SECURITIES AND EXCHANGE COMMISSION

Washington, DC 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2008

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number: 1-13754

THE HANOVER INSURANCE GROUP, INC.

(Exact name of registrant as specified in its charter)

Edgar Filing: HANOVER INSURANCE GROUP, INC. - Form 10-Q

Delaware
(State or other jurisdiction of
incorporation or organization)

04-3263626
(I.R.S. Employer
Identification No.)

440 Lincoln Street, Worcester, Massachusetts 01653
(Address of principal executive offices) (Zip Code)

(508) 855-1000
(Registrant's telephone number, including area code)

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act (check one):

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

APPLICABLE ONLY TO ISSUERS INVOLVED IN BANKRUPTCY

PROCEEDINGS DURING THE PRECEDING FIVE YEARS:

Indicate by check mark whether the registrant has filed all documents and reports required to be filed by Section 12, 13 or 15(d) of the Securities Exchange Act of 1934 subsequent to the distribution of securities under a plan confirmed by a court. Yes No

APPLICABLE ONLY TO CORPORATE ISSUERS:

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date: 51,396,389 shares of common stock outstanding, as of May 1, 2008.

As of May 1, 2008, approximately \$22 million of these funds has been paid to shareholders of Verlan. See Note 12 - Significant Transactions.

The accompanying notes are an integral part of these consolidated financial statements.

Table of Contents

THE HANOVER INSURANCE GROUP, INC.

NOTES TO INTERIM CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of Presentation and Principles of Consolidation

The accompanying unaudited consolidated financial statements of The Hanover Insurance Group, Inc. (THG or the Company) have been prepared in accordance with generally accepted accounting principles for interim financial information and with the requirements of Form 10-Q.

The interim consolidated financial statements of THG include the accounts of The Hanover Insurance Company (Hanover Insurance), and Citizens Insurance Company of America (Citizens), THG's principal property and casualty companies; First Allmerica Financial Life Insurance Company (FAFLIC), THG's life insurance and annuity subsidiary; and certain other insurance and non-insurance subsidiaries. These legal entities conduct their operations through several business segments discussed in Note 9. All significant intercompany accounts and transactions have been eliminated.

The accompanying interim consolidated financial statements reflect, in the opinion of the Company's management, all adjustments necessary for a fair presentation of the financial position and results of operations. The results of operations for the three months ended March 31, 2008 are not necessarily indicative of the results to be expected for the full year. These financial statements should be read in conjunction with the Company's 2007 Annual Report on Form 10-K filed with the Securities and Exchange Commission.

The preparation of financial statements in conformity with generally accepted accounting principles requires the Company to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Actual results could differ from those estimates.

2. New Accounting Pronouncements

Recently Issued Standards

In December 2007, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards No. 141 (revised 2007), *Business Combinations* (Statement No. 141(R)). Statement No. 141(R) requires the acquiring entity in a business combination to recognize all assets acquired and liabilities assumed in a transaction at the acquisition-date fair value, with certain exceptions. Additionally, the statement requires changes to the accounting treatment of acquisition related items, including, among other items, transaction costs, contingent consideration, restructuring costs, indemnification assets and tax benefits. Statement No. 141(R) also provides for a substantial number of new disclosure requirements. This statement is effective for business combinations initiated on or after the first annual reporting period beginning after December 15, 2008. The Company expects that Statement No. 141(R) will have an impact on its accounting for future business combinations once the statement is adopted, but the effect is dependent upon acquisitions, if any, that are made in the future.

In December 2007, the FASB issued Statement of Financial Accounting Standards No. 160, *Noncontrolling Interests in Consolidated Financial Statements, an amendment of ARB No. 51* (Statement No. 160), which establishes new standards governing the accounting for and reporting of noncontrolling interests (previously referred to as minority interests). This statement establishes reporting requirements which include, among other things, that noncontrolling interests be reflected as a separate component of equity, not as a liability. It also requires that the interests of the parent and the noncontrolling interest be clearly identifiable. Additionally, increases and decreases in a parent's ownership interest that leave control intact shall be reflected as equity transactions, rather than step acquisitions or dilution gains or losses. This statement also requires changes to the presentation of information in the financial statements and provides for additional disclosure requirements. Statement No. 160 is effective for fiscal years beginning on or after December 15, 2008. The Company does not expect the effect, if any, of adopting Statement No. 160 will be material to its financial position or results of operations.

Recently Adopted Standards

In February 2007, the FASB issued Statement of Financial Accounting Standards No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities Including an amendment of FASB Statement No. 115* (Statement No. 159). Statement No. 159 permits a company to choose, at specified election dates, to measure at fair value certain eligible financial assets and liabilities that are not currently required to be measured at fair value. The specified election dates include, but are not limited to, the date when an entity first recognizes the item, when an entity enters into a firm commitment or when changes in the financial instrument causes it to no longer qualify for fair value accounting under a different accounting standard. An entity may elect the fair value

Table of Contents

option for eligible items that exist at the effective date. At that date, the difference between the carrying amounts and the fair values of eligible items for which the fair value option is elected should be recognized as a cumulative effect adjustment to the opening balance of retained earnings. The fair value option may be elected for each entire financial instrument, but need not be applied to all similar instruments. Once the fair value option has been elected, it is irrevocable. Unrealized gains and losses on items for which the fair value option has been elected will be reported in earnings. Statement No. 159 was effective as of the beginning of fiscal years that begin after November 15, 2007. The Company did not elect to implement the fair value option for eligible financial assets and liabilities as of January 1, 2008.

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, *Fair Value Measurements* (Statement No. 157). This statement creates a common definition of fair value to be used throughout generally accepted accounting principles. Statement No. 157 will apply whenever another standard requires or permits assets or liabilities to be measured at fair value, with certain exceptions. The standard establishes a hierarchy for determining fair value which emphasizes the use of observable market data whenever available. The statement also requires expanded disclosures which include the extent to which assets and liabilities are measured at fair value, the methods and assumptions used to measure fair value and the effect of fair value measures on earnings. Statement No. 157 was effective for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. The difference between the carrying amounts and fair values of those financial instruments held at the date this statement is initially applied should be recognized as a cumulative effect adjustment to the opening balance of retained earnings for the fiscal year in which this statement is initially applied. Additionally, in February 2008, the FASB issued Staff Position FAS 157-2, *Effective Date of FASB Statement No. 157*, which delays the effective date of Statement No. 157 for all non-recurring fair value measurements of nonfinancial assets and nonfinancial liabilities until the fiscal year beginning after November 15, 2008. As a result, the Company has partially applied the provisions of Statement No. 157 upon adoption at January 1, 2008 and has deferred the adoption for certain nonfinancial assets and liabilities as allowed by this staff position. The effect of adopting Statement No. 157 was not material to the Company's financial position or results of operations. See further disclosure in Note 7 Fair Value .

In June 2006, the FASB issued Interpretation No. 48, *Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109* (FIN 48). The interpretation requires companies to recognize the tax benefits of uncertain tax positions only when the position is more likely than not to be sustained upon examination by tax authorities. The amount recognized would be the amount that represents the largest amount of tax benefit that is greater than 50% likely of being ultimately realized. A liability would be recognized for any benefit claimed, or expected to be claimed, in a tax return in excess of the benefit recorded in the financial statements, along with any interest and penalty on the excess. FIN 48 will require, among other items, a tabular reconciliation of the change during the reporting period, in the aggregate unrecognized tax benefits claimed or expected to be claimed in tax returns and disclosure relating to accrued interest and penalties for unrecognized tax benefits. Additional disclosure will also be required for those uncertain tax positions where it is reasonably possible that the estimate of the tax benefit will change significantly in the next twelve months. FIN 48 was effective for fiscal years beginning after December 15, 2006. The Company adopted FIN 48 as of January 1, 2007 which resulted in an increase to shareholders' equity of \$11.5 million (See also Note 4-Federal Income Taxes).

3. Sale of Variable Life Insurance and Annuity Business

On December 30, 2005, the Company sold all of the outstanding shares of capital stock of Allmerica Financial Life Insurance and Annuity Company (AFLIAC), a life insurance subsidiary representing approximately 95% of the Company's run-off variable life insurance and annuity business, to The Goldman Sachs Group, Inc. (Goldman Sachs). The transaction also included the reinsurance of 100% of the variable business of FAFLIC. In connection with these transactions, Allmerica Investment Trust agreed to transfer certain assets and liabilities of its funds to certain Goldman Sachs Variable Insurance Trust managed funds through a fund reorganization transaction. Finally, the Company agreed to sell to Goldman Sachs all of the outstanding shares of capital stock of Allmerica Financial Investment Management Services, Inc. (AFIMS), its investment advisory subsidiary, concurrently with the consummation of a fund reorganization transaction. The fund reorganization transaction was consummated on January 9, 2006. Total proceeds from this transaction were \$318.8 million, of which the Company has received \$307.1 million as of March 31, 2008. The remaining \$11.7 million will be received in December 2008.

The Company and Goldman Sachs have made various representations, warranties and covenants in connection with the transaction. The Company has agreed to indemnify Goldman Sachs for the breaches of the Company's representations, warranties and covenants. THG has also agreed to indemnify Goldman Sachs for certain litigation, regulatory matters and other liabilities relating to the pre-closing activities of the business that was sold.

The Company accounted for the disposal of AFLIAC as a discontinued operation in accordance with Statement of Financial Accounting Standards No. 144, *Accounting for the Impairment or Disposal of Long-lived Assets*. The Company recognized a net gain of \$6.2 million and a net loss of \$0.2 million during the first quarter of 2008 and 2007, respectively, which are presented in

Table of Contents

the Consolidated Statements of Income as Gain (Loss) on Disposal of Variable Life Insurance and Annuity Business, a component of discontinued operations.

Included in the \$6.2 million gain in 2008 was a release of \$5.8 million related to the Company's estimated potential liability for certain contractual indemnities to Goldman Sachs relating to the pre-sale activities of the business sold recorded under FASB Interpretation No. 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Others* (FIN 45). The Company regularly reviews and updates its FIN 45 liability for legal and regulatory matter indemnities. Although the Company believes its current estimate for its FIN 45 liability is appropriate, there can be no assurance that these estimates will not materially increase in the future. Adjustments to this reserve are recorded in the results of the Company in the period in which they are determined. The loss in 2007 primarily consists of operations conversion costs associated with this variable business.

4. Federal Income Taxes

Federal income tax expense for the three months ended March 31, 2008 and 2007 has been computed using estimated effective tax rates. These rates are revised, if necessary, at the end of each successive interim period to reflect the current estimates of the annual effective tax rates.

In the first quarter of 2008, the Company increased its valuation allowance related to its deferred tax asset by \$3.3 million, from \$166.1 million to \$169.4 million. The increase in this valuation allowance resulted primarily from our realized capital loss and unrealized depreciation of the Company's investment portfolio. Accordingly, the Company recorded a valuation allowance of \$1.8 million as an adjustment to Federal Income Tax Expense in its Consolidated Statements of Income, as well as a \$1.5 million valuation allowance as an adjustment to Contractholder Deposit Funds and Other Policy Liabilities for the deferred tax associated with unrealized losses of the Closed Block.

The Company or its subsidiaries files income tax returns in the U.S. federal jurisdiction and various state jurisdictions. With few exceptions, the Company and its subsidiaries are no longer subject to U.S. federal and state income tax examinations by tax authorities for years before 1995. The years 1995 through 2001 are currently being reviewed with the Internal Revenue Service (IRS) Appeals Division. The IRS audit of the years 2005 through 2006 commenced in December 2007.

Effective January 1, 2007, the Company adopted the provisions of FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109* (FIN 48). As a result of the implementation of FIN 48, the Company recognized an \$11.5 million decrease in the liability for unrecognized tax benefits, which was reflected as an increase in the January 1, 2007 balance of retained earnings.

5. Pension and Other Postretirement Benefit Plans

The Company's defined benefit pension plans, which provided retirement benefits based on a cash balance formula, were frozen as of January 1, 2005; therefore, no further cash balance allocations have been credited for plan years beginning on or after January 1, 2005. In addition, certain transition group employees were eligible for a grandfathered benefit based upon service and compensation; such benefits were also frozen at January 1, 2005 levels with an annual transition pension adjustment. The Company has additional unfunded pension plans and postretirement plans to provide benefits to certain full-time employees, former agents, retirees and their dependents.

Table of Contents

The components of net periodic benefit cost for pension and other postretirement benefit plans are as follows:

Recognized net actuarial loss	0.3		0.1	0.2
Amortization of transition asset	(0.4)	(0.4)		
Amortization of prior service cost			(1.1)	(0.6)
Net periodic (benefit) cost	\$ (0.4)	\$ (1.1)	\$ 0.1	\$ 1.0

6. Closed Block

Summarized financial information of the Closed Block is as follows for the periods indicated:

(In millions)	(Unaudited)	
	March 31, 2008	December 31, 2007
ASSETS		
Fixed maturities, at fair value (amortized cost of \$512.4 and \$512.0)	\$ 507.5	\$ 514.7
Mortgage loans	21.1	21.4
Policy loans	111.9	116.0
Cash and cash equivalents	3.4	3.8
Accrued investment income	10.2	11.0
Other assets	6.3	6.1
Total assets	\$ 660.4	\$ 673.0
LIABILITIES		
Policy liabilities and accruals	\$ 670.1	\$ 670.8
Policyholder dividends	5.3	22.1
Other liabilities	1.3	1.3
Total liabilities	\$ 676.7	\$ 694.2
Excess of Closed Block liabilities over assets designated to the Closed Block and maximum future earnings to be recognized from Closed Block assets and liabilities	\$ 16.3	\$ 21.2

Table of Contents

(In millions)	(Unaudited)	
	Three Months Ended March 31,	
	2008	2007
REVENUES		
Premiums	\$ 12.8	\$ 17.6
Net investment income	9.8	9.6
Net realized investment (losses) gains	(1.3)	0.3
Total revenues	21.3	27.5
BENEFITS AND EXPENSES		
Policy benefits	18.2	26.4
Policy acquisition and other operating expenses	0.1	
Total benefits and expenses	18.3	26.4
Contribution from the Closed Block	\$ 3.0	\$ 1.1

Many expenses related to Closed Block operations are charged to operations outside the Closed Block; accordingly, the contribution from the Closed Block does not represent the actual profitability of the Closed Block operations. Operating costs and expenses outside of the Closed Block are, therefore, disproportionate to the business outside the Closed Block.

7. Fair Value

Effective January 1, 2008, the Company adopted the provisions of Statement No. 157 as it relates to its financial assets and liabilities, which defines fair value as the price that would be received to sell an asset or paid to transfer a liability, i.e., exit price, in an orderly transaction between market participants. Statement No. 157 also establishes a hierarchy for determining fair value which emphasizes the use of observable market data whenever available. The three broad levels defined by the hierarchy are as follows, with the highest priority level given to Level 1 as these are the most reliable, and the lowest priority given to Level 3:

Level 1 Quoted prices in active markets for identical assets.

Level 2 Quoted prices for similar assets in active markets, quoted prices for identical or similar assets in markets that are not active, or other inputs that are observable or can be corroborated by observable market data, including model-derived valuations.

Level 3 Unobservable inputs that are supported by little or no market activity.

When more than one level of input is used to determine fair value, the financial instrument is classified as Level 1, 2 or 3 according to the lowest priority level that has a significant impact on the fair value measurement.

The Company performs a review of the fair value hierarchy classification on a quarterly basis. Changes in the observability of valuation inputs may result in the reclassification of certain financial assets or liabilities within the fair value hierarchy. Reclassifications related to Level 3 of the fair value hierarchy are reported as transfers in or out of Level 3 as of the beginning of the quarter in which the reclassification occurs.

Table of Contents

The Company holds fixed maturity securities, equity securities, derivative instruments and separate account assets for which fair value is determined on a recurring basis. The following table presents for each hierarchy level, the Company's assets and liabilities that are measured at fair value at March 31, 2008.

(in millions)	Total	Fair Value		
		Level 1	Level 2	Level 3
U.S. Treasury securities and U.S. Government and agency securities	\$ 370.9	\$ 99.2	\$ 271.7	\$
States and political subdivisions	824.7		824.7	
Foreign governments	5.1	2.0	3.1	
Corporate fixed maturities	2,858.3	23.7	2,817.2	17.4
Mortgage-backed securities	1,587.6		1,566.8	20.8
Total fixed maturities	5,646.6	124.9	5,483.5	38.2
Equity securities (1)	38.1	36.8		1.3
Separate account assets	424.4	424.4		
Derivative assets (2)	7.8			7.8
Total assets at fair value	\$ 6,116.9	\$ 586.1	\$ 5,483.5	\$ 47.3
Derivative liabilities (3)	\$ (3.3)	\$	\$	\$ (3.3)

(1) Excludes certain investments in equities of unconsolidated affiliates totaling \$11.0 million that are carried at cost.

(2) Included on the Consolidated Balance Sheets in other assets.

(3) Included on the Consolidated Balance Sheets in expenses and taxes payable.

The table below presents a reconciliation for all assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the three months ended March 31, 2008.

(in millions)	Level 3 Assets			Level 3 Liabilities	
	Fixed Maturities	Equity Securities	Derivatives	Total Assets	Derivatives
Balance January 1, 2008	\$ 30.5	\$ 1.3	\$ 5.8	\$ 37.6	\$ (1.1)
Total gains (losses):					
Included in earnings			2.3	2.3	(2.2)
Included in other comprehensive income	(0.1)		(0.3)	(0.4)	
Net purchases (redemptions/sales)	7.8			7.8	
Balance March 31, 2008	\$ 38.2	\$ 1.3	\$ 7.8	\$ 47.3	\$ (3.3)

The Company had no transfers in or out of Level 3 during the three months ended March 31, 2008. The amount included in earnings attributable to the change in unrealized gains relating to derivative assets still held as of March 31, 2008 was \$2.3 million, which is reflected in the Consolidated Statements of Income in fees and other income. The amount included in earnings attributable to the change in unrealized losses related to derivative liabilities still held as of March 31, 2008 was \$2.2 million, which is reflected in the Consolidated Statements of Income in other operating expenses.

The valuation methodologies used to measure financial instruments at fair value, and the level in the fair value hierarchy in which these instruments are generally classified are as follows:

Fixed Maturities: Level 1 securities generally include U.S. Treasury issues and other securities that are highly liquid and for which quoted market prices are available. Level 2 securities are valued using pricing for similar securities and pricing models that incorporate observable

Edgar Filing: HANOVER INSURANCE GROUP, INC. - Form 10-Q

inputs including, but not limited to yield curves, broker/dealer quotes and issuer spreads. Level 3 securities include issues for which little observable data can be obtained, primarily due to the illiquid nature of the securities, and the majority of the inputs used to determine fair value are based on the Company's own assumptions.

Equity Securities: Level 1 includes publicly traded securities valued at quoted market prices. Level 3 consists of common stock of private companies for which observable inputs are not available.

Derivative instruments: These Level 3 valuations are derived from the counterparties' internally developed models which do not necessarily represent observable market data.

Table of Contents

Separate account assets: The Company's separate accounts are invested in variable insurance trust funds which have a daily net asset value obtainable from an active market.

8. Other Comprehensive Income

The following table provides a reconciliation of gross unrealized investment gains (losses) to the net balance shown in the Consolidated Statements of Comprehensive Income:

(In millions)	(Unaudited) Three Months Ended March 31,	
	2008	2007
Unrealized (depreciation) appreciation on available-for-sale securities:		
Unrealized holding (losses) gains arising during period, net of income tax benefit of \$2.9 in 2008 and expense of \$5.6 in 2007	\$ (5.4)	\$ 21.0
Less: reclassification adjustment for (losses) gains included in net income, net of income tax benefit of \$1.8 in 2008 and expense of \$0.8 in 2007	(3.2)	1.5
Total available-for-sale securities	(2.2)	19.5
Unrealized depreciation on derivative instruments:		
Unrealized holding losses arising during period, net of income tax benefit of \$0.1	(0.2)	
Less: reclassification adjustment for gains included in net income, net of income tax expense of \$0.1		0.1
Total derivative instruments	(0.2)	(0.1)
Other comprehensive (loss) income	\$ (2.4)	\$ 19.4

9. Segment Information

The Company's primary business operations include insurance products and services in three property and casualty operating segments. These segments are Personal Lines, Commercial Lines, and Other Property and Casualty. The fourth operating segment, Life Companies, is in run-off. In accordance with Statement of Financial Accounting Standards No. 131, *Disclosures About Segments of an Enterprise and Related Information* (Statement No. 131), the separate financial information of each segment is presented consistent with the way results are regularly evaluated by the chief operating decision maker in deciding how to allocate resources and in assessing performance. A summary of the Company's reportable segments is included below.

