Table of Contents

The underwriter has an option to buy up to 1,050,000 additional shares of common stock from Luxco to cover sales of shares by the underwriter that exceed the number of shares specified above. The underwriter has 30 days from the date of this prospectus supplement and the accompanying prospectus to exercise this overallotment option. If any additional shares of common stock are purchased, the underwriters will offer the additional shares on the same terms as those on which the shares are being offered. Our common stock is listed on the NASDAQ Global Select Market under the symbol SIRO.

The underwriting agreement provides that the underwriter's obligation to purchase shares of our common stock depends on the satisfaction of the conditions contained in the underwriting agreement including:

the obligation to purchase all of the shares of our common stock offered hereby, if any of the shares are purchased;

the representations and warranties made by us and the selling stockholders to the underwriter are true;

there is no material change in our business or in the financial markets; and

we and the selling stockholders deliver customary closing documents to the underwriter.

Commissions and Expenses

The following table summarizes the underwriting discounts and commissions the selling stockholders will pay to the underwriter. The underwriting fee is the difference between the initial price to the public and the amount the underwriter pays to the selling stockholders for the shares.

Per share	\$ 0.35
Total	\$ 2,537,500

The underwriter has advised us that it proposes to offer the shares of our common stock directly to the public at the public offering price on the cover of this prospectus supplement and to selected dealers at such offering price less a selling concession not in excess of \$0.35 per share. After the offering, the underwriter may change the offering price and other selling terms. Sales of shares made outside of the United States may be made by affiliates of the underwriter.

The expenses of this offering that are payable by us and the selling stockholders are estimated to be \$400,000 (excluding underwriting discounts and commissions). We have agreed to pay expenses incurred by the selling stockholders in connection with the offering, other than the underwriting discounts and commissions, any costs and expenses incurred by the selling stockholders related to its performance under the underwriting agreement and any transfer taxes related to their sale of our common stock.

Lock-ups

We, the selling stockholders and management have agreed that, with limited exceptions, for a period of 60 days after the date of the final prospectus, they will not offer, pledge, announce the intention to sell, sell, contract to sell, sell any option or contract to purchase, purchase any option or contract to sell, grant any option, right or warrant to purchase or otherwise transfer or dispose of, directly or indirectly, any shares of common stock or any securities convertible into or exercisable or exchangeable for common stock, or enter into any swap or other agreement that transfers, in whole or in part, any of the economic consequences of ownership of common stock, without the prior written consent of Barclays Capital Inc. for a period of 60 days after the date of this prospectus. These restrictions shall not apply to sales of common stock in this offering.

Table of Contents

Our directors and executive officers will enter into lock-up agreements with the underwriter pursuant to which each of these persons, with limited exceptions, for a period of 60 days after the date of this prospectus supplement, may not, without the prior written consent of Barclays Capital Inc., (1) offer, pledge, announce the intention to sell, sell, contract to sell, sell any option or contract to purchase, purchase any option or contract to sell, grant any option, right or warrant to purchase, or otherwise transfer or dispose of, directly or indirectly, any shares of our common stock or any securities convertible into or exercisable or exchangeable for our common stock (including, without limitation, common stock or such other securities which may be deemed to be beneficially owned by such directors and executive officers in accordance with the rules and regulations of the SEC and securities which may be issued upon exercise of a stock option or warrant), (2) enter into any swap or other agreement that transfers, in whole or in part, any of the economic consequences of ownership of the common stock or such other securities, whether any such transaction described in clause (1) or (2) above is to be settled by delivery of common stock or such other securities, in cash or otherwise, or (3) make any demand for or exercise any right with respect to the registration of any shares of our common stock or any security convertible into or exercisable or exchangeable for our common stock without the prior written consent of Barclays Capital Inc., in each case other than (A) our common stock to be sold by such directors and executive officers pursuant to the underwriting agreement, (B) transfers of shares of our common stock as a bona fide gift or gifts, and (C) distributions of shares of our common stock to members or stockholders of such directors and executive officers; provided that in the case of any transfer or distribution pursuant to clause (B) or (C), each donee or distributee shall execute and deliver to Barclays Capital Inc. a lock-up agreement; and provided, further, that in the case of any transfer or distribution pursuant to clause (B) or (C), no filing by any party (donor, donee, transferor or transferee) under the Securities Exchange Act of 1934, as amended, or other public announcement shall be required or shall be made voluntarily in connection with such transfer or distribution (other than a filing on a Form 5 made after the expiration of the 60-day period referred to above).

Indemnification

We and the selling stockholders have agreed to indemnify the underwriter against certain liabilities, including liabilities under the Securities Act of 1933, as amended, and to contribute to payments that the underwriter may be required to make for these liabilities.

Stabilization, Short Positions and Penalty Bids

The underwriter may engage in stabilizing transactions, covering transactions or purchases for the purpose of pegging, fixing or maintaining the price of our common stock, in accordance with Regulation M under the Exchange Act:

Stabilizing transactions permit bids to purchase the underlying security so long as the stabilizing bids do not exceed a specified maximum.

Covering transactions involve purchases of our common stock in the open market after the distribution has been completed in order to cover short positions.

These stabilizing transactions and covering transactions may have the effect of raising or maintaining the market price of our common stock or preventing or retarding a decline in the market price of our common stock. As a result, the price of our common stock may be higher than the price that might otherwise exist in the open market. These transactions may be effected on the Nasdaq Global Select Market or otherwise and, if commenced, may be discontinued at any time.

Neither we nor the underwriter make any representation or prediction as to the direction or magnitude of any effect that the transactions described above may have on the price of our common stock. In addition, neither we nor the underwriter make any representation that the underwriter will engage in these stabilizing transactions or that any transaction, once commenced, will not be discontinued without notice.

OUR COMPANY

We are a leading manufacturer of high-tech dental equipment. We focus on developing innovative systems and solutions for dentists globally. We provide a broad range of advanced products in each of four primary areas: Dental CAD/CAM Systems, Imaging Systems, Treatment Centers and Instruments. Our revenue for fiscal 2008 was \$757.1 million. We sell our products globally, with the U.S. market contributing 29.2% of revenue, or \$220.9 million, the German market contributing \$153.8 million, or 20.3%, and the rest of the world contributing 50.5% of revenue, or \$382.4 million, in fiscal 2008.

The following is a brief description of each of our segments:

Dental CAD/CAM Systems address the worldwide market for dental restorations, which includes several types of restorations, such as inlays, onlays, veneers, crowns, bridges, copings and bridge-frameworks made from ceramic, metal or composite blocks. We pioneered the application of high-tech CAD/CAM techniques to the traditional lab-based restoration process with the commercialization of the CEReamic REConstruction, or CEREC, method. Our CEREC system is an in-office application which enables the dentist to produce high quality restorations from ceramic material and insert them into the patient's mouth during a single appointment. CEREC represents an advantageous substitute for the traditional out-of-mouth pre-shaped restoration method, which requires a dentist to send a model of the damaged tooth to a dental laboratory, and therefore multiple patient visits. In fiscal year 2003, Sirona launched its CEREC 3 product, which has been periodically updated, including enhanced software applications. In fiscal 2007, we launched our next generation milling unit the MC XL, as well as new Biogeneric software. The MC XL produces a high quality, precisely fitted restoration in half the time that the classic CEREC milling unit requires. The MC XL's fine tolerances are especially appreciated by doctors who demand the most precise restoration possible. In addition to CEREC, we also offer products for dental laboratories, such as inLab and inEos, which are designed to improve efficiency and reduce costs for the dental lab. inLab scans the model received from the dentist and mills the ceramic restoration, such as crown copings, bridge frameworks from ceramic or composite blocks, to the specifications of the captured image. In fiscal 2007 we launched our next generation inLab unit, the inLab MC XL. The new unit features a modern, elegant design with solid, heavy-duty construction. Milling performance and precision has been optimized and milling time has been considerably reduced. The inEos scanner, which was launched in 2005, is a high speed scanner which produces 3D digital images from a single tooth up to a jaw, directly from the plaster model. The inEos product has scanning times of less than 10 seconds, a significant factor which enhances productivity. In 2008, we expanded our CEREC offering through the introduction of CEREC Connect. CEREC Connect is a web based service that allows the digital impression acquired through the CEREC acquisition unit to be transferred electronically to InLab laboratories. The laboratories can use this data to create final restorations. Many restorations produced by a laboratory can be produced through the CEREC Connect system eliminating the need to take a physical impression in these cases.

