AMERICAN SOFTWARE, INC. AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements Unaudited

July 31, 2008

A. Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Rule 10-1 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required for complete financial statements. In the opinion of our management, these condensed consolidated financial statements contain all normal recurring adjustments considered necessary for a fair presentation of the financial position at July 31, 2008, the results of operations for the three months ended July 31, 2008 and 2007 and cash flows for the three months ended July 31, 2008 and 2007. The results for the three months ended July 31, 2008 are not necessarily indicative of the results expected for the full year. You should read these statements in conjunction with our audited consolidated financial statements and management's discussion and analysis and results of operations included in our annual report on Form 10-K for the year ended April 30, 2008.

The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosures of contingent assets and liabilities, at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Note 1 in the Notes to the Consolidated Financial Statements for the fiscal year ended April 30, 2008, describes the significant accounting policies that we have used in preparing our financial statements. On an ongoing basis, we evaluate our estimates, including, but not limited to those related to revenue/vendor specific object evidence (VSOE), bad debts, capitalized software costs, goodwill, intangible assets, stock based compensation, income taxes and contingencies. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Our actual results could differ materially from these estimates under different assumptions or conditions.

B. Principles of Consolidation

The consolidated financial statements include the accounts of American Software, Inc., and its wholly and majority-owned subsidiaries. All significant intercompany balances and transactions have been eliminated in consolidation.

C. Revenue Recognition

We recognize revenue in accordance with Statement of Position No. 97-2: *Software Revenue Recognition*, (SOP 97-2) and Statement of Position No. 98-9: *Modification of SOP 97-2, Software Revenue Recognition With Respect to Certain Transactions* (SOP 98-9).

License. We recognize license revenue in connection with license agreements for standard proprietary software upon delivery of the software, provided we consider collection to be probable, the fee is fixed or determinable, there is evidence of an arrangement, and VSOE exists with respect to any undelivered elements of the arrangement. For multiple-element arrangements, we recognize revenue under the residual method as permitted by SOP 98-9, whereby (1) the total fair value of the undelivered elements, as indicated by VSOE, is deferred and subsequently recognized in accordance with SOP 97-2 and (2) the difference between the total arrangement fee and the amount deferred for the undelivered elements is recognized as revenue related to the delivered elements. We record revenues from sales of third-party products in accordance with Emerging Issues Task Force Issue 99-19, *Reporting Revenue Gross as a Principal versus Net as an Agent* (EITF 99-19). Furthermore, in accordance with EITF 99-19, we evaluate sales through our indirect channel on a case-by-case basis to determine whether the transaction should be recorded gross or net, including but not limited to assessing whether or not we: 1) act as principal in the transaction, 2) take title to the products, 3) have risks and rewards of ownership, such as the risk of loss for collection, delivery, or returns, and 4) act as an agent or broker with compensation on a commission or fee basis. Accordingly, in most cases we record our sales through the Demand Management, Inc (DMI) channel on a gross basis.

Maintenance. Revenue derived from maintenance contracts primarily includes telephone consulting, product updates, and releases of new versions of products previously purchased by the customer, as well as error reporting and correction services. Maintenance contracts are

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-Q

typically sold for a separate fee with initial contractual periods ranging from one to three years with renewal for additional periods thereafter. Maintenance fees are generally billed annually in advance. We recognize maintenance revenue ratably over the term of the maintenance agreement. In situations where we bundle all or a portion of the maintenance fee with the license fee, VSOE for maintenance is determined based on prices when sold separately.

Table of Contents

Services. Revenue derived from services primarily includes consulting, implementation, and training. We primarily bill fees under time and materials arrangements and recognize them as services are performed. In accordance with the FASB's Emerging Issues Task Force Issue No. 01-14: *Income Statement Characterization of Reimbursements Received for*

Out-of-Pocket Expenses Incurred (EITF No. 01-14), we recognize amounts received for reimbursement of travel and other out-of-pocket expenses incurred as revenue in the condensed consolidated statements of operations under services and other. These amounts totaled approximately \$377,000 and \$488,000 for the three months ended July 31, 2008 and 2007, respectively.

Indirect Channel Revenue. We recognized revenues for sales made through indirect channels principally when the distributor makes the sale to an end-user, when the license fee is fixed or determinable, the license fee is nonrefundable, and the sale meets all other conditions of SOP 97-2 and SOP 98-9.

Deferred Revenue. Deferred revenue represents advance payments or billings for software licenses, services, and maintenance billed in advance of the time revenue is recognized.

Sales Taxes. We account for sales taxes on a net basis in accordance with EITF No. 06-3, *How Sales Taxes Collected from Customers and Remitted to Governmental Authorities Should be Presented in the Income Statement (That Is, Gross Versus Net Presentation)*.

D. Reclassification

Certain prior year amounts have been reclassified for presentation purposes.

E. Major Customer

One customer, The Home Depot, accounted for approximately 10% of our total revenues for the three months ended July 31, 2008, principally from our IT consulting segment (see footnote M). The related accounts receivable balance for this customer as of July 31, 2008 was approximately \$1,284,000. No single customer accounted for more than 10% of our total revenues for the three months ended July 31, 2007.

F. Declaration of Dividend Payable

On May 20, 2008, our Board of Directors declared a quarterly cash dividend of \$0.09 per share of American Software Class A and Class B common stock. The cash dividend is payable on September 25, 2008 to Class A and Class B shareholders of record at the close of business on August 22, 2008.

G. Earnings Per Common Share

We have two classes of common stock of which Class B common shares are convertible into Class A common shares at any time, on a one-for-one basis. Under the Company's Articles of Incorporation, if dividends are declared, holders of Class A common shares shall receive a \$.05 dividend per share prior to the Class B common stock receiving any dividend and holders of Class A common stock shall receive a dividend at least equal to Class B common stock dividends on a per share basis. As a result, we have computed the earnings per share in compliance with Statement of Financial Accounting Standards (SFAS) No. 128, *Earnings per Share*, which requires companies that have multiple classes of equity securities to use the two-class method in computing earnings per share.

For our basic earnings per share calculation, we use the two-class method. Basic earnings per share are calculated by dividing net earnings attributable to each class of common stock by the weighted average number of shares outstanding. All undistributed earnings are allocated evenly between Class A and B common stock in the earnings per share calculation to the extent that earnings equal or exceed \$.05 per share. This allocation is based on management's judgment after considering the dividend rights of the two-classes of common stock, the control of the Class B shareholders and the convertibility rights of the Class B shares to Class A shares.

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-Q

Diluted earnings per share is calculated similar to basic earnings per share, except that the calculation includes the dilutive effect of the assumed exercise of options issuable under the Company's stock incentive plans. For our diluted earnings per share calculation for Class A shares, we use the if-converted method. This calculation assumes that all Class B common shares are converted into Class A common shares and, as a result, assumes there are no holders of Class B common shares to participate in undistributed earnings.

Table of Contents

For our diluted earnings per share calculation for Class B shares, we use the two-class method. This calculation does not assume that all Class B common shares are converted into Class A common shares. In addition, this method assumes the dilutive effect of Class A stock options were converted to Class A shares and the undistributed earnings are allocated evenly to both Class A and B shares including Class shares issued pursuant to those converted stock options. This allocation is based on management's judgment after considering the dividend rights of the two classes of common stock, the control of the Class B shareholders and the convertibility rights of the Class B shares into Class A shares.