The Property and Casualty group manages its operations principally through three segments: Personal Lines, Commercial Lines and Other Property and Casualty. Personal Lines includes personal automobile, homeowners and other personal coverages, while Commercial Lines includes commercial multiple peril, commercial automobile, workers' compensation, and other commercial coverages, such as bonds and inland marine. In addition, the Other Property and Casualty segment consists of: Opus Investment Management, Inc. (Opus), which markets investment management services to institutions, pension funds and other organizations; earnings on holding company assets; AMGRO, Inc. (AMGRO), the Company's premium financing business; as well as voluntary pools in which the Company has not actively participated since 1995.

The Life Companies segment consists primarily of a block of traditional life insurance products (principally the Closed Block), the group retirement annuity contract business and the guaranteed investment contract business. Assets and liabilities related to the reinsured variable life insurance and annuity business, as well as the discontinued group life and health business, including group life and health voluntary pools, are also reflected in this segment. (See Note 3 Sale of Variable Life Insurance and Annuity Business)

The Company reports interest expense related to its corporate debt separately from the earnings of its operating segments. Corporate debt consists of the Company's junior subordinated debentures and its senior debentures.

Edgar Filing: HANOVER INSURANCE GROUP, INC. - Form 10-Q

Management evaluates the results of the aforementioned segments on a pre-tax basis. Segment income excludes certain items which are included in net income, such as federal income taxes and net realized investment gains and losses, including certain gains or losses on derivative instruments, because fluctuations in these gains and losses are determined by interest rates, financial markets and the timing of sales. Also, segment income excludes net gains and losses on disposals of businesses, discontinued operations, restructuring costs, extraordinary items, the cumulative effect of accounting changes and certain other items. While

Table of Contents

these items may be significant components in understanding and assessing the Company's financial performance, management believes that the presentation of segment income enhances understanding of the Company's results of operations by highlighting net income attributable to the core operations of the business. However, segment income should not be construed as a substitute for net income determined in accordance with generally accepted accounting principles.

Summarized below is financial information with respect to business segments:

(In millions)	(Unaudited)	
	Three Months Ended March 31,	
	2008	2007
Segment revenues:		
Property and Casualty:		
Personal Lines	\$ 403.2	\$ 393.6

Adjustments to segment income:		
Net realized investment (losses) gains, net of amortization	(5.1)	1.9
Gain on derivative instruments	0.1	
Income from continuing operations before federal income taxes	\$ 80.5	\$ 91.9

Table of Contents

(In millions)	Identifiable Assets (Unaudited)	
	March 31, 2008	December 31, 2007
Property and Casualty (1)	\$ 7,490.3	\$ 7,313.2
Life Companies (2)	2,209.9	2,502.0
Intersegment eliminations	0.4	0.4
Total	\$ 9,700.6	\$ 9,815.6

(1) The Company reviews assets based on the total Property and Casualty Group and does not allocate between the Personal Lines, Commercial Lines and Other Property and Casualty segments. Includes \$146.6 million and \$110.7 million at March 31, 2008 and December 31, 2007, respectively related to AMGRO.

(2) Includes assets related to the Company's discontinued group life and health operations.

Discontinued Operations - Group Life and Health

During 1999, the Company exited its group life and health insurance business, consisting of its Employee Benefit Services (EBS) business, its Affinity Group Underwriters business and its accident and health assumed reinsurance pool business. Prior to 1999, these businesses comprised substantially all of the former Corporate Risk Management Services segment. Accordingly, the operating results of the discontinued segment have been reported in accordance with Accounting Principles Board Opinion No. 30, *Reporting the Results of Operations - Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions* (APB Opinion No. 30). In 1999, the Company recorded a \$30.5 million loss, net of taxes, on the disposal of this segment, consisting of after-tax losses from the run-off of the group life and health business of approximately \$46.9 million, partially offset by net proceeds from the sale of the EBS business of approximately \$16.4 million. Subsequent to the measurement date of June 30, 1999, approximately \$29.4 million of the aforementioned \$46.9 million loss has been generated from the operations of the discontinued business and net proceeds of \$12.5 million were received from the sale of the EBS business.

As permitted by APB Opinion No. 30, the Consolidated Balance Sheets have not been segregated between continuing and discontinued operations. At March 31, 2008 and December 31, 2007, the discontinued segment had assets of approximately \$304.2 million and \$311.1 million, respectively, consisting primarily of invested assets and reinsurance recoverables, and liabilities of approximately \$374.8 million and \$381.6 million, respectively, consisting primarily of policy liabilities.

Table of Contents

10. Stock-based Compensation

Compensation cost recorded pursuant to Statement No. 123(R) and the related tax benefits were as follows:

(In millions)	(Unaudited) Quarter Ended March 31,	
	2008	2007
Stock-based compensation expense	\$ 3.4	\$ 4.4
Tax benefit	1.2	1.5
<i>Stock Options</i>		

Information on the Company's stock option plan activity is summarized below.

(In whole shares and dollars)	(Unaudited) Three Months Ended March 31, 2008		(Unaudited) Three Months Ended March 31, 2007	
	Shares	Weighted Average Exercise Price	Shares	Weighted Average Exercise Price
Outstanding, beginning of period	3,268,912	\$ 41.15	3,855,892	\$ 40.14

Forfeited	882	50.60	8,952	44.93
Outstanding, end of period (1)	186,914	\$ 45.64	469,428	\$ 43.68

- (1) Performance based restricted stock units are based upon the achievement of the performance metric at 100%. These units have the potential to range from 0% to 150% of the shares disclosed, which varies based on grant year and individual participation level.
- (2) In 2008, 69,644 performance based stock units were included as granted due to completion levels related to both the 2005 and 2006 grants, in excess of 100%. The weighted average grant date fair value for these awards was \$40.06. In 2007, 30,716 performance based stock units were included as granted due to completion levels related to 2004 grant, in excess of 100%. The weighted average grant date fair value for these awards was \$36.88.

Table of Contents

11. Earnings Per Share

The following table provides share information used in the calculation of the Company's basic and diluted earnings per share:

(In millions, except per share data)	(Unaudited) Three Months Ended March 31,	
	2008	2007
Basic shares used in the calculation of earnings per share	51.7	51.2
Dilutive effect of securities:		
Employee stock options	0.3	0.5
Non-vested stock grants	0.3	0.2
Diluted shares used in the calculation of earnings per share	52.3	51.9
Per share effect of dilutive securities on income from continuing operations and net income	\$ (0.01)	\$ (0.02)

Diluted earnings per share for the three months ended March 31, 2008 and 2007 excludes 2.0 million and 1.5 million, respectively, of common shares issuable under the Company's stock compensation plans, because their effect would be antidilutive.

12. Significant Transactions

On March 14, 2008, the Company acquired all of the outstanding shares of Verlan Holdings, Inc. for \$29.0 million. Verlan Holdings, Inc. is a specialty company providing property insurance to small and medium-sized manufacturing and distribution companies, and which historically has generated annual written premium of approximately \$18 million.

On March 10, 2008, the Company reached an agreement to sell its premium financing subsidiary, AMGRO to Premium Financing Specialists, Inc. The transaction is subject to regulatory review and approval, as well as the satisfaction of certain closing conditions, and is expected to close in the second quarter of 2008.

In accordance with Statement of Financial Accounting Standard No. 144, *Accounting for Impairment or Disposal of Long-Lived Assets*, the Balance Sheet for AMGRO has been reclassified as assets held for sale. The following table details the significant assets and liabilities reflected in AMGRO's Balance Sheet under the captions "Other Assets" and "Expenses and taxes payable", respectively.

(In millions)	(Unaudited)	
	March 31, 2008	December 31, 2007
Assets:		
Cash and equivalents	\$ 18.3	\$ 12.6
Premiums, accounts and notes receivable	121.2	88.7
Other assets	7.1	9.4
Total assets	\$ 146.6	\$ 110.7
Liabilities:		
Expenses and taxes payable	\$ 12.2	\$ 19.8
Short-term debt (1)	128.3	85.0
Total liabilities	\$ 140.5	\$ 104.8

- (1) In 2007, this balance reflects intercompany borrowings from Hanover Insurance. In 2008, \$91.1 million of the borrowings were from Hanover Insurance and \$37.2 million were borrowing from an unaffiliated party. All intercompany amounts are eliminated in the Consolidated Balance Sheets.

Table of Contents

13. Commitments and Contingencies

LITIGATION

Durand Litigation

On March 12, 2007, a putative class action suit captioned Jennifer A. Durand v. The Hanover Insurance Group, Inc., The Allmerica Financial Cash Balance Pension Plan was filed in the United States District Court for the Western District of Kentucky. The named plaintiff, a former employee who received a lump sum distribution from the Company's Cash Balance Plan at or about the time of her termination, claims that she and others similarly situated did not receive the appropriate lump sum distribution because in computing the lump sum, the plan understated the accrued benefit in the calculation. The Company filed a motion to dismiss on the basis that the plaintiff failed to exhaust administrative remedies, which motion was granted without prejudice in a decision dated November 7, 2007. On December 3, 2007, plaintiff filed a Notice of Appeal of this dismissal to the United States Court of Appeals for the Sixth Circuit. In the Company's judgment, the outcome is not expected to be material to the Company's financial position, although it could have a material effect on the results of operations for a particular quarter or annual period.

Emerald Litigation

On July 24, 2002, an action captioned American National Bank and Trust Company of Chicago, as Trustee f/b/o Emerald Investments Limited Partnership, and Emerald Investments Limited Partnership v. Allmerica Financial Life Insurance and Annuity Company (Emerald) was commenced in the United States District Court for the Northern District of Illinois, Eastern Division. Although AFLIAC was sold to Goldman Sachs on December 30, 2005, the Company has agreed to indemnify AFLIAC and Goldman Sachs with respect to this litigation.

In 1999, plaintiffs purchased two variable annuity contracts with initial premiums aggregating \$5 million. Plaintiffs, who AFLIAC subsequently identified as engaging in frequent transfers of significant sums between sub-accounts that in the Company's opinion constituted market timing, were subject to restrictions upon such trading that AFLIAC imposed in December 2001. Plaintiffs allege that such restrictions constituted a breach of the terms of the annuity contracts. In December 2003, the court granted partial summary judgment to the plaintiffs, holding that at least certain restrictions imposed on their trading activities violated the terms of the annuity contracts.

On May 19, 2004, plaintiffs filed a Brief Statement of Damages in which, without quantifying their damage claim, they outlined a claim for (i) amounts totaling \$150,000 for surrender charges imposed on the partial surrender by plaintiffs of the annuity contracts, (ii) loss of trading profits they expected over the remaining term of each annuity contract, and (iii) lost trading profits resulting from AFLIAC's alleged refusal to process five specific transfers in 2002 because of trading restrictions imposed on market timers. With respect to the lost profits, plaintiffs claim that pursuant to their trading strategy of transferring money from money market accounts to international equity accounts and back again to money market accounts, they have been able to consistently obtain relatively risk free returns of between 35% and 40% annually. Plaintiffs claim that they would have been able to continue to maintain such returns on the account values of their annuity contracts over the remaining terms of the annuity contracts (which are based in part on the lives of the named annuitants). The aggregate account value of plaintiffs' annuities was approximately \$12.8 million in December 2001. On February 1, 2006, the Court issued a ruling which precluded plaintiffs from claiming any damages accruing beyond July 31, 2004.

A jury trial on plaintiffs' damage claim was held in December 2006, which resulted in an aggregate award to plaintiffs of \$1.3 million for lost profits and reimbursement of surrender charges. Plaintiffs' motion for a new trial was subsequently denied. On March 5, 2007, plaintiffs filed a Notice of Appeal to the United States Court of Appeals, Seventh Circuit which, in a decision rendered on February 20, 2008, reversed the lower court with respect to damages and ordered the district court to enter a judgment that plaintiffs are entitled to no damages other than the return of the \$150,000 surrender charge. On March 5, 2008, plaintiffs filed a Petition for Rehearing with the Seventh Circuit, which was denied on March 13, 2008, which decision is final and conclusive.

Hurricane Katrina Litigation

The Company has been named as a defendant in various litigations, including putative class actions, relating to disputes arising from damages which occurred as a result of Hurricane Katrina in 2005. As of March 31, 2008, there were approximately 270 such cases, at least two of which were styled as putative class actions. These cases have been filed in both Louisiana state courts and federal district courts. These cases involve, among other claims, disputes as to the amount of reimbursable claims in particular cases, as well as the scope of insurance coverage under homeowners and commercial property policies due to flooding, civil authority actions, loss of landscaping, business interruption and other matters. Certain of these cases claim a breach of duty of good faith or violations of Louisiana insurance claims handling laws or regulations and involve claims for punitive or exemplary damages. Certain of the cases claim that under Louisiana's so-called Valued Policy Law, the insurers

must pay the total insured

Table of Contents

value of a home which is totally destroyed if any portion of such damage was caused by a covered peril, even if the principal cause of the loss was an excluded peril. Other cases challenge the scope or enforceability of the water damage exclusion in the policies. On April 8, 2008, the Louisiana Supreme Court issued a decision in the case of Sher v. Lafayette Insurance Company, et al, No. 2007-C-2441, holding that flood exclusions used in the Company's policies are unambiguous and enforceable.

Plaintiffs in several consolidated cases (including Sampia v. Massachusetts Bay Insurance Company, E.D. La. Civil Action No. 06-0559) appealed an Order of the Federal District Court dated August 6, 2006 rejecting plaintiffs' contention that the Louisiana Valued Policy Law has the effect of requiring coverage for a total loss proximately caused by a non-covered peril so long as there was any covered loss. This consolidated appeal was heard by the United States Court of Appeals, Fifth Circuit, in a case captioned Chauvin, et al., v. State Farm Fire & Casualty Co., No. 06-30946. On August 6, 2007, the Fifth Circuit Court issued an opinion upholding the District Court decision dismissing plaintiffs' claims. Plaintiffs thereafter filed a petition for a *writ of certiorari* with the United States Supreme Court, which was denied on January 14, 2008. Currently pending before the Louisiana Supreme Court is the case of Landry v. Louisiana Citizens Property Insurance Corporation, No. 2007-C-1907, in which plaintiffs have asserted a construction of the Valued Policy Law similar to that rejected by the Fifth Circuit in Chauvin. Landry was argued on February 26, 2008; the Court subsequently requested additional briefing from the parties to be filed no later than April 18, 2008.

On August 23, 2007, the State of Louisiana (individually and on behalf of the State of Louisiana, Division of Administration, Office of Community Development) filed a putative class action in the Civil District Court for the Parish of Orleans, State of Louisiana, entitled State of Louisiana, individually and on behalf of State of Louisiana, Division of Administration, Office of Community Development ex rel The Honorable Charles C. Foti, Jr., The Attorney General For the State of Louisiana, individually and as a class action on behalf of all recipients of funds as well as all eligible and/or future recipients of funds through The Road Home Program v. AAA Insurance, et al., No. 07-8970. The complaint named as defendants over 200 foreign and domestic insurance carriers, including THG. Plaintiff seeks to represent a class of current and former Louisiana citizens who have applied for and received or will receive funds through Louisiana's Road Home program. On August 29, 2007, Plaintiff filed an Amended Petition in this case, asserting myriad claims, including claims under Louisiana's Valued Policy Law, as well as claims for breach of: contract, the implied covenant of good faith and fair dealing, fiduciary duty and Louisiana's bad faith statutes. Plaintiff seeks relief in the form of, among other things, declarations that (a) the efficient proximate cause of losses suffered by putative class members was windstorm, a covered peril under their policies; (b) the second efficient proximate cause of their losses was storm surge, which Plaintiff contends is not excluded under class members' policies; (c) the damage caused by water entering affected parishes of Louisiana does not fall within the definition of "flood"; (d) the damages caused by water entering Orleans Parish and the surrounding area was a result of man-made occurrence and are properly covered under class members' policies; (e) many class members suffered total losses to their residences; and (f) many class members are entitled to recover the full value for their residences stated on their policies pursuant to the Louisiana Valued Policy Law. In accordance with these requested declarations, Plaintiff seeks to recover amounts that it alleges should have been paid to policyholders under their insurance agreements, as well as penalties, attorneys' fees, and costs. The case has been removed to the Federal District Court for the Eastern District of Louisiana.

A final, non-appealable order that under the Louisiana Valued Policy Law the Company's flood exclusion is inapplicable where any portion of a loss is attributable to a covered peril, could have a material adverse effect on the Company's financial position, and would likely have such effect on the Company's results of operations. The Company has established its loss and LAE reserves on the assumption that the application of the Valued Policy Law will not result in the Company having to pay damages for perils not otherwise covered and that the Company will not have any liability under the Road Home or similar litigation.

Other Matters

The Company has been named a defendant in various other legal proceedings arising in the normal course of business, including two other suits which, like the Emerald case described above, challenge the Company's imposition of certain restrictions on trading funds invested in separate accounts. The potential outcome of any such proceedings in which the Company has been named a defendant, and the Company's ultimate liability, if any, from such legal proceedings, is difficult to predict at this time. In the Company's opinion, based on the advice of legal counsel, the ultimate resolutions of such proceedings will not have a material effect on the Company's financial position, although they could have a material effect on the results of operations for a particular quarter or annual period.

REGULATORY AND INDUSTRY DEVELOPMENTS

Unfavorable economic conditions may contribute to an increase in the number of insurance companies that are under regulatory supervision. This may result in an increase in mandatory assessments by state guaranty funds, or voluntary payments by solvent insurance companies to cover losses to policyholders of insolvent or rehabilitated companies. Mandatory assessments, which are

Table of Contents

subject to statutory limits, can be partially recovered through a reduction in future premium taxes in some states. The Company is not able to reasonably estimate the potential impact of any such future assessments or voluntary payments.

On July 16, 2007, Massachusetts Commissioner of Insurance issued two decisions pertaining to personal automobile insurance. The first decision calls for the end of the "fix-and-establish" system of setting automobile rates and replaces it with a system of "managed competition". The second decision orders the implementation of an Assigned Risk Plan beginning with new business as of April 1, 2008.

The Commissioner of Insurance has issued a regulation providing the framework for the transition from a market in which the rates are set by the Commissioner to one in which companies propose their own rates. The Company's rate filing was approved by the Massachusetts Division of Insurance on January 18, 2008 and implemented effective April 1, 2008. It is anticipated that on average, the Company's overall Massachusetts personal automobile rate levels will decline approximately 8% in 2008.

The Assigned Risk Plan will distribute the Massachusetts residual automobile market based on individual policyholder assignments rather than assigning carriers Exclusive Representative Producers. The Company believes the Assigned Risk Plan will provide for a more equitable distribution of residual market risks across all carriers in the market, and therefore, such plan, is not likely to adversely affect THG's results of operations or financial position.

Over the past year, other state-sponsored insurers, reinsurers or involuntary pools have increased significantly, particularly those in states which have Atlantic or Gulf Coast exposures. As a result, the potential assessment exposure of insurers doing business in such states and the attendant collection risks has increased, particularly, in the states of Massachusetts, Louisiana and Florida. Such actions and related regulatory restrictions may limit the Company's ability to reduce its potential exposure to hurricane related losses. It is possible that other states may take action similar to those taken in the state of Florida. At this time the Company is unable to predict the likelihood or impact of any such potential assessments or other actions.

In addition, the Company is involved, from time to time, in investigations and proceedings by governmental and self-regulatory agencies. The potential outcome of any such action or regulatory proceedings in which the Company has been named a defendant, and the Company's ultimate liability, if any, from such action or regulatory proceedings, is difficult to predict at this time. In the Company's opinion, based on the advice of legal counsel, the ultimate resolutions of such proceedings will not have a material effect on the Company's financial position, although they could have a material effect on the results of operations for a particular quarter or annual period.

