**PART I**

As used herein, references to McCormick, we, us and our are to McCormick & Company, Incorporated and its consolidated subsidiaries or, as the context may require, McCormick & Company, Incorporated only.

**Item 1. Business**

McCormick is a global leader in the manufacture, marketing and distribution of spices, herbs, seasonings, specialty foods and flavors to the entire food industry. Our major sales, distribution and production facilities are located in North America and Europe. Additional facilities are based in Mexico, Central America, Australia, China, Singapore, Thailand and South Africa. McCormick & Company, Incorporated was formed in 1915 under Maryland law as the successor to a business established in 1889.

We operate in two business segments, consumer and industrial. The consumer segment sells spices, herbs, extracts, seasoning blends, sauces, marinades, and specialty foods to the consumer food market under a variety of brands worldwide, including McCormick®, Lawry's Zatarain's®, Old Bay®, Thai Kitchen®, Simply Asia®, Dufour's®, Schwartz®, Vahine®, Sifco®, Club House® and Billy Bee®. The industrial segment sells seasoning blends, natural spices and herbs, wet flavors, coating systems, and compound flavors to multinational food manufacturers and foodservice customers both directly and indirectly through distributors.

Please refer to pages 19 through 21, of our Annual Report to Stockholders for 2009 for descriptions of our consumer and industrial businesses, and pages 6 through 13 of our Annual Report to Stockholders for 2009 for a discussion of growth initiatives for the business. These pages of our Annual Report to Stockholders for 2009, as well as all other page references to our Annual Report to Stockholders for 2009 contained in this Form 10-K, are incorporated herein by reference.

For financial information about our business segments, please refer to pages 22 through 27, Management's Discussion and Analysis - Results of Operations of our Annual Report to Stockholders for 2009, and Note 16, Business Segments and Geographic Areas of the Notes to Consolidated Financial Statements on pages 61 and 62 of the Annual Report to Stockholders for 2009.

For a discussion of our recent acquisition activity, please refer to page 30 Management's Discussion and Analysis - Acquisitions of our Annual Report to Stockholders for 2009, and Note 2, Acquisitions of the Notes to Consolidated Financial Statements on page 47 of the Annual Report to Stockholders for 2009.

**Raw Materials**

The most significant raw materials used by us in our business are dairy products, pepper, wheat, onion, capsciums, soybean oil, and garlic. Pepper and other spices and herbs are

generally sourced from countries other than the United States. Other raw materials, like cheese and onion, are primarily sourced from within the United States. We are not aware of any government restrictions or other factors that would have a material adverse effect on the availability of these raw materials. Because the raw materials are agricultural products, they are subject to fluctuations in market price and availability caused by weather, growing and harvesting conditions, market conditions, and other factors beyond our control. We respond to this volatility in a number of ways, including strategic raw material purchases, purchases of raw material for future delivery, and customer price adjustments.

### ***Customers***

McCormick's products are sold directly to customers and also through brokers, wholesalers, and distributors. In the consumer segment, products are resold to consumers through a variety of retail outlets, including grocery, mass merchandise, warehouse clubs, discount, and drug stores under a variety of brands. In the industrial segment, products are used by food and beverage manufacturers as ingredients for their finished goods and by food service customers as ingredients for menu items to enhance the flavor of their foods. Customers for the industrial segment include food manufacturers and the food service industry supplied both directly and indirectly through distributors.

We have a large number of customers for our products. In fiscal years 2007 and 2008, sales to one of our customers, PepsiCo, Inc., accounted for approximately 10% of consolidated net sales. In fiscal year 2009, sales to two of our customers, PepsiCo, Inc. and Wal-Mart Stores, Inc., each accounted for approximately 11% of consolidated net sales. Sales to our five largest customers represented approximately 30% of consolidated net sales for the 2009 fiscal year.

The dollar amount of backlog orders for our business is not material to an understanding of our business, taken as a whole. No material portion of our business is subject to renegotiation of profits or termination of contracts or subcontracts at the election of the U.S. government.

### ***Trademarks, Licenses and Patents***

McCormick owns a number of trademark registrations. Although in the aggregate these trademarks may be material to our business, the loss of any one of those trademarks, with the exception of our McCormick, Lawry's, Zatarain's, Club House, Ducros, Schwartz, and Vahine, would not have a material adverse effect on our business. The McCormick trademark is extensively used by us in connection with the sale of our food products in the U.S. and certain non-U.S. markets. The terms of the trademark registrations are as prescribed by law and the registrations will be renewed for as long as we deem them to be useful.