The following tables set forth the computation of basic earnings per common share and diluted earnings per common share (in thousands except for per share amounts):

Basic earnings per common share:

	Three Months Ended July 31, 2008		Three Months Ended July 31, 2007

Diluted EPS for Class B	\$ 228	3,081	\$ 0.08

* Reallocation of undistributed shares is anti-dilutive

** Amounts adjusted for rounding

For the three months ended July 31, 2008 and July 31, 2007, we excluded options to purchase 1,344,057 and 80,000 Class A Common Shares, respectively, from the computation of diluted earnings per Class A Common Shares. We excluded these option share amounts because the exercise prices of those options were greater than the average market price of the Class A Common Shares during the applicable period. As of July 31, 2008, we had a total of 3,102,323 options outstanding and as of July 31, 2007, we had a total of 2,414,203 options outstanding.

H. Acquisitions***Logility Share Repurchase***

During June 2008, Logility, Inc., our approximately 88% owned subsidiary, purchased 39,620 shares of its common stock for \$297,000. In accordance with SFAS No. 141, Business Combinations, we have accounted for this transaction under the purchase method of accounting. The total amount allocated from this transaction was \$297,000, this amount is net of approximately \$36,000 related to the tax effects of this treasury stock purchase. We have allocated the \$297,000 to capitalized software development costs, totaling approximately \$10,000, intangible assets, totaling approximately \$86,000, minority interest, totaling \$144,000 and goodwill, totaling approximately \$93,000 (including \$36,000 related to tax effects), based on management's estimates of fair value at the date of the transaction. The costs allocated to capitalized software development costs and intangible assets are being amortized ratably based on the projected revenues associated with the related assets of Logility, Inc. or on

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-Q

an accelerated method over three to six years, whichever method results in a higher level of amortization. Amortization of these capitalized costs is included in the cost of license revenues and general and administrative costs in the accompanying consolidated statements of operations for capitalized software development costs and intangible assets, respectively.

During the three months ended July 31, 2008, we made revisions to the purchase price adjustments related to previously recorded Logility stock buybacks. Approximately \$544,000 was reallocated to additional paid in capital through minority interest by recording a debit to the related deferred tax liability of approximately \$127,000, and credits to capitalized software development costs, intangible assets and goodwill of approximately \$35,000, \$300,000, and \$336,000, respectively. The adjustment resulted in a reversal of amortization expense in the amount of \$20,000, which is recorded as a component of general and administrative expense in the accompanying condensed consolidated statements of operations for the three months ended July 31, 2008.

Table of Contents
I. Stock-Based Compensation

During the three months ended July 31, 2008 and 2007, we granted options for 265,000 and 15,000 shares of common stock, respectively. During the three months ended July 31, 2008 and 2007, we recorded stock option compensation cost of \$216,000 and \$182,000 and related income tax benefits of \$43,000 and \$40,000, respectively. We record stock-based compensation expense on a straight-line basis over the vesting period directly to additional paid-in capital.

SFAS 123(R) requires that cash flows resulting from the tax benefits generated by tax deductions in excess of the compensation cost recognized for those options (excess tax benefits) to be classified as financing cash flows. During the three months ended July 31, 2008 and 2007, we realized excess tax benefits of approximately \$60,000 and \$1,160,000, respectively.

During the three months ended July 31, 2008 and 2007, we issued 74,172 and 683,259 shares of common stock, respectively, resulting from the exercise of stock options. During the three months ended July 31, 2008 and 2007, our subsidiary issued 64,000 and 63,776 shares of common stock, respectively, resulting from the exercise of stock options. The total intrinsic value of options exercised during the three months ended July 31, 2008 and 2007 based on market value at the exercise dates was approximately \$221,000 and \$4,600,000, respectively. The total intrinsic value of options exercised at our subsidiary during the three months ended July 31, 2008 and 2007 based on market value at the exercised dates was approximately \$232,000 and \$500,000, respectively. As of July 31, 2008, unrecognized compensation cost related to unvested stock option awards approximated \$2.3 million and is expected to be recognized over a weighted average period of 2.0 years. As of July 31, 2008, unrecognized compensation cost related to unvested stock option awards at our subsidiary approximated \$1.2 million, we expect to recognize over a weighted average period of 2.0 years.

J. Fair Value of Financial Instrument

Effective May 1, 2008, we adopted SFAS No. 157, Fair Value Measurements, which requires disclosures about our assets and liabilities that are measured at fair value. SFAS No. 157 clarifies that fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset or liability. We have not applied the provisions of SFAS No. 157 to non-financial assets, such as our property and equipment, goodwill, capitalized software and certain other assets, which are measured at fair value for impairment assessment. We will apply the provisions of SFAS No. 157 to these assets and liabilities, beginning May 1, 2009, in accordance with FASB Staff Position

No. 157-2, Effective Date of FASB Statement No. 157 .

SFAS No. 157 establishes a fair value hierarchy disclosure framework that prioritizes and ranks the level of market price observability used in measuring assets and liabilities at fair value. Market price observability is impacted by a number of factors, including the type of asset or liability and their characteristics. This hierarchy prioritizes the inputs into three broad levels as follows:

Level 1 Quoted prices in active markets for identical instruments.

Level 2 Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets.

Level 3 Valuations derived from valuation techniques in which one or more significant inputs or significant value drivers are unobservable.

The following is a general description of the valuation methodologies used for financial assets and liabilities measured at fair value, including the general classification of such assets and liabilities pursuant to the valuation hierarchy.

Cash Equivalents Cash equivalents include investments in government obligations money-market fund, in other money market instruments and in interest-bearing deposits with initial or remaining terms of three months or less. The fair value of cash equivalents approximates its carrying value due to the short-term nature of these instruments.

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-Q

Marketable Securities Marketable securities utilizing Level 1 inputs include active exchange-traded equity securities and equity index funds, and most U.S. Government debt securities, as these securities all have quoted prices in active markets. Marketable securities utilizing Level 2 inputs include municipal bonds. These securities are valued using market corroborated pricing or other models that utilize observable inputs such as yield curves.

Table of Contents

The following table presents our assets and liabilities that we measured at fair value on a recurring basis as of July 31, 2008, and indicates the fair value hierarchy of the valuation techniques we utilized to determine such fair value (in thousands):

	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance as of July 31, 2008
Cash equivalents	\$ 37,305			\$ 37,305
Marketable securities	25,557	9,930		\$ 35,487
Total	\$ 62,862	\$ 9,930	\$	\$ 72,792

SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of SFAS 115*, permits but does not require us to measure financial instruments and certain other items at fair value. We did not elect to measure at fair value any of our financial instruments under the provisions of SFAS No. 159, thus our adoption of this statement effective May 1, 2008 did not have an impact on our consolidated financial statements.