RESIDUAL MARKETS

The Company is required to participate in residual markets in various states, which generally pertains to high risk insureds. The results of the residual markets are not subject to the predictability associated with the Company's own managed business, and are significant to the workers compensation line of business, the homeowners line of business and both the personal and commercial automobile lines of business.

Introduction

The following Management's Discussion and Analysis of Financial Condition and Results of Operations is intended to assist readers in understanding the interim consolidated results of operations and financial condition of The Hanover Insurance Group, Inc. and subsidiaries (THG) and should be read in conjunction with the interim Consolidated Financial Statements and related footnotes included elsewhere in this Quarterly Report on Form 10-Q and the Management's Discussion and Analysis of Financial Condition and Results of Operations contained in our 2007 Annual Report on Form 10-K filed with the Securities and Exchange Commission.

Our results of operations include the accounts of The Hanover Insurance Company (Hanover Insurance) and Citizens Insurance Company of America (Citizens), our principal property and casualty companies; First Allmerica Financial Life Insurance Company (FAFLIC), our life insurance and annuity company; and certain other insurance and non-insurance subsidiaries.

Executive Overview

Our property and casualty business constitutes our primary ongoing operations and includes our Personal Lines segment, our Commercial Lines segment and our Other Property and Casualty segment.

Personal Lines

In our Personal Lines business, we are focused on making investments that are intended to help us maintain profitability, build a distinctive position in the market and provide us with profitable growth opportunities. Current market conditions, however, continue to be challenging as pricing pressures and economic conditions are becoming more difficult, especially in Michigan, impacting our ability to grow and retain business in the state. We are working closely with our partner agents in Michigan to remain a significant writer with strong margins. We believe that market conditions will remain challenging and competitive in Personal Lines throughout 2008 and beyond. As a result of the implementation of managed competition in Massachusetts, 2008 is a transition year for the industry and while we expect to grow in this state over the long-term, we do not expect Massachusetts to contribute to premium growth during 2008 due to the current rate environment. We have also initiated catastrophe management actions in coastal states, including Florida and Louisiana that, while reducing premium in our homeowners line, has improved our risk profile. Despite these challenges and transitions, we expect our growth levels to be relatively flat in Personal Lines in 2008.

As of April 1, 2008, our *Connections*[®] *Auto* product is available in seventeen states, including Massachusetts. We believe that this product will help us to profitably grow our market share over time. *Connections Auto* is designed to be competitive for a wide spectrum of drivers through its multivariate rating application, which calculates rates based upon the magnitude and correlation of multiple risk factors. At the same time, a core strategy is to broaden our portfolio offerings and write total accounts, which are accounts that include multiple personal line coverages for the same customer. Our homeowners product, *Connections*[®] *Home*, which is available in sixteen states, is intended to improve our competitiveness and attract more total account business. Additionally, we continue to make investments in and focus on growing our umbrella product and other personal lines coverages. Having implemented a broader portfolio of products, we continue to work closely with high potential agents to increase the percentage of business they place with us and to ensure this business is consistent with our preferred mix of business. Additionally, we remain focused on diversifying our state mix beyond our four core states of Michigan, Massachusetts, New York and New Jersey. We expect these efforts to contribute to profitable growth and improved retention in our Personal Lines segment over time.

Commercial Lines

In the Commercial Lines business, the market continues to be increasingly competitive, a trend that we expect to continue and intensify for the foreseeable future. More significant price competition requires us to continue to be highly disciplined in our underwriting process to ensure that we grow the business only at acceptable margins. We continue to target, through mid-sized agents, small and first-tier middle markets, which encompass clients whose premiums are generally below \$200,000. We also continue to develop our specialty businesses, particularly bond and inland marine, which on average are expected to offer higher margins over time and enable us to deliver a more complete product portfolio to our agents and policyholders. During the first quarter of 2008, we experienced new business growth in our specialty lines, which now accounts for approximately one third of our Commercial Lines business. Additional growth in these lines continues to be a significant part of our strategy in the future. We continue to focus on expanding our product offerings in specialty businesses as evidenced by our acquisition on March 14, 2008, of Verlan Holdings, Inc. (Verlan), a specialty company providing property insurance to small and medium-sized manufacturing and distribution companies. Last year we acquired Professionals Direct, Inc. (PDI), which provides professional liability coverage for small legal practices. We believe these acquisitions provide us with better breadth and diversification of products and improve our competitive position with our agents.

Table of Contents

The 2007 enhancements of our small commercial business platform provide for additional growth opportunities in our more traditional lines of business. We have expanded the breadth of our underwriting for small account, low hazard workers' compensation and business owners' policies, and have introduced *Avenues*[®] *Auto*, a price segmented product for small, commercial automobile policies. We have also provided additional coverage features in our business owners' policies. Our technology investments are intended to provide our agents with the ability to view a customer's full account and provide eligibility guidance, as well as other important ease of business improvements. Our focus continues to be on improving and expanding our partnerships with agents. We believe our specialty capabilities and small commercial opportunities, coupled with distinctiveness in the middle market, enables us to deliver significant value to our agents and policyholders in our target markets.

2008 Results

During the first quarter of 2008, our property and casualty group's segment income decreased \$2.9 million, or 2.9%, compared to the prior year. This decrease was attributable to a \$5.0 million increase in catastrophe related activity, as well as approximately \$6 million of higher underwriting and loss adjustment expenses. These decreases were partially offset by a \$3.6 million increase in favorable development of prior year loss and loss adjustment expense (LAE) reserves and \$3.6 million of higher net investment income. Net premiums written for our property and casualty group increased \$16.5 million, or 2.7%, as compared to the first quarter of 2007.

Description of Operating Segments

Our primary business operations include insurance products and services in three property and casualty operating segments. These segments are Personal Lines, Commercial Lines and Other Property and Casualty. Our fourth operating segment, Life Companies, is in run-off. We present the separate financial information of each segment consistent with the manner in which our chief operating decision maker evaluates results in deciding how to allocate resources and in assessing performance.

The Property and Casualty group manages its operations principally through three segments: Personal Lines, Commercial Lines and Other Property and Casualty. Personal Lines includes personal automobile, homeowners and other personal coverages, while Commercial Lines includes commercial multiple peril, commercial automobile, workers' compensation and other commercial coverages, such as bonds and inland marine business. In addition, the Other Property and Casualty segment consists of: Opus Investment Management, Inc. (Opus), which markets investment management services to institutions, pension funds and other organizations; earnings on holding company assets, as well as voluntary pools business in which we have not actively participated since 1999; and Amgro, Inc. (AMGRO), our premium financing business. We have entered into an agreement to sell AMGRO and its subsidiaries; such transaction is expected to close in the second quarter of 2008.

Our Life Companies segment, which is in runoff, consists primarily of a block of traditional life insurance products (principally the Closed Block), a block of group retirement annuity contracts and two remaining guaranteed investment contracts (GICs). Assets and liabilities related to our reinsured variable life insurance and annuity business, as well as our discontinued group life and health business, including group life and health voluntary pools, are reflected in this segment.

We report interest expense related to our corporate debt separately from the earnings of our operating segments. Corporate debt consists of our junior subordinated debentures and our senior debentures.

Results of Operations

Our consolidated net income includes the results of our four operating segments (segment income), which we evaluate on a pre-tax basis, and our interest expense on corporate debt. In addition, segment income excludes certain items which we believe are not indicative of our core operations. The income of our segments excludes items such as federal income taxes and net realized investment gains and losses, including net gains or losses on certain derivative instruments, because fluctuations in these gains and losses are determined by interest rates, financial markets and the timing of sales. Also, segment income excludes net gains and losses on disposals of businesses, discontinued operations, restructuring costs, extraordinary items, the cumulative effect of accounting changes and certain other items. Although the items excluded from segment income may be significant components in understanding and assessing our financial performance, we believe segment income enhances an investor's understanding of our results of operations by highlighting net income attributable to the core operations of the business. However, segment income should not be construed as a substitute for net income determined in accordance with generally accepted accounting principles (GAAP).

Catastrophe losses are a significant component in understanding and assessing the financial performance of our property and casualty insurance business. However, catastrophic events, such as Hurricane Katrina in 2005, make it difficult to assess the underlying trends in this business. Management believes that providing certain financial metrics and trends excluding the effects of catastrophes, helps investors to understand the variability in periodic earnings and to evaluate the underlying performance of our operations.

Table of Contents

Our consolidated net income for the first quarter of 2008 was \$58.5 million, compared to \$63.6 million for the same period in 2007. The \$5.1 million decrease in earnings primarily reflects a net realized investment loss of \$5.1 million in 2008 compared to a \$1.9 million gain in 2007, decreased pre-tax segment results of \$2.9 million related to our property and casualty business, and the absence of a \$2.4 million benefit received in 2007 related to federal income tax settlements of prior years. These decreases were partially offset by a gain on the disposal of the variable life insurance and annuity business.

The following table reflects segment income as determined in accordance with Statement of Financial Accounting Standards No. 131, *Disclosures about Segments of an Enterprise and Related Information*, and a reconciliation of total segment income to consolidated net income.

(In millions)	Three Months Ended March 31,	
	2008	2007
Segment income before federal income taxes:		
Property and Casualty		
Personal Lines	\$ 27.6	\$ 47.4
Commercial Lines	68.3	49.0
Other Property and Casualty	2.1	4.5
Total Property and Casualty	98.0	100.9
Life Companies	(2.5)	(0.9)
Interest expense on corporate debt	(10.0)	(10.0)
Total segment income before federal income taxes	85.5	90.0
Federal income tax expense on segment income	(28.2)	(29.8)
Federal income tax settlement		2.4

Income from continuing operations, net of taxes	53.5	63.8
Discontinued operations:		
Gain (loss) on disposal of variable life insurance and annuity business, net of taxes	6.2	(0.2)
Other	(1.2)	
Net income	\$ 58.5	\$ 63.6

Segment Income

Three Months Ended March 31, 2008 Compared to Three Months Ended March 31, 2007

The Property and Casualty group's segment income decreased \$2.9 million, or 2.9%, to \$98.0 million, in the first quarter of 2008, compared to \$100.9 million in the first quarter of 2007. Excluding higher catastrophe related activity of \$5.0 million in the quarter, earnings would have increased by \$2.1 million. This increase is primarily due to lower losses and higher net investment income, partially offset by higher underwriting and loss adjustment expenses. Losses were lower in the current year due to \$3.6 million of increased favorable development on prior years' loss and LAE reserves and approximately \$2 million of improvement in current accident year results. Net investment income increased \$3.6 million, primarily due to earnings on invested assets transferred from our Life Companies segment to our Property and Casualty group related to a change in common employer from FAFLIC to Hanover Insurance, and from favorable operational cash flows. Underwriting and loss adjustment expenses increased approximately \$6 million, primarily due to expenses related to recently acquired subsidiaries, salaries and employee benefit costs, expenses related to the introduction of our *Connections Auto* product in Massachusetts, technology costs related to a new claims system, and higher expenses related to independent adjusters.

Life Companies' segment loss was \$2.5 million for the first quarter of 2007 compared to a loss of \$0.9 million during the same period in 2007. This increase was primarily due to lower net investment income primarily from the intercompany asset transfer.

Edgar Filing: HANOVER INSURANCE GROUP, INC. - Form 10-Q

Our federal income tax expense on segment income was \$28.2 million for the first quarter of 2008 compared to \$29.8 million for the same period in 2007, primarily due to lower underwriting income in our property and casualty business.

Table of Contents**Other Items**

Net realized losses on investments were \$5.1 million in the first quarter of 2008 compared to a gain of \$1.9 million in the same period of 2007. Net realized losses in 2008 are due to \$7.5 million of impairments, primarily from fixed maturities and other invested assets, partially offset by \$2.3 million of gains recognized principally from the sale of approximately \$280 million of fixed maturities.

In 2005, we sold our variable life insurance and annuity business to The Goldman Sachs Group, Inc. (Goldman Sachs). In the first quarter of 2008, we recorded a gain of \$6.2 million primarily due to the release of liabilities related to certain contractual indemnities to Goldman Sachs relating to the pre-sale activities of the business sold, which were recorded under FASB Interpretation No. 45, *Guarantors Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Others* (FIN 45). (See also Note 3 Sale of Variable Life Insurance and Annuity Business) In the first quarter of 2007, we recorded a loss of \$0.2 million related to operations conversion expenses. Additionally, in 2008, we recognized \$1.2 million of losses associated with the sale of a subsidiary, related to pre-sale activities.

Net income includes the following items by segment:

(In millions)	Three Months Ended March 31, 2008				
	Property and Casualty		Other Property and Casualty	Life Companies	Total
	Personal Lines	Commercial Lines	(2)		
Net realized investment (losses) gains (1)	\$ (2.0)	\$ (1.4)	\$ 3.1	\$ (4.8)	\$ (5.1)
Gains on derivative instruments				0.1	0.1
Gain on disposal of variable life insurance and annuity business, net of taxes				6.2	6.2
Other				(1.2)	(1.2)

(In millions)	Three Months Ended March 31, 2007				
	Property and Casualty		Other Property and Casualty	Life Companies	Total
	Personal Lines	Commercial Lines	(2)		
Net realized investment (losses) gains (1)	\$ (0.4)	\$ (0.3)	\$ 1.0	\$ 1.6	\$ 1.9
Federal income tax settlement				2.4	2.4
Loss on disposal of variable life insurance and annuity business, net of taxes				(0.2)	(0.2)

- (1) We manage investment assets for our property and casualty business based on the requirements of the entire property and casualty group. We allocate the investment income, expenses and realized gains (losses) to our Personal Lines, Commercial Lines and Other Property and Casualty segments based on actuarial information related to the underlying businesses.
- (2) Includes corporate eliminations.

Table of Contents**Segment Results**

The following is our discussion and analysis of the results of operations by business segment. The segment results are presented before taxes and other items, such as realized gains and losses, which we believe are not indicative of core operations.

Property and Casualty

The following table summarizes the results of operations for the Property and Casualty group:

(In millions)	Three Months Ended March 31,	
	2008	2007
Segment revenues		
Net premiums written	\$ 628.5	\$ 612.0
Net premiums earned	\$ 617.7	\$ 584.4
Net investment income	64.3	60.7
Other income	15.5	15.0
Total segment revenues	697.5	660.1
Losses and operating expenses		
Losses and loss adjustment expenses	379.7	353.1
Policy acquisition expenses	137.4	127.0
Other operating expenses	82.4	79.1
Total losses and operating expenses	599.5	559.2
Segment income	\$ 98.0	\$ 100.9

Three Months Ended March 31, 2008 Compared to Three Months Ended March 31, 2007

The Property and Casualty group's segment income decreased \$2.9 million, or 2.9%, to \$98.0 million, in the first quarter of 2008, compared to \$100.9 million in the first quarter of 2007. Catastrophe related activity increased by \$5.0 million in the quarter, to \$19.3 million, from \$14.3 million in the same period of 2007. Excluding the impact of catastrophe related activity, earnings would have increased by \$2.1 million. This increase is primarily due to favorable development of prior years' loss and LAE reserves, higher net investment income and more favorable current accident year results, partially offset by higher expenses. Favorable development on prior years' reserves increased \$3.6 million, to \$55.6 million in the first quarter of 2008, from \$52.0 million in the same period of 2007. Net investment income increased \$3.6 million, primarily due to earnings on invested assets transferred from our Life Companies segment to the Property and Casualty group related to a change in common employer from FAFLIC to Hanover Insurance, and from favorable operational cash flows. Current accident year results improved approximately \$2 million, with improvements in Commercial Lines being partially offset by declines in Personal Lines. Underwriting and loss adjustment expenses increased approximately \$6 million primarily due to expenses related to recently acquired subsidiaries, salaries and employee benefit costs, expenses related to the introduction of our *Connections Auto* product in Massachusetts, technology costs related to a new claims system, and higher expenses related to independent adjusters for increased weather related claims.

Table of Contents**Production and Underwriting Results**

The following table summarizes GAAP net premiums written and GAAP loss, LAE, expense and combined ratios for the Personal Lines and Commercial Lines segments. These items are not meaningful for our Other Property and Casualty segment.

(In millions, except ratios)	Three Months Ended March 31,					
	2008 GAAP Net Premiums Written	2008 GAAP Loss Ratios (1)(2)	Catastrophe loss ratios (3)	2007 GAAP Net Premiums Written	2007 GAAP Loss Ratios (1)(2)	Catastrophe loss ratios (3)

- (1) GAAP loss ratio is a common industry measurement of the results of property and casualty insurance underwriting. This ratio reflects incurred claims compared to premiums earned. Our GAAP loss ratios include catastrophe losses.
- (2) Includes policyholders' dividends.
- (3) Catastrophe loss ratio reflects incurred catastrophe claims compared to premiums earned.
- (4) GAAP combined ratio is a common industry measurement of the results of property and casualty insurance underwriting. This ratio is the sum of incurred claims, claim expenses and underwriting expenses incurred to premiums earned. Our GAAP combined ratios also include the impact of catastrophes. Federal income taxes, net investment income and other non-underwriting expenses are not reflected in the GAAP combined ratio.

Table of Contents

The following table summarizes GAAP underwriting results for the Personal Lines, Commercial Lines and Other Property and Casualty segments and reconciles it to GAAP segment income.

	Three Months Ended March 31, 2008				Three Months Ended March 31, 2007			
	Personal Lines	Commercial Lines	Other Property and Casualty	Total	Personal Lines	Commercial Lines	Other Property and Casualty	Total
GAAP underwriting (loss) profit, excluding prior year reserve development and catastrophes	\$ (5.6)	\$ 0.1	\$	\$ (5.5)	\$ 0.6	\$ (2.5)	\$ 0.3	\$ (1.6)

Segment income	\$ 27.6	\$ 68.3	\$ 2.1	\$ 98.0	\$ 47.4	\$ 49.0	\$ 4.5	\$ 100.9

Personal Lines

Personal Lines net premiums written decreased \$14.6 million, or 4.0%, to \$351.7 million for the first quarter of 2008. The most significant factor contributing to this decrease was a decline in net premiums written in Michigan, which we attribute to the declining economy in the state. We also experienced a decrease in Massachusetts, which resulted from the state mandated rate decrease of 12% effective April 1, 2007 and a decrease in premium from the Massachusetts Commonwealth Automobile Reinsurers (CAR) facility. Our exposure management actions, primarily in Florida and Louisiana, also contributed to the decrease in net premiums written. Additionally, premium decreases in our targeted growth states resulted from our *Connections Auto* profitability management actions implemented over the past several quarters, partially offset by growth in personal automobile renewal premium and an increase in new homeowners premium in these targeted growth states. These decreases in net written premium were partially offset by a favorable impact from changes in our reinsurance structure as discussed on page 14 of our 2007 Annual Report on Form 10-K, which increased net written premium by \$5.7 million in the first quarter of 2008.

Policies in force in the personal automobile line of business increased 0.2% at the end of the first quarter of 2008 compared to the first quarter of 2007. The increase was primarily the result of net growth in policies in force outside of Michigan, partially offset by a decrease in Michigan.

Policies in force in the homeowners line of business decreased 2.5% at the end of the first quarter of 2008, compared to the first quarter of 2007, primarily as a result of declines in Michigan. Policies in force also decreased due to exposure management actions taken in coastal states, particularly in Florida, where we have begun non-renewing all homeowners policies, and in Louisiana, where policies in force declined 17% compared to the first quarter of 2007. Partially offsetting these reductions is an increase in policies in force in newer, growth-targeted states.

Our underwriting profit, excluding prior year reserve development and catastrophes, declined \$6.2 million, from a profit of \$0.6 million in the first quarter of 2007 to a loss of \$5.6 million in 2008. This decline was due to a reduction in current accident year profit of approximately \$4 million, primarily due to higher non-catastrophe weather related claims, principally in the homeowners line, resulting from a more severe winter in the Midwest and Northeast, partially offset by the benefit of changes in our 2008 reinsurance programs. Additionally, underwriting and loss adjustment expenses were approximately \$3 million higher, primarily due to expenses related to the introduction of our *Connections Auto* product in Massachusetts, higher independent adjuster costs for increased weather related claims, and salaries and employee benefits.

