by other auditors. Our opinion insofar as it relates to the investment income amounting to NT\$821 million and NT\$631 million for the years ended December 31, 2005 and 2004, respectively, and the related long-term investment balances of NT\$5,898 million and NT\$5,380 million as of December 31, 2005 and 2004, respectively, is based solely on the reports of the other auditors.

We conducted our audits in accordance with auditing standards generally accepted in the Republic of China and Guidelines for Certified Public Accountants' Examination and Reports on Financial Statements, which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits and the reports of the other auditors provide a reasonable basis for our opinion.

In our opinion, based on our audits and the reports of other auditors, the financial statements referred to above present fairly, in all material respects, the financial position of United Microelectronics Corporation as of December 31, 2005 and 2004, and the results of its operations and its cash flows for the years ended December 31, 2005 and 2004, in conformity with the Guidelines Governing the Preparation of Financial Reports by Securities Issuers and accounting principles generally accepted in the Republic of China.

As described in Note 3 to the financial statements, effective from January 1, 2005, United Microelectronics Corporation has adopted the R.O.C. Statement of Financial Accounting Standards No.35 Accounting for Asset Impairment to account for the impairment of its assets.

We have also audited the consolidated financial statements of United Microelectronics Corporation as of and for the years ended December 31, 2005 and 2004, and have expressed an unqualified opinion with explanatory paragraph on such financial statements.

UNITED MICROELECTRONICS CORPORATION

NOTES TO FINANCIAL STATEMENTS

December 31, 2005 and 2004

(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

1. HISTORY AND ORGANIZATION

United Microelectronics Corporation (the Company) was incorporated in May 1980 and commenced operations in April 1982. The Company is a full service semiconductor wafer foundry, and provides a variety of services to satisfy individual customer needs. These services include intellectual property, embedded IC design, design verification, mask tooling, wafer fabrication, and testing. The Company's common shares were publicly listed on the Taiwan Stock Exchange (TSE) in July 1985 and its American Depositary Shares (ADSs) were listed on the New York Stock Exchange (NYSE) in September 2000.

Based on the resolution of the board of directors' meeting on February 26, 2004, the effective date of the merger with SiS Microelectronics Corp. (SiSMC) was July 1, 2004. The Company was the surviving company, and SiSMC was the dissolved company. The merger was approved by the relevant government authorities. All the assets, liabilities, rights, and obligations of SiSMC have been fully incorporated into the Company since July 1, 2004.

Based on the resolution of the board of directors' meeting on August 26, 2004, UMCi had transferred its businesses, operations, and assets to its newly incorporated Singapore branch (the Branch) since April 1, 2005.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The financial statements were prepared in conformity with the Guidelines Governing the Preparation of Financial Reports by Securities Issuers and accounting principles generally accepted in the Republic of China (R.O.C.).

Summary of significant accounting policies is as follows:

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that will affect the amount of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the reported period. The actual results may differ from those estimates.

Foreign Currency Transactions

Transactions denominated in foreign currencies are translated into New Taiwan Dollars at the exchange rates prevailing at the transaction dates. Receivables, other monetary assets, and liabilities denominated in foreign currencies are translated into New Taiwan Dollars at the exchange rates prevailing at the balance sheet date. Exchange gains or losses are included in the current year's results. However, exchange gains or losses from investments in foreign entities are recognized as a cumulative translation adjustment in stockholders' equity.

Translation of Foreign Currency Financial Statements

The financial statements of the Branch are translated into New Taiwan Dollars using the spot rates as of each financial statement date for asset and liability accounts, and average exchange rates for profit and loss accounts. The cumulative translation effects from the Branch using functional currencies other than New Taiwan Dollars are included in the cumulative translation adjustment in stockholders' equity.

Cash Equivalents

Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and with maturity dates that do not present significant risks on changes in value resulting from changes in interest rates, including commercial paper with original maturities of three months or less.

Marketable Securities

Marketable securities are recorded at cost at acquisition and are stated at the lower of aggregate cost or market value at the balance sheet date. Cash dividends are recognized as dividend income at the point of receipt. Costs of money market funds and short-term notes are identified specifically while other marketable securities are determined on the weighted-average method. The market values of listed debts, equity securities and closed-end funds are determined by the average closing price during the last month of the fiscal year. The market value for open-end funds is determined by the net asset value at the balance sheet date. The amount by which the aggregate cost exceeds the market value is reported as a loss in the current year. In subsequent periods, recoveries of the market value are recognized as a gain to the extent that the market value does not exceed the original aggregate cost of the investment.

Allowance for Doubtful Accounts

The allowance for doubtful accounts is provided based on management's judgment and on the evaluation of collectibility and aging analysis of accounts and other receivables.

Inventories

Inventories are accounted for on a perpetual basis. Raw materials are recorded at actual purchase costs, while the work in process and finished goods are recorded at standard costs and adjusted to actual costs using the weighted-average method at the end of each month. Inventories are stated at the lower of aggregate cost or market value at the balance sheet date. The market values of raw materials and supplies are determined on the basis of replacement cost while the work in process and finished goods are determined by net realizable values. An allowance for loss on decline in market value and obsolescence is provided, when necessary.

Long-term Investments

Long-term investments are recorded at acquisition cost. Investments acquired by contribution of technological know-how are credited to deferred credits among affiliates, which will be amortized to income over a period of 5 years.

Investments of less than 20% of the outstanding voting rights in listed investees, where significant influence on operating decisions of the investees does not reside with the Company, are accounted for by the lower of aggregate cost or market value method. The unrealized loss resulting from the decline in market value of investments that are held for the purpose of long-term investment is deducted from the stockholders equity. The market value is determined by the average closing price during the last month of the fiscal year. Investments of less than 20% of the outstanding voting rights in unlisted investees are accounted for under the cost method. Impairment losses for the investees will be recognized if an other than temporary impairment is evident and the book value after recognizing the losses shall be treated as the new cost basis of such investment.

Investment income or loss from investments in both listed and unlisted investees is accounted for under the equity method provided that the Company owns at least 20% of the outstanding voting rights of the investees or has significant influence on operating decisions of the investees. The difference of the acquisition cost and the underlying equity in the investee's net assets is amortized over 5 years.

The change in the Company's proportionate share in the net assets of its investee resulting from its subscription to additional shares of stock, issued by such investee, at a rate not proportionate to its existing equity ownership in such investee, is charged to the capital reserve and long-term investments account.

Unrealized intercompany gains and losses arising from downstream transactions with investees accounted for under the equity method are eliminated in proportion to the Company's ownership percentage while those from transactions with majority-owned (above 50%) subsidiaries are eliminated entirely.

Unrealized intercompany gains and losses arising from upstream transactions with investees accounted for under the equity method are eliminated in proportion to the Company's ownership percentage. Unrealized intercompany gains and losses arising from transactions between investees accounted for under the equity method are eliminated in proportion to the multiplication of the Company's ownership percentages; while those arising from transactions between majority-owned subsidiaries are eliminated in proportion to the Company's ownership percentage in the subsidiary incurred with a gain or loss.

If the recoverable amount of investees accounted for under the equity method is less than its carrying amount, the difference is to be recognized as impairment loss in the current period.

Investees in which the Company, directly or indirectly, holds more than 50% of voting rights or controls more than half of the members of board of directors, by whom the investee is controlled, are consolidated into the Company's financial statement in accordance with the R.O.C. SFAS No.7.

Property, Plant and Equipment

Property, plant and equipment are stated at cost. Interest incurred on loans used to finance the construction of property, plant and equipment is capitalized and depreciated accordingly.

Maintenance and repairs are charged to expense as incurred. Significant renewals and improvements are treated as capital expenditure and are depreciated accordingly. When property, plant and equipment are disposed, their original cost and accumulated depreciation are to be written off and the related gain or loss is classified as non-operating income or expenses. Idle assets are transferred to other assets according to the lower of net book or net realizable value, with the difference charged to non-operating expenses. The corresponding depreciation expenses provided are also classified as non-operating expenses.

Depreciation is provided on a straight-line basis using the estimated economic life of the assets less salvage value, if any. When the estimated economic life expires, property, plant and equipment which are still in use, are depreciated over the newly estimated remaining useful life using the salvage value. The estimated economic life of the property, plant and equipment is as follows: buildings 20 to 55 years; machinery and equipment 5 years; transportation equipment 5 years; furniture and fixtures 5 years; leased assets the lease period or estimated economic life, whichever is shorter.

Intangible Assets

Goodwill arising from the merger is amortized using the straight-line method over 15 years. As a result of the reorganization of UMCi Ltd., goodwill arising from the reorganization is amortized over 5 years. Technological know-how is stated at cost and amortized over its estimated economic life using the straight-line method.

The Company assesses whether there is any indication of impairment other than temporary. If any such indication exists, the recoverable amount is estimated and impairment loss is recognized accordingly. The book value after recognizing the impairment loss is recorded as the new cost.

Deferred Charges

Deferred charges are stated at cost and amortized on a straight-line basis as follows: bonds issuance costs - over the life of the bonds, patent license fees - the term of contract or estimated economic life of the related technology, and software - 3 years.

The Company assesses whether there is any indication of impairment other than temporary. If any such indication exists, the recoverable amount is estimated and impairment loss is recognized accordingly. The book value after recognizing the impairment loss is recorded as the new cost.

Convertible and Exchangeable Bonds

The issuance costs of convertible and exchangeable bonds are classified as deferred charges and amortized over the life of the bonds.

The excess of the stated redemption price over the par value is accrued as compensation interest payable over the redemption period, using the effective interest method.

When convertible bondholders exercise their conversion rights, the book value of bonds is credited to common stock at an amount equal to the par value of the common stock and the excess is credited to the capital reserve; no gain or loss is recognized on bond conversion.

When exchangeable bondholders exercise their rights to exchange for the reference shares, the book value of the bonds is to be offset against the book value of the investments in reference shares and the related stockholders' equity accounts, with the difference recognized as gain or loss on disposal of investments.

Pension Plan

All regular employees are entitled to a defined benefit pension plan that is managed by an independently administered pension fund committee within the Company. The fund is deposited under the committee's name in the Central Trust of China and hence, not associated with the Company. Therefore the fund shall not be included in the Company's financial statements. Pension benefits for employees of the Branch are provided in accordance with the local regulations.

The Labor Pension Act of R.O.C. (the Act), which adopts a defined contribution plan, became effective on July 1, 2005. In accordance with the Act, employees may choose to elect either the Act, by retaining their seniority before the enforcement of the Act, or the pension mechanism of the Labor Standards Law. For employees who elect the Act, the Company will make monthly contributions of no less than 6% of the employees monthly wages to the employees' individual pension accounts.

The accounting for pension is computed in accordance with the R.O.C. SFAS No.18. For the defined benefit pension, the net pension cost is calculated based on an actuarial valuation, and pension cost components such as service cost, interest cost, expected return on plan assets, the amortization of net obligation at transition, pension gain or loss, and prior service cost, are all taken into consideration. For the defined contribution pension, the Company recognizes the pension amount as expense in the period in which the contribution becomes due.

Employee Stock Option Plan

The Company applies the intrinsic value method to recognize the difference between the market price of the stock and the exercise price of its employee stock option as compensation cost. Starting January 1, 2004, the Company also discloses pro forma net income and earnings per share under the fair value method for only these options granted since January 1, 2004.

Treasury Stock

The Company adopted the R.O.C. SFAS No. 30, which requires that treasury stock held by the Company to be accounted for under the cost method. Cost of treasury stock is shown as a deduction to stockholders' equity, while gain or loss from selling treasury stock is treated as an adjustment to the capital reserve. The Company's stock held by its subsidiaries is also treated as treasury stock in the Company's account.

Revenue Recognition

The main sales term of the Company is Free on Board (FOB) or Free Carrier (FCA). Revenue is recognized when ownership and liability for risk of loss or damage to the products have been transferred to customers, usually upon shipment. Sales returns and discounts taking into consideration customer complaints and past experiences are accrued in the same year of sales.

Capital Expenditure versus Operating Expenditure

Expenditure shall be capitalized when it is probable that future economic benefits associated with the expenditure will flow to the Company and the expenditure amount exceeds a predetermined level. Otherwise it is charged as expense when incurred.

Income Tax

The Company adopted the R.O.C. SFAS No. 22 Accounting for Income Taxes for inter-period and intra-period income tax allocation. Provision for income tax includes deferred income tax resulting from temporary differences, loss carry-forward and investment tax credits. Deferred income tax assets and liabilities are recognized for the expected tax consequences of temporary differences between the tax bases of assets and liabilities and their reported amounts in the financial statements using enacted tax rates and laws that will be in effect when the difference is expected to reverse. Valuation allowance on deferred income tax assets is provided to the extent that it is more likely than not that the tax benefits will not be realized.

According to the R.O.C. SFAS No. 12, the Company recognized the tax benefit from the purchase of equipment and technology, research and development expenditure, employee training, and certain equity investment, by the flow-through method.

Income tax (10%) on unappropriated earnings is recorded as expense in the year when the shareholders have resolved that the earnings shall be retained.

Earnings per Share

Earnings per share is computed according to the R.O.C. SFAS No. 24. Basic earnings per share is computed by dividing net income (loss) by weighted-average number of shares outstanding during the year. Diluted earnings per share is computed by taking basic earnings per share into consideration plus additional common shares that would have been outstanding if the dilutive share equivalents had been issued. The net income (loss) would also be adjusted for the interest and other income or expenses derived from any underlying dilutive share equivalents. The weighted-average outstanding shares are adjusted retroactively for stock dividends and bonus share issues.

Derivative Financial Instruments

The interest rate swap agreements entered into for hedging purposes are accounted for on a net accrual basis in accordance with the contractual interest rate as an adjustment to the interest income or expense of the hedged items.

Foreign exchange forward contracts are held to hedge the exchange rate risk arising from net assets or liabilities denominated in foreign currency. These forward contracts are translated and recorded using the spot rate at the inception of the contracts, and the discount or premium of the forward contracts is amortized over their lifespan. The difference between the spot rate at the inception of a forward contract and the spot rate at the balance sheet date is reflected in the statement of income. The receivables and payables of the foreign exchange forward contracts are offset and the resulting balances are recorded as either assets or liabilities. Exchange gains or losses from the settlement of forward contracts are included in the current period's earnings.

Merger

The Company merged with SiSMC and recognized the sum of the difference between the acquisition costs, which are the market price of equity stocks issued and other related costs, and the fair value of the identifiable net assets acquired as goodwill in compliance with the R.O.C. SFAS No. 25 Enterprise Mergers Accounting of Purchase Method . The fair value of identifiable net assets and goodwill deducted from the par value of the equity stocks issued and other related costs are recognized as capital reserve.

Asset Impairment

Pursuant to the R.O.C. SFAS No. 35, the Company assesses indicators of impairment for all its assets (except for goodwill) within the scope of the standard at each balance sheet date. If impairment is indicated, the Company compares the carrying amount with the recoverable amount of the assets or the cash-generating unit (CGU) and writes down the carrying amount to the recoverable amount where applicable. The recoverable amount is defined as the higher of fair value less the costs to sell, and the values in use.

For previously recognized losses, the Company assesses, at the balance sheet date, whether there is any indication that the impairment loss may no longer exist or may have diminished. If there is any such indication, the Company recalculates the recoverable amount of the asset. If the recoverable amount increases as a result of the increase in the estimated service potential of the assets, the Company reverses the impairment loss such that the resulting carrying amount of the asset shall not exceed the amount (net of amortization or depreciation), that would otherwise result had no impairment loss been recognized for the assets in prior years.

In addition, a goodwill-allocated CGU or group of CGUs is tested for impairment each year, regardless of whether impairment is indicated. If an impairment test reveals that the carrying amount (including goodwill) of CGU or group of CGUs is greater than its recoverable amount, there is an impairment loss. In allocating impairment losses, the portion of goodwill allocated is to be written down first. After goodwill has been written off, the remaining impairment loss, if any, is to be shared among other assets pro rata to their carrying amount.