K. Stock Repurchases

On August 22, 2002, our Board of Directors approved a resolution authorizing the repurchase of up to 2.0 million shares of our Class A common stock. These repurchases have been and will be made through open market purchases at prevailing market prices. The timing of any repurchase will depend upon market conditions, the market price of our common stock and management's assessment of our liquidity and cash flow needs. In the three months ended July 31, 2008, we repurchased 86,239 shares of common stock at a cost of approximately \$504,000. Under this repurchase plan, through July 31, 2008, we have repurchased 507,135 shares of common stock at a cost of approximately \$2.6 million. Under all repurchase plans as of July 31, 2008, we have repurchased 4,042,088 shares of common stock at a cost of approximately \$22.0 million.

L. Comprehensive Income

We have adopted Statement of Financial Accounting Standards (SFAS) No. 130, *Reporting Comprehensive Income*. SFAS No. 130 establishes standards for reporting and presentation of comprehensive income and its components in a full set of financial statements. We have not included condensed consolidated statements of comprehensive income in the accompanying unaudited condensed consolidated financial statements since comprehensive income and net earnings presented in the accompanying condensed consolidated statements of operations would be substantially the same.

M. Industry Segments

We have adopted SFAS No. 131, *Disclosures About Segments of an Enterprise and Related Information*. We operate and manage our business in three segments based on software and services provided in three key product markets: (i) Enterprise Resource Planning (ERP), which automates customers' internal financing, human resources, and manufacturing functions; (ii) Collaborative Supply Chain Management, which provides collaborative supply chain solutions to streamline and optimize the production, distribution and management of products between trading partners; and (iii) IT Consulting, which consists of IT staffing and consulting services. The Collaborative Supply Chain Management segment represents the business of our 88% owned subsidiary Logility, Inc., including its subsidiary, DMI. In the following table, we have broken down the intersegment transactions applicable to the three months ended July 31, 2008 and 2007:

**Three Months
Ended
July 31,**

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-Q

	2008	2007

N. Contingencies

The Company more often than not indemnifies its customers against damages and costs resulting from claims of patent, copyright or trademark infringement associated with use of the Company's products. The Company has historically not been required to make any payments under such indemnifications. However, the Company continues to monitor the conditions that are subject to the indemnifications to identify whether it is probable that a loss has occurred, and would recognize any such losses under the indemnifications when those losses are estimable. In addition, the Company warrants to customers that the Company's products operate substantially in accordance with the software product's specifications. Historically, no costs have been incurred related to software product warranties and none are expected in the future, and as such no accruals for software product warranty costs have been made. Additionally, the Company is involved in various claims arising in the ordinary course of business. In the opinion of management, the ultimate disposition of these matters will not have a material adverse effect on the financial position or results of operations of the Company.

O. Recently Adopted Accounting Pronouncements

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-Q

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements . This Statement defines fair value, establishes a framework for measuring fair value and requires expanded disclosure about fair value measurements. SFAS No. 157 applies under other accounting pronouncements that require or permit fair value measurements and accordingly, does not require any new fair value measurements. SFAS No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and for interim periods within those years. In February 2008, the FASB issued FASB Staff Position (FSP) No. 157-1, Application of FASB Statement No. 157 to FASB Statement No. 13 and Other Accounting Pronouncements That Address Fair Value Measurements

Table of Contents

for Purposes of Lease Classification or Measurement Under Statement 13 and FSP No. 157-2, Effective Date of FASB Statement No. 157. FSP No. 157-1 amends SFAS No. 157 to exclude SFAS No. 13, Accounting for Leases, and its related interpretive accounting pronouncements that address leasing transactions. FSP No. 157-2 delays the effective date of SFAS No. 157 for all non-financial assets and non-financial liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually) until the beginning of the first quarter of 2010. Our adoption of SFAS No. 157 for financial assets and liabilities on May 1, 2008 did not have a material impact on our consolidated financial statements (see note I). We are currently evaluating the impact SFAS No. 157 will have on our consolidated financial statements once we adopt it for non-financial assets and liabilities recognized or disclosed at fair value on a non-recurring basis.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of FASB Statement No. 115. SFAS No. 159 permits entities to choose to measure many financial instruments and certain other items at fair value that are not currently required to be measured at fair value. SFAS No. 159 does not eliminate disclosure requirements included in other accounting standards, including requirements for disclosures about fair value measurements included in SFAS No. 157, Fair Value Measurements, and FASB Statement No. 107, Disclosures about Fair Value of Financial Instruments. SFAS No. 159 is effective for the entity's fiscal year that begins after November 15, 2007. We did not elect to measure at fair value any of its financial instruments under the provisions of SFAS No. 159, thus the adoption of this statement effective May 1, 2008 did not have an impact on our consolidated financial statements (see note I).

P. Subsequent Event

On August 19, 2008, our Board of Directors declared a quarterly cash dividend of \$0.09 per share of American Software Class A and Class B common stock. The cash dividend is payable on December 2, 2008 to Class A and Class B shareholders of record at the close of business on November 10, 2008.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

FORWARD-LOOKING STATEMENTS

This report on Form 10-Q contains forward-looking statements relating to our future financial performance, business strategy, financing plans and other future events that involve uncertainties and risks. You can identify these statements by forward-looking words such as anticipate, intend, plan, continue, could, grow, may, potential, predict, strive will, seek, estimate, believe, expect, and similar uncertainty of future events or outcomes. Any forward-looking statements we make herein are pursuant to the safe harbor provision of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include statements concerning future:

results of operations;

liquidity, cash flow and capital expenditures;

demand for and pricing of our products and services;

acquisition activities and the effect of completed acquisitions;

industry conditions and market conditions; and

general economic conditions.

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-Q

Although we believe that the goals, plans, expectations, and prospects that our forward-looking statements reflect are reasonable in view of the information currently available to us, those statements are not guarantees of performance. There are many factors that could cause our actual results to differ materially from those anticipated by forward-looking statements made herein. These factors include, but are not limited to, continuing economic uncertainty, the timing and degree of business recovery, unpredictability and the irregular pattern of future revenues, competitive pressures, delays and other risks associated with new product development, the difficulty of predicting the effectiveness and duration of third-party marketing agreements, undetected software errors, and risks associated with market acceptance of our products and services. We discuss certain factors in greater detail in [Business Overview](#) below. The terms [fiscal 2009](#) and [fiscal 2008](#) refer to our fiscal years ending April 30, 2009 and 2008, respectively.

ECONOMIC OVERVIEW

Corporate capital spending trends and commitments are the primary determinants of the size of the market for business software. Corporate capital spending is, in turn, a function of general economic conditions in the U.S. and abroad and in particular may be affected by conditions in U.S. global credit markets. In recent years, the weakness in the overall world economy and the U.S. economy in particular, has resulted in reduced expenditures in the business software market.

Table of Contents

Overall information technology spending continues to be relatively weak as a result of the current global economic environment particularly in the United States. We believe, over the long term, information technology spending should incrementally improve as increased global competition forces companies to improve productivity by upgrading their technology systems. Although this improvement could slow or regress at any time due in part to the recent concerns in the global capital markets and general economic conditions, we believe that our organizational and financial structure will enable us to take advantage of any sustained economic rebound. Customers continue to take long periods to evaluate discretionary software purchases.

BUSINESS OVERVIEW

American Software, Inc. (American Software or the Company) was incorporated as a Georgia corporation in 1970. We develop, market and support a portfolio of software and services that deliver enterprise management and collaborative supply chain solutions to the global marketplace. We have designed our software and services to bring business value to enterprises by supporting their operations over intranets, extranets, client/servers or the Internet. References to the Company, our products, our software, our services and similar references include the appropriate business unit actually providing the product or service.