Favorable development on prior years loss and LAE reserves decreased \$9.5 million, from \$21.5 million in the first quarter of 2007 to \$12.0 million in 2008. This decrease was driven by adverse personal automobile personal injury and property development in the 2007 accident year, partially offset by favorable development in the 2003 through 2006 accident years.

The pre-tax effect of catastrophes increased \$3.8 million, from \$7.2 million in the first quarter of 2007 to \$11.0 million in 2008.

Edgar Filing: HANOVER INSURANCE GROUP, INC. - Form 10-Q

Our ability to maintain and increase Personal Lines net written premium and to maintain and improve underwriting results is expected to be affected by increasing price competition, our ability to achieve acceptable margins, our ability to generate new business and to retain our existing business, regulatory actions, the difficult economic conditions in Michigan, and our plans to

Table of Contents

continue to reduce coastal exposures. In conjunction with the introduction of managed competition effective April 1, 2008, our overall personal automobile rate levels in Massachusetts are expected to decrease approximately 8%. Such rates may be subject to further revision throughout the year, depending on the competitive and regulatory environment.

In addition, as discussed under *Contingencies and Regulatory Matters - Other Regulatory Matters*, certain coastal states may take actions which significantly affect the property and casualty insurance market, including ordering rate reductions for homeowners insurance products and subjecting insurance companies that do business in that state to potentially significant assessments in the event of catastrophic losses that are insured or reinsured by state-sponsored insurance or reinsurance entities. Such state actions or our responses thereto could have a significant impact on our underwriting margins and growth prospects, as well as our ability to manage exposures to hurricane losses.

Commercial Lines

Commercial Lines net premiums written increased \$31.1 million, or 12.7%, to \$276.8 million for the first quarter of 2008. This increase included the benefit of changes in our 2008 reinsurance programs, premiums written related to recently acquired subsidiaries, and modest growth in our Commercial Lines of business. Effective January 1, 2008, we renewed our property and casualty reinsurance program with changes to the reinsurance structure as discussed on page 14 of our 2007 Annual Report on Form 10-K. These changes resulted in an increase in net written premium of \$19.6 million in the first quarter of 2008, of which \$9.4 million is a non-recurring amount related to the termination of our 2007 umbrella excess of loss reinsurance treaty. Net written premium from our recent acquisitions, Verlan and PDI, was \$7.9 million, of which \$1.5 million was non-recurring due to the termination of existing reinsurance coverage. The remaining premium increase was due to growth in our underlying Commercial Lines business, most notably in our bond business.

Our underwriting profit, excluding prior year reserve development and catastrophes, increased \$2.6 million in 2008, from a loss of \$2.5 million in 2007 to a profit of \$0.1 million in 2008. This increase was primarily due to higher current accident year profit of approximately \$5 million, primarily due to the benefit of changes in our reinsurance programs, the results of our recently acquired subsidiaries and growth in our inland marine and bond lines of business. These were partially offset by higher underwriting and loss adjustment expenses of approximately \$2 million, primarily attributable to our recently acquired subsidiaries. The overall impact of our recent acquisitions on our underwriting profit and underwriting profit excluding prior year loss development, was a loss of \$0.8 million and a profit of \$0.1 million, respectively.

Favorable development on prior years loss and LAE reserves increased \$14.1 million, from \$30.5 million for the first quarter of 2007 to \$44.6 million in 2008. This increase primarily relates to the commercial multiple peril line of business.

The pre-tax effect of catastrophes increased \$1.2 million, to \$8.3 million in the first quarter of 2008 from \$7.1 million in the first quarter of 2007.

We are experiencing increasing competition in our Commercial Lines segment and modest premium decreases on renewal policies, most notably in our middle market and commercial automobile business and relatively flat pricing in our small commercial business. The industry is also generally experiencing overall rate decreases. Our ability to increase Commercial Lines net premiums written while maintaining or improving underwriting results is expected to be affected by increased price competition and the difficult economic conditions in Michigan.

Other Property and Casualty

Segment income of the Other Property and Casualty segment decreased \$2.4 million, to \$2.1 million for the quarter ended March 31, 2008, from \$4.5 million in the same period of 2007. The decrease is primarily due to adverse development in our run-off voluntary pools business and increased expenses related to our premium financing business.

Investment Results

Net investment income increased \$3.6 million, or 5.9%, to \$64.3 million for the quarter ended March 31, 2008, primarily due to earnings on invested assets transferred from our Life Companies segment to the Property and Casualty group. Effective January 1, 2008, Hanover Insurance became the common employer of all employees of the holding company and its subsidiaries and sponsorship of all employee benefit and pension plans was transferred from FAFLIC to Hanover Insurance. Accordingly, we transferred liabilities associated with these benefit plans and other employee related items, and an equal amount of assets to Hanover Insurance. Excluding earnings on these intersegment transfers, net investment income would have increased \$0.7 million, or 1.1%, in 2008, which is primarily due to higher average invested assets resulting from increased operational cash flows in the latter half of 2007. Net investment income also includes \$0.5 million related to our recently acquired subsidiaries.

Table of Contents

Reserve for Losses and Loss Adjustment Expenses

Overview of Loss Reserve Estimation Process

We maintain reserves for our property and casualty products to provide for our ultimate liability for losses and loss adjustment expenses with respect to reported and unreported claims incurred as of the end of each accounting period. These reserves are estimates, taking into account actuarial projections at a given point in time, of what we expect the ultimate settlement and administration of claims will cost based on facts and circumstances then known, estimates of future trends in claim severity and frequency, judicial theories of liability and policy coverage, and other factors.

We determine the amount of loss and loss adjustment expense reserves (the loss reserves) based on an estimation process that is very complex and uses information obtained from both company specific and industry data, as well as general economic information. The estimation process is judgmental, and requires us to continuously monitor and evaluate the life cycle of claims on type-of-business and nature-of-claim bases. Using data obtained from this monitoring and assumptions about emerging trends, our actuaries develop information about the size of ultimate claims based on historical experience and other available market information. The most significant assumptions used in the actuarial estimation process, which vary by line of business, include determining the expected consistency in the frequency and severity of claims incurred but not yet reported to prior years claims, the trend in loss costs, changes in the timing of the reporting of losses from the loss date to the notification date and expected costs to settle unpaid claims. This process assumes that past experience, adjusted for the estimated effects of current developments and anticipated trends, is an appropriate basis for predicting future events. On a quarterly basis, our actuaries provide to management a point estimate for each significant line of our direct business to summarize their analysis.

In establishing the appropriate loss reserve balances for any period, management carefully considers these actuarial point estimates, which are the principal bases for establishing our reserve balances, along with a qualitative evaluation of business trends, environmental changes, and numerous other factors. In general, such additional factors may include, but are not limited to, improvement or deterioration of the actuarial indications in the period, the maturity of the accident year, trends observed over the recent past such as changes in the mix of business or the impact of regulatory or litigation developments, the anticipated impact of new product introductions or expansion into new geographic areas, the level of volatility within a particular line of business, and the magnitude of the difference between the actuarial indication and the recorded reserves. Regarding our indirect business from voluntary and involuntary pools, we are provided loss estimates by managers of each pool. We adopt reserve estimates for the pools that consider this information and other facts.

Management's Review of Judgments and Key Assumptions

There is greater inherent uncertainty in estimating insurance reserves for certain types of property and casualty insurance lines, particularly workers compensation and other liability lines, where a longer period of time may elapse before a definitive determination of ultimate liability and losses may be made. In addition, the technological, judicial, regulatory and political climates involving these types of claims change regularly. There is also greater uncertainty in establishing reserves with respect to new business, particularly new business which is generated with respect to newly introduced product lines, by newly appointed agents or in geographies in which we have less experience in conducting business. In such cases, there is less historical experience or knowledge and less data upon which the actuaries can rely. Historically, we have limited the issuance of long-tailed other liability policies, including directors and officers (D&O) liability, errors and omissions (E&O) liability and medical malpractice liability. The industry has experienced adverse loss trends in these lines of business.

We regularly update our reserve estimates as new information becomes available and further events occur which may impact the resolution of unsettled claims. Reserve adjustments are reflected in the results of operations as adjustments to losses and LAE. Often, these adjustments are recognized in periods subsequent to the period in which the underlying policy was written and the loss event occurred. These types of subsequent adjustments are described separately as prior year reserve development. Such development can be either favorable or unfavorable to our financial results and may vary by line of business.

Inflation generally increases the cost of losses covered by insurance contracts. The effect of inflation varies by product. Our property and casualty insurance premiums are established before the amount of losses and LAE and the extent to which inflation may affect such expenses are known. Consequently, we attempt, in establishing rates and reserves, to anticipate the potential impact of inflation and increasing medical costs in the projection of ultimate costs. We have experienced increasing medical costs, including those associated with personal automobile personal injury protection claims, particularly in Michigan, as well as in our workers compensation line in most states. This increase is reflected in our reserve estimates, but continued increases could contribute to increased losses and LAE in the future.

We regularly review our reserving techniques, our overall reserving position and our reinsurance. Based on (i) our review of historical data, legislative enactments, judicial decisions, legal developments in impositions of damages and policy coverage,

Table of Contents

political attitudes and trends in general economic conditions, (ii) our review of per claim information, (iii) our historical loss experience and that of the industry, (iv) the relatively short-term nature of most policies written by us, and (v) our internal estimates of required reserves, we believe that adequate provision has been made for loss reserves. However, establishment of appropriate reserves is an inherently uncertain process and there can be no certainty that current established reserves will prove adequate in light of subsequent actual experience. A significant change to the estimated reserves could have a material impact on our results of operations and financial position. An increase or decrease in reserve estimates would result in a corresponding decrease or increase in financial results. For example, each one percentage point change in the aggregate loss and LAE ratio resulting from a change in reserve estimation is currently projected to have an approximate \$24 million impact on property and casualty segment income, based on 2007 full year premiums.

As discussed below, estimated loss and LAE reserves for claims occurring in prior years developed favorably by \$55.6 million and \$52.0 million for the quarters ended March 31, 2008 and 2007, respectively, which represents 2.5% and 2.3% of net loss reserves held, respectively.

The major causes of material uncertainty relating to ultimate losses and loss adjustment expenses (risk factors) generally vary for each line of business, as well as for each separately analyzed component of the line of business. In some cases, such risk factors are explicit assumptions of the estimation method and in others, they are implicit. For example, a method may explicitly assume that a certain percentage of claims will close each year, but will implicitly assume that the legal interpretation of existing contract language will remain unchanged. Actual results will likely vary from expectations for each of these assumptions, resulting in an ultimate claim liability that is different from that being estimated currently.

Some risk factors will affect more than one line of business. Examples include changes in claim department practices, changes in settlement patterns, regulatory and legislative actions, court actions, timeliness of claim reporting, state mix of claimants, and degree of claimant fraud. The extent of the impact of a risk factor will also vary by components within a line of business. Individual risk factors are also subject to interactions with other risk factors within line of business components. Thus, risk factors can have offsetting or compounding effects on required reserves.

We are also defendants in various litigation, including putative class actions, which claim punitive damages or claim a broader scope of policy coverage than our interpretation, particularly in connection with losses incurred from Hurricane Katrina. The reserves established with respect to Hurricane Katrina assume that we will prevail with respect to these matters (See also Contingencies and Regulatory Matters). Although we believe our current Hurricane Katrina reserves are adequate, there can be no assurance that our ultimate costs associated with this event will not substantially exceed these estimates.

Loss Reserves by Line of Business

We perform actuarial reviews on certain detailed line of business coverages. These individual estimates are summarized into nine broader lines of business including personal automobile, homeowners, workers compensation, commercial automobile, commercial multiple peril, and other personal and other commercial lines. Asbestos and environmental reserves and pools business are separately analyzed.

The process of estimating reserves involves considerable judgment by management and is inherently uncertain. Actuarial point estimates by lines of business are the primary bases for determining ultimate expected losses and LAE and the level of net reserves required; however, other factors are considered as well. In general, such additional factors may include, but are not limited to, improvement or deterioration of the actuarial indications in the period, the maturity of the accident year, trends observed over the recent past such as changes in the mix of business or the impact of regulatory or litigation developments, the amount of data or experience we have with respect to a particular product or geographic area, the level of volatility within a particular line of business, and the magnitude of the difference between the actuarial indication and the recorded reserves.

Table of Contents

The table below shows our recorded reserves, net of reinsurance, and the related actuarial reserve point estimates by line of business at March 31, 2008 and December 31, 2007.

(In millions)	March 31, 2008		December 31, 2007	
	Recorded Net Reserves	Actuarial Point Estimate	Recorded Net Reserves	Actuarial Point Estimate
Personal Automobile	\$ 682.2	\$ 649.8	\$ 696.7	\$ 672.8
Homeowners	116.3	114.6	99.4	97.4
Other Personal Lines	18.3	14.9	24.9	22.1
Workers Compensation	367.3	354.3	371.1	353.9
Commercial Automobile	164.6	152.9	169.9	159.8
Commercial Multiple Peril	449.5	410.4	463.3	424.2
Other Commercial Lines	184.8	171.7	179.9	165.4
Asbestos and Environmental	19.9	19.5	19.4	20.0
Pools and Other	197.5	197.5	200.7	200.7
Total	\$ 2,200.4	\$ 2,085.6	\$ 2,225.3	\$ 2,116.3

The principal factors considered by management in addition to the actuarial point estimates in determining the reserves at March 31, 2008 and December 31, 2007 vary by line of business. In our Commercial Lines segment, management considered the growth and product mix changes and recent adverse property related frequency trends in certain coverages. In addition, management also considered the significant growth in our inland marine and bond businesses for which we have limited actuarial data to estimate losses and the product mix change in our bond business towards a greater proportion of contract surety bonds where losses tend to emerge over a longer period of time and are cyclical related to general economic conditions. Moreover, in our Commercial Lines segment, management considered the potential for adverse development in the workers compensation line where losses tend to emerge over long periods of time and rising medical costs, while moderating, have continued to be a concern. In our Personal Lines segment, management considered the adverse personal automobile personal injury development and related potential for adverse trends due to costs shifting from health insurers to property and casualty insurers resulting from economic concerns and health insurance coverage trends, developments in personal automobile property costs in the 2007 accident year and an increase in physical damage frequency, all of which have added additional uncertainty to future development in our personal automobile line. Additionally, management considered the significant growth in our new business with our *Connections Auto* product and related growth in a number of states where there is additional uncertainty in the ultimate profitability and development of reserves due to the unseasoned nature of our new business and new agency relationships in these markets, as well as emerging loss trends which are higher than expected. Our lack of credible actuarial data to estimate losses in these new geographical areas and agency relationships and with this new product causes uncertainty in estimating ultimate reserves and requires considerable judgment by management. Also in Personal Lines, management considered the significant improvement in frequency trends the industry experienced during 2001 through 2006 in these lines of business which were unanticipated and remain to some extent unexplained. Management also considered the likelihood of future adverse development related to significant catastrophe losses experienced in 2005. Regarding our indirect business from voluntary and involuntary pools, we are provided loss estimates by managers of each pool. We adopt reserve estimates for the pools that consider this information and other factors. At March 31, 2008 and December 31, 2007, total recorded net reserves were 5.5% and 5.2% greater than actuarially indicated reserves, respectively.

Table of Contents

The table below provides a reconciliation of the gross beginning and ending reserve for unpaid losses and LAE as follows:

(In millions)	Three Months Ended	
	March 31,	
	2008	2007
Reserve for losses and LAE, beginning of period	\$ 3,165.8	\$ 3,163.9
Incurred losses and LAE, net of reinsurance recoverable:		
Provision for insured events of current year	435.9	405.0
Decrease in provision for insured events of prior years; favorable development	(55.6)	(52.0)
Total incurred losses and LAE	380.3	353.0
Payments, net of reinsurance recoverable:		
Losses and LAE attributable to insured events of current year	131.7	115.1
Losses and LAE attributable to insured events of prior years	266.3	233.6
Hurricane Katrina	9.7	15.7
Total payments	407.7	364.4
Change in reinsurance recoverable on unpaid losses	(18.6)	4.6
Purchase of Verlan Fire Insurance Company	4.2	
Reserve for losses and LAE, end of period	\$ 3,124.0	\$ 3,157.1

The table below summarizes the gross reserve for losses and LAE by line of business.

(In millions)	March 31,	December 31,
	2008	2007
Personal Automobile	\$ 1,263.3	\$ 1,277.4
Homeowners and Other	172.2	162.5
Total Personal	1,435.5	1,439.9
Workers Compensation	583.1	593.8
Commercial Automobile	242.7	250.8
Commercial Multiple Peril	522.4	541.8
Other Commercial	340.3	339.5
Total Commercial	1,688.5	1,725.9
Total reserve for losses and LAE	\$ 3,124.0	\$ 3,165.8

The total reserve for losses and LAE as disclosed in the above table decreased by \$41.8 million for the quarter ended March 31, 2008.

Prior Year Development by Line of Business

When trends emerge that we believe affect the future settlement of claims, we adjust our reserves accordingly. Reserve adjustments are reflected in the Consolidated Statements of Income as adjustments to losses and LAE. Often, we recognize these adjustments in periods subsequent to the period in which the underlying loss event occurred. These types of subsequent adjustments are disclosed and discussed separately as prior year reserve development. Such development can be either favorable or unfavorable to our financial results.

Table of Contents

The following table summarizes the change in provision for insured events of prior years by line of business.

(In millions)	Three Months Ended March 31,	
	2008	2007
(Decrease) increase in loss provision for insured events of prior years:		
Personal Automobile	\$ (16.2)	\$ (25.6)
Homeowners and Other	3.6	2.7
Total Personal	(12.6)	(22.9)
Workers Compensation	(9.6)	(10.0)
Commercial Automobile	(5.9)	(4.5)
Commercial Multiple Peril	(16.7)	(6.4)
Other Commercial	(9.5)	(7.0)
Total Commercial	(41.7)	(27.9)
Voluntary Pools	1.0	
Decrease in loss provision for insured events of prior years	(53.3)	(50.8)
Decrease in LAE provision for insured events of prior years	(2.3)	(1.2)
Decrease in total loss and LAE provision for insured events of prior years	\$ (55.6)	\$ (52.0)

Estimated loss reserves for claims occurring in prior years developed favorably by \$53.3 million and \$50.8 million during the first quarters of 2008 and 2007, respectively. The favorable loss reserve development during the first quarter of 2008 is primarily the result of lower than expected frequency of bodily injury in the personal automobile line, primarily in the 2003 through 2006 accident years, and lower than expected severity of liability claims in the commercial multiple peril line for the 2002 through 2007 accident years. In addition, lower than expected severity in the workers compensation line, primarily in the 2003 through 2007 accident years, contributed to the favorable development.

The favorable loss reserve development during the first quarter of 2007 was primarily the result of lower than expected bodily injury claim frequency in the personal automobile line, primarily in the three most recent accident years, and lower than expected severity in the workers compensation line, also primarily in the three most recent accident years. In addition, lower than expected frequency of liability claims in the commercial multiple peril line for the 2005 and prior accident years contributed to the favorable development.

During the first quarters of 2008 and 2007, estimated LAE reserves for claims occurring in prior years developed favorably by \$2.3 million and \$1.2 million, respectively. The favorable development in first quarter of 2008 and 2007 is primarily attributable to improvements in ultimate loss activity on prior accident years, primarily in the commercial multiple peril line, partially offset by an adverse litigation settlement in the first quarter of 2007, primarily impacting the personal automobile line.

Although we have experienced significant favorable development in both losses and LAE in recent years, there can be no assurance that this level of favorable development will occur in the future. We believe that we will experience less favorable prior year development in future years than we experienced recently. The factors that resulted in the favorable development of prior year reserves are considered in our ongoing process for establishing current accident year reserves. In light of our recent years of favorable development, the factors driving this development were considered to varying degrees in setting the more recent years accident year reserve. As a result, we expect the current and most recent accident year reserves not to develop as favorably as they have in the past. In light of the significance, in recent periods, of favorable development to our Property and Casualty segment income, declines in favorable development could be material to our results of operations.

Asbestos and Environmental Reserves

Although we attempt to limit our exposures to asbestos, environmental damage and toxic tort liability through specific policy exclusions, we have been and may continue to be subject to claims related to these exposures. Ending loss and LAE reserves for all direct business written by our property and casualty companies related to asbestos, environmental damage and toxic tort liability, included in the reserve for losses and LAE, were \$19.9 million and \$19.4 million at March 31, 2008 and December 31, 2007, respectively, net of reinsurance of \$8.4 million and

Edgar Filing: HANOVER INSURANCE GROUP, INC. - Form 10-Q

\$11.1 million at March 31, 2008 and December 31, 2007, respectively. In recent years average asbestos and environmental payments have declined modestly. As a result of our historical direct underwriting mix of Commercial Lines policies toward smaller and middle market risks, past asbestos, environmental damage and toxic tort liability loss experience has remained minimal in relation to our total loss and LAE incurred experience.

In addition, and not included in the numbers above, we have established loss and LAE reserves for assumed reinsurance pool business with asbestos, environmental damage and toxic tort liability of \$57.1 million and \$56.9 million at March 31, 2008 and

Table of Contents

December 31, 2007, respectively. These reserves relate to pools in which we have terminated our participation; however, we continue to be subject to claims related to years in which we were a participant. A significant part of our pool reserves relates to our participation in the Excess and Casualty Reinsurance Association (ECRA) voluntary pool from 1950 to 1982. In 1982, the pool was dissolved and since that time, the business has been in runoff. Our percentage of the total pool liabilities varied from 1% to 6% during these years. Our participation in this pool has resulted in average paid losses of approximately \$2 million annually over the past ten years. Because of the inherent uncertainty regarding the types of claims in these pools, we cannot provide assurance that our reserves will be sufficient.

We estimate our ultimate liability for asbestos, environmental and toxic tort liability claims, whether resulting from direct business, assumed reinsurance or pool business, based upon currently known facts, reasonable assumptions where the facts are not known, current law and methodologies currently available. Although these outstanding claims are not significant, their existence gives rise to uncertainty and are discussed because of the possibility that they may become significant. We believe that, notwithstanding the evolution of case law expanding liability in asbestos and environmental claims, recorded reserves related to these claims are adequate. Nevertheless, the asbestos, environmental and toxic tort liability reserves could be revised, and any such revisions could have a material adverse effect on our results of operations for a particular quarterly or annual period or on our financial position.

Life Companies

On December 30, 2005, we sold all of the outstanding shares of capital stock of Allmerica Financial Life Insurance and Annuity Company (AFLIAC), a life insurance subsidiary representing approximately 95% of our run-off variable life insurance and annuity business, to Goldman Sachs. The transaction also included the reinsurance of 100% of the variable business of FAFLIC. Additionally, we continue to evaluate strategic alternatives related to our remaining life insurance subsidiary.

Our Life Companies segment is discussed in two major components: Continuing Operations and Discontinued Operations.

Continuing Operations

The following table summarizes the results of operations for the Continuing Operations segment for the periods indicated.

(In millions)	Three Months Ended March 31,	
	2008	2007
Segment revenues		
Premiums	\$ 12.9	\$ 17.8
Fees and other income		0.4
Net investment income	16.2	19.3
Total segment revenue	29.1	37.5
Policy benefits, claims and operating expenses		
Policy benefits, claims and losses	26.6	32.0
Policy acquisition and other operating expenses	5.0	6.4
Total policy benefits, claims and operating expenses	31.6	38.4
Segment loss	\$ (2.5)	\$ (0.9)

Three Months Ended March 31, 2008 Compared to Three Months Ended March 31, 2007

Life Companies Continuing Operations segment loss was \$2.5 million in the first quarter of 2008, compared to a loss of \$0.9 million during the same period in 2007. The increase in segment loss was primarily due to lower net investment income resulting from an intercompany transfer of assets to our Property and Casualty segment. Effective January 1, 2008, Hanover Insurance became the common employer for all employees of THG and its subsidiaries and sponsorship of all employee benefit and pension plans was transferred from FAFLIC to Hanover Insurance. Accordingly, we transferred liabilities with corresponding assets associated with these benefit plans and other employee related items to

Edgar Filing: HANOVER INSURANCE GROUP, INC. - Form 10-Q

Hanover Insurance. In addition, we experienced slight unfavorable mortality in the business, with unfavorable mortality in our traditional line of business partially offset by favorable mortality in our group retirement line. These unfavorable items were partially offset by lower operating expenses.

Table of Contents**Discontinued Operations***Gain/(Loss) on Sale of AFLIAC Variable Life Insurance and Annuity Business*

(In millions)	Three Months Ended March 31,	
	2008	2007
Gain/(loss) on sale of AFLIAC variable life insurance and annuity business	\$ 6.2	\$ (0.2)

For the quarter ended March 31, 2008, we recorded a gain of \$6.2 million, net of tax, primarily due to the release of liabilities related to certain contractual indemnities to Goldman Sachs relating to the pre-sale activities of the business sold, which were recorded under FIN 45. For the quarter ended March 31, 2007, we recorded a net loss of \$0.2 million, primarily due to conversion costs associated with this variable business.

As of March 31, 2008, our total gross FIN 45 liability was \$19.2 million. Although we believe our current estimate for our FIN 45 liability is appropriate, there can be no assurance that this estimate will not materially increase in the future.

Investment Portfolio

We held general account investment assets diversified across several asset classes, as follows:

(In millions, except percentage data)	March 31, 2008		December 31, 2007	
	Carrying Value	% of Total Carrying Value	Carrying Value	% of Total Carrying Value
Fixed maturities (1)	\$ 5,646.6	92.4%	\$ 5,722.0	92.0%
Equity securities (1)	49.1	0.8	44.9	0.7
Mortgages	38.3	0.6	41.2	0.7
Policy loans (1)	111.9	1.9	116.0	1.9
Cash and cash equivalents (1)	233.3	3.8	262.8	4.2
Other long-term investments	30.1	0.5	30.7	0.5
Total	\$ 6,109.3	100.0%	\$ 6,217.6	100.0%

(1) We carry these investments at fair value.

Total investment assets decreased \$108.3 million, or 1.7%, to \$6.1 billion during the first quarter of 2008, of which fixed maturities decreased \$75.4 million and cash and cash equivalents decreased \$29.5 million. Fixed maturities declined primarily due to operational cash flow requirements in the Property and Casualty group as well as the Company's stock repurchase program. Cash and cash equivalents decreased primarily due to a decline in the balance of collateral held related to our securities lending program and the run-off of our life operations.

Our fixed maturity portfolio is comprised primarily of investment grade corporate securities, mortgage-backed securities, taxable and tax-exempt issues of state and local governments, U.S. government and agency securities and other issues. Based on ratings by the National Association of Insurance Commissioners (NAIC), our fixed maturity portfolio consisted of 95.0% investment grade securities at March 31, 2008 and 94.5% at December 31, 2007.

Table of Contents

The following table provides information about the credit quality of our fixed maturities.

(In millions, except percentage data)		March 31, 2008			December 31, 2007		
NAIC Designation	Rating Agency	Amortized Cost	Carrying Value	% of Total Carrying Value	Amortized Cost	Carrying Value	% of Total Carrying Value
	Equivalent Designation						
1	Aaa/Aa/A	\$ 4,070.8	\$ 4,084.3	72.3%	\$ 4,149.5	\$ 4,164.1	72.8%
2	Baa	1,290.1	1,282.0	22.7	1,257.6	1,244.2	21.7

Total fixed maturities		\$ 5,654.8	\$ 5,646.6	100.0%	\$ 5,723.1	\$ 5,722.0	100.0%

We do not hold subprime mortgages either directly or through our mortgage backed securities, nor do we currently own any collateralized debt and loan obligations or invest in credit derivatives. Our residential mortgage-backed securities constitute \$1.1 billion of our invested assets, with less than 15% held in non-agency securities. Commercial mortgage-backed securities (CMBS) constitute \$468.3 million of our invested assets. Approximately 95% of our CMBS holdings were from pre-2005 vintages, with 5% from the 2006 vintage and no 2005 vintage. The entire CMBS portfolio had a weighted average loan to value ratio of 67.2%. Also, we have limited exposure to the secondary credit risk presented by financial guarantors of municipal obligations. Financial guarantor insurance enhanced municipal bonds were \$365.8 million, or approximately 44%, of our municipal bond portfolio at March 31, 2008, with a weighted average credit rating of AA. The overall weighted average credit rating of our insured municipal bond portfolio, giving no effect to the insurance enhancement, was A-. In addition, we believe we have limited indirect exposure to subprime mortgages through our investments in debt securities of banking, brokerage and insurance companies. Based on the issuing companies' public disclosure, we identified approximately \$137 million of corporate bonds which we believe have significant subprime exposure. At March 31, 2008, these securities have a weighted average rating of A and net unrealized losses of \$20.4 million.

Our fixed maturity and equity securities are classified as available-for-sale and are carried at fair value. As of January 1, 2008, we adopted Statement of Financial Accounting Standards No. 157, *Fair Value Measurements* (Statement No. 157) with respect to our investment assets and liabilities which was not material to our financial position or results of operations. Statement No. 157 creates a common definition of fair value, establishes a hierarchy for determining fair value that emphasizes the use of observable market data whenever available and requires expanded disclosures. Financial instruments whose value is determined using significant management judgment or estimation are less than 1% of the total assets and liabilities we measured at fair value. See Note 7 of the Notes to Interim Consolidated Financial Statements included under Item 1 of this filing.

Although we expect to invest new funds primarily in cash, cash equivalents and investment grade fixed maturities, we have invested and expect to continue investing a small portion of funds in equity securities, and we may invest a portion in below investment grade fixed maturities and other assets. The average yield on fixed maturities was 5.6% for March 31, 2008 and December 31, 2007.

At March 31, 2008, \$112.4 million of our fixed maturities were invested in traditional private placement securities, as compared to \$111.3 million at December 31, 2007. Fair values of traditional private placement securities are determined by pricing models, including the use of discounted cash flow analyses.

We recognized \$7.5 million of realized losses on other-than-temporary impairments of fixed maturities for the first quarter of 2008, as compared to \$0.5 million for the first quarter of 2007, principally resulting from our exposure to below investment grade securities. In our determination of other-than-temporary impairments, we consider several factors and circumstances, including the issuer's overall financial condition; the issuer's credit and financial strength ratings; the issuer's financial performance, including earnings trends, dividend payments, and asset quality; a weakening of the general market conditions in the industry or geographic region in which the issuer operates; the length of time in which the fair value of an issuer's securities remains below our cost; and with respect to fixed maturity investments, any factors that might raise doubt about the issuer's ability to pay all amounts due according to the contractual terms. We apply these factors to all securities. Other-than-temporary impairments are recorded as a realized loss, which reduces net income and earnings per share. Temporary declines in market value are recorded as unrealized losses, which do not affect net income and earnings per share but reduce other comprehensive income. We cannot provide

assurance that the other-than-temporary impairments will, in fact, be adequate to cover future losses or that we will not have substantial additional impairments in the future.

Table of Contents

The following table provides information about our fixed maturities that have been continuously in an unrealized loss position.

(In millions)	March 31, 2008		December 31, 2007	
	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value
Investment grade fixed maturities:				
12 months or less	\$ 42.1	\$ 995.1	\$ 27.1	\$ 740.0
Greater than 12 months	45.7	646.3	34.3	1,214.7
Total investment grade fixed maturities	87.8	1,641.4	61.4	1,954.7
Below investment grade fixed maturities:				
12 months or less	16.6	183.3	8.3	171.0
Greater than 12 months				
Total below investment grade fixed maturities	16.6	183.3	8.3	171.0
Equity securities	2.4	31.3	0.5	17.8
Total fixed maturities and equity securities	\$ 106.8	\$ 1,856.0	\$ 70.2	\$ 2,143.5

We had \$106.8 million of gross unrealized losses on fixed maturities and equity securities at March 31, 2008, as compared to \$70.2 million at December 31, 2007. Unrealized losses on investment grade and below investment grade securities increased during the first quarter of 2008 due to widening credit spreads. In our investment grade bonds, spreads widened most notably in the financial sector for companies that have exposure to the residential mortgage market, and to a lesser extent, in our prime mortgage-backed securities holdings. In our below investment grade portfolio, corporate bonds with lower ratings declined in value as investors evaluated the length and severity of the economic slowdown in the U.S. and its impact on the global economy. Obligations of the U.S. Treasury, U.S. government and agency securities, states and political subdivisions had associated gross unrealized losses of \$2.7 million at March 31, 2008 and \$2.4 million at December 31, 2007. At March 31, 2008 and December 31, 2007, substantially all below investment grade securities with an unrealized loss had been rated by the NAIC, Standard & Poor's or Moody's.

We view the gross unrealized losses on fixed maturities and equity securities as being temporary since it is our assessment that these securities will recover in the near term. Furthermore, as of March 31, 2008, we had the intent and ability to retain such investments for the period of time anticipated to allow for this expected recovery in fair value. The risks inherent in our assessment methodology include the risk that, subsequent to the balance sheet date, market factors may differ from our expectations; we may decide to subsequently sell a security for unforeseen business needs; or changes in the credit assessment or equity characteristics from our original assessment may lead us to determine that a sale at the current value would maximize recovery on such investments. To the extent that there are such adverse changes, the unrealized loss would then be realized and we would record a charge to earnings. Although unrealized losses are not reflected in the results of financial operations until they are realized or deemed other-than-temporary, the fair value of the underlying investment, which does reflect the unrealized loss, is reflected in our Consolidated Balance Sheets.

The following table sets forth gross unrealized losses for fixed maturities by maturity period and for equity securities at March 31, 2008 and December 31, 2007. Actual maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations, with or without call or prepayment penalties, or we may have the right to put or sell the obligations back to the issuers. Mortgage-backed securities are included in the category representing their ultimate maturity.

(In millions)	March 31, 2008	December 31, 2007
Due in one year or less	\$ 0.1	\$ 0.2
Due after one year through five years	21.0	11.2
Due after five years through ten years	45.9	38.5
Due after ten years	37.4	19.8

Edgar Filing: HANOVER INSURANCE GROUP, INC. - Form 10-Q

Total fixed maturities	104.4	69.7
Equity securities	2.4	0.5
Total fixed maturities and equity securities	\$ 106.8	\$ 70.2

The carrying value of fixed maturity securities on non-accrual status at March 31, 2008 and December 31, 2007, as well as the effect that non-accruals had on net investment income were not material. Although we did not experience defaults in the first quarter of 2008, any defaults in the fixed maturities portfolio in future periods may negatively affect investment income.

Table of Contents

Income Taxes

We file a consolidated United States federal income tax return that includes the holding company and its domestic subsidiaries (including non-insurance operations). We segregate the entities included within the consolidated group into either a life insurance or a non-life insurance company subgroup. The consolidation of these subgroups is subject to certain statutory restrictions on the percentage of eligible non-life tax losses that can be applied to offset life company taxable income.

The provision for federal income taxes from continuing operations was an expense of \$27.0 million during the first quarter of 2008, compared to an expense of \$28.1 million during the same period in 2007. These provisions resulted in consolidated effective federal tax rates of 33.5% and 30.6% for the quarters ended March 31, 2008 and 2007, respectively. This increase in the tax rate is primary due to a \$2.4 million benefit realized in 2007 for a settlement with the Internal Revenue Service (IRS) of interest claims for 1977 through 1994.

In the first quarter of 2008, we increased our valuation allowance related to our deferred tax asset by \$3.3 million, from \$166.1 million to \$169.4 million. The increase in this valuation allowance resulted primarily from realized investment losses in the quarter and from unrealized depreciation primarily associated with our Closed Block investment portfolio. Accordingly, we recorded a valuation allowance of \$1.8 million as an adjustment to Federal Income Tax Expense in our Consolidated Statements of Income as well as a \$1.5 million valuation allowance as an adjustment to Contractholder Deposit Funds and Other Policy Liabilities for the deferred tax associated with the unrealized losses of the Closed Block.

Effective January 1, 2007, we adopted the provisions of FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*, an interpretation of FASB Statement No. 109 (FIN 48). As a result of the implementation of FIN 48, we recognized an \$11.5 million decrease in the liability for unrecognized tax benefits, which was reflected as an increase in the January 1, 2007 balance of retained earnings.

A corporation is entitled to a tax deduction from gross income for a portion of any dividend which was received from a domestic corporation that is subject to income tax. This is referred to as a dividends received deduction. In this and in prior years, we have taken this dividends received deduction when filing our federal income tax return. Many separate accounts held by life insurance companies receive dividends from such domestic corporations, and therefore, were regarded as entitled to this dividends received deduction. In its Revenue Ruling 2007-61, issued on September 25, 2007, the IRS announced its intention to issue regulations with respect to certain computational aspects of the dividends received deduction on separate account assets held in connection with variable annuity contracts. Revenue Ruling 2007-61 suspended a revenue ruling issued in August 2007 that purported to change accepted industry and IRS interpretations of the statutes governing these computational questions. Any regulations that the IRS ultimately proposes for issuance in this area will be subject to public notice and comment, at which time insurance companies and other members of the public will have the opportunity to raise legal and practical questions about the content, scope and application of such regulations. As a result, the ultimate timing and substance of any such regulations are not yet known, but they could result in the elimination of some or all of the separate account dividends received deduction tax benefit that we receive. We believe that it is more likely than not that any such regulation would apply prospectively only, and application of this regulation is not expected to be material to our results of operations in any future annual period. However, there can be no assurance that the outcome of the revenue ruling will be as anticipated and should retroactive application be required, our results of operations may be adversely affected in a quarterly or annual period. We believe that retroactive application would not materially affect our financial position.

Significant Transactions

On March 14, 2008, we acquired all of the outstanding shares of Verlan Holdings, Inc. for \$29.0 million. Verlan Holdings, Inc. is a specialty company providing property insurance to small and medium-sized manufacturing and distribution companies, and which historically has generated annual written premium of approximately \$18 million.

On March 10, 2008, we entered into a definitive agreement to sell our premium financing subsidiary, AMGRO, Inc. and its subsidiaries to Premium Financing Specialists, Inc. The transaction is subject to regulatory review and approval, as well as the satisfaction of certain closing conditions, and is expected to close in the second quarter of 2008.

Critical Accounting Estimates

The discussion and analysis of our financial condition and results of operations are based upon the consolidated financial statements. These statements have been prepared in accordance with GAAP, which requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Actual results could differ from those estimates. The following critical accounting estimates are those which we believe affect the more significant judgments and estimates used in the preparation of our financial statements. Additional

information about our other significant accounting

Table of Contents

policies and estimates may be found in Note 1 Summary of Significant Accounting Policies of the Notes to Consolidated Financial Statements included in our Annual Report on Form 10-K for the year ended December 31, 2007.

Property & Casualty Insurance Loss Reserves

We determine the amount of loss and loss adjustment expense reserves (the loss reserves), as discussed in Segment Results Property and Casualty, Overview of Loss Reserve Estimation Process based on an estimation process that is very complex and uses information obtained from both company specific and industry data, as well as general economic information. The estimation process is judgmental, and requires us to continuously monitor and evaluate the life cycle of claims on type-of-business and nature-of-claim bases. Using data obtained from this monitoring and assumptions about emerging trends, our actuaries develop information about the size of ultimate claims based on historical experience and other available market information. The most significant assumptions used in the actuarial estimation process, which vary by line of business, include determining the expected consistency in the frequency and severity of claims incurred but not yet reported to prior years claims, the trend in loss costs, changes in the timing of the reporting of losses from the loss date to the notification date and expected costs to settle unpaid claims. This process assumes that past experience, adjusted for the effects of current developments and anticipated trends, is an appropriate basis for predicting future events. On a quarterly basis, our actuaries provide to management a point estimate for each significant line of our direct business to summarize their analysis.

In establishing the appropriate loss reserve balances for any period, management carefully considers these actuarial point estimates, which are the principal bases for establishing our reserve balances, along with a qualitative evaluation of business trends, environmental changes, and numerous other factors. In general, such additional factors may include, but are not limited to, improvement or deterioration of the actuarial indications in the period, the maturity of the accident year, trends observed over the recent past such as changes in the mix of business or the impact of regulatory or litigation developments, the level of volatility within a particular line of business, and the magnitude of the difference between the actuarial indication and the recorded reserves. Specific factors considered by management in determining the reserves at March 31, 2008 and December 31, 2007 included the current extent to which growth and product mix changes in our Commercial Lines segment have affected our ultimate loss trends, the significant growth in our Personal Lines new business in 2006 and related growth in a number of states, the significant improvement in personal lines frequency and severity trends the industry has experienced during 2001 through 2006 in these lines of business which were unanticipated and remain to some extent unexplained, significant growth and product mix changes in our surety bond and inland marine businesses for which we have limited actuarial data to estimate ultimate losses, and the potential for adverse development in the workers compensation line, where losses tend to emerge over long periods of time and rising medical costs, while moderating, continue to be a concern. Management also considered the likelihood of future adverse development related to significant catastrophe losses experienced in 2005. Regarding our indirect business from voluntary and involuntary pools, we are provided loss estimates by managers of each pool. We adopt reserve estimates for the pools that consider this information and other facts. At March 31, 2008 and December 31, 2007, total recorded net reserves were 5.5% and 5.2% greater than actuarially indicated point estimates, respectively. We exercise judgment in estimating all loss reserves based upon our knowledge of the property and casualty business, review of the outcome of actuarial studies, historical experience and other facts to record an estimate which reflects our expected ultimate loss and loss adjustment expenses. We believe that adequate provision has been made for loss reserves. However, establishment of appropriate reserves is an inherently uncertain process and there can be no certainty that current established reserves will prove adequate in light of subsequent actual experience. A significant change to the estimated reserves could have a material impact on our results of operations and financial position. An increase or decrease in reserve estimates would result in a corresponding decrease or increase in financial results. For example, each one percentage point change in the loss and LAE ratio resulting from a change in reserve estimation is currently projected to have an approximate \$24 million impact on property and casualty segment income, based on 2007 full year premiums.

When trends emerge that we believe affect the future settlement of claims, we adjust our reserves accordingly (see Segment Results Property and Casualty, Management's Review of Judgments and Key Assumptions for further explanation of factors affecting our reserve estimates, our review process and our process for determining changes to our reserve estimates). Reserve adjustments are reflected in the Consolidated Statements of Income as adjustments to losses and loss adjustment expenses. Often, we recognize these adjustments in periods subsequent to the period in which the underlying loss event occurred. These types of subsequent adjustments are disclosed and discussed separately as prior year reserve development. Such development can be either favorable or unfavorable to our financial results. As discussed in Segment Results Property and Casualty, Management's Review of Judgments and Key Assumptions, estimated loss and LAE reserves for claims occurring in prior years, excluding those related to Hurricane Katrina, developed favorably by \$55.6 million and \$52.0 million for the quarters ended March 31, 2008 and 2007, respectively, which represents 2.5% and 2.3% of net loss reserves held, respectively. There were no changes to our estimate of Hurricane Katrina net loss and loss adjustment reserves in the first quarter of 2008 and 2007, respectively. See also Analysis of Losses and Loss Adjustment Expenses Reserve Development in Item 1 Business in our Annual Report on Form 10-K for the year ended December 31, 2007 for guidance related to the annual development of our loss and LAE reserves.

Table of Contents

The major causes of material uncertainty relating to ultimate losses and loss adjustment expenses (risk factors) generally vary for each line of business, as well as for each separately analyzed component of the line of business. In some cases, such risk factors are explicit assumptions of the estimation method and in others, they are implicit. For example, a method may explicitly assume that a certain percentage of claims will close each year, but will implicitly assume that the legal interpretation of existing contract language will remain unchanged. Actual results will likely vary from expectations for each of these assumptions, resulting in an ultimate claim liability that is different from that being estimated currently. Some risk factors will affect more than one line of business. Examples include changes in claim department practices, changes in settlement patterns, regulatory and legislative actions, court actions, timeliness of claim reporting, state mix of claimants, and degree of claimant fraud. The extent of the impact of a risk factor will also vary by components within a line of business. Individual risk factors are also subject to interactions with other risk factors within line of business components. Thus, risk factors can have offsetting or compounding effects on required reserves.

We are also defendants in various litigation, including putative class actions, which claim punitive damages or claim a broader scope of policy coverage than our interpretation, all in connection with losses incurred from Hurricane Katrina. The reserves established with respect to Hurricane Katrina assume that we will prevail with respect to these matters (see Contingencies and Regulatory Matters). Although we believe our current Hurricane Katrina reserves are adequate, there can be no assurance that our ultimate costs associated with this event will not substantially exceed these estimates.

Property & Casualty Reinsurance Recoverables

We share a significant amount of insurance risk of the primary underlying contracts with various insurance entities through the use of reinsurance contracts. As a result, when we experience loss events that are subject to the reinsurance contract, reinsurance recoveries are recorded. The amount of the reinsurance recoverable can vary based on the size of the individual loss or the aggregate amount of all losses in a particular line, book of business or an aggregate amount associated with a particular accident year. The valuation of losses recoverable depends on whether the underlying loss is a reported loss, or an incurred but not reported loss. For reported losses, we value reinsurance recoverables at the time the underlying loss is recognized, in accordance with contract terms. For incurred but not reported losses, we estimate the amount of reinsurance recoverable based on the terms of the reinsurance contracts and historical reinsurance recovery information and apply that information to the gross loss reserve estimates. The most significant assumption we use is the average size of the individual losses for those claims that have occurred but have not yet been recorded by us. The reinsurance recoverable is based on what we believe are reasonable estimates and is disclosed separately on the financial statements. However, the ultimate amount of the reinsurance recoverable is not known until all losses are settled.

Pension Benefit Obligations

Prior to 2005, we provided pension retirement benefits to substantially all of our employees based on a defined benefit cash balance formula. In addition to the cash balance allocation, certain transition group employees, who had met specified age and service requirements as of December 31, 1994, were eligible for a grandfathered benefit based primarily on the employees' years of service and compensation during their highest five consecutive plan years of employment. As of January 1, 2005, the defined benefit pension plans were frozen.

We account for our pension plans in accordance with Statement of Financial Accounting Standards No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans - an amendment of FASB Statements 87, 88, 106, and 132(R)* and Statement of Financial Accounting Standards No. 87, *Employers' Accounting for Pensions* (Statement No. 87). In order to measure the liabilities and expense associated with these plans, we must make various estimates and key assumptions, including discount rates used to value liabilities, assumed rates of return on plan assets, employee turnover rates and anticipated mortality rates. These estimates and assumptions are reviewed at least annually and are based on our historical experience, as well as current facts and circumstances. In addition, we use outside actuaries to assist in measuring the expenses and liabilities associated with this plan.

The discount rate enables us to state expected future cash flows as a present value on the measurement date. We also use this discount rate in the determination of our pre-tax pension expense or benefit. A lower discount rate increases the present value of benefit obligations and increases pension expense. We determined our discount rate utilizing the Citigroup Pension Discount Curve as of December 31, 2007. At December 31, 2007, based upon our qualified plan assets in relation to this discount curve, we increased our discount rate to 6.38%, from 5.88% at December 31, 2006.

To determine the expected long-term return on plan assets, we consider the historical mean returns by asset class for passive indexed strategies, as well as current and expected asset allocations and adjust for certain factors that we believe will have an impact on future returns. For the years ended December 31, 2007 and 2006, the expected rate of return on plan assets was 8.0% and 8.25%, respectively. Increases in actual returns on plan assets will generally reduce our net actuarial losses that are reflected in our accumulated other comprehensive income balance in shareholders' equity.

Table of Contents

We expect our pre-tax pension expense to decrease by approximately \$7.1 million in 2008 from an expense of \$5.4 million in 2007, excluding a \$6.0 million correction related to historical participant census data, to a benefit of \$1.7 million in 2008. This decrease in expense is primarily due to the aforementioned increase in the discount rate.

Holding all other assumptions constant, sensitivity to changes in our key assumptions are as follows:

Discount Rate A 25 basis point increase in discount rate would decrease our pension expense in 2008 by \$0.3 million and decrease our projected benefit obligation by approximately \$13 million. A 25 basis point reduction in the discount rate would increase our pension expense by \$2.1 million and increase our projected benefit obligation by approximately \$14 million.

Expected Return on Plan Assets A 25 basis point increase or decrease in the expected return on plan assets would decrease or increase our pension expense in 2008 by \$1.1 million.

Statutory Capital of Insurance Subsidiaries

The NAIC prescribes an annual calculation regarding risk based capital (RBC). RBC ratios for regulatory purposes, as described in the glossary, are expressed as a percentage of the capital required to be above the Authorized Control Level (the Regulatory Scale); however, in the insurance industry RBC ratios are widely expressed as a percentage of the Company Action Level. Set forth below are Total Adjusted Capital, the Company Action Level, the Authorized Control Level and RBC ratios for FAFLIC and Hanover Insurance, as of March 31, 2008, expressed both on the Industry Scale (Total Adjusted Capital divided by the Company Action Level) and Regulatory Scale (Total Adjusted Capital divided by Authorized Control Level):

(In millions, except ratios)	Total Adjusted Capital	Company Action Level	Authorized Control Level	RBC Ratio Industry Scale	RBC Ratio Regulatory Scale
Hanover Insurance (1)	\$ 1,742.4	\$ 503.5	\$ 251.8	346%	692%
FAFLIC	174.0	35.7	17.9	487%	972%

(1) Hanover Insurance's Total Adjusted Capital includes \$755.3 million related to its subsidiary, Citizens.

The total adjusted statutory capital position of Hanover Insurance improved \$76.0 million during the first quarter of 2008, primarily due to results generated by our property and casualty business. The total adjusted statutory capital position of FAFLIC declined during 2008, from \$188.9 million at December 31, 2007 to \$174.0 million at March 31, 2008.

Rating Agency Actions

Insurance companies are rated by rating agencies to provide both industry participants and insurance consumers information on specific insurance companies. Higher ratings generally indicate the rating agencies' opinion regarding financial stability and a stronger ability to pay claims.

We believe that strong ratings are important factors in marketing our products to our agents and customers, since rating information is broadly disseminated and generally used throughout the industry. Insurance company financial strength ratings are assigned to an insurer based upon factors deemed by the rating agencies to be relevant to policyholders and are not directed toward protection of investors. Such ratings are neither a rating of securities nor a recommendation to buy, hold or sell any security.

In January of 2008, Moody's upgraded the financial strength rating of our property and casualty subsidiaries to A3 (good) from Baa1 (adequate). Additionally, Moody's upgraded our debt ratings for senior debt to Baa3 (adequate) from Ba1 (questionable), upgraded our capital securities to Ba1 (questionable) from Ba2 (questionable) and upgraded our short-term debt to Prime-3 (acceptable) from NP (not prime).

Liquidity and Capital Resources

Net cash used by operating activities was \$81.3 million during the first quarter of 2008, as compared to \$40.6 million in 2007. The \$48.7 million increase in cash used for operating activities primarily resulted from increased loss and loss adjustment expense payments.

Edgar Filing: HANOVER INSURANCE GROUP, INC. - Form 10-Q

Net cash provided by investing activities was \$67.1 million during the first quarter of 2008, compared to cash used of \$31.0 million for the same period of 2007. During 2008, cash was provided by net sales of fixed maturity securities primarily to fund operational cash flow requirements of our property and casualty business, as well as the stock repurchase program. In 2007, we had net purchases of fixed maturity securities primarily from the improved underwriting results in our property and casualty business.

Table of Contents

Net cash used in financing activities was \$9.6 million during the first quarter of 2008, compared to \$82.6 million for the same period of 2007. During 2008, cash used in financing activities primarily resulted from \$32.9 million of share repurchases, a net repayment of \$16.5 million related to our securities lending program, partially offset by \$37.2 million of proceeds from short-term borrowings in our premium financing business, the sale of which is expected to close in the second quarter of 2008. In 2007, cash used by financing activities primarily resulted from a net repayment of \$88.9 million related to our securities lending program.

At March 31, 2008, THG, as a holding company, held \$282.3 million of fixed maturities and cash. We believe our holding company assets are sufficient to meet our obligations through the remainder of 2008, which currently consist primarily of interest on the senior debentures and junior subordinated debentures, and certain intercompany tax liabilities of approximately \$40 million that are expected to become due in 2008. We also expect that the holding company will be required to make payments in 2008 related to indemnification of liabilities associated with the sale of various subsidiaries. However, we currently do not expect that it will be necessary to dividend funds from our insurance subsidiaries in order to fund 2008 holding company obligations.

We expect to continue to generate sufficient positive operating cash to meet all short-term and long-term cash requirements, including the funding of our qualified defined benefit pension plan. Based on current law, we are required to contribute an estimated \$22.1 million in 2008, of which \$9.7 million has been paid through April 2008. We may be required to make significant cash contributions to our qualified defined benefit pension plan in future years. Effective January 1, 2008, Hanover Insurance assumed FAFLIC's responsibilities as the common employer of all employees of the holding company and its subsidiaries and as such, the funding of these plans is now the legal responsibility of Hanover Insurance.

Our insurance subsidiaries maintain a high degree of liquidity within their respective investment portfolios in fixed maturity and short-term investments.

On October 16, 2007, our Board of Directors authorized a share repurchase program of up to \$100 million. Under this repurchase authorization, we may repurchase our common stock from time to time, in amounts and prices and at such times as we deem appropriate, subject to market conditions and other considerations. We are not required to purchase any specific number of shares or to make purchases by any certain date under this program. As of May 1, 2008, we had repurchased approximately 920,000 shares for a cost of approximately \$39.5 million. From time to time we may also repurchase senior debt or capital securities on an opportunistic basis.

In June 2007, we entered into a \$150.0 million committed syndicated credit agreement which expires in June 2010. Borrowings, if any, under this agreement are unsecured and incur interest at a rate per annum equal to, at our option, a designated base rate or the Eurodollar rate plus applicable margin. The agreement provides covenants, including, but not limited to, maintaining a certain level of equity and an RBC ratio in our primary property and casualty companies of at least 175% (based on the Industry Scale). We had no borrowings under this line of credit during 2008. Additionally, we had no commercial paper borrowings as of March 31, 2008 and we do not anticipate utilizing commercial paper in 2008. Our premium financing business had short-term borrowings of \$37.2 million through a credit facility as a result of its pending sale and a change in accounting treatment associated with that transaction.

Off-Balance Sheet Arrangements

We currently do not have any material off-balance sheet arrangements that are reasonably likely to have an effect on our financial position, revenues, expenses, results of operations, liquidity, capital expenditures, or capital resources.

Contingencies and Regulatory Matters

LITIGATION AND CERTAIN REGULATORY MATTERS

Durand Litigation

On March 12, 2007, a putative class action suit captioned Jennifer A. Durand v. The Hanover Insurance Group, Inc., The Allmerica Financial Cash Balance Pension Plan was filed in the United States District Court for the Western District of Kentucky. The named plaintiff, a former employee who received a lump sum distribution from our Cash Balance Plan at or about the time of her termination, claims that she and others similarly situated did not receive the appropriate lump sum distribution because in computing the lump sum, we understated the accrued benefit in the calculation. We filed a motion to dismiss on the basis that the plaintiff failed to exhaust administrative remedies, which motion was granted without prejudice in a decision dated November 7, 2007. On December 3, 2007, plaintiff filed a Notice of Appeal of this dismissal to the United States Court of Appeals for the Sixth Circuit. In our judgment, the outcome is not expected to be material to our financial position, although it could have a material effect on the results of operations for a particular quarter or annual period.

Table of Contents

Emerald Litigation

On July 24, 2002, an action captioned American National Bank and Trust Company of Chicago, as Trustee f/b/o Emerald Investments Limited Partnership, and Emerald Investments Limited Partnership v. Allmerica Financial Life Insurance and Annuity Company (Emerald) was commenced in the United States District Court for the Northern District of Illinois, Eastern Division. Although AFLIAC was sold to Goldman Sachs on December 30, 2005, we have agreed to indemnify AFLIAC and Goldman Sachs with respect to this litigation.

In 1999, plaintiffs purchased two variable annuity contracts with initial premiums aggregating \$5 million. Plaintiffs, who AFLIAC subsequently identified as engaging in frequent transfers of significant sums between sub-accounts that in our opinion constituted market timing, were subject to restrictions upon such trading that AFLIAC imposed in December 2001. Plaintiffs allege that such restrictions constituted a breach of the terms of the annuity contracts. In December 2003, the court granted partial summary judgment to the plaintiffs, holding that at least certain restrictions imposed on their trading activities violated the terms of the annuity contracts.

On May 19, 2004, plaintiffs filed a Brief Statement of Damages in which, without quantifying their damage claim, they outlined a claim for (i) amounts totaling \$150,000 for surrender charges imposed on the partial surrender by plaintiffs of the annuity contracts, (ii) loss of trading profits they expected over the remaining term of each annuity contract, and (iii) lost trading profits resulting from AFLIAC's alleged refusal to process five specific transfers in 2002 because of trading restrictions imposed on market timers. With respect to the lost profits, plaintiffs claim that pursuant to their trading strategy of transferring money from money market accounts to international equity accounts and back again to money market accounts, they have been able to consistently obtain relatively risk free returns of between 35% and 40% annually. Plaintiffs claim that they would have been able to continue to maintain such returns on the account values of their annuity contracts over the remaining terms of the annuity contracts (which are based in part on the lives of the named annuitants). The aggregate account value of plaintiffs' annuities was approximately \$12.8 million in December 2001. On February 1, 2006, the Court issued a ruling which precluded plaintiffs from claiming any damages accruing beyond July 31, 2004.

A jury trial on plaintiffs' damage claim was held in December 2006, which resulted in an aggregate award to plaintiffs of \$1.3 million for lost profits and reimbursement of surrender charges. Plaintiffs' motion for a new trial was subsequently denied. On March 5, 2007, plaintiffs filed a Notice of Appeal to the United States Court of Appeals, Seventh Circuit, which, in a decision rendered on February 20, 2008, reversed the lower court with respect to damages and ordered the district court to enter a judgment that the plaintiffs are entitled to no damages other than the return of the \$150,000 surrender charge. On March 5, 2008, plaintiffs filed a Petition for Rehearing with the Seventh Circuit, which was denied on March 13, 2008, which decision is final and conclusive.

Hurricane Katrina Litigation

We have been named as a defendant in various litigations, including putative class actions, relating to disputes arising from damages which occurred as a result of Hurricane Katrina in 2005. As of March 31, 2008, there were approximately 270 such cases, at least two of which were styled as class actions. These cases have been filed in both Louisiana state courts and federal district courts. These cases involve, among other claims, disputes as to the amount of reimbursable claims in particular cases, as well as the scope of insurance coverage under homeowners and commercial property policies due to flooding, civil authority actions, loss of landscaping, business interruption and other matters. Certain of these cases claim a breach of duty of good faith or violations of Louisiana insurance claims handling laws or regulations and involve claims for punitive or exemplary damages. Certain of the cases claim that under Louisiana's so-called Valued Policy Law, the insurers must pay the total insured value of a home which is totally destroyed if any portion of such damage was caused by a covered peril, even if the principal cause of the loss was an excluded peril. Other cases challenge the scope or enforceability of the water damage exclusion in the policies. On April 8, 2008, the Louisiana Supreme Court issued a decision in the case of Sher v. Lafayette Insurance Company, et al, No. 2007-C-2441, holding that flood exclusions such as those used in our policies are unambiguous and enforceable.

Plaintiffs in several consolidated cases (including Sampia v. Massachusetts Bay Insurance Company, E.D. La. Civil Action Number 06-0559) appealed an Order of the Federal District Court dated August 6, 2006 rejecting plaintiffs' contention that the Louisiana Valued Policy Law has the effect of requiring coverage for a total loss proximately caused by a non-covered peril so long as there was any covered loss. This consolidated appeal was heard by the United States Court of Appeals, Fifth Circuit, in a case captioned Chauvin, et al., v. State Farm Fire & Casualty Co., No. 06-30946. On August 6, 2007, the Fifth Circuit Court issued an opinion upholding the District Court decision dismissing plaintiffs' claims. Plaintiffs thereafter filed a petition for a writ of certiorari with the United States Supreme Court, which was denied on January 14, 2008. Currently pending before the Louisiana Supreme Court is the case of Landry v. Louisiana Citizens Property Insurance Corporation, No. 2007-C-1907, in which plaintiffs have asserted a construction of the Valued Policy Law similar to that rejected by the Fifth Circuit in Chauvin, Landry was argued on February 26, 2008; the Court subsequently requested additional briefing from the parties to be filed no later than April 18, 2008.

