---

**AMÉRICA MÓVIL, S.A.B. DE C.V. AND SUBSIDIARIES**

**Notes to Condensed Consolidated Financial Statements**

**(Unaudited figures and notes)**

**(In thousands of Mexican pesos, unless otherwise indicated)**

**1. Corporate Information**

América Móvil, S.A.B. de C.V. and subsidiaries (collectively, the Company or América Móvil ) provides wireless and fixed communications services in Latin America. América Móvil obtains its revenues primarily from telecommunications services, including the sale of airtime (including interconnection under the calling party pays program), monthly rent, long-distance charges, and other services (including roaming, value added services and other service charges), as well as the proceeds from the sale of cellular phones and accessories.

América Móvil has authorization, licenses, permits and concessions (hereinafter collectively referred to as licenses ) to build, install, operate and use both public and private telecommunications networks and provide telecommunication services (mostly mobile and fixed-line telephony) in the countries in which the Company has presence (except for in the U.S.). These licenses will expire at various times from 2012 through 2046.

Certain licenses require the payment to the respective governments of a share in sales determined as a percentage of revenues from services under concession. The percentage is set as either a fixed rate or in some cases based on certain operating infrastructure (except for Guatemala and El Salvador).

The Company is located in Mexico City, on Lago Alberto # 366, Col. Anahuac, Miguel Hidalgo.

The Company has subsidiaries in 18 countries, which provide services in segments, such as mobile telephony, fixed-line telephony and value-added services.

**2. Basis of Preparation of the Interim Condensed Consolidated Financial Statements and Summary of Significant Accounting Policies**

**a) Basis of preparation**

The accompanying unaudited interim condensed consolidated financial statements have been prepared in conformity with International Accounting Standard (IAS 34), *Interim Financial Reporting*, and are considered to be preliminary and subject to change, since the first consolidated financial statements prepared in conformity with International Financial Reporting Standards (IFRS) shall be for the year ended December 31, 2010. Therefore, these financial statements do not include all the information and disclosures required for annual financial statements prepared in conformity with IFRS.

We have included adjustments for recurring accounting estimates which have proven to be necessary to present interim condensed consolidated financial statements in conformity with IAS 34. The results of operations for the three-month period ended March 31, 2010 are not necessarily indicative of the results that may be expected for the year ending December 31, 2010.

The first consolidated financial statements prepared in conformity with IFRS will be for the year ending December 31, 2010.

The accounting policies applied to the accompanying unaudited interim financial statements are consistent with the policies applied to the consolidated financial statements at December 31, 2009, except for those policies that have been modified as a result of the adoption of IFRS as of January 1, 2010, as explained in paragraph c) of this note.

The Company set January 1, 2009 as the date of transition to IFRS. The rules for the initial adoption of IFRS are established in IFRS 1, *First-time adoption of International Financial Reporting Standards*.

The consolidated financial statements for the three-month period ended March 31, 2009 and the year ended December 31, 2009, that were prepared in conformity with Mexican Financial Reporting Standards (Mexican FRS), have been restated under IFRS to be effective as of the transition date. The restructured information is subject to adjustments resulting from the issuance of standards, interpretations and amendments of the International Accounting Standards Board (IASB) prior to December 31, 2010 and any such adjustments may have retroactive effects. Consequently, the financial information at December 31, 2009 may be required to be modified, before being presented as comparative figures to the consolidated financial statements at December 31, 2010.

**b) Basis of consolidation**

The unaudited condensed consolidated financial statements include the accounts of América Móvil, S.A.B. de C.V. and those of its subsidiaries at March 31, 2010 and 2009 and at December 31, 2009. The financial statements of the subsidiaries have been prepared for the same accounting period and following the same accounting principles as those of the Company.

All intercompany balances and transactions have been eliminated in the consolidated financial statements. Instead, the equity investment in the associate was valued using the equity method.

Subsidiaries are fully consolidated from the month following the date of acquisition. Consolidation starts from the time the Company acquires control over the subsidiary and ceases when it no longer exercises control over the subsidiary.

All intra-group balances, revenues, costs, expenses and income and losses have been eliminated in the consolidated financial statements.

Non-controlling interests represented the portion of profit or loss and net assets that were not held by the Group and were presented separately in the consolidated comprehensive income statement and within equity in the consolidated statement of financial position, separately from the parent shareholders' equity.

Acquisitions of non-controlling interests were accounted as transactions between entities under common control, whereby, the difference between the consideration and the book value of the share of the net assets acquired were recognized as part of equity.