We provide our software solutions through three major business segments, which are further broken down into a total of four major product and service groups. The three business segments are (1) Enterprise Resource Planning (ERP), (2) Collaborative Supply Chain Management (SCM), and (3) Information Technology (IT) Consulting. The Collaborative Supply Chain Management segment consists of Logility, Inc., an 88% owned subsidiary that provides collaborative supply chain solutions to streamline and optimize the production, distribution and management of products between trading partners. The ERP segment consists of (i) American Software ERP, which provides purchasing and materials management, customer order processing, financial,

e-commerce, Flow Manufacturing and traditional manufacturing solutions, and (ii) New Generation Computing (NGC), which provides industry specific business software to both retailers and manufacturers in the Apparel, Sewn Products and Furniture industries. The IT Consulting segment consists of The Proven Method, an IT staffing and consulting services firm.

On September 30, 2004, Logility acquired certain assets and the distribution channel of privately-held DMI, a St. Louis-based provider of supply chain planning systems marketed under the Demand Solutions® brand. The acquisition provided more than 800 active customers, which brought the Logility customer base to approximately 1,100 companies, located in 70 countries, and gives Logility what we believe to be the largest installed base of supply chain planning customers among application software vendors. Since the acquisition, Logility has continued to market and sell the Demand Solutions product line through Demand Management's existing value-added reseller (VAR) distribution network. Logility also continues to offer the Logility Voyager Solutions suite to its traditional target market of upper-midsize to Fortune 1000 companies with distribution-intensive supply chains.

We derive revenues primarily from three sources: software licenses, services and other, and maintenance. We generally determine software license fees based on the number of modules, servers, users and/or sites licensed. Services and other revenues consist primarily of fees from software implementation, training, consulting and customization services. We primarily bill under time and materials arrangements and recognize revenues as we perform services. We typically enter into maintenance agreements for a one- to three-year term at the time of the initial product license. We generally bill maintenance fees annually in advance and then recognize the resulting revenues ratably over the term of the maintenance agreement. Deferred revenues represent advance payments or billings for software licenses, services and maintenance billed in advance of the time we recognize the related revenues.

Our cost of revenue for licenses includes amortization of capitalized computer software development costs, salaries and benefits, and royalties paid to third-party software vendors as well as agent commission expenses related to license revenues generated by the indirect channel primarily from DMI. Costs for maintenance and services include the cost of personnel to conduct implementations and customer support, consulting, and other personnel-related expenses as well as agent commission expenses related to maintenance revenues generated by the indirect channel primarily from DMI. We account for the development costs of software intended for sale in accordance with SFAS No. 86, *Accounting for Costs of Computer Software to be Sold, Leased, or Otherwise Marketed*. We monitor the net realizable value of our capitalized software on a quarterly basis based on an estimate of future product revenues. We currently expect to fully recover the value of the capitalized software asset recorded on our consolidated balance sheet; however, if future product revenues are less than management's current expectations, we may incur a write-down of capitalized software costs.

Table of Contents

Our selling expenses generally include the salary and commissions paid to our sales professionals, along with marketing, promotional, travel and associated costs. Our general and administrative expenses generally include the salary and benefits paid to executive, corporate and support personnel, as well as facilities related costs, utilities, communications expenses, and various professional fees. DMI sells its products primarily through indirect channels.

We currently view the following factors as the primary opportunities and risks associated with our business:

Dependence on Capital Spending Patterns. There is risk associated with our dependence on, and the risks associated with, the capital spending patterns of U.S. and international businesses, which in turn are functions of economic trends and conditions over which we have no control.

Acquisition Opportunities. There are opportunities for select acquisitions or investments to provide opportunities to expand our sales distribution channels and/or broaden our product offering by providing additional solutions for our target markets.

Acquisition Risks. There are risks associated with acquisitions of complementary companies, products and technologies, including the risks that we will not achieve the financial and strategic goals that we contemplate at the time of the transaction. More specifically, in any acquisition we will face risks and challenges associated with the uncertain value of the acquired business or assets, the difficulty of assimilating operations and personnel, integrating acquired technologies and products and maintaining the loyalty of the customers of the acquired business.

Competitive Technologies. There is a risk that our competitors may develop technologies that are substantially equivalent or superior to our technology.

Competition in General. There are risks inherent in the market for business application software and related services, which has been and continues to be intensely competitive; for example, some of our competitors may become more aggressive with their prices and/or payment terms, which may adversely affect our profit margins.

Sarbanes-Oxley Section 404. Pursuant to Section 404 of the Sarbanes-Oxley Act of 2002, we are required to include our assessment of the effectiveness of our internal control over financial reporting in our annual reports. Our independent registered public accounting firm is also required to attest as to whether or not they believe that we maintained, in all material respects, effective internal control over financial reporting. If for any fiscal year we fail to timely complete this assessment, we could be subject to regulatory sanctions and a possible loss of public confidence in the reliability of our financial reporting. Such a failure, as well as difficulties in implementing required new or improved controls, could result in our inability to provide timely and reliable financial information and could adversely affect our business.

A discussion of a number of additional risk factors associated with our business is included in our Annual Report on Form 10-K for the fiscal year ended April 30, 2008.

Table of Contents**COMPARISON OF RESULTS OF OPERATIONS**

Three-Month Comparisons. The following table sets forth certain revenue and expense items as a percentage of total revenues and the percentage changes in those items for the three months ended July 31, 2008 and 2007:

	Three Months Ended July 31,		Pct. Change in Dollars 2008 vs 2007
	Percentage of Total Revenues 2008	2007	
Revenues:			
License	14%	24%	(46)%
Services and other	49	45	(5)
Maintenance	37	31	5
Total revenues	100	100	(12)
Cost of revenues:			
License	7	8	(24)
Services and other	31	31	(12)
Maintenance	9	8	3
Total cost of revenues	47	47	(11)

Minority interest expense	(1)	(1)	(63)
Net earnings	3	9%	(69)

nm not meaningful

COMPARISON OF RESULTS OF OPERATIONS FOR THE THREE MONTHS ENDED JULY 31, 2008 AND 2007 REVENUES:

For the three months ended July 31, 2008, the decrease in revenues from the three months ended July 31, 2007 was attributable to a decrease in license fees and service and other revenues. This decrease was partially offset by an increase in maintenance revenues. International revenues represented approximately 10% of total revenues in the three months ended July 31, 2008 and 2007, respectively. Our revenues, in particular our international revenues, may fluctuate substantially from period to period primarily because we derive most of our license fee revenues from a relatively small number of customers in a given period.

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-Q

LICENSES. For the three months ended July 31, 2008, license fee revenues decreased 46% to \$2.7 million when compared to the same period in the prior year, due primarily to decreased license fees from our Logility subsidiary as a result of a difficult selling environment during the current economic downturn. In the three months ended July 31, 2008, license fee revenues from Logility

Table of Contents

decreased 57% to \$2.0 million. Logility constituted 73% of total license fee revenues for the three months ended July 31, 2008, compared to 91% for the three months ended July 31, 2007. Our ERP business unit license fees increased by 65% to \$0.7 million for the three months ended July 31, 2008 when compared to the same period in the prior year due to timing of closing sales.

The direct sales channel provided approximately 52% of license fee revenues for the three months ended July 31, 2008, compared to approximately 63% in the comparable quarter a year ago. This decrease was due primarily to lower sales within our direct channel as a result of customers taking a longer time to evaluate larger size deals. For the three months ended July 31, 2008 and July 31, 2007, our margins after commissions on direct sales were approximately 77% and 85%, respectively, and our margins after commissions on indirect sales were approximately 48% and 51%, respectively. These margin calculations include only commission expense for comparative purposes and do not include other costs of license fees such as amortization of capitalized software.

SERVICES AND OTHER. For the three months ended July 31, 2008, the decrease in services and other revenues were due primarily to decreased services revenues from our SCM and IT consulting segments which were partially offset by an increase in sales in the ERP segment. For the three months ended July 31, 2008, our IT Consulting segment's revenues decreased 16% when compared to the prior year quarter, to \$4.4 million from \$5.3 million due to decreased project work. For the three months ended July 31, 2008, our ERP segment's revenues increased 33% when compared to the prior year quarter, to \$3.3 million due to higher implementation services as a result of higher license fees in recent quarters. For the three months ended July 31, 2008, services and other revenues from Logility decreased 22%, to \$1.6 million compared to \$2.0 million for the three months ended July 31, 2007. This decrease was due primarily to fewer implementation projects from lower license fees sales in the previous quarters. We have observed that there is a tendency for services and other revenues, other than IT consulting, to lag changes in license revenues by one to three quarters, as new licenses in one quarter often involve implementation and consulting services in subsequent quarters, for which we recognize revenues only as we perform those services.

MAINTENANCE. For the three months ended July 31, 2008, maintenance revenues increased 5% to \$7.1 million compared to the same period in the prior year. This increase was primarily from Logility, whose maintenance reserves increased 10% to \$5.8 million compared to the same period in the prior year. Logility constituted 82% of total maintenance revenues for the three month period ended July 31, 2008, compared to 77% of total maintenance for the corresponding prior year period. The increases in maintenance revenues for Logility for the three months ended July 31, 2008 were due primarily to increased license fees in prior periods resulting in new maintenance revenue in the current quarter as well as improved customer maintenance retention rates. Typically, our maintenance revenues have had a direct relationship to current and historic license fee revenues, since new licenses are the potential source of new maintenance customers.

GROSS MARGIN:

The following table provides both dollar amounts and percentage measures of gross margin:

(\$000 s omitted)	Three months ended			
	July 31,		2007	
	2008		2007	
Gross margin on license fees:	\$ 1,454	53%	\$ 3,435	67%
Gross margin on services and other:	3,323	36%	2,964	30%
Gross margin on maintenance:	5,311	75%	5,054	74%
Total gross margin:	\$ 10,088	53%	\$ 11,453	53%

For the three months ended July 31, 2008, total gross margin percentage was the same when compared to the same period in the prior year.

LICENSES. For the three months ended July 31, 2008, gross margin on license fees decreased when compared to the same period in the prior year primarily due to lower license fees partially offset by lower capitalized software amortization costs. License fee gross margin percentage tends to be directly related to the level of license fee revenues due to the relatively fixed cost of computer software amortization expense, amortization of acquired software and the sales mix between our direct and indirect channel.

SERVICES AND OTHER. For the three months ended July 31, 2008, percentage increased when compared to the same period in the prior fiscal year due to better billing utilization rates at our ERP and the IT Consulting segment's TPM. Services and other gross margin normally are directly related to the level of services and other revenues. The primary component of cost of services and other revenues is services staffing, which is relatively fixed in the short term.

Table of Contents

MAINTENANCE. Maintenance gross margin percentage was slightly higher for three months ended July 31, 2008 when compared to the same period last year due to the increase in overall maintenance revenue.

EXPENSES**Research and Development**

Gross product research and development (R&D) costs include all non-capitalized and capitalized software development costs. A breakdown of the research and development costs is as follows:

	Three months ended (in thousands)		
	July 31, 2008	Percent Change	July 31, 2007
Total capitalized computer software development costs	\$ 507	(3)%	\$ 525
Percentage of gross product research and development costs	22%		22%
Purchase accounting impact on share repurchases by subsidiary and related tax effect	10	(63)%	27
Percentage of total revenues	0%		0%
Total research and development expense	1,829	(3)%	1,910
Percentage of total revenues	10%		8%
Total research and development expense and capitalized computer software development costs	\$ 2,346	(4)%	\$ 2,435
Percentage of total revenues	12%		11%
Total amortization of capitalized computer software development costs *	\$ 555	(13)%	\$ 638

nm: not meaningful

* Included in cost of license fees

For the three months ended July 31, 2008, gross product research and development costs decreased when compared to the same periods last year and capitalized software development costs decreased when compared to the same periods last year. These changes were primarily due to decreased research and development costs of our SCM segment. We expect capitalized product development costs to be lower in coming quarters as a result of fewer capitalizable R&D projects; however, we expect capitalized software amortization expense to remain relatively consistent when compared to the three months ended July 31, 2008. Costs included in gross product development are salaries of product development personnel, hardware lease expense, computer software expense, telephone expense and rent.

Capitalized computer software development costs include the effects of applying purchase accounting as a result of Logility, Inc.'s share repurchases.

Sales and Marketing

For the three months ended July 31, 2008, the increase in sales and marketing expenses when compared to the same period a year ago was due primarily to the increased cost from higher headcount. This was partially offset by a decrease in direct sales commissions. We generally include commissions on indirect sales in cost of sales.

General and Administrative

For the three months ended July 31, 2008, the decreases in general and administrative expenses were primarily due to lower variable bonus compensation, headcount and audit related expenses when compared to three months ended July 31, 2007.

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-Q

At July 31, 2008, the total number of employees was 296 compared to 328 at July 31, 2007.

Other Income/(Loss)

Other income/(loss) is comprised of interest and dividend income, rental income and realized and unrealized gains and losses from investments. For the three months ended July 31, 2008, the decrease in other income/(loss) was due primarily to higher unrealized losses on investments, decreased interest income from lower yield on our investments and lower rental income when compared to the same period last year.

Table of Contents**Income Taxes**

In the three months ended July 31, 2008, we recorded income tax expense of approximately \$448,000 compared to \$1.3 million recorded in the three month period ended July 31, 2007 due to lower pretax earnings before income taxes. We recognize deferred tax assets and liabilities based on the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their tax bases. We measure deferred tax assets and liabilities using statutory tax rates in effect in the year in which we expect the differences to reverse. We establish a deferred tax asset for the expected future benefit of net operating loss and credit carry-forwards. Under Statement of Financial Accounting Standards No. 109 (SFAS No. 109), Accounting for Income Taxes, we cannot recognize a deferred tax asset for the future benefit of our net operating losses, tax credits and temporary differences unless we can establish that it is more likely than not that the deferred tax asset would be realized. We expect our effective rate to range between 37% and 40% during fiscal year 2009.

Minority Interest

Minority interest is a function of our majority-owned subsidiaries' earnings or losses, with minority interest losses recorded when these subsidiaries have earnings, and minority interest earnings recorded when they have losses. Due to Logility's net earnings in the three months ended July 31, 2008, we recorded minority interest expenses of approximately \$87,000 for the three months ended July 31, 2008 and \$236,000 for the three months ended July 31, 2007.