Table of Contents

On August 23, 2007, the State of Louisiana (individually and on behalf of the State of Louisiana, Division of Administration, Office of Community Development) filed a putative class action in the Civil District Court for the Parish of Orleans, State of Louisiana, entitled State of Louisiana, individually and on behalf of State of Louisiana, Division of Administration, Office of Community Development ex rel The Honorable Charles C. Foti, Jr., The Attorney General For the State of Louisiana, individually and as a class action on behalf of all recipients of funds as well as all eligible and/or future recipients of funds through The Road Home Program v. AAA Insurance, et al., No. 07-8970. The complaint named as defendants over 200 foreign and domestic insurance carriers, including us. Plaintiff seeks to represent a class of current and former Louisiana citizens who have applied for and received or will receive funds through Louisiana's Road Home program. On August 29, 2007, Plaintiff filed an Amended Petition in this case, asserting myriad claims, including claims under Louisiana's Valued Policy Law, as well as claims for breach of: contract, the implied covenant of good faith and fair dealing, fiduciary duty and Louisiana's bad faith statutes. Plaintiff seeks relief in the form of, among other things, declarations that (a) the efficient proximate cause of losses suffered by putative class members was windstorm, a covered peril under their policies; (b) the second efficient proximate cause of their losses was storm surge, which Plaintiff contends is not excluded under class members' policies; (c) the damage caused by water entering affected parishes of Louisiana does not fall within the definition of "flood"; (d) the damages caused by water entering Orleans Parish and the surrounding area was a result of man-made occurrence and are properly covered under class members' policies; (e) many class members suffered total losses to their residences; and (f) many class members are entitled to recover the full value for their residences stated on their policies pursuant to the Louisiana Valued Policy Law. In accordance with these requested declarations, Plaintiff seeks to recover amounts that it alleges should have been paid to policyholders under their insurance agreements, as well as penalties, attorneys' fees, and costs. The case has been removed to the Federal District Court for the Eastern District of Louisiana.

A final, non-appealable order that under the Louisiana Valued Policy Law our flood exclusion is inapplicable where any portion of a loss is attributable to a covered peril, could have a material adverse effect on our financial position, and would likely have such effect on our results of operations. We have established our loss and LAE reserves on the assumption that the application of the Valued Policy Law will not result in our having to pay damages for perils not otherwise covered and that we will not have any liability under the Road Home or similar litigation.

Other Matters

We have been named a defendant in various other legal proceedings arising in the normal course of business, including two other suits which, like the Emerald case described above, challenge our imposition of certain restrictions on trading funds invested in separate accounts. In addition, we are involved, from time to time, in investigations and proceedings by governmental and self-regulatory agencies. The potential outcome of any such action, or regulatory proceedings or other legal proceedings in which we have been named a defendant, and our ultimate liability, if any, from such action or legal proceedings, is difficult to predict at this time. In our opinion, based on the advice of legal counsel, the ultimate resolutions of such proceedings will not have a material effect on our financial position, although they could have a material effect on the results of operations for a particular quarter or annual period.

OTHER REGULATORY MATTERS

During 2007, the Massachusetts Commissioner of Insurance issued two decisions pertaining to personal automobile insurance. The first decision calls for the end of the "fix-and-establish" system of setting automobile rates and replaces it with a system of "managed competition". The second decision orders the implementation of an Assigned Risk Plan beginning with new business as of April 1, 2008.

The Commissioner of Insurance has issued a regulation providing the framework for the transition from a market in which the rates are set by the Commissioner to one in which companies propose their own rates. Our rate filing was approved by the Massachusetts Division of Insurance on January 18, 2008 and implemented effective April 1, 2008. Over the course of the year, we currently anticipate overall rate level decreases of approximately 8%.

The Assigned Risk Plan will distribute the Massachusetts residual automobile market based on individual policyholder assignments rather than assigning carriers Exclusive Representative Producers. We believe the Assigned Risk Plan will provide for a more equitable distribution of residual market risks across all carriers in the market, and therefore, such plan, is not likely to adversely affect our results of operations or financial position.

Over the past year, other state-sponsored insurers, reinsurers or involuntary pools have increased significantly, particularly those states which have Atlantic or Gulf Coast exposures. As a result, the potential assessment exposure of insurers doing business in such states and the attendant collection risks have increased, particularly, in our case, in the states of Massachusetts, Louisiana and Florida. Such actions and related regulatory restrictions may limit our ability to reduce our potential exposure to hurricane related losses. It is possible that other states may take action similar to those taken in the state of Florida. At this time we are unable to predict the likelihood or impact of any such potential assessments or other actions.

Table of Contents

Risks and Forward-Looking Statements

Information regarding risk factors and forward-looking information appears in Part II Item 1A of this Quarterly Report on Form 10-Q and in Part I Item 1A of our Annual Report on Form 10-K for the fiscal year ended December 31, 2007. This Management's Discussion and Analysis should be read and interpreted in light of such factors.

Glossary of Selected Insurance Terms

Annuity contracts An annuity contract is an arrangement whereby an annuitant is guaranteed to receive a series of stipulated amounts commencing either immediately or at some future date. Annuity contracts can be issued to individuals or to groups.

Benefit payments Payments made to an insured or their beneficiary in accordance with the terms of an insurance policy.

Casualty insurance Insurance that is primarily concerned with the losses caused by injuries to third persons and their property (other than the policyholder) and the related legal liability of the insured for such losses.

Catastrophe A severe loss, resulting from natural and manmade events, including risks such as hurricane, fire, earthquake, windstorm, tornado, hailstorm, severe winter weather, explosion, terrorism and other similar events.

Catastrophe loss Loss and directly identified loss adjustment expenses from catastrophes. The Insurance Services Office (ISO) Property Claim Services (PCS) defines a catastrophe loss as an event that causes \$25 million or more in industry insured property losses and affects a significant number of property and casualty policyholders and insurers.

Cede; cedent; ceding company When a party reinsures its liability with another, it cedes business and is referred to as the cedent or ceding company.

Closed Block Consists of certain individual life insurance participating policies, individual deferred annuity contracts and supplementary contracts not involving life contingencies which were in force as of FAFLIC's demutualization in 1995. The purpose of this block of business is to protect the policy dividend expectations of such FAFLIC dividend paying policies and contracts. The Closed Block will be in effect until none of the Closed Block policies are in force, unless an earlier date is agreed to by the Massachusetts Commissioner of Insurance.

Combined ratio, GAAP This ratio is the GAAP equivalent of the statutory ratio that is widely used as a benchmark for determining an insurer's underwriting performance. A ratio below 100% generally indicates profitable underwriting prior to the consideration of investment income. A combined ratio over 100% generally indicates unprofitable underwriting prior to the consideration of investment income. The combined ratio is the sum of the loss ratio, the loss adjustment expense ratio and the underwriting expense ratio.

Current year accident results A measure of the estimated earnings impact of current premiums offset by estimated loss experience and expenses for the current accident year. This measure includes the estimated increase in revenue associated with higher prices (premiums), including those caused by price inflation and changes in exposure, partially offset by higher volume driven expenses and inflation of loss costs. Volume driven expenses include policy acquisition costs such as commissions paid to property and casualty agents which are typically based on a percentage of premium dollars.

Dividends received deduction A corporation is entitled to a special tax deduction from gross income for dividends received from a domestic corporation that is subject to income tax.

Earned premium The portion of a premium that is recognized as income, or earned, based on the expired portion of the policy period, that is, the period for which loss coverage has actually been provided. For example, after six months, \$50 of a \$100 annual premium is considered earned premium. The remaining \$50 of annual premium is unearned premium. Net earned premium is earned premium net of reinsurance.

Excess of loss reinsurance Reinsurance that indemnifies the insured against all or a specific portion of losses under reinsured policies in excess of a specified dollar amount or retention.

Expense Ratio, GAAP The ratio of underwriting expenses to premiums earned for a given period.

Exposure A measure of the rating units or premium basis of a risk; for example, an exposure of a number of automobiles.

Frequency The number of claims occurring during a given coverage period.

Table of Contents

Inland Marine Insurance In Commercial Lines, this is a type of coverage developed for shipments that do not involve ocean transport. It covers articles in transit by all forms of land and air transportation as well as bridges, tunnels and other means of transportation and communication. In the context of Personal Lines, this term relates to floater policies that cover expensive personal items such as fine art and jewelry.

Loss adjustment expenses (LAE) Expenses incurred in the adjusting, recording, and settlement of claims. These expenses include both internal company expenses and outside services. Examples of LAE include claims adjustment services, adjuster salaries and fringe benefits, legal fees and court costs, investigation fees and claims processing fees.

Loss adjustment expense (LAE) ratio, GAAP The ratio of loss adjustment expenses to earned premiums for a given period.

Loss costs An amount of money paid for a property and casualty claim.

Loss ratio, GAAP The ratio of losses to premiums earned for a given period.

Loss reserves Liabilities established by insurers to reflect the estimated cost of claims payments and the related expenses that the insurer will ultimately be required to pay in respect of insurance it has written. Reserves are established for losses and for LAE.

Multivariate product An insurance product, the pricing for which is based upon the magnitude of, and correlation between, multiple rating factors. In practical application, the term refers to the foundational analytics and methods applied to the product construct. Our *Connections Auto* product is a multivariate product.

Peril A cause of loss.

Property insurance Insurance that provides coverage for tangible property in the event of loss, damage or loss of use.

Rate The pricing factor upon which the policyholder's premium is based.

Rate increase (commercial lines) Represents the average change in premium on renewal policies caused by the estimated net effect of base rate changes, discretionary pricing, inflation or changes in policy level exposure.

Rate increase (personal lines) The estimated cumulative premium effect of approved rate actions during the prior policy period applied to a policy's renewal premium.

Reinstatement premium A pro-rata reinsurance premium that may be charged for reinstating the amount of reinsurance coverage reduced as the result of a reinsurance loss payment under a catastrophe cover. For example, in 2005 this premium was required to ensure that our property catastrophe occurrence treaty, which was exhausted by Hurricane Katrina, was available again in the event of another large catastrophe loss in 2005.

Reinsurance An arrangement in which an insurance company, the reinsurer, agrees to indemnify another insurance or reinsurance company, the ceding company, against all or a portion of the insurance or reinsurance risks underwritten by the ceding company under one or more policies. Reinsurance can provide a ceding company with several benefits, including a reduction in net liability on risks and catastrophe protection from large or multiple losses. Reinsurance does not legally discharge the primary insurer from its liability with respect to its obligations to the insured.

Risk based capital (RBC) A method of measuring the minimum amount of capital appropriate for an insurance company to support its overall business operations in consideration of its size and risk profile. The RBC ratio for regulatory purposes is calculated as total adjusted capital divided by required risk based capital. Total adjusted capital for property and casualty companies is capital and surplus. Total adjusted capital for life insurance companies is defined as capital and surplus, plus asset valuation reserve, plus 50% of policyholder dividends apportioned for payment. The Company Action Level is the first level at which regulatory involvement is specified based upon the level of capital. Regulators may take action for reasons other than triggering various RBC action levels. The various action levels are summarized as follows:

The Company Action Level, which equals 200% of the Authorized Control Level, requires a company to prepare and submit a RBC plan to the commissioner of the state of domicile. A RBC plan proposes actions which a company may take in order to bring statutory capital above the Company Action Level. After review, the commissioner will notify the

Edgar Filing: HANOVER INSURANCE GROUP, INC. - Form 10-Q

company if the plan is satisfactory.

The Regulatory Action Level, which equals 150% of the Authorized Control Level, requires the insurer to submit to the commissioner of the state of domicile an RBC plan, or if applicable, a revised RBC plan. After examination or analysis, the commissioner will issue an order specifying corrective actions to be taken.

The Authorized Control Level authorizes the commissioner of the state of domicile to take whatever regulatory actions considered necessary to protect the best interest of the policyholders and creditors of the insurer.

Table of Contents

The Mandatory Control Level, which equals 70% of the Authorized Control Level, authorizes the commissioner of the state of domicile to take actions necessary to place the company under regulatory control (i.e., rehabilitation or liquidation).

Life and health companies whose Total Adjusted Capital is between 200% and 250% of the Authorized Control Level are subject to a trend test. The trend test calculates the greater of the decrease in the margin between the current year and the prior year and the average of the past three years.

Security Lending We engage our banking provider to lend securities from our investment portfolio to third parties. These lent securities are fully collateralized by cash. We monitor the fair value of the securities on a daily basis to assure that the collateral is maintained at a level of at least 102% of the fair value of the loaned securities. We record securities lending collateral as a cash equivalent, with an offsetting liability in expenses and taxes payable.

Separate accounts An investment account that is maintained separately from an insurer's general investment portfolio and that allows the insurer to manage the funds placed in variable life insurance policies and variable annuity policies. Policyholders direct the investment of policy funds among the different types of separate accounts available from the insurer.

Severity A monetary increase in the loss costs associated with the same or similar type of event or coverage.

Specialty Lines A major component of our Other Commercial Lines, includes products such as inland and ocean marine, bond and various small commercial niche products.

Statutory accounting principles Recording transactions and preparing financial statements in accordance with the rules and procedures prescribed or permitted by insurance regulatory authorities including the NAIC, which in general reflect a liquidating, rather than going concern, concept of accounting.

Surrender or withdrawal Surrenders of life insurance policies and annuity contracts for their entire net cash surrender values and withdrawals of a portion of such values.

Underwriting The process of selecting risks for insurance and determining in what amounts and on what terms the insurance company will accept risks.

Underwriting expenses Expenses incurred in connection with the acquisition, pricing and administration of a policy.

Underwriting expense ratio, GAAP The ratio of underwriting expenses to earned premiums in a given period.

Unearned premiums The portion of a premium representing the unexpired amount of the contract term as of a certain date.

Variable annuity An annuity which includes a provision for benefit payments to vary according to the investment experience of the separate account in which the amounts paid to provide for this annuity are allocated.

Written premium The premium assessed for the entire coverage period of a property and casualty policy without regard to how much of the premium has been earned. See also earned premium. Net written premium is written premium net of reinsurance.

Table of Contents

ITEM 3

QUANTITATIVE AND QUALITATIVE DISCLOSURES

ABOUT MARKET RISK

Our market risks, and the ways we manage them, are summarized in Management's Discussion and Analysis of Financial Condition and Results of Operations as of December 31, 2007, included in our Annual Report on Form 10-K for the year ended December 31, 2007. There have been no material changes in the first three months of 2008 to these risks or our management of them.

ITEM 4

CONTROLS AND PROCEDURES

Disclosure Controls and Procedures Evaluation

Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of our disclosure controls and procedures, as such term is defined under Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended (the Exchange Act).

Limitations on the Effectiveness of Controls

Our management, including our Chief Executive Officer and Chief Financial Officer, does not expect that our disclosure controls over financial reporting will prevent all error and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. Controls can also be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of controls is based in part on certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with policies or procedures. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

Conclusion Regarding the Effectiveness of Disclosure Controls and Procedures

Based on our controls evaluation, our Chief Executive Officer and Chief Financial Officer concluded that as of the end of the period covered by this quarterly report, our disclosure controls and procedures were effective to provide reasonable assurance that (i) the information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and (ii) material information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f). Our management, including the Chief Executive Officer and the Chief Financial Officer, conducted an evaluation of the internal control over financial reporting, as required by Rule 13a-15(d) of the Exchange Act, to determine whether any changes occurred during the period covered by this quarterly report on Form 10-Q that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer noted that during the fourth quarter of 2007 the Claims department piloted a new HCS claims system and commenced the transition of all new claims within our personal and commercial automobile lines of business to the newly developed system. This transition to HCS was completed during the first quarter of 2008 and; therefore, became a significant system to our business. There were no other changes that occurred during our fiscal quarter ended March 31, 2008 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II OTHER INFORMATION

ITEM 1 LEGAL PROCEEDINGS

Durand Litigation

On March 12, 2007, a putative class action suit captioned Jennifer A. Durand v. The Hanover Insurance Group, Inc., The Allmerica Financial Cash Balance Pension Plan was filed in the United States District Court for the Western District of Kentucky. The named plaintiff, a former employee who received a lump sum distribution from our Cash Balance Plan at or about the time of her termination, claims that she and others similarly situated did not receive the appropriate lump sum distribution because in computing the lump sum, we understated the accrued benefit in the calculation. We filed a motion to dismiss on the basis that the plaintiff failed to exhaust administrative remedies, which motion was granted without prejudice in a decision dated November 7, 2007. On December 3, 2007, plaintiff filed a Notice of Appeal of this dismissal to the United States Court of Appeals for the Sixth Circuit. In our judgment, the outcome is not expected to be material to our financial position, although it could have a material effect on the results of operations for a particular quarter or annual period.

Emerald Litigation

On July 24, 2002, an action captioned American National Bank and Trust Company of Chicago, as Trustee f/b/o Emerald Investments Limited Partnership, and Emerald Investments Limited Partnership v. Allmerica Financial Life Insurance and Annuity Company (Emerald) was commenced in the United States District Court for the Northern District of Illinois, Eastern Division. Although AFLIAC was sold to Goldman Sachs on December 30, 2005, we have agreed to indemnify AFLIAC and Goldman Sachs with respect to this litigation.

In 1999, plaintiffs purchased two variable annuity contracts with initial premiums aggregating \$5 million. Plaintiffs, who AFLIAC subsequently identified as engaging in frequent transfers of significant sums between sub-accounts that in our opinion constituted market timing, were subject to restrictions upon such trading that AFLIAC imposed in December 2001. Plaintiffs allege that such restrictions constituted a breach of the terms of the annuity contracts. In December 2003, the court granted partial summary judgment to the plaintiffs, holding that at least certain restrictions imposed on their trading activities violated the terms of the annuity contracts.

On May 19, 2004, plaintiffs filed a Brief Statement of Damages in which, without quantifying their damage claim, they outlined a claim for (i) amounts totaling \$150,000 for surrender charges imposed on the partial surrender by plaintiffs of the annuity contracts, (ii) loss of trading profits they expected over the remaining term of each annuity contract, and (iii) lost trading profits resulting from AFLIAC's alleged refusal to process five specific transfers in 2002 because of trading restrictions imposed on market timers. With respect to the lost profits, plaintiffs claim that pursuant to their trading strategy of transferring money from money market accounts to international equity accounts and back again to money market accounts, they have been able to consistently obtain relatively risk free returns of between 35% and 40% annually. Plaintiffs claim that they would have been able to continue to maintain such returns on the account values of their annuity contracts over the remaining terms of the annuity contracts (which are based in part on the lives of the named annuitants). The aggregate account value of plaintiffs' annuities was approximately \$12.8 million in December 2001. On February 1, 2006, the Court issued a ruling which precluded plaintiffs from claiming any damages accruing beyond July 31, 2004.

A jury trial on plaintiffs' damage claim was held in December 2006, which resulted in an aggregate award to plaintiffs of \$1.3 million for lost profits and reimbursement of surrender charges. Plaintiffs' motion for a new trial was subsequently denied. On March 5, 2007, plaintiffs filed a Notice of Appeal to the United States Court of Appeals, Seventh Circuit which, in a decision rendered on February 20, 2008, reversed the lower court with respect to damages and ordered the district court to enter a judgment that the plaintiffs are entitled to no damages other than the return of the \$150,000 surrender charge. On March 5, 2008, plaintiffs filed a Petition for Rehearing with the Seventh Circuit, which was denied on March 13, 2008, which decision is final and conclusive.

