- Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Item 2.02. Results of Operations and Financial Condition.

On February 7, 2012, TTM Technologies, Inc. (the Company) filed a Current Report on Form 8-K (the Original Filing) with the Securities and Exchange Commission furnishing a press release that announced the Company s financial results for the fourth quarter and year ended December 31, 2011. This Amendment No. 1 on Form 8-K/A is being filed to amend certain information set forth in the Original Filing.

Subsequent to the issuance of the press release and the Original Filing, the Company determined, pursuant to APB 23, to permanently reinvest all earnings of the Company s 70% owned SYE manufacturing subsidiary located in Dongguan, China. This resulted in an approximately \$2.8 million decrease in the Company s 2011 income tax provision reflected in the Original Filing. The adjusted income tax provision is \$1.3 million for the quarter ended December 31, 2011 (compared to \$4.1 million as previously reported) and \$26 million for the year ended December 31, 2011 (compared to \$28.8 million as previously reported).

The net impact of the above adjustment is an increase in net income attributable to stockholders for the quarter ended December 31, 2011 to \$11.2 million, or \$0.14 per diluted share (compared to \$8.4 million, or \$0.10 per diluted share, as previously reported), and an increase in net income attributable to stockholders for the year ended December 31, 2011 to \$41.9 million, or \$0.51 per diluted share (compared to \$39.1 million, or \$0.48 per diluted share, as previously reported).

On a non-GAAP basis, the net impact of the above adjustment is an increase to net income attributable to stockholders for the quarter ended December 31, 2011 to \$29.3 million, or \$0.36 per diluted share (compared to \$27.7 million, or \$0.34 per diluted share as previously reported), and an increase in net income attributable to stockholders for the year ended December 31, 2011 to \$126.5 million, or \$1.54 per diluted share (compared to \$124.8 million, or \$1.52 per diluted share as previously reported).

Previously reported results for the first three quarters of 2011 are not affected by the adjustments. The financial statements included below in this report reflect the adjustments noted above. The Company s Form 10-K for the year ended December 31, 2011, filed with the Securities and Exchange Commission on February 29, 2012, reflects this corrected information.

About Our Non-GAAP Financial Measures

This report contains information about the Company s non-GAAP net income attributable to stockholders and non-GAAP earnings per share attributable to stockholders, which are non-GAAP financial measures. Management believes that both measures—which add back amortization of intangibles, stock-based compensation expense, non-cash interest expense on debt, asset impairments, restructuring and other charges as well as the associated tax impact of these charges—provide additional useful information to investors regarding the Company—s ongoing financial condition and results of operations.

A material limitation associated with the use of the above non-GAAP financial measures is that they have no standardized measurement prescribed by GAAP and may not be comparable to similar non-GAAP financial measures used by other companies. The Company compensates for these limitations by providing full disclosure of each non-GAAP financial measure and reconciliation to the most directly comparable GAAP financial measure. However, the non-GAAP financial measures should not be considered in isolation from, or as a substitute for, financial information prepared in accordance with GAAP.

TTM TECHNOLOGIES, INC.

^{1.} This information provides a reconciliation of EBITDA, adjusted EBITDA, GAAP net income (excluding impairments) attributable to stockholders, GAAP EPS (excluding impairments) attributable to stockholders, non-GAAP net income attributable to stockholders and non-GAAP EPS attributable to stockholders to the financial information in our consolidated statements of operations.

Adjusted EBITDA is defined as earnings before interest expense, income taxes, depreciation, amortization and asset impairments. We present adjusted EBITDA to enhance the understanding of our operating results, and it is a key measure we use to evaluate our operations. In addition, we provide our adjusted EBITDA because we believe that investors and securities analysts will find adjusted EBITDA to be a useful measure for evaluating our operating performance and comparing our operating performance with that of similar companies that have different capital structures and for evaluating our ability to meet our future debt service, capital expenditures, and working capital requirements. However, adjusted EBITDA should not be considered as an alternative to cash flows from operating activities as a measure of liquidity or as an alternative to net income as a measure of operating results in accordance with accounting principles generally accepted in the United States of America.

- 3. This information provides GAAP net income attribututable to stockholders and GAAP EPS attributable to stockholders excluding asset impairments and related income tax effects.
- 4. This information provides non-GAAP net income attributable to stockholders and non-GAAP EPS attributable to stockholders, which are non-GAAP financial measures. Management believes that both measures—which add back amortization of intangibles, stock-based compensation expense, non-cash interest expense on debt (before consideration of capitalized interest), asset impairments, restructuring and other charges as well as the associated tax impact of these charges—provide additional useful information to investors regarding the Company s ongoing financial condition and results of operations.