LIQUIDITY, CAPITAL RESOURCES AND FINANCIAL CONDITION**Sources and Uses of Cash**

We have historically funded, and continue to fund, our operations and capital expenditures primarily with cash generated from operating activities. The changes in net cash that our operating activities provide generally reflect the changes in net earnings and non-cash operating items plus the effect of changes in operating assets and liabilities, such as investment trading securities, trade accounts receivable, trade accounts payable, accrued expenses and deferred revenue. We have no debt obligations or off-balance sheet financing arrangements, and therefore we used no cash for debt service purposes.

The following tables show information about our cash flows and liquidity positions during the three months ended July 31, 2008 and 2007. You should read this table and the discussion that follows in conjunction with our condensed consolidated statements of cash flows contained in Item 1. Financial Statements in Part I of this report and in our Annual Report on Form 10-K for the fiscal year ended April 30, 2008.

	Three Months Ended	
	July 31,	
	(in thousands)	
	2008	2007
Net cash (used in) provided by operating activities	\$ (3,422)	\$ 2,974
Net cash (used in) provided by investing activities	(15,090)	8,282
Net cash (used in) provided by financing activities	(2,507)	1,617
Net change in cash and cash equivalents	\$ (21,019)	\$ 12,873

For the three months ended July 31, 2008, the net decrease in cash provided by operating activities when compared to the same period last year was due primarily to an increase in purchases of trading securities and a decrease in accounts payable and deferred revenues and net income. This was partially offset by an increase in collections of customer accounts receivables. The increase in cash used in investing activities when compared to the cash provided by investing activities in the same period in the prior year was due primarily to the purchases of investments partially offset by proceeds in maturities of investments. Cash used in financing activities increased when compared to the cash provided by financing activities same period in the prior year, due primarily to lower proceeds from exercise of stock options and excess tax benefits from stock based compensation and an increase in repurchase of our common stock and payment of the quarterly dividend in the current quarter.

Table of Contents

The following table shows net changes in total cash, cash equivalents, and investments, which is one measure management uses to view net total cash generated by our activities:

	As of July 31, (in thousands)	
	2008	2007
Cash and cash equivalents	\$ 38,217	\$ 58,500
Short and Long-Term Investments	35,487	17,108
Total cash and short and long-term investments	\$ 73,704	\$ 75,608
Net (decrease) increase in total cash and investments (three months ended July 31)	\$ (2,437)	\$ 2,839

Our total activities used cash and investments during the three months ended July 31, 2008, when compared to the prior year period, due primarily to the changes in operating assets and liabilities noted above and the payment of the quarterly dividend.

Days Sales Outstanding in accounts receivable were 66 days as of July 31, 2008, compared to 71 days as of July 31, 2007. This decrease was due primarily to timing of closing license fees sales and improved collection activity. Our current ratio on July 31, 2008 was 3.7 to 1 and on July 31, 2007 was 3.6 to 1.

As a result of the positive cash flow from operations our business has generated in recent periods, and because we have \$73.7 million in cash and investments with no debt, we believe that our sources of liquidity and capital resources will be sufficient to satisfy our presently anticipated requirements during at least the next twelve months for working capital, capital expenditures and other corporate needs. However, at some future date we may need to seek additional sources of capital to meet our requirements. If such need arises, we may be required to raise additional funds through equity or debt financing. Neither we nor Logility currently have a bank line of credit. We can provide no assurance that bank lines of credit or other financing will be available on terms acceptable to us. If available, such financing may result in dilution to our shareholders or higher interest expense.

The sources of cash flow that we have used for dividend payments include cash we generate through our operations (exclusive of cash that Logility generates), supplemented by our cash and investments (exclusive of Logility's cash and investments).

On December 18, 1997, our Board of Directors approved a resolution authorizing the repurchase up to 1.5 million shares of our Class A common stock. On March 11, 1999, our Board of Directors approved a resolution authorizing us to repurchase an additional 700,000 shares for a total of up to 2.2 million shares of our Class A common stock. On August 19, 2002, our Board of Directors approved a resolution authorizing us to repurchase an additional 2.0 million shares for a total of up to 4.2 million shares of our Class A common stock. These repurchases have been and will be made through open market purchases at prevailing market prices. The timing of any repurchases will depend upon market conditions, the market price of our common stock and management's assessment of our liquidity and cash flow needs. In the first quarter of fiscal 2008, the company purchased 86,239 of its common stock at an average price of \$5.84 per share for a total price of approximately \$504,000. Under these repurchase plans, as of September 9, 2008; we have repurchased approximately 2.7 million shares of common stock at a cost of approximately \$10.0 million.

On December 15, 1997, Logility Board of Directors approved a resolution authorizing Logility to repurchase up to 350,000 shares of our common stock through open market purchases at prevailing market prices. Logility completed this repurchase plan in November 1998, at which time Logility adopted an additional repurchase plan for up to 800,000 shares. In February 2003, Logility's Board of Directors approved a resolution authorizing it to repurchase an additional 400,000 shares for a total authorized repurchase amount of 1,550,000 shares. The timing of any repurchases depends on market conditions, the market price of Logility's common stock and Logility's assessment of its liquidity and cash flow needs. For all repurchase plans, through September 9, 2008, Logility had purchased a cumulative total of 1,480,145 shares at a total cost of \$9.2 million. In the first quarter of fiscal 2008, Logility purchased 39,620 shares of its common stock at an average price of \$7.49 per share for a total price of \$297,000. See Part II, Item 2 for a table summarizing stock repurchases in the last quarter and the number of remaining shares available for purchase under the Company's and Logility's existing repurchase program.

RECENT ACCOUNTING PRONOUNCEMENTS

In December 2007, the FASB issued SFAS No. 141R, Business Combinations, which establishes principles for how an acquirer recognizes and measures in its financial statements the identifiable assets acquired and liabilities assumed in a business combination, recognizes and measures

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-Q

the goodwill acquired in a business combination and determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of a business combination. SFAS No. 141R is effective for fiscal years beginning after December 15, 2008 and is to be applied prospectively. We will adopt SFAS No. 141R effective May 1, 2009 and apply it to any business combinations on or after that date.

Table of Contents

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements*. SFAS No. 160 requires noncontrolling ownership interests (previously referred to as minority interests) to be treated as a separate component of equity, not as a liability or other item outside of permanent equity. In addition, it requires that the amount of consolidated net income attributable to the parent and to the noncontrolling interest to be clearly identified and presented on the face of the statement of operations. SFAS No. 160 is effective for all periods beginning after December 15, 2008. We do not expect our adoption of SFAS No. 160 to have a material impact on our fiscal 2010 consolidated financial statements.

In May 2008, the FASB issued SFAS No. 162, *The Hierarchy of General Accepted Accounting Principles*. This statement documents the hierarchy of the various sources of accounting principles and the framework for selecting the principles used in preparing financial statements. This statement shall be effective 60 days following the Securities and Exchange Commission's approval of the Public Company Accounting Oversight Board amendments to AU Section 411, *The Meaning of Present Fairly in Conformity with Generally Accepted Accounting Principles*. Our adoption of SFAS No. 162 is not expected to have a material impact on our fiscal 2009 consolidated financial statements.

In April 2008, the FASB issued FASB Staff Position No. FAS 142-3, *Determination of the Useful Life of Intangible Assets* (FSP 142-3). FSP 142-3 amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognizable intangible asset under SFAS No. 142, *Goodwill and Other Intangible Assets*. The intent of FSP 142-3 is to improve the consistency between the useful life of a recognizable intangible asset under SFAS No. 142 and the period of expected cash flows used to measure the fair value of the asset under SFAS 141(R), *Business Combinations* and other U.S. generally accepted accounting principles. FSP 142-3 is effective for financial statements issued for fiscal years beginning after December 15, 2008, and interim periods within those fiscal years. We are in the process of evaluating the impact of adopting

FSP 142-3 on our fiscal 2010 consolidated financial statements.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

We have based the following discussion and analysis of financial condition and results of operations on our financial statements, which we have prepared in accordance with U.S. generally accepted accounting principles. The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Note 1 in the Notes to the Consolidated Financial Statements for the fiscal year ended April 30, 2008, describes the significant accounting policies that we have used in preparing our financial statements. On an ongoing basis, we evaluate our estimates, including, but not limited to those related to VSOE, bad debts, capitalized software costs, goodwill, intangible asset impairment, stock-based compensation, income taxes and contingencies. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Our actual results could differ materially from these estimates under different assumptions or conditions.

We believe the critical accounting policies listed below affect significant judgments and estimates used in the preparation of the financial statements.

Revenue Recognition. We recognize revenue in accordance with Statement of Position (SOP) 97-2, *Software Revenue Recognition*, and SOP 98-9, *Software Revenue Recognition with Respect to Certain Transactions*. We recognize license revenues in connection with license agreements for standard proprietary software upon delivery of the software, provided we deem collection to be probable, the fee is fixed or determinable, there is evidence of an arrangement, and vendor specific objective evidence exists with respect to any undelivered elements of the arrangement. We generally bill maintenance fees annually in advance and recognize the resulting revenues ratably over the term of the maintenance agreement. We derive revenues from services which primarily include consulting, implementation, and training. We bill for these services primarily under time and materials arrangements and recognize

Table of Contents

fees as we perform the services. Deferred revenues represent advance payments or billings for software licenses, services, and maintenance billed in advance of the time we recognize revenues. We record revenues from sales of third-party products in accordance with Emerging Issues Task Force Issue 99-19, Reporting Revenue Gross as a Principal versus Net as an Agent (EITF 99-19). Furthermore, in accordance with EITF 99-19, we evaluate sales through our indirect channel on a case-by-case basis to determine whether the transaction should be recorded gross or net, including but not limited to assessing whether or not the Company 1) acts as principal in the transaction, 2) takes title to the products, 3) has risks and rewards of ownership, such as the risk of loss for collection, delivery, or returns, and 4) acts as an agent or broker with compensation on a commission or fee basis. Accordingly, our sales through the DMI channel are typically recorded gross.

Generally, our software products do not require significant modification or customization. Installation of the products is routine and is not essential to the functionality of the product. Our sales frequently include maintenance contracts and professional services with the sale of our software licenses. We have established VSOE for our maintenance contracts and professional services. We determine fair value based upon the prices we charge to customers when we sell these elements separately. We defer maintenance revenues, including those sold with the initial license fee, based on VSOE, and recognize the revenue ratably over the maintenance contract period. We recognize consulting and training service revenues, including those sold with license fees, as we perform the services based on their established VSOE. We determine the amount of revenue we allocate to the licenses sold with services or maintenance using the residual method of accounting. Under the residual method, we allocate the total value of the arrangement first to the undelivered elements based on their VSOE and allocate the remainder to license fees.

Allowance for Doubtful Accounts. We maintain allowances for doubtful accounts for estimated losses resulting from the inability of customers to make required payments. If the financial condition of these customers were to deteriorate, resulting in an impairment of their ability to make payments, we may require additional allowances or we may defer revenue until we determine that collectibility is probable. We specifically analyze accounts receivable and historical bad debts, customer creditworthiness, current economic trends and changes in customer payment terms when we evaluate the adequacy of the allowance for doubtful accounts.

Valuation of Long-Lived and Intangible Assets. In accordance with Statement of Financial Accounting Standards No. 142, Goodwill and Other Intangible Assets (SFAS No. 142), we do not amortize goodwill and other intangible assets with indefinite lives. Our goodwill is subject to annual impairment tests, which require us to estimate the fair value of our business compared to the carrying value. The impairment reviews require an analysis of future projections and assumptions about our operating performance. Should such review indicate the assets are impaired, we would record an expense for the impaired assets.

In accordance with Financial Accounting Standards Board Statement No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets (SFAS No. 144), long-lived assets, such as property and equipment and intangible assets, are reviewed for impairment whenever events or changes in circumstances indicated that the carrying amount of an asset may not be recoverable. Recoverability would be measured by a comparison of the carrying amount of an asset to the estimated undiscounted future cash flows expected to be generated by the asset. If the carrying amount of an asset exceeds its estimated future cash flows, an impairment charge is recognized in the amount by which the carrying amount of the asset exceeds the fair value of the asset. The determination of estimated future cash flows, however, requires management to make estimates. Future events and changes in circumstances may require us to record a significant impairment charge in the period in which such events or changes occur. Impairment testing requires considerable analysis and judgment in determining results. If other assumptions and estimates were used in our evaluations, the results could differ significantly.

Annual tests or other future events could cause us to conclude that impairment indicators exist and that our goodwill is impaired. For example, if we had reason to believe that our recorded goodwill and intangible assets had become impaired due to decreases in the fair market value of the underlying business, we would have to take a charge to income for that portion of goodwill or intangible assets that we believed was impaired. Any resulting impairment loss could have a material adverse impact on our financial position and results of operations. At July 31, 2008, our goodwill balance was \$12.4 million and our intangible assets with definite lives balance was \$1.3 million, net of accumulated amortization.

Valuation of Capitalized Software Assets. We capitalize certain computer software development costs in accordance with SFAS No. 86, Accounting for the Costs of Computer Software to Be Sold, Leased, or Otherwise Marketed. Costs incurred internally to create a computer software product or to develop an enhancement to an existing product are charged to expense when incurred as research and development expense until technological feasibility for the respective product is established. Thereafter, we capitalize all software development costs and report those costs at the lower of unamortized cost or net realizable value. Capitalization ceases when the product or enhancement is available for general release to customers. We make ongoing evaluations of the recoverability of our capitalized software projects by comparing the amount capitalized for each product to the estimated net realizable value of the

Table of Contents

product. If such evaluations indicate that the unamortized software development costs exceed the net realizable value, we write off the amount by which the unamortized software development costs exceed net realizable value. We amortize capitalized computer software development costs ratably based on the projected revenues associated with the related software or on a straight-line basis over three years, whichever method results in a higher level of amortization. Amortization of capitalized computer software development costs is included in the cost of license revenues in the condensed consolidated statements of operations.