Hurricane Katrina Litigation

We have been named as a defendant in various litigations, including putative class actions, relating to disputes arising from damages which occurred as a result of Hurricane Katrina in 2005. As of March 31, 2008, there were approximately 270 such cases, at least two of which were styled as class actions. These cases have been filed in both Louisiana state courts and federal district courts. These cases involve, among other claims, disputes as to the amount of reimbursable claims in particular cases, as well as the scope of insurance coverage under homeowners and commercial property policies due to flooding, civil authority actions, loss of landscaping, business interruption and other matters. Certain of these cases claim a breach of duty of good faith or violations of Louisiana insurance claims handling laws or regulations and involve claims for punitive or exemplary damages. Certain of the cases claim that under Louisiana's so-called Valued Policy Law, the insurers must pay the total insured value of a home which is totally destroyed if any portion of such damage was caused by a covered peril, even if the principal cause of

the loss was an excluded peril. Other cases challenge the scope or enforceability of the water damage exclusion in the policies. On

Table of Contents

April 8, 2008, the Louisiana Supreme Court issued a decision in the case of Sher v. Lafayette Insurance Company, et al, No. 2007-C-2441, holding that flood exclusions such as those used in our policies are unambiguous and enforceable.

Plaintiffs in several consolidated cases (including Sampia v. Massachusetts Bay Insurance Company, E.D. La. Civil Action Number 06-0559) appealed an Order of the Federal District Court dated August 6, 2006 rejecting plaintiffs' contention that the Louisiana Valued Policy Law has the effect of requiring coverage for a total loss proximately caused by a non-covered peril so long as there was any covered loss. This consolidated appeal was heard by the United States Court of Appeals, Fifth Circuit, in a case captioned Chauvin, et al., v. State Farm Fire & Casualty Co., No. 06-30946. On August 6, 2007, the Fifth Circuit Court issued an opinion upholding the District Court decision dismissing plaintiffs' claims. Plaintiffs thereafter filed a petition for *writ of certiorari* with the United States Supreme Court, which was denied on January 14, 2008. Currently pending before the Louisiana Supreme Court is the case of Landry v. Louisiana Citizens Property Insurance Corporation, No. 2007-C-1907, in which plaintiffs have asserted a construction of the Valued Policy Law similar to that rejected by the Fifth Circuit in Chauvin. Landry was argued on February 26, 2008; the Court subsequently requested additional briefing from the parties to be filed no later than April 18, 2008.

On August 23, 2007, the State of Louisiana (individually and on behalf of the State of Louisiana, Division of Administration, Office of Community Development) filed a putative class action in the Civil District Court for the Parish of Orleans, State of Louisiana, entitled State of Louisiana, individually and on behalf of State of Louisiana, Division of Administration, Office of Community Development ex rel The Honorable Charles C. Foti, Jr., The Attorney General For the State of Louisiana, individually and as a class action on behalf of all recipients of funds as well as all eligible and/or future recipients of funds through The Road Home Program v. AAA Insurance, et al., No. 07-8970. The complaint named as defendants over 200 foreign and domestic insurance carriers, including THG. Plaintiff seeks to represent a class of current and former Louisiana citizens who have applied for and received or will receive funds through Louisiana's Road Home program. On August 29, 2007, Plaintiff filed an Amended Petition in this case, asserting myriad claims, including claims under Louisiana's Valued Policy Law, as well as claims for breach of: contract, the implied covenant of good faith and fair dealing, fiduciary duty and Louisiana's bad faith statutes. Plaintiff seeks relief in the form of, among other things, declarations that (a) the efficient proximate cause of losses suffered by putative class members was windstorm, a covered peril under their policies; (b) the second efficient proximate cause of their losses was storm surge, which Plaintiff contends is not excluded under class members' policies; (c) the damage caused by water entering affected parishes of Louisiana does not fall within the definition of "flood"; (d) the damages caused by water entering Orleans Parish and the surrounding area was a result of man-made occurrence and are properly covered under class members' policies; (e) many class members suffered total losses to their residences; and (f) many class members are entitled to recover the full value for their residences stated on their policies pursuant to the Louisiana Valued Policy Law. In accordance with these requested declarations, Plaintiff seeks to recover amounts that it alleges should have been paid to policyholders under their insurance agreements, as well as penalties, attorneys' fees, and costs. The case has been removed to Federal District Court for the Eastern District of Louisiana.

A final, non-appealable order that under the Louisiana Valued Policy Law our flood exclusion is inapplicable where any portion of a loss is attributable to a covered peril, could have a material adverse effect on our financial position, and would likely have such effect on our results of operations. We have established our loss and loss adjustment reserves on the assumption that the application of the Valued Policy Law will not result in our having to pay damages for perils not otherwise covered and that we will not have any liability under the Road Home or similar litigation.

ITEM 1A RISK FACTORS

Risks and Forward-Looking Statements

We wish to caution readers that the following important factors, among others, in some cases have affected and in the future could affect our actual results and could cause our actual results for the remainder of 2008 and beyond to differ materially from historical results and from those expressed in any of our forward-looking statements. When used in our Management's Discussion and Analysis, the words "believes", "anticipates", "expects", "projections", "outlook", "should", "could", "plan", "guidance" and similar expressions are intended to identify forward-looking statements. Important Factors Regarding Forward-Looking Statements filed as Exhibit 99.2 to our Annual Report on Form 10-K for the period ended December 31, 2007. While any of these factors could affect our business as a whole, we have grouped certain factors by the business segment to which we believe they are most likely to apply.

Risk factors which have changed from those previously disclosed in our Annual Report on Form 10-K have been marked in bold. The risks identified below reflect additional risks, or provide additional examples of risks, described in Important Factors Regarding Forward-Looking Statements filed as Exhibit 99.2 to our Annual Report on Form 10-K for the period ended December 31, 2008. In order to better understand the risks we face, the following description and updates should be read in conjunction with the disclosure in such Exhibit 99.2.

Table of Contents**Risks Relating To Our Property And Casualty Insurance Business**

We generate most of our total revenues and earnings through our property and casualty insurance subsidiaries. The results of companies in the property and casualty insurance industry historically have been subject to significant fluctuations and uncertainties. Our profitability could be affected significantly by (i) adverse loss development or loss adjustment expense for events we (including our recently acquired subsidiaries) have insured in either the current or in prior years, including risks indirectly insured through various mandatory market mechanisms or through discontinued pools which are included in the Other Property and Casualty segment (our retained Life Companies business also includes discontinued pools which present similar risks) or the expected decline in the amount of favorable development which has been realized in recent periods, which could be material, particularly in light of the significance of favorable development as a contributor to Property and Casualty segment income; (ii) an inability to retain profitable policies in force and attract profitable policies in our Personal Lines and Commercial Lines segments, whether as the result of an increasingly competitive product pricing environment, the adoption by competitors of strategies to increase agency appointments and commissions, as well as marketing and advertising expenditures or otherwise; (iii) heightened competition, including the recent intensification of price competition and increased marketing efforts by our competitors, the entry of new competitors and the introduction of new products by new and existing competitors, or as the result of consolidation within the financial services industry and the entry of additional financial institutions into the insurance industry; (iv) failure to obtain new customers, retain existing customers or reductions of policies in force by existing customers, whether as a result of recent competition or otherwise; (v) increases in costs, particularly those occurring after the time our products are priced and including construction, automobile, and medical and rehabilitation costs, and including as the result of cost shifting from health insurers to casualty and liability insurers (whether as a result of an increasing number of injured parties without health insurance or coverage changes in health policies to make such coverage, in certain circumstances, secondary to other policies); (vi) restrictions on insurance underwriting; (vii) adverse state and federal legislation or regulation, including mandated decreases in rates, the inability to obtain further rate increases, limitations on premium levels, increases in minimum capital and reserve requirements, benefit mandates, limitations on the ability to manage care and utilization, requirements to write certain classes of business, recently enacted changes to the fix-and-establish rate setting mechanism for personal automobile rates in Massachusetts, limitations on the use of credit scoring, such as proposals to ban the use of credit scores with respect to personal lines in Michigan and Florida or arising out of the recent report on credit scores issued by the U.S Fair Trade Commission, restrictions on the use of certain compensation arrangements with agents and brokers, as well as continued compliance with state and federal regulations; (viii) adverse changes in the ratings obtained from independent rating agencies, such as Moody's, Standard and Poor's and A.M. Best, whether due to additional capital requirements or our underwriting performance or other factors; (ix) industry-wide change resulting from investigations and inquiries relating to compensation arrangements with insurance brokers and agents; (x) disruptions caused by the introduction of new Personal Lines products, such as our multivariate auto and our new homeowners products, and related technology changes and new Personal and Commercial Lines operating models or in connection with the integration of newly acquired businesses; (xi) disruptions caused by the implementation of a new claims system for both the personal and commercial automobile lines; and (xii) the impact of our acquisition of Professionals Direct, Inc. and Verlan Holdings, Inc. or other future acquisitions. Additionally, our profitability could be affected by adverse catastrophe experience, severe weather or other unanticipated significant losses. Further, certain new catastrophe models assume an increased frequency and severity of certain weather events, and financial strength rating agencies are placing increased emphasis on capital and reinsurance adequacy for insurers with certain geographic concentrations of risk. This factor, along with the increased cost of reinsurance, may result in insurers seeking to diversify their geographic exposure which could result in increased regulatory restrictions in those markets where insurers seek to exit or reduce coverage, as well as an increase in competitive pressures in non-coastal markets such as the Midwest. We have significant concentration of exposures in certain areas, including portions of the Northeast and Southeast and derive a material amount of profits from operations in the Midwest.

Specifically, underwriting results and segment income could be adversely affected by further changes in our net loss and LAE estimates related to hurricanes Katrina and Rita. The risks and uncertainties in our business that may affect such estimates and future performance, including the difficulties in arriving at such estimates, should be considered. Estimating losses following any major catastrophe is an inherently uncertain process, which is made more difficult by the unprecedented nature of this event. Factors that add to the complexity in this event include the legal and regulatory uncertainty (including certain legal questions now pending before the Louisiana Supreme Court related to the interpretation of the Louisiana Valued Policy Law), the complexity of factors contributing to the losses, delays in claim reporting, the exacerbating circumstances of Hurricane Rita and a slower pace of recovery resulting from the extent of damage sustained in the affected areas due in part to the availability and cost of resources to effect repairs. As a result, there can be no assurance that our ultimate costs associated with this event will not be substantially different from current estimates. In addition, there can be no assurance that, in light of the devastation in the areas affected by Hurricane Katrina, our ability to obtain and retain policyholders will not be adversely affected. Hurricane Katrina has also contributed to uncertainty regarding the reinsurance marketplace, which also experienced significant losses related to this catastrophe.

Additionally, future operating results as compared to prior years and forward-looking information regarding Personal Lines and Commercial Lines segment information on written and earned premiums, policies in force, underwriting results and segment income currently are expected to be adversely affected by competitive and regulatory pressures affecting rates, particularly in

Table of Contents

Massachusetts, where the introduction of managed competition in the personal automobile line is expected to result in rate decreases. In addition, underwriting results and segment income could be adversely affected by changes in frequency and loss trends. Results in Personal Lines business may also be adversely affected by pricing decreases and market disruptions (including any caused by the current economic environment in Michigan, proposals in Michigan to reduce rates, expand coverage, or expand circumstances in which parties can recover non-economic damages for bodily injury claims (i.e., efforts to modify or overturn the so-called Kreiner decision), the Michigan Commissioner of Insurance's proposed ban, and a bill passed by the Michigan House of Delegates to ban, the use of credit scores, or the Governor's executive order creating a new position of the Automobile and Home Insurance Consumer Advocate, who is to act independent from the Michigan Commissioner of Insurance), by unfavorable loss trends that may result in New Jersey due to that state's supreme court ruling relating to the no-fault tort threshold, and by disruptions caused by judicial and potential legislative and executive branch intervention related to rules proposed by the Massachusetts Commissioner of Insurance to reform the distribution of losses from the Massachusetts personal automobile residual market and introduce managed competition to the personal automobile market. The introduction of managed competition is expected to result in an overall rate level reduction of approximately 8%. Additionally, there is uncertainty regarding our ability to attract and retain customers in this market as new and larger carriers enter the state as a result of managed competition.

Also, our Personal Lines business production and earnings may be unfavorably affected by the introduction of our multivariate auto product should we experience adverse selection because of our pricing, operational difficulties or implementation impediments with independent agents, including with respect to its introduction in Massachusetts, or the inability to grow or sustain growth in new markets after the introduction of new products or the appointment of new agents. In addition, there are increased underwriting risks associated with premium growth and the introduction of new products or programs in both our Personal and Commercial Lines businesses, as well as the appointment of new agencies and the expansion into new geographical areas, and we have experienced increased loss ratios with respect to our new personal automobile business, which is written through our *Connections Auto* product, particularly in certain states where we have less experience and data.

Additionally, during the past few years we have made, and our current plans are to continue to make, significant investments in our Personal Lines and Commercial Lines businesses to, among other things, strengthen our product offerings and service capabilities, improve technology and our operating models, build expertise in our personnel, and expand our distribution capabilities, with the ultimate goal of achieving significant and sustained profitable growth and obtaining favorable returns on these investments. In order for these investment strategies to be profitable, we must achieve both profitable premium growth and the successful implementation of our operating models so that our expenses do not increase proportionately with growth. The ability to grow profitably throughout the property and casualty cycle is crucial to our current strategy. There can be no assurance that we will be successful in profitably growing our business, or that we will not alter our current strategy due to changes in our markets or an inability to successfully maintain acceptable margins on new business or for other reasons, in which case written and earned premium, property and casualty segment income and net book value could be adversely affected.

Recent significant increases and expected further increases in the number of participants or insureds in state-sponsored reinsurance pools or FAIR Plans, particularly in the states of Massachusetts, Louisiana and Florida, combined with regulatory restrictions on the ability to adequately price, underwrite, or non-renew business, could expose us to significant exposures and assessment risks.

Risks Relating To Our Life Companies

Our businesses may be affected by (i) adverse actions related to legal and regulatory actions described under Contingencies and Regulatory Matters, including those which are subject to the FIN 45 reserve described under Life Companies Discontinued Operations; (ii) adverse loss and expense development related to our discontinued assumed accident and health reinsurance pool business or failures of our reinsurers to timely pay their obligations (especially in light of the fact that historically these pools sometimes involved multiple layers of overlapping reinsurers, or so called spirals); (iii) possible claims relating to sales practices for insurance and investment products or our historical administration of such products, including with respect to activities of our former agents; (iv) adverse trends in mortality and morbidity; (v) lower appreciation or decline in value of our managed investments or the investment markets in general; (vi) issues relating to the administration of the Closed Block, including the implementation of dividend scales; and (vii) an adverse ruling by the Internal Revenue Service eliminating some or all of the separate accounts dividends received deduction tax benefits that we have received.

In particular, we have provided forward-looking information relating to the sale of our variable life insurance and annuity business and its effect on our results of operations and financial position. There are certain factors that could cause actual results to differ materially from those anticipated herein. These include (i) the impact of contingent liabilities, including litigation and regulatory matters, assumed or retained by THG in connection with the transaction and the impact of other indemnification obligations owed from THG to Goldman Sachs (including with respect to existing and potential litigation); and (ii) future statutory operating results of FAFLIC, which will affect its projected statutory adjusted capital and ability to obtain future regulatory approval for dividends.

Table of Contents

Risks Relating To Our Business Generally

Other market fluctuations and general economic, market and political conditions also may negatively affect our business and profitability. These conditions include (i) changes in interest rates causing a reduction of investment income or in the market value of interest rate sensitive investments; (ii) higher service, administrative or general expense due to the need for additional advertising, marketing, administrative or management information systems expenditures; (iii) the inability to attract, or the loss or retirement of key executives or other key employees, and increased costs associated with the replacement of key executives or employees; (iv) changes in our liquidity due to changes in asset and liability matching, including the effect of defaults of debt securities; (v) failure of a reinsurer of our policies to pay its liabilities under reinsurance or coinsurance contracts or adverse effects on the cost and availability of reinsurance; (vi) changes in the mix of assets comprising our investment portfolios and changes in general market conditions that may cause the market value of our investment portfolio to fluctuate, including the expansion of current concerns regarding sub-prime mortgages to prime mortgage and corresponding mortgage-backed or other debt securities and concerns relative to the ratings and capitalization of municipal bond and mortgage guarantees and the valuation of commercial mortgages and commercial mortgage backed securities; (vii) losses resulting from our participation in certain reinsurance pools, including pools in which we no longer participate but may have unquantified potential liabilities relating to asbestos and other matters, or from fronting arrangements where the reinsurer does not meet all of its reinsurance obligations; (viii) defaults or impairments of debt securities held by us; (ix) higher employee benefit costs due to changes in market values of plan assets, interest rates, regulatory requirements or judicial interpretations of benefits (including with respect to our Cash Balance Plan which is the subject of the Durand litigation); (x) the effects of our restructuring actions, including any resulting from our review of operational matters related to our business, including a review of our markets, products, organization, financial capabilities, agency management, regulatory environment, ancillary businesses and service processes; (xi) errors or omissions in connection with the administration of any of our products; (xii) breaches of our information technology security systems or other operational disruptions or breaches which result in the loss or compromise of confidential financial, personal, medical or other information about our policyholders, agents or others with whom we do business; and (xiii) interruptions in our ability to conduct business as a result of terrorist actions, catastrophes or other significant events affecting infrastructure, and delays in recovery of our operating capabilities.

In addition, except where required or permitted by applicable accounting principles, components of our Consolidated Balance Sheets are not marked to market or otherwise intended to reflect our estimates of the fair market or disposition value of such assets or liabilities or the related businesses. The recorded value of certain assets, such as deferred acquisition costs, deferred federal income taxes, real estate, and goodwill, and certain liabilities, such as reserves, reflect the application of our assumptions to generally accepted accounting principles. Accordingly, in the event of a disposition of all or a portion of any such assets, liabilities or related businesses, the value obtainable in such a transaction may differ materially from the value reflected in our consolidated financial statements, which would in turn have a material impact on Shareholders' Equity and book value per share. Management is currently evaluating strategic options for the Life Companies, including the possible disposition of all or a portion of such business. There can be no assurance that we will be successful in any such efforts. In the event of such a disposition, it is management's expectation that the realizable value would be lower than the value reflected in Shareholders' Equity in our Consolidated Balance Sheets. Additionally, such transactions may also result in the reallocation of corporate overhead costs to other segments.

Table of Contents**ITEM 2 UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS***Issuer Purchases of Equity Securities*

On October 16, 2007, the Board of Directors authorized the repurchase of up to \$100 million of our common stock. Under this repurchase authorization, we may repurchase our common stock from time to time, in amounts and prices and at such times as we deem appropriate, subject to market conditions and other considerations. We are not required to purchase any specific number of shares or to make purchases by any certain date under this program.

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares That May Yet be Purchased Under the Plans or Programs
January 1 - 31, 2008	197,120	\$ 43.18	197,120	\$ 89,800,000
February 1 - 29, 2008 ⁽¹⁾	333,736	43.92	234,048	79,600,000
March 1 - 31, 2008 ⁽²⁾	336,204	42.21	333,594	65,500,000
Total	867,060	\$ 43.09	764,762	\$ 65,500,000

- (1) Includes 99,688 shares withheld to satisfy tax withholding amounts due from employees upon their receipt of previously restricted or deferred shares.
- (2) Includes 2,610 shares withheld to satisfy tax withholding amounts due from employees upon their receipt of previously restricted or deferred shares.

ITEM 6 EXHIBITS

- EX - 10.1 The Hanover Insurance Group Retirement Savings Plan.
- EX - 10.2 The Hanover Insurance Group Amended and Restated Non-Qualified Retirement Savings Plan.
- EX - 31.1 Certification of the Chief Executive Officer, pursuant to 15 U.S.C. 78m, 78o(d), as adopted pursuant to section 302 of the Sarbanes-Oxley Act of 2002.
- EX - 31.2 Certification of the Chief Financial Officer, pursuant to 15 U.S.C. 78m, 78o(d), as adopted pursuant to section 302 of the Sarbanes-Oxley Act of 2002.
- EX - 32.1 Certification of the Chief Executive Officer, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to section 906 of the Sarbanes-Oxley Act of 2002.
- EX - 32.2 Certification of the Chief Financial Officer, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to section 906 of the Sarbanes-Oxley Act of 2002.
