Eagle Materials Inc. and Subsidiaries

Notes to Unaudited Consolidated Financial Statements

June 30, 2010

(A) BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements as of and for the three month period ended June 30, 2010, include the accounts of Eagle Materials Inc. and its majority owned subsidiaries (the Company, us or we) and have been prepared by the Company, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission. These unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements and the notes thereto included in our Annual Report on Form 10-K filed with the Securities and Exchange Commission on May 27, 2010.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations, although we believe that the disclosures are adequate to make the information presented not misleading. In our opinion, all adjustments (consisting solely of normal recurring adjustments) necessary to present fairly the information in the following unaudited consolidated financial statements of the Company have been included. The results of operations for interim periods are not necessarily indicative of the results for the full year.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

We have changed the presentation of our income statement to more closely reflect the format used by other registrants in our industry. This change resulted in disclosure of consolidated revenues and cost of sales instead of by segment, and has included such subtotals as Earnings before Interest and Taxes and Earnings before Taxes, which are also consistent with the presentation of those of our competitors. Additionally, certain prior period reclassifications have been made to conform to the current period presentation.

We evaluated all events or transactions that occurred after June 30, 2010 through the filing of these financial statements.

Recent Accounting Pronouncements

There are no recent accounting pronouncements that we expect will materially impact our financial statements during the current fiscal year.

(B) CASH FLOW INFORMATION - SUPPLEMENTAL

Cash payments made for interest were \$8.6 million and \$9.0 million for the three months ended June 30, 2010 and 2009, respectively. Net payments made for federal and state income taxes during the three months ended June 30, 2010 and 2009, were \$1.4 and \$2.2 million, respectively.

(C) COMPREHENSIVE INCOME

Comprehensive income for the three month periods ended June 30, 2010 and 2009 was identical to net income for the same periods.

Table of Contents

As of June 30, 2010, we had an accumulated other comprehensive loss of \$3.5 million, in connection with recognizing the difference between the fair value of the pension assets and the projected benefit obligation.

(D) STOCKHOLDERS EQUITY

A summary of changes in stockholders equity follows:

		For the Three Months Ended June 30, 2010	
		(dollars in thousands)	
Common Stock			
Balance at Beginning of Period		\$	438
Stock Option Exercises			4
Balance at End of Period			442
Capital in Excess of Par Value			
Balance at Beginning of Period			14,723
Stock Compensation Expense			649
Stock Option Exercises			980
Balance at End of Period			16,352
Retained Earnings			
Balance at Beginning of Period			433,719
Dividends Declared to Stockholders			(4,416)
Net Earnings			10,527
Balance at End of Period			439,830
Accumulated Other Comprehensive Losses			
Balance at Beginning of Period			(3,518)
Balance at End of Period			(3,518)
Total Stockholders Equity		\$	453,106

There were no share repurchases during the three month period ended June 30, 2010. As of June 30, 2010, we have authorization to purchase an additional 717,300 shares.

(E) INVENTORIES

Inventories are stated at the lower of average cost (including applicable material, labor, depreciation, and plant overhead) or market, and consist of the following:

Edgar Filing: EAGLE MATERIALS INC - Form 10-Q

	As of

Property Taxes	4,637	3,976
Other	7,698	9,431
	\$ 35,270	\$ 44,044

(G) SHARE-BASED EMPLOYEE COMPENSATION

On January 8, 2004, our stockholders approved a new incentive plan (the Plan) that combined and amended the two previously existing stock option plans. In August 2009, our shareholders approved an amendment to the Plan which, among other things, increased the number of shares available for award under the Plan by 3 million shares. Under the terms of the Plan, we can issue equity awards, including stock options, restricted stock units (RSUs), restricted stock and stock appreciation rights (collectively, the Equity Awards) to employees of the Company and members of the Board of Directors. The Compensation Committee of our Board of Directors specifies the terms for grants of Equity Awards under the Plan.

Long-Term Compensation Plans -

Options. In May 2010, the Compensation Committee of the Board of Directors approved an incentive equity award of an aggregate of 163,000 performance-vesting stock options pursuant to the Plan to certain individuals that can be earned, in whole or in part, if certain performance conditions are satisfied (the Fiscal 2011 Stock Option Grant). The performance and vesting criteria for the Fiscal 2011 Stock Option Grant are based on the achievement of specified levels of operating earnings, as well as the achievement of certain safety and operational metrics, at each of our business segments for the fiscal year ending March 31, 2011. For those options earned based on the performance criteria, one third will vest immediately, one third will vest on March 31, 2012 and the final third will vest on March 31, 2013. The options have a term of ten years from the date of grant, and any options not earned at March 31, 2011 will be forfeited. These stock options were valued at the grant date using the Black-Scholes option pricing model. The weighted-average assumptions used in the Black-Scholes model to value the option awards in fiscal 2011 are as follows:

	Fiscal 2010
Dividend Yield	2.0%
Expected Volatility	42.3%
Risk Free Interest Rate	3.0%
Expected Life	7.0 years

Stock option expense for all outstanding stock option awards totaled approximately \$0.4 million and \$0.7 million for the three month periods ended June 30, 2010 and 2009, respectively. At June 30, 2010, there was approximately \$3.7 million of unrecognized compensation cost related to outstanding stock options, net of estimated forfeitures, which is expected to be recognized over a weighted-average period of 4.2 years.

Table of Contents

The following table represents stock option activity for the quarter ended June 30, 2010:

	Number of Shares	Weighted- Average Exercise Price
Outstanding Options at Beginning of Period	3,446,452	\$ 33.32
Granted	163,000	\$ 30.74
Exercised	(53,118)	\$ 13.60
Cancelled	(600)	\$ 37.13
Outstanding Options at End of Period	3,555,734	\$ 34.13
Options Exercisable at End of Period	1,944,959	
Weighted-Average Fair Value of Options Granted during the Period	\$ 11.85	

The following table summarizes information about stock options outstanding at June 30, 2010:

Range of Exercise Prices	Outstanding Options Weighted -			Exercisable Options	
	Number of Shares Outstanding	Average Remaining Contractual Life	Weighted - Average Exercise Price	Number of Shares Outstanding	Weighted - Average Exercise Price
\$ 7.27 - \$ 9.91	145,217	0.98	\$ 8.32	145,217	\$ 8.32
\$ 9.57 - \$ 13.43	341,932	2.50	\$ 12.35	341,932	\$ 12.35
\$ 21.52 - \$ 29.08	1,336,876	3.88	\$ 26.83	1,143,876	\$ 26.25
\$ 34.09 - \$ 40.78	315,670	3.44	\$ 37.83	245,770	\$ 38.13
\$ 47.53 - \$ 62.83	1,416,039	4.07	\$ 48.09	68,164	\$ 59.06
	3,555,734	3.67	\$ 34.13	1,944,959	\$ 25.12

At June 30, 2010, there was no intrinsic value for outstanding options. The aggregate intrinsic value of exercisable options at that date was approximately \$1.6 million. The total intrinsic value of options exercised during the three month period ended June 30, 2010 was approximately \$0.9 million.

Restricted Stock Units. In May 2010, the same employees receiving stock options also received an aggregate of 207,500 RSUs. The vesting criteria for the RSUs are the same as the vesting criteria for the Fiscal 2011 Stock Option Grant. The value of the RSUs, net of expected forfeitures, is being expensed ratably over three years. Expense related to RSUs was approximately \$0.1 million and \$0.8 million for the three-month periods ended June 30, 2010 and 2009, respectively. At June 30, 2010, there was approximately \$1.8 million of unearned compensation from RSUs, net of estimated forfeitures, which will be recognized over a weighted-average period of 2.9 years.

Restricted Stock. In May 2010, the Compensation Committee also approved the granting of an aggregate of 274,166 shares of restricted stock to certain key employees at both the corporate and subsidiary level that will be earned if our ten year average return on equity exceeds 17.25% at March 31, 2011. If this criterion is not met, all of the shares will be forfeited. If the criterion is met, the shares will be earned, but such shares will continue to have restrictions preventing the holder from selling, pledging, transferring or otherwise disposing of the shares until the holder satisfies the criteria for retirement.

Table of Contents

Retirement, as related to the restricted shares, is defined as the shortest time frame of the following: a) the holder reaches the age of 65 and has more than ten years service; b) expiration of five years from the date of grant, and the holder has more than 25 years of service; or c) fifteen years from the date of grant. The value of the restricted shares, net of estimated forfeitures, is being expensed over each individual grantee's retirement period. Expense related to restricted shares was \$0.2 million and \$0.1 million for the three-month period ended June 30, 2010 and 2009, respectively. At June 30, 2010, there was approximately \$7.0 million of unearned compensation from restricted stock, net of estimated forfeitures, which will be recognized over a weighted-average period of 7.6 years.

The number of shares available for future stock option, restricted stock unit, stock appreciation right and restricted stock grants under the Plan was 2,620,489 at June 30, 2010.

(H) COMPUTATION OF EARNINGS PER SHARE

The calculation of basic and diluted common shares outstanding is as follows:

	For the Three Months Ended June 30,	
	2010	2009
Weighted-Average Shares of Common Stock Outstanding	43,832,372	43,581,646
Common Equivalent Shares:		
Assumed Exercise of Outstanding Dilutive Options	1,657,584	971,073
Less Shares Repurchased from Assumed Proceeds of Assumed Exercised Options	(1,342,920)	(675,980)
Restricted Shares	75,848	119,850
Weighted-Average Common and Common Equivalent Shares Outstanding	44,222,884	43,996,589

At June 30, 2010 and 2009, 1,981,871 and 2,534,894 stock options, respectively, were excluded from the diluted earnings per share calculation, as their effect was anti-dilutive.

(I) PENSION AND EMPLOYEE BENEFIT PLANS

We sponsor several defined benefit and defined contribution pension plans which together cover substantially all our employees. Benefits paid under the defined benefit plans covering certain hourly employees are based on years of service and the employee's qualifying compensation over the last few years of employment.

The following table shows the components of net periodic cost for our plans:

	For the Three Months Ended June 30,	
	2010	2009
	(dollars in thousands)	
Service Cost	\$ 135	\$ 139
Benefits Earned during the Period		
Interest Cost of Benefit Obligations	256	251
Expected Return on Plan Assets	(206)	(279)
Recognized Net Actuarial Loss	194	77
Amortization of Prior-Service Cost	32	36

Edgar Filing: EAGLE MATERIALS INC - Form 10-Q

Net Periodic Pension Cost

\$ 411

\$ 224

Table of Contents**(J) INCOME TAXES**

Income taxes for the interim period presented have been included in the accompanying financial statements on the basis of an estimated annual effective tax rate. In addition to the amount of tax resulting from applying the estimated annual effective tax rate to pre-tax income, we will, when appropriate, include certain items treated as discrete events to arrive at an estimated overall tax amount. The effective tax rate for the three months ended June 30, 2010 was approximately 28%.

(K) CREDIT FACILITIES

Long-term debt consists of the following:

	As of	
	June 30, 2010	March 31, 2010
	(dollars in thousands)	
Bank Credit Facility	\$ 10,000	\$ 3,000
Senior Notes	285,000	300,000
Total Debt	295,000	303,000
Less Current Portion of Bank Credit Facility	(10,000)	
Long-term Debt	\$ 285,000	\$ 303,000

Bank Credit Facility -

We entered into a \$350.0 million credit facility on December 16, 2004. On June 30, 2006, we amended the Bank Credit Facility (the "Bank Credit Facility") to extend the expiration date from December 2009 to June 2011, and to reduce the borrowing rates and commitment fees. Borrowings under the Bank Credit Facility are guaranteed by all major operating subsidiaries of the Company. Outstanding principal amounts on the Bank Credit Facility bear interest at a variable rate equal to LIBOR, plus an agreed margin (ranging from 55 to 150 basis points), which is to be established quarterly based upon the Company's ratio of consolidated EBITDA, which is defined as earnings before interest, taxes, depreciation and amortization, to its consolidated indebtedness. Interest payments are payable monthly or at the end of the LIBOR advance periods, which can be up to a period of six months at the option of the Company. Our Bank Credit Facility contains customary covenants that restrict our ability to incur additional debt, encumber our assets, sell assets, make or enter into certain investments, loans or guaranties and enter into sale and leaseback arrangements. The Bank Credit Facility also requires us to maintain a consolidated funded indebtedness ratio (consolidated indebtedness to earnings before interest, taxes, depreciation and amortization) of 3.5 or less and an interest coverage ratio (consolidated earnings before interest and taxes to interest expense) of at least 2.5. The Bank Credit Facility also limits our ability to make certain restricted payments, such as paying cash dividends; however, there are several exceptions to this restriction, including: (i) the Company may pay cash dividends in an aggregate amount of up to \$50.0 million each fiscal year if no default exists or would result therefrom; and (ii) the Company may make restricted payments not otherwise permitted so long as no default would result therefrom and our consolidated funded indebtedness ratio does not exceed 3.0.

The Bank Credit Facility has a \$25 million letter of credit facility. Under the letter of credit facility, the Company pays a fee at a per annum rate equal to the applicable margin for Eurodollar loans in effect from time to time plus a one-time letter of credit fee in an amount equal to 0.125% of the initial stated amount. At June 30, 2010, we had \$9.2 million of letters of credit outstanding.

We have \$10 million of borrowings outstanding under the Bank Credit Facility at June 30, 2010, which have been classified as current as our Bank Credit Facility is scheduled to expire on June 30, 2011. We expect to have a new credit facility in place before the Bank Credit Facility expires on June 30, 2011. We currently have \$330.8 million of borrowings available under the Bank Credit Facility at June 30, 2010.

Table of Contents*Senior Notes -*

We entered into a Note Purchase Agreement on November 15, 2005 (the "2005 Note Purchase Agreement") related to our sale of \$200 million of senior, unsecured notes, designated as Series 2005A Senior Notes (the "Series 2005A Senior Notes") in a private placement transaction. The Series 2005A Senior Notes, which are guaranteed by substantially all of our subsidiaries, were sold at par and issued in three tranches on November 15, 2005. Since entering into the 2005 Note Purchase Agreement, we have repurchased \$22 million in principal of the Series 2005A Senior Notes. Following these repurchases, the amounts outstanding for each of the three tranches are as follows:

	Principal	Maturity Date	Interest Rate
Tranche A	\$ 38.6 million	November 15, 2012	5.25%
Tranche B	\$ 77.2 million	November 15, 2015	5.38%
Tranche C	\$ 62.2 million	November 15, 2017	5.48%

Interest for each tranche of Notes is payable semi-annually on May 15 and November 15 of each year until all principal is paid for the respective tranche.

We entered into an additional Note Purchase Agreement on October 2, 2007 (the "2007 Note Purchase Agreement") related to our sale of \$200 million of senior, unsecured notes, designated as Series 2007A Senior Notes (the "Series 2007A Senior Notes") in a private placement transaction. The Series 2007A Senior Notes, which are guaranteed by substantially all of our subsidiaries, were sold at par and issued in four tranches on October 2, 2007. Since entering into the 2007 Note Purchase Agreement, we have repurchased \$93 million in principal of the Series 2007A Senior Notes. Following the repurchase, the amounts outstanding for each of the four tranches are as follows:

	Principal	Maturity Date	Interest Rate
Tranche A	\$ 9.5 million	October 2, 2014	6.08%
Tranche B	\$ 11.0 million	October 2, 2016	6.27%
Tranche C	\$ 50.0 million	October 2, 2017	6.36%
Tranche D	\$ 36.5 million	October 2, 2019	6.48%

Interest for each tranche of Notes is payable semi-annually on April 2 and October 2 of each year until all principal is paid for the respective tranche.

Our obligations under the 2005 Note Purchase Agreement and the 2007 Note Purchase Agreement (collectively referred to as the "Note Purchase Agreements") and the Series 2005A Senior Notes and the Series 2007A Senior Notes (collectively referred to as the "Senior Notes") are equal in right of payment with all other senior, unsecured debt of the Company, including our debt under the Bank Credit Facility. The Note Purchase Agreements contain customary restrictive covenants, including covenants that place limits on our ability to encumber our assets, to incur additional debt, to sell assets, or to merge or consolidate with third parties, as well as certain cross covenants with the Bank Credit Facility. We were in compliance with all financial ratios and covenants at June 30, 2010.

Pursuant to a Subsidiary Guaranty Agreement, substantially all of our subsidiaries have guaranteed the punctual payment of all principal, interest, and Make-Whole Amounts (as defined in the Note Purchase Agreements) on the Senior Notes and the other payment and performance obligations of the Company contained in the Senior Notes and in the Note Purchase Agreements. We are permitted, at our option and without penalty, to prepay from time to time at least 10% of the original aggregate principal amount of the Senior Notes at 100% of the principal amount to be prepaid, together with interest accrued on such amount to be prepaid to the date of payment, plus a Make-Whole Amount. The Make-Whole Amount is computed by discounting the remaining scheduled payments of interest and principal of the Senior Notes being prepaid at a discount rate equal to the sum of 50 basis points and the yield to maturity of U.S. treasury securities having a maturity equal to the remaining average life of the Senior Notes being prepaid.

Table of Contents**(L) INTEREST EXPENSE**

The following components are included in interest expense, net:

	For the Three Months Ended June 30,	
	2010	2009
	(dollars in thousands)	
Interest (Income)	\$ (2)	\$ (17)
Interest Expense	4,454	4,733
Interest Expense - IRS	780	799
Other Expenses	58	118
Interest Expense, net	\$ 5,290	\$ 5,633

Interest income includes interest on investments of excess cash. Components of interest expense include interest associated with the Senior Notes, the Bank Credit Facility, commitment fees based on the unused portion of the Bank Credit Facility and interest accrued on our unrecognized tax benefits. Other expenses include amortization of debt issuance costs, and bank credit facility costs.

(M) FAIR VALUE OF FINANCIAL INSTRUMENTS

The fair value of our long-term debt has been estimated based upon our current incremental borrowing rates for similar types of borrowing arrangements. The fair value of our Senior Notes at June 30, 2010 is as follows:

	Fair Value (dollars in thousands)
Series 2005A Tranche A	\$ 39,372
Series 2005A Tranche B	78,358
Series 2005A Tranche C	61,889
Series 2007A Tranche A	9,916
Series 2007A Tranche B	11,583
Series 2007A Tranche C	52,125
Series 2007A Tranche D	37,230

All assets and liabilities which are not considered financial instruments have been valued using historical cost accounting. The carrying values of cash and cash equivalents, accounts and notes receivable, accounts payable and accrued liabilities approximate their fair values due to the short-term maturities of these assets and liabilities. The fair value of our Bank Credit Facility also approximates its carrying value at June 30, 2010.

(N) SEGMENT INFORMATION

Operating segments are defined as components of an enterprise that engage in business activities that earn revenues, incur expenses and prepare separate financial information that is evaluated regularly by our chief operating decision maker in order to allocate resources and assess performance.

We operate in four business segments: Gypsum Wallboard, Cement, Recycled Paperboard, and Concrete and Aggregates, with Gypsum Wallboard and Cement being our principal lines of business. These operations are conducted in the United States and include the mining of gypsum and the manufacture and sale of gypsum wallboard, mining of limestone and the manufacture, production, distribution and sale of portland cement (a basic construction material which is the essential binding ingredient in concrete), the manufacture and sale of recycled paperboard to the gypsum wallboard industry and other paperboard converters and the sale of readymix concrete and the mining and sale of aggregates (crushed stone, sand and gravel). These products are used primarily in commercial and residential construction, public construction

and projects to build, expand and repair roads and highways.

Table of Contents

We operate five gypsum wallboard plants, including the plant temporarily idled in Bernalillo, N.M., a gypsum wallboard distribution center, four cement plants, eleven cement distribution terminals, a recycled paperboard mill, nine readymix concrete batch plant locations and two aggregates processing plant locations. The principal markets for our cement products are Texas, northern Illinois (including Chicago), the Rocky Mountains, northern Nevada, and northern California. Gypsum wallboard and recycled paperboard are distributed throughout the continental United States. Concrete and aggregates are sold to local readymix producers and paving contractors in the Austin, Texas area and northern California.

We conduct one of our four cement plant operations, Texas Lehigh Cement Company LP in Buda, Texas, through a Joint Venture. For segment reporting purposes only, we proportionately consolidate our 50% share of the Joint Venture's revenues and operating earnings, which is consistent with the way management organizes the segments within the Company for making operating decisions and assessing performance.

We account for intersegment sales at market prices. The following table sets forth certain financial information relating to our operations by segment:

	For the Three Months Ended June 30, 2010 2009 (dollars in thousands)	
Revenues -		
Gypsum Wallboard	\$ 58,200	\$ 56,922

Table of Contents

Segment operating earnings, including the proportionately consolidated 50% interest in the revenues and expenses of the Joint Venture, represent revenues, less direct operating expenses, segment depreciation, and segment selling, general and administrative expenses. Corporate assets consist primarily of cash and cash equivalents, general office assets, miscellaneous other assets and unrecognized tax benefits. The segment breakdown of goodwill is as follows:

	As of	
	June 30, 2010	March 31, 2010
	(dollars in thousands)	
Gypsum Wallboard	\$ 116,618	\$ 116,618
Cement	8,359	8,359
Paperboard	7,538	7,538
	\$ 132,515	\$ 132,515

We perform our annual test of impairment on goodwill during the fourth quarter of our fiscal year. Due to the decline in operating earnings of the gypsum wallboard segment during the last year, and continuing into this year, we have performed an impairment test at the end of the first quarter for the gypsum wallboard assets and goodwill, noting that there was no impairment at this time. We will continue to test for any potential impairment on a quarterly basis throughout fiscal year 2011, or until conditions in the wallboard industry improve enough for us to determine that an impairment loss is not likely to occur.

Summarized financial information for the Joint Venture that is not consolidated is set out below (this summarized financial information includes the total amount for the Joint Venture and not our 50% interest in those amounts):

	For the Three Months Ended June 30,	
	2010	2010
	(dollars in thousands)	
Revenues	\$ 34,038	\$ 32,978
Gross Margin	\$ 14,120	\$ 15,718
Earnings Before Income Taxes	\$ 13,023	\$ 14,602

	As of	
	June 30, 2010	March 31, 2010
	(dollars in thousands)	
Current Assets	\$ 40,391	\$ 39,034
Non-Current Assets	\$ 35,615	\$ 37,993
Current Liabilities	\$ 11,277	\$ 11,247

(O) COMMITMENTS AND CONTINGENCIES

We have certain deductible limits under our workers' compensation and liability insurance policies for which reserves are established based on the undiscounted estimated costs of known and anticipated claims. We have entered into standby letter of credit agreements relating to workers compensation and auto and general liability self-insurance. At June 30, 2010, we had contingent liabilities under these outstanding letters of credit of approximately \$9.2 million.

Table of Contents

The following table compares insurance accruals and payments for our operations:

	As of and for the Three Months Ended June 30, 2010 2009 (dollars in thousands)	
Accrual Balances at Beginning of Period	\$ 6,384	\$ 5,794
Insurance Expense Accrued	754	977
Payments	(690)	(725)
Accrual Balance at End of Period	\$ 6,448	\$ 6,046

In the ordinary course of business, we execute contracts involving indemnifications standard in the industry and indemnifications specific to a transaction such as sale of a business. These indemnifications might include claims relating to any of the following: environmental and tax matters; intellectual property rights; governmental regulations and employment-related matters; customer, supplier, and other commercial contractual relationships; construction contracts and financial matters. While the maximum amount to which the Company may be exposed under such agreements cannot be estimated, it is the opinion of management that these indemnifications are not expected to have a material adverse effect on our consolidated financial position or results of operations. We currently have no outstanding guarantees.

We are currently contingently liable for performance under \$9.0 million in performance bonds required by certain states and municipalities, and their related agencies. The bonds are principally for certain reclamation obligations and mining permits. We have indemnified the underwriting insurance company against any exposure under the performance bonds. In our past experience, no material claims have been made against these financial instruments.

We have various litigation, commitments and contingencies in the ordinary course of business. Management believes that none of the litigation in which it or any subsidiary is currently involved is likely to have a material adverse effect on our consolidated financial condition or results of operations.

In June 2010, we received a Notice of Deficiency (Notice) (commonly referred to as a 90 Day Letter) of \$71.5 million of taxes and penalties for the fiscal years ended March 31, 2001 through 2006, inclusive, related to the IRS audit of the Republic Asset Acquisition. The Notice was in substantial agreement with our financial accruals including interest. The total amount related to the Notice, including interest, was approximately \$98.7 million, of which \$75 million had previously been deposited with the IRS. We deposited the remaining \$23.7 million with the IRS in July 2010 and asked the IRS to apply all \$98.7 million of deposits to the payment of the tax, penalties and interest. We intend to file refund claims with the IRS to recover all \$98.7 million and, in the event those refund claims are denied, we intend to file a lawsuit in Federal District Court to recover the requested refunds.

In the event we reach a settlement with the IRS through negotiation or in the courts, we will reverse any accrued interest and penalties in excess of the negotiated settlement through the Consolidated Statement of Earnings. In the event we are unable to negotiate a settlement, we believe we have a substantial basis for our tax position, and intend to vigorously contest the proposed adjustment in court. At this time, we are unable to predict with certainty the ultimate outcome or how much of the amounts paid for tax, interest, and penalties to the IRS and state taxing authorities will be recovered, if any.

Table of Contents**Item 2. Management's Discussion and Analysis of Results of Operations and Financial Condition**
EXECUTIVE SUMMARY

Eagle Materials Inc. is a diversified producer of basic building products used in residential, industrial, commercial and infrastructure construction. Information presented for the three month periods ended June 30, 2010 and 2009, respectively, reflects the Company's four business segments, consisting of Gypsum Wallboard, Cement, Recycled Paperboard and Concrete and Aggregates. Certain information for each of Concrete and Aggregates is broken out separately in the segment discussions.

We operate in cyclical commodity businesses that are directly related to the overall construction environment. Our operations, depending on each business segment, range from local in nature to national businesses. We have operations in a variety of geographic markets, which subject us to the economic conditions in each such geographic market as well as the national market. General economic downturns or localized downturns in the regions where we have operations could have a material adverse effect on our business, financial condition and results of operations. Our Wallboard and Paperboard operations are more national in scope and shipments are made throughout the continental U.S. Our cement companies are located in geographic areas west of the Mississippi river and the Chicago, Illinois metropolitan area. Due to the low value-to-weight ratio of cement, cement is usually shipped within a 150 mile radius of the plants by truck and up to 400 miles by rail; though the rising price of diesel fuel may further restrict the truck shipping radius. Concrete and aggregates are even more regional as those operations serve the areas immediately surrounding Austin, Texas and north of Sacramento, California. Cement, concrete and aggregates demand may fluctuate more widely because local and regional markets and economies may be more sensitive to changes than the national markets.

We conduct one of our cement operations through a joint venture, Texas Lehigh Cement Company LP, which is located in Buda, Texas (the Joint Venture). We own a 50% interest in the joint venture and account for our interest under the equity method of accounting. We proportionately consolidate our 50% share of the Joint Venture's revenues and operating earnings in the presentation of our cement segment, which is the way management organizes the segments within the Company for making operating decisions and assessing performance.

RESULTS OF OPERATIONS**Consolidated Results**

Table of Contents

Net Revenues. Revenues increased during the first quarter of fiscal 2011, as compared to fiscal 2010. The increase during the three months ended June 30, 2010, as compared to the same period in 2009, is primarily due to a 28% increase in revenues in our paperboard segment, partially offset by a 23% decline in revenues in our concrete and aggregates segment. Revenues for our two largest segments, gypsum wallboard and cement, were relatively flat, with only a slight increase. The increase in revenues in our paperboard segment was due primarily to increased average sales price and increased volume during the first quarter of fiscal 2011, as compared to the first quarter of fiscal 2010. The decrease in revenues from our concrete and aggregates segment was primarily due to decreases in concrete volumes, and decreases in average sales prices for both concrete and aggregates, as compared to the first quarter of fiscal 2010.

Other Income. Included in net revenues are other income, which consists of a variety of items that are non-segment operating in nature and includes non-inventoried aggregates income, gypsum wallboard distribution center income, asset sales and other miscellaneous income and cost items.

Operating Costs. Operating costs increased during the three month period ended June 30, 2010, as compared to the similar period in 2009, primarily due to increased sales volumes for all of our segments except concrete. Our paperboard segment had the largest increase in operating costs during the three month period ended June 30, 2010, as compared to 2009, primarily due to the increase in the cost of recycled fiber, the primary raw material in the production of paper.

Operating Earnings. Operating earnings decreased 13% to \$23.7 million for the quarter ended June 30, 2010, as compared to the three month period ended June 30, 2009, primarily due to increased operating expenses, as described above, and declines in average sales prices for all segments except recycled paperboard. The increase in operating expenses was partially offset by increased net revenues.

Corporate General and Administrative. Corporate general and administrative expense declined by 14% during the first quarter of fiscal 2011, as compared to the similar quarter in 2010. The decline in corporate general and administrative expense is due primarily to lower stock compensation and incentive compensation costs. RSUs with a one year vesting period, issued in August 2008 and fully vesting by August 2009, were the primary reason stock compensation expense was greater during the first quarter of fiscal 2010, as compared to the first quarter of fiscal 2011, while lower operating earnings during the quarter ended June 30, 2010, as compared to the same quarter in 2009, resulted in lower incentive compensation costs during the three month period ended June 30, 2010 as compared to the similar quarter ended in 2009.

Interest Expense, Net. Net interest expense decreased 6% to \$5.3 million for the first quarter of fiscal 2011, as compared to \$5.6 million for the first quarter of fiscal 2010. The decrease in expense is related primarily to our repurchase of \$15 million in private placement debt during April 2010, and lower average outstanding amounts under our Bank Credit Facility, resulting in lower average borrowings during the first quarter of fiscal 2011, as compared to the first quarter of fiscal 2010.

Income Taxes. The estimated effective tax rate for fiscal 2011 is 28% at June 30, 2010, as compared to 31% at June 30, 2009. The expected tax rate for the full fiscal year 2011 is also estimated to be 29%, as compared to an effective tax rate of 26% for fiscal 2010.

Net Earnings and Diluted Earnings per Share. Pre-tax earnings of \$14.7 million were 15% less than last year's first quarter pre-tax earnings of \$17.2 million. Net earnings of \$10.5 million decreased 12% from net earnings of \$11.9 million for last year's same quarter. Diluted earnings per share of \$0.24 were 11% less than the \$0.27 for last year's same quarter.

Table of Contents

The following table highlights certain operating information related to our four business segments:

	For the Three Months Ended June 30,		Percentage Change
	2010	2009	
	(In thousands except per unit)		
Revenues ⁽¹⁾			
Gypsum Wallboard	\$ 58,200	\$ 56,922	2%
Cement ⁽²⁾	62,462	62,100	1%
Recycled Paperboard	28,724	22,536	28%

Net Operating Earnings	\$ 23,660	\$ 27,119	(13%)

(1) Gross revenue, before freight and delivery costs.

(2) Includes proportionate share of our Joint Venture.

(3) Net of freight and delivery costs.

Gypsum Wallboard Operations. The increase in revenues during the three month period ended June 30, 2010, as compared to 2009, is due primarily to the slight increase in sales volume. Despite the increase in sales volume, the average net sales price decreased 2% during the first quarter of fiscal 2011, as compared to the first quarter of fiscal 2010, partially due to increased transportation costs. Operating earnings for gypsum wallboard increased during the first quarter of fiscal 2011, as compared to fiscal 2010, primarily due to lower operating expenses, namely natural gas and labor.

Cement Operations. Revenues increased during the three month period ended June 30, 2010, as compared to the similar period in 2009, primarily due to increased sales volumes, partially offset by lower average sales prices. The increase in sales volumes was consistent throughout all of our markets. Purchased cement sales increased to approximately 45,000 tons during the three month period ended June 30, 2010 as compared to approximately 27,000 tons during the three month period ended June 30, 2009, with the majority of the purchased cement sales occurring in our Texas market. Average sales prices declined in all markets during the three months ended June 30, 2010, as compared to 2009. The decline in average sales prices during the fiscal first quarter was primarily due to increased competitiveness in our markets. Operating

Edgar Filing: EAGLE MATERIALS INC - Form 10-Q

earnings declined during the first quarter of fiscal 2011, as compared to fiscal first quarter 2010 primarily due to the decline in average sales prices, partially offset by reduced operating expenses, namely parts, supplies and outside services, and electricity.

Table of Contents

Recycled Paperboard Operations. Net revenues increased 28% during the quarter ended June 30, 2010, as compared to the similar quarter in 2009, primarily due to the 5% increase in sales volume and a 20% increase in the average sales price. The increase in sales volume is primarily due to increased sales of non-gypsum paper. The increase in the average selling price per ton during the three month period ended June 30, 2010, as compared to the similar period in 2009, is primarily due to the price escalators in our long-term sales agreement. Despite the increase in net revenues, operating earnings decreased 25% in the first quarter of fiscal 2011, as compared to fiscal 2010, primarily due to decreases in the volume of higher margin gypsum paper sales and increases in the cost of recycled fiber, our primary raw material. Sales of gypsum paper represented 50% of our sales volume during the quarter ended June 30, 2009, as compared to 43% for the current quarter end. On a per ton basis, fiber costs increased approximately 150% during the first quarter of fiscal 2011, as compared to fiscal 2010.

Concrete and Aggregates Operations. The decline in revenue during the first quarter of fiscal 2011, as compared to fiscal 2010, was primarily due the decline in average sales prices for both concrete and aggregates, and the 25% decline in sales volumes for concrete, partially offset by increased sales volumes for aggregates. Although aggregate sales volumes increased, the average sales price declined due to increased sales of lower priced material. The decline in concrete volume is due to the poor economic conditions in our markets, especially northern California. The decrease in revenues was the primary reason for the decline in operating earnings during the first quarter of fiscal 2011, as compared to the first quarter of fiscal 2010.

GENERAL OUTLOOK

Calendar 2010 continues to be a very difficult year economically in the United States, and particularly in the building materials and construction products businesses. Despite the passage of the first time homebuyer tax credit, and the American Recovery and Reinvestment Act of 2009 (the Act), the full effects of infrastructure spending have not been achieved, and commercial and residential construction activity remains at cyclic low levels. The portion of the Act related to infrastructure is expected to have more impact in the latter half of calendar 2010 as more infrastructure projects are approved and funded. Although we anticipate the administration will continue to address the current financial crisis throughout calendar 2010, there can be no assurance as to the actual impact that these legislative initiatives, or any other similar governmental programs, will have on our business, financial condition or results of operations.

The U.S. wallboard industry continues to be adversely impacted by the current downturn in the residential and commercial construction markets, which has resulted in the industry continuing to operate at a utilization rate of approximately 50%. The reduction in capacity utilization continues to negatively impact gypsum wallboard pricing. We do not anticipate wallboard consumption to improve significantly during calendar 2010.

In response to the continued uncertainty of gypsum wallboard paper demand, our recycled paperboard segment continues to exercise sales opportunities in several other markets to ensure that our paper operation maximizes its operating earnings. Fiber prices, which climbed to an all time historical high in the latter part of fiscal 2010, remain elevated. This elevated price is largely the result of the expiration of the Black Liquor tax credit, the continued presence of export demand and increased demand for recycled containerboard products. It is anticipated that average recycled fiber prices will be greater this year than in fiscal 2010. The expected cost of natural gas, another significant cost component, is anticipated to remain consistent during fiscal 2011. Electrical costs will increase in fiscal 2011 as the refund credits received throughout fiscal 2010 (due to improperly allocated prior years trading margins and fuel surcharges) have expired. There is a base rate increase scheduled for review at the Oklahoma Corporation Commission in July 2010. Pending the outcome of that rate case, the production costs and operating earnings of our paperboard segment may be negatively impacted by increases in electrical costs later during fiscal 2011.

Table of Contents

Cement demand in all U.S. regions continues to be impacted by decreasing residential housing construction, the softening of the commercial construction market and the expanding state government budget deficits, which are expected to hinder cement consumption during the remainder of calendar 2010. Cement consumption in the U.S. declined approximately 4% during the first six months of calendar 2010, as compared to the first six months of calendar 2009. The U.S. cement industry reduced imports of foreign cement throughout the last several years as consumption declined; currently foreign cement comprised approximately 8% of total cement consumption through May 2010, which is consistent with the same period in 2009. We curtailed importing of cement the last several years; however, we expect to import more cement in fiscal 2011 than fiscal 2010, though total amounts are still expected to be low compared to historical levels. We are beginning to see some impact of the increased infrastructure spending as part of the stimulus package passed during the first quarter of calendar 2009, and expect an increase in consumption over the remainder of calendar 2010 due to the increased stimulus spending.

We expect concrete and aggregate sales volumes and sales prices to be depressed throughout the remainder of calendar 2010 in our markets as both residential and infrastructure spending remain soft. Impact from the stimulus bill most likely will not be realized until the latter half of calendar 2010; however, the amount of stimulus funds for our markets is not expected to be significant.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The preparation of financial statements in accordance with accounting principles generally accepted in the United States requires management to adopt accounting policies and make significant judgments and estimates to develop amounts reflected and disclosed in the financial statements. In many cases, there are alternative policies or estimation techniques that could be used. We maintain a thorough process to review the application of our accounting policies and to evaluate the appropriateness of the many estimates that are required to prepare our financial statements. However, even under optimal circumstances, estimates routinely require adjustment based on changing circumstances and the receipt of new or better information.

Information regarding our Critical Accounting Policies and Estimates can be found in our Annual Report. The four critical accounting policies that we believe either require the use of the most judgment, or the selection or application of alternative accounting policies, and are material to our financial statements, are those relating to long-lived assets, goodwill, environmental liabilities and accounts receivable. Management has discussed the development and selection of these critical accounting policies and estimates with the Audit Committee of our Board of Directors and with our independent registered public accounting firm. In addition, Note (A) to the financial statements in our Annual Report contains a summary of our significant accounting policies.

Recent Accounting Pronouncements

Refer to Note (A) in the Notes to Consolidated Financial Statements of this Form 10-Q for information regarding recently issued accounting pronouncements that may affect our financial statements.

LIQUIDITY AND CAPITAL RESOURCES

Table of Contents**Cash Flow.**

The following table provides a summary of our cash flows:

	For the Three Months Ended June 30, 2010 2009 (dollars in thousands)	
Net Cash Provided by Operating Activities	\$ 15,618	\$ 19,764
Investing Activities:		
Additions to Property, Plant and Equipment	(3,240)	(2,548)
Proceeds from Sale of Property, Plant and Equipment	600	
Net Cash Used in Investing Activities	(2,640)	(2,548)
Financing Activities:		
Excess Tax Benefits from Share Based Payment Arrangements	259	129
Increase (Decrease) in Notes Payable	7,000	(30,000)
Dividends Paid	(4,381)	(4,354)
Repayment of Senior Notes	(15,000)	
Proceeds from Stock Option Exercises	725	250
Net Cash Provided by (Used in) Financing Activities	(11,397)	(33,975)
Net Increase (Decrease) in Cash	\$ 1,581	\$ (16,759)

Cash flow from operating activities decreased by approximately \$4.0 million during the three month period ended June 30, 2010, as compared to the similar period in 2009, primarily due to a \$1.4 million decrease in net earnings and a decrease of approximately \$1.0 million in distributions from our joint venture. Use of cash from changes in operating assets and liabilities was relatively flat, increasing \$0.5 million during the three months ended June 30, 2010, as compared to the similar period in 2009.

Net cash used in investing activities during the three month period ended June 30, 2010 was consistent with the similar period in 2009. Although capital expenditures increased during the first quarter in fiscal 2011, as compared to fiscal 2010, we still expect capital expenditures for the full year of fiscal 2011 to be consistent with capital expenditures during fiscal 2010.

In June 2010, we received a Notice of Deficiency (Notice) (commonly referred to as a 90 Day Letter) of \$71.5 million of taxes and penalties for the fiscal years ended March 31, 2001 through 2006, inclusive, related to the IRS audit of the Republic Asset Acquisition. The Notice was in substantial agreement with our financial accruals, including interest. The total amount related to the Notice, including interest, was approximately \$98.7 million, of which \$75 million had previously been deposited with the IRS. We deposited the remaining \$23.7 million with the IRS in July 2010 and asked the IRS to apply all \$98.7 million of deposits to the payment of the tax, penalties and interest. We intend to file refund claims with the IRS to recover all \$98.7 million and, in the event those refund claims are denied, we intend to file a lawsuit in Federal District Court to recover the requested refunds. See Footnote (O) of the Unaudited Consolidated Financial Statements for additional information.

Net cash used in financing activities was \$11.4 million during the three month period ended June 30, 2010, as compared to net cash used in financing activities of \$34.0 million during the three month period ended June 30, 2009. The decrease in cash used in financing activities is primarily due to the reduction in debt repayments during the three months ended June 30, 2010, as compared to the similar period in 2009. Our debt-to-capitalization ratio and net-debt-to-capitalization ratio declined to 39.4% and 39.2%, respectively, at June 30, 2010, as compared to 40.5% and 40.4%, respectively, at March 31, 2010.

Working capital decreased to \$87.0 million at June 30, 2010, compared to \$89.4 million at March 31, 2010, primarily due to our classification of \$10.0 million owed under our Bank Credit Facility as

Table of Contents

current during the quarter ended June 30, 2010. The decrease in working capital due to the reclassification of the Bank Credit Facility was slightly offset by reduced accrued liabilities. We do not have any material contractual obligations related to long-term capital projects at June 30, 2010. We were in compliance at June 30, 2010 with all the terms and covenants of our credit agreements.

Given the relative weakness in the gypsum wallboard earnings over the last year and during the first quarter of this year, we determined it was necessary to perform an impairment test on the assets and goodwill of the gypsum wallboard segment. That impairment test was similar to the annual impairment test we perform each year during the first quarter of each calendar year. We estimated the fair value of the gypsum wallboard reporting unit using the income method, which consisted of estimating future earnings and cash flows, and discounting these to a single present value, which was compared to the carrying value. Based upon the above analysis, we noted that there was no impairment at this time. We will continue to assess the potential impairment throughout fiscal year 2011, or until conditions in the wallboard industry improve enough for us to determine that impairment loss is not likely to occur.

Debt Financing Activities.

Bank Credit Facility -

We entered into a \$350.0 million credit facility on December 16, 2004. On June 30, 2006, we amended the Bank Credit Facility (the "Bank Credit Facility") to extend the expiration date from December 2009 to June 2011, and to reduce the borrowing rates and commitment fees. Borrowings under the Bank Credit Facility are guaranteed by all major operating subsidiaries of the Company. Outstanding principal amounts on the Bank Credit Facility bear interest at a variable rate equal to LIBOR, plus an agreed margin (ranging from 55 to 150 basis points), which is to be established quarterly based upon the Company's ratio of consolidated EBITDA, which is defined as earnings before interest, taxes, depreciation and amortization, to its consolidated indebtedness. Interest payments are payable monthly or at the end of the LIBOR advance periods, which can be up to a period of six months at the option of the Company. Our Bank Credit Facility contains customary covenants that restrict our ability to incur additional debt, encumber our assets, sell assets, make or enter into certain investments, loans or guaranties and enter into sale and leaseback arrangements. The Bank Credit Facility also requires us to maintain a consolidated funded indebtedness ratio (consolidated indebtedness to earnings before interest, taxes, depreciation and amortization) of 3.5 or less and an interest coverage ratio (consolidated earnings before interest and taxes to interest expense) of at least 2.5. The Bank Credit Facility also limits our ability to make certain restricted payments, such as paying cash dividends; however, there are several exceptions to this restriction, including: (i) the Company may pay cash dividends in an aggregate amount of up to \$50.0 million each fiscal year if no default exists or would result therefrom; and (ii) the Company may make restricted payments not otherwise permitted so long as no default would result therefrom and our consolidated funded indebtedness ratio does not exceed 3.0.

We have \$10 million of borrowings outstanding under the Bank Credit Facility at June 30, 2010, which have been classified as current, as our Bank Credit Facility is scheduled to expire on June 30, 2011. We expect to have a new credit facility in place before the Bank Credit Facility expires on June 30, 2011. We currently have \$330.8 million of borrowings available under the Bank Credit Facility at June 30, 2010.

Table of Contents*Senior Notes*

We entered into a Note Purchase Agreement on November 15, 2005 (the 2005 Note Purchase Agreement) related to our sale of \$200 million of senior, unsecured notes, designated as Series 2005A Senior Notes (the Series 2005A Senior Notes) in a private placement transaction. The Series 2005A Senior Notes, which are guaranteed by substantially all of our subsidiaries, were sold at par and issued in three tranches on November 15, 2005. Since entering into the 2005 Note Purchase Agreement, we have repurchased \$22 million in principal of the Series 2005A Senior Notes. Following these repurchases, the amounts outstanding for each of the three tranches are as follows:

	Principal	Maturity Date	Interest Rate
Tranche A	\$ 38.6 million	November 15, 2012	5.25%
Tranche B	\$ 77.2 million	November 15, 2015	5.38%
Tranche C	\$ 62.2 million	November 15, 2017	5.48%

Interest for each tranche of Notes is payable semi-annually on May 15 and November 15 of each year until all principal is paid for the respective tranche.

We entered into an additional Note Purchase Agreement on October 2, 2007 (the 2007 Note Purchase Agreement) related to our sale of \$200 million of senior, unsecured notes, designated as Series 2007A Senior Notes (the Series 2007A Senior Notes) in a private placement transaction. The Series 2007A Senior Notes, which are guaranteed by substantially all of our subsidiaries, were sold at par and issued in four tranches on October 2, 2007. Since entering into the 2007 Note Purchase Agreement, we have repurchased \$93 million in principal of the Series 2007A Senior Notes. Following the repurchase, the amounts outstanding for each of the four tranches are as follows:

	Principal	Maturity Date	Interest Rate
Tranche A	\$ 9.5 million	October 2, 2014	6.08%
Tranche B	\$ 11.0 million	October 2, 2016	6.27%
Tranche C	\$ 50.0 million	October 2, 2017	6.36%
Tranche D	\$ 36.5 million	October 2, 2019	6.48%

Interest for each tranche of Notes is payable semi-annually on April 2 and October 2 of each year until all principal is paid for the respective tranche.

Our obligations under the 2005 Note Purchase Agreement and the 2007 Note Purchase Agreement (collectively referred to as the Note Purchase Agreements) and the Series 2005A Senior Notes and the Series 2007A Senior Notes (collectively referred to as the Senior Notes) are equal in right of payment with all other senior, unsecured debt of the Company, including our debt under the Bank Credit Facility. The Note Purchase Agreements contain customary restrictive covenants, including covenants that place limits on our ability to encumber our assets, to incur additional debt, to sell assets, or to merge or consolidate with third parties, as well as certain cross covenants with the Bank Credit Facility.

Other than the Bank Credit Facility, we have no other source of committed external financing in place. In the event the Bank Credit Facility were terminated, no assurance can be given as to our ability to secure a new source of financing. Consequently, if any balance were outstanding on the Bank Credit Facility at the time of termination, and an alternative source of financing could not be secured, it would have a material adverse impact on us. None of our debt is rated by the rating agencies.

Our Bank Credit Facility, under which we currently owe \$10.0 million, matures in June 2011. We believe our cash flows from operations provide us with sufficient liquidity and we believe current market conditions provide us with an opportunity to refinance the Bank Credit Facility before the maturity date.

Table of Contents

We do not have any off balance sheet debt, except for approximately \$12 million of operating leases, which have an average remaining term of approximately fifteen years. Also, we have no outstanding debt guarantees. We have available under the Bank Credit Facility a \$25 million Letter of Credit Facility. At June 30, 2010, we had \$9.2 million of letters of credit outstanding that renew annually. We are contingently liable for performance under \$9.0 million in performance bonds relating primarily to our mining operations.

We believe that our cash flow from operations and available borrowings under our Bank Credit Facility should be sufficient to meet our currently anticipated operating needs, capital expenditures and dividend and debt service requirements for at least the next twelve months. However, our future liquidity and capital requirements may vary depending on a number of factors, including market conditions in the construction industry, our ability to maintain compliance with covenants in our Bank Credit Facility, the level of competition and general and economic factors beyond our control. These and other developments could reduce our cash flow or require that we seek additional sources of funding. We cannot predict what effect these factors will have on our future liquidity.

Cash used for Share Repurchases.

The Company did not repurchase any of its shares during the three month period ended June 30, 2010. As of June 30, 2010, we had a remaining authorization to purchase 717,300 shares. Share repurchases may be made from time-to-time in the open market or in privately negotiated transactions. The timing and amount of any repurchases of shares will be determined by the Company's management, based on its evaluation of market and economic conditions and other factors.

Dividends.

Dividends paid were \$4.4 million for both the three months ended June 30, 2010 and 2009. Each quarterly dividend payment is subject to review and approval by our Board of Directors, who will continue to evaluate our dividend payment amount on a quarterly basis.

Capital Expenditures.

The following table compares capital expenditures:

	For the Three Months Ended June 30, 2010 2009 (dollars in thousands)	
Land and Quarries	\$	\$ 12
Plants	2,800	1,275
Buildings, Machinery and Equipment	440	1,261
 Total Capital Expenditures	 \$ 3,240	 \$ 2,548

For fiscal 2011, we expect capital expenditures of approximately \$15.0 to \$20.0 million. Historically, we have financed such expenditures with cash from operations and borrowings under our revolving credit facility.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to market risks related to fluctuations in interest rates on our Bank Credit Facility. From time-to-time we have utilized derivative instruments, including interest rate swaps, in conjunction with our overall strategy to manage the debt outstanding that is subject to changes in interest rates. At June 30, 2010 outstanding borrowings under the Bank Credit Facility totaled \$10.0 million. At present, we do not utilize derivative financial instruments.

We are subject to commodity risk with respect to price changes principally in coal, coke, natural gas and power. We attempt to limit our exposure to changes in commodity prices by entering into contracts or increasing use of alternative fuels.

Item 4. Controls and Procedures

We have established a system of disclosure controls and procedures that are designed to ensure that information relating to the Company, which is required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934 (Exchange Act), is recorded, processed, summarized and reported within the time periods specified by the SEC's rules and forms, and that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, in a timely fashion. An evaluation of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) was performed as of the end of the period covered by this quarterly report. This evaluation was performed under the supervision and with the participation of management, including our CEO and CFO. Based upon that evaluation, our CEO and CFO have concluded that these disclosure controls and procedures were effective.

Table of Contents

Part II. Other Information

ITEM 1A. RISK FACTORS

We are affected by the level of demand in the construction industry, which is currently experiencing a significant downturn.

Demand for our products is directly related to the level of activity in the construction industry, which includes residential, commercial and infrastructure construction. In particular, the downturn in residential construction and commercial construction has impacted, and will likely continue to adversely impact, our wallboard business. The residential construction industry is currently undergoing a significant downturn. The effects of this downturn have been exacerbated by market disruptions resulting from the subprime mortgage crisis, which began in the second half of 2007, and the ensuing financial crisis affecting the banking system and financial markets, which became evident in the third quarter of 2008. A similar downturn has occurred in commercial construction as well, beginning in 2008. Furthermore, activity in the infrastructure construction business is directly related to the amount of government funding available for such projects. Any decrease in the amount of government funds available for such projects or any decrease in construction activity in general (including a continued decrease in residential construction or continued weakening of commercial construction) could have a material adverse effect on our business, financial condition and results of operations.

Our customers participate in cyclical industries, which are subject to industry downturns.

A majority of our revenues are from customers who are in industries and businesses that are cyclical in nature and subject to changes in general economic conditions, including the current economic recession. In addition, since our operations are in a variety of geographic markets, our businesses are subject to the economic conditions in each such geographic market. General economic downturns or localized downturns in the regions where we have operations, including the current and any future downturns in the residential or commercial construction industries, generally have an adverse effect on demand for our products. Furthermore, additions to the production capacity of industry participants, particularly in the gypsum wallboard industry, have created an imbalance between supply and demand, which could continue to adversely affect the prices at which we sell our products and adversely affect the collectability of our receivables. In general, any further downturns in the industries to which we sell our products or any further increases in capacity in the gypsum wallboard, paperboard and cement industries could have a material adverse effect on our business, financial condition and results of operations.

Volatility and disruption of financial markets could affect access to credit.

The current difficult economic environment has caused a contraction in the availability, and increased the cost, of credit in the marketplace. This could potentially reduce the sources of liquidity for the Company and our customers.

Our business is seasonal in nature, and this causes our quarterly results to vary significantly.

A majority of our business is seasonal with peak revenues and profits occurring primarily in the months of April through November when the weather in our markets is more favorable to construction activity. Quarterly results have varied significantly in the past and are likely to vary significantly from quarter to quarter in the future. Such variations could have a negative impact on the price of our common stock.

Table of Contents

Our operations and our customers are subject to extensive governmental regulation, which can be costly and burdensome.

Our operations and those of our customers are subject to and affected by federal, state and local laws and regulations with respect to such matters as land usage, street and highway usage, noise level and health and safety and environmental matters. In many instances, various certificates, permits or licenses are required in order for us or our customers to conduct business or for construction and related operations. Although we believe that we are in compliance in all material respects with regulatory requirements, there can be no assurance that we will not incur material costs or liabilities in connection with regulatory requirements or that demand for our products will not be adversely affected by regulatory issues affecting our customers. In addition, future developments, such as the discovery of new facts or conditions, new or stricter laws or regulations (including without limitation, climate change legislation described below), or stricter interpretations of existing laws or regulations, may impose new liabilities on us, require additional investment by us or prevent us from opening or expanding plants or facilities, any of which could have a material adverse effect on our financial condition or results of operations.

Legislative and regulatory measures to address emissions of Green House Gasses (GHG s) are in various phases of discussions or implementation at the international, national, regional and state levels. On the federal level, legislation imposing restrictions on GHGs is under active consideration. Proposed legislation has passed the U.S. House of Representatives and legislation is pending in the U.S. Senate. Among other things, the bills would establish a cap on emissions of GHGs from certain industries in the United States, including cement manufacturing beginning in 2013. The bills would require these capped sources of GHG emissions to obtain GHG emission allowances corresponding to their annual emissions of GHGs.

In addition, the EPA is taking steps that would result in the regulation of GHGs as pollutants under the Clean Air Act. On September 22, 2009, the EPA issued a Mandatory Reporting of Greenhouse Gases final rule, which took effect December 29, 2009. This rule establishes a new comprehensive scheme requiring operators of stationary sources in the United States emitting more than established annual thresholds of GHGs to inventory and report their GHG emissions annually on a facility-by-facility basis. In addition, on December 15, 2009, the EPA published a final rule finding that current and projected concentrations of six key GHGs in the atmosphere threaten public health and welfare. This rule, according to EPA, will trigger construction and operating permit requirements for large stationary sources, including cement plants. In a final rule issued on May 13, 2010, known as EPA's Tailoring Rule, any modification or expansion of our existing plants (or construction of a new plant) after January 1, 2011 that triggers New Source Review (NSR) requirements for non-GHG emissions will also trigger NSR for GHG if our proposed GHG emissions exceed 75,000 tons per year. This would require the installation of controls on those GHG emissions. Effective July 1, 2011, any modification or expansion of our existing plants (or constructing a new plant) that results in an increase of our GHG emissions in excess of 100,000 tons per year will require NSR and the implementation of control requirements even if NSR is not triggered for any other pollutant. These limitations on emissions of GHGs from our equipment or operations could require us to incur costs to reduce such emissions and could ultimately affect our operations and our ability to obtain air permits for new or modified facilities.

The potential consequences of GHG emission reduction measures for our operations are potentially significant because (1) the cement manufacturing process requires the combustion of large amounts of fuel, (2) in our cement manufacturing process, the production of carbon dioxide is a byproduct of the calcination process, whereby carbon dioxide is removed from calcium carbonate to produce calcium oxide, and (3) our gypsum wallboard manufacturing process combusts a significant amount of fossil fuel, especially natural gas. At this time, it is not possible to accurately estimate how laws or regulations addressing GHG emissions would impact our business. Any imposition of raw materials or production limitations, fuel-use or carbon taxes, or emission limitations or reductions could have a significant impact on the cement manufacturing industry and the gypsum wallboard manufacturing industry and a material adverse effect on us and our results of operations.

Table of Contents

During 2009, the EPA also issued a proposed rule amendment to the National Emissions Standards for Hazardous Air Pollutants, or NESHAP, that would significantly reduce the permitted levels of emissions of certain air pollutants from Portland cement kilns. The NESHAP amendment would set limits on mercury emissions from existing Portland cement kilns and would increase the stringency of emission limits for new kilns. The NESHAP amendment would also set emission limits for total hydrocarbons, particulate matter and sulfur dioxide from cement kilns of all sizes and would reduce hydrochloric acid emissions from kilns that are large emitters. The NESHAP amendment, if adopted as proposed, would take full effect no earlier than 2013, and could materially increase capital costs and cost of production for the Company, and the industry as a whole.

The EPA recently released proposed regulations to address the storage and disposal of coal combustion products, which include fly ash and flue gas desulfurization gypsum (synthetic gypsum). We use synthetic gypsum in wallboard manufactured at our Georgetown, SC plant. In its release, the EPA is proposing two alternative regulations. Under one proposal, the EPA would characterize coal combustion products destined for disposal as a special waste under Subtitle C of the Resource Conservation and Recovery Act (RCRA), which is the Subtitle that regulates hazardous wastes. However, under this proposal, beneficial use of coal combustion products, including synthetic gypsum, would continue to be exempt under the Bevill Amendment and not warrant regulation. Under the other proposal, the EPA would continue to regulate coal combustion products under Subtitle D of RCRA, which regulates solid wastes that are not hazardous wastes. The EPA has emphasized that it does not wish to discourage the beneficial reuse of coal combustion products under either of its two proposals. Because the EPA s proposed regulations must go through a public comment period before becoming final, it is not possible to accurately predict the regulations that will be ultimately adopted. However, it is possible that EPA s rulemaking could affect our business, financial condition and results of operations, depending on how any such regulation affects our costs or the demand for our products utilizing synthetic gypsum.

We are subject to the risk of unfavorable weather conditions during peak construction periods and other unexpected operational difficulties.

Because a majority of our business is seasonal, unfavorable weather conditions and other unexpected operational difficulties during peak construction periods could adversely affect operating income and cash flow and could have a disproportionate impact on our results of operations for the full year.