We have entered into a number of license agreements authorizing the use of our trademarks by affiliated and non-affiliated entities. The loss of these license agreements would not have a material adverse effect on our business. The term of the license agreements is generally three to five years or until such time as either party terminates the agreement. Those agreements with specific terms are renewable upon agreement of the parties.

We also own various patents, none of which individually are viewed as material to our business.

### ***Seasonality***

Due to seasonal factors inherent in McCormick's business, our sales, income, and cash from operations generally are lower in the first two quarters of the fiscal year, increase in the third quarter and are significantly higher in the fourth quarter due to the holiday season. This seasonality reflects customer and consumer buying patterns, primarily in the consumer segment.

### ***Working Capital***

In order to meet increased demand for our consumer products during our fourth quarter, McCormick usually builds its inventories during the third quarter of the fiscal year. We generally finance working capital items (inventory and receivables) through short-term borrowings, which include the use of lines of credit and the issuance of commercial paper. For a description of our liquidity and capital resources, see Note 6

Financing Arrangements of the Notes to Consolidated Financial Statements on pages 48 and 49 of our Annual Report to Stockholders for 2009, and the Liquidity and Financial Condition section of Management's Discussion and Analysis on pages 27 through 30 of our Annual Report to Stockholders for 2009.

### ***Competition***

McCormick competes in a geographic market that is international and highly competitive. Our strategies for competing in each of our segments include a focus on price and value, product quality and innovation, and superior service. Additionally, in the consumer segment, we focus on brand recognition and loyalty, effective advertising, promotional programs, and the identification and satisfaction of consumer preferences. For further discussion, see pages 19 through 21 of our Annual Report to Stockholders for 2009.

### ***Research and Development***

Many of McCormick's products are prepared from confidential formulas developed by our research laboratories and product development teams, as well as from, in some cases, customer proprietary formulas. Expenditures for research and development were \$48.9 million in 2009, \$51.0 million in 2008, and \$49.3 million in 2007. The amount spent on customer-sponsored research activities is not material to us.

### ***Environmental Regulations***

The cost of compliance with federal, state, and local provisions related to protection of the environment has had no material effect on McCormick's business. There were no material capital expenditures for environmental control facilities in fiscal year 2009 and there are no material expenditures planned for such purposes in fiscal year 2010.

***Employees***

McCormick had approximately 7,500 full time employees worldwide as of December 31, 2009. We believe our relationship with employees to be good. We have no collective bargaining contracts in the United States. At our foreign subsidiaries, approximately 1,300 employees are covered by collective bargaining agreements or similar arrangements.

***Financial Information about Geographic Locations***

For information on the net sales and long-lived assets of McCormick by geographic area, see Note 16, Business Segments and Geographic Areas of the Notes to Consolidated Financial Statements on pages 61 and 62 of our Annual Report to Stockholders for 2009.

***Foreign Operations***

McCormick is subject in varying degrees to certain risks typically associated with a global business, such as local economic and market conditions, restrictions on investments, royalties and dividends, and exchange rate fluctuations. Approximately 38% of sales in fiscal year 2009 were from non-U.S. operations. For information on how McCormick manages these risks, see the Market Risk Sensitivity section of Management's Discussion and Analysis on pages 31 through 33 of our Annual Report to Stockholders for 2009.

***Forward-Looking Information***

For a discussion of forward-looking information, see the Forward-Looking Information section of Management's Discussion and Analysis on page 36 of our Annual Report to Stockholders for 2009.

***Available Information***

Our principal corporate internet website address is: [www.mccormickcorporation.com](http://www.mccormickcorporation.com). We make available free of charge through our website our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 (the Exchange Act) as soon as reasonably practicable after such documents are electronically filed with, or furnished to, the United States Securities and Exchange Commission (the SEC). The SEC maintains an Internet web site at [www.sec.gov](http://www.sec.gov) that contains reports, proxy and information statements, and other information regarding McCormick. Our website also includes our Corporate Governance Guidelines, Business Ethics Policy and charters of the Audit Committee, Compensation Committee, and Nominating/Corporate Governance Committee of our Board of Directors.

**Item 1A. Risk Factors**

The following are certain risk factors that could affect our business, financial condition, and results of operations. These risk factors should be considered in connection with evaluating the forward-looking statements contained in this Annual Report on Form 10-K because these factors could cause the actual results and conditions to differ materially from those projected in forward-looking statements. Before you buy our Common Stock or Common Stock Non-Voting, you should know that making such an investment involves some risks, including the risks described below. The risks that have been highlighted here are not the only ones that we face. If any of the risks actually occur, our business, financial condition, or results of operations could be negatively affected. In that case, the trading price of our securities could decline, and you may lose all or part of your investment.

***Damage to Our Reputation or Brand Name, Loss of Brand Relevance or Increase in Private Label Use by Customers or Consumers Could Negatively Impact Us.***

Our reputation for manufacturing high-quality products is widely recognized. In order to safeguard that reputation, we have adopted rigorous quality assurance and quality control procedures which are designed to ensure conformity to specification and compliance with law. We also continually make efforts to maintain and improve relationships with our customers and consumers and to increase awareness and relevance of our brand through effective marketing and other measures. A serious breach of our quality assurance or quality control procedures, deterioration of our quality image, impairment of our customer or consumer relationships, or failure to adequately protect the relevance of our brand, which may lead to customers or consumers purchasing other brands or private label brands that may or may not be manufactured by us, could have a material negative impact on our financial condition and results of operations. From time to time, our customers evaluate their mix of branded and private label product offerings. If a significant portion of our branded business was switched to private label, it could have a significant impact on our consumer business.

***The Consolidation of Customers May Put Pressures on Our Operating Margins and Profitability.***

Our customers, such as supermarkets, warehouse clubs, and food distributors, have consolidated in recent years and consolidation is expected to continue throughout the U.S., the European Union, and other major markets. Such consolidation could present a challenge to margin growth and profitability in that it has produced large, sophisticated customers with increased buying power who are more capable of operating with reduced inventories, resisting price increases, demanding lower pricing, increased promotional programs and specifically tailored products, and shifting shelf space currently used for our products to private label products. These factors and others could have an adverse impact on our future sales growth and profitability.

***Issues Regarding Procurement of Raw Materials May Negatively Impact Us.***

Our purchases of raw materials are subject to fluctuations in market price and availability caused by weather, growing and harvesting conditions, market conditions, governmental actions and other factors beyond our control. The most significant raw materials used by us in our business are dairy products, pepper, wheat, onion, capsicums, soybean oil, and garlic. While future price movements of raw material costs are uncertain, we seek to mitigate the market price risk in a number of ways, including strategic raw material purchases, purchases of raw material for future delivery, and customer price adjustments. We have not used derivatives to manage the volatility related to this risk. Any actions taken in response to market price fluctuations may not effectively limit or eliminate our exposure to changes in raw material prices. Therefore, we cannot provide assurance that future raw material price fluctuations will not have a negative impact on our business, financial condition or operating results.

In addition, we may have very little opportunity to mitigate the availability risk of certain raw materials due to the effect of weather on crop yield, political unrest in the producing countries, changes in governmental agricultural programs, and other factors beyond our control. Therefore, we cannot provide assurance that future raw material availability will not have a negative impact on our business, financial condition, or operating results.

Further, political, socio-economic, and cultural conditions, as well as disruptions caused by terrorist activities, in developing countries create risks for food safety. Although we have adopted rigorous quality assurance and quality control procedures which are designed to ensure the safety of our imported products, we cannot provide assurance that such events will not have a negative impact on our business, financial condition or operating results.

***Our Profitability May Suffer as a Result of Competition in Our Markets.***

The food industry is intensely competitive. Competition in our product categories is based on price, product innovation, product quality, brand recognition and loyalty, effectiveness of marketing and promotional activity, and the ability to identify and satisfy consumer preferences. From time to time, we may need to reduce the prices for some of our products to respond to competitive and customer pressures. Such pressures also may impair our ability to take appropriate remedial action to address commodity and other cost increases.

***Our Operations may be Impaired as a Result of Disasters, Business Interruptions or Similar Events.***

A natural disaster such as an earthquake, fire, flood, or severe storm, or a catastrophic event such as a terrorist attack, an epidemic affecting our operating activities, major facilities, or employees and customers health, or a computer system failure, could cause an interruption or delay in our business and loss of inventory and/or data or render us unable to accept and fulfill customer orders in a timely manner, or at all. In addition, some of our inventory and production facilities are located in areas that are susceptible to harsh weather; a major storm, heavy snowfall or other similar event could prevent us from delivering products in a timely manner.

We cannot provide assurance that our disaster recovery plan will address all of the issues we may encounter in the event of a disaster or other unanticipated issue, and our business interruption insurance may not adequately compensate us for losses that may occur from any of the foregoing. In the event that an earthquake, natural disaster, terrorist attack, or other catastrophic event were to destroy any part of our facilities or interrupt our operations for any extended period of time, or if harsh weather or health conditions prevent us from delivering products in a timely manner, our business, financial condition, and operating results could be seriously harmed.

***We May Not Be Able to Successfully Consummate Proposed Acquisitions or Divestitures or Integrate Acquired Businesses.***

From time to time, we may acquire other businesses and, based on an evaluation of our business portfolio, divest existing businesses. These potential acquisitions and divestitures may present financial, managerial, and operational challenges, including diversion of management attention from existing businesses, difficulty with integrating or separating personnel and financial and other systems, increased expenses, assumption of unknown liabilities and indemnities and potential disputes with the buyers or sellers. In addition, we may be required to incur asset impairment charges (including charges related to goodwill and other intangible assets) in connection with acquired businesses which may reduce our profitability. If we are unable to consummate such transactions, or successfully integrate and grow acquisitions and achieve contemplated revenue synergies and cost savings, our financial results could be adversely affected.

***Our Foreign Operations are Subject to Additional Risks.***

We operate our business and market our products internationally. In fiscal year 2009, 38% of our sales were generated in foreign countries. Our foreign operations are subject to additional risks, including fluctuations in currency values, foreign currency exchange controls, discriminatory fiscal policies, compliance with U.S. and foreign laws, enforcement of remedies in foreign jurisdictions, and other economic or political uncertainties. Additionally, international sales are subject to risks related to imposition of tariffs, quotas, trade barriers and other similar restrictions. All of these risks could result in increased costs or decreased revenues, either of which could adversely affect our profitability.

***Fluctuations in Foreign Currency Markets May Negatively Impact Us.***

We are exposed to fluctuations in foreign currency in the following main areas: cash flows related to raw material purchases; the translation of foreign currency earnings to U.S. dollars; the value of foreign currency investments in subsidiaries and unconsolidated affiliates and cash flows related to repatriation of these investments. Primary exposures include the British pound sterling versus the Euro, and the U.S. dollar versus the Euro, British pound sterling, Canadian dollar, Australian dollar, Mexican peso, Chinese renminbi, and Thai baht. We routinely enter into foreign currency exchange contracts to facilitate managing certain of these foreign currency risks. However, these contracts may not effectively limit or eliminate our exposure to a decline in operating results due to foreign currency exchange changes. Therefore, we cannot provide assurance that future exchange rate fluctuations will not have a negative impact on our business, financial position, or operating results.

***Increases in Interest Rates May Negatively Impact Us.***

We had total outstanding short-term borrowings of approximately \$101.2 million at an average interest rate of approximately 0.4% on November 30, 2009. Our policy is to manage our interest rate risk by entering into both fixed and variable rate debt arrangements. We also use interest rate swaps to minimize worldwide financing cost and to achieve a desired mix of fixed and variable rate debt. We utilize derivative financial instruments to enhance our ability to manage risk, including interest rate exposures that exist as part of our ongoing business operations. We do not enter into contracts for trading purposes, nor are we a party to any leveraged derivative instruments. Our use of derivative financial instruments is monitored through regular communication with senior management and the utilization of written guidelines. However, our use of these instruments may not effectively limit or eliminate our exposure to changes in interest rates. Therefore, we cannot provide assurance that future interest rate increases will not have a material negative impact on our business, financial position, or operating results.

***The Deterioration of Credit and Capital Markets May Adversely Affect our Access to Sources of Funding.***

We rely on our revolving credit facilities, or borrowings backed by these facilities, to fund a portion of our seasonal working capital needs and other general corporate purposes. If any of the banks in the syndicates backing these facilities were unable to perform on its commitments, our liquidity could be impacted, which could adversely affect funding of seasonal working capital requirements. The Company engages in regular communication with all of the banks participating in our revolving credit facilities. During these communications none of the banks have indicated that they may be unable to perform on their commitments. In addition, management periodically reviews our banking and financing relationships, considering the stability of the institutions, pricing we receive on services, and other aspects of the relationships. Based on these communications and our monitoring activities, management believes the likelihood of one of our banks not performing on its commitment is remote.

In addition, global capital markets have experienced volatility that has tightened access to capital markets and other sources of funding. In the event we need to access the capital markets or other sources of financing, there can be no assurance that we will be able to obtain financing on acceptable terms or within an acceptable time, if at all. Our inability to obtain financing on terms and within a time acceptable to us could have an adverse impact on our operations, financial condition, and liquidity.

***We Face Risks Associated With Certain Pension Assets and Obligations.***

We hold investments in equity and debt securities in our qualified defined benefit pension plans and in a rabbi trust for our U.S. non-qualified pension plan. Deterioration in the value of plan assets resulting from a general financial downturn or otherwise, could cause (or increase) an

underfunded status of our defined benefit pension plans, thereby increasing our obligation to make contributions to the plans. An obligation to make contributions to pension plans could reduce the cash available for working capital and other corporate uses, and may have an adverse impact on our operations, financial condition and liquidity.

*The Global Financial Downturn Exposes Us to Credit Risks from Customers and Counterparties.*

Consolidations in some of the industries in which our customers operate have created larger customers, some of which are highly leveraged. In addition, competition has increased with the growth in alternative channels through our customer base. These factors have caused some customers to be less profitable and increased our exposure to credit risk. Current credit markets are volatile, and some of our customers and counterparties are highly leveraged. A significant adverse change in the financial and/or credit position of a customer or counterparty could require us to assume greater credit risk relating to that customer or counterparty and could limit our ability to collect receivables. This could have an adverse impact on our financial condition and liquidity.

**Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure**

None.

**Item 9A. Controls and Procedures**

*Disclosure Controls and Procedures*

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures, as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934, as of the end of the period covered by this report. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective.

*Internal Control over Financial Reporting*

Management's report on our internal control over financial reporting and the report of our Independent Registered Public Accounting Firm on internal control over financial reporting are included on pages 38 and 39 of our Annual Report to Stockholders for 2009. No change occurred in our internal control over financial reporting (as defined in Rule 13a-15(f)) during our last fiscal quarter which has materially affected or is reasonably likely to materially affect, our internal control over financial reporting.

**Item 9B. Other Information**

On January 26, 2010, the Board of Directors approved amendments to our By-Laws. The amendments, among other things, amend the advance notice provisions of the By-Laws to require stockholders who intend to submit a director nomination or other business before a meeting of stockholders to include, in addition to other information concerning any such director nominee or stockholder,

Certain details about all ownership interests in our securities by the stockholder and any beneficial owner on whose behalf the nomination or proposal is made, including any derivative or short positions, profit or other economic interests, options, hedging transactions or borrowed or loaned shares,

An agreement for any director nominee to abide by applicable confidentiality, governance, conflicts, stock ownership and trading policies of ours, and

A representation to update that information as of the record date of the meeting no later than 10 days after the record date.

The remaining amendments to the By-Laws are primarily clerical in nature and designed to update our By-Laws and conform with standard practices. These additional amendments, among other things,

Provide that the chairman of a meeting of stockholders, or the Board of Directors, may appoint one or more inspectors to act at any meeting.

Provide that, in addition to being the Chairman of the Board of Directors, the President of the Company may also be the Chief Executive Officer.

## Edgar Filing: MCCORMICK & CO INC - Form 10-K

Provide that any officer appointed by another officer may be removed by such appointing officer. Prior to the amendment an officer could not remove a subordinate officer with the approval of the Board of Directors.

Provide for easier means for replacement of mutilated, lost or destroyed stock certificates by permitting the Board of Directors to delegate such power to the officers or agents of the Company.

Update the indemnification provision to remove outdated language and clarify that repeal or modification of the provisions shall not adversely affect the rights of persons entitled to indemnification at the time of the amendment.

This description is qualified in its entirety by reference to the text of the amended and restated Bylaws filed as an Exhibit to this Report, which are incorporated herein by reference.