The write-down in goodwill cannot be reversed under any circumstance in the subsequent periods.

Impairment loss (reversal) is classified as non-operating losses (income).

3. ACCOUNTING CHANGE

The Company had adopted the R.O.C. SFAS No. 35, Accounting for Asset Impairment to account for the impairment of its assets for its financial statements started on and after January 1, 2005. No retroactive adjustment is required under the standard. Such a change in accounting principles resulted in a NT\$483 million decrease on the Company's net income, and a decrease of NT\$0.03 on earnings per share and total assets had decreased by NT\$483 million as of December 31, 2005.

- Note A: During 2004, the Company acquired an additional 24.95% of interest in UMCi Ltd., totaling 227,938 thousand shares amounting to NT\$10,762 million. Based on the resolution of the board of directors meeting on August 26, 2004, UMCi had transferred its businesses, operations, and assets to the Branch since April 1, 2005.
- Note B: The cost is recorded as NT\$4,372 million and NT\$2,527 million as of December 31, 2005 and 2004, respectively. After deducting the subsidiary's holding of the Company's stock (treated as treasury stock) of NT\$172 million in both years, the residual book values totalled NT\$4,200 million and NT\$2,355 million as of December 31, 2005 and 2004, respectively.
- Note C: The cost is recorded as NT\$16,968 million and NT\$30,434 million as of December 31, 2005 and 2004, respectively. After deducting the subsidiary's holding of the Company's stock (treated as treasury stock) of NT\$20,137 million in both years, the residual of book values totalled NT\$(3,170) million and NT\$10,296 million as of December 31, 2005 and 2004, respectively.
- Note D: The equity method was applied for investees in, which the Company held the highest percentage of the outstanding voting rights and had significant influences on operating decisions.
- Note E: The equity method was applied for investees, in which the total ownership held by the Company and its subsidiaries is over 20%.
- Note F: United Foundry Service, Inc. was liquidated in April 2005. All businesses, operations, and assets of the company were transferred to UMC Group (USA).
- Note G: In the third quarter of 2004 the Company recognized a permanent loss of NT\$85 million as the decline in market value was deemed irrecoverable. Since January 1, 2005, the Company was no longer a majority stockholder of United Fu Shen Chen Technology Corp. Thus the cost method was appropriately applied instead of the equity method.
- Note H: As of August 1, 2005, the Company's former investee, Epitech Technology Corp. (accounted for under the cost method) merged into South Epitaxy Co., Ltd. and was retained as Epitech Technology Corp. One share of the former investee, Epitech Technology Corp. was exchanged for 1.36 shares of Epitech Technology Corp. As the Company held less than 20% voting rights and had no significant influences, the cost method was applied.
- Note I: As of September 1, 2005 the Company's former investee, Aptos (Taiwan) Corp. (accounted for under the equity method), merged into Chipbond Technology Corp. Three shares of Aptos (Taiwan) Corp. were exchanged for 1 share of Chipbond Technology Corp. As the Company held less than 20% voting rights and had no significant influences, the cost method was applied.
- Note J: As of December 2005 and 2004, the Company held 77,625 thousand and 71,215 thousand AU Optronics Corp. shares; among the shares held by the Company, 73,566 thousand and 66,109 thousand shares were utilized as reference shares for the Company's zero coupon exchangeable bonds, for year 2005 and 2004, respectively.

- Note K: The amount represented the investment in limited partnership without voting rights. As the Company was not able to exercise significant influences, the investments were accounted for under the cost method.
- Note L: The amount represented investment of 30 million in preferred shares. As the Company did not possess voting rights or significant influence, the cost method was applied.
- b. Total loss arising from investments accounted for under the equity method, which were based on the audited financial statements of the investees, were NT\$2,677 million and NT\$2,509 million for the years ended December 31, 2005 and 2004, respectively. Among which, investment income amounting to NT\$821 million and NT\$631 million from the respective long-term investment balances of NT\$5,898 million and NT\$5,380 million as of December 31, 2005 and 2004, respectively, were determined based on the investees financial statements audited by other auditors.
- c. The long-term investments were not pledged.
- d. Effective from January 1, 2005, the Company has adopted the revised R.O.C. Statement of Financial Accounting Standards No.7 Consolidation of Financial Statements , to account for equity investments above 50%, directly or indirectly, or for investment holdings of less than 50% but has significant influence on the operation of the investees, in the consolidation report for the year ended December 31, 2005. The consolidated subsidiaries are as follows: UMC Group (USA), United Microelectronics (Europe) B.V., UMC Capital Corp., United Microelectronics Corp. (Samoa), United Foundry Service, Inc. (the liquidation process was completed in April 2005), TLC Capital Co., Ltd., UMCi Ltd., Fortune Venture Capital Corp., Hsun Chieh Investment Co., Ltd., United Microdisplay Optronics Corp., Thintek Optronics Corp., UMC Japan, Silicon Integrated Systems Corp. (investee 100% owned by Fortune Venture Capital Corp.), UMC Capital (USA) (investee 100% owned by UMC Capital Corp.), ECP VITA Ltd. (investee 100% owned by UMC Capital Corp.), Silicon Integrated Systems Corp. Hong Kong (ceased to possess control on June 27, 2005), Silicon Integrated Systems Corp. USA (ceased to possess control on June 27, 2005), Investar CPU Venture Capital Fund, Inc. LDC (liquidation process was completed during the first quarter of 2005), XGi Technology Inc. (Cayman) (ceased to possess control on June 27, 2005), and XGI Technology Inc. (USA) (ceased to possess control on June 27, 2005).

- e. In year 2004, the total assets and operating revenues of each following subsidiary including Fortune Venture Capital Corp., Unitruth Investment Corp. (100% owned subsidiary of Hsun Chieh), UMC Capital Corp., United Microelectronics Corp. (Samoa), and United Foundry Service, Inc. are each less than 10% of the total non-consolidated assets and operating revenues of the Company. The total combined assets or operating revenues for the above mentioned subsidiaries account for less than 30% of the Company's total non-consolidated assets or revenues. Therefore, the above mentioned subsidiaries are not included in the consolidated financial statements.

(17) RETAINED EARNINGS AND DIVIDEND POLICIES

According to the Company's Articles of Incorporation, current year's earnings, if any, shall be distributed in the following order:

- a. Payment of all taxes and dues;
- b. Offset prior years' operation losses;
- c. Set aside 10% of the remaining amount after deducting items (a) and (b) as a legal reserve;
- d. Set aside 0.1% of the remaining amount after deducting items (a), (b), and (c) as directors' and supervisors' remuneration; and
- e. After deducting items (a), (b), and (c) above from the current year's earnings, no less than 5% of the remaining amount together with the prior years' unappropriated earnings is to be allocated as employees' bonus which will be settled through issuance of new shares of the Company, or cash. Employees of the Company's subsidiaries, meeting certain requirements determined by the board of directors, are also eligible for the employees' bonus.
- f. The distribution of the remaining portion, if any, will be recommended by the board of directors and approved through the shareholders' meeting.

The Company is currently in its growth stage; the policy for dividend distribution should reflect factors such as the current and future investment environment, fund requirements, domestic and international competition and capital budgets; as well as the benefit of shareholders, share bonus equilibrium, and long-term financial planning. The board of directors shall make the distribution proposal annually and present it at the shareholders' meeting. The Company's Articles of Incorporation further provide that no more than 80% of the dividends to shareholders, if any, must be paid in the form of stock dividends. Accordingly, at least 20% of the dividends must be paid in the form of cash.

The appropriation of 2005 retained earnings has not yet been recommended by the board of directors as of the date of the Report of Independent Auditors. Information on the board of directors' recommendations and shareholders' approval can be obtained from the Market Observation Post System on the website of the TSE.

The appropriation of 2004 retained earnings was approved by the board of directors on March 17, 2005. Through unanimous decision at the shareholders meeting, held on June 13, 2005, NT\$0.10 of cash dividend per share is to be distributed.

b. Effective date, percentage of acquisition and accounting treatment:

Based on the agreement and the resolution of the board of directors' meeting, the effective date of the merger was July 1, 2004. All the stocks of the dissolved company were exchanged by the surviving company's newly issued shares, and the merger was accounted for under the purchase method.

c. The period of combining the dissolved company's operating result:

The operating result for the period from July 1, 2004 to December 31, 2004 of the dissolved company was integrated into the operating result of the Company.

d. Acquisition costs and the types, quantities, and amounts of securities issued for the merger:

According to the agreement, 357,143 thousand common shares, amounting to NT\$3,571 million, were newly issued by the Company for the merger. The newly issued shares were allocated to the dissolved company's shareholders in proportion to their ownership. 2.24 common shares were exchanged for 1 new share. Since SiSMC was not a public company, there is no market value. Thus, the acquisition cost was determined based on the appraisal made by China Property Appraising Center Co., Ltd.

e. Amortization method and useful lives for goodwill or deferred credit:

The difference between the acquisition cost and the fair value of identifiable net assets was recognized as goodwill, which was to be amortized under the straight-line method for 15 years according to the Article 35 of Enterprise Mergers and Acquisitions Law of the R.O.C.

f. Contingent price, warrants, or commitments and accounting treatments in the merger contracts:
None.

g. Decisions of disposal of significant assets from the merger:
None.

h. Pro forma information on operating results:
The operating result for the period from July 1, 2004 to December 31, 2004 of the dissolved company was consolidated into the financial statements of the Company.

The pro forma operating results from January 1, 2004 to June 30, 2004 of SiSMC are included in the following pro forma information. The pro forma information on the operating results stated below is based on the assumption that the Company merged with SiSMC on January 1, 2004.

- (4) Oak Technology, Inc. (Oak) and UMC entered into a settlement agreement on July 31, 1997 concerning a complaint filed with the United States International Trade Commission (ITC) by Oak against UMC and others, alleging unfair trade practices based on alleged patent infringement regarding certain CD-ROM controllers (the first Oak ITC case). On October 27, 1997, Oak filed a civil action in a California federal district court, alleging claims for breach of the settlement agreement and fraudulent misrepresentation. In connection with its breach of contract and other claims, Oak seeks damages in excess of US\$750 million. UMC denied the material allegations of the Complaint, and asserted counterclaims against Oak for breach of contract, intentional interference with economic advantage and rescission and restitution based on fraudulent concealment and/or mistake. UMC also asserted declaratory judgment claims for invalidity and unenforceability of the relevant Oak patent. On May 2, 2001, the United States Court of Appeals for the Federal Circuit upheld findings by the ITC that there had been no patent infringement and no unfair trade practice arising out of a second ITC case filed by Oak against UMC and others. Based on the Federal Circuit's opinion and on a covenant not to sue filed by Oak, UMC's declaratory judgment patent counterclaims were dismissed from the district court case. In November 2002, UMC filed motions for summary judgment on each of Oak Technology's claims against UMC. In that same period, Oak Technology filed motions seeking summary judgment on UMC's claims for fraudulent concealment and intentional interference with economic advantage, and on various defenses asserted by UMC. In May 2005, the Court issued the following orders: (i) granting UMC's motion for summary judgment on Oak Technology's claim for breach of the settlement agreement; (ii) granting in part and denying in part UMC's motion for summary judgment on Oak Technology's claim for breach of the implied covenant of good faith and fair dealing; (iii) denying a motion by UMC for summary judgment on Oak Technology's fraud claim based on alleged patent invalidity under 35 U.S.C. § 112; (iv) granting Oak Technology's motion for summary judgment on UMC's fraudulent concealment claims; and (v) granting a motion by Oak Technology for summary judgment on certain of UMC's defenses. On February 9, 2006, the parties entered a settlement agreement in which UMC, Oak and Zoran (the successor to Oak) fully and finally released one another from any and all claims and liabilities arising out of the facts alleged in the district court case. The terms of settlement are confidential, and, except for the obligation to keep the terms confidential, impose no obligation on UMC.
- (5) The Company entered into several wafer-processing contracts with its customers. According to the contracts, the Company shall guarantee processing capacity, while these customers make deposits to the Company.

- (6) The Company has entered into contracts for the purchase of materials and masks with certain vendors. These contracts oblige the Company to purchase specified amounts or quantities of materials and masks. Should the Company fail to fulfill the conditions set out in the contracts, the differences between the actual purchase and the required minimum will be reconciled between the Company and its vendors.
- (7) On February 15, 2005, the Hsinchu District Prosecutor's Office conducted a search of the Company's facilities. On February 18, 2005, the Company's former Chairman Mr. Robert H.C. Tsao, released a public statement, explaining that its assistance to Hejian Technology Corp. (Hejian) did not involve any investment or technology transfer. Furthermore, from the very beginning Hejian had a verbal indication that, at the proper time, the Company would be compensated appropriately for its assistance, and circumstances permitting, at some time in the future, it will push through the merger between two companies. Notwithstanding the foregoing, no written agreement was made and executed at that time. Upon the Company's request to materialize the verbal indication of Hejian by compensating in the form of either cash or equity, the Chairman of the holding company of Hejian offered 15% of the outstanding shares of the holding company of Hejian in return for the Company's past assistance and for continued assistance in the future.

The holding company has already issued a total of 700 million shares and the subscription price per share in the last offering is US\$1.1. Therefore, the total market value of the holding company is estimated at over US\$700 million, with 15% of this figure being worth more than US\$110 million. Immediately after the Company had received the offer, it filed an application with the Investment Commission of the Ministry of Economic Affairs on March 18, 2005 (Ref. No. 94-Lian-Tung-Tzu-0222), for their executive guidance for the successful transfer of said shares to the Company. Furthermore, the representative of Hejian is putting the shares in escrow to protect the Company's interests. In the event Hejian distributes any stock dividend or cash dividend, the Company's stake in Hejian will accumulate accordingly.

In April 2005, the Company's former Chairman Mr. Robert H.C. Tsao was personally fined with in the aggregate amount of NT\$3 million by the Financial Supervisory Commission, Executive Yuan, R.O.C. (R.O.C. SFC) for failure to disclose material information relating to Hejian in accordance with applicable rules. As a result of the imposition of the fines by the R.O.C. FSC, the Company was also fined in the amount of NT\$30,000 by Taiwan Stock Exchange (TSE) for the alleged non-compliance with the disclosure rules in relation to the material information. The Company and its former Chairman Mr. Robert H.C. Tsao have filed for administrative appeal and reconsideration with R.O.C. SFC and TSE, respectively. As of December 31, 2005, the result of such reconsideration and administrative appeal has not been finalized.

8. SIGNIFICANT DISASTER LOSS

None.

9. SIGNIFICANT SUBSEQUENT EVENT

- (1) For the Company's assistance to Hejian Technology Corp., the Company's former Chairman. Mr. Robert H.C. Tsao, former Vice Chairman Mr. John Hsuan, and Mr. Duen-Chian Cheng, the General Manager of Fortune Venture Capital Corp., which is 99.99% owned by the Company, were indicted on charges of breaking the Business Accounting Law and giving rise to breach of trust under the Criminal Law by Hsinchu District Court's Prosecutor's Office on January 9, 2006.

Mr. Robert H.C. Tsao and Mr. John Hsuan had officially resigned from their positions of the Company's Chairman, Vice Chairman and directors prior to the announcement of public prosecution; for this reason, at the time of public prosecution, Mr. Robert H.C. Tsao and Mr. John Hsuan no longer served as the Company's directors and had not executed their duties as the Company's Chairman and Vice Chairman. Any future consequences of the public prosecution would be Mr. Robert H.C. Tsao and Mr. John Hsuan and Mr. Duen-Chian Cheng's personal concerns; the Company would not be subject to the indictment regarding to such case.

On February 15, 2006, the Company was fined in the amount of NT\$5 million on the grounds of unauthorized investment activities in Mainland China, implicating the violation of Article 35 of the Act Governing Relations Between Peoples of the Taiwan Area and the Mainland Area by the R.O.C. Ministry of Economic Affairs. However, as the Company believes it was unreasonably fined, will file an administrative appeal pursuant to relevant laws.

- (2) On January 27, 2006, the Company had sold 58,500 thousand shares of Hsun Chieh Investment Co., Ltd. resulting in the shareholding percentage dropping from 99.97% to 36.49%. For that reason, Hsun Chieh Investments Co., Ltd. was no longer a subsidiary of the Company and thus any shares of the Company held by Hsun Chieh Investments Co., Ltd. shall be reclassified from treasury stock to long-term investments in the Company's books, of which NT\$10,881 million was recorded in effect under long-term investments and stockholders' equity, respectively.
- (3) The board of directors' meeting held on February 15, 2006, has approved a purchase plan of 1 billion treasury stocks from the TSE for the purpose of maintaining the interest of the Company's creditability and its shareholders, starting February 16, 2006 till April 15, 2006.

The methods and assumptions used to measure the fair value of financial instruments are as follows:

- a. The book values of short-term financial instruments approximate to fair values due to their short maturities. Short-term financial instruments include cash and cash equivalents, notes receivable, accounts receivable, short-term loans, current portion of capacity deposits, and payables.
- b. If the fair values of credit-linked deposits and repackaged bonds are not available, the book values at the balance sheet date are used as the fair value. The majority of investment portfolios of the credit-linked deposits and repackaged bonds are in the form of corporate bonds with maturity of two years or less.

- c. The fair values of marketable securities and long-term investments are based on the quoted market value. If the market values of marketable securities and long-term investments are unavailable, the Company will assess all other available information to determine the fair values.
 - d. The fair values of deposits-out are based on the book values since the collecting dates cannot be ascertained.
 - e. The fair values of bonds payable are determined by the market value. The book values of long-term loans approximate the fair values as the loans bearing floating rates.
 - f. The fair values of derivative financial instruments are based on the amount the Company expects to receive (positive) or to pay (negative) assuming that the contracts are settled early at the balance sheet date.
- (3) The Company and its subsidiary, UMCJ, held credit-linked deposits and repackaged bonds for the earning of interest income. Details are disclosed as follows:

b. Credit risk

The counterparties of the above investments are major international financial institutions. The repayment in full of these investments is subject to the non-occurrence of one or more credit events, which are referenced to the entities' fulfillment of their own obligations as well as repayment of their corporate bonds. Upon the occurrence of one or more of such credit events, the Company and its subsidiary, UMC Japan, may receive nil or less than full amount of these investments. The Company and its subsidiary, UMC Japan, have selected reference entities with high credit ratings to minimize the credit risk.

c. Liquidity risk

Early withdrawal is not allowed for the above investments unless called by the issuer. However, the anticipated liquidity risk is low since most of the investments will be matured within two years or are relatively liquid in the secondary market.

d. Market risk

There is no market risk for the above investments except for the fluctuations in the exchange rates of US Dollars and Japanese Yen to NT Dollars at the balance sheet date and the settlement date.

(4) The Company entered into interest rate swaps and forward contracts, and its subsidiary, UMC Japan, entered into forward contracts for hedging the interest rate risks arising from the counter-floating rate of domestic bonds and for hedging the exchange rate risks arising from the net assets or liabilities denominated in foreign currency. The hedging strategy was developed with the objective to reduce the market risk, and not for trading purpose. The relevant information on the derivative financial instruments entered into by the Company and its subsidiary, UMC Japan, is as follows:

a. The Company utilized interest rate swap agreements to hedge its interest rate risks on its counter-floating rate domestic bonds issued from May 21 to June 24, 2003. The periods of the interest rate swap agreements are the same as those of the domestic bonds, which are five and seven years. The floating rate is reset annually. The details of interest rate swap agreements are summarized as follows:

As of December 31, 2005 and 2004, the Company had the following interest rate swap agreements in effect:

Notional Amount	Contract Period	Interest Rate Received	Interest Rate Paid
NT\$7,500 million	May 20, 2003 to May 20, 2008	4.0% minus USD	
		12-Month LIBOR	1.52%
		4.3% minus USD	
NT\$7,500 million	May 20, 2003 to May 20, 2010		
		12-Month LIBOR	1.48%

b. The details of forward contracts entered into by the Company and its subsidiary, UMC Japan, are summarized as follows:

As of December 31, 2004

The Company

Type	Notional Amount	Contract Period
Forward contracts	Sell USD 77 million	December 23, 2004 to January 20, 2005

UMC Japan

Type	Notional Amount	Contract Period
Forward contracts	Sell USD 10 million	December 30, 2004 to January 4, 2005

c. Transaction risk

(a) Credit risk

There is no significant credit risk exposure with respect to the above transactions because the counterparties are reputable financial institutions with good global standing.

(b) Liquidity and cash flow risk

The cash flow requirements on the interest rate swap agreements are limited to the net interest payables or receivables arising from the differences in the swap rates. The cash flow requirements on forward contracts are limited to the net difference between the forward and spot rates at the settlement date. Therefore, no significant cash flow risk is anticipated since the working capital is sufficient to meet the cash flow requirements.

(c) Market risk

Interest rate swap agreements and forward contracts are intended for hedging purposes. Gains or losses arising from the fluctuations in interest rates and exchange rates are likely to be offset against the gains or losses from the hedged items. As a result, no significant exposure to market risk is anticipated.

d. The presentation of derivative financial instruments on financial statements

The net receivables or payables resulting from interest rate swap and forward contracts were recorded under current assets or current liabilities.

The Company

As of December 31, 2005 and 2004, the balances of current liabilities and current assets arising from interest rate swap were NT\$96 million and NT\$36 million, respectively.

REPORT OF INDEPENDENT AUDITORS

English Translation of a Report Originally Issued in Chinese

To the Board of Directors and Shareholders of

United Microelectronics Corporation

We have audited the accompanying consolidated balance sheets of United Microelectronics Corporation and subsidiaries as of December 31, 2005 and 2004, and the related consolidated statements of income, changes in stockholders' equity and cash flows for the years ended December 31, 2005 and 2004. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. As described in Note 4(7) to the consolidated financial statements, certain long-term investments were accounted for under the equity method based on the 2005 and 2004 financial statements of the investees, which were audited by other auditors. Our opinion insofar as it relates to the investment income amounting to NT\$1,031 million and NT\$885 million for the years ended December 31, 2005 and 2004, respectively, and the related long-term investment balances of NT\$6,253 million and NT\$7,194 million as of December 31, 2005 and 2004, respectively, is based solely on the reports of the other auditors.

We conducted our audits in accordance with auditing standards generally accepted in the Republic of China and Guidelines for Certified Public Accountants' Examination and Reports on Financial Statements, which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall consolidated financial statement presentation. We believe that our audits and the reports of the other auditors provide a reasonable basis for our opinion.

In our opinion, based on our audits and the reports of other auditors, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of United Microelectronics Corporation and subsidiaries as of December 31, 2005 and 2004, and the results of their operations and their cash flows for the years ended December 31, 2005 and 2004, in conformity with the Guidelines Governing the Preparation of Financial Reports by Securities Issuers and accounting principles generally accepted in the Republic of China.

As described in Note 3 to the financial statements, effective from January 1, 2005, United Microelectronics Corporation and subsidiaries have adopted the R.O.C. Statement of Financial Accounting Standards No.35 Accounting for Asset Impairment to account for the impairment of its assets.

As described in Note 3 to the financial statement, effective from January 1, 2005, United Microelectronics Corporation and subsidiaries have adopted the R.O.C. Statement of Financial Accounting Standards No.5 Accounting for Long-term Equity Investment.

As described in Note 3 to the financial statement, effective from January 1, 2005, Investees are consolidated into United Microelectronics Corporation and subsidiaries in accordance with the amendments to the R.O.C. statement of Financial Accounting Standards No. 7 Consolidation of Financial Statements.

UNITED MICROELECTRONICS CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2005 and 2004

(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

1. HISTORY AND ORGANIZATION

United Microelectronics Corporation (the Company) was incorporated in May 1980 and commenced operations in April 1982. The Company is a full service semiconductor wafer foundry, and provides a variety of services to satisfy individual customer's needs. These services include intellectual property, embedded IC design, design verification, mask tooling, wafer fabrication, and testing. The Company's common shares were publicly listed on the Taiwan Stock Exchange (TSE) in July 1985 and its American Depository Shares (ADSs) were listed on the New York Stock Exchange (NYSE) in September 2000.

Based on the resolution of the board of directors' meeting on February 26, 2004, the effective date of the merger with SiS Microelectronics Corp. (SiSMC) was July 1, 2004. The Company was the surviving company, and SiSMC was the dissolved company. The merger was approved by the relevant government authorities. All the assets, liabilities, rights, and obligations of SiSMC have been fully incorporated into the Company since July 1, 2004.

Based on the resolution of the board of directors' meeting on August 26, 2004, UMCi had transferred its businesses, operations, and assets to its newly incorporated Singapore branch (the Branch) since April 1, 2005.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The financial statements were prepared in conformity with the Guidelines Governing the Preparation of Financial Reports by Securities Issuers and accounting principles generally accepted in the Republic of China (R.O.C.).

Summary of significant accounting policies is as follows:

General Descriptions of Reporting Entities

Investees in which the Company, directly or indirectly, holds more than 50% of voting rights or de facto control, are consolidated into the Company's financial statements in accordance with the amendments to the R.O.C. Statements of Financial Accounting Standards (SFAS) No.7 Consolidation of Financial Statements (the Company and the consolidated entities are hereinafter referred to as the Group). Summary of listed subsidiaries in the consolidation report is as follows:

Note 1: In 2004, the Company held above 50% of voting rights in these subsidiaries. However, in accordance to the pre-amended R.O.C. SFAS No.7, these subsidiaries are excluded from consolidation as both of the following conditions are met: 1) total assets or operating revenue of each subsidiary do not exceed 10% of the respective totals of the Company and, 2) the totals of combined assets or operating revenue of those subsidiaries do not exceed 30% of the respective total of the Company.

Note 2: United Foundry Service, Inc. has completed the liquidation process in April 2005.

Note 3: Based on the resolution of the board of directors meeting on August 26, 2004, UMCi had transferred its businesses, operations, and assets to the Branch since April 1, 2005.

Note 4: In conformity to the R.O.C. SFAS No.7, the Company had ceased to consolidate the gains and losses of the subsidiary and its investees in preparing the consolidated financial statements as of June 27, 2005, the day the Company no longer possessed control over the subsidiary.

Note 5: As the Company held less than 50% of voting rights, the subsidiary was excluded from consolidation.

Note 6: Based on the resolution of the board of directors meeting in November 2002, IVCF was to be liquidated. The liquidation process was completed during the first quarter of 2005.

Principles of Consolidation

Starting 2005, the Company's consolidated financial statements were prepared in conformity to the R.O.C. SFAS No.7. Investees in which the Company and subsidiaries hold more than 50% of voting rights, including those that are exercisable or convertible, are accounted for under the equity method and shall be consolidated, since the Company and subsidiaries are considered to possess control. Consolidation of an entity shall also be implemented if any of the following circumstances exists:

- i. the total amount of voting rights held in the investee exceeds 50% due to agreement with other investors
- ii. as permitted by law, or by contract agreements, the Company controls an entity's finances, operations and personnel affairs
- iii. the Company has authority to appoint or discharge more than half members of board of directors (or equivalents), by whom the investee is controlled
- iv. the Company leads and controls more than half of the members of the board of directors (or equivalents), by whom the investee is controlled
- v. other indications of control possession

For 2004, the Company had applied the pre-amended R.O.C. SAFS No.7, which stated that the consolidated financial statements include the accounts of the Company and certain majority-owned (above 50%) subsidiaries. If the total assets and operating revenues of a subsidiary are less than 10% of the non-consolidated total assets and operating revenues of the Company, respectively, the subsidiary's financial statements may, at the option of the Company, not be consolidated. Irrespective of the above test, when the total combined assets or operating revenues of all such non-consolidated subsidiaries constitute up to 30% of the Company's non-consolidated total assets or operating revenues, then each individual subsidiary with total assets or operating revenues up to 3% of the Company's non-consolidated total assets or operating revenues has to be included in the consolidation. Such subsidiaries are included in the consolidated financial statements thereafter, unless the percentage of the combined total assets or operating revenues for all such subsidiaries becomes less than 20% of the Company's respective non-consolidated amount.

For both the amended and pre-amended R.O.C. No.7, the transactions between the consolidated entities were appropriately eliminated in the consolidated financial statement.

The difference between the acquisition cost and the net equity of the subsidiary is amortized over 5 years.

Foreign Currency Transactions

Transactions denominated in foreign currencies are translated into New Taiwan Dollars at the exchange rates prevailing on the transaction dates. Receivables, other monetary assets, and liabilities denominated in foreign currencies are translated into New Taiwan Dollars at the exchange rates prevailing at the balance sheet date. Exchange gains or losses are included in the current year's results. However, exchange gains or losses from investments in foreign entities are recorded as a cumulative translation adjustment in stockholders' equity.

Translation of Foreign Currency Financial Statements

The financial statements of foreign subsidiaries are translated into New Taiwan Dollars using the spot rates as of each financial statement date for asset and liability accounts, and average exchange rates for profit and loss accounts, historical exchange rates for equity accounts, and exchange rates on dividend declaration date for dividends. The cumulative translation effects from the subsidiaries using functional currencies other than New Taiwan Dollars are included in the cumulative translation adjustment in stockholders' equity.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that will affect the amount of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the reported period. The actual results may differ from those estimates.

Cash Equivalents

Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and with maturity dates that do not present significant risks on changes in value resulting from changes in interest rates, including commercial paper with original maturities of three months or less.

Marketable Securities

Marketable securities are recorded at cost at acquisition and are stated at the lower of aggregate cost or market value at the balance sheet date. Cash dividends are recognized as dividend income at the point of receipt. Costs of bond funds, equity funds, and short-term notes are identified specifically while other marketable securities are determined on the weighted-average method. The market values of listed debts, equity securities and closed-end funds are determined by the average closing price during the last month of the fiscal year. The market value for open-end funds is determined by the net asset value at the balance sheet date. The amount by which the aggregate cost exceeds the market value is reported as a loss in the current year. In subsequent periods, recoveries of the market value are recognized as a gain to the extent that the market value does not exceed the original aggregate cost of the investment.

Allowance for Doubtful Accounts

The allowance for doubtful accounts is provided based on management's judgment and on the evaluation of collectibility and aging analysis of accounts and other receivables.

Inventories

Inventories are accounted for on a perpetual basis. Raw materials are recorded at actual purchase costs, while the work in process and finished goods are recorded at standard costs and adjusted to actual costs using the weighted-average method at the end of each month. Inventories are stated at the lower of aggregate cost or market value at the balance sheet date. The market values of raw materials and supplies are determined on the basis of replacement cost while the work in process and finished goods are determined by net realizable values. An allowance for loss on decline in market value and obsolescence is provided, when necessary.

Long-term Investments

Long-term investments are recorded at acquisition cost. Investments acquired by contribution of technological know-how are credited to deferred credits among affiliates, which will be amortized to income over a period of 5 years.

Investments of less than 20% of the outstanding voting rights in listed investees, where significant influence on operating decisions of the investees does not reside with the Group, are accounted for by the lower of aggregate cost or market value method. The unrealized loss resulting from the decline in market value of investments that are held for the purpose of long-term investment is deducted from the stockholders' equity. The market value is determined by the average closing price during the last month of the fiscal year. Investments of less than 20% of the outstanding voting rights in unlisted investees are accounted for under the cost method. Impairment losses for the investees will be recognized if an other than temporary impairment is evident and that the book value after recognizing the losses shall be treated as the new cost basis of such investment.

Investment income or loss from investments in both listed and unlisted investees is accounted for under the equity method provided that the Group owns at least 20% of the outstanding voting shares of the investees or has significant influence on operational decisions of the investees. The difference of the acquisition cost and the underlying equity in the investee's net assets is amortized over 5 years.

The change in the Group's proportionate share in the net assets of its investee resulting from its subscription to additional shares of stock, issued by such investee, at a rate not proportionate to its existing equity ownership in such investee, is recorded to the capital reserve and long-term investments account.

Unrealized intercompany gains and losses arising from downstream transactions with investees accounted for under the equity method are eliminated in proportion to the Group's ownership percentage while those from transactions with majority-owned (above 50%) subsidiaries are eliminated entirely.

Unrealized intercompany gains and losses arising from upstream transactions with investees accounted for under the equity method are eliminated in proportion to the Group's ownership percentage. Unrealized intercompany gains and losses arising from transactions between investees accounted for under the equity method are eliminated in proportion to the multiplication of the Group's ownership percentage; while those arising from transactions between majority-owned subsidiaries are eliminated in proportion to the Group's ownership percentage in the subsidiary incurred with a gain or loss.

If the recoverable amount of investees accounted for under the equity method is less than its carrying amount, the difference is to be recognized as impairment loss in the current period.

Property, Plant and Equipment

Property, plant and equipment are stated at cost. Interest incurred on loans used to finance the construction of property, plant and equipment is capitalized and depreciated accordingly.

Maintenance and repairs are charged to expense as incurred. Significant renewals and improvements are treated as capital expenditures and are depreciated accordingly. When property, plant and equipment are disposed, their original cost and accumulated depreciation are to be written off and the related gain or loss is classified as non-operating income or expenses. Idle assets are transferred to other assets according to the lower of net book or net realizable value, with the difference charged to non-operating expenses. The corresponding depreciation expenses provided are also classified as non-operating expenses.

Depreciation is provided on the straight-line basis using the estimated economic life of the assets less salvage value, if any. When the estimated economic life expires, property, plant and equipment, which are still in use, are depreciated over the newly estimated useful life using the salvage value. The estimated economic life of the property, plant and equipment is as follows: buildings - 3 to 50 years; machinery and equipment - 3 to 6 years; transportation equipment - 2 to 5 years; furniture and fixtures - 2 to 20 years; leased assets and leasehold improvements - the lease period, or estimated economic life, whichever is shorter.

Intangible Assets

Goodwill arising from the merger is amortized using the straight-line method over 15 years. As a result of the reorganization of UMCi Ltd., goodwill arising from the reorganization is amortized over 5 years. Technology know-how is stated at cost of acquisition and amortized over its estimated economic life using the straight-line method.

The Group assesses whether there is any indication of impairment other than temporary. If any such indication exists, the recoverable amount is estimated and impairment loss shall be recognized accordingly. The book value after recognizing the impairment loss shall be recorded as the new cost.

Deferred Charges

Deferred charges are stated at cost and amortized on a straight-line basis as follows: bonds issuance costs - over the life of the bonds, patent license fees - the term of contract or estimated economic life of the related technology, and software - 3 years.

The Group assesses whether there is any indication of impairment other than temporary. If any such indication exists, the recoverable amount is estimated and impairment loss shall be recognized accordingly. The book value after recognizing the impairment loss shall be recorded as the new cost.

Convertible and Exchangeable Bonds

The issuance costs of convertible and exchangeable bonds are classified as deferred charges and amortized over the life of the bonds.

The excess of the stated redemption price over the par value is accrued as compensation interest payable over the redemption period, using the effective interest method.

When convertible bondholders exercise their conversion rights, the book value of bonds is credited to common stock at an amount equal to the par value of the common stock and the excess is credited to capital reserve; no gain or loss is recognized on bond conversion.

When exchangeable bondholders exercise their rights to exchange for the reference shares, the book value of the bond is to be offset against the book value of the investment in reference shares and the related stockholders' equity accounts, with the difference recognized as gain or loss on disposal of investments.

Pension Plan

All regular employees are entitled to a defined benefit pension plan that is managed by an independently administered pension fund committee within the Company and domestic subsidiaries. The fund is deposited under the committee's name in the Central Trust of China and hence, not associated with the Company. Therefore the fund shall not be included in the Company's financial statements. Pension benefits for employees of the Branch and oversea subsidiaries are provided in accordance with the local regulations.

The Labor Pension Act of R.O.C. (the Act), which adopts a defined contribution plan, became effective on July 1, 2005. In accordance with the Act, employees may choose to elect either the Act, by retaining their seniority before the enforcement of the Act, or the pension mechanism of the Labor Standards Law. For employees who elect the Act, the Company will make monthly contributions of no less than 6% of the employees monthly wages to the employees individual pension accounts.

The accounting for pension is computed in accordance with the R.O.C. SFAS No.18. For the defined benefit pension, the net pension cost is calculated based on an actuarial valuation, and pension cost components such as service cost, interest cost, expected return on plan assets, the amortization of net obligation at transition, pension gain or loss, and prior service cost, are all taken into consideration. For the defined contribution pension, the Company recognizes the pension amount as expense in the period in which the contribution becomes due.

Employee Stock Option Plan

The Group applies the intrinsic value method to recognize the difference between the market price of the stock and the exercise price of its employee stock option as compensation cost. Starting January 1, 2004, the Group also discloses pro forma net income and earnings per share under the fair value method for only these options granted since January 1, 2004.

Treasury Stock

The Group adopted the R.O.C SFAS No. 30, which requires that treasury stock held by the Group itself shall be accounted for under the cost method. Cost of treasury stock is shown as a deduction to stockholders equity, while gain or loss from selling treasury stock is treated as an adjustment to the capital reserve. The Group s stock held by its subsidiaries is also treated as treasury stock in the Group s account.

Revenue Recognition

The main sales term of the Group is Free on Board (FOB) or Free Carrier (FCA). Revenue is recognized when ownership and liability for risk of loss or damage to the products have been transferred to customers, usually upon shipment. Sales returns and discounts taking into consideration customers complaints and past experiences are accrued in the same year of sales.

Capital Expenditure versus Operating Expenditure

Expenditure shall be capitalized when it is probable that future economic benefits associated with the expenditure will flow to the Group and the expenditure amount exceeds a predetermined level. Otherwise it is charged as expense when incurred.

Income Tax

The Group adopted the R.O.C. SFAS No. 22 Accounting for Income Taxes for inter-period and intra-period income tax allocation. Provision for income tax includes deferred income tax resulting from temporary differences, loss carry-forward and investment tax credits. Deferred income tax assets and liabilities are recognized for the expected tax consequences of temporary differences between the tax bases of assets and liabilities and their reported amounts in the financial statements using enacted tax rates and laws that will be in effect when the difference is expected to reverse. Valuation allowance on deferred income tax assets is provided to the extent that it is more likely than not that the tax benefits will not be realized.

According to the R.O.C SFAS No. 12, the Group recognized the tax benefit from the purchase of equipment and technology, research and development expenditure, employee training, and certain equity investments, by the flow-through method.

Income tax (10%) on unappropriated earnings is recorded as expense in the year when the shareholders have resolved that the earnings shall be retained.

Earnings per Share

Earnings per share is computed according to the R.O.C.o SFAS No. 24. Basic earnings per share is computed by dividing net income (loss) by weighted average number of shares outstanding during the year. Diluted earnings per share is computed by taking basic earnings per share into consideration plus additional common shares that would have been outstanding if the dilutive share equivalents had been issued. The net income (loss) would also be adjusted for the interest and other income or expenses derived from any underlying dilutive share equivalents. The weighted average outstanding shares are adjusted retroactively for stock dividends and bonus share issues.

Derivative Financial Instruments

The interest rate swap agreements entered into for hedging purposes are accounted for on a net accrual basis in accordance with the contractual interest rate as an adjustment to the interest income or expense of the hedged items.

Foreign exchange forward contracts are held to hedge the exchange rate risk arising from net assets or liabilities denominated in foreign currency. These forward contracts are translated and recorded using the spot rate at the inception of the contracts, and the discount or premium of the forward contracts is amortized over their lifespan. The difference between the spot rate at the inception of a forward contract and the spot rate at the balance sheet date is reflected in the statement of income. The receivables and payables of the foreign exchange

forward contracts are offset and the resulting balances are recorded as either assets or liabilities. Exchange gains or losses from the settlement of forward contracts are included in the current period's earnings.

Asset Impairment

Pursuant to the R.O.C. SFAS No. 35, the Group assesses indicators of impairment for all its assets, except for goodwill, within the scope of the standard at each balance sheet date. If impairment is indicated, the Group compares the carrying amount with the recoverable amount of the assets or the cash-generating unit (CGU) and writes down the carrying amount to the recoverable amount where applicable. The recoverable amount is defined as the higher of fair values less the costs to sell and the values in use.

For previously recognized losses, the Group assesses, at the balance sheet date, whether there is any indication that the impairment loss may no longer exist or may have diminished. If there is any such indication, the Group recalculates the recoverable amount of the asset. If the recoverable amount increases as a result of the increase in the estimated service potential of the assets, the Group reverses the impairment loss such that the resulting carrying amount of the asset shall not exceed the amount (net of amortization or depreciation), that would otherwise result had no impairment loss been recognized for the assets in prior years.

In addition, a goodwill-allocated CGU or group of CGUs is tested for impairment each year, regardless of whether impairment is indicated. If an impairment test reveals that the carrying amount (including goodwill) of CGU or group of CGUs is greater than its recoverable amount, there is an impairment loss. In allocating impairment losses, the portion of goodwill allocated shall be written down first. After goodwill has been written off, the remaining impairment loss, if any, is to be shared among the other assets pro rata to their carrying amount.

The write-down in goodwill cannot be reversed under any circumstances in the subsequent period.

Impairment loss (reversal) is classified as non-operating loss/ (income).

Merger

The Company merged with SiSMC and recognized the sum of the difference between the acquisition costs, which are the market price of equity stocks issued and other related costs, and the fair value of the identifiable net assets acquired as goodwill in compliance with the R.O.C. SFAS No. 25 Enterprise Mergers Accounting of Purchase Method. The fair value of identifiable net assets and goodwill deducted from the par value of the equity stocks issued and other related costs is recognized as capital reserve.

3. ACCOUNTING CHANGE

The Company had adopted the R.O.C. SFAS No. 35, Accounting for Asset Impairment to account for the impairment of its assets for its financial statements started on and after January 1, 2005. No retroactive adjustment is required under the standard. Such a change in accounting principles resulted in a NT\$370 million decrease on the consolidated net income, and a decrease of NT\$0.02 on the basic and diluted earnings per share for the year ended December 31, 2005.

Pursuant to the amendments of the R.O.C. SFAS No.5, certain income or loss of the equity investees were recognized based on the gains or losses incurred in the current period and cannot be deferred to the next year. As a result of the prospective amendment, the consolidated net income and the basic and diluted earnings per share for the year of 2005 are reduced by NT\$113 million and NT\$0.01, respectively.

Effective from January 1, 2005, the Company has adopted the R.O.C. SFAS No. 7 Consolidation of Financial Statements. Investees are consolidated into the Group when the Company, directly or indirectly, holds more than 50% of the voting rights or de facto control of the investees. As a result of the amendment, the consolidated net income and the basic and diluted earnings per share for the year of 2005 remained unchanged.

Note A: The equity method was applied for investees, in which the Group held the highest percentage of the outstanding voting rights and had significant influences on operating decisions.

Note B: The equity method was applied for investees, in which the total ownership held by the Group and its subsidiaries is over 20%.

Note C: In the third quarter of 2004 the Group recognized a permanent loss of NT\$85 million as the decline in market value was deemed irrecoverable. Since January 1, 2005, the Group was no longer a majority stockholder of United Fu Shen Chen Technology Corp. Thus the cost method was appropriately applied instead of the equity method.

Note D: The unrealized balance of deferred gains or losses arising from the transfer of equity investment ownership among the affiliated companies including downstream, upstream, and intercompany transactions.

Note E: As of August 1, 2005, the Group's former investee, Epitech Technology Corp. (accounted for under the cost method) merged into South Epitaxy Co., Ltd. and was retained as Epitech Technology Corp. One share of the former investee, Epitech Technology Corp. was exchanged for 1.36 shares of Epitech Technology Corp. As the Group held less than 20% voting rights and had no significant influences, the cost method was applied.

Note F: As of September 1, 2005 the Group's former investee, Aptos (Taiwan) Corp. (accounted for under the equity method), merged into Chipbond Technology Corp. Three shares of Aptos (Taiwan) Corp. were exchanged for 1 share of Chipbond Technology Corp. As the Group held less than 20% voting rights and had no significant influences, the cost method was applied.

Note G: The amount represented the investment in limited partnership without voting rights. As the Group was not able to exercise significant influences, the investments were accounted for under the cost method.

Note H: As of December 2005 and 2004, the Group held 77,625 thousand and 71,215 thousand AU Optronics Corp. shares; among the shares held by the Group, 73,566 thousand and 66,109 thousand shares were utilized as reference shares for the Group's zero coupon exchangeable bonds, for year 2005 and 2004, respectively.

Note I: The amount represented the investments in preferred shares. As the Group did not possess voting rights and significant influences, the cost method was applied.

- b. Investment income accounted for under the equity method, which were based on the audited financial statements of the investees, were NT\$1,097 million and NT\$552 million for the years ended December 31, 2005 and 2004, respectively. Among which, investment income amounting to NT\$1,031 million and NT\$885 million for the years ended December 31, 2005 and 2004, respectively, and the related long-term investment balances of NT\$6,253 million and NT\$7,194 million as of December 31, 2005 and 2004, respectively, were determined based on the investees' financial statements audited by other auditors.

- c. Pursuant to the amendments of the R.O.C. SFAS No.5, investment income (loss) of Uwave Technology Corp., SerComm Corp., HARVATEK Corp., Patentop, Ltd., UC Fund II, RiRa Electronics Corp., VistaPoint, Inc., Afa Technology, Inc., Star Semiconductor Corp., USBest Technology, Inc., UCA Technology, Inc., Unitruth Investment Corp., Crystal Media, Inc., U-Media Communications, Inc., AMOD Technology Co., Smedia

Technology Corp., and Aevoe Inc. were recognized based on the gain or loss incurred in the current period and cannot be deferred to next year. As a result of the adoption of the amendment, the consolidated net income and the basic and diluted earnings per share for the year of 2005 were reduced by NT\$113million and NT\$0.01, respectively.

- d. The long-term investments were not pledged.

- f. The shares of the Company held by subsidiaries pledged as collateral to secure these loans are detailed in Note 6.

(18) RETAINED EARNINGS AND DIVIDEND POLICIES

According to the Company's Articles of Incorporation, current year's earnings, if any, shall be distributed in the following order:

- a. Payment of all taxes and dues;

- b. Offset prior years' operation losses;

- c. Set aside 10% of the remaining amount after deducting items (a) and (b) as a legal reserve;

- d. Set aside 0.1% of the remaining amount after deducting items (a), (b), and (c) as directors' and supervisors' remuneration; and

- e. After deducting items (a), (b), and (c) above from the current year's earnings, no less than 5% of the remaining amount together with the prior years' unappropriated earnings is to be allocated as employees' bonus which will be settled through issuance of new shares of the Company, or cash. Employees of the Company's subsidiaries, meeting certain requirements determined by the board of directors, are also eligible for the employees' bonus.
- f. The distribution of the remaining portion, if any, will be recommended by the board of directors and approved through the shareholders' meeting.

The Company is currently in its growth stage; the policy for dividend distribution should reflect factors such as the current and future investment environment, fund requirements, domestic and international competition and capital budgets; as well as the benefit of shareholders, share bonus equilibrium, and long-term financial planning. The board of directors shall make the distribution proposal annually and present it at the shareholders' meeting. The Company's Articles of Incorporation further provide that no more than 80% of the dividends to shareholders, if any, must be paid in the form of stock dividends. Accordingly, at least 20% of the dividends must be paid in the form of cash.

The appropriation of 2005 retained earnings has not been recommended by the board of the directors as the date of the Report of Independent Auditors. Information on the board of directors' recommendations and shareholders' approval can be obtained from the Market Observation Post System on the website of the TSE.

The appropriation of 2004 retained earnings was approved by the board of directors on March 17, 2005. Through unanimous decision at the shareholders' meeting, held on June 13, 2005, NT\$0.10 of cash dividend per share is to be distributed.

Details of the 2004 employee bonus settlement and directors' and supervisors' remuneration are as follows:

Pursuant to the Article 41 of the Securities and Exchange Law of the R.O.C., a special reserve is set aside from the current net income and prior unappropriated earnings for items that are accounted for as deductions to stockholders' equity such as unrealized loss on long-term investments and cumulative translation adjustments. However, there are the following exceptions for the Company's investees' unrealized loss on long-term investments arising from the merger which was recognized by the Company in proportion to the Company's ownership percentage:

- a. According to the explanatory letter No. 101801 of the Securities and Futures Commission (SFC), if the Company recognizes the investees' capital reserve excess from the merger in proportion to the ownership percentage then the special reserve is exempted for the amount originated from the acquisition of the long-term investments.
- b. However, if the Company and its investees transfer a portion of the capital reserve to increase capital, a special reserve equal to the amount of the transfer shall be provided according to the explanatory letter No.101801-1 of the SFC.
- c. In accordance with the explanatory letter No.170010 of the SFC applicable to listed companies, when the market value of the Company's stock held by its subsidiaries at year-end is lower than the book value, a special reserve shall be provided for in the Company's accounts in proportion to its ownership percentage.

For the 2004 appropriations approved by the shareholders' meeting on June 13, 2005, unrealized loss on long-term investments exempted from the provision of special reserve pursuant to the above regulations amounted to NT\$18,667 million.

(22) MERGER

In order to integrate resources, reduce operating costs, enlarge business scales, and improve its financial structure, profitability and global competitiveness, based on the resolution of the board of directors' meeting on February 26, 2004, the Group merged with SiSMC, the dissolved company, on July 1, 2004. The merger was approved by the relevant government authorities. All the assets, liabilities, rights, and obligations of SiSMC have been fully incorporated into the Group since July 1, 2004. The accounting treatment regarding the merger is in compliance with the R.O.C. SFAS No. 25 Enterprise Mergers - Accounting of Purchase Method.

Relevant information required by R.O.C. SFAS No. 25 is disclosed as follows:

a. Information of the dissolved company:

SiSMC was split from Silicon Integrated Systems Corp. on December 15, 2003. It was mainly engaged in manufacturing of integrated circuits and components of semiconductors.

b. Effective date, percentage of acquisition and accounting treatment:

Based on the agreement and the resolution of the board of directors' meeting, the effective date of the merger was July 1, 2004. All the stocks of the dissolved company were exchanged by the surviving company's newly issued shares, and the merger was accounted for under the purchase method.

c. The period of combining the dissolved company's operating result:

The operating result for the period from July 1, 2004 to December 31, 2004 of the dissolved company was integrated into the operating result of the Company.

d. Acquisition costs and the types, quantities, and amounts of securities issued for the merger:

According to the agreement, 357,143 thousand common shares, amounting to NT\$3,571 million, were newly issued by the Company for the merger. The newly issued shares were allocated to the dissolved company's shareholders in proportion to their ownership. 2.24 common shares were exchanged for 1 new share. Since SiSMC was not a public company, there is no market value. Thus, the acquisition cost was determined based on the appraisal made by China Property Appraising Center Co., Ltd.

e. Amortization method and useful lives for goodwill or deferred credit:

The difference between the acquisition cost and the fair value of identifiable net assets was recognized as goodwill, which was to be amortized under the straight-line method for 15 years according to the Article 35 of Enterprise Mergers and Acquisitions Law of the R.O.C.

f. Contingent price, warrants, or commitments and accounting treatments in the merger contracts:
None.

g. Decisions of disposal of significant assets from the merger:
None.

h. Pro forma information on operating results:
The operating result for the period from July 1, 2004 to December 31, 2004 of the dissolved company was consolidated into the financial statements of the Group.

The pro forma operating results from January 1, 2004 to June 30, 2004 of SiSMC are included in the following pro forma information. The pro forma information on the operating results stated below is based on the assumption that the Group merged with SiSMC on January 1, 2004.

- (5) Oak Technology, Inc. (Oak) and UMC entered into a settlement agreement on July 31, 1997 concerning a complaint filed with the United States International Trade Commission (ITC) by Oak against UMC and others, alleging unfair trade practices based on alleged patent infringement regarding certain CD-ROM controllers (the first Oak ITC case). On October 27, 1997, Oak filed a civil action in a California federal district court, alleging claims for breach of the settlement agreement and fraudulent misrepresentation. In connection with its breach of contract and other claims, Oak seeks damages in excess of US\$750 million. UMC denied the material allegations of the Complaint, and asserted counterclaims against Oak for breach of contract, intentional interference with economic advantage and rescission and restitution based on fraudulent concealment and/or mistake. UMC also asserted declaratory judgment claims for invalidity and unenforceability of the relevant Oak patent. On May 2, 2001, the United States Court of Appeals for the Federal Circuit upheld findings by the ITC that there had been no patent infringement and no unfair trade practice arising out of a second ITC case filed by Oak against UMC and

others. Based on the Federal Circuit's opinion and on a covenant not to sue filed by Oak, UMC's declaratory judgment patent counterclaims were dismissed from the district court case. In November 2002, UMC filed motions for summary judgment on each of Oak Technology's claims against UMC. In that same period, Oak Technology filed motions seeking summary judgment on UMC's claims for fraudulent concealment and intentional interference with economic advantage, and on various defenses asserted by UMC. In May 2005, the Court issued the following orders: (i) granting UMC's motion for summary judgment on Oak Technology's claim for breach of the settlement agreement; (ii) granting in part and denying in part UMC's motion for summary judgment on Oak Technology's claim for breach of the implied covenant of good faith and fair dealing; (iii) denying a motion by UMC for summary judgment on Oak Technology's fraud claim based on alleged patent invalidity under 35 U.S.C. § 112; (iv) granting Oak Technology's motion for summary judgment on UMC's fraudulent concealment claims; and (v) granting a motion by Oak Technology for summary judgment on certain of UMC's defenses. On February 9, 2006, the parties entered a settlement agreement in which UMC, Oak and Zoran (the successor to Oak) fully and finally released one another from any and all claims and liabilities arising out of the facts alleged in the district court case. The terms of settlement are confidential, and, except for the obligation to keep the terms confidential, impose no obligation on UMC.

- (6) The Company entered into several wafer-processing contracts with its customers. According to the contracts, the Company shall guarantee processing capacity, while these customers make deposits to the Company.
- (7) The Company has entered into contracts for the purchase of materials and masks with certain vendors. These contracts oblige the Company to purchase specified amounts or quantities of materials and masks. Should the Company fail to fulfill the conditions set out in the contracts, the differences between the actual purchase and the required minimum will be reconciled between the Company and its vendors.
- (8) On February 15, 2005, the Hsinchu District Prosecutor's Office conducted a search of the Company's facilities. On February 18, 2005, the Company's former Chairman Mr. Robert H.C. Tsao, released a public statement, explaining that its assistance to Hejian Technology Corp. (Hejian) did not involve any investment or technology transfer. Furthermore, from the very beginning Hejian had a verbal indication that, at the proper time, the Company would be compensated appropriately for its assistance, and circumstances permitting, at some time in the future, it will push through the merger between two companies. Notwithstanding the foregoing, no written agreement was made and executed at that time. Upon the Company's request to materialize the verbal indication of Hejian by compensating in the form of either cash or equity, the Chairman of the holding company of Hejian offered 15% of the outstanding shares of the holding company of Hejian in return for the Company's past assistance and for continued assistance in the future.

The holding company has already issued a total of 700 million shares and the subscription price per share in the last offering is US\$1.1. Therefore, the total market value of the holding company is estimated at over US\$700 million, with 15% of this figure being worth more than US\$110 million. Immediately after the Company had received the offer, it filed an application with the Investment Commission of the Ministry of Economic Affairs on March 18, 2005 (Ref. No. 94-Lian-Tung-Tzu-0222), for their executive guidance for the successful transfer of said shares to the Company. Furthermore, the representative of Hejian is putting the shares in escrow to protect the Company's interests. In the event Hejian distributes any stock dividend or cash dividend, the Company's stake in Hejian will accumulate accordingly.

In April 2005, the Company's former Chairman Mr. Robert H.C. Tsao was personally fined with in the aggregate amount of NT\$3 million by the Financial Supervisory Commission, Executive Yuan, R.O.C. (R.O.C. SFC) for failure to disclose material information relating to Hejian in accordance with applicable rules. As a result of the imposition of the fines by the R.O.C. FSC, the Company was also fined in the amount of NT\$30,000 by Taiwan Stock Exchange (TSE) for the alleged non-compliance with the disclosure rules in relation to the material information. The Company and its former Chairman Mr. Robert H.C. Tsao have filed for administrative appeal and reconsideration with R.O.C. SFC and TSE, respectively. As of December 31, 2005, the result of such reconsideration and administrative appeal has not been finalized.

8. SIGNIFICANT DISASTER LOSS

None.

9. SIGNIFICANT SUBSEQUENT EVENTS

- (1) For the Company's assistance to Hejian Technology Corp., the Company's former Chairman Mr. Robert H.C. Tsao, former Vice Chairman Mr. John Hsuan, and Mr. Duen-Chian Cheng, the General Manager of Fortune Venture Capital Corp., which is 99.99% owned by the Company, were indicted on charges of breaking the Business Accounting Law and giving rise to breach of trust under the Criminal Law by Hsinchu District Court's Prosecutor's Office on January 9, 2006.

Mr. Robert H.C. Tsao and Mr. John Hsuan had officially resigned from their positions of the Company's Chairman, Vice Chairman and directors prior to the announcement of public prosecution; for this reason, at the time of public prosecution, Mr. Robert H.C. Tsao and Mr. John Hsuan no longer served as the Company's directors and had not executed their duties as the Company's Chairman and Vice Chairman. Any future consequences of the public prosecution would be Mr. Robert H.C. Tsao and Mr. John Hsuan and Mr. Duen-Chian Cheng's personal concerns; the Company would not be subject to the indictment regarding to such case.

On February 15, 2006, the Company was fined in the amount of NT\$5 million on the grounds of unauthorized investment activities in Mainland China, implicating the violation of Article 35 of the Act Governing Relations Between Peoples of the Taiwan Area and the Mainland Area by the R.O.C. Ministry of Economic Affairs. However, as the Company believes it was unreasonably fined, will file an administrative appeal pursuant to relevant laws.

- (2) On January 27, 2006, the Company had sold 58,500 thousand shares of Hsun Chieh Investment Co., Ltd. resulting in the shareholding percentage dropping from 99.97% to 36.49%. For that reason, Hsun Chieh Investments Co., Ltd. was no longer the subsidiary of the Company and thus any shares of the Company held by Hsun Chieh Investments Co., Ltd. shall be reclassified from treasury stock to long-term investments in the Company's books, of which NT\$10,881 million was recorded in effect under long-term investments and stockholders' equity, respectively.
- (3) The board of directors' meeting held on February 15, 2006, has approved a purchase plan of 1 billion treasury stocks from the TSE for the purpose of maintaining the interest of the Company's creditability and its shareholders, starting February 16, 2006 till April 15, 2006.

The methods and assumptions used to measure the fair value of financial instruments are as follows:

- a. The book values of short-term financial instruments approximate to fair values due to their short maturities. Short-term financial instruments include cash and cash equivalents, notes receivable, accounts receivable, short-term loans, current portion of capacity deposits, and payables.
- b. If the fair values of credit-linked deposits and repackage bonds are not available, the book values at the balance sheet date are used as the fair value. The majority of investment portfolios of the credit-linked deposits and repackage bonds are in the form of corporate bonds with maturity of two years or less.
- c. The fair values of marketable securities and long-term investment are based on the quoted market value. If the market values of marketable securities and long-term investments are unavailable, the Group will assess all other available information to determine the fair values.
- d. The fair values of deposits-out are based on the book values since the collecting dates cannot be ascertained.
- e. The fair values of bonds payable are determined by the market value. The book values of long-term loans approximate the fair values as the loans bear floating rates.
- f. The fair values of derivative financial instruments are based on the amount the Group expects to receive (positive) or to pay (negative) assuming that the contracts are settled early at the balance sheet date.

b. Credit risk

The counterparties of the above investments are major international financial institutions. The repayment in full of these investments is subject to the non-occurrence of one or more credit events, which are referenced to the entities' fulfillment of their own obligations as well as repayment of their corporate bonds. Upon the occurrence of one or more of such credit events, the Company and its subsidiary, UMC Japan, may receive nil or less than full amount of these investments. The Company and its subsidiary UMCJ have selected reference entities with high credit ratings to minimize the credit risk.

c. Liquidity risk

Early withdrawal is not allowed for the above investments unless called by the issuer. However, the anticipated liquidity risk is low since most of the investments will reach maturity within two years and are relatively liquid in the secondary market.

d. Market risk

There is no market risk for the above investments except for the fluctuations in the exchange rates of US Dollars and Japanese Yen to NT Dollars at the balance sheet date and the settlement date.

- (4) The Company entered into interest rate swap and forward contracts and its subsidiaries, UMC Japan, entered into forward contracts for hedging the interest rate risks arising from the counter-floating rate of domestic bonds and for hedging the exchange rate risks arising from the net assets or liabilities denominated in foreign currency. The hedging strategy was developed with the objective to reduce the market risk, and not for trading purpose. The relevant information on the derivative financial instruments entered into by the Company and its subsidiaries, UMC Japan, is as follows:

- a. The Company utilized interest rate swap agreements to hedge its interest rate risks on its counter-floating rate domestic bonds issued from May 21 to June 24, 2003. The periods of the interest rate swap agreements are the same as those of the domestic bonds, which are five and seven years. The floating rate is reset annually. The details of interest rate swap agreements are summarized as follows:

As of December 31, 2005, and 2004, the Company had the following interest rate swap agreements in effect:

Notional Amount	Contract Period	Interest Rate Received	Interest Rate Paid
NT\$7,500 million	May 20, 2003 to May 20, 2008	4.0% minus USD	
		12-month LIBOR	1.52%
NT\$7,500 million	May 20, 2003 to May 20, 2010	4.3% minus USD	
		12-month LIBOR	1.48%

b. The details of forward contracts entered into by the Company and its subsidiary, UMC Japan, are summarized as follows:
As of December 31, 2004

The Company

	Type	Notional Amount	Contract Period
<u>UMC Japan</u>	Forward contracts	Sell USD 77 million	December 23, 2004 to January 20, 2005

	Type	Notional Amount	Contract Period
	Forward contracts	Sell USD 10 million	December 30, 2004 to January 4, 2005

c. Transaction risk

(a) Credit risk

There is no significant credit risk exposure with respect to the above transactions because the counterparties are reputable financial institutions with good global standing.

(b) Liquidity and cash flow risk

The cash flow requirements on the interest rate swap agreements are limited to the net interest payables or receivables arising from the differences in the swap rates. The cash flow requirements on forward contracts are limited to the net difference between the forward and spot rates at the settlement date. Therefore, no significant cash flow risk is anticipated since the working capital is sufficient to meet the cash flow requirements.

(c) Market risk

Interest rate swap agreements and forward contracts are intended for hedging purposes. Gains or losses arising from the fluctuations in interest rates and exchange rates are likely to be offset against the gains or losses from the hedged items. As a result, no significant exposure to market risk is anticipated.

d. The presentation of derivative financial instruments on financial statements.

The net receivables or payables resulting from interest rate swap and forward contracts were recorded under current assets or current liabilities.

REVIEW REPORT OF INDEPENDENT ACCOUNTANTS

English Translation of a Report Originally Issued in Chinese

To the Board of Directors and Shareholders of

United Microelectronics Corporation

We have reviewed the accompanying balance sheets of United Microelectronics Corporation as of March 31, 2006 and 2005, and the related statements of income and cash flows for the three-month periods ended March 31, 2006 and 2005. These financial statements are the responsibility of the Company's management. Our responsibility is to issue the review reports based on our reviews. As described in Note 4(9) to the financial statements, certain long-term investments were accounted for under the equity method based on financial statements as of March 31, 2006 and 2005 of the investees, which were reviewed by other auditors. Our review insofar as it relates to the investment income amounting to NT\$293 million and NT\$113 million for the three-month periods ended March 31, 2006 and 2005, respectively, and the related long-term investment balances of NT\$5,161 million and NT\$4,329 million as of March 31, 2006 and 2005, respectively, are based solely on the reports of the other auditors.

We conducted our reviews in accordance with the Statements of Auditing Standards No. 36, "Review of Financial Statements" of the Republic of China. A review is limited primarily to applying analytical procedures to financial data and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statement taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews and the reports of other auditors, we are not aware of any material modifications or adjustments that should have been made to the financial statements referred to above in order for them to be in conformity of "Guidelines Governing the Preparation of Financial Reports by Securities Issuers" and generally accepted accounting principles in the Republic of China.

As described in Note 3 to the financial statements, effective from January 1, 2006, United Microelectronics Corporation has adopted the R.O.C. Statement of Financial Accounting Standards No. 34, "Accounting for Financial Instruments" and No. 36, "Disclosure and Presentation of Financial Instruments" to account for the financial instruments.

As described in Note 3 to the financial statements, effective from January 1, 2005, United Microelectronics Corporation has adopted the R.O.C. Statement of Financial Accounting Standards No. 35, "Accounting for Asset Impairment" to account for the impairment of its assets. Effective from January 1, 2006, goodwill generated from consolidation is no longer subject to amortization.

April 14, 2006

Taipei, Taiwan

Republic of China

Notice to Readers

The accompanying unaudited financial statements are intended only to present the financial position and results of operations and cash flows in accordance with accounting principles and practices generally accepted in the Republic of China and not those of any other jurisdictions. The standards, procedures and practices to review such financial statements are those generally accepted and applied in the Republic of China.

UNITED MICROELECTRONICS CORPORATION

NOTES TO FINANCIAL STATEMENTS

March 31, 2006 and 2005

(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

1. HISTORY AND ORGANIZATION

United Microelectronics Corporation (the Company) was incorporated in May 1980 and commenced operations in April 1982. The Company is a full service semiconductor wafer foundry, and provides a variety of services to satisfy individual customer needs. These services include intellectual property, embedded IC design, design verification, mask tooling, wafer fabrication, and testing. The Company's common shares were publicly listed on the Taiwan Stock Exchange (TSE) in July 1985 and its American Depositary Shares (ADSs) were listed on the New York Stock Exchange (NYSE) in September 2000.

Based on the resolution of the board of directors' meeting on February 26, 2004, the effective date of the merger with SiS MICROELECTRONICS CORP. (SiSMC) was July 1, 2004. The Company was the surviving company, and SiSMC was the dissolved company. The merger was approved by the relevant government authorities. All the assets, liabilities, rights, and obligations of SiSMC have been fully incorporated into the Company since July 1, 2004.

Based on the resolution of the board of directors' meeting on August 26, 2004, UMCI LTD. had transferred its businesses, operations, and assets to its newly incorporated Singapore branch (the Branch) since April 1, 2005.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The financial statements were prepared in conformity with the Guidelines Governing the Preparation of Financial Reports by Securities Issuers and accounting principles generally accepted in the Republic of China (R.O.C.).

Summaries of significant accounting policies are as follows:

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that will affect the amount of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the reported period. The actual results may differ from those estimates.

Foreign Currency Transactions

Transactions denominated in foreign currencies are translated into New Taiwan Dollars at the exchange rates prevailing at the transaction dates. Receivables, other monetary assets, and liabilities denominated in foreign currencies are translated into New Taiwan Dollars at the exchange rates prevailing at the balance sheet date. Exchange gains or losses are included in the current year's results. However, exchange gains or losses from investments in foreign entities are recognized as a cumulative translation adjustment in stockholders' equity.

Non-currency assets and liabilities that are denominated in foreign currencies and marked to market with changes in market value charged to the statement of income, are valued at the spot exchange rate at the balance sheet date, with arising exchange gains or losses recognized in the current year. For similar assets and liabilities where the changes in market value are charged to stockholders' equity, the spot exchange rate at the balance sheet date is used and any resulting exchange gains or losses are recorded as adjustment items to stockholders' equity. The exchange rate at the date of transaction is used to record foreign currency-denominated non-currency assets and liabilities measured at cost.

Translation of Foreign Currency Financial Statements

The financial statements of the Branch are translated into New Taiwan Dollars using the spot rates as of each financial statement date for asset and liability accounts, and average exchange rates for profit and loss accounts. The cumulative translation effects from the Branch using functional currencies other than New Taiwan Dollars are included in the cumulative translation adjustment in stockholders' equity.

Cash Equivalents

Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and with maturity dates that do not present significant risks on changes in value resulting from changes in interest rates, including commercial paper with original maturities of three months or less.

Financial Assets and Financial Liabilities

Based on the R.O.C. Statement of Financial Accounting Standard (SFAS) No. 34 Accounting for financial instruments and the Guidelines Governing the Preparation of Financial Reports by Securities Issuers, financial assets are classified as financial assets held for trading, held-to-maturity financial assets, financial assets measured at cost, and available-for-sale financial assets. Financial liabilities are held for trading.

The Company's purchases and sales of financial assets and liabilities are recognized on the trade date (that is, the date on which the Company commits to purchase or sale the asset and liability). Financial assets and financial liabilities are initially recognized at fair value plus acquisition or issuance costs. Accounting policies prior to, and including, December 31, 2005 are described in Note 3.

a. Financial assets and financial liabilities held for trading

For financial assets and financial liabilities held for short-term sale or repurchase purposes and derivative financial instruments not held for hedging purposes are classified as either financial assets or financial liabilities held for trading.

Financial assets or financial liabilities are subsequently measured at fair value and changes in fair value are recognized in profit and loss. Stocks of listed companies, convertible bonds and close-end funds are measured at closing prices at balance sheet date. Open-end funds are measured at the unit price of the net assets at the balance sheet date.

b. Held-to-maturity financial assets

Non-derivative financial assets with fixed or determinable payments and fixed maturity are classified as held-to-maturity where the Company has the positive intention and ability to hold to maturity. Investments that are intended to be held to maturity are subsequently measured at amortized cost.

If there is any objective evidence of impairment, impairment loss is recognized by the Company. If subsequently the impairment loss has recovered, and such recovery is evidently related to improvements in events or factors that have originally caused the impairment loss, the Company shall reverse the amount, which will be recorded as profit in the current period. The new cost basis as a result of the reversal shall not exceed the amortized cost prior to the impairment.

c. Financial assets measured at cost

Equity investments without reliable market prices, including unlisted and emerging stocks, are measured at cost. Where objective evidence of impairment exists, the Company shall recognize impairment loss, which shall not be reversed in subsequent periods.

d. Available-for-sale financial assets

Available-for-sale financial assets are non-derivative financial assets neither classified as financial assets held for trading, nor held-to-maturity financial assets, loans and receivables. Subsequent measurement is measured at fair value. The gain or loss arising from the change in fair value, excluding impairment loss and exchange gain or loss, is recognized as a separate component of stockholders' equity until such investment is reclassified or disposed of, upon which the cumulative gain or loss previously charged to stockholders' equity will be recorded in the income statement.

Stocks of listed companies are measured at closing prices at the balance sheet date.

The Company recognizes impairment loss when there is any objective evidence of impairment. Any reduction in the loss of equity investments in subsequent periods will be recognized as adjustment to stockholders' equity. For debt instruments, if the reduction is clearly related to improvements in the factors or events that have originally caused the impairment, the amount shall be reversed and recognized in the current period's statement of income.

Derivative financial instruments

- a. Trading purpose: At the date of trading, options are recognized at fair value, while trading derivatives other than options are recognized at a fair value of zero. The derivatives are recorded at fair value at the balance sheet date with changes in fair value charged to the statement of income in the current period.
- b. Hedging purpose: When the Company meets all requirements of hedge accounting, the Company recognizes net influence of hedge instruments and hedged items by different hedge relationships. The accounting procedures are as follows:

Fair value hedges

Hedge instruments are measured at fair value and recognized as profit or loss. The gains and losses attributable to the risk being hedged are adjusted to carrying amount of the hedged item, while concurrently recognized in statement of income.

Cash flow hedges

The gain or loss on the hedging instrument is recognized in stockholders' equity. Where the forecasted transaction is expected to result in financial assets or financial liabilities, the amounts previously recognized in stockholders' equity shall be transferred to gain or loss in the same period in which the financial assets or liabilities are expected to affect earnings. If the net loss of the adjustment to stockholders' equity is considered to be irrecoverable in future periods, the Company shall immediately recognize the loss in the current period.

Allowance for Doubtful Accounts

The allowance for doubtful accounts is provided based on management's judgment and on the evaluation of collectibility and aging analysis of accounts and other receivables.

Inventories

Inventories are accounted for on a perpetual basis. Raw materials are recorded at actual purchase costs, while the work in process and finished goods are recorded at standard costs and adjusted to actual costs using the weighted-average method at the end of each month. Inventories are stated at the lower of aggregate cost or market value at the balance sheet date. The market values of raw materials and supplies are determined on the basis of replacement cost while the work in process and finished goods are determined by net realizable values. An allowance for loss on decline in market value and obsolescence is provided, when necessary.

Long-term Investments Accounted for Under the Equity Method

Long-term investments are recorded at acquisition cost. Investments acquired by contribution of technological know-how are credited to deferred credits among affiliates, which will be amortized to income over a period of 5 years.

Investment income or loss from investments in both listed and unlisted investees is accounted for under the equity method provided that the Company owns at least 20% of the outstanding voting rights of the investees or has significant influence on operating decisions of the investees. The difference of the acquisition cost and the underlying equity in the investee's net assets is amortized over 5 years. However, effective from January 1, 2006, such a difference is no longer amortized. Arising differences from new acquisitions are analyzed and accounted for in the manner similar to the allocation of acquisition cost as provided in the R.O.C. SFAS No. 25, Business Combination Accounting Treatment under Purchase Method, where goodwill is not subject to amortization.

The change in the Company's proportionate share in the net assets of its investee resulting from its subscription to additional stock, issued by such investee, at a rate not proportionate to its existing equity ownership in such investee, is charged to the capital reserve and long-term investments account.

Unrealized intercompany gains and losses arising from downstream transactions with investees accounted for under the equity method are eliminated in proportion to the Company's ownership percentage while those from transactions with majority-owned (above 50%) subsidiaries are eliminated entirely.

Unrealized intercompany gains and losses arising from upstream transactions with investees accounted for under the equity method are eliminated in proportion to the Company's ownership percentage. Unrealized intercompany gains and losses arising from transactions between investees accounted for under the equity method are eliminated in proportion to the Company's ownership percentage, while those arising from transactions between majority-owned subsidiaries are eliminated in proportion to the Company's ownership percentage in the subsidiary incurred with a gain or loss.

If the recoverable amount of investees accounted for under the equity method is less than its carrying amount, the difference is to be recognized as impairment loss in the current period.

In compliance with the R.O.C. SFAS No. 23, Interim Financial Reporting and Disclosures, gain or losses arising from investments accounted for under the equity method have been recognized as of March 31, 2006 in proportion to the Company's share ownership in the investees.

Property, Plant and Equipment

Property, plant and equipment are stated at cost. Interest incurred on loans used to finance the construction of property, plant and equipment is capitalized and depreciated accordingly. Maintenance and repairs are charged to expense as incurred. Significant renewals and improvements are treated as capital expenditure and are depreciated accordingly. When property, plant and equipment are disposed, their original cost and accumulated depreciation are to be written off and the related gain or loss is classified as non-operating income or expenses. Idle assets are transferred to other assets according to the lower of net book or net realizable value, with the difference charged to non-operating expenses. The corresponding depreciation expenses provided are also classified as non-operating expenses.

Depreciation is provided on a straight-line basis using the estimated economic life of the assets less salvage value, if any. When the estimated economic life expires, property, plant and equipment which are still in use, are depreciated over the newly estimated remaining useful life using the salvage value. The estimated economic life of the property, plant and equipment is as follows: buildings 20 to 55 years; machinery and equipment 5 years; transportation equipment 5 years; furniture and fixtures 5 years; leased assets the lease period or estimated economic life, whichever is shorter.

Intangible Assets

Effective from January 1, 2006, goodwill generated from consolidation is no longer subject to amortization.

Technological know-how is stated at cost and amortized over its estimated economic life using the straight-line method.

The Company assesses whether there is any indication of impairment other than temporary. If any such indication exists, the recoverable amount is estimated and impairment loss is recognized accordingly. The book value after recognizing the impairment loss is recorded as the new cost.

Deferred Charges

Deferred charges are stated at cost and amortized on a straight-line basis as follows: patent license fees - the term of contract or estimated economic life of the related technology, and software - 3 years.

Prior to, and including December 31, 2005, the issuance costs of convertible and exchangeable bonds were classified as deferred charges and amortized over the life of the bonds. Since January 1, 2006, the amortized amounts as of December 31, 2005 were reclassified as discount of bonds as a contra account to bonds payable. The amounts are amortized based on interest method during remaining life of the bonds. Where the difference between straight-line method and interest method is slight, the bond discounts shall be amortized based on the straight-line method.

The Company assesses whether there is any indication of other than temporary impairment. If any such indication exists, the recoverable amount is estimated and impairment loss is recognized accordingly. The book value after recognizing the impairment loss is recorded as the new cost basis.

Convertible and Exchangeable Bonds

The excess of the stated redemption price over the par value is accrued as compensation interest payable over the redemption period, using the effective interest method.

When convertible bondholders exercise their conversion rights, the book value of bonds is credited to common stock at an amount equal to the par value of the common stock and the excess is credited to the capital reserve; no gain or loss is recognized on bond conversion.

When exchangeable bondholders exercise their rights to exchange for the reference shares, the book value of the bonds is to be offset against the book value of the investments in reference shares and the related stockholders' equity accounts, with the difference recognized as gain or loss on disposal of investments.

Based on the R.O.C. SFAS No. 34, *Accounting for financial instruments*, as of January 1, 2006, derivative financial instruments embedded in convertible bonds shall be bifurcated and accounted as financial liabilities with changes in market value recognized in earnings if the economic and risk characteristics of the embedded derivative instrument and the host contract are not clearly and closely related.

Pension Plan

All regular employees are entitled to a defined benefit pension plan that is managed by an independently administered pension fund committee within the Company. The fund is deposited under the committee's name in the Central Trust of China and hence, not associated with the Company. Therefore the fund shall not be included in the Company's financial statements. Pension benefits for employees of the Branch are provided in accordance with the local regulations.

The Labor Pension Act of R.O.C. (the Act), which adopts a defined contribution plan, became effective on July 1, 2005. In accordance with the Act, employees may choose to elect either the Act, by retaining their seniority before the enforcement of the Act, or the pension mechanism of the Labor Standards Law. For employees who elect the Act, the Company will make monthly contributions of no less than 6% of the employees' monthly wages to the employees' individual pension accounts.

The accounting for pension is computed in accordance with the R.O.C. SFAS No. 18. For the defined benefit pension, the net pension cost is calculated based on an actuarial valuation, and pension cost components such as service cost, interest cost, expected return on plan assets, the amortization of net obligation at transition, pension gain or loss, and prior service cost, are all taken into consideration. For the defined contribution pension, the Company recognizes the pension amount as expense in the period in which the contribution becomes due.

Employee Stock Option Plan

The Company applies the intrinsic value method to recognize the difference between the market price of the stock and the exercise price of its employee stock option as compensation cost. Starting January 1, 2004, the Company also discloses pro forma net income and earnings per share under the fair value method for only these options granted since January 1, 2004.

Treasury Stock

The Company adopted the R.O.C. SFAS No. 30, which requires that treasury stock held by the Company to be accounted for under the cost method. Cost of treasury stock is shown as a deduction to stockholders' equity, while gain or loss from selling treasury stock is treated as an adjustment to the capital reserve. The Company's stock held by its subsidiaries is also treated as treasury stock in the Company's account.

Revenue Recognition

The main sales term of the Company is Free on Board (FOB) or Free Carrier (FCA). Revenue is recognized when ownership and liability for risk of loss or damage to the products have been transferred to customers, usually upon shipment. Sales returns and discounts taking into consideration customer complaints and past experiences are accrued in the same year of sales.

Capital Expenditure versus Operating Expenditure

Expenditure shall be capitalized when it is probable that future economic benefits associated with the expenditure will flow to the Company and the expenditure amount exceeds a predetermined level. Otherwise it is charged as expense when incurred.

Income Tax

The Company adopted the R.O.C. SFAS No. 22 Accounting for Income Taxes for inter-period and intra-period income tax allocation. Provision for income tax includes deferred income tax resulting from temporary differences, loss carry-forward and investment tax credits. Deferred income tax assets and liabilities are recognized for the expected tax consequences of temporary differences between the tax bases of assets and liabilities and their reported amounts in the financial statements using enacted tax rates and laws that will be in effect when the difference is expected to reverse. Valuation allowance on deferred income tax assets is provided to the extent that it is more likely than not that the tax benefits will not be realized.

According to the R.O.C. SFAS No. 12, the Company recognizes the tax benefit from the purchase of equipment and technology, research and development expenditure, employee training, and certain equity investment, by the flow-through method.

Income tax (10%) on unappropriated earnings is recorded as expense in the year when the shareholders have resolved that the earnings shall be retained.

Earnings per Share

Earnings per share is computed according to the R.O.C. SFAS No. 24. Basic earnings per share is computed by dividing net income (loss) by weighted-average number of common shares outstanding during the year. Diluted earnings per share is computed by taking basic earnings per share into consideration plus additional common shares that would have been outstanding if the dilutive share equivalents had been issued. The net income (loss) would also be adjusted for the interest and other income or expenses derived from any underlying dilutive share equivalents. The weighted-average outstanding shares are adjusted retroactively for stock dividends and bonus share issues.

Asset Impairment

Pursuant to the R.O.C. SFAS No. 35, the Company assesses indicators of impairment for all its assets (except for goodwill) within the scope of the standard at each balance sheet date. If impairment is indicated, the Company compares the carrying amount with the recoverable amount of the assets or the cash-generating unit (CGU) and writes down the carrying amount to the recoverable amount where applicable. The recoverable amount is defined as the higher of fair value less the costs to sell, and the values in use.

For previously recognized losses, the Company assesses, at the balance sheet date, whether there is any indication that the impairment loss may no longer exist or may have diminished. If there is any such indication, the Company recalculates the recoverable amount of the asset. If the recoverable amount increases as a result of the increase in the estimated service potential of the assets, the Company reverses the impairment loss such that the resulting carrying amount of the asset shall not exceed the amount (net of amortization or depreciation), that would otherwise result had no impairment loss been recognized for the assets in prior years.

In addition, a goodwill-allocated CGU or group of CGUs is tested for impairment each year, regardless of whether impairment is indicated. If an impairment test reveals that the carrying amount (including goodwill) of CGU or group of CGUs is greater than its recoverable amount, there is an impairment loss. In allocating impairment losses, the portion of goodwill allocated is to be written down first. After goodwill has been written off, the remaining impairment loss, if any, is to be shared among other assets pro rata to their carrying amount. The write-down in goodwill cannot be reversed under any circumstance in subsequent periods.

Impairment loss (reversal) is classified as non-operating losses (income).

3. ACCOUNTING CHANGE

Asset Impairment

The Company had adopted the R.O.C. SFAS No. 35, Accounting for Asset Impairment to account for the impairment of its assets for its financial statements started on and after January 1, 2005. No retroactive adjustment is required under the standard. Such a change in accounting principles did not have any influence on the Company's net income, basic earnings per share after tax, and total assets.

Goodwill

The Company had adopted the R.O.C. SFAS No. 1, Conceptual Framework of Financial Accounting and Preparation of Financial Statements, SFAS No. 5, Long-Term Investments in Equity Securities, and SFAS No. 25, Business Combinations - Accounting Treatment under Purchase Method which have all discontinued the amortization of goodwill.

The above changes in accounting principles increased the Company's total assets by NT\$216 million as of March 31, 2006, and increased the Company's net income and earnings per share by NT\$216 million and NT\$0.01, respectively, for the three-month period ended March 31, 2006.

Financial instruments

- (1) The Company had adopted the R.O.C. SFAS No. 34, Accounting for Financial Instruments and No. 36, Disclosure and Presentation of Financial Instruments to account for the financial instruments in its financial statements beginning on and after January 1, 2006. Some items have already been reclassified according to the Guidelines Governing the Preparation of Financial Reports by Securities Issuers, R.O.C. SFAS No. 34 and No. 36 for the three-month period ended March 31, 2006.

- (2) The accounting policies prior to, and including, December 31, 2005 are as follows:

Marketable Securities

Marketable securities are recorded at cost at acquisition and are stated at the lower of aggregate cost or market value at the balance sheet date. Cash dividends are recognized as dividend income at the point of receipt. Costs of money market funds and short-term notes are identified specifically while other marketable securities are determined on the weighted-average method. The market values of listed debts, equity securities and closed-end funds are determined by the average closing price during the last month of the fiscal year. The market value for open-end funds is determined by the net asset value at the balance sheet date. The amount by which the aggregate cost exceeds the market value is reported as a loss in the current year. In subsequent periods, recoveries of the market value are recognized as a gain to the extent that the market value does not exceed the original aggregate cost of the investment.

Long-Term Investment – Cost Method or Lower of Cost or Market Value Method

Investments of less than 20% of the outstanding voting rights in listed investees, where significant influence on operating decisions of the investees does not reside with the Company, are accounted for by the lower of aggregate cost or market value method. The unrealized loss resulting from the decline in market value of investments that are held for the purpose of long-term investment is deducted from the stockholders equity. The market value is determined by the average closing price during the last month of the fiscal year. Investments of less than 20% of the outstanding voting rights in unlisted investees are accounted for under the cost method. Impairment losses for the investees will be recognized if an other than temporary impairment is evident and the book value after recognizing the losses shall be treated as the new cost basis of such investment.

Derivative Financial Instruments

The net receivables or payables resulting from interest rate swap and forward contracts were recorded under current assets or current liabilities.

- (3) The above changes in accounting principles increased the Company's total assets, total liabilities, and stockholders' equity by NT\$23,648 million, NT\$1,326 million, and NT\$22,322 million, respectively, as of January 1, 2006 and resulted in a cumulative effect of changes in accounting principles of NT\$1,189 million deducted from net income, thereby reducing earnings per share by NT\$0.06 for the three-month period ended March 31, 2006.

Note A: In the first quarter of 2006 as the Company determined it did not have significant influence over the investee, as well as in compliance with the R.O.C. SFAS No. 34, the investee was classified as available-for-sale financial asset.

Note B: The ending balance as of March 31, 2005 of NT\$2,820 million was computed by deducting the Company's stock held by the investee (treated as treasury stock by the Company), amounting NT\$1,299 million from the cost of investment balance at period-end of NT\$4,119 million.

Note C: As of September 1, 2005 the Company's former investee, Aptos (Taiwan) Corp. (accounted for under the equity method), merged into Chipbond Technology Corp. (accounted for as an available-for-sale financial asset) Three shares of Aptos (Taiwan) Corp. were exchanged for one share of Chipbond Technology Corp.

Note D: Based on the resolution of the board of directors' meeting on August 26, 2004 UMCI had transferred its business, operations, and assets to the Branch since April 1, 2005.

Note E: As of March 31, 2006 and 2005 the cost of investment was NT\$4,949 million and NT\$3,974 million, respectively. After deducting the Company's stock held by the subsidiary (treated as treasury stock by the Company) of NT\$172 million in both years, the residual book values totalled NT\$4,777 million and NT\$3,803 million as of March 31, 2006 and 2005, respectively.

Note F: As of January 27, 2006, the Company sold 58,500 thousand shares of HSUN CHIEH INVESTMENT CO., LTD. The share ownership decreased from 99.97% to 36.49%. As the company ceased to be a subsidiary, the Company's stock held by HSUN CHIEH INVESTMENT CO., LTD. was no longer treated as treasury stock. Consequently, the effect on the Company's long-term equity investment and stockholders' equity are simultaneously amounted to NT\$10,881 million.

The ending balance as of March 31, 2005 of NT\$10,398 million was computed by deducting the Company's stock held by the investee (treated as treasury stock by the Company), amounting NT\$20,137 million from the cost of investment balance at period-end of NT\$30,535 million.

Note G: The equity method was applied for investees, in which the total ownership held by the Company and its subsidiaries is over 20%.

Note H: UNITED FOUNDRY SERVICE, INC. was liquidated in April 2005. All businesses, operations, and assets of the company were transferred to UMC GROUP (USA).

b. Total loss arising from investments accounted for under the equity method, which were based on the reviewed financial statements of the investees, were NT\$2 million and NT\$1,705 million for the three-month period ended March 31, 2006 and 2005, respectively. Among which, investment income amounting to NT\$293 million and NT\$113 million from the respective long-term investment balances of NT\$5,161 million and NT\$4,329 million for the three-month period ended March 31, 2006 and 2005, respectively, were determined based on the investees' financial statements reviewed by other auditors.

c. The long-term investments were not pledged.

d. The difference between investment cost and net assets were accrued from goodwill. The changes in the first quarter of 2006 are as follows:

 - (a) Issue Amount: US\$235 million
 - (b) Period: May 10, 2002 ~ May, 10 2007

(c) Redemption

- i. The Company may redeem the bonds, in whole or in part, after three months of the issuance and prior to the maturity date, at their principal amount if the closing price of the AUO common shares on the TSE, translated into US dollars at the prevailing exchange rate, for a period of 20 consecutive trading days, the last of which occurs not more than 10 days prior to the date upon which notice of such redemption is published, is at least 120% of the exchange price then in effect translated into US dollars at the rate of NTD34.645=USD 1.00.
- ii. The Company may redeem the bonds, in whole, but not in part, if at least 90% in principal amount of the bonds has already been exchanged, redeemed or purchased and cancelled.
- iii. The Company may redeem all, but not part, of the bonds, at any time, in the event of certain changes in the R.O.C. s tax rules which would require the Company to gross up for payments of principal, or to gross up for payments of interest or premium.
- iv. The Company will, at the option of the bondholders, redeem such bonds on February 10, 2005 at its principal amount.

(d) Terms of Exchange

- i. Underlying securities: ADS or Common Share of AU OPTRONICS CORP.
- ii. Exchange Period: The bonds are exchangeable at any time on or after June 19, 2002 and prior to April 10, 2007, into AUO common shares or AUO ADSs; provided, however, that if the exercise date falls within 5 business days from the beginning of, and during, any closed period, the right of the exchanging holder of the bonds to vote with respect to the shares it receives will be subject to certain restrictions.
- iii. Exchange Price and Adjustment: The exchange price is NTD46.10 per share, determined on the basis of a fixed exchange rate of NTD34.645=USD1.00. The exchange price will be subject to adjustments upon the occurrence of certain events set out in the indenture.

(e) Exchange of the Bonds

The interest is paid annually with stated interest rates of 4.0% minus USD 12-Month LIBOR and 4.3% minus USD 12-Month LIBOR, respectively. Stated interest rates are reset annually based on the prevailing USD 12-Month LIBOR. The five-year bonds and seven-year bonds are repayable in 2008 and 2010, respectively, upon the maturity of the bonds.
- f. On October 5, 2005, the Company issued zero coupon convertible bonds on the EuroMTF Market of Luxembourg Stock Exchange (LSE). The terms and conditions of the bonds are as follows:
- (a) Issue Amount: US\$381.4 million
 - (b) Period: October 5, 2005 ~ February 15, 2008 (Maturity date)
 - (c) Redemption:
 - i On or at any time after April 5, 2007, if the closing price of the ADSs listed on the NYSE has been at least 130% of either the conversion price or the last adjusted conversion price, for 20 out of 30 consecutive ADS trading days, the Company may redeem all, but not some only, of the bonds.
 - ii If at least 90% in principal amount of the bonds have already been redeemed, repurchased, cancelled or converted, the Company may redeem all, but not some only, of the bonds.
 - iii. In the event that the Company's ADSs or shares have officially cease to be listed or admitted for trading on the New York Stock Exchange or the Taiwan Stock Exchange, as the case may be, each bondholder shall have the right, at such bondholder's option, to require the Company to repurchase all, but not in part, of such bondholder's bonds at their principal amount.
 - iv. In the event of certain changes in taxation in the R.O.C. resulting in the Company becoming required to pay additional amounts, the Company may redeem all, but not part, of the bonds at their principal amount; bondholders may elect not to have their bonds redeemed by the Company in such event, in which case the bondholders shall not be entitled to receive payments of such additional amounts.

- v. If a change of control occurs with respect to the Company, each bondholder shall have the right at such bondholder's option, to require the Company to repurchase all, but not in part, of such bondholder's bonds at their principal amount.
- vi. The Company will pay the principal amount of the bonds at its maturity date, February 15, 2008.

(d) Conversion:

- i Conversion Period: Except for the closed period, the bonds may be converted into the Company's ADSs on or after November 4, 2005 and on or prior to February 5, 2008.
- ii Conversion Price and Adjustment: The conversion price is US\$3.814 per ADS. The applicable conversion price will be subject to adjustments upon the occurrence of certain events set out in the indenture.

- g. Repayments of the above bonds in the future years are as follows:

(19) RETAINED EARNINGS AND DIVIDEND POLICIES

According to the Company's Articles of Incorporation, current year's earnings, if any, shall be distributed in the following order:

- a. Payment of all taxes and dues;
- b. Offset prior years' operation losses;
- c. Set aside 10% of the remaining amount after deducting items (a) and (b) as a legal reserve;
- d. Set aside 0.1% of the remaining amount after deducting items (a), (b), and (c) as directors' and supervisors' remuneration; and
- e. After deducting items (a), (b), and (c) above from the current year's earnings, no less than 5% of the remaining amount together with the prior years' unappropriated earnings is to be allocated as employees' bonus, which will be settled through issuance of new shares of the Company, or cash. Employees of the Company's subsidiaries, meeting certain requirements determined by the board of directors, are also eligible for the employees' bonus.
- f. The distribution of the remaining portion, if any, will be recommended by the board of directors and approved through the shareholders' meeting.

The Company is currently in its growth stage; the policy for dividend distribution should reflect factors such as the current and future investment environment, fund requirements, domestic and international competition and capital budgets; as well as the benefit of shareholders, share bonus equilibrium, and long-term financial planning. The board of directors shall make the distribution proposal annually and present it at the shareholders' meeting. The Company's Articles of Incorporation further provide that no more than 80% of the dividends to shareholders, if any, must be paid in the form of stock dividends. Accordingly, at least 20% of the dividends must be paid in the form of cash.

The distribution of retained earnings for the year 2005 was approved by the board of directors on March 17, 2006 and the distribution of retained earnings for the year 2004 was approved at the shareholders' meeting held on June 13, 2005. The details of distribution are as follows:

7. COMMITMENTS AND CONTINGENT LIABILITIES

- (1) The Company has entered into several patent license agreements and development contracts of intellectual property for a total contract amount of approximately NT\$20.2 billion. Royalties and development fees for the future years are set out as follows:

For the year ended December 31,	Amount
2006 (2 nd quarter and thereafter)	\$ 3,944,231
2007	1,878,276
2008	588,436
2009	379,273
2010	217,124
2011 and thereafter	
Total	\$ 7,007,340

- (2) The Company signed several construction contracts for the expansion of its factory space. As of March 31, 2006, these construction contracts have amounted to approximately NT\$1.2 billion and the unpaid portion of the contracts was approximately NT\$1 billion.
- (3) Oak Technology, Inc. (Oak) and the Company entered into a settlement agreement on July 31, 1997 concerning a complaint filed with the United States International Trade Commission (ITC) by Oak against the Company and others, alleging unfair trade practices based on alleged patent infringement regarding certain CD-ROM controllers (the first Oak ITC case). On October 27, 1997, Oak filed a civil action in a California federal district court, alleging claims for breach of the settlement agreement and fraudulent misrepresentation. In connection with its breach of contract and other claims, Oak seeks damages in excess of US\$750 million. The Company denied the material allegations of the complaint, and asserted counterclaims against Oak for breach of contract, intentional interference with economic advantage and rescission and restitution based on fraudulent concealment and/or mistake. The Company also asserted declaratory judgment claims for invalidity and unenforceability of the relevant Oak patent. On May 2, 2001, the United States Court of Appeals for the Federal Circuit upheld findings by the ITC that there had been no patent infringement and no unfair trade practice arising out of a second

ITC case filed by Oak against the Company and others. Based on the Federal Circuit's opinion and on a covenant not to sue filed by Oak, the Company's declaratory judgment patent counterclaims were dismissed from the district court case. In November 2002, the Company filed motions for summary judgment on each of Oak Technology's claims against the Company. In that same period, Oak Technology filed motions seeking summary judgment on the Company's claims for fraudulent concealment and intentional interference with economic advantage, and on various defenses asserted by the Company. In May 2005, the Court issued the following orders: (i) granting the Company's motion for summary judgment on Oak Technology's claim for breach of the settlement agreement; (ii) granting in part and denying in part the Company's motion for summary judgment on Oak Technology's claim for breach of the implied covenant of good faith and fair dealing; (iii) denying a motion by the Company for summary judgment on Oak Technology's fraud claim based on alleged patent invalidity; (iv) granting Oak Technology's motion for summary judgment on the Company's fraudulent concealment claims; and (v) granting a motion by Oak Technology for summary judgment on certain of the Company's defenses. On February 9, 2006, the parties entered a settlement agreement in which the Company, Oak and Zoran (the successor to Oak) fully and finally released one another from any and all claims and liabilities arising out of the facts alleged in the district court case. The terms of settlement are confidential and, except for the obligation to keep the terms confidential, impose no obligation on the Company.

- (4) The Company entered into several operating lease contracts for land. These operating leases expire in various years through to 2032 and are renewable. Future minimum lease payments under those leases are as follows:

For the year ended December 31,	Amount
2006 (2 nd quarter and thereafter)	\$ 147,663
2007	183,026
2008	180,532
2009	180,877
2010	181,235
2011 and thereafter	1,876,730
Total	\$ 2,750,063

- (5) The Company entered into several wafer-processing contracts with its customers. According to the contracts, the Company shall guarantee processing capacity, while these customers make deposits to the Company.

- (6) The Company has entered into contracts for the purchase of materials and masks with certain vendors. These contracts oblige the Company to purchase specified amounts or quantities of materials and masks. Should the Company fail to fulfill the conditions set out in the contracts, the differences between the actual purchase and the required minimum will be reconciled between the Company and its vendors.
- (7) On February 15, 2005, the Hsinchu District Prosecutor's Office conducted a search of the Company's facilities. On February 18, 2005, the Company's former Chairman Mr. Robert H.C. Tsao, released a public statement, explaining that its assistance to Hejian Technology Corp. (Hejian) did not involve any investment or technology transfer. Furthermore, from the very beginning Hejian had a verbal indication that, at the proper time, the Company would be compensated appropriately for its assistance, and circumstances permitting, at some time in the future, it will push through the merger between two companies. Notwithstanding the foregoing, no written agreement was made and executed at that time. Upon the Company's request to materialize the verbal indication of Hejian by compensating in the form of either cash or equity, the Chairman of the holding company of Hejian offered 15% of the outstanding shares of the holding company of Hejian in return for the Company's past assistance and for continued assistance in the future.

The holding company has already issued a total of 700 million shares and the subscription price per share in the last offering is US\$1.1. Therefore, the total market value of the holding company is estimated at over US\$700 million, with 15% of this figure being worth more than US\$110 million. Immediately after the Company had received the offer, it filed an application with the Investment Commission of the Ministry of Economic Affairs on March 18, 2005 (Ref. No. 94-Lian-Tung-Tzu-0222), for their executive guidance for the successful transfer of said shares to the Company. Furthermore, the representative of Hejian is in the process of putting the shares in escrow to protect the Company's interests. In the event Hejian distributes any stock dividend or cash dividend, the Company's stake in Hejian will accumulate accordingly.

In April 2005, the Company's former Chairman Mr. Robert H.C. Tsao was personally fined with in the aggregate amount of NT\$3 million by the Financial Supervisory Commission, Executive Yuan, R.O.C. (R.O.C. FSC) for failure to disclose material information relating to Hejian in accordance with applicable rules. As a result of the imposition of the fines by the R.O.C. FSC, the Company was also fined in the amount of NT\$30,000 by Taiwan Stock Exchange (TSE) for the alleged non-compliance with the disclosure rules in relation to the material information. The Company and its former Chairman Mr. Robert H.C. Tsao have filed for administrative appeal and reconsideration with R.O.C. FSC and TSE, respectively. As of March 31, 2006, the result of such reconsideration and administrative appeal has not been finalized.

For the Company's assistance to Hejian Technology Corp., the Company's former Chairman Mr. Robert H.C. Tsao, former Vice Chairman Mr. John Hsuan, and Mr. Duen-Chian Cheng, the General Manager of Fortune Venture Capital Corp., which is 99.99% owned by the Company, were indicted on charges of breaking the Business Accounting Law and giving rise to breach of trust under the Criminal Law by Hsinchu District Court's Prosecutor's Office on January 9, 2006.

Mr. Robert H.C. Tsao and Mr. John Hsuan had officially resigned from their positions of the Company's Chairman, Vice Chairman and directors prior to the announcement of public prosecution; for this reason, at the time of public prosecution, Mr. Robert H.C. Tsao and Mr. John Hsuan no longer served as the Company's directors and had not executed their duties as the Company's Chairman and Vice Chairman. Any future consequences of the public prosecution would be Mr. Robert H.C. Tsao, Mr. John Hsuan and Mr. Duen-Chian Cheng's personal concerns; the Company would not be subject to the indictment regarding to such case.

On February 15, 2006, the Company was fined in the amount of NT\$5 million on the grounds of unauthorized investment activities in Mainland China, implicating the violation of Article 35 of the Act Governing Relations Between Peoples of the Taiwan Area and the Mainland Area by the R.O.C. Ministry of Economic Affairs. However, as the Company believes it was illegally and improperly fined, the Company had filed an administrative appeal against MOEA to the Executive Yuan on March 16, 2006. This case is waiting for the Executive Yuan's decision.

- (8) On February 13, 2006, Taiwan Hsinchu District Court delivered a notice to the Company and informed the Company that Taiwan Power Company (TPC) had filed a civil litigation case against the Company and the other Taiwan companies, TPC had claimed :(1) the Company and the other Taiwan companies should collectively pay NT\$ 13 million and the interests to TPC for the electric fees, and (2) the Company should pay NT\$ 21 million to TPC for the electric line's fees. The Company had provided the defense document and this case is waiting for Taiwan Hsinchu District Court's trial.

10. OTHERS

- (1) Certain comparative amounts have been reclassified to conform to the current year's presentation.

(2) Financial risk management objectives and policies

The Company's principal financial instruments, other than derivatives, comprise of cash and cash equivalents, common stock, preferred stock, convertible bonds, open-end funds, bank loans, and bonds payable. The main purpose of these financial instruments is to manage financing for the Company's operations. The Company also holds various other financial assets and liabilities such as accounts receivable and accounts payables, which arise directly from its operations.

The Company also enters into derivative transactions, including credit-link deposits, interest rate swaps and forward currency contracts. The purpose is to avoid the interest rate risk and foreign exchange risks arising from the Company's operations and financing activities.

The main risks arising from the Company's financial instruments are cash flow interest rate risk, foreign currency risk, commodity price risk, credit risk, and liquidity risk.

Cash flow interest rate risk

The Company utilized interest rate swap agreements to hedge its cash flow interest rate risks on its counter-floating rate domestic bonds issued from May 21 to June 24, 2003. The periods of the interest rate swap agreements are the same as those of the domestic bonds, which are five and seven years. The floating rate is reset annually.

Foreign currency risk

The Company also has foreign currency risks arising from purchases or sales. The Company adopts spot or forward contracts to avoid foreign currency risk. The Company has to buy or sell the same amount of foreign currency with hedging items for forward contracts. In principal, the Company does not carry out any forward hedge for commitments of uncertain nature.

Commodity price risk

The Company's exposure to commodity price risk is minimal.

Credit risk

The Company trades only with established and creditworthy third parties. It is the Company's policy that all customers who wish to trade on credit terms are subject to credit verification procedures. In addition, receivable balances are monitored on an ongoing basis, which consequently minimizes the Company's exposure to bad debts.

With respect to credit risk arising from the other financial assets of the Company, which comprise of cash and cash equivalents, available-for-sale financial assets and certain derivative instruments, the Company's exposure to credit risk arising from the default of counter-parties is limited to the carrying amount of these instruments.

Although the Company trades only with established third parties, it will request collateral to be provided by third parties with less favorable financial positions.

Liquidity risk

The Company's objective is to maintain a balance of funding continuity and flexibility through the use of financial instruments such as cash and cash equivalents, bank loans and bonds.

- b. The methods and assumptions used to measure the fair value of financial instruments are as follows:
- i. The book values of short-term financial instruments approximate to fair values due to their short maturities. Short-term financial instruments include cash and cash equivalents, notes receivable, accounts receivable, short-term loans, current portion of capacity deposits, and payables.
 - ii. The fair value of financial assets held for trading and available-for-sale financial assets are based on the quoted market value.
 - iii. The fair values of held-to-maturity financial assets are based on the market values. If the market values are unavailable, the Company estimates the fair values based on the book values as the held-to-maturity financial assets consist principally of credit-linked deposits agreements with maturity dates of less than two years, as well as bonds that can be easily liquidated in the secondary market.
 - iv. The fair values of deposits-out are based on the book values since the dates of collection cannot be ascertained.
 - v. The fair values of bonds payable are determined by the market values.
 - vi. The fair values of derivative financial instruments are based on the amount the Company expects to receive (positive) or to pay (negative) assuming that the contracts are settled in advance at the balance sheet date.

- c. The Company's financial instruments are either valued at fair market value based on market quotations, or on appraisal value:

Non-derivative Financial Instruments	Fair Market Value		Appraisal Value

b. Credit risk

The counterparties of the above investments are major international financial institutions. The repayment in full of these investments is subject to the non-occurrence of one or more credit events, which are referenced to the entities fulfillment of their own obligations as well as repayment of their corporate bonds. Upon the occurrence of one or more of such credit events, the Company and its subsidiary, UMCJ, may receive nil or less than full amount of these investments. The Company and its subsidiary, UMCJ, have selected reference entities with high credit ratings to minimize the credit risk.

c. Liquidity risk

Early withdrawal is not allowed for the above investments unless called by the issuer. However, the anticipated liquidity risk is low since most of the investments will either have matured within two years, or are relatively liquid in the secondary market.

d. Market risk

There is no market risk for the above investments except for the fluctuations in the exchange rates of US Dollars and Japanese Yen to NT Dollars at the balance sheet date and the settlement date.

- (5) The Company and its subsidiaries entered into interest rate swaps and forward contracts for hedging the interest rate risks arising from the counter-floating rate of domestic bonds and for hedging the exchange rate risks arising from the net assets or liabilities denominated in foreign currency. The hedging strategy was developed with the objective to reduce the market risk. The relevant information on the derivative financial instruments entered into by the Company is as follows:

- a. The Company utilized interest rate swap agreements to hedge its interest rate risks on its counter-floating rate domestic bonds issued from May 21 to June 24, 2003. The periods of the interest rate swap agreements are the same as those of the domestic bonds, which are five and seven years. The floating rate is reset annually. The details of interest rate swap agreements are summarized as follows:

As of March 31, 2006 and 2005, the Company had the following interest rate swap agreements in effect:

Notional Amount	Contract Period	Interest Rate Received	Interest Rate Paid
NT\$7,500 million	May 21, 2003 to June 24, 2008	4.0% minus USD 12-Month LIBOR	1.52%
NT\$7,500 million	May 21, 2003 to June 24, 2010	4.3% minus USD 12-Month LIBOR	1.48%

b. The details of forward contracts entered into by the Company and its subsidiaries are summarized as follows:
The Company and its subsidiaries did not hold any forward contracts as of March 31, 2006.

As of March 31, 2005

The Company

Type	Notional Amount	Contract Period
Forward contracts	Sell USD 155 million	March 1, 2005 to April 28, 2005

UMC JAPAN

Type	Notional Amount	Contract Period
Forward contracts	Sell USD 1 million	March 14, 2005 to April 28, 2005
Forward contracts	Sell USD 0.5 million	March 22, 2005 to April 28, 2005
Forward contracts	Sell USD 0.15 million	March 28, 2005 to May 27, 2005

SILICON INTEGRATED SYSTEMS CORPORATION

Type	Notional Amount	Contract Period
Forward contracts	Sell USD 35 million	January 5, 2005 to July 5, 2005

c. Transaction risk

(a) Credit risk

There is no significant credit risk exposure with respect to the above transactions as the counter-parties are reputable financial institutions with good global standing.

(b) Liquidity and cash flow risk

The cash flow requirements on the interest rate swap agreements are limited to the net interest payables or receivables arising from the differences in the swap rates. The cash flow requirements on forward contracts are limited to the net difference between the forward and spot rates at the settlement date. Therefore, no significant cash flow risk is anticipated since the working capital is sufficient to meet the cash flow requirements.

(c) Market risk

Interest rate swap agreements and forward contracts are intended for hedging purposes. Gains or losses arising from the fluctuations in interest rates and exchange rates are likely to be offset against the gains or losses from the hedged items. As a result, no significant exposure to market risk is anticipated.

d. The presentation of derivative financial instruments on financial statements

As of March 31, 2006 and 2005, the interest rate swaps were classified as current liabilities amounting NT\$784 million and current assets of NT\$51 million, respectively.

As of March 31, 2005, the balance of current liabilities arising from forward contracts was NT\$94 million and related exchange loss of NT\$170 million was recorded under non-operating expenses for the three-month period ended March 31, 2005.