Imaging Systems, which include a broad range of equipment for diagnostic imaging in the dental practice, using both film-based and digital technologies. We have developed a comprehensive range of imaging systems for panoramic and intra-oral applications. This allows the dentist to accommodate the patient in an efficient manner. Intra-oral x-ray equipment uses image-capture devices (film or sensor), which are inserted into the mouth behind the diagnostic area, and typically take images of one or two teeth. Panoramic x-ray equipment produces images of the entire jaw structure by means of an x-ray tube and an image capture device, which rotates around the head. In July 2004, we introduced our next generation of digital panoramic x-ray systems, the Orthophos XG line. The flagship model, the Orthophos XG Plus, provides specialists, orthodontists, oral surgeons and implantologists with over 30 programs and a wide variety of diagnostic possibilities. Other models of the family include the Orthophos XG 5 which is designed for general dental practitioners, and the basic model Orthophos XG 3. As a result of the transaction completed on June 20, 2006 (the Exchange) whereby we combined our business with Schick Technologies, Inc. (Schick), we expanded our imaging system product line to include Schick's CDR (computed digital radiography) system, the leading intra-oral digital imaging system in the United States. Schick's product line includes an imaging sensor based on CMOS technology and the Schick

Pan, a digital panoramic unit. In fiscal 2007, we introduced our GALILEOS 3D-imaging unit. Today, three-dimensional imaging is offering the field of dentistry previously undreamed-of diagnostic and therapeutic options in the fields of surgery, prosthetics, orthodontics, and restorative dentistry. GALILEOS was created to bring these options to life and integrate them efficiently into routine dental practices. In July 2008 we launched GALILEOS Compact, which is specifically tailored to meet the needs of the general practitioner and also has the ability to display traditional 2-D panoramic digital images.

Treatment Centers, which comprise a broad range of products from basic dentist chairs to sophisticated chair-based units with integrated diagnostic, hygiene and ergonomic functionalities, as well as specialist centers used in preventative treatment and for training purposes. We offer specifically configured products to meet the preferences of dentists within each region in which we operate. Our treatment center configurations and system integration are designed to enhance productivity by creating a seamless workflow within the dental practice. Our centers therefore allow the dentist to both improve productivity and increase patient satisfaction, significant factors in adding value to his or her practice. In October 2004, we acquired one of the leading Chinese manufacturers of basic treatment centers, located in Foshan (South China). These basic products are manufactured both for the domestic Chinese market and for export markets. In July 2008, we launched our new TENE0 Treatment Center, which combines industry-leading technology with a timeless design that provides both patient and dentist with the ultimate in convenience and comfort.

Instruments, which includes a wide range of instruments, including handheld and power-operated handpieces for cavity preparation, endodontics, periodontology and prophylaxis. The instruments are supplemented by multi-function tips, supply and suction hoses, as well as care and hygiene systems for instrument preparation. Our instruments are often sold as packages in combination with treatment centers. During the last two years, we introduced several new products, including: SIROLaser, a versatile, compact, convenient diode laser that can be used in endodontics, periodontology and oral surgery; PerioScan, an all-in-one ultrasonic scaling unit, enabling both diagnosis and treatment of dental calculus with a single device; and SIROEndo, a root canal preparation unit that can be attached to any treatment center. We intend to continue to strengthen the position of our Instruments segment as a diversified supplier of high-quality, reliable, user-friendly and cost-efficient dental instruments.

We distribute our products globally to dental practices, clinics and laboratories through an international network of more than 300 distributors. Because distributors typically cover both dental equipment and consumables, they have regular contact with the dentist and are therefore optimally positioned to identify new equipment sale opportunities. Our primary distributors in the United States are Patterson Companies and Henry Schein, two of the world's largest dental distributors. Outside of the United States, Henry Schein is our largest distributor, and, along with Pluradent, primarily distributes for us in Europe. We distribute elsewhere through a well developed network of independent regional distributors. We work closely with our distributors by training their technicians and sales representatives with respect to our products. With over 5,500 sales and service professionals trained each year, we are able to ensure high standards of quality in after-sale service and the best marketing of our products. The success of our products is evidenced by their importance to our distribution partners, and such products are in many cases among their best selling offerings.

Our geographic and product diversity is demonstrated by the following charts, which set forth our fiscal 2008 revenue by geographic region and product category:
