See Notes to Consolidated Financial Statements.

Table of Contents**FIRST DATA CORPORATION****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****(Unaudited)****Note 1: Basis of Presentation**

The accompanying Consolidated Financial Statements of First Data Corporation ("FDC" or the "Company") should be read in conjunction with the Company's Annual Report on Form 10-K for the year ended December 31, 2009. Significant accounting policies disclosed therein have not changed.

The accompanying Consolidated Financial Statements are unaudited; however, in the opinion of management, they include all normal recurring adjustments necessary for a fair presentation of the consolidated financial position of the Company at September 30, 2010, the consolidated results of its operations and comprehensive income (loss) for the three and nine months ended September 30, 2010 and 2009, the consolidated cash flows for the nine months ended September 30, 2010 and 2009 and the consolidated changes in equity for the nine months ended September 30, 2010 and 2009. Results of operations reported for interim periods are not necessarily indicative of results for the entire year due in part to the seasonality of certain business units.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the Consolidated Financial Statements and accompanying notes. Actual results could differ from these estimates.

Presentation

Effective January 1, 2010, the Integrated Payment Systems operating segment is being reported within All Other and Corporate. Results for 2009 have been adjusted to reflect the change. Results for 2009 also have been adjusted to reflect the impact of purchase accounting adjustments completed in December 2009 resulting from the final valuation of intangible assets associated with the Banc of America Merchant Services alliance. Other amounts in 2009 have also been adjusted to conform to current year presentation.

The Company sold a merchant acquiring business in Canada as well as a debit and credit card issuing and acquiring processing business in Austria, both reported within the International segment, in November 2009 and August 2009, respectively. The results of divested businesses are excluded from segment results. The International segment performance measures have been adjusted for 2009 to exclude the results of divested businesses.

Depreciation and amortization presented as a separate line item on the Company's Consolidated Statements of Operations does not include amortization of initial payments for new contracts which is recorded as a contra-revenue within Transaction and processing service fees. Also not included is amortization related to equity method investments which is netted within the Equity earnings in affiliates line. The following table presents the amounts associated with such amortization:

(in millions)	Three months ended		Nine months ended	
	September 30, 2010	September 30, 2009	September 30, 2010	September 30, 2009
Amortization of initial payments for new contracts	\$ 9.8	\$ 7.7	\$ 28.5	\$ 18.1
Amortization related to equity method investments	\$ 18.2	\$ 18.6	\$ 54.6	\$ 54.2

Revenue Recognition

Edgar Filing: FIRST DATA CORP - Form 10-Q

The Company recognizes revenues from its processing services as such services are performed. Revenue is recorded net of certain costs such as credit and offline debit interchange fees and assessments charged by credit card associations. Debit network fees related to acquired personal identification number based debit (PIN-debit) transactions are recognized in the Reimbursable debit network fees, postage and other revenue and expense lines of the Consolidated Statements of Operations. The following table presents the amounts associated with processing services revenue:

(in millions)	Three months ended		Nine months ended	
	September 30,		September 30,	
	2010	2009	2010	2009
Interchange fees and assessments	\$ 4,532.3	\$ 4,229.6	\$ 13,067.7	\$ 9,975.4
Debit network fees	\$ 713.6	\$ 565.3	\$ 2,027.1	\$ 1,448.7

Table of Contents**FIRST DATA CORPORATION****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(Unaudited)**

Comparability of the dollar amounts disclosed above is impacted by the formation of the Banc of America Merchant Services alliance on June 26, 2009. Information regarding the Banc of America Merchant Services transaction is included in Note 4 to the Consolidated Financial Statements in Item 8 of the Company's Annual Report on Form 10-K for the year ended December 31, 2009.

Income Taxes

On August 10, 2010, H.R. 1586 was signed into law. This legislation included a tax change that adversely affects the Company's ability to utilize foreign tax credits recorded on the Company's balance sheet. As a result, the Company recorded a valuation allowance against foreign tax credits of approximately \$178 million during the three months ended September 30, 2010.

New Accounting Guidance

In October 2009, the FASB revised its guidance on Revenue Recognition for Multiple-Deliverable Revenue Arrangements. The amendments in this update enable companies to separately account for multiple revenue-generating activities (deliverables) that they perform for their customers. Existing U.S. GAAP requires a company to use vendor-specific objective evidence (VSOE) or third-party evidence of selling price to separate deliverables in a multiple-deliverable arrangement. The update does allow for the use of an estimated selling price if neither VSOE nor third-party evidence is available. The update requires additional disclosures of information about an entity's multiple-deliverable arrangements. The requirements of the update apply prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010, although early adoption is permitted. The Company adopted the new guidance on January 1, 2010 and has no arrangements for which this adoption will have a material impact on its financial position and results of operations.

Note 2: Supplemental Financial Information*Supplemental Statement of Operations Information*

The following table details the components of Other income (expense) on the Consolidated Statements of Operations:

(in millions)	Three months ended September 30,		Nine months ended September 30,	
	2010	2009	2010	2009
Investment gains	\$ 0.5	\$ 1.6	\$ 2.3	\$ 0.9
Derivative financial instruments losses	(31.3)	(47.8)	(58.1)	(54.7)
Divestitures, net	(1.3)	(19.6)	18.7	(20.5)
Non-operating foreign currency (losses) and gains	(20.2)	(18.7)	17.8	4.0
Other				5.5
Other income (expense)	\$ (52.3)	\$ (84.5)	\$ (19.3)	\$ (64.8)

Supplemental Cash Flow Information

During the nine months ended September 30, 2010 and 2009, the principal amount of the Company's senior PIK (Payment In-Kind) notes increased \$362.5 million and \$333.0 million, respectively, resulting from the payment of accrued interest expense.

During the nine months ended September 30, 2010 and 2009, the Company entered into capital leases totaling approximately \$50 million and \$101 million, respectively.

Edgar Filing: FIRST DATA CORP - Form 10-Q

In March 2009, the remaining balance of the Company's 9.875% senior unsecured cash-pay term loan bridge loans due 2015 that was not previously exchanged was exchanged for senior notes. There was no expenditure, other than professional fees incurred in connection with the Exchange Offering itself, or receipt of cash associated with this exchange.

On June 26, 2009, the Company entered into an alliance with Bank of America N.A. and Rockmount Investments, LLC (Rockmount) as discussed in Note 4 to the Consolidated Financial Statements in Item 8 of the Company's Annual Report on Form 10-K for the year ended December 31, 2009. The Company's and Bank of America N.A.'s direct contributions to the alliance consisted of non-cash assets and liabilities.

On August 10, 2009, the Company launched a registered exchange offer to exchange aggregate principal amounts of \$3.2 billion of its 10.55% senior PIK notes, \$2.5 billion of its 11.25% senior subordinated notes and \$1.6 billion of its 9.875% senior notes (which constituted all such notes outstanding at that date) for publicly tradable notes having substantially identical terms and guarantees,

Table of Contents**FIRST DATA CORPORATION****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(Unaudited)**

except that the exchange notes are freely tradable. Substantially all of the notes were exchanged effective September 9, 2009. There was no expenditure, other than professional fees incurred in connection with the Registration Statement itself, or receipt of cash associated with this exchange.

Refer to Note 9 of these Consolidated Financial Statements for information concerning the Company's stock-based compensation plans.

Note 3: Restructuring*Restructuring charges and reversal of restructuring accruals*

The Company recorded restructuring charges comprised of severance totaling \$33.4 million and \$76.8 million for the three and nine months ended September 30, 2010, respectively. The Company also recorded charges related to facility closures totaling \$0.5 million for the nine months ended September 30, 2010.

A summary of net pretax benefits (charges), incurred by segment, for each period is as follows (in millions):

	Approximate Number of Employees	Pretax Benefit (Charge)				Totals
		Retail and Alliance Services	Financial Services	International	All Other and Corporate	
Three months ended September 30, 2010

The first quarter 2010 restructurings resulted from the Company aligning the business with strategic objectives as well as domestic site consolidations. The second and third quarter 2010 restructurings resulted from actions similar to the first quarter as well as the termination of certain management positions across the organization including the reorganization of executive officers. Similar initiatives are expected to occur in future periods resulting in additional restructuring charges. Partially offsetting the charges were reversals of excess 2008 and 2009 restructuring accruals as well as reversals resulting from the refinement of 2010 estimates.

The following table summarizes the Company's utilization of restructuring accruals for the period from January 1, 2010 through September 30, 2010 (in millions):

Edgar Filing: FIRST DATA CORP - Form 10-Q

	Employee Severance	Facility Closure

FIRST DATA CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(Unaudited)

The restructurings in the first quarter of 2009 resulted from the elimination of a select number of management and other positions as part of the Company's cost saving initiatives. The second and third quarter 2009 restructurings resulted from similar actions as in the first quarter in the International segment and domestic restructurings resulted from site consolidations and the elimination of certain information technology positions. The Company incurred additional charges throughout 2009 and in 2010 related to these initiatives. Partially offsetting the charges were reversals of 2009 and 2008 restructuring accruals related to the Company's change in strategy related to global labor sourcing initiatives as well as reversals resulting from the refinement of previously recorded estimates.

Note 4: Borrowings

Senior secured credit facilities

On August 10, 2010, FDC amended its senior secured credit facilities to, among other things:

(i) allow for FDC to incur additional secured indebtedness or additional unsecured indebtedness so long as (a) 100% of the net cash proceeds is used to repay FDC's term loans or is offered on a pro rata basis to FDC's term loan lenders of a particular class or classes in exchange for a like amount of term loans of such class or classes (and the term loans so exchanged are cancelled) or (b) if such indebtedness is secured by a lien junior to the liens securing the obligations under FDC's senior secured credit facilities, the aggregate principal amount shall not exceed \$3,500,000,000 at any time and the net cash proceeds of such indebtedness shall be used to redeem or repay FDC's senior or senior subordinated notes or (c) the amount available to be borrowed under the uncommitted incremental facilities is reduced by an amount equal to the aggregate principal amount of such indebtedness;

(ii) exclude from the calculation of consolidated senior secured debt (and hence from the maintenance covenant) certain indebtedness secured by a lien ranking junior to the liens securing FDC's obligations under its senior secured credit facilities; and

(iii) subject to the requirement to make such offers on a pro rata basis to all lenders within a particular class of loans, allow FDC to agree with individual lenders to extend the maturity of their term loans or revolving commitments, and for FDC to pay increased interest rates or otherwise modify the terms of their loans or revolving commitments in connection with such an extension.

Table of Contents

FIRST DATA CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(Unaudited)

The amendment became effective, including the changes to the credit agreement described above, on August 20, 2010 following FDC's issuance of \$510.0 million in new notes and using the net cash proceeds therefrom to prepay a like amount of FDC's secured term loans. Refer to the Senior secured notes section below. The Company recorded \$26.8 million in fees in conjunction with the debt modification. The fees were recorded as a discount on the senior secured term loans and will be amortized to interest expense over the remaining life of the loans.

Senior secured revolving credit facility

FDC's senior secured revolving credit facility currently has commitments from nondefaulting financial institutions to provide \$1,769.4 million of credit. Up to \$500 million of FDC's senior secured revolving credit facility is available for letters of credit, of which \$51.6 million and \$39.6 million of letters of credit were issued under the facility as of September 30, 2010 and December 31, 2009, respectively. FDC had \$20.0 million outstanding against this facility as of September 30, 2010 and no amount outstanding as of December 31, 2009. As of September 30, 2010, \$1,697.8 million remained available under this facility after considering the amount outstanding and the letters of credit issued under the facility.

Senior secured term loan facility

The terms of FDC's senior secured term loan facility require FDC to pay equal quarterly installments in aggregate annual amounts equal to 1% of the original principal amount. During the three and nine months ended September 30, 2010, FDC paid \$32.1 million and \$96.2 million, respectively, of principal payments on the senior secured term loan facility in accordance with this provision (\$29.8 million and \$89.3 million, respectively, related to the U.S. dollar denominated loan and \$2.3 million and \$6.9 million, respectively, related to the euro denominated loan for the three and nine months ended September 30, 2010). During the three and nine months ended September 30, 2009, FDC paid \$32.3 million and \$96.7 million, respectively, of principal payments on the senior secured term loan facility in accordance with this provision (\$29.8 million and \$89.3 million, respectively, related to the U.S. dollar denominated loan and \$2.5 million and \$7.4 million, respectively, related to the euro denominated loan for the three and nine months ended September 30, 2009).

In August 2010, in conjunction with the debt modification noted above, \$489.7 million of the Company's proceeds from the issuance of the senior notes described below were used to prepay a portion of the principal balances and satisfy the above described future quarterly principal payments of the Company's senior secured term loans. As a result of the prepayment, the Company has satisfied the quarterly principal payments related to these loans until September 2014.

