Shareholder questions  
and a few answers

If satisfactory regulatory clearance is not achieved and/or the offer fails, what will happen to Rio Tinto's relative share price?

What happens if regulatory clearance is achieved and Rio Tinto shareholders accept the offer?

Capture the 45% premium

(a)

Exchange your Rio Tinto shares for a share in a stronger combined company:

With an unrivalled portfolio of long life, low cost assets

That unlocks substantial synergies not available to Rio Tinto any other way

That is more diversified, lower risk, has greater financial strength and is positioned to deliver superior returns, including higher dividends, through the cycle

That is better positioned to capture renewed growth in demand

And what is in it for BHP Billiton shareholders?

Earnings per share and cashflow per share accretive in the first full fiscal year following completion

(b)

Become shareholders in the same stronger combined company which will unlock the substantial synergies that are also not available to BHP Billiton on its own

Summary

We expect financial market volatility and economic uncertainty to continue in the short-term

However, China, India and other developing economies

are expected to continue to drive demand for commodities in the long-term

Our uniquely diversified portfolio of low cost and high quality assets places us at a competitive advantage in the current uncertain environment

Our strong cash flow and balance sheet allows us to re-invest throughout the cycle

Strong future production growth expected to be delivered from lower risk projects and high margin products

BHP Billiton is working towards completing the regulatory review process for the Rio Tinto offer by early 2009

BHP Billiton believes this offer is compelling for Rio Tinto shareholders, and value enhancing for BHP Billiton shareholders