**c) Initial adoption of International Financial Reporting Standards**

As mentioned in paragraph a) above, the consolidated financial statements for the three-month period ended March 31, 2009 and the year ended December 31, 2009, that were prepared in conformity with Mexican Financial Reporting Standards (Mexican FRS), have been restated under IFRS to be effective as of the transition date.

Following is an analysis of the main adjustments and reclassifications made by América Móvil so as to restate its statements of financial position under Mexican FRS at March 31 and December 31, 2009, and its statement of income for the three-month period ended March 31, 2009 and for the year ended December 31, 2009. The opening statement of financial position was prepared at January 1, 2009, the date of transition to IFRS.

**Reconciliation of equity at January 1, 2009 (date of transition to IFRS) - Unaudited**

Explanatory notes to the reconciliation of net assets and equity at January 1, 2009, March 31, 2009 and December 31, 2009, and to the reconciliation of results of operations for the three-month period ended March 31, 2009 and for the year ended December 31, 2009.

**1) Property, plant and equipment, intangible assets, capital stock and other equity accounts**

Property, plant and equipment

In conformity with Mexican FRS, América Móvil recognized the effects of inflation on its financial information, as follows:

Through December 31, 2007, plant, property and equipment and construction in progress acquired abroad were valued at cost and then restated based on the rate of inflation of the respective country of origin and the prevailing exchange rate at the balance sheet date (specific indexation factors). Property, plant and equipment of domestic origin were restated based on the Mexican National Consumer Price Index (NCPI).

Intangible assets

As of January 1, 2008, the Company records its intangible assets (licenses and trademarks) at acquisition cost. Through December 31, 2007, intangible assets were restated based on the rate of inflation of each country.

Capital stock and other equity accounts

Capital stock and retained earnings were restated for inflation through December 31, 2007 based on the NCPI.

General

For adoption to IFRS, deemed costs of the date of transition were the restated amount of property, plant and equipment and intangible assets determined in conformity with Mexican FRS at December 31, 2008, which includes the effects of inflation through December 31, 2007. This in conformity with the exemption permitted under IFRS 1 regarding the use of fair value or revaluation as deemed cost at the date of transition.

With respect to capital stock and other equity accounts, América Móvil eliminated the effects of inflation since 2000 (date of incorporation) through December 31, 2007, since under IFRS, entities are required to recognize the effects of inflation only when entities operate in an hyper-inflationary environment. One of the characteristics of a hyper-inflationary environment is that the cumulative rate of inflation in the preceding three fiscal years is equal to or greater than 100%. América Móvil and its subsidiaries currently operate in a non-inflationary economic environment.

**2. Capitalized interest in projects in process**

As of January 1, 2007, Mexican FRS establish that entities must capitalize comprehensive financing cost (CFC), which consists of cost of interest, the net monetary position result and exchange differences related to financing obtained from foreign financial institutions in foreign currency. Prior to January 1, 2007, capitalization of interest to projects in process was optional, and the capitalization of all items included in comprehensive result of financing was not defined.

Mexican FRS also establish that entities must capitalize borrowing costs that are directly attributable to the acquisition, construction or production of qualifying assets, as part of the cost of such assets.

As mentioned in point 1 above, América Móvil considered as deemed cost at the date of transition to IFRS the revalued cost of its property, plant and equipment, which include the capitalization of comprehensive financing result at that date.

Since IAS 23, *Borrowing Costs*, as revised, was effective as of January 1, 2009, the capitalization of borrowing costs for 2008 determined in conformity with Mexican FRS was eliminated at the date of transition.

As of January 1, 2009, the capitalization of borrowing costs was determined in conformity with IFRS, without deducting the interest income, since the Company has not identified the portion of such interest that was generated on investments of the funds obtained from the loans acquired for the construction of assets.

Exchange differences arising from foreign currency borrowings have been capitalized only to the extent that they are regarded as an adjustment to interest costs.

The cumulative effect of the adjustment for capitalization of borrowing costs aggregated Ps.6,550,044 (net of accumulated depreciation of Ps.503,907) at the transition date and at March 31 and December 31, 2009 the effect was Ps.6,537,960 and Ps.5,811,681, respectively. The effect recognized as a decrease in property, plant and equipment for the three-month period ended March 31, 2009 and for the year ended December 31, 2009 was Ps.12,082 and Ps.738,363, respectively.

Depreciation expense charged to results of operations for capitalized interest for the three-month period ended March 31, 2009 and the year ended December 31, 2009 was Ps.257,855 and Ps.1,030,128, respectively.

Capitalized interest is depreciated in an average term of seven years, which corresponds to the remaining estimated useful life of the plant.

**3. Deferred taxes**

This adjustment corresponds to the recomputation of deferred taxes, mainly for the following concepts:

- i) Adjustments derived from the adoption of IFRS that affected the carrying value of assets and liabilities,
- ii) The cancellation of deferred tax recognized only for the effects of translation of the financial statements of foreign entities in conformity with Mexican FRS, and
- iii) The recognition of a liability for deferred taxes derived from differences in statutory income tax rates between Mexico and certain foreign subsidiaries that at December 31, 2009, have dividends declared but not yet paid, that will give rise to tax payable at the time of payment, because the foreign rate is lower than the Mexican rate.

The total effect on deferred taxes aggregated Ps.2,006,289 at the transition date and Ps.2,147,084 and Ps.8,114,224 at March 31, 2009 and December 31, 2009, respectively. The effects for the three-month period ended March 31, 2009 and the year ended December 31, 2009 were Ps.140,795 and Ps.6,107,935, respectively, of which Ps.63,228 and Ps.1,037,504 were recorded in results of operations for the three-month period ended March 31, 2009 and the year ended December 31, 2009, respectively. The difference recognized in equity corresponds primarily to the cancellation of deferred taxes for the effects of translation of foreign subsidiaries.

**4. Labor Obligations**

The differences in the valuation of labor obligations between Mexican FRS and IFRS derive mainly from differences in plan assets and actuarial losses of the subsidiary in Puerto Rico. The effect at the date of transition of the accompanying financial statements was immaterial and for the three-month period ended March 31, 2009 and the year ended December 31, 2009, the effect is Ps.(102,063) and Ps.392,068, respectively. Such amounts were recognized in operating costs and expenses.

From the Company's subsidiaries in Ecuador and Mexico, which also have defined contribution and defined benefit plans, there were no significant differences.

In conformity with the labor legislation of the rest of the countries in which the Company operates, there are no statutory defined benefit plans or compulsory defined contribution structures for the companies in those countries. However, these companies do make contributions to national government social security and severance plans in accordance with the criteria established by the applicable labor laws. Expenses for these plans are recognized in results of operations in the year these benefits accrue.

**5. Other Adjustments Derived from the Adoption of IFRS**  
**Adjustment to the value of the license acquired by Telcel (a Mexican subsidiary)**

In 2006, a definitive ruling issued by the Federal Tax and the Administration Court in favor of one of Telcel established that:

- i) The consideration paid by Telcel to the Federal Government in the amount of Ps.116,422 as initial payment and additional payments of Ps.1,998,539 for the annual share of gross revenues derived from the 15-year extension (expiring in October 2015) to the concession originally granted by the Ministry of Communications and Transportation (SCT) in October 2000, was unjustified, since such considerations were determined based on a law that was no longer in force.
- ii) Telcel should in fact have made an one-time payment for the granting of the concession, in conformity with the applicable law at that time. On April 11, 2006, the SCT ordered a one-time modification to the amount of the consideration from Ps.116,422 to Ps.2,265,931, for the extension and modification of the concession granted.

For Mexican FRS purposes, the Company adjusted the value of the license to reflect the current status of the asset by recognizing the value of the concession granted by the Federal Government and its corresponding amortization through April 2006, based on the new value assigned by the SCT, increasing the net investment on such license by Ps.1,354,070 (Ps.2,265,931 in investment less Ps.838,151 in accumulated amortization less cancellation of the original net value of the license for Ps.73,710). The increase in the value of the license of Ps.2,149,509 was settled with a cash payment of Ps.150,970 and compensating of the additional payments for the annual share of gross revenues in the amount of Ps.1,998,539, which resulted a net credit to results of operations of Ps.1,203,100 included in other income, based on the adjusted investment value of the license.

For IFRS, the Company would only capitalize the amount paid in cash, as the compensation of the additional payments was made with the same entity and did not generate any cash flows. Furthermore, the amortization expense is not adjusted retrospectively; rather, the new net value of the license under IFRS is amortized over the remaining term of the license. The effects of the decrease in the value of the license in the statements of financial position at the date of transition and at March 31, 2009 and December 31, 2009 aggregated Ps.862,796, Ps.830,914 and Ps.735,270 respectively, and represented a decrease in amortization charged to results of operations for the three-month period ended March 31, 2009 and for the year ended December 31, 2009 of Ps.31,882 and Ps.127,526 respectively.

**6. Reclassifications**

**I) To the statement of financial position at the transition date and at March 31, 2009 and December 31, 2009**

**Loss on sale and lease back**

The loss on sale and lease back recognized for Mexican FRS purposes as a long-term deferred asset as part of the Other assets caption was recognized, for IFRS purposes, as part of the value of the telephone plant sold and leased back. The effect of this reclassification was a decrease in deferred assets and an increase in fixed assets at January 1, 2009, March 31, 2009 and December 31, 2009 of Ps.5,706,564, Ps.5,431,511 and Ps.3,503,068, respectively.

**Loyalty plans and point reward programs**

The liability at January 1, 2009, March 31, 2009 and December 31, 2009 for loyalty plans and point reward programs in the amount of Ps.745,464, Ps.809,767 and Ps.1,162,437 respectively, was reclassified from accounts payable and accrued liabilities to deferred revenues. Based on these plans, in conformity with international standards, such amounts must be considered as part of the measurement of revenues rather than as operating costs.

**II) To the statement of income for the three-month period ended March 31, 2009 and for the year ended December 31, 2009**

**Commissions to authorized distributors for post-paid plans**

Commissions for post-paid plans that the Company pays to its authorized distributors for initial activations, as well as variable loyalty commissions and commissions paid when dealers reach certain volumes of activation are recognized as a commercial expense under Mexican FRS. Under IFRS, such commissions are recognized as a decrease in sales. The amount of such reclassifications represented a decrease in the commercial, administrative and general expense caption of Ps.4,134,632 and Ps.17,121,713 for the three-month period ended March 31, 2009 and for the year ended December 31, 2009, respectively. Such amounts were deducted from service revenues to present the Company's net revenues as required under IFRS.

**Loyalty plans and point reward programs**

The commercial policy of certain subsidiaries is to grant loyalty plans and point reward programs to customers who meet certain characteristics. Company policy for the recognition of these programs is to recognize the amount of such rewards as a promotional expense at the time the customer accumulates a certain number of points, based on the previously established program terms and current prices.

Under the IFRS, these amounts must be considered in the measurement of revenues, since they basically represent an effective decrease in the sale price.

For the three-month period ended March 31, 2009 and for the year ended December 31, 2009, the effects of this reclassification in the amount of Ps.24,856 and Ps.108,210, respectively, were recognized in the accompanying financial statements by deducting the amounts from the costs and expenses in which they were originally recognized at the time the benefits were granted to the customer.

#### **Other expenses, net**

In conformity with IFRS, other expenses and income should be recorded as part of results of operations. For Mexican FRS purposes, this caption was presented separately after operating profit. The net reclassification in the statements of income for the three-month period ended March 31, 2009 and the year ended December 31, 2009 was Ps.467,011 and Ps.2,165,584, respectively.

#### **7. Exceptions and Exemptions in the Adoption of IFRS**

IFRS 1, *First-time adoption of International Financial Reporting Standards*, in force establishes certain exceptions and exemptions for first-time adopters regarding the general requirement of retrospectively applying IFRS at the date of transition. IFRS 1 establishes four mandatory exceptions and fourteen optional exemptions for entities to not retrospectively apply IFRS in the statement of financial position at the date of transition.

América Móvil is applying the mandatory exceptions with respect to the determination of estimates at the date of transition, the prospective application of the requirements of IAS 27, *Consolidated and Separate Financial Statements*, applicable to non-controlling interests as of the date of transition and the prospective application of the de-recognition of financial assets and liabilities. The mandatory exception regarding hedge accounting is not applicable to América Móvil's derivative financial instruments.

América Móvil adopted the following optional exemptions:

##### **i) Fair value or revaluation**

In conformity with IFRS 1, an entity may elect to measure an item of property, plant and equipment at the date of transition to IFRS at its fair value and to use that fair value as its deemed cost at that date .

A first-time adopter may elect to use a previous general accepted accounting principles revaluation of an item of property, plant and equipment at, or before, the date of transition to IFRS as deemed cost at the date of revaluation, if the revaluation was, at the date of the revaluation, broadly comparable to:

- (a) Fair value; or
- (b) Cost or depreciated cost in accordance with IFRS, adjusted to reflect, for example, changes in a general or specific price index. These elections are also available for intangible assets.

América Móvil has decided to use as deemed cost at the date of transition, the revalued cost of property, plant and equipment and intangible assets determined in conformity with Mexican FRS at December 31, 2008 (which includes the effects of inflation through December 31, 2007).

## **ii) Business combinations**

A first-time adopter may elect not to apply IFRS 3, *Business Combinations*, retrospectively to past business combinations (business combinations that occurred before the date of transition to IFRS).

América Móvil has decided to reflect in its financial statements business combinations prior to the date of transition, as they were recognized using the purchase method under Mexican FRS.

Acquisitions of non-controlling interests were recognized as equity transactions, since they refer to transactions between entities under common control, as established in Mexican FRS. IFRS permit the use of this method for the accounting of this type of transactions.

All acquisitions generated as of the transition date, that is, January 1, 2009, are recognized in conformity with IFRS 3, *Business Combinations*, which require, among others:

- a) Determine that the company acquired qualifies as a business
- b) Identify the buyer
- c) Determine the acquisition date
- d) Recognize the identifiable assets acquired, the liabilities assumed, and the non-controlling interest in the investee
- e) Compute the consideration paid
- f) Recognize goodwill acquired or the gain on the purchase after certain considerations.

From January 1, 2009 to March 31, 2010, América Móvil has had no business acquisitions or significant acquisitions of non-controlling interests.

Legal fees and other disbursements are not considered to form part of the consideration.

**iii) Cumulative effects of translation of foreign entities**

Under IAS 21, *The Effects of Changes in Foreign Exchange Rates*, an entity must:

- (a) to recognize some translation differences in other comprehensive income and accumulate these in a separate component of equity; and
- (b) on disposal of a foreign operation, to reclassify the cumulative translation difference for that foreign operation (including, if applicable, gains and losses on related hedges) from equity to profit or loss as part of the gain or loss on disposal.

However, a first-time adopter need not comply with this requirement for cumulative translation differences that existed at the date of transition to IFRS. If a first-time adopter uses this exemption:

- (a) The cumulative translation differences for all foreign operations are deemed to be zero at the date of transition to IFRS, and
- (b) The gain or loss on a subsequent disposal of any foreign operation shall exclude translation differences that arose before the date of transition to IFRS and shall include later translation differences .

América Móvil applied this exemption in its financial statements at the transition date. Therefore, it reclassified the cumulative translation effect from foreign entities determined in conformity with Mexican FRS to accumulated results in the amount of Ps.21,814,383. As of January 1, 2009, the Company determined the related translation effects in conformity with International Accounting Standard 21 (IAS 21).

**d) Basis of translation of financial statements of foreign subsidiaries**

The functional currency of the Company's foreign subsidiaries is the current currency of the country in which each subsidiary operates. The functional currency is translated into Mexican pesos, which is the reporting currency, as follows:

Balance sheet accounts, except for equity, are translated at the prevailing exchange rate at year-end; shareholders' equity accounts are translated at the prevailing exchange rate at the time capital contributions were made and earnings were generated; Income statement amounts were translated to Mexican pesos using the prevailing exchange rate at the end of the reporting period.

Translation differences resulting from the conversion process are recorded in equity in the caption "Effect of translation of foreign entities" .

Exchange rate variances derived from intercompany monetary items are included in the consolidated statements of income. None of the monetary items has been classified as a part of the America Movil's net investment in a foreign operation.

**e) Revenue recognition**

Revenues are recognized at the time services are provided and when the probability of their collection is reasonably assured. Mobile telecommunications services are provided either under prepaid (calling cards) or under contract (post-paid) or both. In all cases, airtime revenues are recognized as a customer uses the airtime or when the card expires in the case of prepayments or for unused airtime.

**Monthly rent**

Monthly basic rent under post-paid plans is billed in arrears based on the particular plan and package rates and corresponds to services already rendered, except in Mexico and Colombia, where basic monthly rent is billed one month in advance. Revenues are recognized at the time services are provided. Billed revenues for service not yet rendered are recognized as deferred revenues.

**Revenues from interconnection services with other operators**

Revenues from interconnection services, which consist of calls of other carriers that enter the Company's cellular network (incoming interconnection services), are recognized at the time the service is provided. Such services are billed based on rates previously agreed on with the other carriers.

This type of services is regulated by the telecommunications authorities of each of the countries in which the Company operates.

Interconnection costs represent the costs of outgoing calls from the Company's cellular networks to other carriers' networks, the costs of link-ups between fixed and cellular networks (for those areas in which there are no interconnection points between the mobile networks).

**Long-distance**

Long-distance charges refer to airtime used in receiving from or making calls to regions or coverage areas outside of the area where the customer service is activated. The related revenues are recognized at the time the service is provided.

**Domestic and international roaming service**

Roaming charges represent airtime charged to customers for making or receiving calls outside their coverage areas or abroad. The related revenues are recognized at the time the service is provided based on the rates agreed upon with other domestic and international carriers.

**Value added services and other services**

Value added services and other services include voice services and data transmission services (such as two-way and written messages, call information, ring tones, emergency services, among others). Revenues from such services are recognized at the time they are provided or when the downloaded service is used. Such revenues are recognized as gross revenues since the Company assumes the risks and benefits derived from the rendering of services.

**Sale of cellular equipment**

Sales of handsets and accessories, which for the most part are made to authorized distributors, are recorded as revenue when a) the products are delivered and accepted by the distributor, b) distributors do not have return right and c) probability of collection is reasonably assured. Discounts granted on the sale of cellular equipment to wholesalers, retailers and department store chains are recognized as reductions in the sales prices.

**Telephone line installation fees**

Revenues from telephone line installation fees (net of related costs) are deferred and recognized over the estimated average life of subscribers.

**Unused airtime balances**

These amounts are recognized as revenues only when the following conditions are met:

- a) The customer is no longer activated, or
- b) The balance has expired and the customer has not activated a new card or purchased pre-paid air time within the required dates.

**Discounts and commissions**

Discounts on the sale of cards and prepaid airtime are recognized at the time such discounts are granted and deducted from revenues at the time the cards or airtime are sold regardless of the time in which they are used. Commissions to distributors for prepaid plans, whether activation, loyalty or volume, are deducted from revenues.

Loyalty and sales volumes commissions are accrued on a monthly basis on the basis of statistical information regarding customer retention, sales volume and the number of acquired customers by each distributor.

Loyalty commissions are paid to distributors for customers that remain so for a specified period of time, and sales volumes commissions are paid at the time the distributor reaches certain ranges of activated customers.

**Point reward programs**

Point reward programs are recognized as a decrease in revenues, since they represent an actual decrease in the price of services or cellular equipment.

**f) Property, plant and equipment**

Property, plant and equipment acquired are recognized at cost. Depreciation is computed using the straight-line method based on the estimated useful lives of the related assets.

**g) Intangible assets**

**Licenses**

Licenses to operate wireless telecommunications networks are accounted for at cost which represents the amount paid for the consideration received, which in most cases is determined through a bidding process. Amortization is computed using the straight-line method based on the value of the assets. The amortization period is based on the terms of the licenses, which range from 15 to 40 years.

**Trademarks**

Trademarks are recorded at their fair values at the date of acquisition or business combination, as determined by independent appraisers, and are amortized using the straight-line method over a ten-year period.

**h) Impairment in the value of long-lived assets and goodwill**

Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount.

The Company determines the recoverable amount based on the value in use by determining the expected cash flows of the asset or cash-generating unit and by selecting an appropriate discount rate to compute the present value of cash flows.

Whenever the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and an impairment loss is recognized.

The impairment of goodwill is determined by assessing the recoverable amount of each cash-generating unit (or group of cash-generating units) to which the goodwill relates. Where the recoverable amount of the cash-generating unit is less than their carrying amount an impairment loss is recognized.

**i) Derivative financial instruments**

The Company uses derivative financial instruments to mitigate the risks related to fluctuations in exchange rates and interest rates. The changes in the fair value of these instruments are recognized in the income statement in the period in which they occur.

**3. Property, plant and equipment**

During the three-month periods ended March 31, 2010 and 2009, the Company acquired plant and telephone equipment and other infrastructure for approximately Ps.4,222,098 and Ps.10,642,554, respectively.

There have been no additions to fixed assets from business combinations and there were no significant disposal or transfers of assets during the above-mentioned periods.

**4. Derivative financial instruments**

To mitigate the risks of future increases in interest rates for the servicing of its long-term debt of Ps.173,065,747, the Company has entered into interest-rate swap contracts in over-the-counter transactions carried out with financial institutions from which the Company has obtained unsecured loans. The weighted average interest rate is 3.1%. The swap floating rate is the three-month Libor, six-month Euribor and 28-day TIE coinciding with the period of interest payments.

At December 31, 2010 and 2009, the financial instruments contracted by the Company are as follows:

Instrument	Amounts in thousands					
	2010		At March 31 2009		At December 31 2009	
	Notional amount	Fair value	Notional amount	Fair value	Notional amount	Fair value
<b>Cross Currency Swaps:</b>						
Swaps Dólar-Peso	US\$ 475,970	Ps. (382,318)			US\$ 146,965	Ps. (2,699)
Swaps Euro-Peso	140,386	(311,600)			82,000	24,578
Swaps Euro-Dólar	125,300	(100,413)	37,821	Ps. 16,158	142,821	106,637
Swaps Yen-Dólar	¥ 13,000,000	(14,471)			¥ 13,000,000	(27,181)
Forwards Dollar-Peso	US\$ 2,270,000	(1,056,740)	1,085,000	(392,279)	US\$ 1,965,000	(92,974)
<b>Total</b>		<b>Ps. (1,865,542)</b>		<b>Ps. (376,121)</b>		<b>Ps. 8,361</b>

With respect to the aforementioned derivative financial instruments, the valuation (loss) gain for the three-month periods ended March 31, 2010 and 2009 aggregated Ps.(2,173,358) and Ps.786,238, respectively, and was included in the statement of income as part of financing cost in the Other financing costs (income), net, caption.

Edgar Filing: AMERICA MOVIL SAB DE CV/ - Form 6-K

Except for the fixed-rate senior notes, interest rates on the Company's debts are subject to variances in international and local rates. The Company's weighted average cost of borrowed funds at March 31, 2010 was approximately 5.3%.

## Edgar Filing: AMERICA MOVIL SAB DE CV/ - Form 6-K

Such rate does not include interest, commissions or the reimbursements for Mexican tax withholdings (typically 4.9% of the interest payment) that the Company must make to international lenders. In general, fees on financing transactions add ten basis points to financing costs.

An analysis of the Company's short-term debt at March 31, 2010 and 2009 and December 31, 2010 is as follows:

	March 31		December 31
	2010	2009	2009
Domestic senior notes	Ps. 3,250,000	Ps. 1,966,789	Ps. 5,038,662

 Weighted average interest Rate	 4.48%	 6.82%	 7.61%

An analysis of maturities of the Company's long-term debt is as follows:

Year	Amount
2011	Ps. 3,140,689
2012	9,624,214
2013	9,807,090
2014	17,209,780
2015	22,878,032
2016 and thereafter	110,405,914
<b>Total</b>	<b>Ps. 173,065,719</b>

**Senior Notes** - At March 31, 2010, the Company has senior notes issued in U.S. dollars of USD 7,952 million (Ps.99,114 million) maturing from 2014 to 2040. The Company also had senior notes issued in Mexican pesos of Ps.41,316 million maturing in 2010 and 2036. During the first quarter of 2010, América Móvil has issued three new senior notes of USD 750 million, USD 2,000 million and USD 1,250 million.

All senior notes issued by América Móvil are guaranteed by Telcel.

**Lines of credit granted or guaranteed by export credit agencies** - The Company has medium- and long-term financing programs for the purchase of equipment, whereby certain institutions, to promote exports, provide financial support to purchase export equipment from their respective countries. The outstanding balance under these plans at March 31, 2010 is approximately Ps.19,645 million.

**Domestic senior notes** - At March 31, 2010, debt under domestic seniors aggregates Ps.28,444 million. In general, these placements bear a fixed or floating interest rate established as a percentage of the Mexican weighted interbank interest rate (TIIE). During the first quarter of 2010, América Móvil has issued three domestic senior notes: two of Ps.4,600 million, another of Ps.7,000 million, and a third senior note denominated in monetary investment units (UDIs) of 743 million (equal to Ps.3,301).

In addition to the above, the Company has two commercial paper programs authorized by the Mexican Banking and Securities Commission (CNBV) for a total amount of Ps.20,000 million.

#### **General**

At March 31, 2010, the Company has a number of bank facilities for approximately Ps.10,975 million (USD 881 million). Under all of the facilities, América Móvil and Telcel are the guarantors.

The Company is subject to financial and operating covenants under the loan agreements that limit its ability to pledge assets, carry out certain types of mergers, sell off all or substantially all of its assets and sell control over Telcel.

The covenants do not restrict the ability of the subsidiaries to pay dividends or other distributions to the Company. The most restrictive financial covenants require the Company to maintain a consolidated ratio of debt to EBITDA not greater than 4 to 1 and a consolidated ratio of EBITDA to interest expense of no less than 2.5 to 1 (based on the terms of the loan agreements). For some of its loans, Telcel is subject to financial covenants similar to those applicable to América Móvil.

A number of the financing instruments are subject to either acceleration or repurchase at the holder's option if there is a change in the Company's control. At March 31, 2010, the Company has complied with all of its loan covenants.

At March 31, 2010, approximately 91% of the América Móvil's total outstanding consolidated debt is guaranteed by Telcel.

#### **Subsequent Event**

On April 7, 2010, the Company received 230 million Swiss francs from the issuance of a bond maturing in 2015.

**6. Related Parties**

For the three-month periods ended March 31, 2010 and 2009, the Company conducted the following transactions with related parties (mainly with Teléfonos de México (Telmex) and Telmex Internacional):

	For the three-month period ended March 31	
	2010	2009
<b>Revenues:</b>		
Calling Party Pays interconnection service fees and Others	<b>Ps. 3,867,630</b>	Ps. 4,072,270
<b>Costs:</b>		
Payments for long-distance, circuits and others	<b>458,589</b>	547,019
Commercial, administrative, general and other expenses, Net	<b>184,297</b>	249,431

**7. Equity**

**Capital stock**

At December 31, 2009 and March 31, 2010, the Company's capital stock is Ps.26,747,265 and Ps.26,745,804, respectively.

**Dividends**

On April 20, 2009, the Company's shareholders approved payment of a cash dividend of Ps.0.30 pesos per Series AA, A and L shares, for a total dividend of Ps.9,812,319, to be paid in full on July 24, 2009 against coupon No. 25 of the titles that represent the Company's capital stock.

On December 1, 2009, the Company's shareholders approved payment of a cash dividend of Ps.0.50 pesos per Series AA, A and L shares, for a total distribution of Ps.16,166,730, to be paid in full on December 10, 2009 against coupon No. 26 of the titles that represent the Company's capital stock.

The aforementioned dividends were paid from the net tax profit account (CUFIN).

**Subsequent Event**

On April 7, 2010, the Company's shareholders approved payment of a cash dividend of Ps.0.32 pesos per share.

**8. Relevant Events**

On January 13, 2010, América Móvil announced that it intended to conduct two separate but concurrent offers to acquire outstanding shares of Telmex Internacional, S.A.B. de C.V. (hereinafter TII) and Carso Global Telecom, S.A.B. de C.V. (hereinafter CGT). TII provides a wide range of telecommunications services in Brazil, Colombia and other countries in Latin America. CGT is a holding company with controlling interests in TII and Telmex, a leading Mexican telecommunications provider.

The two offers consist of the following:

The CGT Offer. The consideration in the CGT Offer will consist of 2.0474 series América Móvil L shares for each share of CGT. If all shareholders of CGT participate in the CGT Offer, América Móvil will issue 7,129 million América Móvil L Shares for the CGT Offer.

The TII offer. The consideration in the TII Offer will consist of 0.373 América Móvil L Shares or \$ 11.66 pesos, at the election of the exchanging holder, for each share of TII. CGT has announced publicly that it will not participate in the TII Offer. If all shareholders of TII other than CGT participate in the TII Offer and elect to receive shares, América Móvil will issue 2,639 million AMX L Shares in the TII Offer. If all shareholders of TII other than CGT participate in the offer and elect to receive the cash consideration, América Móvil will pay \$ 82,495 million pesos (USD 6,317 million based on the December 31, 2009 exchange rate) in the TII Offer.

If the TII Offer and the CGT Offer are completed, América Móvil will acquire controlling interests in CGT, TII (directly and indirectly through CGT) and Telmex (indirectly through CGT). The principal purpose of the TII Offer and the CGT Offer is to pursue synergies between América Móvil's business and that of TII.

**9. Segments**

América Móvil operates primarily in one operating segment (cellular services); however, the Company has international telecommunications operations in Mexico, Guatemala, Nicaragua, Ecuador, El Salvador, Brazil, Argentina, Colombia, United States, Honduras, Chile, Peru, Paraguay, Uruguay, the Dominican Republic, Puerto Rico, Jamaica and Panama.

Company management analyzes the financial and operating information by geographical segment:

	Mexico (1)	Brazil	Southern Cone (2)	Colombia and Panama	Andean (3)	Central America (4)	U.S.A. (5)	Caribbean (6)	Dominican Republic	Eliminations	Consolidated total
