## Note 1 - Impact of constant exchange rates

The Group has historically used constant exchange rates to compare period-to-period changes in certain financial data. This is referred to as at constant exchange rates—throughout this release. The Group considers this to be a useful measure for analysing and explaining changes and trends in the Group—s results. The impact of the re-calculation of sales at constant exchange rates, including a reconciliation to the Group—s GAAP sales, is shown below.