Stock-Based Compensation. Effective May 1, 2006, we adopted the fair value recognition provisions of SFAS 123(R) using the modified prospective transition method. Under that transition method, compensation cost recognized on or after May 1, 2006 includes: (a) compensation cost for all share-based payments granted prior to, but not yet vested as of May 1, 2006, based on the grant date fair value estimated in accordance with the original provisions of SFAS 123, and (b) compensation cost for all share-based payments granted on or after May 1, 2006, based on the grant date fair value estimated in accordance with SFAS 123(R). Results for prior periods have not been restated. SFAS 123(R) requires that cash flows resulting from the tax benefits generated by tax deductions in excess of the compensation cost recognized for those options (excess tax benefits) to be classified as financing cash flows.

Management judgments and assumptions related to volatility, the expected term and the forfeiture rate are made in connection with the calculation of stock compensation expense. We periodically review all assumptions used in our stock option pricing model. Changes in these assumptions could have a significant impact on the amount of stock compensation expense.

Income Taxes. We provide for the effect of income taxes on our financial position and results of operations in accordance with SFAS No. 109, Accounting for Income Taxes including the recently adopted SFAS Interpretation No. 48, *Accounting for Uncertainty in Income Taxes an an interpretation of SFAS Statement No. 109*. Under this accounting pronouncement, income tax expense is recognized for the amount of income taxes payable or refundable for the current year and for the change in net deferred tax assets or liabilities resulting from events that are recorded for financial reporting purposes in a different reporting period than recorded in the tax return. Management must make significant assumptions, judgments and estimates to determine our current provision for income taxes and also our deferred tax assets and liabilities and any valuation allowance to be recorded against our net deferred tax asset. Our judgments, assumptions and estimates relative to the current provision for income tax take into account current tax laws, our interpretation of current tax laws, allowable deductions, and projected tax credits. Changes in tax law or our interpretation of tax laws could significantly impact the amounts provided for income taxes in our financial position and results of operations. Our assumptions, judgments and estimates relative to the value of our deferred tax assets take into account our expectations of the amount and category of future taxable income. Actual operating results and the underlying amount and category of income in future years, which could significantly increase tax expense, could render inaccurate our current assumptions, judgments and estimates of recoverable net deferred taxes.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Foreign Currency. In the three months ended July 31, 2008, we generated approximately 10% of our revenues outside the United States. We typically make international sales through our foreign subsidiaries or our Logility subsidiary and denominated those sales typically in U.S. Dollars, British Pounds Sterling or Euros. However, expenses incurred in connection with these sales are typically denominated in the local currencies. The effect of foreign exchange rate fluctuations on us in the three months of fiscal 2008 were not material. We estimate that a 10% movement in foreign currency rates would have had the effect of creating up to a \$131,000 exchange gain or loss for the three months ended July 31, 2008. We have not engaged in any hedging activities.

Interest rates and other market risks. We have no debt, and therefore limit our discussion of interest rate risk to risk associated with our investment profile. We manage our interest rate risk by maintaining an investment portfolio of trading and held-to-maturity investments with high credit quality and relatively short average maturities. These instruments include, but are not limited to, money-market instruments, bank time deposits, and taxable and tax-advantaged variable rate and fixed rate obligations of corporations, municipalities, and national, state, and local government agencies, in accordance with an investment policy approved by our Board of Directors. These instruments are denominated in U.S. dollars. The fair market value of these instruments as of July 31, 2008 were approximately \$73.0 million.

We also hold cash balances in accounts with commercial banks in the United States and foreign countries. These cash balances represent operating balances only and are invested in short-term time deposits of the local bank. Such operating cash balances held at banks outside the United States are denominated in the local currency and are minor.

Table of Contents

Many of our investments carry a degree of interest rate risk. When interest rates fall, our income from investments in variable-rate securities declines. When interest rates rise, the fair market value of our investments in fixed-rate securities declines. In addition, our investments in equity securities are subject to stock market volatility. Due in part to these factors, our future investment income may fall short of expectations or we may suffer losses in principal if forced to sell securities, which have seen a decline in market value due to changes in interest rates. We attempt to mitigate risk by holding fixed-rate securities to maturity, but, if our liquidity needs force us to sell fixed-rate securities prior to maturity, we may experience a loss of principal.

Inflation. Although we cannot accurately determine the amounts attributable thereto, we have been affected by inflation through increased costs of employee compensation and other operational expenses. To the extent permitted by the marketplace for our products and services, we attempt to recover increases in costs by periodically increasing prices.

Item 4. Controls and Procedures Management's Report on Internal Control Over Financial Reporting

As of the end of the period covered by this report, our management evaluated the effectiveness of our disclosure controls and procedures (as such term is defined in Rule 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) under the supervision and with the participation of our chief executive officer and chief financial officer. Based on and as of the date of such evaluation, the aforementioned officers have concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective.

Our chief executive officer and chief financial officer, with the assistance of our Disclosure Committee, have conducted an evaluation of the effectiveness of our disclosure controls and procedures as of July 31, 2008. We perform this evaluation on a quarterly basis so that the conclusions concerning the effectiveness of our disclosure controls and procedures can be reported in our annual report on Form 10-K and quarterly reports on Form 10-Q. Based on this evaluation, our chief executive officer and chief financial officer have concluded that our disclosure controls and procedures were effective as of July 31, 2008.

We believe our financial statements fairly present in all material respects our financial position, results of operations and cash in our quarterly report on Form 10-Q.

Changes in Internal Control over Financial Reporting

There have not been any changes in our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and

15d-15(f) under the Exchange Act) during the fiscal quarter to which this report relates that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings

We are not currently involved in legal proceedings requiring disclosure under this item.

Item 1A. Risk Factors

There have been no material changes to the risk factors as described in our Annual Report on Form 10-K for our fiscal year ended April 30, 2008.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(a) Not applicable

(b) Not applicable

(c) The following table summarizes repurchases of our stock in the three months ended July 31, 2008:

Fiscal Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs*
May 1, 2008 through May 31, 2008	0	\$ 0.00	0	1,579,104
June 1, 2008 through June 30, 2008	86,239	\$ 5.84	86,239	1,492,865
July 1, 2008 through July 31, 2008	0	\$ 0.00	0	1,492,865
Total Fiscal 2009 First Quarter	86,239	\$ 5.84	86,239	1,492,865

Table of Contents

* Our Board of Directors approved the above share purchase authority on August 19, 2002, when the Board approved a resolution authorizing the Company to repurchase up to 2.0 million shares of Class A common stock. This action was announced on August 22, 2002. The authorization has no expiration date.

The following table summarizes repurchases of stock made by our Logility subsidiary in the three months ended July 31, 2008:

Fiscal Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs*
May 1, 2008 through May 31, 2008	0	\$ 0.00	0	109,475
June 1, 2008 through June 30, 2008	39,620	\$ 7.49	39,620	69,855
July 1, 2008 through July 31, 2008	0	\$ 0.00	0	69,855
Total Fiscal 2009 First Quarter	39,620	\$ 7.49	39,620	69,855

* The Logility Board of Directors approved the above share purchase authority in December 1997, November 1998 and in February 2003, when the Logility Board approved resolutions authorizing Logility to repurchase an aggregate of up to 1.6 million shares of common stock. These actions were announced in November 1998 and on February 19, 2003, respectively. The authorizations have no expiration dates.