Senior secured notes

On August 20, 2010, FDC issued \$510.0 million of 8.875% senior secured notes due August 15, 2020. Interest on the notes is payable on February 15 and August 15 of each year, commencing on February 15, 2011. The proceeds from this issuance, net of discount and underwriting fees of \$17.8 million, were \$492.2 million, of which \$489.7 million was used to prepay a portion of the senior secured term loans in accordance with the terms of FDC's senior secured credit facilities as described above with the remainder used to pay costs associated with the issuance.

FDC may redeem the notes, in whole or in part, at any time prior to August 15, 2015 at a price equal to 100% of the principal amount of the notes redeemed plus accrued and unpaid interest to the redemption date and an additional premium as defined. Thereafter, FDC may redeem the notes, in whole or in part, at established redemption prices, plus accrued and unpaid interest to the redemption date. In addition, on or prior to August 15, 2013, FDC may redeem up to 35% of the notes with the net cash proceeds from certain equity offerings at established redemption prices plus accrued and unpaid interest to the redemption date.

The notes are guaranteed by substantially all domestic, wholly-owned subsidiaries of FDC. The notes are equally and ratably secured on a first-priority basis with all existing and future obligations of FDC under any existing and future first lien obligations by all of the assets of FDC and its subsidiary guarantors that secure the senior secured credit facility, subject to permitted liens. The notes rank equal in right of payment with all existing and future senior indebtedness of FDC but are effectively senior to all of FDC and guarantor subsidiaries unsecured indebtedness to the extent of the value of the collateral and are senior in right of payment to any subordinated indebtedness of FDC. The notes are effectively subordinated to any obligations secured by liens permitted under the indenture for the notes and structurally subordinated to any

Edgar Filing: FIRST DATA CORP - Form 10-Q

existing and future indebtedness and liabilities of non-guarantor subsidiaries, including all foreign subsidiaries.

Other short-term borrowings

FDC had approximately \$525 million and \$565 million available under short-term lines of credit and other arrangements with foreign banks and alliance partners primarily to fund settlement activity as of September 30, 2010 and December 31, 2009, respectively. These arrangements are primarily associated with international operations and are in various functional currencies, the most significant of which are the euro, Australian dollar and Polish zloty. Certain of these arrangements are uncommitted (approximately \$134 million and \$186 million) but FDC had \$101.2 million and \$100.1 million of borrowings outstanding against them as of September 30, 2010 and December 31, 2009, respectively. The total amounts outstanding against short-term lines of credit and other arrangements were \$113.6 million and \$109.2 million as of September 30, 2010 and December 31, 2009, respectively.

Table of Contents**FIRST DATA CORPORATION****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(Unaudited)****Senior PIK notes due 2015**

The terms of FDC's senior PIK notes due 2015 require that interest on the notes up to and including September 30, 2011 be paid entirely by increasing the principal amount of the outstanding notes or by issuing senior PIK notes. During the three months ended September 30, 2010 and 2009, the Company increased the principal amount of these notes by \$185.9 million and \$167.8 million, respectively, in accordance with this provision. During the nine months ended September 30, 2010 and 2009, the Company increased the principal amount of these notes by \$362.5 million and \$333.0 million, respectively.

Other

In June 2010, FDC paid off its 4.50% notes due 2010 for \$13.1 million.

Note 5: Segment Information

For a detailed discussion of the Company's principles regarding its operating segments refer to Note 16 to the Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2009.

Effective January 1, 2010, the Integrated Payment Systems operating segment is being reported within All Other and Corporate. Results for 2009 have been adjusted to reflect the change. Results for 2009 also have been adjusted to reflect the impact of purchase accounting adjustments completed in December 2009 resulting from the final valuation of intangible assets associated with the Banc of America Merchant Services alliance. Other amounts in 2009 have also been adjusted to conform to current year presentation.

The following tables present the Company's operating segment results for the three and nine months ended September 30, 2010 and 2009:

Note 6: Redeemable Noncontrolling Interests

For a detailed discussion of the Banc of America Merchant Services, LLC (BAMS) transaction as well as the Company's redeemable noncontrolling interests, refer to Notes 4 and 13 to the Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2009.

Rockmount owned a 5% non-voting interest in BAMS. The Company owned a 40% noncontrolling interest in Rockmount. In May 2010, the third party owning a controlling interest in Rockmount exercised a put right on Rockmount's beneficial interest in BAMS requiring net cash payments from FDC of \$213 million. The redemption amount was based on Rockmount's capital account balance in BAMS immediately prior to the redemption with an additional adjustment paid by the Company and Bank of America N.A. based on the level of BAMS revenues for the trailing 12 month period ended March 31, 2010. After redemption by Rockmount, the Company owns 51% of BAMS and Bank of America N.A. owns 49%.

The following table presents a summary of the redeemable noncontrolling interests activity for the nine months ended September 30, 2010 (in millions):

Balance at December 31, 2009	\$ 226.9
Distributions	(19.3)
Share of income	26.4

Transfers from noncontrolling interest:	
Decrease in FDC's paid-in capital for loss recognized from purchase of noncontrolling interest	(2.5)
Transfers from noncontrolling interest	(2.5)
Change in net loss attributable to FDC and transfers from noncontrolling interest	\$ (845.1)

Table of Contents**FIRST DATA CORPORATION****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(Unaudited)****Note 7: Commitments and Contingencies**

The Company is involved in various legal proceedings. Accruals have been made with respect to these matters, where appropriate, which are reflected in the Company's consolidated financial statements. The Company may enter into discussions regarding settlement of these matters, and may enter into settlement agreements, if it believes settlement is in the best interest of the Company. The matters discussed below, if decided adversely to or settled by the Company, individually or in the aggregate, may result in liability material to the Company's financial condition and/or results of operations.

Legal

On July 2, 2004, a class action complaint was filed against the Company, its subsidiary Concord EFS, Inc., and various financial institutions. Plaintiffs claim that the defendants violated antitrust laws by conspiring to artificially inflate foreign ATM fees that were ultimately charged to ATM cardholders. Plaintiffs seek a declaratory judgment, injunctive relief, compensatory damages, attorneys' fees, costs and such other relief as the nature of the case may require or as may seem just and proper to the court. Five similar suits were filed and served in July, August and October 2004 (referred to collectively as the "ATM Fee Antitrust Litigation").

On August 3, 2007, Concord EFS, Inc. filed a motion for summary judgment seeking to dismiss plaintiffs' *per se* claims, arguing that there are procompetitive justifications for the ATM interchange. On March 24, 2008, the Court entered an order granting the defendants' motions for partial summary judgment, finding that the claims raised in this case would need to be addressed under a "Rule of Reason" analysis. On February 2, 2009, the Plaintiffs filed a Second Amended Complaint, which was dismissed by the Court on September 4, 2009. On October 16, 2009, the Plaintiffs filed a Third Amended Complaint. On June 21, 2010, the Court granted dismissal of such complaint as to the single-brand aftermarket derivative theory and ordered the parties to brief a summary judgment regarding Plaintiffs' alternative all ATM networks relevant market theory claim. On September 16, 2010, the Court entered an order granting the defendants' motion for summary judgment, dismissing all of the claims against the defendants except for the claims for equitable relief and later, on September 17, 2010, granted final judgment dismissing the case to allow plaintiffs to pursue an appeal. On October 14, 2010, the plaintiffs appealed the summary judgment.

The Company continues to believe the complaints are without merit and intends to vigorously defend them.

Other

In the normal course of business, the Company is subject to claims and litigation, including indemnification obligations to purchasers of former subsidiaries. Management of the Company believes that such matters will not have a material adverse effect on the Company's results of operations, liquidity or financial condition.

Note 8: Employee Benefit Plans

The following table provides the components of net periodic benefit expense for the Company's defined benefit pension plans:

(in millions)	Three months ended		Nine months ended	
	September 30,		September 30,	
	2010	2009	2010	2009
Service costs	\$ 0.8	\$ 1.0	\$ 2.4	\$ 4.8

Edgar Filing: FIRST DATA CORP - Form 10-Q

Interest costs	10.0	10.1	29.8	27.8
Expected return on plan assets	(10.1)	(9.5)	(30.1)	(26.0)
Amortization	0.6	(0.2)	1.7	1.5
Net periodic benefit expense	\$ 1.3	\$ 1.4	\$ 3.8	\$ 8.1

The Company estimates pension plan contributions for 2010 to be approximately \$33 million. During the nine months ended September 30, 2010, approximately \$24 million was contributed to the United Kingdom plan and no contributions were made to the U.S. plan.

Note 9: Stock Compensation Plans

Total stock-based compensation expense recognized in the Selling, general and administrative line item of the Consolidated Statements of Operations resulting from stock options, non-vested restricted stock awards and non-vested restricted stock units are as follows:

(in millions)	Three months ended		Nine months ended	
	September 30,		September 30,	
	2010	2009	2010	2009
Total stock-based compensation expense (pretax)	\$ 4.4	\$ 4.7	\$ 10.9	\$ 13.8

Table of Contents**FIRST DATA CORPORATION****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(Unaudited)**Stock Options

In May 2010, the Company modified the terms of time based options and performance based options outstanding under the stock incentive plan established by First Data Holdings, Inc. (Holdings), which owns 100% of FDC's equity interests, for management employees of FDC (stock plan). The modifications only affected active employees as of the modification date. The exercise price on previously granted time based options was reduced from \$5 to \$3. The Company is continuing to recognize expense on these options based on the original grant date fair value amortized over the remaining original vesting schedule. Due to the nature of the call rights associated with the time based options, subsequent to the modification, which expire 180 days after certain employment termination events or the latter of September 24, 2012 or a qualified public offering, the incremental stock option fair value from the change in exercise price will only be recognized upon such events. Prior to the modifications, the call rights expired 180 days after certain employment termination events or the earlier of September 24, 2012 or a change in control. In addition, outstanding performance based options were cancelled and reissued. The reissued performance based options have an exercise price of \$3 and a tiered vesting schedule that provides for vesting of 25%, 75% or 100% of the options if the Company achieves certain EBITDA targets in any fiscal year between January 1, 2010 and December 31, 2013. The performance based options have call rights similar to the time based options described above. Due to the call rights, the Company will only recognize expense on the performance based options upon a qualified public offering or certain employment termination events. In conjunction with the above noted modifications, stock plan participants also received a cash bonus payment in the second quarter of 2010 totaling \$7.8 million.

During the nine months ended September 30, 2010 additional time based and performance based options were granted under the stock plan. The time based options granted vest equally over a three to five year period and performance based options vest based upon the Company achieving the EBITDA targets discussed above. The options granted have call rights similar to those described above and, as a result, the Company will only recognize expense on these options upon a qualified public offering or certain employment termination events.

As of September 30, 2010 there was approximately \$111 million of total unrecognized compensation expense, net of estimated forfeitures, related to non-vested stock options. Approximately \$35 million will be recognized over a weighted-average period of approximately 3.2 years while approximately \$76 million will only be recognized upon a qualified public offering or certain termination events.

The fair value of Holdings stock options granted for the nine months ended September 30, 2010 were estimated at the date of grant using a Black-Scholes option pricing model with the following weighted-average assumptions (excluding the effect of stock plan modifications):

	Nine months ended September 30, 2010
Risk-free interest rate	3.22%
Dividend yield	
Volatility	51.67%
Expected term (in years)	7
Fair value of stock	\$ 3
Fair value of options	\$ 2

A summary of Holdings stock option activity for the nine months ended September 30, 2010 is as follows (options in millions):

	Options	2010 Weighted-Average Exercise Price
Outstanding at January 1	67.1	\$ 5
Granted ^(a)	42.5	\$ 3

Edgar Filing: FIRST DATA CORP - Form 10-Q

Cancelled / Forfeited ^(a)	(43.2)	\$	5
Outstanding at September 30	66.4	\$	3

- (a) The number of options granted and cancelled/forfeited includes performance based options cancelled and reissued in connection with the stock plan modifications discussed above.

Table of Contents**FIRST DATA CORPORATION****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(Unaudited)****Restricted Stock Awards and Restricted Stock Units**

Restricted stock awards were granted under the stock plan during the nine months ended September 30, 2010. The restrictions on the awards granted in May 2010 will lapse upon a qualified public offering, a change in control or certain employment termination or liquidity events. As such, the Company is not recognizing expense on awards granted subsequent to the modifications described above. The Company is continuing to recognize expense on the restricted stock awards granted prior to May 2010 based on the original grant date fair value amortized over the remaining original vesting schedule. As of September 30, 2010 there was approximately \$26 million of total unrecognized compensation expense, net of estimated forfeitures, related to restricted stock. Approximately \$2 million will be recognized over a weighted-average period of approximately 2.7 years while approximately \$24 million will only be recognized upon a qualified public offering or certain termination events. A summary of Holdings restricted stock award and restricted stock unit activity for the nine months ended September 30, 2010 is as follows (awards/units in millions):

	2010 Awards/Units	Weighted-Average Grant-Date Fair Value
Non-vested at January 1	1.5	\$ 5
Granted	7.8	\$ 3
Cancelled / Forfeited	(0.9)	\$ 4
Non-vested at September 30	8.4	\$ 3

Note 10: Investment Securities

The majority of the Company's investment securities are a component of the Company's settlement assets and represent the investment of funds received by FDC from the sale of payment instruments (official checks and financial institution money orders) by authorized agents. The Company's investment securities included in current settlement assets primarily include discounted commercial paper, time deposits and corporate bonds. The Company's long-term settlement assets are comprised primarily of student loan auction rate securities (SLARS). Realized gains and losses on investments classified as settlement assets are recorded in the Product sales and other line item of the Consolidated Statements of Operations. The Company carried other investments including equity securities and shares of a money market fund which are carried at fair value and included in the Other current assets and Other long-term assets line items of the Consolidated Balance Sheets. Realized gains and losses on these investments are recorded in the Other income (expense) line item of the Consolidated Statements of Operations described in Note 2.

Table of Contents**FIRST DATA CORPORATION****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(Unaudited)**

The principal components of the Company's investment securities are as follows (in millions):

	Cost ^(a)	Gross Unrealized Gain	Gross Unrealized (Loss) excluding OTTI ^(b)	OTTI Recognized in OCI ^{(b)(c)}	Fair Value ^(d)
September 30, 2010					
Student loan auction rate securities	\$ 372.8		\$ (27.9)	\$	\$ 344.9
Corporate bonds	50.2	\$ 0.2			50.4

Totals	\$ 806.0	\$ 0.9	\$ (29.8)	\$ (14.9)	\$ 762.2

(a) Represents amortized cost for debt securities.

(b) OTTI refers to other-than-temporary impairments.

(c) Represents the fair value adjustment for debt securities excluding that attributable to credit losses.

(d) Represents cost for cost method investments.

The following table presents the gross unrealized losses and fair value of the Company's investments with unrealized losses, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position (in millions):

Edgar Filing: FIRST DATA CORP - Form 10-Q

	Less than 12 months		More than 12 months		Total	Total
	Fair	Unrealized	Fair	Unrealized	Fair Value	Unrealized
	Value	Losses	Value	Losses		Losses
September 30, 2010						
Student loan auction rate securities			\$ 344.9	\$ (27.9)	\$ 344.9	\$ (27.9)
Corporate bonds ^(a)	\$ 10.6				\$ 10.6	
	Less than 12 months		More than 12 months		Total	Total
	Fair	Unrealized	Fair	Unrealized	Fair Value	Unrealized
	Value	Losses	Value	Losses		Losses
December 31, 2009						
Student loan auction rate securities			\$ 449.7	\$ (44.7)	\$ 449.7	\$ (44.7)

(a) Unrealized losses less than 12 months are less than \$50,000.

As of September 30, 2010, the Company's unrealized losses related to the following:

Student loan auction rate securities - The unrealized losses resulted from securities that have decreased in fair value to below their amortized cost primarily due to the current inability to redeem at par value resulting from the failure of the auction mechanisms. The Company believes that the SLARS currently held will recover all of their principal value by their maturity date due to the following:

the securities are comprised primarily of senior tranches;

Table of Contents**FIRST DATA CORPORATION****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(Unaudited)**

the securities are predominantly backed by collateral that is 97%-98% guaranteed by Federal Family Education Loan Program (FFELP) with subordinated tranches covering the non-guaranteed portion;

the securities have loan to collateral value ratios of 100% or greater for all securities;

the securities have above investment grade credit ratings with the majority of securities rated at A3 and A- or higher by Moody's and Standard and Poor's, respectively.

The Company does not currently intend to sell the SLARS and does not consider it more likely than not that it will be required to sell the SLARS before the recovery of their amortized cost basis and accordingly no credit losses have been recorded. This determination was based on management's expectation as to when certain related settlement liabilities will need to be funded and the Company's ability to use its revolving credit facility in the event the settlement liabilities need to be funded before the SLARS are liquid.

During the third quarter of 2010, the Company received proceeds of \$85.3 million for its entire holdings in the NextStudent SLARS as a result of the liquidation through public sale of the underlying collateral of the securities. The Company realized a loss of \$2.8 million on the liquidation in addition to an other-than-temporary impairment of \$0.3 million recognized during the first quarter of 2010.

All of the above investments, with the exception of cost method investments, are classified as available-for-sale. The Company uses specific identification to determine the cost of a security sold and the amount of gains and losses reclassified out of other comprehensive income (OCI) into the Consolidated Statements of Operations. Unrealized gains and losses on investments carried at fair value were included as a separate component of OCI, net of any related tax effects.

The following table presents additional information regarding available-for-sale securities (in millions):

	For the three months ended September 30,		For the nine months ended September 30,	
	2010	2009	2010	2009
Proceeds from sales ^(a)	\$ 113.1	\$ 34.0	\$ 134.3	\$ 52.4
Gross realized gains included in earnings as a result of sales ^(a)	\$ 1.2	\$	\$ 6.2	\$ 0.1
Gross realized (losses) included in earnings as a result of sales ^(a)	\$ (3.3)	\$ (0.6)	\$ (3.6)	\$ (0.7)
Net unrealized gains or (losses) included in OCI, net of tax	\$ 6.6	\$ 2.3	\$ 12.4	\$ 9.7
Net gains or (losses) reclassified out of OCI into earnings	\$ 2.4	\$ (0.3)	\$ 2.2	\$ (0.3)

(a) Includes activity resulting from sales, redemptions, liquidations and related matters. Gains and losses are recorded in the Product sales and other or Other income (expense) line items of the Consolidated Statements of Operations.

The following table presents maturity information for the Company's investments in debt securities at September 30, 2010 (in millions):

	Fair Value
Due within one year	\$ 60.2
Due after one year through five years	10.6
Due after five years through 10 years	29.4

Edgar Filing: FIRST DATA CORP - Form 10-Q

Due after 10 years	315.7
Total debt securities	\$ 415.9

The Company also maintained investments in non-marketable securities, held for strategic purposes (collectively referred to as cost method investments) which are carried at cost and included in Other long-term assets in the Company's Consolidated Balance Sheets. These investments are evaluated for impairment upon an indicator of impairment such as events or changes in circumstances that may have a significant adverse effect on the fair value of the investment. As of September 30, 2010 there were no indicators of impairment. Where there are no indicators of impairment present, the Company estimates the fair value for the cost method investments only if it is practicable to do so. As of September 30, 2010, it was deemed impracticable to estimate the fair value on \$19.2 million of cost method assets due to the lack of sufficient data upon which to develop a valuation model and the excessive costs of obtaining an independent valuation in relation to the size of the investments. Realized pretax gains and losses associated with these investments are recognized in the Other income (expense) line item of the Consolidated Statements of Operations described in Note 2.

FIRST DATA CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(Unaudited)

Note 11: Derivative Financial Instruments

Risk Management Objectives and Strategies

The Company is exposed to various financial and market risks, including those related to changes in interest rates and foreign currency exchange rates, that exist as part of its ongoing business operations. The Company utilizes certain derivative financial instruments to enhance its ability to manage these risks.

As of September 30, 2010, the Company uses derivative instruments to mitigate (i) cash flow risks with respect to changes in interest rates (forecasted interest payments on variable rate debt), (ii) to protect the initial net investment in certain foreign subsidiaries and/or affiliates with respect to changes in foreign currency exchange rates and (iii) to protect the Company from foreign currency exposure related to an outsourcing contract with a foreign vendor.

Derivative instruments are entered into for periods consistent with related underlying exposures and do not constitute positions independent of those exposures. The Company applies strict policies to manage each of these risks, including prohibition against derivatives trading, derivatives market-making or any other speculative activities. Although certain derivatives do not qualify for hedge accounting, they are maintained for economic hedge purposes and are not considered speculative.

The Company's policy is to minimize its cash flow and net investment exposures related to adverse changes in interest rates and foreign currency exchange rates. The Company's objective is to engage in risk management strategies that provide adequate downside protection.

Accounting for Derivative Instruments and Hedging Activities

The Company recognizes all derivatives in the Other long-term assets, Other current liabilities and Other long-term liabilities captions in the Consolidated Balance Sheets at their fair values. The Company has designated certain of its interest rate swaps as cash flow hedges of forecasted interest rate payments related to its variable rate debt and certain of its cross currency swaps as a foreign currency hedge of its net investment in a foreign subsidiary. Other interest rate swaps, cross currency swaps and forward contracts on various foreign currencies no longer qualify or have not been designated as accounting hedges and do not receive hedge accounting treatment.

With respect to derivative instruments that are afforded hedge accounting, the effective portion of changes in the fair value of a derivative that is designated and qualifies as a cash flow hedge is recorded in OCI and reclassified into earnings in the same period or periods during which the hedged transaction affects earnings. Changes in the fair value of a net investment hedge that qualifies for hedge accounting are recorded as part of the cumulative translation adjustment in OCI. Any ineffectiveness associated with the aforementioned cash flow hedges is recorded immediately in the Consolidated Statements of Operations.

The Company formally documents all relationships between hedging instruments and the underlying hedged items, as well as its risk management objective and strategy for undertaking various hedge transactions. This process includes linking all derivatives that are designated as cash flow hedges to forecasted transactions and net investment hedges to the underlying investment in a foreign subsidiary or affiliate. The Company formally assesses, both at inception of the hedge and on an ongoing basis, whether the hedge is highly effective in offsetting changes in cash flows or foreign currency exposure of the underlying hedged items. The Company also performs an assessment of the probability of the forecasted transactions on a periodic basis. If it is determined that a derivative ceases to be highly effective during the term of the hedge or if the forecasted transaction is no longer probable, the Company will discontinue hedge accounting prospectively for such derivative.

Credit Risk

Edgar Filing: FIRST DATA CORP - Form 10-Q

The Company is monitoring the financial stability of its derivative counterparties. Certain of these counterparties received support from the federal government in the recent past due to difficult financial conditions. Although these counterparties remain highly-rated (in the A category or higher), their ability to satisfy their commitments may be dependent on receiving continued support from the federal government. The credit risk inherent in these agreements represents the possibility that a loss may occur from the nonperformance of a counterparty to the agreements. The Company performs a review at inception of the hedge, as circumstances warrant, and at least on a quarterly basis of the credit risk of these counterparties. The Company also monitors the concentration of its contracts with individual counterparties. The Company's exposures are in liquid currencies (primarily in U.S. dollars, euros and Australian dollars), so there is minimal risk that appropriate derivatives to maintain the hedging program would not be available in the future.

Table of Contents

FIRST DATA CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(Unaudited)

DERIVATIVES NOT QUALIFYING FOR HEDGE ACCOUNTING

At September 30, 2010, the Company had certain derivative instruments that functioned as economic hedges but no longer qualify or were not designated to qualify for hedge accounting. Such instruments included a cross-currency swap to hedge foreign currency exposure from an intercompany loan, cross-currency swaps to hedge an investment in a foreign subsidiary from fluctuations in foreign currency exchange rates, a foreign exchange rate collar to hedge foreign currency exposure related to an outsourcing contract with a foreign vendor, and interest rate swaps to hedge the interest payments on variable rate debt from fluctuations in interest rates.

During the first quarter of 2009, one of the cash flow hedges of interest payments on the Company's variable rate debt previously designated to qualify for hedge accounting ceased to be highly effective. As such, the Company did not apply hedge accounting to the discontinued hedge during the first quarter of 2009 and discontinued prospective hedge accounting for the affected derivatives with a notional balance of \$1.5 billion. During the second quarter of 2009, the Company made an election with respect to the duration of the variable LIBOR interest rate payments it was hedging which was inconsistent with the original hedge strategy documented in the accounting designation. Accordingly, the Company had to de-designate the affected interest rate swaps, with \$2.0 billion notional amount, from receiving hedge accounting. The Company was able to re-designate prospectively an interest rate swap with a notional amount of \$500 million to continue to receive hedge accounting treatment; however, the other interest rate swaps with \$1.5 billion notional amount no longer met the criteria to qualify for hedge accounting primarily due to the significant off-market value of the swaps and will not be receiving hedge accounting treatment prospectively.

During the second quarter of 2010, two interest rate swaps with a total notional balance of \$1.0 billion and one basis rate swap with a notional balance of \$1.0 billion ceased to be highly effective. As such, the Company did not apply hedge accounting to the discontinued hedges during the second quarter of 2010 and discontinued prospective hedge accounting for the affected derivatives. The amount carried in OCI as of the date of de-designation has been reclassified into earnings in the same period during which the forecasted transaction affected earnings. The amount reclassified in the second quarter and third quarter of 2010 from OCI to the Other income (expense) line of the Consolidated Statements of Operations was \$4.6 million and \$4.6 million, respectively, through the expiration date of the swaps in September 2010.

While the derivatives noted above no longer qualified for hedge accounting, they continued to be effective economically in eliminating the variability in interest rate payments on the corresponding portion of the Company's variable rate debt.

During the third quarter of 2010, five interest rate swaps with a total notional balance of \$2.5 billion and one basis rate swap with a notional balance of \$1.0 billion expired.

As of September 30, 2010, the notional amount of the foreign exchange rate collar was approximately 83.4 million Philippine pesos (\$1.9 million). The notional amount of the cross-currency swaps was 91.1 million euro (approximately \$122.6 million). The notional amount of the interest rate swaps that no longer qualify for hedge accounting was \$1.5 billion.

The periodic change in the mark-to-market of the derivative instruments not designated as accounting hedges is recorded immediately in the Consolidated Statements of Operations. For information on the location and amounts of derivative fair values in the Consolidated Balance Sheets and derivative gains and losses in the Consolidated Statements of Operations, see the tabular information presented below.

DERIVATIVES THAT QUALIFY FOR HEDGE ACCOUNTING

Hedge of a Net Investment in a Foreign Operation

As of September 30, 2010, the Company had a cross currency swap that was designated as a hedge of net investments in foreign operations with an aggregate notional amount of 115.0 million Australian dollars (approximately \$110.5 million).

Edgar Filing: FIRST DATA CORP - Form 10-Q

For information on the location and amounts of derivative fair values in the Consolidated Balance Sheets and derivative gains and losses in the Consolidated Statements of Operations, see the tabular information presented below.

Cash Flow Hedges

As of September 30, 2010, the Company had interest rate swaps which were designated as cash flow hedges of the variability in the interest payments on \$3.5 billion of the approximate \$12.0 billion variable rate senior secured term loan. The Company also had two basis rate swaps, which expired during the third quarter of 2010, that modified the variable rates on \$3.0 billion of the \$3.5 billion interest rate swaps and that lowered the fixed interest rates on those interest rate swaps. The basis swaps paid interest at rates equal to three-month-LIBOR and received interest at rates equal to one-month-LIBOR plus a fixed spread.

Table of Contents

FIRST DATA CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(Unaudited)

At September 30, 2010, the maximum length of time over which the Company is hedging its exposure is approximately 2.0 years. The Company follows the hypothetical derivative method to measure hedge ineffectiveness which resulted mostly from the hedges being off-market at the time of designation. Ineffectiveness associated with these hedges is recognized immediately in the Consolidated Statements of Operations. The amount of losses in OCI related to the hedged transactions as of September 30, 2010 that is expected to be reclassified into the Consolidated Statements of Operations within the next 12 months is approximately \$75.9 million.

For information on the location and amounts of derivative fair values in the Consolidated Balance Sheets and derivative gains and losses in the Consolidated Balance Sheets or in the Consolidated Statements of Operations, see the tabular information presented below.

(a) Represents cost for cost method investments. Refer to Note 10 of these Consolidated Financial Statements for a more detailed discussion of cost method investments.

The estimated fair values of investment securities and derivative financial instruments are described below. Refer to Notes 10 and 11 of these Consolidated Financial Statements for additional information regarding the Company's investment securities and derivative financial instruments, respectively.

The estimated fair market value of long-term borrowings were primarily based on market trading prices. For additional information regarding the Company's borrowings, refer to Note 4 of these Consolidated Financial Statements as well as to Note 9 of the Company's Consolidated Financial Statements in Item 8 of the Company's Annual Report on Form 10-K for the year ended December 31, 2009.

Concentration of credit risk

The Company's investment securities are diversified across multiple issuers within its investment portfolio (investment securities plus cash and cash equivalents). In addition to investment securities, the Company maintains other financial instruments with various financial institutions. The Company has no single issuer representing more than 18% of the total carrying value of the investment portfolio and limits its derivative financial instruments credit risk by maintaining contracts with counterparties rating A or higher. The Company periodically reviews the credit standings of these institutions.

Table of Contents**FIRST DATA CORPORATION****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(Unaudited)****Assets and liabilities measured at fair value on a recurring basis**

Financial instruments carried and measured at fair value on a recurring basis are classified in the table below according to the fair value hierarchy:

As of September 30, 2010 (in millions)	Fair Value Measurement Using			Total
	Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)	
Assets:				
Settlement assets:				
Student loan auction rate securities	\$	\$	\$ 344.9	\$ 344.9
Other available-for-sale securities:

Settlement assets-Student loan auction rate securities

Edgar Filing: FIRST DATA CORP - Form 10-Q

The Company holds SLARS which are long-term debt instruments, issued by student loan trusts, with variable interest rates that historically reset through a periodic Dutch auction process but do not include a put-back option. Due to the collapse of the auction market in 2008, the Company will not be able to readily redeem the SLARS at par value until the auction market successfully resumes, a secondary market is established for long-term investors, or issuers redeem the securities. A failed auction does not represent a default by the issuer of the underlying security. As a result of the failed auctions, the trusts are required and continue to pay maximum interest rates as defined in the security offering documents which are typically based on either LIBOR or Treasury rates plus a spread.

Due to the lack of observable market activity for the SLARS held by the Company, the Company, with the assistance of a third-party valuation firm upon which the Company in part relied, made certain assumptions, primarily relating to estimating both the weighted-average life for the securities held by the Company and the impact on the fair value of the current inability to redeem the securities at par value. All key assumptions and valuations were determined by and are the responsibility of management. The securities were valued using an income approach based on a probability-weighted discounted cash flow analysis. The Company considered each security's key terms including date of issuance, date of maturity, auction intervals, scheduled auction dates, maximum auction rate, as well as underlying collateral, ratings, and guarantees or insurance. The impact of the Company's judgment in the valuation was significant and, accordingly, the resulting fair value was classified as Level 3 within the fair value hierarchy. A 100 basis point change in liquidity risk premium, as well as other factors including default probability and default recovery rate assumptions, would impact the value of the SLARS by approximately \$14 million. For additional information regarding the sale and settlements of SLARS during the third quarter 2010, refer to Note 10 of these Consolidated Financial Statements.

Transfers in (out) of Level 3	
Ending balance September 30, 2010	\$ 344.9

Settlement assets-Other available-for-sale securities

Prices for these securities are not quoted on active exchanges but are priced through an independent third-party pricing service based on quotations from market-makers in the specific instruments or, where appropriate, other market inputs as noted below for each type of instrument.

Corporate bonds market approach using observable inputs including reported trades, benchmark yields, broker/dealer quotes, issuer spreads and other standard inputs

Time deposits typically valued at par

Discounted commercial paper market approach using observable inputs including maturity dates, issue dates, credit ratings, current commercial paper rates and settlement dates

The Company's experience with these types of investments and expectations of the current investments held is that they will be satisfied at the current carrying amount. These securities were classified as Level 2.

Derivative financial instruments

The Company uses derivative instruments to mitigate certain risks. The Company's derivatives are not exchange listed and therefore the fair value is estimated under an income approach using Bloomberg analytics models that are based on readily observable market inputs. These models reflect the contractual terms of the derivatives, such as notional value and expiration date, as well as market-based observables including interest and foreign currency exchange rates, yield curves and the credit quality of the counterparties. The models also incorporate the Company's creditworthiness in order to appropriately reflect non-performance risk. Inputs to the derivative pricing models are generally observable and do

Edgar Filing: FIRST DATA CORP - Form 10-Q

not contain a high level of subjectivity and, accordingly, the Company's derivatives were classified within Level 2 of the fair value hierarchy. While the Company believes its estimates result in a reasonable reflection of the fair value of these instruments, the estimated values may not be representative of actual values that could have been realized or that will be realized in the near future. Refer to Note 11 of these Consolidated Financial Statements for additional information regarding the Company's derivative financial instruments.

Assets and liabilities measured at fair value on a non-recurring basis

The Company did not have any assets or liabilities measured at fair value on a non-recurring basis.

Note 13: Supplemental Guarantor Condensed Consolidating Financial Statements

As described in Note 9 to the Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2009, the Company's 9.875% senior notes, 10.55% senior PIK notes and 11.25% senior subordinated notes are unconditionally guaranteed by substantially all existing and future, direct and indirect, wholly-owned, domestic subsidiaries of FDC other than Integrated Payment Systems Inc. (Guarantors). None of the other subsidiaries of FDC, either direct or indirect, guarantee the notes (Non-Guarantors). The Guarantors also unconditionally guarantee the senior secured revolving credit facility, senior secured term loan facility and the 8.875% senior secured notes which rank senior in right of payment to all existing and future

Table of Contents**FIRST DATA CORPORATION****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(Unaudited)**

unsecured indebtedness of FDC's guarantor subsidiaries. The 9.875% senior note, 10.55% senior PIK note and 11.25% senior subordinated note guarantees are unsecured and rank senior in right of payment to all existing and future subordinated indebtedness of FDC's guarantor subsidiaries. The 9.875% senior note, 10.55% senior PIK note and 11.25% senior subordinated note guarantees rank equally in right of payment with all existing and future senior indebtedness of the guarantor subsidiaries.

The following tables present the results of operations, financial position and cash flows of FDC (FDC Parent Company), the Guarantor subsidiaries, the Non-Guarantor subsidiaries and consolidation adjustments for the three and nine months ended September 30, 2010 and 2009, and as of September 30, 2010 and December 31, 2009 to arrive at the information for FDC on a consolidated basis.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
Overview

First Data Corporation (FDC or the Company), with principal executive offices in Atlanta, Georgia, operates electronic commerce businesses providing services that include merchant transaction processing and acquiring services; credit, retail and debit card issuing and processing services; prepaid card services; and check verification, settlement and guarantee services.

Banc of America Merchant Services, LLC

For a detailed discussion of the Banc of America Merchant Services, LLC (BAMS) transaction, refer to Item 7: Management's Discussion and Analysis of Financial Condition and Results of Operations in the Company's Annual Report on Form 10-K for the year ended December 31, 2009.

Rockmount Investments, LLC (Rockmount) owned a 5% non-voting interest in BAMS. The Company owned a 40% noncontrolling interest in Rockmount. In May 2010, the third party owning a controlling interest in Rockmount exercised a put right on Rockmount's beneficial interest in BAMS requiring net cash payments from FDC of \$213 million. The redemption amount was based on Rockmount's capital account balance in BAMS immediately prior to the redemption with an additional adjustment paid by the Company and Bank of America N.A. based on the level of BAMS revenues for the trailing 12 month period ended March 31, 2010. After redemption by Rockmount, the Company owns 51% of BAMS and Bank of America N.A. owns 49%.

In comparing the nine months ended September 30, 2010 to the same period in 2009 in the Consolidated Results and Segment Results sections below, the impact of the BAMS alliance will be quantified for the first six months of 2010 based on the contribution made by Bank of America N.A.

Regulatory Reform

The payments industry has come under increased scrutiny from lawmakers and regulators. In July 2010, the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the Dodd-Frank Act) was signed into law in the United States. The Dodd-Frank Act will result in significant structural and other changes to the regulation of the financial services industry. Among other things, the Dodd-Frank Act imposes new restrictions on card networks and card issuers and establishes a new executive agency within the Federal Reserve to regulate consumer financial products and services (including many offered by the Company's customers).

Under the Dodd-Frank Act, interchange transaction fees that a card issuer or payment card network receives or charges for an electronic debit transaction must be reasonable and proportional to the cost incurred by the card issuer in processing the transaction. The Federal Reserve Board must prescribe regulations by April 2011 to establish standards for determining whether the amount of any interchange transaction fee is reasonable and proportional, taking into consideration fraud prevention costs, and must prescribe regulations to ensure that network fees, such as the switch fees assessed by First Data's STAR Network, are not used, directly or indirectly, to compensate card issuers with respect to electronic debit transactions or to circumvent or evade the restrictions that interchange transaction fees be reasonable and proportional. The Dodd-Frank Act also bans card issuers and payment card networks from entering into exclusivity arrangements for debit card processing and prohibits card issuers and payment networks from inhibiting the ability of merchants to direct the routing of debit card transactions over networks of their choice. Finally, merchants will be able to set minimum dollar amounts (not to exceed \$10) for the use of a credit card and provide discounts to consumers who pay with various payment methods, such as cash. The impact of the Dodd-Frank Act on First Data is difficult to estimate, in part because regulations need to be developed by the Federal Reserve Board, with respect to interchange fees, and by the new consumer protection entity, the Bureau of Consumer Financial Protection, with respect to consumer financial products and services.

These regulatory changes may create both opportunities and challenges for the Company. Increased regulation may increase the complexity of operating, both domestically and internationally, creating an opportunity for larger competitors to differentiate themselves both in product capabilities and service delivery. At the same time, these regulatory changes may cause the number of transactions the Company processes or its operating margins to decline as the Company adjusts its activities in light of increased compliance costs and customer requirements.

Presentation

Edgar Filing: FIRST DATA CORP - Form 10-Q

Beginning January 1, 2010, the Integrated Payments Systems (IPS) operating segment is being reported within All Other and Corporate. Results for 2009 have been adjusted to reflect the change. Results for 2009 also have been adjusted to reflect the impact of purchase accounting adjustments resulting from the December 2009 final valuation of intangible assets associated with the BAMS alliance. Other amounts in 2009 have been adjusted to conform to current year presentation.

Edgar Filing: FIRST DATA CORP - Form 10-Q

The following provides highlights of revenue and expense growth while a more detailed discussion is included in the Segment Results section below:

Operating revenues overview

Transaction and processing service fees Revenue increased for the three and nine months ended September 30, 2010 compared to the same periods in 2009 due to growth from existing clients and a card association fee increase that only benefits the third quarter of 2010. Partially offsetting these increases were decreases due to foreign currency exchange rate movements, price compression and lost business. The increase in revenue for the nine months ended September 30, 2010 compared to the same period in 2009 was mostly due to the incremental impact of the BAMS alliance which benefited the transaction and processing service fees growth rate by 6 percentage points. Foreign currency exchange rate movements negatively impacted the transaction and processing service fees growth rate for the three-month period by approximately 1 percentage point and benefited the growth rate for the nine-month period by approximately 1 percentage point.

Table of Contents

FIRST DATA CORPORATION

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION

AND RESULTS OF OPERATIONS (Continued)

Product sales and other Revenue increased for the three and nine months ended September 30, 2010 compared to the same periods in 2009 resulting from an increase in volumes due in part to increased terminal demand as a result of new regulations and increased investment income in All Other and Corporate driven by decreased commission payments related to the retail money order business as a result of its transfer to The Western Union Company in October 2009. The nine-month period also benefited compared to the prior year from the incremental impact of the BAMS alliance as well as increased professional services and software related revenue.

Partially offsetting these increases in the three-month period compared to the same period in 2009 were decreases due to the divestiture of an international business in August 2009 and foreign currency exchange rate movements. Foreign currency exchange rate movements negatively impacted the product sales and other growth rate for the three months ended September 30, 2010 compared to the same period in 2009 by 2 percentage points. The nine-month period was adversely impacted by contract termination fees recognized in the second quarter of 2009 related to the termination of services by a customer in the Financial Services segment as well as lower royalty income and the divestiture of an international business. The contract termination fees received in 2009 negatively impacted the product sales and other revenue growth rate by 5 percentage points for the nine months ended September 30, 2010 compared to the same period in 2009.

Reimbursable debit network fees, postage and other Revenue and expense increased during the three and nine months ended September 30, 2010 compared to the same periods in 2009 due to an increase in debit network fees as a result of growth of personal identification number (PIN)-debit transaction volumes as well as rate increases imposed by the debit networks. Also contributing to the increase in revenue and expense for the nine months ended September 30, 2010 compared to the same period in 2009 is the incremental impact of the BAMS alliance which benefited the reimbursable debit network fees, postage and other growth rate by 13 points for the nine-month period. Partially offsetting these increases was a decrease in postage due to a decrease in print and plastic volumes as a result of the termination of services discussed above. The termination of services impacted the reimbursable debit network fees, postage and other revenue growth rates by 2 and 3 percentage points for the three and nine months ended September 30, 2010 compared to the same periods in 2009, respectively.

Operating expenses overview

Cost of services The decrease in cost of services expense for the three months ended September 30, 2010 compared to the same period in 2009 was associated with general cost containment initiatives including employee related expenses which offset an increase in incentive compensation expense.

The increase in expenses for the nine months ended September 30, 2010 compared to the same period in 2009 was due most significantly to the incremental third-party processing fees related to the BAMS alliance and higher incentive compensation expense. The increase in incentive compensation expense for the nine months ended September 30, 2010 compared to the same period in 2009 impacted the cost of services growth rates by 2 percentage points. Foreign currency exchange rate movements also increased expenses for the nine-month period. Partially offsetting the increases for the nine months ended September 30, 2010 compared to the same period in 2009 was a decrease in employee related expenses as a result of reduced headcount.

Cost of products sold Expenses increased for the three and nine months ended September 30, 2010 compared to the same periods in 2009 due to an increase in terminal sales partly due to new regulations as well as a write-off of international leasing receivables incorrectly recognized in prior years and the write-off of international terminal inventory.

Selling, general and administrative The increase in selling, general and administrative expenses for the three and nine months ended September 30, 2010 compared to the same periods in 2009 was due to higher incentive compensation expense and an increase in payments made to independent sales organizations (ISO s) due to the Company increasing the number of ISO s and growth in ISO transaction volumes. The increase in payments made to ISO s impacted the selling, general and administrative expenses growth rates by 5 percentage points and 6 percentage points, respectively, for the three and nine months ended September 30, 2010 compared to the same periods in 2009. Higher incentive compensation expenses impacted the selling, general and administrative expenses growth rates by 4 percentage points for both the

Edgar Filing: FIRST DATA CORP - Form 10-Q

three and nine-month periods compared to the same periods in 2009. The nine-month period was also impacted by higher employee related expenses (part of which resulted from employees assumed as part of the BAMS alliance transaction) which impacted the growth rate for the nine-month period compared to the prior year by 4 percentage points.

Depreciation and amortization Expense decreased for the three and nine months ended September 30, 2010 compared to the same periods in 2009 due to amortization of certain intangible assets that are being amortized on an accelerated basis resulting in higher amortization in prior periods. Also contributing to the decrease for the nine months ended September 30, 2010 compared to the same period in 2009 is accelerated amortization recorded in the second quarter of 2009 related to intangible assets associated with the termination of services noted above. These decreases are partially offset by increases due to newly capitalized assets and assets associated with the BAMS alliance.

FIRST DATA CORPORATION
MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Other operating expenses, net

Restructuring charges and reversal of restructuring accruals

The Company recorded restructuring charges comprised of severance totaling \$33.4 million and \$76.8 million for the three and nine months ended September 30, 2010, respectively. The Company also recorded charges related to facility closures totaling \$0.5 million for the nine months ended September 30, 2010.

A summary of net pretax benefits (charges), incurred by segment, for each period is as follows (in millions):

	Approximate Number of Employees	Retail and Alliance Services	Pretax Benefit (Charge)			Totals
			Financial Services	International	All Other and Corporate	
Three months ended September 30, 2010						
Restructuring charges	360	\$ (12.2)	\$ (3.7)	\$ (8.9)	\$ (8.6)	\$ (33.4)
Restructuring accrual reversal		0.4	0.1	0.3	0.3	1.1
Total pretax charge, net of reversals		\$ (11.8)	\$ (3.6)	\$ (8.6)	\$ (8.3)	\$ (32.3)

	Approximate Number of Employees	Retail and Alliance Services	Financial Services	International	All Other and Corporate	Totals
Restructuring charges	1,080	\$ (18.9)	\$ (10.8)	\$ (21.6)	\$ (26.0)	\$ (77.3)
Restructuring accrual reversal		0.7	0.8	4.5	2.6	8.6
Total pretax charge, net of reversals		\$ (18.2)	\$ (10.0)	\$ (17.1)	\$ (23.4)	\$ (68.7)

The first quarter 2010 restructurings resulted from the Company aligning the business with strategic objectives as well as domestic site consolidations. The second and third quarter 2010 restructurings resulted from actions similar to the first quarter as well as the termination of certain management positions across the organization including the reorganization of executive officers. Similar initiatives are expected to occur in future periods resulting in additional restructuring charges. Partially offsetting the charges were reversals of excess 2008 and 2009 restructuring accruals as well as reversals resulting from the refinement of 2010 estimates. The Company estimates cost savings resulting from the 2010 restructuring activities that have already occurred will be approximately \$41 million in 2010 and approximately \$97 million on an annual basis.

The Company recorded restructuring charges comprised of severance totaling \$11.3 million and \$51.5 million for the three and nine months ended September 30, 2009, respectively. The Company also recorded charges related to facility closures totaling \$0.4 million during the first quarter of 2009.

A summary of net pretax benefits (charges), incurred by segment, for each period is as follows (in millions):

Edgar Filing: FIRST DATA CORP - Form 10-Q

Table of Contents

FIRST DATA CORPORATION
MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

The restructurings in the first quarter of 2009 resulted from the elimination of a select number of management and other positions as part of the Company's cost saving initiatives. The second and third quarter 2009 restructurings resulted from similar actions as in the first quarter in the International segment and domestic restructurings resulted from site consolidations and the elimination of certain information technology positions. The Company incurred additional charges throughout 2009 and in 2010 related to these initiatives. Partially offsetting the charges were reversals of 2009 and 2008 restructuring accruals related to the Company's change in strategy related to global labor sourcing initiatives as well as reversals resulting from the refinement of previously recorded estimates.

Interest expense

Interest expense for the three and nine months ended September 30, 2010 increased compared to the same periods in 2009 due mostly to higher average debt balances. The mark-to-market adjustments for interest rate swaps that do not qualify for hedge accounting as well as interest rate swap ineffectiveness are recorded in the "Other income (expense)" line item of the Consolidated Statements of Operations and totaled charges of \$19.3 million and \$65.6 million for the three and nine months ended September 30, 2010 and charges of \$43.3 million and \$49.0 million for the three and nine months ended September 30, 2009, respectively.

Other income (expense)

Other				5.5
Other income (expense)	\$ (52.3)	\$ (84.5)	\$ (19.3)	\$ (64.8)

Derivative financial instruments losses The net losses for the periods presented represent the mark-to-market adjustments for cross currency swaps and interest rate swaps that are not designated as accounting hedges. The periods presented were impacted most significantly by interest rate swaps.

Divestitures, net The net gain for the nine months ended September 30, 2010 resulted most significantly from a contingent payment received in connection with the Company's November 2009 sale of a merchant acquiring business in Canada. The net loss for the three and nine months ended September 30, 2009 resulted from the sale of the Company's Austrian business in August 2009.

Non-operating foreign currency (losses) gains The net gains and losses relate to the mark-to-market of the Company's intercompany loans and its euro-denominated debt.

Other The benefit in 2009 resulted from the reversal of an accrual established in purchase accounting in 2007.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION

AND RESULTS OF OPERATIONS (Continued)

Income taxes

The Company's effective tax rates on pretax loss from continuing operations were (15.6%), tax expense, and 22.5%, tax benefit, for the three and nine months ended September 30, 2010, respectively, and 34.2% and 36.6%, tax benefits, for the same periods in 2009. The effective tax rate for the three months ended September 30, 2010 was lower than the federal statutory rate primarily due to an increase in the Company's valuation allowance against foreign tax credits (discussed below), an increase in the Company's liability for unrecognized tax benefits and a net tax expense associated with the income tax return-to-provision true-ups for 2009, partially offset by net income attributable to noncontrolling interests for which there was no tax expense provided. The effective tax rate for the nine months ended September 30, 2010 was lower than the federal statutory rate primarily due to an increase in the Company's valuation allowance against foreign tax credits, a net detriment relating to tax effects of foreign exchange gains and losses on intercompany notes and a detriment relating to a tax law change in Greece, partially offset by net income attributable to noncontrolling interests for which there was no tax expense provided, a decrease in the Company's liability for unrecognized tax benefits and state tax benefits. The most significant driver to the decrease in the effective rates in 2010 compared to 2009 is the increase in the valuation allowance against foreign tax credits.

The effective tax rate for the three months ended September 30, 2009 was lower than the federal statutory rate primarily due to the tax impacts of the divestiture of the debit and credit card issuing and acquiring processing business in Austria, partially offset by state tax benefits and net income attributable to noncontrolling interests for pass through entities for which there was no tax expense provided. The effective tax rate for the nine months ended September 30, 2009 was higher than the federal statutory rate primarily due to state tax benefits, foreign income taxed at lower effective rates and net income attributable to noncontrolling interests for pass through entities for which there was no tax expense provided, partially offset by the tax impacts of the Austrian divestiture.

On August 10, 2010, H.R. 1586 was signed into law. This legislation included a tax change that adversely affects the Company's ability to utilize foreign tax credits recorded on the Company's balance sheet. As a result, the Company recorded a valuation allowance against foreign tax credits of approximately \$178 million during the quarter ended September 30, 2010. This valuation allowance will increase over time as foreign taxes are accrued, and will have a continuing adverse impact on the Company's effective tax rate in the future. The tax law change also will have an adverse impact on the Company's cash flow in future periods, when and as the Company would be in a position to utilize foreign tax credits. The Company is currently analyzing whether any feasible strategies are available to mitigate some of the adverse impacts of the legislation. If any such strategies are identified in future periods, the valuation allowance against foreign tax credits would be decreased at that time, and a corresponding tax benefit recorded, to the extent of the actual or planned mitigation.

The balance of the Company's liability for unrecognized tax benefits, net of the federal benefit on state income taxes, was approximately \$543 million as of September 30, 2010, including accrued interest, penalties, and approximately \$130 million of income tax liabilities for which The Western Union Company is required to indemnify the Company. During the nine months ended September 30, 2010, the Company's liability for unrecognized tax benefits was reduced by approximately \$55 million (including approximately \$17 million of accrued interest) upon closure of the 2002 federal tax year and after negotiating settlements with the IRS regarding specific contested issues in the 2003 and 2004 federal tax years. As of September 30, 2010, the Company anticipates it is reasonably possible that its liability for unrecognized tax benefits may change within the next twelve months; however, the Company does not expect the change to significantly increase or decrease the total amounts of unrecognized tax benefits.

Equity earnings in affiliates

Equity earnings in affiliates increased for the three and nine months ended September 30, 2010 compared to the same periods in 2009 due to volume growth associated with merchant alliances.

Net income attributable to noncontrolling interests

Edgar Filing: FIRST DATA CORP - Form 10-Q

Most of the net income attributable to noncontrolling interests relates to the Company's consolidated merchant alliances. The increase for the nine months ended September 30, 2010 compared to the same period in 2009 is mostly due to the formation of the BAMS alliance in June 2009.

Segment Results

Beginning in the third quarter of 2009 the Company began evaluating the Retail and Alliance Services segment based on the Company's proportionate share of the results of non-wholly-owned entities. For a detailed discussion of the Company's principles regarding its segments, refer to Item 7: Management's Discussion and Analysis of Financial Condition and Results of Operations in the Company's Annual Report on Form 10-K for the year ended December 31, 2009.

The Company sold a merchant acquiring business in Canada as well as a debit and credit card issuing and acquiring processing business in Austria, both reported within the International segment, in November 2009 and August 2009, respectively. The results of divested businesses are excluded from segment results. The International performance measures have been adjusted for 2009 to exclude the results of divested businesses.

Table of Contents

FIRST DATA CORPORATION

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION

AND RESULTS OF OPERATIONS (Continued)

Acquiring revenue

Acquiring revenue increased for the three and nine months ended September 30, 2010 compared to the same periods in 2009 due to increases in merchant transaction volumes, new sales and a card association fee increase which will only benefit the third quarter of 2010. The card association fee increase benefited the acquiring revenue growth rates for the three and nine-month periods by 4 and 1 percentage points, respectively. Partially offsetting these increases was merchant attrition and price compression. Changes in consumer spending patterns and new national business resulted in a decrease to the average ticket size of signature based transactions but a slightly higher transaction mix towards such transactions in 2010 compared to 2009. Price compression remains within the Company's historical three and five percent range.

Transactions for the nine-month periods are not comparable year over year due to the item noted in (a) above. Transaction growth for the three-month period outpaced acquiring revenue growth. This resulted from a greater proportion of growth being driven by national merchants and merchants affiliated with ISO's rather than the more profitable regional merchants which caused lower revenue per transaction. Credit and signature based debit transaction growth outpaced PIN-debit transaction growth for the three-month period.

Check processing revenue

Check processing revenue increased for the three and nine months ended September 30, 2010 compared to the same periods in 2009 due most significantly to new business over the last year (mostly national merchants). Partially offsetting the increase were lower overall check volumes from existing customers and merchant attrition, primarily regional merchants.

Prepaid revenue

Prepaid revenue increased for the three and nine months ended September 30, 2010 compared to the same periods in 2009 most significantly due to higher transaction volumes within the payroll distribution program as well as an increase in card shipments to existing clients partially offset by a decrease resulting from timing of holiday card shipments.

Processing fees and other revenue from alliance partners

The increase in processing fees and other revenue from alliance partners in the three and nine months ended September 30, 2010 compared to the same periods in 2009 resulted from increased transactions and rate increases. The nine-month period benefited most significantly from the processing fees related to the BAMS alliance.

Product sales and other revenue

For the three and nine months ended September 30, 2010, product sales and other revenue increased compared to the same periods in 2009 mainly resulting from increased volumes due in part to increased terminal demand as a result of new regulations.

Segment EBITDA

The impact of the revenue items noted above contributed to the increase in the Retail and Alliance Services segment EBITDA for the three and nine months ended September 30, 2010 compared to the same periods in 2009. The card association fee increase noted above benefited the segment EBITDA growth rates for the three and nine-month periods compared to the same periods in 2009 by 8 and 3 percentage points, respectively. Also contributing to the increase were decreased credit losses due to a lower level of merchant delinquencies. Partially offsetting the increases were decreases due to higher operational and technology costs, higher incentive compensation accruals and fees paid for processing transactions associated with merchants contributed to BAMS by Bank of America N.A. The negative impact resulting from third-party processing fees will gradually reverse over time as the Company converts merchants to its platform. Higher incentive compensation impacted the segment EBITDA growth rates by 2 percentage points for the three and nine months ended September 30, 2010 compared to the same

Edgar Filing: FIRST DATA CORP - Form 10-Q

periods in 2009. The margin increased for the three-month period in 2010 compared to 2009 due in part to the card association fee increase noted above. The margin decreased for the nine-month period in 2010 versus 2009 in part due to faster growth in lower margin revenue.

- (b) Domestic active card accounts on file include bankcard and retail accounts that had a balance or any monetary posting or authorization activity during the last month of the quarter.
- (c) Domestic card accounts on file include credit, retail and debit card accounts as of the last day of the last month in the period.

Summary

The Company's results during the three and nine months ended September 30, 2010 were adversely impacted by the termination of services by Washington Mutual beginning in March 2009. The deconversion of Washington Mutual Bank, including contract termination fees recognized in the second quarter of 2009, negatively impacted the total segment revenue growth rates by 2 and 6 percentage points for the three and nine months ended September 30, 2010 compared to the same periods in 2009, respectively.

Other revenue	163.0	119.9	36%
Total	\$ 1,022.4	\$ 1,038.3	(2)%

Credit card, retail card and debit processing revenue

Credit card and retail card processing revenue was negatively impacted for the three and nine months ended September 30, 2010 compared to the same periods in 2009 due to a decline in active accounts from existing customers and price compression partially offset by net new business.

Growth in debit issuer transactions was primarily offset by transactions lost as a result of the Washington Mutual deconversion. Debit issuer transactions grew for the three months and, excluding the impact of the Washington Mutual Bank deconversion, the nine months ended September 30, 2010 compared to the same periods in 2009 due in part to the shift to debit cards from credit cards, cash and checks.

Debit processing revenue decreased for the three and nine months ended September 30, 2010 compared to the same periods in 2009 due to lost business and price compression partially offset by debit transaction growth from existing customers and new business. Lost business included the Washington Mutual Bank deconversion, which negatively impacted the three and nine months ended September 30, 2010 compared to the same periods in 2009. The Financial Services segment Credit card, retail card and debit processing revenue growth rates were negatively impacted by 1 and 3 percentage points for the three and nine months ended September 30, 2010 compared to the same periods in 2009, respectively, as a result of the termination of services provided to Washington Mutual Bank.

The Company received notification from a large financial institution that it will not renew its debit processing agreement at the end of the contract term. The contract is scheduled to expire in December 2010. However, the deconversion is not expected to be complete until late 2011 with no impact to revenue in 2010. The Company has also received notification of termination from various other debit clients that are less significant individually, which are scheduled to deconvert throughout 2010 and 2011. Including the large financial institution, these agreements represented approximately 4% of the segment's transaction and processing service fees revenue for 2009.

Output services revenue

Output services revenue increased for the three months ended September 30, 2010 compared to the same period in 2009 due most significantly to net new business including a large one-time plastics order in the third quarter of 2010. Output services revenue decreased for the nine months ended September 30, 2010 compared to the same period in 2009 due to net lost business, price compression and decreases in print mail and plastics volumes from existing customers as a result of credit card issuers being more selective in issuing credit. Most of the lost business in the three and nine months ended September 30, 2010 compared to the same periods in 2009 relates to Washington Mutual Bank which negatively impacted the output services revenue growth rates by 7 and 10 percentage points for the three and nine months ended September 30, 2010 compared to the same periods in 2009, respectively.

Other revenue

Other revenue consists mostly of revenue from remittance processing, online banking and bill payment services as well as information services. Other revenue increased for the three and nine months ended September 30, 2010 compared to the same periods in 2009 due most significantly to the inclusion of the information services businesses in the Financial Services segment prospectively beginning January 1, 2010 which impacted the other revenue growth rates by 24 percentage points in both periods. Other revenue also increased due to new business in remittance processing and online banking and bill payment services. Partially offsetting these increases were decreases due to lower remittance and check

Edgar Filing: FIRST DATA CORP - Form 10-Q

processing volumes resulting from the shift from paper to electronic forms of payment and lost business. The nine-month period was also adversely impacted by the wind down of an existing product.

Table of Contents

FIRST DATA CORPORATION
MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Product sales and other revenue

Product sales and other revenue increased in the three months ended September 30, 2010 compared to the same period in 2009 due to contract termination fees received in the third quarter of 2010. The decrease in product sales and other revenue for the nine months ended September 30, 2010 compared to the same period in 2009 resulted almost entirely from the recognition of contract termination fees in the second quarter of 2009 related to the termination of services with Washington Mutual Bank. The Company expects to recognize the remaining contract termination fees from Washington Mutual Bank upon completion of the deconversion in the fourth quarter of 2010.

Segment EBITDA

In addition to the items noted above, Financial Services segment EBITDA decreased for the three and nine months ended September 30, 2010 compared to the same periods in 2009 due to higher incentive compensation and higher operational and technology costs. The nine-month period was also adversely impacted by a billing adjustment. Higher incentive compensation negatively impacted the segment EBITDA growth rates by 2 percentage points for both the three and nine months ended September 30, 2010 compared to the same periods in 2009, respectively. The billing adjustment negatively impacted the segment EBITDA growth rate for the nine-month period by 1 percentage point.

International Segment Results

- (b) International card accounts on file include bankcard and retail.

Table of Contents

FIRST DATA CORPORATION
MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Summary

Segment revenue for the three and nine months ended September 30, 2010 compared to the same periods in 2009 benefited from growth from existing clients, new business and acquisitions. Partially offsetting these increases were decreases due to lost business and price compression. In addition, the three-month period was adversely impacted by foreign currency exchange rate movements while the nine-month period benefited from such movements.

Foreign currency exchange rate movements adversely impacted the segment revenue growth rate for the three-month period by 3 percentage points and benefited the segment revenue growth rate for the nine-month period by 3 percentage points compared to the same periods in 2009. The Company formed a merchant acquiring alliance with ICICI Bank, ICICI Merchant Services, in December 2009 which positively impacted segment revenue growth by 1 percentage point for both periods.

Transaction and processing service fees revenue

Transaction and processing service fees revenue includes merchant related services, check processing services and card services revenue. Merchant related services revenue encompasses merchant acquiring and processing revenue, debit transaction revenue, POS/ATM transaction revenue and fees from switching services. Card services revenue represents monthly managed service fees for issued cards. Merchant related services transaction and processing service fee revenue represented approximately 57% and 56% and card services revenue represented approximately 42% and 43% for the three and nine months ended September 30, 2010, respectively.

Transaction and processing service fees revenue increased for the three and nine months ended September 30, 2010 compared to the same periods in 2009 due to growth from existing clients, new business, and acquisitions. These increases are partially offset by lost business and price compression. In addition, transaction and processing service fees revenue was adversely impacted by foreign currency exchange rate movements during the three-month period and positively impacted during the nine-month period ended September 30, 2010 compared to the same periods in 2009. Foreign exchange rate movements adversely impacted transaction and processing service fees revenue growth rate by 3 percentage points for the three months and positively impacted the growth rate by 3 percentage points for the nine months ended September 30, 2010 compared to the same periods in 2009.

Transaction and processing service fees revenue is driven by accounts on file and transactions. The spread between growth in these two indicators and revenue growth was driven mostly by the impact of foreign exchange rate movements, the mix of transaction types and price compression.

Product sales and other

Product sales and other revenue increased for the three and nine months ended September 30, 2010 compared to the same periods in 2009 due mostly to growth in terminal sales and leasing revenue as a result of new clients and growth from existing clients in Argentina and Canada. Software related revenue also contributed to the increase.

Segment EBITDA

Segment EBITDA decreased in the three and nine months ended September 30, 2010 compared to the same periods in 2009 due to higher incentive compensation, the write-off of leasing receivables in the second and third quarters of 2010, the write-off of terminal inventory in the third quarter of 2010, higher operational and technology costs and price compression. The write-off of leasing receivables incorrectly recognized in prior years and the write-off of terminal inventory negatively impacted segment EBITDA growth rates by approximately 9 and 7 percentage points for the three and nine months ended September 30, 2010 compared to the same periods in 2009, respectively. In addition, segment

Edgar Filing: FIRST DATA CORP - Form 10-Q

EBITDA was impacted by foreign currency exchange rate movements (as discussed in the revenue discussion above) which adversely impacted the growth rate for the three-month period by 3 percentage points and positively impacted the growth rate by 3 percentage points for the nine-month period compared to the same periods in 2009.

Capital Resources and Liquidity

The Company's source of liquidity is principally cash generated from operating activities supplemented as necessary on a short-term basis by borrowings against its revolving credit facility. The Company believes its current level of cash and short-term financing capabilities along with future cash flows from operations are sufficient to meet the needs of the business. The following discussion highlights the Company's cash flow activities and the sources and uses of funding during the nine months ended September 30, 2010 and 2009.

Table of Contents

FIRST DATA CORPORATION
MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Cash and Cash Equivalents

Investments (other than those included in settlement assets) with original maturities of three months or less (that are readily convertible to cash) are considered to be cash equivalents and are stated at cost, which approximates market value. At September 30, 2010 and December 31, 2009, the Company held \$442.0 million and \$737.0 million in cash and cash equivalents, respectively.

Included in cash and cash equivalents are amounts held by IPS that are not available to fund any operations outside of the IPS business. In addition, cash and cash equivalents also includes amounts held by the BAMS alliance, which is consolidated by the Company, that are not available to fund operations outside of the alliance. At September 30, 2010 and December 31, 2009, the cash and cash equivalents held by IPS and the BAMS alliance totaled \$202.7 million and \$345.1 million, respectively. All other domestic cash balances, to the extent available, are used to fund the Company's short-term liquidity needs.

Cash and cash equivalents also includes amounts held outside of the U.S. at September 30, 2010 and December 31, 2009 totaling \$193.6 million and \$247.1 million, respectively. As of September 30, 2010, there was approximately \$90 million of cash and cash equivalents held outside of the U.S. that could be used for general corporate purposes. The Company plans to fund any cash needs in 2010 within the International segment with cash held by the segment, but if necessary, could fund such needs using cash from the U.S., subject to satisfying debt covenant restrictions.

Cash Flows from Operating Activities

Source/(use) (in millions)	Nine months ended September 30,	
	2010	2009
Net loss	\$ (717.0)	\$ (676.2)
Depreciation and amortization (including amortization netted against equity earnings in affiliates and revenues)	1,136.5	1,142.2
Charges related to other operating expenses and other income (expense)	86.0	113.7
Other non-cash and non-operating items, net	241.9	225.0
Increase (decrease) in cash, excluding the effects of acquisitions and dispositions, resulting from changes in:		
Accounts receivable, current and long-term	323.0	298.1
Other assets, current and long-term	271.5	176.0
Accounts payable and other liabilities, current and long-term	(522.6)	(255.4)
Income tax accounts	(291.8)	(458.0)
Net cash provided by operating activities	\$ 527.5	\$ 565.4

Cash flows provided by operating activities for the periods presented resulted from normal operating activities and reflect the timing of the Company's working capital requirements.

The Company's operating cash flow is impacted by its level of debt. Interest on the Company's senior unsecured debt and senior secured note is payable semi-annually in the first and third quarters of the year. Accordingly, the cash interest of the Company is greater in the first and third quarters than it is in the second and fourth quarters (all other debt has interest due monthly or quarterly). Approximately \$1,189 million and \$1,209 million in cash interest was paid during the nine months ended September 30, 2010 and 2009, respectively.

Edgar Filing: FIRST DATA CORP - Form 10-Q

The Company's operating cash flows are impacted by fluctuations in working capital. During 2010, such fluctuations included, most significantly, sources related to the utilization of settlement assets to prefund certain settlement arrangements, the collection of receivables and distributions of earnings received from alliances. Such sources were offset by uses associated with the timing of prefunding certain settlement arrangements, timing of payments for various liabilities including semi-annual payments of interest on senior unsecured debt, severance payments and incentive compensation earned in 2009.

During 2009, sources of cash were associated with the timing of prefunding certain settlement arrangements, collection of receivables and distributions of earnings received from alliances. Such sources were offset by uses associated with timing of payments for various liabilities including semi-annual payments of interest on senior unsecured debt and incentive compensation earned in 2008. The formation of BAMS negatively impacted working capital in the nine months ended September 30, 2009 due most significantly to the prefunding of associated settlement arrangements as partially offset by the timing of payments on various expenses incurred by the alliance. Cash flows from operating activities for the nine months ended September 30, 2009 included a source of cash of \$246 million which resulted from funding of domestic settlement obligations which should have been received from a card association on December 31, 2008 but was not received until the first business day of 2009 due to a file transfer delay.

Table of Contents

FIRST DATA CORPORATION

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION

AND RESULTS OF OPERATIONS (Continued)

Operating cash flows for both the nine months ended September 30, 2010 and 2009 were impacted by the Company being in a net operating loss carryforward position for U.S. federal income tax purposes. As a result, the Company has not received cash for any of the income tax benefit recorded in the respective nine-month periods related to U.S. federal income taxes.

Cash flows from operating activities decreased for the nine months ended September 30, 2010 compared to the same period in 2009 due most significantly to the \$246 million out of period collection in 2009, the timing of payments on liabilities and the timing of prefunding described above partially offset by a source in 2010 resulting from the utilization of settlement assets for prefunding also described above.

The Company anticipates funding operations throughout 2010 primarily with cash flows from operating activities and by closely managing discretionary capital and other spending; however, any shortfalls would be supplemented as necessary by borrowings against its revolving credit facility.

Cash Flows from Investing Activities

Source/(use) (in millions)	Nine months ended September 30,	
	2010	2009
Current period acquisitions, net of cash acquired	\$ (1.2)	\$ (14.9)

Additions to property and equipment	(157.5)	(137.6)
Proceeds from sale of property and equipment	1.8	23.6
Payments to secure customer service contracts, including outlays for conversion, and capitalized systems development costs	(121.8)	(125.2)
Other investing activities	18.6	(46.0)
Net cash used in investing activities	\$ (240.3)	\$ (307.9)

Acquisitions and Dispositions

The Company finances acquisitions through a combination of internally generated funds, short-term borrowings and equity of its parent company. Although the Company considers potential acquisitions from time to time, the Company's plan for 2010 does not include funding of material acquisitions. All acquisitions during the periods presented were funded from cash flows from operating activities or from the reinvestment of cash proceeds from the sale of other assets.

During the nine months ended September 30, 2009, payments related to other businesses previously acquired related mostly to contingent consideration associated with a merchant alliance for which there will be no additional payments. Additionally, no significant payments associated with other businesses are anticipated.

During the nine months ended September 30, 2010, proceeds from dispositions related most significantly to the receipt of a contingent payment associated with the Company's sale of a merchant acquiring business in Canada in the fourth quarter of 2009.

Capital Expenditures

Edgar Filing: FIRST DATA CORP - Form 10-Q

Capital expenditures are estimated to be approximately \$400 million for the full year in 2010. Capital expenditures in 2010 are expected to be funded by cash flows from operations. If, however, cash flows from operating activities are insufficient, the Company will decrease its discretionary capital expenditures or utilize its revolving credit facility. During the nine months ended September 30, 2009, the Company entered into sale leaseback transactions for certain equipment which resulted in proceeds from the sale of approximately \$22 million.

Other Investing Activities

The source of cash in the nine months ended September 30, 2010 related to a decrease in regulatory, restricted and escrow cash balances. The use of cash for the nine months ended September 30, 2009 related primarily to a \$28.0 million contribution to its merchant acquiring alliance with The PNC Financial Services Group upon extending the term of the alliance agreement and a \$20.2 million increase in regulatory and restricted cash balances.

Cash dividends	(14.9)	
Net cash used in financing activities	\$ (590.0)	\$ (78.5)

Short-Term Borrowings, net

The source of cash related to short-term borrowings in 2010 resulted primarily from net borrowings on the Company's senior secured revolving credit facility. The use of cash related to short-term borrowings in 2009 resulted from \$195.0 million of net payments on credit lines used principally to prefund settlement activity partially offset by a net \$114.7 million draw on the senior secured revolving credit facility.

The Company's senior secured revolving credit facility currently has commitments from nondefaulting financial institutions to provide \$1,769.4 million of credit. The Company had \$20.0 million outstanding against this facility as of September 30, 2010 and no amount outstanding as of December 31, 2009. As of September 30, 2010, \$1,697.8 million remained available under this facility after considering the amount outstanding and the letters of credit issued under the facility. The maximum amounts outstanding against this facility during the three and nine months ended September 30, 2010 were approximately \$20 million and \$345 million with an additional \$52 million and \$54 million in letters of credit, respectively.

The Company utilizes its revolving credit facility on a short-term basis to fund investing or operating activities when cash flows from operating activities are not sufficient. The Company believes the capacity under its senior secured revolving credit facility is sufficient to meet its short-term liquidity needs. The senior secured revolving credit facility can be used for working capital and general corporate purposes.

*Debt modification and related financing costs*Senior secured credit facilities

On August 10, 2010, FDC amended its senior secured credit facilities to, among other things:

(i) allow for FDC to incur additional secured indebtedness or additional unsecured indebtedness so long as certain restrictions are met pertaining to repayment of existing debt, issuance limits and ranking;

Edgar Filing: FIRST DATA CORP - Form 10-Q

(ii) exclude from the calculation of consolidated senior secured debt (and hence from the maintenance covenant) certain indebtedness secured by a lien ranking junior to the liens securing FDC's obligations under its senior secured credit facilities; and

(iii) subject to the requirement to make such offers on a pro rata basis to all lenders within a particular class of loans, allow FDC to agree with individual lenders to extend the maturity of their term loans or revolving commitments, and for FDC to pay increased interest rates or otherwise modify the terms of their loans or revolving commitments in connection with such an extension.

The amendment became effective, including the changes to the credit agreement described above, on August 20, 2010 following FDC's issuance of \$510.0 million in new notes and using the net cash proceeds therefrom to prepay a like amount of FDC's secured term loans. Refer to the Senior secured notes section below. The issuance was accounted for as a modification resulting in only the net effect of the issuance being reflected as a use of cash. The Company paid a net amount of \$24.1 million in fees related to the modification.

Table of Contents

FIRST DATA CORPORATION
MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Senior secured notes

On August 20, 2010, FDC issued \$510.0 million of 8.875% senior secured notes due August 15, 2020. Interest on the notes is payable on February 15 and August 15 of each year, commencing on February 15, 2011. The proceeds from this issuance, net of discount and underwriting fees of \$17.8 million, were \$492.2 million, of which \$489.7 million was used to prepay a portion of the senior secured term loans in accordance with the terms of FDC's senior secured credit facilities as described above with the remainder used to pay costs associated with the issuance.

FDC may redeem the notes, in whole or in part, at any time prior to August 15, 2015 at a price equal to 100% of the principal amount of the notes redeemed plus accrued and unpaid interest to the redemption date and an additional premium as defined. Thereafter, FDC may redeem the notes, in whole or in part, at established redemption prices, plus accrued and unpaid interest to the redemption date. In addition, on or prior to August 15, 2013, FDC may redeem up to 35% of the notes with the net cash proceeds from certain equity offerings at established redemption prices plus accrued and unpaid interest to the redemption date.

The note guarantees, security and ranking are substantially the same as the senior secured credit facility discussed in the Guarantees and Covenants section in Item 7: Management's Discussion and Analysis of Financial Condition and Results of Operations in the Company's 2009 Annual Report on Form 10-K.

Principal Payments on Long-Term Debt

The Company made principal payments of \$96.2 million and \$96.7 million related to its senior secured term loan facility during the nine months ended September 30, 2010 and 2009, respectively. In August 2010, in conjunction with the debt modification noted above, \$489.7 million of the Company's proceeds from the issuance of the senior notes described below were used to prepay a portion of the principal balances and satisfy the above described future quarterly principal payments of the Company's senior secured term loans. As a result of the prepayment, the Company has satisfied the quarterly principal payments related to these loans until September 2014.

In June 2010, the Company paid off its 4.50% note due 2010 for \$13.1 million. In addition, the Company paid \$34.1 million in debt restructuring fees in each of the third quarters of 2010 and 2009.

Payments for capital leases were \$61.1 million and \$52.9 million for the nine months ended September 30, 2010 and 2009, respectively.

As of November 11, 2010, the Company's long-term corporate family rating from Moody's was B3 (stable). The long-term local issuer credit rating from Standard and Poor's was B (stable). The long-term issuer default rating from Fitch was B (stable). Economic conditions and the Company's current level of debt may impair the ability of the Company to get additional funding beyond its revolving credit facility if needed.

Contributions from Noncontrolling Interests

Activity in 2009 represents the cash contribution from Rockmount to BAMS. The contribution represents the cash contributed by the third-party investor that controlled Rockmount. For additional information regarding the BAMS alliance, refer to Item 7: Management's Discussion and Analysis of Financial Condition and Results of Operations in the Company's Annual Report on Form 10-K for the year ended December 31, 2009.

Distributions and Dividends Paid to Noncontrolling Interests and Redeemable Noncontrolling Interests

Edgar Filing: FIRST DATA CORP - Form 10-Q

Distributions and dividends paid to noncontrolling interests and redeemable noncontrolling interests primarily represent distributions of earnings. The increase in 2010 from 2009 is primarily the result of distributions associated with the BAMS alliance.

Purchase of Noncontrolling Interest

The use of cash in 2010 relates to the redemption amount paid to the third party investor in Rockmount to redeem its interest in the BAMS alliance. For additional information regarding the redemption, refer to the [Overview](#) section above.

Table of Contents

FIRST DATA CORPORATION
MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Cash Dividends

The Company paid cash dividends to its parent company, First Data Holdings, during the nine months ended September 30, 2010.

Letters, Lines of Credit and Other

(in millions)	Total Available		Total Outstanding	
	As of September 30, 2010	As of December 31, 2009	As of September 30, 2010	As of December 31, 2009
Letters of Credit ^(a)	\$ 500.0	\$ 500.1	\$ 51.6	\$ 39.7
Lines of Credit and Other ^(b)	\$ 524.8	\$ 565.1	\$ 113.6	\$ 109.2

- (a) Up to \$500 million of the Company's senior secured revolving credit facility is available for letters of credit, of which \$51.6 million and \$39.6 million of letters of credit were issued under the facility as of September 30, 2010 and December 31, 2009, respectively. An additional \$0.1 million of letters of credit were outstanding associated with other arrangements as of December 31, 2009. Outstanding letters of credit are held in connection with certain business combinations, lease arrangements, bankcard association agreements and other security agreements. All letters of credit expire prior to July 25, 2011 with a one-year renewal option. The Company expects to renew most of the letters of credit prior to expiration.
- (b) As of September 30, 2010, represents \$390.7 million of committed lines of credit as well as certain uncommitted lines of credit and other agreements that are available in various currencies to fund settlement and other activity for the Company's international operations. Except for \$13.5 million available for working capital needs, the Company cannot use these lines of credit for general corporate purposes. Certain of these arrangements are uncommitted but, as of the dates presented, the Company had borrowings outstanding against them. In the event one or more of the aforementioned lines of credit becomes unavailable, the Company will utilize its existing cash, cash flows from operating activities or its revolving credit facility to meet its liquidity needs.

Significant Non-Cash Transactions

During the nine months ended September 30, 2010 and 2009, the principal amount of the Company's senior PIK (Payment In-Kind) notes increased by \$362.5 million and \$333.0 million, respectively, resulting from the payment of accrued interest expense.

During the nine months ended September 30, 2010 and 2009, the Company entered into capital leases totaling approximately \$50 million and \$101 million, respectively.

In March 2009, the remaining balance of the Company's 9.875% senior unsecured cash-pay term loan bridge loans due 2015 that was not previously exchanged was exchanged for senior notes. There was no expenditure, other than professional fees incurred in connection with the Exchange Offering itself, or receipt of cash associated with this exchange.

On June 26, 2009, the Company entered into an alliance with Bank of America N.A. and Rockmount as discussed in Item 7: Management's Discussion and Analysis of Financial Condition and Results of Operations in the Company's Annual Report on Form 10-K for the year ended December 31, 2009. The Company's and Bank of America N.A.'s direct contributions to the alliance consisted of non-cash assets and liabilities.

Edgar Filing: FIRST DATA CORP - Form 10-Q

On August 10, 2009, the Company launched a registered exchange offer to exchange aggregate principal amounts of \$3.2 billion of its 10.55% senior PIK notes, \$2.5 billion of its 11.25% senior subordinated notes and \$1.6 billion of its 9.875% senior notes (which constituted all such notes outstanding at that date) for publicly tradable notes having substantially identical terms and guarantees, except that the exchange notes are freely tradable. Substantially all of the notes were exchanged effective September 9, 2009. There was no expenditure, other than professional fees incurred in connection with the Registration Statement itself, or receipt of cash associated with this exchange.

Guarantees and Covenants

For a description of guarantees and covenants and covenant compliance refer to the Guarantees and Covenants and Covenant Compliance sections in Item 7: Management's Discussion and Analysis of Financial Condition and Results of Operations in the Company's 2009 Annual Report on Form 10-K. As of September 30, 2010, the Company is in compliance with all applicable covenants, including its sole financial covenant with Consolidated Senior Secured Debt of \$12,603.2 million, Consolidated EBITDA of \$2,580.7 million and a Ratio of 4.88 to 1.00.

Table of Contents

FIRST DATA CORPORATION

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION

AND RESULTS OF OPERATIONS (Continued)

The calculation of Consolidated EBITDA under the senior secured term loan facility is as follows (in millions):

	Last twelve months ended September 30, 2010
Net loss attributable to First Data Corporation	\$ (1,211.2)
Interest expense, net (1)	1,799.1
Income tax benefit	(396.9)
Depreciation and amortization (2)	1,548.1
EBITDA (13)	1,739.1
Stock based compensation (3)	14.7
Other items (4)	322.8
Official check and money order EBITDA (5)	(7.0)
Cost of data center, technology and savings initiatives (6)	66.7
KKR merger related items (7)	30.3
Pre-acquisition EBITDA of acquired or divested businesses (8)	(5.3)
Projected near-term cost savings and revenue enhancements (9)	245.0
Net income attributable to noncontrolling interests (10)	155.8
Equity entities taxes, depreciation and amortization (11)	14.0
Other (12)	4.6
Consolidated EBITDA (13)	\$ 2,580.7

- (1) Includes interest expense and interest income.
- (2) Includes amortization of initial payments for new contracts which is recorded as a contra-revenue within Transaction and processing service fees of \$38.1 million and amortization related to equity method investments which is netted within the Equity earnings in affiliates line of \$74.2 million.
- (3) Stock based compensation recognized as expense.
- (4) Other items include net restructuring, impairments, litigation and regulatory settlements, investment gains and losses, derivative financial instruments gains and losses, net divestitures, non-operating foreign currency gains and losses and other as applicable to the period presented.
- (5) Represents an adjustment to exclude the official check and money order businesses from EBITDA due to the Company's wind down of these businesses.
- (6) Represents implementation costs associated with initiatives to reduce operating expenses including items such as platform and data center consolidation initiatives in the International segment, expense related to the reorganization of global application development resources, expense associated with domestic data center consolidation initiatives and planned workforce reduction expenses, expense related to the conversion of certain BAMS merchant clients onto First Data platforms, as well as certain platform development and other costs directly associated with the termination of the Chase Paymentech alliance, all of which are considered one-time projects (excludes costs accrued in purchase accounting).
- (7) Represents the exclusion of third-party expenses including legal, accounting and other advisory fees incurred in connection with the merger of the Company with an affiliate of KKR and the debt issued thereunder, KKR annual sponsor fees for management, consulting,

Edgar Filing: FIRST DATA CORP - Form 10-Q

- financial and other advisory services and the effect of purchase accounting associated with the merger on EBITDA, which is primarily the result of revenue recognition adjustments.
- (8) Reflects the EBITDA of companies acquired or divested after September 30, 2009 through September 30, 2010, as if these companies had been acquired or divested on October 1, 2009.
 - (9) Reflects cost savings and revenue enhancements projected to be achieved within twelve months on an annualized basis, principally in connection with cost savings initiatives described in Note 6 and the BAMS alliance.
 - (10) Net income attributable to noncontrolling interests in restricted subsidiaries.
 - (11) Represents the Company's proportional share of income taxes, depreciation, and amortization on equity method investments.
 - (12) Includes non-capitalized merger and acquisitions costs and losses on equity method investments.
 - (13) EBITDA is defined as net income (loss) attributable to First Data Corporation before net interest expense, income taxes, depreciation and amortization. EBITDA is not a recognized term under U.S. generally accepted accounting principles (GAAP) and does not purport to be an alternative to net income (loss) attributable to First Data Corporation as a measure of operating performance or to cash flows from operating activities as a measure of liquidity. Additionally, EBITDA is not

Table of Contents

FIRST DATA CORPORATION

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION

AND RESULTS OF OPERATIONS (Continued)

intended to be a measure of free cash flow available for management's discretionary use as it does not consider certain cash requirements such as interest payments, tax payments and debt service requirements. The presentation of EBITDA has limitations as an analytical tool and should not be considered in isolation or as a substitute for analysis of the Company's results as reported under GAAP. Management believes EBITDA is helpful in highlighting trends because EBITDA excludes the results of decisions that are outside the control of operating management and can differ significantly from company to company depending on long-term strategic decisions regarding capital structure, the tax jurisdictions in which companies operate and capital investments. Management compensates for the limitations of using non-GAAP financial measures by using them to supplement GAAP results to provide a more complete understanding of the factors and trends affecting the business than GAAP results alone.

Consolidated EBITDA (or debt covenant EBITDA) is defined as EBITDA adjusted to exclude certain non-cash items, non-recurring items that the Company does not expect to continue at the same level in the future and certain items management believes will impact future operating results and adjusted to include near-term cost savings projected to be achieved within twelve months on an annualized basis principally in connection with cost savings initiatives described in Note 6 above. Consolidated EBITDA is further adjusted to add net income attributable to noncontrolling interests of certain non-wholly-owned subsidiaries and exclude other miscellaneous adjustments that are used in calculating covenant compliance under the agreements governing the Company's senior unsecured debt and/or senior secured credit facilities. The Company believes that the inclusion of supplementary adjustments to EBITDA are appropriate to provide additional information to investors about items that will impact the calculation of EBITDA that is used to determine covenant compliance under the agreements governing the Company's senior unsecured debt and/or senior secured credit facilities. Since not all companies use identical calculations, this presentation of Consolidated EBITDA may not be comparable to other similarly titled measures of other companies.

Off-Balance Sheet Arrangements

During the three and nine months ended September 30, 2010 and 2009, the Company did not engage in any off-balance sheet financing activities.

Contractual Obligations

There have been no material changes outside the ordinary course of business in the Company's contractual obligations and commercial commitments from those reported at December 31, 2009 in the Company's Annual Report on Form 10-K other than an approximate \$55 million reduction in the Company's liability for unrecognized tax benefits (including approximately \$17 million of accrued interest) discussed in the Income Taxes section above.

Critical Accounting Policies

The Company's critical accounting policies have not changed from those reported in Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations in the Company's Annual Report on Form 10-K for the year ended December 31, 2009.

New Accounting Guidance

In October 2009, the FASB revised its guidance on Revenue Recognition for Multiple-Deliverable Revenue Arrangements. The amendments in this update enable companies to separately account for multiple revenue-generating activities (deliverables) that they perform for their customers. Existing U.S. GAAP requires a company to use vendor-specific objective evidence (VSOE) or third-party evidence of selling price to separate deliverables in a multiple-deliverable arrangement. The update does allow for the use of an estimated selling price if neither VSOE nor third-party evidence is available. The update requires additional disclosures of information about an entity's multiple-deliverable arrangements. The requirements of the update apply prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010, although early adoption is permitted. The Company adopted the new guidance on January 1, 2010 and has no arrangements for which this adoption will have a material impact on its financial position and results of operations.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There have been no material changes from the Company's Annual Report on Form 10-K for the year ended December 31, 2009 related to its exposure to market risk from interest rates or foreign currency.

Regulatory

Through its merchant alliances, the Retail and Alliance Services segment holds an ownership interest in several competing merchant acquiring businesses while serving as the electronic processor for those businesses. In order to satisfy state and federal antitrust requirements, the Company actively maintains an antitrust compliance program.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of disclosure controls and procedures

The Company's disclosure controls and procedures are designed to cause information required to be disclosed in reports that the Company files or submits under the Securities Exchange Act of 1934 to be recorded, processed, summarized and reported within the time periods specified in SEC rules and forms. The Company has evaluated, under the supervision of its Chief Executive Officer and Chief Financial Officer, the effectiveness of disclosure controls and procedures as of September 30, 2010. Based on this evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of September 30, 2010, to ensure that material information regarding the Company is made known to management, including the Chief Executive Officer and Chief Financial Officer, to allow the Company to meet its disclosure obligations.

Changes in internal control over financial reporting

There were no changes in the Company's internal control over financial reporting identified in connection with the above evaluation that occurred during the last fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

From time to time, the Company is involved in various litigation matters arising in the ordinary course of its business. None of these matters, either individually or in the aggregate, currently is material to the Company except those matters reported in the Company's Annual Report on Form 10-K for the year ended December 31, 2009 and the Company's Quarterly Reports on Form 10-Q for the quarterly periods ended March 31, 2010 and June 30, 2010 (collectively the Reports). There were no material developments in the litigation matters previously disclosed except as discussed below.

ATM Fee Antitrust Litigation

In the ATM Fee Antitrust Litigation action that was previously reported in the Reports, on September 16, 2010, the Court entered an order granting defendants' motion for summary judgment, dismissing all of the claims against the defendants except for the claims for equitable relief. The Court granted judgment in favor of the defendants, dismissing the case on September 17, 2010. On October 14, 2010, the plaintiffs appealed the summary judgment.

ITEM 1A. RISK FACTORS

There are no material changes to the risk factors as reported in the Company's Annual Report on Form 10-K for the year ended December 31, 2009 and the Company's Quarterly Report on Form 10-Q for the quarter ended June 30, 2010.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

None

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None

ITEM 4. RESERVED

ITEM 5. OTHER INFORMATION

On November 10, 2010, First Data Holdings Inc., the sole shareholder of the Company, executed an unanimous written consent re-electing James R. Fisher, Joe W. Forehand, Jonathan J. Judge, Henry R. Kravis, Scott C. Nuttall and Tagar C. Olson as directors of the Company, to serve until the earlier of the next annual meeting of shareholders or the election and qualification of their respective successors.