Our products are commodities, which are subject to significant changes in supply and demand and price fluctuations.

The products sold by us are commodities and competition among manufacturers is based largely on price. Prices are often subject to material changes in response to relatively minor fluctuations in supply and demand, general economic conditions and other market conditions beyond our control. Increases in the industry s production capacity for products such as gypsum wallboard or cement or increases in cement imports tend to create an oversupply of such products and negatively impact product prices. There can be no assurance that prices for products sold by us will not decline in the future or that such declines will not have a material adverse effect on our business, financial condition and results of operations.

We may become subject to significant clean-up, remediation and other liabilities under applicable environmental laws.

Our operations are subject to state, federal and local environmental laws and regulations, which impose liability for cleanup or remediation of environmental pollution and hazardous waste arising from past acts. These laws and regulations also require pollution control and prevention, site restoration and operating permits and/or approvals to conduct certain of our operations. Certain of our operations may from time-to-time involve the use of substances that are classified as toxic or hazardous substances within

Table of Contents

the meaning of these laws and regulations. Additionally, any future laws or regulations addressing greenhouse gas emissions would likely have a negative impact on our business or results of operations, either through the imposition of raw material or production limitations, fuel-use or carbon taxes or emission limitations or reductions. We are unable to estimate accurately the impact on our business or results of operations of any such law or regulation at this time. Risk of environmental liability (including the incurrence of fines, penalties or other sanctions or litigation liability) is inherent in the operation of our businesses. As a result, it is possible that environmental liabilities and compliance with environmental regulations could have a material adverse effect on our operations in the future. See Item 1. Business Environmental Matters for more information on our regulatory and environmental matters.

Our results of operations are subject to significant changes in the cost and availability of fuel, energy and other raw materials.

Major cost components in each of our businesses are the cost of fuel, energy and raw materials. Significant increases in the cost of fuel, energy or raw materials or substantial decreases in their availability could materially and adversely affect our sales and operating profits. Prices for fuel, energy or raw materials used in connection with our businesses could change significantly in a short period of time for reasons outside our control. Prices for fuel and electrical power, which are significant components of the costs associated with our gypsum wallboard and cement businesses, have fluctuated significantly in recent years and are expected to increase in the future. In the event of large or rapid increases in prices, we may not be able to pass the increases through to our customers in full, which would reduce our operating margin.

Increases in interest rates could adversely affect demand for our products, which would have an adverse effect on our results of operations.

Our business is significantly affected by the movement of interest rates. Interest rates have a direct impact on the level of residential, commercial and infrastructure construction activity. Higher interest rates could result in decreased demand for our products, which would have a material adverse effect on our business and results of operations. In addition, increases in interest rates could result in higher interest expense related to borrowings under our credit facilities.

Our debt agreements contain restrictive covenants and require us to meet certain financial ratios and tests, which limit our flexibility and could give rise to a default if we are unable to remain in compliance.

Our amended and restated credit agreement and the note purchase agreements governing our senior notes contain, among other things, covenants that limit our ability to finance future operations or capital needs or to engage in other business activities, including our ability to:

Incur additional indebtedness;

Sell assets or make other fundamental changes;

Engage in mergers and acquisitions;

Pay dividends and make other restricted payments;

Make investments, loans, advances or guarantees;

Encumber the assets of the Company and its restricted subsidiaries;

Enter into transactions with our affiliates.

In addition, these agreements require us to meet and maintain certain financial ratios and tests, which may require that we take action to reduce our debt or to act in a manner contrary to our business objectives. Events beyond our control, including the severity and duration of the current industry downturn and changes in general business and economic conditions, may impair our ability to comply with these covenants or meet

Edgar Filing: EAGLE MATERIALS INC - Form 10-Q

those financial ratios and tests. A breach of any of these covenants or failure to maintain the required ratios and meet the required tests may result in an event of default under those agreements. This may allow the lenders under those agreements to declare all amounts outstanding

Table of Contents

thereunder to be immediately due and payable, terminate any commitments to extend further credit to us and pursue other remedies available to them under the applicable agreements. If this occurs, our indebtedness may be accelerated and we may not be able to refinance the accelerated indebtedness on favorable terms, or at all, or repay the accelerated indebtedness.

Our production facilities may experience unexpected equipment failures, catastrophic events and scheduled maintenance.

Interruptions in our production capabilities may cause our productivity and results of operations to decline significantly during the affected period. Our manufacturing processes are dependent upon critical pieces of equipment. Such equipment may, on occasion, be out of service as a result of unanticipated events such as fires, explosions, violent weather conditions or unexpected operational difficulties. We also have periodic scheduled shut-downs to perform maintenance on our facilities. Any significant interruption in production capability may require us to make significant capital expenditures to remedy problems or damage as well as cause us to lose revenue due to lost production time, which could have a material adverse effect on our results of operations and financial condition.

Significant changes in the cost and availability of transportation could adversely affect our business, financial condition and results of operations.

Some of the raw materials used in our manufacturing processes, such as coal or coke, are transported to our facilities by truck or rail. In addition, the transportation costs associated with the delivery of our wallboard products are a significant portion of the variable cost of our gypsum wallboard segment. Significant increases in the cost of fuel or energy can result in material increases in the cost of transportation which could materially and adversely affect our operating profits. In addition, reductions in the availability of certain modes of transportation such as rail or trucking could limit our ability to deliver product and therefore materially and adversely affect our operating profits.

Pension assets and costs associated with employee benefit plans generally are affected by economic and market conditions.

The current economic environment could negatively impact the fair value of pension assets, which could increase future funding requirements to our pension trusts. More generally, our costs are significantly affected by expenses related to our employee benefit plans. The recognition of costs and liabilities associated with these plans for financial reporting purposes is affected by assumptions made by management and used by actuaries engaged by us to calculate the projected and accumulated benefit obligations and the annual expense recognized for these plans. Economic and market factors and conditions could affect any of these assumptions and may affect our estimated and actual employee benefit plan costs and our results of operations.

Inflation and increases in interest rates could adversely affect our business and demand for our products, which would have an adverse effect on our results of operations.

Our business is significantly affected by the movement of interest rates. Interest rates have a direct impact on the level of residential, commercial and infrastructure construction activity by impacting the cost of borrowed funds to builders. Higher interest rates could result in decreased demand for our products, which would have a material adverse effect on our business and results of operations. In addition, increases in interest rates could result in higher interest expense related to borrowings under our credit facilities. Inflation can result in higher interest rates. With inflation, the costs of capital increase, and the purchasing power of our cash resources can decline. Current or future efforts by the government to stimulate the economy may increase the risk of significant inflation and its direct and indirect adverse impact on our business and results of operations.

Table of Contents

This report includes various forward-looking statements, which are not facts or guarantees of future performance and which are subject to significant risks and uncertainties.

This report and other materials we have filed or will file with the SEC, as well as information included in oral statements or other written statements made or to be made by us, contain or may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, Section 21E of the Exchange Act of 1934 and the Private Securities Litigation Reform Act of 1995. You can identify these statements by the fact that they do not relate to matters of a strictly factual or historical nature and generally discuss or relate to forecasts, estimates or other expectations regarding future events. Generally, the words believe, expect, intend, estimate, anticipate, project, may, could, might, will and similar expressions identify forward-looking statements, including statements related to expected operating and performing results, planned transactions, plans and objectives of management, future developments or conditions in the industries in which we participate, including future prices for our products, audits and legal proceedings to which we are a party and other trends, developments and uncertainties that may affect our business in the future.

Forward-looking statements are not historical facts or guarantees of future performance but instead represent only our beliefs at the time the statements were made regarding future events, which are subject to significant risks, uncertainties, and other factors, many of which are outside of our control. Any or all of the forward-looking statements made by us may turn out to be materially inaccurate. This can occur as a result of incorrect assumptions, changes in facts and circumstances or the effects of known risks and uncertainties. Many of the risks and uncertainties mentioned in this report or other reports filed by us with the SEC, including those discussed in the risk factor section of this report, will be important in determining whether these forward-looking statements prove to be accurate. Consequently, neither our stockholders nor any other person should place undue reliance on our forward-looking statements and should recognize that actual results may differ materially from those that may be anticipated by us.

All forward-looking statements made in this report are made as of the date hereof, and the risk that actual results will differ materially from expectations expressed in this report will increase with the passage of time. We undertake no obligation, and disclaim any duty, to publicly update or revise any forward-looking statements, whether as a result of new information, future events, changes in our expectations or otherwise.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds
